Last Update: 14 Mar-2012

Centralized Credentials Quality Assurance System (CCQAS)

The CCQAS is a Web-based, worldwide credentialing, privileging, risk management, and adverse actions database maintained by the Military Health System.

Product Features

❑ Captures and stores current and historical data on military healthcare providers' credentials, privileges, medical malpractice claims, and adverse privileging actions

❑ Automates the provider's application for privileges

❑ Has robust standard and ad-hoc reporting capabilities

Benefits to the Military Health System

❑ Allows providers to apply for privileges electronically

❑ Allows for the electronic workflow for review, routing, and approval of provider privileges

❑ Streamlines the credentialing and privileging process
