

## **Protecting personnel in support of military operations worldwide through the identification, evaluation, and control of occupational and environmental health stressors**

**The Defense Occupational Environmental Health Readiness System – Industrial Hygiene [DOEHRIS-IH] manages occupational and environmental health readiness data and actively tracks chemical and physical hazards for the Department of Defense Military Health System.**

### **Product Features**

- Captures and maintains comprehensive, operational and work task exposure based medical surveillance recommendations
- Tracks DoD lifetime personnel exposure data
- Captures workplace practices and protection equipment usage in support of military operations worldwide (garrison, shore-based, pre-deployment, deployment, and post deployment)

### **Benefits to the Military Health System**

- Tracks personnel health hazard training
- Ensures operational and work task personnel readiness
- Supports compliance with occupational health and safety federal laws and directives
