Securing your most confidential information

The Protected Health Information Management Tool [PHIMT] is a Web-based tracking tool that stores information about Protected Health Information [PHI] disclosures, authorizations and restrictions in the Department of Defense Military Health System. It allows patients to request PHI about themselves and permits agencies to request PHI on a particular patient.

Product Features

❑ Records all PHI disclosures, access requests and restrictions
❑ Reports PHI authorizations and complaints
❑ Processes PHI access authorizations

Benefits to the Military Health System

❑ Provides a Web-based disclosure-tracking tool
❑ Stores information about PHI disclosures
❑ Tracks all PHI requests and disclosures worldwide
