## Student Profiles

## Student Testimonials

"I took a course in Implementation Management and got involved in health information technology because as a nurse, the technological revolution has hit me on the ground level. ... The Implementation Management class helped me develop an understanding of the core concepts of health information technology, health care, and project management..."

**Kathi Dahlberg**  
Lansing Community College, MI

Linda Gebaroff had a background in IT and nursing. After her job had been outsourced she enrolled in the Workforce Training Program at Bellevue College.

"I recently accepted an offer for the position electronic health record (EHR) implementation and training specialist! ... Enrolling in this program was the best move I ever made. I'm really excited about my new career."

**Linda Gebaroff**  
Bellevue College, WA

"... In August 2009, I was laid off when the company moved my department. Through a combination of my background and the education and expertise I gained at Bellevue College, I was able to find a position as an Informatics Manager at Swedish Health Services, a major health care service provider in the Seattle area."

**Andrew Zydel**  
Bellevue College, WA
