[—] Represents or rounds to zero. ¹ Schools reporting membership are those which report at least one student enrolled on October 1 of the school year. In any given year, some small schools will not have any students. The Common Core of Data (CCD) allows a student to be reported for only a single school or agency. For example, a vocational school (identified as a "shared time" school) may provide classes for students from a number of districts and show no membership. ² A charter school is a school that provides free public elementary and/or secondary education to eligible students under a specific charter granted by the state legislature or other appropriate authority and that is designated by such authority to be a charter school. The 2000 estimates exclude one state for lack of complete data. ³ A Title I School is designated under appropriate state and federal regulations as a high-poverty school that is eligible for participation in programs authorized by Title I of P.L. 107-110. The 2000 estimates exclude six states for lack of complete data. ⁴ A magnet school or program is a special school or program designed to attract students of different racial/ethnic backgrounds in an effort to reduce, prevent, or eliminate racial isolation and/or provide an academic or social focus on a particular theme. The 2000 estimates exclude 13 states for lack of complete data, and the 2008 estimates exclude 17 states. ⁵ The 2000 estimates exclude 2,220 schools for lack of complete data, and the 2008 estimates exclude 3 schools. Race categories exclude persons of Hispanic ethnicity.

Table 264. Public School Districts Offering Various Technology Resources to All or Some Students by District Characteristics: 2008

[In percent. As of Fall. Percents are based on the percent of public school districts with students at that level (97 percent of districts have elementary students and 88 percent have secondary students). For composition of regions, see map, inside front cover]
