

ENERGY STAR Ventilating Fans Product List

List Posted on February 20, 2013

Below are currently qualified ENERGY STAR models available for sale in the U.S. and Canada.

* Where a range of as-tested airflow, efficacy, or sound level values is reported, this indicates that in the case of a range hood, multiple configurations are available, and in the case of a bathroom or utility room fan, or an in-line ventilating fan, the fan has more than one speed.

** It is standard industry practice to round down airflow to the nearest 10 cfm when publishing this metric in product directories as the Airflow Certified Rating. For this reason, Airflow Certified Rating and As-Tested Airflow may occasionally differ on this list. In the case of a range hood, Airflow Certified Rating represents performance at working speed, while in the case of a bathroom or utility room fan, or an in-line ventilating fan, it represents maximum speed.

| ENERGY STAR Partner | Brand | Model Name | Model Number | Additional Model List | Unit Type | Number of Speeds | As-Tested Airflow (CFM)* | Fan Efficacy (CFM/W)* | Sound Level (sones)* | Airflow Certified Rating (CFM)** | Lighting Technology Used | Light Output (Lumens) | Total Input Power (Watts) | Luminaire Efficacy | Power Factor | Correlated Color Temperature (Kelvin) | Color Rendering Index (CRI) | Life of Light Source (Hours) | Special Features (Dimming, Motion Sensing etc) | Notes | Date Available On Market | Date Qualified | Markets | ENERGY STAR Model Identifier |

Definitions for Column Headers

| Performance Characteristic | Definitions |
|-------------------------------------|--|
| ENERGY STAR Partner | An organization that signed a Partnership Agreement with EPA to manufacture or private label ENERGY STAR qualified products. |
| Brand | An identifier assigned by the manufacturer or private labeler to a product or family/series of products for sales and marketing purposes. |
| Model Name | An identifier assigned by the manufacturer or private labeler to a product or family/series of products for sales and marketing purposes. |
| Model Number | A distinguishing identifier, usually alphanumeric, assigned to a product by the manufacturer or private labeler. |
| Additional Model Information | This column includes for the qualified model or family, family members, additional model names, model numbers and other identifying information associated with a product or family/series of products for sales and marketing purposes. Other identifying information includes, but is not limited to, SKUs, UPC codes, retail numbers, and/or descriptions of models included/not included in the reported Model Family. |
| Unit Type | The type of ventilating fan. |
| Number of Speeds | The number of speeds available for a ventilating fan. For fans with three or more speeds, only 3 is displayed. |
| As-Tested Airflow | Where a range of as-tested airflow, efficacy, or sound level values is reported, this indicates that in the case of a range hood, multiple configurations are available, and in the case of a bathroom or utility room fan, or an in-line ventilating fan, the fan has more than one speed. |
| Fan Efficacy | Efficacy is calculated by using airflow and fan motor electrical power values as tested per the requirements of this specification. Fan motor electrical usage is the only energy consumption considered for the fan efficacy calculation. Energy used for other fan auxiliaries (e.g., lights, sensors, heaters, timers, or night lights) is not included in the determination of fan efficacy. |

| Performance Characteristic | Definitions |
|---------------------------------|--|
| Sound Level | Residential bath and utility ventilating fans and range hoods must meet maximum allowable sound levels between 2-3 sones. There are no sound requirements for single or multi-port in-line fans. |
| Airflow Certified Rating | It is standard industry practice to round down airflow to the nearest 10 cfm when publishing this metric in product directories as the Airflow Certified Rating. For this reason, Airflow Certified Rating and As-Tested Airflow may occasionally differ on this list. In the case of a range hood, Airflow Certified Rating represents performance at working speed, while in the case of a bathroom or utility room fan, or an in-line ventilating fan, it represents maximum speed. |
| Lighting Technology Used | The light source technology utilized by the fixture: compact fluorescent light (CFL), light emitting diode (LED), or halogen. |
| Light Output | The amount of light emitted by the light source or light fixture. Non directional fixtures (with removable light sources i.e. GU24 base bulbs) are measured at the light source and do not account for light lost from the fixture, while other fixtures meant to put light on a specific application (e.g. recessed downlights, under cabinet lights, accent lights, cove lights) are measured at the fixture level, only counting the light that escapes the fixture. |
| Total Input Power | Total power consumed by the luminaire while in use. |
| Light Output | The amount of light emitted by the light source or light fixture. Non directional fixtures (with removable light sources i.e. GU24 base bulbs) are measured at the light source and do not account for light lost from the fixture, while other fixtures meant to put light on a specific application (e.g. recessed downlights, under cabinet lights, accent lights, cove lights) are measured at the fixture level, only counting the light that escapes the fixture. |

| Performance Characteristic | Definitions |
|-------------------------------------|---|
| Luminaire Efficacy | The quotient of the total luminous flux (lumens) emitted by the fixture over the total power input (Watts). It is expressed in lumens per watt (lm/W). For ENERGY STAR qualified fixtures this applies to light fixtures that are considered directional and are measured at the fixture level. This includes the following residential grade directional fixture types: line-voltage track lights, ceiling fan light kits, undercabinet and cove lighting, downlights, recessed, pendant or surface mounted and includes retrofit kits for existing recessed cans. This also includes the following LIMITED commercial fixture types: Accent lights such as line-voltage track lights, under cabinet task lights, portable desk task lights, downlights, recessed, pendant or surface-mounts BUT EXCLUDES typical commercial and industrial fixtures such as recessed troffers or linear forms (e.g. linear fluorescent pendants) typically used in office spaces. |
| Power Factor | Ratio of real power flowing to the lamp to the apparent power in the circuit. A lamp with a lower power factor will draw more current than a lamp with a higher power factor of the same wattage. |
| Correlated Color Temperature | A description of the "color" of a light source measured on the Kelvin (K) scale. CFLs are available in a range of color temperatures. Lower values (2700-3000K) mean the white light has a warmer (red-yellow) tone, while higher kelvin (4100-6500K) mean the white light has a cooler (bluer) tone. |
| Color Rendering Index | Measure of the degree of color shift objects undergo when illuminated by the light source as compared with the color of those same objects when illuminated by a reference source of comparable color temperature. |
| Light Source Life | The expected useful life of the light source. Measured differently depending on the technology of the light source. For example, LED lighting expected useful life is based on the estimated point at which only 70% of the original light output remains, while for older technologies, like fluorescent and halogen, estimated useful life is based on the measured median sample life. |
| Special Features | Most fixtures are designed to operate on an on/off switch. However, some fixtures have been designed with features to perform in specialized applications, such as with dimmers, three-way, or photo cell controls. Special features and compatibility with controls should be clearly marked on the product packaging, cut sheet or web site for the product. |

| Performance Characteristic | Definitions |
|-------------------------------------|---|
| Notes | Indicates information on certification relevant to the consumer (i.e. product variations, unique issues concerning the model's listing, etc.). |
| Date Available on Market | The date that the model is available for purchase. |
| Date Qualified | The date on which the product was confirmed to meet the ENERGY STAR specification. |
| Markets | This list/dataset includes products sold in the U.S. and/or Canada and other ENERGY STAR partner countries. |
| ENERGY STAR Model Identifier | A unique string of characters used to identify models with the same performance characteristics. This sequence is generated by certification bodies and is reported as a single row of data on the lists of certified products. |

Key Efficiency Criteria

Qualified models meet all ENERGY STAR requirements as listed in the Version 3.2 ENERGY STAR Program Requirements for Ventilating Fans that are effective as of April 1, 2012.

| Criteria for ENERGY STAR Qualified Residential Ventilating Fans - Minimum Efficacy Levels | |
|---|---------------------------------|
| Airflow | Minimum Efficacy Level (cfm/W)* |
| Range Hoods — up to 500 cfm (max) | 2.8 |
| Bathroom and Utility Room Fans — 10 to 89 cfm | 1.4 |
| Bathroom and Utility Room Fans — 90 to 500 cfm (max) | 2.8 |
| In-Line (single-port & multi-port) Fans | 2.8 |

| Criteria for ENERGY STAR Qualified Residential Ventilating Fans — Maximum Sound Levels | |
|--|--|
| Airflow (cfm) | Maximum Allowable Sound Level (Sones)* |
| Range Hoods — up to 500 cfm (max) | 2 |
| Bathroom and Utility Room Fans — 10 to 139 cfm | 2 |
| Bathroom and Utility Room Fans — 140 to 500 cfm (max) | 3 |

| Installed Fan Performance | |
|--|-------------------------------|
| Airflow (cfm) | Rated Airflow (0.25 in. w.g.) |
| Bathroom and Utility Room Fans — 10 to 89 cfm | 0.6 |
| Bathroom and Utility Room Fans — 90 to 500 cfm | 0.7 |

Notes:

* Based on static pressure reference measurement (consult the full program requirements).

Criteria for ENERGY STAR Qualified Residential Ventilating Fans with Lighting

| Performance Characteristic | Specification Luminaires V1.2 |
|--|---|
| Light Output | <p>Non-directional luminaires (those listed with a "Source Efficacy" value in column J): ≥ 800 lumens, or ≥ 450 lumens for fixtures with three sources or more.</p> <p>Directional fixtures: ≥ 125 lumens/foot for undercabinet, 200 lumens/foot for cove mount, 345 or 575 for downlights (depending on aperture size), 200 lumens per head for accent lights, 300 lumens for outdoor post-mounted luminaires.</p> |
| Source Efficacy (non-directional luminaires) | <p>≥ 65 lm/W ≥ 70 lm/W after September 2013</p> |
| Luminaire Efficacy (directional luminaires) | Dependent on fixture type/application starting at ≥ 29 lm/W |
| Power Factor | <p>Residential: ≥ 0.5 Commercial: ≥ 0.9</p> <p>Solid State Residential with input power greater than 5 watts: ≥ 0.7</p> |
| Correlated Color Temperature | Lamps shipped with luminaires shall have one of the following nominal correlated color temperatures (CCT): 2700K, 3000K, 3500K, 4000/4100K, 5000K (commercial only) |
| Color Rendering Index | Ra ≥ 80 |

Criteria for ENERGY STAR Qualified Residential Ventilating Fans with Lighting

| Performance Characteristic | Specification Luminaires V1.2 |
|-----------------------------------|--|
| Light Source Life | Fluorescent and HID: ≥ 10,000 hours Halogen incandescent: ≥ 2,500 hours Solid state (LED): ≥ 25,000 residential or ≥ 35,000 commercial |
