DENVER CENTER

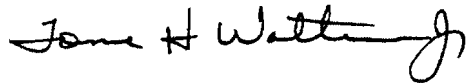

SUBJECT: Interim Security Assistance Management Manual (SAMM) Change –
CORRECTION to Missile Technology Control Regime (MTCR) Review Policy
for Explosives (DSCA Policy 02-40)

SAMM E-Change 29 (DSCA Policy 02-06) added a new paragraph 50004.D2 to excuse MTCR reviewers from reporting artillery shells and other explosive ammunition or devices that contain HMX, RDX, or other compounds listed in Item 4 of the MTCR Annex. The wording of the new paragraph was unclear. It is to be replaced with the following:

"2. The reviewer must report the compounds listed in Item 4 of the MTCR Annex if they are to be exported in bulk as an input for a

manufacturing process, or in any other manner or form that might support the creation of a propellant for a missile or an unmanned air vehicle (UAV). However, the reviewer is NOT to report Item 4 explosive compounds if they are molded or poured into a form that precludes their use as rocket propellant (e.g., as a bursting, propelling or gas-generating charge in a shell, cartridge, squib or actuator).”

This correction will be included in the automated version of the SAMM as E-Change 39. If you have any questions concerning this change, please contact Col. Craig McLane, DSCA/WEAPS, (703) 604-6625 (DSN 664) or e-mail: craig.mclane@osd.pentagon.mil.

TOME H. WALTERS, JR.
LIEUTENANT GENERAL, USAF
DIRECTOR
