

## Keeping Current on Food Safety Reform

Foodborne illness is a serious public health problem in the United States, with one out of six Americans suffering from such an illness each year. The FDA Food Safety Modernization Act (FSMA) represents the most comprehensive reform of the nation's food safety laws in 70 years. For the first time ever, it makes prevention the cornerstone of food safety. Follow FDA's progress in implementing the reforms in this law by regularly checking out the FSMA website where you can:
