FOR RELEASE December 18, 1969

MANUFACTURING PROFITS REPORTED. The SEC and Federal Trade Commission today reported that U. S. manufacturing corporations reported sales of \$172.4 billion in the third quarter of 1969 and before-tax profits of \$13.9 billion. The sales total is 10 percent above the third quarter of 1968 and earnings before taxes are 4 percent higher. Profits after taxes totaled \$8.0 billion in the July-September quarter; this also amounts to a 4 percent gain over the year earlier quarter. The Report also reveals a further decline in the liquidity position of manufacturing corporations. Sales and before-tax profits declined from the second to the third quarter of this year, 2 percent and 12 percent, respectively, due primarily to seasonal patterns in the durable goods industries. When seasonal influences are taken into consideration, sales appear to have increased about 2 percent while earnings show little change from the second quarter. The margin of profit for manufacturing corporations--earnings before taxes per dollar of sales--amounted to 8.1 cents in the third quarter; this compares with 9.0 cents in the second quarter and 8.5 cents in the comparable quarter of last year. For further details, see Stat. Release No. 2408.
