MEETING FEDERAL NEEDS

Age is central for any number of federal programs that target funds or services to children, working-age adults, women of childbearing age, or the older population. The U.S. Department of Education uses census age data in its formula for allotment to states. Under the Voting Rights Act, these data on population of voting age are required for legislative redistricting. The U.S. Department of Veterans Affairs uses age to develop its mandated state projections on the need for hospitals, nursing homes, cemeteries, domiciliary services, and other benefits for veterans.

COMMUNITY BENEFITS

Education

Counties and school districts are allotted funds based on age data. These funds provide resources and services to improve the education of economically disadvantaged children and children with disabilities.

Locations where new schools are needed, as well as the required grade levels (elementary, middle, or high school) are identified using data about age.

Government

Data presenting the voting-age population are used by states to meet legislative redistricting requirements.

Planners at all levels of government forecast the need for highways, hospitals,

health services, and retirement homes by using age data.

Employment

Data about age are used to target veterans for job training programs.

Equal employment opportunities are enforced using data about age.

Social Services

Age data are used to forecast the number of people eligible for Social Security and Medicare benefits.

Under the Older Americans Act, age data are part of the formula used to allocate funds for services to seniors with low incomes.
