

American Community Survey

Housing: Questions on Value

COMMUNITY BENEFITS

Housing

Statistics about housing value are used by local agencies in determining the adequacy of housing units for older people, the cost of maintaining owned units, and the potential usefulness of home equity conversion programs.

Banking

Data about home values are used by the U.S. Department of Housing and Urban Development as an independent check of appraised values for determining the amount of mortgage to be financed.

Social Services

These data are used to allocate funds for home mortgage insurance for the elderly, and lower- and moderate-income and displaced families in programs under the U.S. Department of Housing and Urban Development.

Local social service organizations use these data for locating service areas and identifying clients wanting specific services, such as thrift and discount stores, to be located nearby.

Transportation

These data are used in developing transportation plans for local areas by assessing the impact on the value of homes affected by road, bridge, and subway construction, and related problems such as noise and pollution.
