

*XVIIth World Congress on Safety and
Health at Work*

Department of Defense Workplace Safety and Health Forum,
Orlando, Florida
September 2005

"SIMPLY WONDERFUL"
ERGONOMIC
INTERVENTION

Lawrence Mullen
Naval Air Depot Jacksonville, Florida
NADEP JAX Certified Ergonomist
lawrence.mullen@navy.mil

In the beginning -- The Problem

✓ Manually lifting
Recorders (91lbs)
onto carts and
workbenches

✓ Maneuvering
recorder for
maintenance

Better....but. My Back Still Hurts!

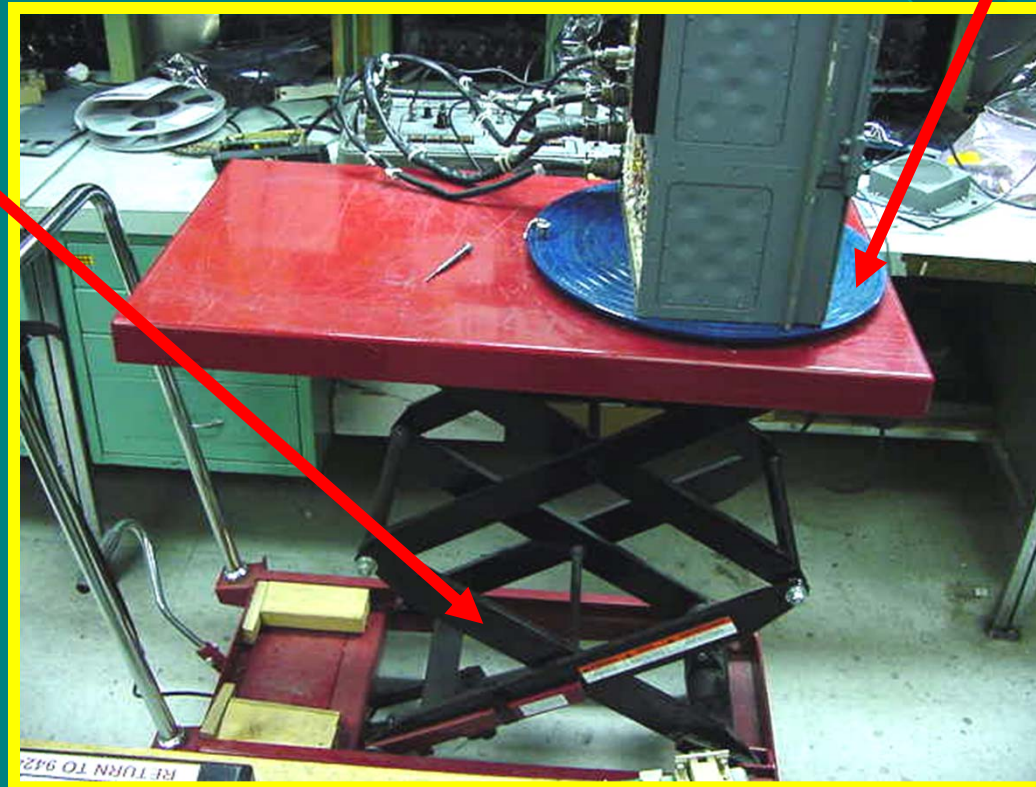

✓ Requires moving the recorder manually

✓ Causes strains on the artisan when he is performing maintenance

We Can Fix That!

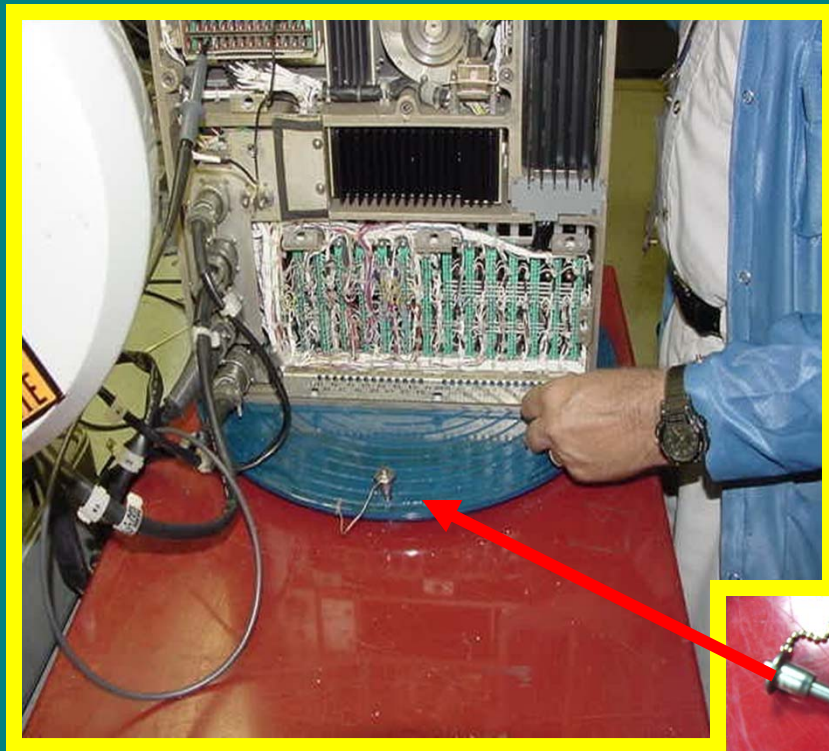

✓ Double Scissor Lift Cart
with variable height from
8 inches to 5 feet

✓ 18 inch turntable

Don't Stop There! What if...

✓ Locking compass points
on the scissor table for ease
of maintenance

✓ Locking pin for the
turntable

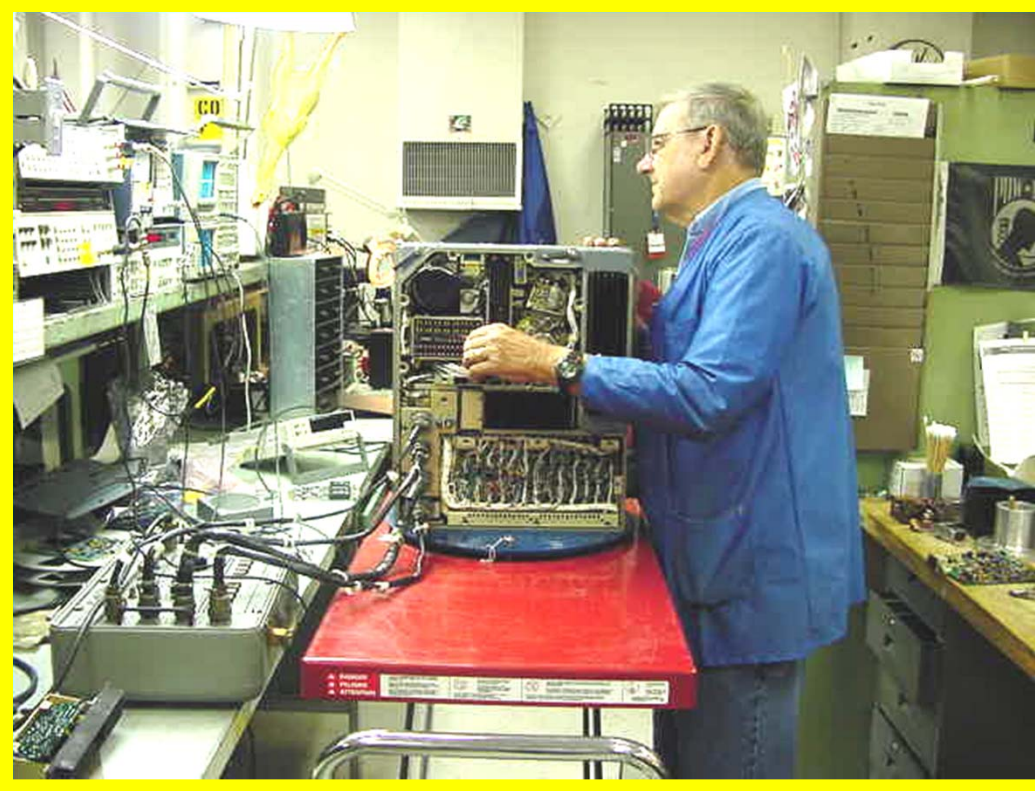

Jacksonville's “Ergonomic Trifecta”

It's so SIMPLE!

So ECONOMICAL!

And so EFFECTIVE!

A job well done!

✓ A REAL
winner and
one HAPPY
Artisan

***Successful ERGONOMIC Programs
Require Command Support***

Supervisor -- Robert Bradshaw

Division Director -- Roy Luke

**Ergonomics Program Manager --
Barbara Wright**

Safety Director -- Chris Williamson

Commanding Officer -- CAPT David Beck

Without their help we could not succeed

Questions?
