

# U.S. Department of Homeland Security Annual Performance Report

Fiscal Years 2011 – 2013

Homeland  
Security

## *Our Vision*

---

*A homeland that is safe, secure, and resilient  
against terrorism and other hazards.*

### **About this Report**

The U.S. *Department of Homeland Security Annual Performance Report for Fiscal Years (FY) 2011 – 2013* presents the Department's performance measures and applicable results, associated performance targets for FY 2012 and FY 2013, and provides information on the Department's Priority Goals.

For FY 2011, the Department is using the alternative approach—as identified in the Office of Management and Budget's Circular A-136—to produce its Performance and Accountability Reports, which consists of the following three reports:

- ***DHS Annual Financial Report:*** Publication date – November 11, 2011.
- ***DHS Annual Performance Report:*** Publication date – February 13, 2012. The *DHS Annual Performance Report* is submitted with the Department's Congressional Budget Justification.
- ***DHS Summary of Performance and Financial Information:*** Publication date – February 13, 2012.

When published, all three reports will be located on our public website at:  
[http://www.dhs.gov/xabout/budget/editorial\\_0430.shtm](http://www.dhs.gov/xabout/budget/editorial_0430.shtm).

Appendix B: Program Evaluations

## Introduction

The U.S. *Department of Homeland Security (DHS) Annual Performance Report (APR) for Fiscal Years 2011 – 2013* presents the Department’s performance measures and applicable results for FY 2011, associated performance targets for FY 2012 and FY 2013, and information on the Department’s Priority Goals.

The APR is part of the Office of Management and Budget’s ([OMB](#)) alternative approach to the consolidated Performance and Accountability report and is submitted as part of DHS’s FY 2013 Congressional Budget Justification. This report also satisfies the *Government Performance and Results Act (GPRA)* and the *GPRA Modernization Act of 2010* requirement to publish the Department’s Annual Performance Plan.

## Missions and Responsibilities for Homeland Security

This report is organized around DHS’s major missions and responsibilities within the framework of the Quadrennial Homeland Security Review ([QHSR](#)) and the subsequent structure developed in the DHS Bottom-Up Review ([BUR](#)). In each mission area identified in the BUR, we have continued to grow and mature as a department by strengthening our existing capabilities, building new ones where necessary, enhancing our partnerships across all levels of government and with the private sector, and streamlining our operations and increasing efficiency.

Eight years since the Department’s creation and ten years after the September 11, 2001 terrorist attacks, the results are clear: we have helped build a more effective and integrated Department, a strengthened homeland security enterprise, and a more secure America that is better equipped to confront the range of evolving threats we face. A summary of our missions and responsibilities follows.

### ***Mission 1: Preventing Terrorism and Enhancing Security***

Protecting the United States from terrorism is the cornerstone of homeland security. DHS’s counterterrorism responsibilities focus on three goals: preventing terrorist attacks; preventing the unauthorized acquisition, importation, movement, or use of chemical, biological, radiological, and nuclear materials and capabilities within the United States; and reducing threats to and vulnerability of critical infrastructure, key resources, essential leadership, and major events from terrorist attacks and other hazards.

### ***Mission 2: Securing and Managing Our Borders***

The protection of the Nation’s borders—land, air, and sea—from the illegal entry of people, weapons, drugs, and other contraband while facilitating lawful travel and trade is vital to homeland security, as well as the Nation’s economic prosperity. The Department’s border security and management efforts focus on three interrelated goals: effectively securing U.S. air, land, and sea borders; safeguarding and streamlining lawful trade and travel; and disrupting and dismantling transnational criminal and terrorist organizations.

### ***Mission 3: Enforcing and Administering Our Immigration Laws***

The success of our Nation’s immigration policy plays a critical role in advancing homeland security. DHS is focused on smart and effective enforcement of U.S. immigration laws while streamlining and facilitating the legal immigration process. The Department has fundamentally reformed immigration enforcement, focusing on identifying and removing criminal aliens who pose a threat to public safety and targeting employers who knowingly and repeatedly break the law.

### ***Mission 4: Safeguarding and Securing Cyberspace***

Cyberspace is highly dynamic and the risks posed by malicious cyber activity often transcend sector and international boundaries. Today’s threats to cybersecurity require the engagement of the entire society—from government and law enforcement to the private sector and most importantly, members of the public—to mitigate malicious activities while bolstering defensive capabilities.

DHS is responsible for protecting the federal executive branch civilian agencies and guiding the protection of the nation’s critical infrastructure. This includes the “dot-gov” world, where the government maintains essential functions that provide services to the American people, as well as privately owned critical infrastructure which includes the systems and networks that support the financial services industry, the energy industry, and the defense industry.

### ***Mission 5: Ensuring Resilience to Disasters***

DHS coordinates comprehensive federal efforts to prepare for, protect against, respond to, recover from, and mitigate a terrorist attack, natural disaster or other large-scale emergency, while working with individuals, communities, the private and nonprofit sectors, faith-based organizations, local, state, tribal, territorial and federal partners to ensure a swift and effective recovery effort. The Department’s efforts to build a ready and resilient Nation include fostering a Whole Community approach to emergency management nationally; building the Nation’s capacity to stabilize and recover from a catastrophic event; bolstering information sharing and building unity of effort and common strategic understanding among the emergency management team; building plans and providing training to our homeland security partners; and promoting preparedness within the private sector.

### ***Providing Essential Support to National and Economic Security***

Homeland security is an integral element of broader U.S. national security and domestic policy. It is not, however, the only element. The *National Security Strategy* clearly identifies national defense and economic security as other elements—along with homeland security—of overall U.S. national security. DHS leads and supports many activities that provide essential support to national and economic security including, but not limited to: maximizing collection of customs revenue; maintaining the safety and security of the marine transportation system; preventing the exploitation of children; providing law enforcement training; and coordinating the Federal Government’s response to global intellectual property theft. DHS contributes in many ways to these elements of broader U.S. national and economic security while fulfilling its homeland security missions.

## Performance Management Framework in DHS

DHS has created a robust performance framework that drives performance management and enables the implementation of performance initiatives and the reporting of results within the Department on a comprehensive set of measures that are aligned with the mission outcomes articulated in the QHSR and the Bottom-Up Review. This framework consists of a performance community, an annual process to review and improve performance measurement, and a verification and validation process. The framework also incorporates quarterly reporting of measure data, and quarterly performance reviews by the Chief Operating Officer. Finally, the performance management framework integrates with the Department's Planning, Programming, Budgeting, and Execution (PPBE) process to develop an integrated performance budget.

### Performance Community

The DHS performance community is led by the Performance Improvement Officer (PIO), supported by the Office of Program Analysis and Evaluation, the Performance Action Team, and Performance staff from across the Department and the Components. The Performance Action Team is comprised of the chiefs of the lines of business and other senior leaders who work with the PIO to manage cross-cutting initiatives issued by the White House and Office of Management and Budget, such as the new Executive Order on *Delivering an Efficient, Effective, and Accountable Government*. The PIO is also supported by staff from across the Department which consists of performance analysts from each of our Components and headquarters organizations who are primarily responsible for performance data collection, reporting, and analysis within the Department. This performance community, along with the Chief Operating Officer, drives performance management in DHS.

### Annual Process to Review and Improve Performance Measurement

With the issuance of the BUR in July of 2010, DHS leadership led a comprehensive effort to recast the performance measures to gauge results associated with our new mission framework. Many new measures were designed to inform stakeholders on how DHS is delivering results associated with its missions. DHS will be reporting results for many of these measures for the first time in this report. DHS continues to face measurement challenges in gauging a mission focused on prevention and deterrence. As such, the PIO directed the Office of Program Analysis and Evaluation, supported by senior DHS leadership, to continue to lead an annual performance measurement improvement process to develop the right measures that are more effective at conveying the results delivered by programs to meet our mission.

### Verification and Validation Process

The Department recognizes the importance of collecting complete, accurate, and reliable performance data, as this helps determine progress toward achieving program and Department goals and objectives. Performance data are considered reliable if transactions and other data that support reported performance measures are properly recorded, processed, and summarized to permit the preparation of performance information in accordance with criteria stated by management. [OMB Circular A-136](#), Financial Reporting Requirements, and the [Reports Consolidation Act of 2000](#)

(P.L. No. 106-531) further delineates this responsibility, by requiring that the agency head attests to the completeness and reliability of the performance data they report.

The verification and validation of performance measure data is intended to increase the accuracy of the performance data. As such, DHS implemented a two-pronged approach to effectively mitigate risks and reinforce processes that enhance DHS's ability to report complete and reliable data for performance measure reporting. This approach consists of: 1) the GPRA Performance Measure Checklist for Completeness and Reliability; and 2) independent assessment of the completeness and reliability of GPRA performance measures.

### **GPRA Performance Measure Checklist for Completeness and Reliability**

The GPRA Performance Measure Checklist for Completeness and Reliability is used by Components to self-evaluate key controls over GPRA performance measure planning and reporting information. For each key control, Components are required to describe their control activities and provide their assessment regarding their level of achievement at the end of each fiscal year. Components also factor the results of any internal or independent measure assessments into their rating. The GPRA Performance Measures Checklist for Completeness and Reliability supports the Component Head assurance statements attesting to the completeness and reliability of the performance data. Individual Component Head assurance statements serve as the primary basis for the Secretary's assertion whether or not the Department has effective controls over financial and performance reporting as well as the efficiencies of our operations.

### **Independent Assessment of the Completeness and Reliability of GPRA Performance Measures**

DHS conducts an independent assessment of performance measure data on a sample of its performance measures annually using an independent review team. The independent review team assesses selected measures using the methodology prescribed in the DHS Performance Measure Verification and Validation Handbook. The Handbook is distributed to all Components to encourage the development and maturation of internal data verification and validation capabilities, increase transparency, and facilitate the review process. The assessment team documents their findings and makes recommendations for improvement. Components are encouraged to implement recommendations to the greatest extent practicable, and mandatory corrective actions are required to address unreliable measures. DHS has shared their process with other agencies in support of their verification and validation improvement efforts.

### **Management Assurance**

The Management Assurance Process during FY 2011 required that all Component Heads in DHS assert that performance measure data reported in the Department's Performance and Accountability Reports are complete and reliable. Except for the measures listed below, all performance information is complete and reliable:

- Performance Measure: Percent of countermeasures that are determined to be in compliance with standards when tested in federal facilities (NPPD)

- The tool used to evaluate the countermeasure effectiveness was suspended in FY 2011. No data is or will be available for this measure for FY 2011. NPPD is working to put in place a manual process to capture data until a replacement tool is developed and deployed. For more information, see page 12.
- Performance Measure: Percent of young adults with sufficient level of cybersecurity awareness (NPPD)
  - The survey question upon which this measure was based was discontinued by the Federal Trade Commission (FTC) and the National Cyber Security Alliance. NPPD is working to establish an implementation plan and measurement strategy to gauge awareness. For more information, see page 26.

## Quarterly Reporting and Reviews

DHS is committed to increasing the use of performance information to inform decision-making. The Department produces quarterly reports to promote transparency and provide timely information to leadership on program performance. These quarterly reports not only provide actual performance results to date, but also an assessment by program managers of whether they believe they are going to achieve their targets by the end of the fiscal year. If it appears that targets may not be met, program managers are encouraged to initiate corrective actions to address program performance. At the end of the fiscal year, program managers report fiscal year-end results, along with analyses of their results and corrective action plans for those performance measures not meeting their targets. In addition, out-year targets are evaluated and revised at this time based on actual performance during the prior fiscal year, expected resources, and external conditions that may impact the delivery of results. These performance results and targets are then incorporated into the Department's annual budget, financial, and performance reports.

During FY 2011, the Department also implemented a quarterly review process of performance information, led by the Chief Operating Officer in accordance with the *GPR Modernization Act of 2010*. The initial emphasis of these meetings has been the review of the Department's Priority Goals, a set of ambitious, but realistic goals that reflect short-term priorities within our mission areas.

## PPBE and the Performance Budget

Performance management is relevant to each stage of the Department's Planning, Programming, Budgeting, and Execution (PPBE) process. In *Planning*, goal setting, risk assessment, and mission scoping are conducted to determine and prioritize the capabilities necessary to meet the needs of the Department in light of current performance. In *Programming*, resources are allocated to best meet the prioritized needs within projected resources, considering potential performance gains in the process. In *Budgeting*, budget estimates are developed ensuring the efficient and effective use of funding to meet priorities; the planned levels of performance are integrated with the levels of funding requested. Finally, in *Execution*, program execution and performance results are compared to plans to assess accomplishments, shortfalls, and inform future planning and performance targets. PPBE is an annual process that serves as the basis for developing the Department's *Future Years*

*Homeland Security Program (FYHSP), in accordance with the provisions of the Homeland Security Act of 2002.*

As the performance budget is formulated through the PPBE process, consideration for setting planned performance targets is made based on a variety of factors. First, analysis of the previous year's performance is a major factor in predicting likely performance in the future. Second, consideration is given to the funding requested for the program and how that relates to level of performance that can be delivered. Third, environmental factors play a large role in the delivery of performance results, potentially both in terms of the physical environment in which the program functions, and the operational environment under which it delivers results. Lastly, other factors such as impending legislation or program implementation changes are taken into consideration when projecting future performance targets. As many of the considerations listed above are unknowns, this process becomes less precise the farther one projects into the future. Program managers use their expertise and judgment to make performance target proposals, which are then reviewed and approved, in light of the resource request and other factors, by both DHS leadership and the Office of Management and Budget. This process provides a vehicle for DHS leadership to review and manage strategies and achievement of missions as required by the *GPR Modernization Act of 2010*.

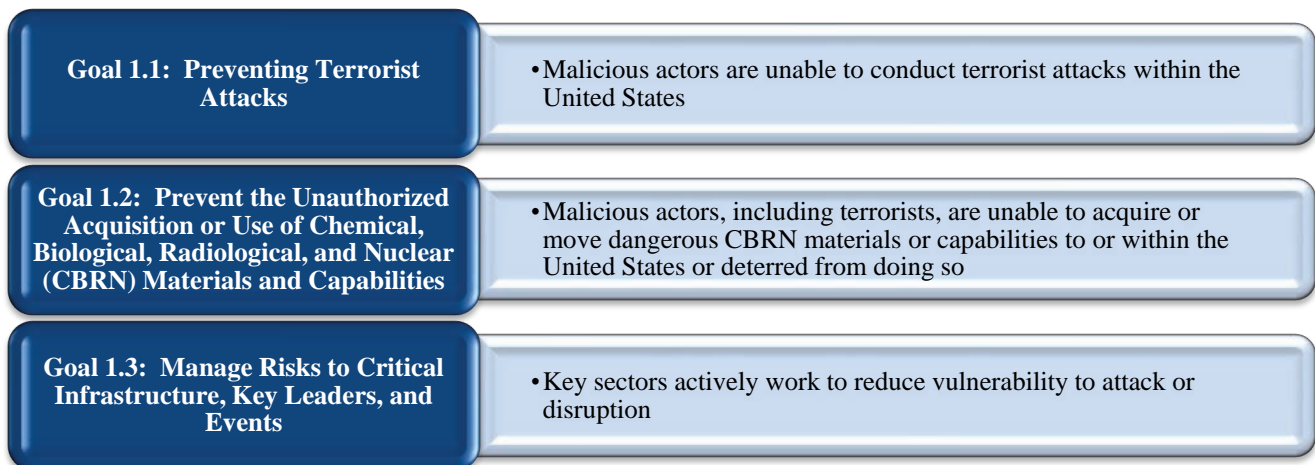

## Performance by Mission

This section of the Annual Performance Report provides an analysis of the Department's missions and responsibilities. Each section will include the goals and the performance measures to assess our success in accomplishing each goal. Also included are highlights of DHS's accomplishments across the mission areas in FY 2011.

### Mission 1: Preventing Terrorism and Enhancing Security

Protecting the United States from terrorism is the cornerstone of homeland security. DHS's counterterrorism responsibilities focus on three goals: preventing terrorist attacks; preventing the unauthorized acquisition, importation, movement, or use of chemical, biological, radiological, and nuclear materials and capabilities within the United States; and reducing threats to and vulnerability of critical infrastructure, key resources, essential leadership, and major events from terrorist attacks and other hazards.

We will achieve this mission through meeting the following goals:

## DHS Performance

In FY 2011, there were 19 performance measures used to assess the Department's efforts in *Mission 1: Preventing Terrorism and Enhancing Security*. For the FY 2012 – 2013 plan, one new measure is being introduced. Detailed results for each performance measure are provided in the following tables.

**Table 1: Performance Measures for Goal 1.1: Preventing Terrorist Attacks**

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Percent of intelligence reports rated “satisfactory” or higher in customer feedback that enable customers to understand the threat (AO)	---	---	---	---	---	80%	80%
Explanation: This measure was introduced in the FY 2010 – 2012 Annual Performance Report; however, the program will begin collecting data in FY 2012.							
Percent of air carriers operating from domestic airports in compliance with leading security indicators (TSA)	96%	98%	98%	100%	99.2%	100%	100%
Explanation: Air carrier compliance remains at a consistent high level with year-over-year improvement. TSA communicates inspection findings to air carriers for corrective action and where compliance is below acceptable levels, TSA conducts additional inspection and assessment activities to bring the air carrier into full compliance.							
Percent of international air enplanements vetted against the terrorist watch list through Secure Flight (TSA)	---	---	---	100%	100%	100%	100%
Percent of inbound air cargo screened on international passenger flights originating from outside the United States and Territories (TSA)	---	---	---	New Measure		85%	100%
Percent of domestic air enplanements vetted against the terrorist watch list through Secure Flight (TSA)	---	---	---	100%	100%	100%	100%
Average number of days for DHS Traveler Redress Inquiry Program (TRIP) redress requests to be closed (TSA)	---	---	---	< 100	99	< 97	< 95
Percent of air cargo screened on commercial passenger flights originating from the United States and territories (TSA)	---	---	---	100%	100%	100%	100%

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Percent of law enforcement officials trained in methods to counter terrorism and other violent acts that rate the training as effective (DHS HQ - CRCL)	---	---	---	80%	84%	82%	84%
Explanation: While the program expects to continue providing a robust and successful training program in 2012, fluctuations in staffing and substantial course modifications based on external factors could significantly impact results.							

Below is a highlighted accomplishment demonstrating success in *Preventing Terrorism and Enhancing Security*.

### TSA Installs New Privacy Enhancing Software

As part of its commitment to maintain a high level of security while enhancing passenger privacy, the Transportation Security Administration (TSA) is currently in the process of installing new software to further strengthen the privacy protections on its Advanced Imaging Technology (AIT) machines. The software, called Automated Target Recognition (ATR), will auto-detect items that could pose a threat using a generic outline of a person for all passengers, eliminating passenger-specific images.

“Our top priority is the safety of the traveling public, and TSA constantly strives to explore and implement new technologies that enhance security and strengthen privacy protections for the traveling public,” TSA Administrator John Pistole said. “This software upgrade enables us to continue providing a high level of security through advanced imaging technology screening, while improving the passenger experience at checkpoints.”

AIT safely screens passengers for both metallic and non-metallic threats, including weapons and explosives. AIT has been evaluated and determined to be safe for all passengers by the Food and Drug Administration, National Institute for Standards and Technology and Johns Hopkins University Applied Physics Laboratory.

**Table 2: Performance Measures for Goal 1.2: Prevent the Unauthorized Acquisition or Use of Chemical, Biological, Radiological, and Nuclear (CBRN) Materials and Capabilities**

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Percent of intelligence reports rated “satisfactory” or higher in customer feedback that enable customers to anticipate emerging threats (AO)	---	---	---	---	---	80%	80%
Explanation: This measure was introduced in the FY 2010 – 2012 Annual Performance Report; however, the program will begin collecting data in FY 2012.							

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Percent of containerized cargo conveyances that pass through fixed radiation portal monitors at sea ports of entry (DNDO)	---	---	FOUO	FOUO	FOUO	FOUO	FOUO
Explanation: In FY 2010, this measure was worded as: Percent of high-risk containerized cargo conveyances that pass through fixed radiation portal monitors at sea ports of entry. This measure is For Official Use Only (FOUO) and met its target in FY 2011.							
Percent of cargo conveyances that pass through radiation detection systems upon entering the nation via land border and international rail ports of entry (DNDO)	---	---	FOUO	FOUO	FOUO	FOUO	FOUO
Explanation: In FY 2010, this measure was worded as: Percent of high-risk cargo conveyances that pass through radiation detection systems upon entering the nation via land border and international rail ports of entry. This measure met its target in FY 2011.							
Percent of inspected high-risk chemical facilities in compliance with the Chemical Facility Anti-terrorism Standards (NPPD)	---	---	---	10%	9.1%	20%	35%
Explanation: The deviation from the performance target was slight and attributable to scheduled authorization inspections in September 2011 being postponed due to Hurricane Irene. There was no effect on overall program performance. This program is in the early stages of implementation and targets will continue to increase.							
Percent of targeted urban areas that are monitored for biological threats using BioWatch technology (OHA)	---	---	---	100%	100%	100%	100%

**Table 3: Performance Measures for Goal 1.3: Manage Risks to Critical Infrastructure, Key Leadership, and Events**

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Percent of owner/operators of critical infrastructure and key resources who report that the products provided by Infrastructure Protection enhance their understanding of the greatest risks to their infrastructure (NPPD)	---	---	---	---	---	75%	80%
Explanation: This measure was introduced in the FY 2010 – 2012 Annual Performance Report; however, the program will begin collecting data in FY 2012.							

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Percent of facilities that have implemented at least one security enhancement that raises the facility's protective measure index score after receiving an Infrastructure Protection vulnerability assessment or survey (NPPD)	---	---	---	15%	61%	50%	55%
Explanation: While the program will strive to improve critical facility security, results are based on voluntary implementation of security enhancements by owner/operators and are influenced by a variety of external factors such as the economic environment, which may cause fluctuations in the rate of implementation.							
Percent of countermeasures that are determined to be in compliance with standards when tested in federal facilities (NPPD)	94%	94.4%	96.2%	100%	N/A	N/A	95%
Explanation: The tool used to evaluate the countermeasure effectiveness was suspended in FY 2011; therefore, the program is unable to provide data for FY 2011. The program has started the modification of a new tool which will not be available until the end of FY 2012. Therefore the FY 2012 target has been postponed and the program will resume reporting results for this measure in FY 2013.							
Percent of tenants satisfied with the level of security provided at federal facilities (NPPD)	---	---	---	82%	77.8%	83%	84%
Explanation: Tenant satisfaction fell uniformly across the regions where NPPD's Federal Protective Service (FPS) provides services. FPS is updating its Memorandum of Agreement with GSA to clarify services and is conducting education and outreach to ensure customers understand FPS services and responsibilities.							
Percent of domestic airports that comply with established aviation security indicators (TSA)	95%	95%	96%	100%	95.9%	100%	100%
Explanation: Although the target of 100 percent was not met in FY 2011, TSA continues to improve the security posture at the Nation's airports, with 95.9 percent of airports compliant with established aviation security indicators. The FY 2011 results fell below last year's results due to more rigorous airport security requirements.							
Percent of mass transit and passenger rail agencies that have effectively implemented industry agreed upon Security and Emergency Management Action items to improve security (TSA)	23%	23%	23%	40%	28%	75%	80%
Explanation: Transit agencies are assessed every three years. The Transportation Security Inspectors for Surface assess a percentage of the transit agencies each year and it takes approximately six years for all transit agencies assessed to demonstrate that vulnerabilities identified in the first assessment have been addressed. Improvements made by an agency would not be captured until the following cycle of assessments. Progress has been made toward the target; however, sustained progress is contingent on funding available to state and local agencies.							
Percent of currency identified as counterfeit (USSS)	0.0086%	0.0081%	0.0087%	<0.0099%	0.0078%	<0.0098%	<0.0090%

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Financial crimes loss prevented through a criminal investigation (in billions) (USSS)	\$1.96	\$1.28	\$6.56	\$1.90	\$4.846	\$1.40	\$1.80
Percent of total U.S. Secret Service protection activities that are incident-free for protection of national leaders, foreign dignitaries, designated protectees and others during travel or at protected facilities (USSS)	100%	100%	100%	100%	100%	100%	100%
Percent of National Special Security Events that were successfully completed (USSS)	---	---	---	100%	100%	100%	100%

Below is a highlighted accomplishment demonstrating success in *Preventing Terrorism and Enhancing Security*.

### National Terrorism Advisory System

In April 2011, Secretary Napolitano announced the implementation of DHS's National Terrorism Advisory System (NTAS)—a robust terrorism advisory system that provides timely information to the public about credible terrorist threats—which replaces the former color-coded alert system. During the announcement, DHS released a [guide](#) outlining the new system to the American public, along with an [example](#) of an NTAS Alert that would be issued to the public if the government were to receive information about a specific or credible terrorist threat.

NTAS is designed to more effectively communicate information about terrorist threats by providing timely, detailed information and recommended security measures to the public, government agencies, first responders, airports and other transportation hubs, and the private sector.

Under NTAS, DHS will coordinate with other federal entities to issue detailed alerts to the public when the Federal Government receives information about a specific, credible terrorist threat to the United States. NTAS alerts provide a concise summary of the potential threat, which may include a geographic region, mode of transportation, or critical infrastructure potentially affected by the threat; actions being taken to ensure public safety; and recommended steps that individuals, communities, business and governments can take to help prevent, mitigate or respond to a threat. NTAS Alerts contain a sunset provision indicating a specific date when the alert expires.

## Mission 2: Securing and Managing Our Borders

The protection of the Nation’s borders—land, air, and sea—from the illegal entry of people, weapons, drugs, and other contraband while facilitating lawful travel and trade is vital to homeland security, as well as the Nation’s economic prosperity. The Department’s border security and management efforts focus on three interrelated goals: effectively securing U.S. air, land, and sea borders; safeguarding and streamlining lawful trade and travel; and disrupting and dismantling transnational criminal and terrorist organizations.

We will achieve this mission through meeting the following goals:

<b>Goal 2.1: Secure U.S. Air, Land, and Sea Borders</b>	<ul style="list-style-type: none"> <li>• Prevent the illegal flow of people and goods across U.S. air, land, and sea borders while expediting the safe flow of lawful travel and commerce</li> </ul>
<b>Goal 2.2: Safeguard Lawful Trade and Travel</b>	<ul style="list-style-type: none"> <li>• Ensure security and resilience of global movement systems</li> </ul>
<b>Goal 2.3: Disrupt and Dismantle Transnational Criminal Organizations</b>	<ul style="list-style-type: none"> <li>• Disrupt and dismantle transnational organizations that engage in smuggling and trafficking across the U.S. border</li> </ul>

### DHS Performance

In FY 2011, there were 13 performance measures used to assess the Department’s efforts in *Mission 2: Securing and Managing Our Borders*. For the FY 2012 – 2013 plan, two new measures are being introduced and two measures are being retired. Detailed results for each performance measure are provided in the following tables.

**Table 4: Performance Measures for Goal 2.1: Secure U.S. Air, Land, and Sea Borders**

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Number of apprehensions on the Southwest Border between the ports of entry (CBP)	705,022	540,851	447,731	≤ 390,000	327,577	≤ 371,000	≤ 352,000
Percent of projected deployments of Border Patrol agents to the Southwest border completed (CBP)	---	---	---	100%	100%	Retired Measure	

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Explanation: This measure is being retired as it was based on supplemental legislation that authorized CBP to hire 1,000 additional Border Patrol agents and is complete.							
Number of joint operations conducted along the Southwest Border by Border Patrol Agents and Mexican law enforcement partners (CBP)	---	---	---	9	12	Retired Measure	
Explanation: In FY 2010, this measure was worded as: Number of joint operations conducted along the Southwest Border by CBP and Mexican law enforcement partners. Although this measure is being retired from the performance plan, it will be maintained internally.							
Percent of detected conventional aircraft incursions resolved along all borders of the United States (CBP)	---	---	---	100%	95.3%	100%	100%
Explanation: The program will continue to evaluate and improve tactics, techniques, and procedures where possible in order to bring individuals that commit illegal incursions to a successful law enforcement resolution.							
Number of weapons seized on exit from the United States (CBP)	---	---	---	2,200	1,987	2,100	2,000
Explanation: Outbound weapons seizures vary substantially in size (number of weapons). There was a downturn in the number of large weapons seizures in FY 2011 as compared to FY 2010, particularly during the second half of the year, which impacted the cumulative total number of weapons seized for the year. CBP will continue partnerships with other law enforcement agencies (both local and international partners) to identify and disrupt outbound smuggling activities.							
Amount of currency seized on exit from the United States (in millions) (CBP)	---	---	---	\$40	\$47	\$35	\$30

Below is a highlighted accomplishment demonstrating success in *Securing and Managing Our Borders*.

### SBInet Assessment Leads to New Border Technology Plan

In 2010, Secretary Napolitano directed a Department-wide assessment to determine if SBInet was the most efficient, effective and economical border security technology strategy available. This assessment—which combined an independent, quantitative, science-based review with the input of U.S. Border Patrol agents on the front lines and the Department’s leading science and technology experts from the Science and Technology Directorate—made clear that SBInet cannot meet its original objective of providing a one-size-fits-all border security technology solution.

As a result, in 2011 Secretary Napolitano directed CBP to end SBInet as originally conceived and instead implement a new border security technology plan, which will use existing, proven technology tailored to the distinct terrain and population density of each border region, including commercially available mobile surveillance systems, unmanned aircraft systems, thermal imaging devices, and tower-based remote video surveillance systems. Where appropriate, this plan will also incorporate already existing elements of the former SBInet program that have proven successful, such as stationary radar and infrared and optical sensor towers.

The new plan will use funding previously requested for SBInet and provided in the FY 2011 continuing resolution. CBP intends to acquire all the technologies in the new plan, including the integrated fixed towers, through full and open competition. Independent, quantitative, science-based assessments will continue along each sector of the Southwest Border in 2011 to determine the optimal combination of technology for each region.

**Table 5: Performance Measures for Goal 2.2: Safeguard Lawful Trade and Travel**

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Compliance rate for Customs-Trade Partnership Against Terrorism (C-TPAT) members with the established C-TPAT security guidelines (CBP)	99.9%	97.5%	97.8%	100%	95.1%	100%	100%
Explanation: In FY 2011, CBP strengthened the C-TPAT validation process, implementing new suspension and removal guidelines standards and increasing management oversight, which caused the overall compliance rate to fluctuate. CBP is working with partner companies to continue to explain the enhanced security criteria and ensure they understand the validation requirements.							
Percent of requested cargo examinations conducted at foreign ports of origin in cooperation with host nations under the Container Security Initiative (CBP)	---	---	---	100%	96%	100%	100%
Explanation: Examination rates depend on a number of factors outside of CBP operational control, including host port logistics, procedures, and installed equipment and technology. CBP continually works with host ports to resolve examination issues as they arise. All cargo identified as high-risk that is not examined by the CSI host nation is examined upon arrival at the U.S. port of entry.							

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Percent of inbound high-risk cargo transported by air, land, or sea that has been screened and entry status is resolved prior to or during processing at a United States port of entry (CBP)	---	---	---	New Measure		FOUO	FOUO
Percent of cargo by value imported to the U.S. by participants in CBP trade partnership programs (CBP)	---	---	---	45%	55.07%	45%	45.5%
Percent of imports compliant with applicable U.S. trade laws (CBP)	---	---	---	98%	97.67%	98%	98%
Explanation: Results reflect computations conducted in October 2011 and will not be considered final until a required, independent, post-audit compliance review is completed. Final results will be available in February 2012. The deviation from the target was slight and there was no effect on overall program performance. CBP will target identified high-risk areas that are contributing to the lower compliance rate.							
Percent of air carriers operating flights from foreign airports that serve as last point of departure to the U.S. in compliance with leading security indicators (TSA)	---	---	---	100%	85%	100%	100%
Explanation: Through a corrective action process led by TSA, all air carriers were apprised of inspection findings and resolution measures required. All air carriers will be reinspected in FY 2012 to determine if remediation actions have been implemented.							
Percent of foreign airports serving as last point of departure in compliance with leading security indicators (TSA)	---	---	---	100%	95.3%	100%	100%
Explanation: The Department strives to ensure measures regarding safety and security are always at 100 percent. Compliance is the responsibility of a sovereign nation and the non-compliance may be due to a variety of factors. TSA engages with foreign governments on numerous levels to ensure that appropriate resolutions are identified.							
Percent of maritime facilities in compliance with security regulations as they have not received a notice of violation and/or civil penalty (USCG)	---	---	---	100%	99.9%	100%	99%
Explanation: The deviation from the target was slight and there was no effect on overall program performance.							

Below is a highlighted accomplishment demonstrating success in *Securing and Managing Our Borders*.

### Enhancing Partnerships with Canada to Promote Northern Border Security

In February 2011, President Obama and Prime Minister Harper released, “Beyond the Border: A Shared Vision for Perimeter Security and Economic Competitiveness,” which articulates a shared vision in which our countries work together to address threats at the earliest point possible while facilitating the legitimate movement of people, goods, and services into our countries and across our shared border.

Through the Integrated Cross-Border Maritime Law Enforcement Operations Shiprider agreement, DHS and Canadian joint law enforcement can leverage efforts to bolster cross-border security operations. This agreement enables the Royal Canadian Mounted Police, U.S. Coast Guard, CBP, and ICE to cross-train, share resources and personnel, and use each others’ vessels in the waters of both countries. The Border Patrol, ICE, USCG, Canadian law enforcement, and other federal partners also collaborate through Integrated Border Enforcement Teams, which work to identify, investigate, and interdict individuals and organizations that may pose a threat to national security or are engaged in organized criminal activity along the Northern Border.

**Table 6: Performance Measures for Goal 2.3: Disrupt and Dismantle Transnational Criminal Organizations**

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Percent of significant high-risk transnational criminal investigations that result in a disruption or dismantlement (ICE)	---	---	---	New Measure		16%	16%

## Mission 3: Enforcing and Administering Our Immigration Laws

The success of our Nation’s immigration policy plays a critical role in advancing homeland security. DHS is focused on smart and effective enforcement of U.S. immigration laws while streamlining and facilitating the legal immigration process. The Department has fundamentally reformed immigration enforcement, focusing on identifying and removing criminal aliens who pose a threat to public safety and targeting employers who knowingly and repeatedly break the law.

We will achieve this mission through meeting the following goals:

<b>Goal 3.1: Strengthen and Effectively Administer the Immigration System</b>	<ul style="list-style-type: none"> <li>• Promote lawful immigration, expedite administration of immigration services, and promote the integration of lawful immigrants into American society</li> </ul>
<b>Goal 3.2: Prevent Unlawful Immigration</b>	<ul style="list-style-type: none"> <li>• Reduce conditions that encourage foreign nationals to illegally enter and remain in the United States, while identifying and removing those who violate our laws</li> </ul>

### DHS Performance

In FY 2011, there were 17 performance measures used to assess the Department’s efforts in *Mission 3: Enforcing and Administering Our Immigration Laws*. For the FY 2012 – 2013 plan, two new measures are being introduced and two measures are being retired. Detailed results for each performance measure are provided in the following tables.

**Table 7: Performance Measures for Goal 3.1: Strengthen and Effectively Administer the Immigration System**

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Average customer satisfaction rating with information provided about legal immigration pathways from USCIS call centers (USCIS)	---	---	---	70%	84%	80%	80%
Explanation: The targets previously published as 70 percent in the FY 2010 – 2012 Annual Performance Report were changed to 80 percent based on FY 2011 results. In addition, based on the American Customer Satisfaction Index, 80 percent is significantly above the government average and is considered a “superior” score based on industry standards.							
Overall customer service rating of the immigration process (USCIS)	---	---	---	70%	80%	80%	80%

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
<p>Explanation: The targets previously published as 70 percent in the FY 2010 – 2012 Annual Performance Report were changed to 80 percent based on FY 2011 results. In addition, based on the American Customer Satisfaction Index, 80 percent is significantly above the government average and is considered a “superior” score based on industry standards.</p>							
Percent of Form I-485, Application to Register for Permanent Residence or to Adjust Status, approval decisions determined by quarterly quality reviews to have correctly followed established adjudication procedures (USCIS)	---	---	91%	91%	91%	88%	88%
<p>Explanation: The deviation from the target was slight and there was no effect on overall program performance. In FY 2010, this measure was worded as: Percent of Form I-485, Application to Register for Permanent Residence or to Adjust Status, decisions determined by quarterly quality reviews to have been adjudicated correctly. In addition, the targets previously published as 92 percent in the FY 2010 – 2012 Annual Performance Report were changed to 88 percent to account for the variability in results based on sample size.</p>							
Percent of Form N-400, Application for Naturalization, approval decisions determined by quarterly quality reviews to have correctly followed established adjudication procedures (USCIS)	---	---	97%	96%	95%	93%	93%
<p>Explanation: The deviation from the target was slight and there was no effect on overall program performance. In FY 2010, this measure was worded as: Percent of Form N-400, Application for Naturalization, decisions determined by quarterly quality reviews to have been adjudicated correctly. In addition, the targets previously published as 97 percent in the FY 2010 – 2012 Annual Performance Report were changed to 93 percent to account for the variability in results based on sample size.</p>							
Average of processing cycle time (in months) for adjustment of status to permanent resident applications (I-485) (USCIS)	13.6	4.4	3.8	≤ 4	4.4	≤ 4	≤ 4
<p>Explanation: In FY 2011, the number of employment-based I-485 applications and other benefit applications increased above normal levels which impacted USCIS’s ability to process I-485 applications in a timely fashion. Applications have returned to normal levels and it is anticipated that USCIS will meet its target in FY 2012.</p>							
Average of processing cycle time (in months) for naturalization applications (N-400) (USCIS)	8.7	4.2	4.5	≤ 5	4.6	≤ 5	≤ 5
Number of significant citizenship outreach events (USCIS)	109	99	102	85	89	Retired Measure	
<p>Explanation: This measure is being retired and replaced with the measure below.</p>							

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Percent of Citizenship and Integration Grant Program grantees that meet annual performance plan goals (USCIS)	---	---	---	New Measure		90%	90%

Below is a highlighted accomplishment demonstrating success in *Enforcing and Administering Our Immigration Laws*.

### USCIS Launches Self Check

In March of 2011, U.S. Citizenship and Immigration Services (USCIS) announced the launch of Self Check—a free, online, voluntary service of the E-Verify program

that allows individuals to verify their employment eligibility in the United States. Administered by USCIS, Self Check is currently available to residents of Arizona, Colorado, Idaho, Mississippi, Virginia, the District of Columbia, California, Louisiana, Maine, Maryland, Massachusetts, Minnesota, Missouri, Nebraska, Nevada, New Jersey, New York, Ohio, South Carolina, Texas, Utah, and Washington and will be available nationwide in early 2012.

Since the program’s inception, thousands of workers and potential workers have taken advantage of Self Check, accessing their federal employment eligibility records, guidance on how to correct potential record discrepancies prior to the hiring process and resources for combating workplace discrimination related to employment eligibility.

Since the launch of Self Check, USCIS has worked to continue to refine the program. In August 2011, Self Check became a bi-lingual service available to users in both English and Spanish, broadening the scope of the program to members of our U.S. workforce who are more comfortable reading Spanish-language materials.

**Table 8: Performance Measures for Goal 3.2: Prevent Unlawful Immigration**

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Percent of initial mismatches for authorized workers that are later determined to be “Employment Authorized” (USCIS)	---	---	---	≤ 3%	0.28%	≤ 1.0%	≤ 1.0%
Explanation: The FY 2012 target, previously published as ≤ 3.0 percent in the FY 2010 – 2012 Annual Performance Report was changed to ≤ 1.0 percent based on FY 2011 results.							
Accuracy rate of USCIS’s processing of manual verifications for Systematic Alien Verification for Entitlements (SAVE) referrals (USCIS)	---	---	---	New Measure		98%	98%

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Percent of religious worker site visits conducted that result in a potential finding of fraud (USCIS)	---	---	---	≤ 11%	1%	≤ 11%	≤ 11%
Percent of non-immigrant worker (H1-B) site visits conducted that result in a potential finding of fraud (USCIS)	---	---	---	≤ 11%	1%	≤ 11%	≤ 11%
Dollar value of fines assessed for employers who have violated the I-9 requirements (ICE)	---	---	\$6,956,026	\$7,095,147	\$10,914,356	\$7,237,049	\$7,381,790
Number of employers arrested or sanctioned for criminally hiring illegal labor (ICE)	---	---	433	455	624	478	501
Number of visa application requests denied due to recommendations from the Visa Security Program (ICE)	---	---	---	780	5,038	Retired Measure	
Explanation: This measure is being retired due to the difficulty of identifying the instances in which the Department of State recommended refusal based solely on Visa Security Program (VSP) input. ICE is exploring new measures to better represent the impact of VSP screening and vetting efforts.							
Number of convicted criminal aliens removed per fiscal year (ICE)	---	---	195,772	180,000	216,698	220,350	224,000
Explanation: The FY 2012 target, previously published as 210,000 in the FY 2010 – 2012 Annual Performance Report was changed to 220,350 based on FY 2011 results.							
Average length of stay in detention of all convicted criminal aliens prior to removal from the United States (in days) (ICE)	---	---	37	≤ 38	34.7	≤ 35	≤ 35
Explanation: The FY 2012 target, previously published as < 37 in the FY 2010 – 2012 Annual Performance Report was changed to < 35 based on FY 2011 results.							
Percent of aliens arrested or charged who will be electronically screened through the Secure Communities program (ICE)	---	---	63.8%	80%	75.57%	96%	100%
Explanation: Throughout FY 2011, ICE implemented several reforms to the Secure Communities program to improve communications, training and accountability, which impacted the number of jurisdictions activated under Secure Communities. Although there was a slight impact to FY 2011 results, the Secure Communities program is on track for nationwide deployment in FY 2013.							

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Percent of detention facilities found in compliance with the national detention standards by receiving an inspection rating of acceptable or greater on the last inspection (ICE)	---	---	---	90%	95%	94%	94%
Explanation: The FY 2012 target, previously published as 92 percent in the FY 2010 – 2012 Annual Performance Report was changed to 94 percent based on FY 2011 results.							

Below is a highlighted accomplishment demonstrating success in *Enforcing and Administering Our Immigration Laws*.

### ICE Removes Former Member of Guatemalan Army Linked to Massacre

On July 12, 2011, ICE deported [Pedro Pimentel Rios](#), a former member of the Guatemalan army whom witnesses say participated in the murder of dozens of men, women and children in the village of Las Dos Erres in December 1982. The deportation represents a victory for ICE’s [Human Rights Violators and War Crimes Center](#), which investigated the case.

ICE charged Pimentel Rios in immigration court with being deportable for having assisted or otherwise participated in extrajudicial killings during the Dos Erres massacre. In May, an immigration judge in Los Angeles cleared the way for Pimentel Rios’ repatriation to Guatemala, ruling he was deportable based upon his participation in the killings at Las Dos Erres. The judge’s ruling capped an intensive legal effort by ICE to gain Pimentel Rios’ removal from the United States following his arrest by ICE’s Homeland Security Investigations agents in Orange County, California a year ago.

“For the families who lost loved ones at Dos Erres, justice has been a long time coming, but they can take consolation in the fact that those responsible for this tragedy are now being held accountable for their crimes,” said ICE Director John Morton. “I applaud the outstanding work by ICE attorneys and investigators to bring a successful conclusion to this case. We will not allow our country to serve as a safe haven for those who commit human rights abuses and war crimes.”

## Mission 4: Safeguarding and Securing Cyberspace

Cyberspace is highly dynamic and the risks posed by malicious cyber activity often transcend sector and international boundaries. Today’s threats to cybersecurity require the engagement of the entire society—from government and law enforcement to the private sector and most importantly, members of the public—to mitigate malicious activities while bolstering defensive capabilities.

DHS is responsible for protecting the federal executive branch civilian agencies and guiding the protection of the nation’s critical infrastructure. This includes the “dot-gov” world, where the government maintains essential functions that provide services to the American people, as well as privately owned critical infrastructure which includes the systems and networks that support the financial services industry, the energy industry, and the defense industry.

We will achieve this mission through meeting the following goals:

<b>Goal 4.1: Create a Safe, Secure, and Resilient Cyber Environment</b>	<ul style="list-style-type: none"> <li>• Ensure malicious actors are unable to effectively exploit cyberspace, impair its safe and secure use, or attack the Nation’s information infrastructure</li> </ul>
<b>Goal 4.2: Promote Cybersecurity Knowledge and Innovation</b>	<ul style="list-style-type: none"> <li>• Ensure that the Nation is prepared for the cyber threats and challenges of tomorrow</li> </ul>

### DHS Performance

In FY 2011, there were five performance measures used to assess the Department’s efforts in *Mission 4: Safeguarding and Securing Cyberspace*. For the FY 2012 – 2013 plan, one new measure is being introduced and one measure is being retired. Detailed results for each performance measure are provided in the following tables.

**Table 9: Performance Measures for Goal 4.1: Create a Safe, Secure, and Resilient Cyber Environment**

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Percent of intelligence reports rated “satisfactory” or higher in customer feedback that enable customers to manage risks to cyberspace (AO)	---	---	---	---	---	80%	80%
Explanation: This measure was introduced in the FY 2010 – 2012 Annual Performance Report; however, the program will begin collecting data in FY 2012.							

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Percent of Federal Executive Branch civilian networks monitored for cyber intrusions with advanced technology (NPPD)	---	---	---	28%	31.9%	55%	70%
Percent of external traffic monitored for cyber intrusions at civilian Federal Executive Branch agencies (NPPD)	---	---	---	New Measure		55%	70%
Percent of unique vulnerabilities detected during cyber incidents where mitigation strategies were provided by DHS (NPPD)	---	---	---	90%	93%	95%	100%
Percent of cybersecurity mitigation strategies provided by DHS for unique vulnerabilities that are timely and actionable (NPPD)	---	---	---	---	---	50%	60%
Explanation: This measure was introduced in the FY 2010 – 2012 Annual Performance Report; however, the program will begin collecting data in FY 2012. This measures a program that is in its early stages of implementation—targets will continue to increase.							
Average amount of time required for initial response to a request for assistance from public and private sector partners to prevent or respond to major cyber incidents (in minutes) (NPPD)	---	---	---	< 120	138	< 90	< 60
Explanation: The FY 2011 goal of 2 hours was not met, although organizational improvements allowed the United States Computer Emergency Readiness Team (US-CERT) to meet or exceed the target for the final three quarters of the year. US-CERT believes it is well positioned to meet its goal of 1.5 hours in FY 2012.							
Financial crimes loss prevented by the Secret Service Electronic Crimes Task Forces (in millions) (USSS)	\$410.9	\$534.2	\$6,946	\$304	\$1,480	\$279	\$300

Below is a highlighted accomplishment demonstrating success in *Safeguarding and Securing Cyberspace*.

### National Cybersecurity Incident Response

In March 2011, a U.S. oil and natural gas organization was victimized by a series of successful cybersecurity attacks, and subsequently contacted the FBI. Under the framework established in the National Cybersecurity Incident Response Plan, the FBI reached out to DHS to provide assistance through the National Cybersecurity and Communications Integration Center.

At the company’s request, DHS deployed cyber experts on-site to provide hands-on incident response, analysis, and mitigation solutions. Using custom tools and unique knowledge of known threats, the DHS team soon discovered

malicious activity on the company’s network. DHS proposed network changes that would help mitigate the damage and defend from future attacks. DHS also disseminated recommendations from this engagement to other critical infrastructure owners and operators, to better secure our Nation for the future.

**Table 10: Performance Measures for Goal 4.2: Promote Cybersecurity Knowledge and Innovation**

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Percent of young adults with sufficient level of cybersecurity awareness (NPPD)	---	---	---	42%	N/A	Retired Measure	

Explanation: The survey question upon which this measure was based was discontinued by the Federal Trade Commission (FTC) and the National Cyber Security Alliance. Therefore the program is unable to provide data for FY 2011. Since data is no longer available, this measure is being retired and the program is working to establish an implementation plan and measurement strategy to gauge awareness in the future.

Below is a highlighted accomplishment demonstrating success in *Safeguarding and Securing Cyberspace*.

### Stop. | Think. | Connect.

The “Stop | Think | Connect™” Campaign is a national public awareness campaign aimed at increasing the understanding of cyber threats and empowering the American public to be safer and more secure online.

The Campaign’s main objective is to help individuals and families become more aware of growing threats and provide the tools to protect oneself and their families.

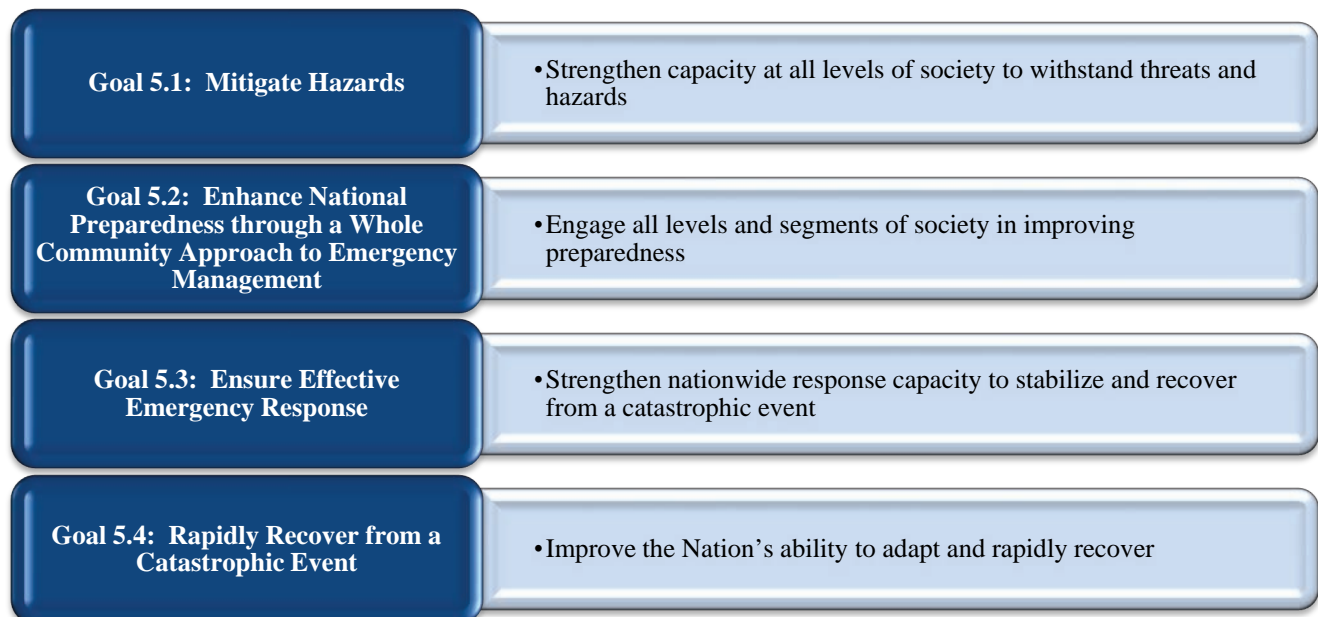

Cybersecurity is a shared responsibility. We each have to do our part to keep the Internet safe. When we all take simple steps to be safer online, it makes using the Internet a more secure experience for everyone. If we each do our part online, we are protecting ourselves and helping to make the Internet safer for everyone. Get [simple tips](#) on how to protect yourself and your family.

## Mission 5: Ensuring Resilience to Disasters

DHS coordinates comprehensive federal efforts to prepare for, protect against, respond to, recover from, and mitigate a terrorist attack, natural disaster or other large-scale emergency, while working with individuals, communities, the private and nonprofit sectors, faith-based organizations, local, state, tribal, territorial and federal partners to ensure a swift and effective recovery effort. The Department's efforts to build a ready and resilient Nation include fostering a Whole Community approach to emergency management nationally; building the Nation's capacity to stabilize and recover from a catastrophic event; bolstering information sharing and building unity of effort and common strategic understanding among the emergency management team; building plans and providing training to our homeland security partners; and promoting preparedness within the private sector.

We will achieve this mission through meeting the following goals:

### *DHS Performance*

In FY 2011, there were 15 performance measures used to assess the Department's efforts in *Mission 5: Ensuring Resilience to Disasters*. For the FY 2012 – 2013 plan, one measure is being retired. Detailed results for each performance measure are provided in the following tables.

**Table 11: Performance Measures for Goal 5.1: Mitigate Hazards**

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Percent of households surveyed reporting they have taken steps to mitigate damage to property and protect themselves in the event of a disaster (FEMA)	---	---	---	35%	27%	29%	31%
Explanation: The program will continue to work with communities to improve the level of households taking action to mitigate damage to property and protect themselves in the event of a disaster. The FY 2012 target, previously published as 40 percent in the FY 2010 – 2012 Annual Performance Report was changed to 29 percent based on FY 2011 results.							
Percent of U.S. population (excluding territories) covered by planned mitigation strategies (FEMA)	---	---	---	80%	68.7%	80%	85%
Explanation: Mitigation plans are updated on a five year review cycle causing the metric to naturally fluctuate. Given the current economic climate, as many plans expire, states and localities do not have the staff, expertise, or funding to update their mitigation plan. In FY 2011, FEMA released the “Local Mitigation Plan Review,” which will streamline the review of mitigation plans. Additionally, the FY 2011 and FY 2012 targets for this measure were incorrectly published as 85 percent and have been revised to 80 percent.							
Reduction in the potential cost of natural disasters to communities and their citizens (in billions) (FEMA)	\$2.53	\$3.12	\$2.98	\$2.3	\$3.4	\$2.4	\$2.4
Percent of communities in high earthquake, flood, and wind-prone areas adopting disaster-resistant building codes (FEMA)	---	---	---	45%	48%	49%	53%

**Table 12: Performance Measures for Goal 5.2: Enhance National Preparedness through a Whole Community Approach to Emergency Management**

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Percent of households surveyed reporting they have taken steps to be prepared in the event of a disaster (FEMA)	---	---	---	39%	36%	37%	38%
Explanation: This is a composite measure that includes household planning, up-to-date supplies set aside for disaster, and being informed of what to do in case of a disaster. Presidential Preparedness Directive (PPD)-8 requires a comprehensive campaign to build and sustain national preparedness, including public outreach and community and private sector programs. A key step is to understand the current state of preparedness. FEMA is tracking nationwide preparedness through its Citizen Corps Household Survey to better understand how and why we prepare for disasters. Affecting behavior change associated with preparedness is a relatively new area of study and focus. FEMA is exploring better methods to link communications, outreach and training strategies and activities with measurable changes in behavior. Additionally, the FY 2012 target, previously published as 41 percent in the FY 2010 – 2012 Annual Performance Report was changed to 37 percent based on FY 2011 results.							

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Number of corrective actions completed to improve performance following National Level Exercises (FEMA)	---	---	---	23	30	40	60

Below is a highlighted accomplishment demonstrating success in *Ensuring Resilience to Disasters*.

### Increasing Household Preparedness

Presidential Preparedness Directive-8 requires a comprehensive campaign to build and sustain national preparedness, including public outreach and community and private sector programs. A key step is to understand the current state of preparedness. FEMA is tracking nationwide preparedness through its Citizen Corps Household Survey to better understand how and why we prepare for disasters. In 2011, 42 percent of households had a plan of what they would do in the event of a disaster and had discussed it with their household; 33 percent could list up-to-date supplies set aside in case of disaster; and 39 percent were informed of key information such as local hazards, local alert, and warning systems or knew what to do based on training.

FEMA recognizes that it takes a whole community to prepare and respond to disasters, and that preparedness starts with the individual. FEMA's [Ready.gov](http://www.ready.gov) and [Citizen Corps](http://www.citizen.gov) encourage and support preparedness through national campaigns and local programs, including Citizen Corps Councils and [Community Emergency Response Teams](http://www.fema.gov) training. Recent FEMA initiatives to engage the whole community—particularly populations traditionally not engaged in preparedness—resulted in increasing registrations of organizations and individuals committing to get their community involved in National Preparedness Month from under 5,000 registrations in 2010 to nearly 9,000 this year.

**Table 13: Performance Measures for Goal 5.3: Ensure Effective Emergency Response**

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Percent of the U.S. population directly covered by FEMA connected radio transmission stations (FEMA)	---	---	---	80%	84%	90%	90%
Percent of time that critical communications for response operations are established within 12 hours (FEMA)	---	---	---	100%	100%	100%	100%
Percent of essential incident command functions (enabled through response teams and operations centers) that are established within 12 hours (FEMA)	---	---	---	100%	100%	100%	100%

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Percent of urban search and rescue teams arriving on scene within 12 hours of deployment notification (FEMA)	---	---	---	100%	100%	100%	100%
Percent of orders for required life-sustaining commodities (meals, water, tarps, plastic sheeting, cots, blankets and generators) and key initial response resources delivered by the agreed upon date (FEMA)	---	---	97.5%	85%	93.3%	95%	95%
Explanation: The FY 2011 result for this measure was previously reported with preliminary results of 96 percent in the FY 2011 DHS Annual Financial Report and was subsequently recalculated to be 93.3 percent.							
Percent of jurisdictions with access to the FEMA National Shelter System which allows users to locate and monitor open congregate shelters (FEMA)	---	---	---	20%	24%	40%	60%
Percent of high-risk urban areas designated within the Urban Areas Security Initiative (UASI) able to demonstrate increased Emergency Communications capabilities (NPPD)	---	---	---	---	---	50%	55%
Explanation: This measure was introduced in the FY 2010 – 2012 Annual Performance Report; however, the program will begin collecting data in FY 2012.							

Below is a highlighted accomplishment demonstrating success in *Ensuring Resilience to Disasters*.

### Establishing Effective Communications during a Response

In a disaster situation, communications between the Federal Emergency Management Agency (FEMA), federal, state, and local agencies is critical. It is important that members of the emergency management team communicate with one another in real time during life saving operations and recovery efforts. In preparation for this year's historic flooding in Minot, North Dakota, FEMA's Mobile Emergency Response Support Detachment (Denver) was deployed to provide radios to agencies involved in the flood fight so they could all operate on a single frequency, enabling interoperable communications.

The Fire Chief from Minot credited FEMA with assisting in developing a communications plan that helped meet the needs of the emergency management team, resulting in communications that were deemed "excellent."

**Table 14: Performance Measures for Goal 5.4: Rapidly Recover from a Catastrophic Event**

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Percent of eligible applicants provided temporary housing (including non-congregate shelters, hotel/motel, rental assistance, repair and replacement assistance, or direct housing) assistance within 60 days of a disaster (FEMA)	---	---	99.5%	94%	99%	97%	98%
Explanation: The FY 2012 target, previously published as 94 percent in the FY 2010 – 2012 Annual Performance Report was changed to 97 percent based on FY 2011 results.							
Percent of Federal Departments and Agencies that have viable continuity programs to maintain essential functions in case of disaster (FEMA)	---	---	---	Classified	Classified	Retired Measure	
Explanation: This measure met its target for FY 2011. This measure is being retired from the plan; however, it will continue to be tracked by FEMA.							
Government Emergency Telecommunications Service call completion rate during emergency communication periods (NPPD)	97.0%	94.2%	99.4%	90%	97.8%	90%	90%

## Providing Essential Support to National and Economic Security

Homeland security is an integral element of broader U.S. national security and domestic policy. It is not, however, the only element. The *National Security Strategy* clearly identifies national defense and economic security as other elements—along with homeland security—of overall U.S. national security. DHS leads and supports many activities that provide essential support to national and economic security including, but not limited to: maximizing collection of customs revenue; maintaining the safety and security of the marine transportation system; preventing the exploitation of children; providing law enforcement training; and coordinating the Federal Government’s response to global intellectual property theft. DHS contributes in many ways to these elements of broader U.S. national and economic security while fulfilling its homeland security missions.

We will achieve this through meeting the following goals:

<b>Goal : Collect Customs Revenue and Enforce Import/Export Controls</b>	<ul style="list-style-type: none"><li>•Maximize the collection of customs revenue and protect U.S. intellectual property rights and workplace standards</li></ul>
<b>Goal: Ensure Maritime Safety and Environmental Stewardship</b>	<ul style="list-style-type: none"><li>•Protect safety and ensure environmental stewardship in the maritime domain</li></ul>
<b>Goal: Conduct and Support Other Law Enforcement Activities</b>	<ul style="list-style-type: none"><li>•Prevent child exploitation and ensure effective federal law enforcement training</li></ul>
<b>Goal: Provide Specialized National Defense Capabilities</b>	<ul style="list-style-type: none"><li>•Strengthen national defense by providing ready forces with specialized capabilities</li></ul>

### *DHS Performance*

In FY 2011, there were eight performance measures used to assess the Department’s efforts in *Providing Essential Support to National and Economic Security*. Detailed results for each performance measure are provided in the following tables.

**Table 15: Performance Measures for Goal: Collect Customs Revenue and Enforce Import/Export Controls**

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Percent of revenue directed by trade laws, regulations, and agreements successfully collected (CBP)	---	---	---	100%	99.12%	100%	100%
Explanation: Results reflect computations conducted in October 2011 and will not be considered final until a required, independent, post-audit compliance review is completed. Final results will be available in February 2012. The deviation from the target was slight and there was no effect on overall program performance.							

Below is a highlighted accomplishment demonstrating success in *Providing Essential Support to National and Economic Security*.

### Operation Stone Face II

Imports of polished granite from Brazil and India were often misclassified in order to claim Generalized System of Preferences (GSP), a trade preference program which allows for significantly diminished duty rates. CBP conducted Operation Stone Face I in 2008 which targeted those imports. The Operation was successful, however recently CBP discovered that some importers adopted a different GSP eligible provision for imports of polished granite in order to once again evade customs collection. The many discrepancies discovered through CBP's targeting made it abundantly clear that another special operation would be necessary to address the misclassification of stone, which gave rise to Operation Stone Face II in April 2010. As part of this ongoing operation, CBP targeted the misclassified stone, which were similarly being entered conditionally free due to the GSP claim. CBP's targeting associated with Operation Stone Face II generated an estimated \$457,105 in recovered revenue and \$20,000 in penalty assessments.

**Table 16: Performance Measures for Goal: Ensure Maritime Safety and Environmental Stewardship**

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Percent of people in imminent danger saved in the maritime environment (USCG)	76.8%	77.3%	74.4%	100%	77.27%	100%	100%
Explanation: The Search and Rescue program strives to save 100% of lives in imminent danger in the maritime environment. Many uncontrollable variables influence the number and outcome of search and rescue incidents (weather, location, incident severity, life saving devices on board, etc.). In FY 2011 the U.S. Coast Guard saved 3,804 lives in 20,510 cases with 732 lives lost and 390 lives unaccounted for. In comparison, in FY 2010 the U.S. Coast Guard saved 4,348 lives in 22,226 cases with 816 lives lost and 480 lives unaccounted for.							
Five-year average number of commercial and recreational boating deaths and injuries (USCG)	---	---	---	≤ 4,813	4,567	≤ 4,642	≤ 4,546

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Availability of maritime navigation aids (USCG)	98.3%	98%	98.5%	97.5%	98.48%	97.5%	97.5%
Number of detected incursions of foreign fishing vessels violating U.S. waters (USCG)	81	112	82	< 180	122	< 140	< 85
Fishing regulation compliance rate (USCG)	95.3%	96.7%	97.2%	96%	97.4%	96%	96%

**Table 17: Performance Measures for Goal: Conduct and Support Other Law Enforcement Activities**

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Percent of National Center for Missing and Exploited Children (NCMEC) examinations requested that are conducted (USSS)	---	---	---	100%	100%	100%	100%
Number of Federal law enforcement training programs and/or academies accredited or re-accredited through the Federal Law Enforcement Training Accreditation process (FLETC)	---	50	52	56	66	74	82

Below is a highlighted accomplishment demonstrating success in *Providing Essential Support to National and Economic Security*.

### Defense Readiness

U.S. Coast Guard Cutters *Bertholf*, *Sycamore*, and *Long Island* participated in Exercise Northern Edge, a training event held annually in Alaska. Sponsored by United States Northern Command, Northern Edge is a multi-service training exercise designed to practice operations, tactics, and procedures aimed at enhancing interoperability among U.S. military forces. Throughout the exercise, U.S. Coast Guard ships assumed offensive and defensive postures in response to aerial and surface threats. In both roles, U.S. Coast Guard ships utilized their unique capabilities to work alongside Department of Defense counterparts, exercising tactics, techniques, and procedures involving engineering casualty control, medical response, helicopter landing operations, underway replenishment, and visit, board, search, and seizure. The common objective among all scenarios was to improve communications, interoperability, and command and control procedures.

## Cross-Cutting Performance Measures

Some of the Components' efforts, by the very nature of their work, support multiple missions in DHS. Specific examples include awareness and understanding of risks and threats offered by Analysis and Operations, research and development to advance technology and processes provided by Science and Technology, and law enforcement training both within DHS and with our law enforcement partners delivered by the Federal Law Enforcement Training Center. Below are the current measures to reflect cross-cutting results.

**Table 18: Cross-Cutting Performance Measures**

Performance Measures	Prior Year Results			FY 2011		Planned Targets	
	FY 2008	FY 2009	FY 2010	Target	Results	FY 2012	FY 2013
Percent of breaking homeland security situations integrated and disseminated to designated partners within targeted timeframes (AO)	---	88%	100%	95%	100%	95%	95%
Percent of Partner Organizations satisfied that the Federal Law Enforcement Training Center training programs address the right skills needed for their officers/agents to perform their law enforcement duties (FLETC)	79.75%	82%	96%	84%	98.5%	97%	97%

## Priority Goals

In the FY 2010 Budget, the Obama Administration defined Priority Goals, which represent areas in which the Administration has identified opportunities to significantly improve near-term performance. These goals are only a subset of each agency’s critical efforts, which also include long-term strategic goals and goals dependent on new legislation or additional funding. For FY 2011, the Department is reporting out the final results of the performance measures used to assess our progress in addressing our FY 2010 – 2011 Priority Goals.

Per the *GPR Modernization Act*, 31 U.S.C. 1115(b)(10), requirement to address Agency and Federal Priority Goals in the agency Strategic Plan and Annual Performance Plan, please refer to [Performance.gov](http://Performance.gov) for information on both the Agency Priority Goals, and the Federal Priority Goals and the agency’s contributions to those goals, where applicable.

### ***Priority Goal 1: Preventing Terrorism and Enhancing Security through Aviation Security***

#### **Goal Statement**

Improve commercial aviation security screening through layered security measures including the utilization of Transportation Security Officers, Secure Flight, and Advanced Imaging Technology.

Goal Leader: Howard Goldman, Senior Counselor, Transportation Security Administration

#### **Overview**

In order to combat evolving threats to the commercial aviation sector, DHS’s goal is to screen one hundred percent of all passengers, baggage, and cargo on passenger planes while facilitating and expediting legal travel and trade. DHS/TSA is working to deploy the most effective layered screening technologies at all airports to detect threats on passengers and in baggage, and to improve the vetting process for air passengers against government watchlists by implementing Secure Flight.

#### **Progress Update**

During the past two years, TSA met all but two of its aviation transportation security performance measure targets and has continued to allocate necessary resources and set deployment schedules to achieve its “Preventing terrorism and enhancing security through aviation security” Priority Goal.

TSA began implementing the Secure Flight program in early 2008 and as of November 2010 has a fully implemented watch list matching program that matches 100 percent of passengers on all flights into, out of and within the United States. In addition, TSA achieved its goal of screening 100 percent of all passenger air cargo departing U.S. airports in August 2010. International inbound air cargo is more secure than it has ever been with 100 percent of identified high risk cargo now being screened. During the last two years, TSA has enhanced passenger checkpoint screening through the large deployment of Advanced

Imaging Technology (AIT) to detect non-metallic threat items. There are currently 522 AITs at 98 airports nationwide, representing 100 percent of machines scheduled for deployment. In addition, during the past year, TSA invested in new software, referred to as Automatic Target Recognition (ATR), to address privacy issues and civil rights and civil liberties concerns. ATR enhances passenger privacy by eliminating passenger-specific images and instead highlighting the area with a detected anomaly on a generic outline of a person. TSA has installed this new software on all 275 deployed Millimeter Wave AIT units

In addition to AIT, TSA utilizes Bottled Liquids Scanner (BLS) screening systems that are used by Transportation Security Officers to detect potential liquid or gel threats which may be contained in passenger's property. TSA has deployed 84 percent of the planned BLS systems to roughly 50 percent of airports. Based on evolving security needs, utilization rates, and airport requirements, TSA re-assessed the BLS distribution strategy and adjusted deployment plans to increase deployments.

Explosives Detection Systems are the most efficient screening technology for checked baggage. While TSA has experienced small decreases in operational availability due to airport power outages and airport construction delays which slowed screening and required TSA to utilize alternative screening methods, the agency continues to work toward achieving FY 2012 targets as projected. This equipment provides improved threat detection capabilities and automates previous screening methods with throughput increases up to 300 percent.

TSA has consistently met its quarterly target of keeping wait times to less than 20 minutes, although TSA has seen an increase in carry-on items which has significantly increased the amount of baggage screened at passenger checkpoints.

TSA continues to work to balance security and the passenger experience. Currently, TSA is testing a limited, voluntary passenger pre-screening initiative with a small traveler population at four U.S. airports. The TSA Pre✓ initiative implements a key component of the agency's intelligence-driven, risk-based approach to security. This pilot program will help assess measures designed to enhance security by placing more focus on pre-screening individuals who volunteer to participate in order to expedite the travel experience.

TSA will continue to progress as a high-performance, world-class counterterrorism organization utilizing smart, intelligence-driven aviation security solutions to facilitate travel and commerce.

## Results

**Table 19: Priority Goal 1 Performance Measures**

Performance Measures	FY 2010 Results	FY 2011 Results
Percent of domestic air enplanements vetted through Secure Flight (TSA)	100%	100%
Percent of international air enplanements vetted through Secure Flight (TSA)	77%	100%

Performance Measures	FY 2010 Results	FY 2011 Results
Percent of nationwide airport operational hours with wait times of less than 20 minutes (TSA)	99%	99.4%
Percent of checked baggage screened with Explosive Detection Systems (EDS) that maximize security, effectiveness and efficiency (TSA)	89%	90%
Percent of air cargo screened for transport on commercial passenger flights originating from the U.S. and territories (TSA)	100%	100%
Average number of days for DHS TRIP redress requests to be closed (TSA)	57 days	99 days
Explanation: Two major factors resulted in an increase in redress time for FY 2011. First, DHS TRIP experienced a significant IT issue that impacted the ability to process applications timely; and 2) DHS TRIP initiated a significant focus on adjudicating and closing aging cases, which negatively impacted average processing time. In FY 2012, DHS TRIP will be upgrading its case management system to provide more efficient processing which will allow DHS TRIP to focus on adjudicating aging inquiries while reducing processing time for new inquiries.		
Percent of Advanced Image Technology (AIT) machines deployed according to the deployment plan (TSA)	78%	100%
Percent of airports with bottled liquid scanners coverage (TSA)	6%	39%
Passenger security screening assessment results (TSA)	Classified	Classified
Baggage security screening assessment results (TSA)	Classified	Classified

## ***Priority Goal 2: Preventing Terrorism and Enhancing Security through Surface Transportation Security***

### **Goal Statement**

Improve security in the surface modes of transportation by performing risk assessments, closing vulnerability gaps, vetting key workers, providing training and deploying highly skilled prevention and response teams.

### **Overview**

Millions of passengers and millions of tons of commodities move through our nation’s surface transportation network each year. DHS recognizes that the risk from terrorism and other hazards demands a coordinated approach to security involving all sector partners and stakeholders, including federal, state, and local governments as well as the private sector. DHS/TSA is leveraging these partnerships to increase the overall level of surface transportation security across the four sectors—mass transit, highways, freight rail, and pipelines.

Goal Leader: Howard Goldman, Senior Counselor, Transportation Security Administration

## Progress Update

During the past two years, TSA met all but two of its surface transportation security performance measure targets and has continued to allocate necessary resources to achieve its “Preventing terrorism and enhancing security through surface transportation security” priority goal.

In conjunction with the Federal Emergency Management Agency (FEMA), TSA manages Transportation Security Grant Programs. These programs have awarded over \$2 billion to the mass transit, passenger rail, trucking, freight rail, and intercity bus sectors since 2006.

In FY 2010, the agency completed a national threat assessment for each mode of transportation and assessed a series of terrorist attack methods, and in FY 2011, completed the transportation systems-sector specific plan, which established strategic goals and objectives in order to achieve a shared vision of a safe and secure national transportation system. TSA has also conducted thousands of Visible Intermodal Prevention and Response (VIPR) operations and has vetted more than 2 million maritime workers through the Transportation Worker Identification Credential (TWIC) program and over 1.8 million drivers through the Hazardous Materials Endorsement (HME) program.

TSA’s “Percent of mass transit and passenger rail agencies that have effectively implemented industry agreed upon Security and Emergency Management Action items to improve security” measure reflects the percent of the 100 largest mass transit, light and passenger rail, bus, and other commuter transportation agencies that have taken recommended steps to improve security.

DHS completed risk-based implementation plans with associated milestones for each of the 20 consensus recommendations of the Surface Transportation Security Priority Assessment (STSPA), addressing the potential risks to the surface transportation system. In FY 2011, 63 percent of the STSPA implementation plan milestones were met. As of October 2011, 10 recommendations have been fully implemented and implementation of the others is underway.

Under requirements of the 9/11 Act, TSA is directed to support security exercises for transportation modes including freight rail, mass transit, and highway. TSA measures its efforts through Intermodal Security Training Exercise Program (I-STEP), which tests transit agencies preparedness, response and recovery. In the fourth quarter of FY 2011, all objectives were met for the surface transportation security and preparedness exercise goals measure.

In FY 2011, TSA performed 7,850 Visible Intermodal Prevention and Response (VIPR). VIPR team operations are unpredictable visual deterrents and their rapid deployment to all modes of transportation can be seen randomly in transit and rail stations, in support of major events, and to respond to and defeat threatened terrorist activity. In FY 2010, TSA developed a performance measure to gauge the percent of requested National Special Security Events and Special Assessment Rating Events at which VIPR teams are deployed. During the past two years, TSA has consistently met its target of 100 percent.

**Results**

**Table 20: Priority Goal 2 Performance Measures**

Performance Measures	FY 2010 Results	FY 2011 Results
Percent of mass transit and passenger rail agencies that have effectively implemented industry agreed upon Security and Emergency Management Action items to improve security (TSA)	23%	28%
Explanation: Transit agencies are assessed every three years. The Transportation Security Inspectors for Surface assess a percentage of the transit agencies each year and it takes approximately six years for all transit agencies assessed to demonstrate that vulnerabilities identified in the first assessment have been addressed. Improvements made by an agency would not be captured until the following cycle of assessments. Progress has been made toward the target; however, sustained progress is contingent on funding available to state and local agencies.		
Percentage of surface transportation security and preparedness exercise goals achieved according to the surface mode transportation assessment (TSA)	100%	100%
Completion rate of requested high-risk Visible Intermodal Prevention and Response (VIPR) operations (TSA)	100%	100%
Number of annual VIPR operations to deter potential terrorist actions and enhance security at surface transportation facilities (TSA)	3,895	1,906
Percent of DHS-led annual Surface Transportation Security Assessment implementation plan milestones met (TSA)	62.5%	63.3%
Explanation: In FY 2011 there were 30 milestones to improve surface transportation security, some of which have multi-year implementation plans and some which are outstanding due to external factors.		

***Priority Goal 3: Securing and Managing Our Borders through the Western Hemisphere Travel Initiative (WHTI)***

**Goal Statement**

Prevent terrorist and criminal movement at land ports of entry through secure travel documents and enhanced technology that will effectively integrate vehicle and passenger data.

**Overview**

Build upon the initial success of WHTI, which improved vehicle processing at the land border by requiring travelers to present technically enhanced travel documents and strengthened CBP’s ability to target violators by integrating vehicle and passenger data. WHTI continues to expand the use of technology to additional land locations and to other key mission processing areas including pedestrian, outbound and the Border Patrol checkpoints. The overall effect of WHTI is a more secure land border that simultaneously facilitates legitimate travel.

Thomas Winkowski,  
Acting Deputy  
Commissioner, U.S.  
Customs and Border  
Protection

## Progress Update

WHTI Air requirements went into effect in January 2007 and compliance continues to be high—well over 99 percent for U.S. and Canadian citizens. WHTI secure document requirements were successfully implemented on June 1, 2009 at all the nation’s land and seaports. Compliance rates remain high averaging nearly 97 percent since implementation. This compliance rate increases to 99 percent on our northern border. Through the end of FY 2011, the WHTI technical solution has been deployed on over 470 inbound travel lanes at 58 land border ports and six lanes at one Border Patrol (BP) checkpoint. The improved intelligence and targeting capability enabled by WHTI has had a positive impact on specific apprehensions. Subsequent to WHTI implementation, drug seizures on the Southern Border increased 30 percent; false claims to U.S. citizenship apprehensions grew 25 percent on the Southern Border; and the rate of fraudulent documents intercepted at the land border increased by 12 percent for FY 2011 as compared to FY 2008.

U.S. Customs and Border Protection (CBP) is working to capitalize on the success of the WHTI. The comprehensive Land Border Integration strategic focus is on mission integrated investments in outbound enforcement operations, inbound processing, and border patrol checkpoint processing. The integration of these three missions, the “Triangle Strategy,” seeks to expand innovative technologies and processes to provide further efficiencies in both security and facilitation for all facets of the land border. Key themes include mission integration; business process re-engineering in all land border mission areas; and leveraging mobile technologies.

During FY 2011, WHTI advanced implementation of the Triangle Strategy by deploying the inbound technical solution at two ports, piloted mobile/handheld technology on outbound processing at one port, completed the deployment of fixed outbound technology at five ports, and deployed tactical outbound technology to 20 lanes at six Border Patrol checkpoints. In addition, improved port efficiencies were realized by applying Active Lane Management techniques including the use of Ready Lanes at 17 crossings. A Ready Lane is a primary vehicle lane that only accepts RFID-enabled documents and where all adult passengers in a vehicle present one of these documents. Ready Lanes improve the effectiveness of the primary inspection; provide a substantial, tangible benefit to the traveler; and improve the efficiency of primary vehicle lanes by leveraging the existing CBP investment in RFID technology and documents. At some locations, these Ready Lanes handle almost 30 percent of the traffic volume with an average inspection time 20 percent faster than general passenger vehicle lanes.

## Results

**Table 21: Priority Goal 3 Performance Measures**

Performance Measures	FY 2010 Results	FY 2011 Results
Percent of travelers entering the US with a secure document that establishes identity and citizenship (CBP)	96.5%	96.2%
Number of travelers who have been issued a WHTI-compliant, technologically enhanced secure travel document (Radio Frequency Identification (RFID) enabled) (CBP)	6,935,500	11,800,000

Performance Measures	FY 2010 Results	FY 2011 Results
Average privately-owned vehicle processing time at land borders (CBP)	57.3 seconds	58 seconds
Average pedestrian processing time at land borders (CBP)	23 seconds	22 seconds

## ***Priority Goal 4: Enforcing and Administering Our Immigration Laws through Detention and Removal Efficiency***

### **Goal Statement**

Improve the efficiency of the process to detain and remove illegal immigrants from the United States.

### **Overview**

ICE is prioritizing the arrest and removal of convicted criminals, fugitives, illegal re-entrants, recent border violators, and visa overstays. The Secure Communities program uses biometric identification technology to better identify aliens arrested in state and local jurisdictions. Secure Communities is critical to ICE's efforts to identify and remove aliens who present a risk to national security or public safety, including terrorists, transnational gang members, and convicted criminals.

Goal Leader: Gary Mead, Executive Associate Director, Enforcement and Removal Operations, U.S. Immigration and Customs Enforcement

### **Progress Update**

In FY 2011, ICE was very successful in meeting Priority Goal targets. ICE exceeded the FY 2011 goal of removing 180,000 criminal aliens and surpassed FY 2010's performance by nearly 21,000, removing 216,698 convicted criminal aliens. Similarly, ICE removed 75,086 aliens convicted of the most serious crimes, more than both the FY 2011 goal and FY10's level. ICE's success in the removal of criminal aliens in FY 2011 is due to increased collaboration with law enforcement partners and implementation of ICE Civil Enforcement Priorities that prioritizes resources on individuals who pose the highest threat to national security and public safety.

At 34.7 days, ERO succeeded in meeting the target of 38 days Average Length of Stay (ALOS) for criminal detainees in FY 2011. ALOS success was due in part to continuing to increase detention capacity in locations where detainee transfers occur most often; for individuals being transferred, detainee transfers increase the average length of stay by approximately 14 days. ICE continues to focus on the development of a detention system that has the right number and type of facilities, in the right locations to align with enforcement and removal activities. In addition, ICE met the \$119.50 target by maintaining an average bed cost per day of \$112.83. This success was accomplished by discontinuing the use of high cost Service Processing Centers (SPCs) with an average bed rate of \$158.99 per day; negotiated lower bed rates; and taking advantage of guaranteed minimums with reduced rates over a threshold number of beds.

ICE uses a federal biometric information sharing capability to identify aliens arrested for a crime and booked into state or local law enforcement custody. ICE prioritizes immigration enforcement actions on threats to national security and public safety, criminal aliens, and aliens threatening the integrity of our immigration system. In FY 2011, this capability was activated in 1,595 jurisdictions nationwide, 43 states, and 1 territory.

## Results

**Table 22: Priority Goal 4 Performance Measures**

Performance Measures	FY 2010 Results	FY 2011 Results
Number of total removals and returns (includes criminal and non-criminal removals and voluntary returns) (ICE)	392,862	396,906
Number of convicted criminal aliens removed per fiscal year (ICE)	195,772	216,968
Number of aliens removed convicted of the most serious crimes (level 1 offenders) (ICE)	64,446	75,086
Average length of stay in detention of all convicted criminal aliens prior to removal from the United States (ICE)	37 days	34.7 days
Estimated average bed cost per day (ICE)	\$116.88	\$112.83
Percent of aliens arrested or charged who will be electronically screened through the Secure Communities (ICE)	63.8%	75.6%

## ***Priority Goal 5: Enforcing and Administering Our Immigration Laws through U.S. Citizenship and Immigration Services Business Transformation***

### Goal Statement

Improve the delivery of immigration services.

### Overview

In its current state, U.S. Citizenship and Immigration Services (USCIS) relies largely on the movement of paper to deliver immigration benefits and services. In the future, USCIS will utilize a paperless, electronic system that will transform nearly all of the Agency's processes. Through web-based technology, customers will maintain individual accounts with USCIS and be able to obtain more detailed and current information on their cases. By organizing and sharing information digitally, USCIS will increase the efficiency of its adjudications while facilitating the rapid and collaborative exchange of information with partner agencies. Through integrated risk and fraud management, USCIS will identify patterns early in its process and enhance the security of the nation's immigration system.

Goal Leader: Gerri Ratliff, Chief, Office of Transformation Coordination, U.S. Citizenship and Immigration Services

## Progress Update

Significant progress has been made toward the goal of implementing USCIS’s Electronic Immigration System (ELIS) which will transform the immigration benefit process from a paper-based to an electronic environment and enable us to better serve our customers through a process that is more transparent, efficient, and accessible. During FY 2011, USCIS finalized requirements to deliver end-to-end functionality for a portion of the nonimmigrant benefit requests. USCIS also developed and demonstrated an end-to-end electronic immigration processing prototype, which was used to complete detailed design and development of the core account and case management functions to support the intake and adjudication of the I-539 (Application to Change or Extend Nonimmigrant Status). The first release of USCIS ELIS is in the final pre-deployment stage (System Assurance Testing) and the design of the second release is underway.

USCIS ELIS will enable the adoption of new, customer-centric business processes that will allow all new immigration benefit applications/petitions to be filed electronically through a USCIS web-based portal. As it is fully implemented, USCIS will have a more comprehensive view of the customer and any potentially fraudulent transactions; improved audit functionality and record management; better resource management; and increased sharing of information with our partners both inside and outside of DHS.

## ***Priority Goal 6: Ensuring Resilience to Disasters by Strengthening Disaster Preparedness and Response Capabilities***

### Goal Statement

Strengthen disaster preparedness and response by improving FEMA's operational capabilities and strengthening state, local and private citizen preparedness.

### Overview

Recognizing the risks we face as a nation and our potential vulnerabilities to terrorist attacks and disasters, we are working to strengthen disaster preparedness and response. To do so, FEMA is improving its operational capabilities, strengthening state, local, individual and private sector preparedness through Emergency Management Institute training, putting in place resources and strategies for temporary housing (Transitional Sheltering Assistance—hotels, rental assistance, repair and replacement assistance, as well as leasing direct housing units to eligible households) and ensuring the availability of life-sustaining/life-saving commodities (meals, water, tarps, plastic sheeting, cots, blankets and generators) during disasters.

Goal Leader: David Kaufman, Director, Office of Policy and Program Analysis, Federal Emergency Management Agency

### Progress Update

Providing life-sustaining supplies and equipment (i.e., emergency meals, bottled water, cots, blankets, plastic sheeting (roofing), tarps, and emergency generators) to survivors in an impacted area is considered an Essential Operation in stabilizing an incident within 72 hours. In FY 2011 FEMA delivered 93.3 percent of orders (615 of 659) for life-sustaining disaster supplies and key initial response resources by a required date as

agreed upon by key federal, state, and local officials to best meet the needs of the customer. FEMA seeks to continually improve delivery metrics by analyzing factors contributing to any missed or late deliveries and validating actual delivery times. Challenges that could impede goal achievement include serious transportation infrastructure conditions (e.g., damaged highways and roads and damaged bridges) or multiple, or overwhelmingly catastrophic events, which would increase the complexity of delivering supplies.

In FY 2011, FEMA temporary housing assistance was provided to 152,260 disaster households of which 99 percent (152,003) were assisted within 60 days. Individuals affected by a disaster can apply to FEMA for disaster assistance online through [disasterassistance.gov](http://disasterassistance.gov) or via tele-registration. FEMA strives to improve the nation’s ability to adapt and rapidly recover from major disasters while meeting the needs of disaster survivors in the most effective way possible.

In FY 2011, 95.8 percent of trainees from all levels of government report they are better prepared to deal with disasters and emergencies as a result of training. This effort builds toward an all-hazard, risk-based national emergency management system that strengthens the Nation’s ability to protect its citizens and its property/assets. FEMA strives for continuous improvement by conducting a 90-day follow-up survey to individuals completing FEMA-sponsored training courses to determine training effectiveness and how future training can be improved. In FY 2011, in consultation with National Emergency Managers Association, International Association of Emergency Managers, and the EMI Higher Education Program, EMI established the Emergency Management Training and Education System (EMTES). This system established a set of core competencies in the field of emergency management at the foundations, specialized technical, executive managerial and strategic leadership levels. In addition, EMI established the National Emergency Management Academy which introduces a national training program covering key foundational topics and provides broad entry level knowledge of the profession. Similar to “basic” academies developed by fire and law enforcement communities, the Academy’s goal is to provide foundational education in emergency management while providing an opportunity for students to build camaraderie, establish professional contacts, and gain a common understanding of the roles, responsibilities, and authorities of an emergency management program. Development of training programs for Specialized and Technical, Executive and Managerial, and a Strategic Leadership targeted to federal, state, and local agency executives is ongoing this year.

## Results

**Table 23: Priority Goal 6 Performance Measures**

Performance Measures	FY 2010 Results	FY 2011 Results
Percent of orders for required life-sustaining commodities (meals, water, tarps, plastic sheeting, cots, blanket and generators) and key initial response resources delivered by the agreed upon date (FEMA)	98%	93.3%
Percent of eligible applicants provided temporary housing (including non-congregate shelters, hotel/motel, rental assistance, repair and replacement assistance, or direct housing) assistance within 60 days of a disaster (FEMA)	99%	99%

Performance Measures	FY 2010 Results	FY 2011 Results
Percent of trainees from all levels of government including tribal, public and private sector, and non-governmental organizations reporting they are better prepared to deal with disasters and emergencies as a result of training (FEMA)	86.9%	92%

***Priority Goal 7: Maturing and Strengthening the Homeland Security Enterprise through Effective Information Sharing***

**Goal Statement**

Maturing and strengthening the homeland security enterprise through effective information sharing.

**Overview**

DHS is working to improve and enhance secure information sharing capabilities for state and local partners, the timeliness and sufficiency of responses to stakeholders' requests, and improvement of internal DHS information sharing. In addition to addressing these specific issues, DHS is developing a department-wide information sharing roadmap based on the strategic framework set forth in the Quadrennial Homeland Security Review which will further mature and strengthen the homeland security enterprise.

Goal Leader: Clark Smith, Director for Information Sharing and Intelligence Enterprise Management, Intelligence and Analysis

**Progress Update**

During the second half of the fiscal year, the Office of Intelligence and Analysis (I&A) continued to improve the Homeland Security Standing Information Needs (HSEC SINs) initiative by: clearly defining and communicating what SINs are and how they are used; refining the process by which I&A supports the fusion centers' development of their own SINs; and strengthening the process by which the Department captures the needs of analysts supporting private sector customers. These efforts resulted in the modification and production of educational materials for: DHS Components; the fusion centers and their state, local, tribal, and territorial stakeholders; and intelligence analysts serving the private sector. I&A collaborated with the National Network of Fusion Centers (NNFC) and its interagency partners to design and implement the 2011 Fusion Center Assessment, which evaluated the progress of the NNFC in achieving both the Critical Operational Capabilities and Enabling Capabilities. These capabilities were designed to ensure the state and locally operated fusion centers all have uniform baseline abilities despite differences that naturally occur in a distributed management model. In September, I&A interviewed Fusion Center Directors to refine and validate the assessment which ultimately found that 65 percent of these critical elements had been implemented.

Based on customer feedback on State and Local Support Requests, I&A, and Operations began consolidating their process for handling Requests for Information (RFI) and expanding the DHS Single Point of Service. This expanded service will streamline the process by which I&A and Operations receive, process, track, and respond to operational

and intelligence RFIs. I&A led an interdepartmental effort to certify all legacy Information Sharing Access Agreements with external partners. I&A, in collaboration with Customs and Border Protection, Federal Emergency Management Administration, and U.S. Coast Guard, certified over 130 of these legacy agreements. This surge in compliant agreements puts the Department ahead of schedule toward achieving the goal of having all legacy agreements compliant by the end of fiscal year 2012.

## Results

**Table 24: Priority Goal 7 Performance Measures**

Performance Measures	FY 2010 Results	FY 2011 Results
Percent of products directly responsive to State, Local, Tribal, and Territorial and Component Standing Information Needs (I&A)	---	85%
Percent of valid state, local, and federal support requests answered within the mutually agreed upon suspense date to the requestor's satisfaction (I&A)	---	85%
Percent of information sharing agreements with external partners that incorporate all DHS Components (I&A)	34%	75%

## *Priority Goal 8: Maturing and Strengthening the Homeland Security Enterprise by Improving Acquisition Execution*

### Goal Statement

Improve acquisition execution across the DHS acquisition portfolio, by ensuring key acquisition expertise resides in major program office and acquisition oversight staffs throughout the Department.

Goal Leader: Chris Cummiskey, Deputy Undersecretary for Management

### Overview

The Department of Homeland Security is working to ensure its major acquisitions are effectively managed in order to maximize the value of every homeland security dollar. DHS will ensure that every major program is implemented in the most responsible and efficient manner possible. This goal includes having disciplined oversight processes and robust acquisition program management teams in place. Disciplined oversight processes begin with having a well-defined acquisition requirement and a cost, schedule and performance plan (acquisition program baseline) against which program managers are held accountable for results. Additionally, DHS will ensure acquisition programs and oversight offices are staffed with personnel who possess the requisite government experience, knowledge, and skills in core acquisition management disciplines.

### Progress Update

The Department has met or exceeded all goals related to strengthening the acquisition programs and oversight offices to ensure DHS major acquisitions are effectively managed in

order to maximize the value of every DHS dollar. At the end of September 2011, 94 percent of the program managers of major acquisition programs were properly certified in accordance with Department policy, exceeding the FY 2011 target goal of 93 percent. We have increased the number of Program Management Offices (PMO) reporting that they have all five of their respective core positions filled or matrixed from 20 at the end of FY 2010 to 34 in FY 2011 and have increased the number of approved Acquisition Program Baselines (APBs) from 17 to 28 at the end of the fourth quarter FY 2011. The current percent of major acquisition programs with a core team, signed APB, and meeting cost/schedule/performance is 89 percent, exceeding the FY 2011 goal of 70 percent. All seven major operational Components have a Component Acquisition Executive (CAE) in place (100 percent). The total number of CAE staff positions filled has also increased from 25 to 42. The current percent of Component acquisition oversight organizations with core team positions filled or matrixed is 75 percent, exceeding the FY 2011 goal of 70 percent. The percent of PMOs with major acquisition program core team positions filled is roughly 70 percent, which achieves the Department’s goal. The DHS Acquisition Workforce Initiative funding was not funded in the FY 2011 appropriations and the Department continues to work closely with Congress and the Office of Management and Budget to secure the funding for additional acquisition positions in FY 2012, which is a significant piece of this initiative. Additionally, this year, the Under Secretary for Management has implemented major initiatives to include building the Department’s Program Management Corps by strengthening training and certification and expanding the current acquisition mentoring program.

## Results

**Table 25: Priority Goal 8 Performance Measures**

Performance Measures	FY 2010 Results	FY 2011 Results
Percent of major acquisition programs with properly certified program managers (DMO)	84%	94%
Percent of Department major acquisition program core team positions that are filled (DMO)	67%	70%
Percent of major acquisition programs with a core team in place and a signed Acquisition Program Baseline (APB) that are meeting the cost, schedule or performance threshold agreed to in the APB (DMO)	100%	89%
Percent of Component acquisition oversight organization core team positions that are filled (DMO)	44%	75%
Percent of Components with approved Component Acquisition Executives (DMO)	85%	100%

## DHS Workforce Strategy

The DHS Workforce Strategy for Fiscal Years 2011-2016 aligns with and supports Departmental priorities identified in the Quadrennial Homeland Security Review (QHSR), Bottom-Up Review, and areas of improvement identified by the U.S. Government Accountability Office (GAO). Developed by a cross-Component working group and signed by the Secretary, the DHS Workforce Strategy provides the strategic roadmap to make DHS a premier employer for the top talent necessary to secure the homeland. The plan is built around the following four goals:

1. Build an effective, mission-focused, diverse, and inspiring leadership cadre.
2. Recruit a highly qualified and diverse workforce.
3. Retain an engaged workforce.
4. Solidify a unified DHS culture of mission performance, adaptability, accountability, equity, and results.

All Components submitted FY 2011 operational plans that incorporated the common objectives and performance measures that cascade from these goals. In FY 2011, accomplishments in these areas included:

**Build an effective, mission-focused, diverse, and inspiring leadership cadre:** A cross-DHS group developed a comprehensive Leader Development Program and Framework to reflect optimal leader development roadmaps for all levels of employees. For example, the Cornerstone program, a top priority for the Deputy Secretary, provides a consistent baseline of requirements for the development of some 27,000 supervisors, managers, and executives across the Department. The program provides pre-supervisory awareness, supervisor onboarding, 40 hours of development during the first 11 months of appointment, and an annual requirement for all supervisors to complete 12 hours of self-development and 12 hours of “give back” as investment in developing leadership in other DHS employees.

**Recruit a highly qualified and diverse workforce:** Through a collaborative process, DHS developed a new DHS Coordinated Recruiting and Outreach Strategy. This streamlined approach will leverage recruiting assets from around the country and will strengthen the One DHS brand. Moreover, recruiting efforts will target all underrepresented groups, including individuals with disabilities and Veterans. DHS surpassed the Secretary’s goal of having 50,000 veterans on board in FY 2011, more than one year in advance of the target date.

**Retain an engaged workforce:** DHS has been working on multiple fronts to enhance employee engagement, including leadership involvement in the DHS Labor Management Forum and the launch of the Homeland Security Rotational Program. The Secretary has also issued a series of actions to address gaps identified in the [2011 Federal Employee Viewpoint Survey](#), including establishing an employee engagement executive steering committee.

**Solidify a unified DHS culture of mission performance, adaptability, accountability, equity, and results.** OCHCO and OCIO have worked with the Human Resource Information Technology (HRIT) Executive Steering Committee to develop a segment architecture for Human Capital and a long-term strategy to eliminate redundancy in HRIT systems across the Department. By consolidating, integrating, and modernizing the Department’s HRIT infrastructure, DHS will have the flexibilities and management information to evolve continuously in response to changing business, legislative, and economic drivers.

## GAO High-Risk Series – Summary of Progress

The [Government Accountability Office](#) (GAO) identifies in a [High-Risk Series report](#), those federal programs and operations that are high risk due to their greater vulnerabilities to fraud, waste, abuse, and mismanagement. In recent years, GAO has also identified high-risk areas to focus on the need for broad-based transformations to address major economic, efficiency, or effectiveness challenges. The GAO maintains these high-risk items until satisfied that acceptable progress has occurred to address these challenges. An update of the High-Risk Series is provided by GAO at the start of each new Congress. The most recent update ([GAO-11-278](#)) was published in February 2011. The areas that fall within the Department of Homeland Security’s (DHS) purview are listed below.

- Implementing and Transforming the Department of Homeland Security
- Establishing Effective Mechanisms for Sharing Terrorism-Related Information to Protect the Homeland
- Protecting the Federal Government’s Information Systems and the Nation’s Critical Infrastructure
- National Flood Insurance Program
- Strategic Human Capital Management (Government-wide high-risk area)
- Federal Real Property Management (Government-wide high-risk area)

The Department carries out multiple complex and highly diverse missions. Although the Department continually strives to improve the efficiency and effectiveness of its programs and operations, the areas identified above merit a higher level of focus and attention. Typically, overcoming challenges in these areas require long-term strategies for ensuring stable operations, sustained management attention, and resources. As such, DHS’s Under Secretary for Management has implemented a quarterly review of the Department’s progress in addressing each of these areas.

The remainder of this section of the report provides a brief summary of the Department’s efforts in addressing each of the GAO’s High-Risk areas.

## Status Update

### GAO High-Risk Area: Implementing and Transforming the Department of Homeland Security

**GAO Overview:** In 2003, GAO designated implementing and transforming the Department of Homeland Security (DHS) as high risk because DHS had to transform 22 agencies—several with major management challenges—into one department. GAO’s prior work on mergers and acquisitions, undertaken before the creation of DHS, found that successful transformations of large organizations, even those faced with less strenuous reorganizations than DHS, can take years to achieve. DHS, with more than 200,000 employees and an annual budget of more than \$40 billion, is the third-largest federal department, and its transformation is critical to achieving its homeland security missions. This high-risk area includes challenges in strengthening DHS’s management functions, including acquisition, information technology, financial, and human capital management; the impact of those challenges on DHS’s mission implementation; and challenges in integrating management functions within and across the Department and its Components.

**DHS Status:** In January 2011, the Under Secretary for Management (USM) issued the “Integrated Strategy for High Risk Management” to address GAO’s high risk designation in the “implementation and transformation” category. This plan provided a roadmap and set forth the USM’s management priorities, which included:

1. Improving the Department’s financial systems and capabilities;
2. Strengthening acquisition management, especially in the program management arena;
3. Standardizing how the Department prioritizes investments, makes trade-off decisions, rationalizes technical requirements, allocates resources and develops implementation strategies;
4. Enhancing business intelligence to inform critical budget and programmatic decisions; and
5. Implementing the strategies in the Department’s Human Capital Management Plan.

In January 2012, the USM submitted its second biannual update to this report to GAO. It included detailed corrective action plans to address GAO’s recommendations in the “implementation and transformation” category, initiative milestones, and an enhanced methodology to show progress over time. The USM is optimistic that the Department’s progress in the management integration category will be noted in the next GAO High Risk Update, expected in January 2013.

Other activities to track progress within the department include quarterly Internal Progress Reviews (IPRs) and the Management Council. The purpose of the quarterly IPRs is to assess each Line-of-Business Chief’s progress on key management programs and initiatives. While the Line-of-Business Chiefs attend the IPRs, the actual progress reports are presented by the initiative’s program manager, which promotes visibility and accountability within the Management Directorate. The USM is using the Management Council, to focus on initiatives that solidify the vertical integration and will also promote stronger horizontal integration between each Component.

**GAO High-Risk Area:** Establishing Effective Mechanisms for Sharing Terrorism-Related Information to Protect the Homeland

**GAO Overview:** In January 2005, GAO designated terrorism-related information sharing as high risk because the government faced serious challenges in analyzing key information and sharing it among federal, state, local, and other security partners in a timely, accurate, and useful way to protect against terrorist threats. GAO has since monitored federal efforts to implement the Information Sharing Environment (Environment)—an approach that facilitates the sharing of terrorism and homeland security information, which may include any method determined necessary and appropriate. The Environment is to serve as an overarching solution to strengthening the sharing of intelligence, terrorism, law enforcement, and other information among these partners.

GAO found that the government had begun to implement some initiatives that improved sharing but did not yet have a comprehensive approach that was guided by an overall plan and measures to help gauge progress and achieve desired results. In addition, recent homeland security incidents and the changing nature of domestic threats, among other things, make continued progress in improving sharing critical.

**DHS Status:** In the ten years since 9/11, the Federal Government has strengthened the connection between collection and analysis on transnational organizations and threats. Terrorism-related information sharing across the intelligence community has greatly improved, and through the establishment of the DHS Office of Intelligence & Analysis (I&A), we have strengthened the ability to convey intelligence on threats to the homeland in a context that is useful and relevant to law enforcement and homeland security officials at the state and local level.

DHS, working closely with the FBI and other federal partners, has re-focused its information sharing and production efforts to better address the needs of state and local governments and private sector partners. DHS consults with law enforcement officials from major metropolitan areas, the directors of fusion centers, and State Homeland Security Advisors to tailor the Department's products and briefings to better support state and local law enforcement and homeland security officials.

Consistent with the direction the President has set for a robust information sharing environment, DHS provides, in coordination with the FBI and other federal partners, regular training programs for local law enforcement and homeland security officials to help them identify indicators of terrorist activity. In addition, DHS continues to improve and expand the information-sharing mechanisms by which front line personnel are made aware of the threat picture, vulnerabilities, and what it means for their local communities.

## **GAO High-Risk Area:** Protecting the Federal Government's Information Systems and the Nation's Critical Infrastructure

**GAO Overview:** Federal agencies and our nation's critical infrastructures—such as distribution, water supply, telecommunications, and emergency services—rely extensively on computerized information systems and electronic data to carry out their operations. The security of these systems and data is essential to protecting national and economic security, and public health and safety. Safeguarding federal computer systems and the systems that support critical infrastructures—referred to as cyber critical infrastructure protection or cyber CIP—is a continuing concern. Federal information security has been on GAO's list of high-risk areas since 1997; in 2003, GAO expanded this high-risk area to include cyber CIP. Risks to information systems include continuing insider threats from disaffected or careless employees and business partners, escalating and emerging threats from around the globe, the ease of obtaining and using hacking tools, the steady advance in the sophistication of attack technology, and the emergence of new and more destructive attacks.

**DHS Status:** DHS has made significant progress in improving its ability to protect against cyber threats by advancing the National Cyber Security Division's (NCS) cyber analysis and warning capabilities, acquiring enhanced analytical and technical capabilities, developing strategies for hiring and retaining highly qualified cyber analysts, and strengthening the effectiveness of its public-private sector partnerships in securing cyber critical infrastructure. For example, DHS developed the National Cyber Incident Response Plan to coordinate incident management, enhance data flow, and support analytical collaboration between federal, state, and local government entities as well as private sector partners. Additionally, the National Cybersecurity and Communications Integration Center has brought together the operational components of the Office of Cybersecurity and Communications to improve information sharing and develop a common operational picture of the cybersecurity landscape across networks.

DHS is working with the Office of Management and Budget to strengthen cybersecurity across Federal Executive Branch civilian agencies, including in the areas of continuous monitoring and automated asset, configuration and vulnerability management, two-factor authentication, and Trusted Internet Connections (TIC) Initiative compliance. DHS continues to build relationships and mechanisms to improve information sharing by sponsoring SECRET and TS/SCI clearances for critical infrastructure representatives and developing collaborative frameworks through which classified and unclassified threat, vulnerability, and mitigation information is shared. DHS's United States Computer Emergency Readiness Team now provides Department and Agency Cybersecurity Reports, which provide individual agencies a better understanding of their EINSTEIN 2 data. Finally, NCS has significantly grown its federal cyber workforce over the last three years in order to ensure it maintains technical expertise commensurate with its critical mission.

Senior NPPD and GAO officials meet quarterly to keep abreast of ongoing cyber activities, discuss DHS's strategic direction in cybersecurity, and review the status of open recommendations. This year, NCS has provided GAO with a significant amount of documentation to close over 15 open recommendations, most of which provide the basis for GAO's high-risk report findings related to cybersecurity. These include recommendations related to cyber analysis and warning, public-private partnerships, and the TIC and EINSTEIN initiatives.

### GAO High-Risk Area: National Flood Insurance Program

**GAO Overview:** The National Flood Insurance Program (NFIP) is a key component of the federal government's efforts to limit the damage and financial impact of floods; however, it likely will not generate sufficient revenues to repay the billions of dollars borrowed from the Treasury Department to cover claims from the 2005 hurricanes or future catastrophic losses. The lack of sufficient revenues highlights structural weaknesses in how the program is funded. Also, weaknesses in NFIP management and operations, including financial reporting processes and internal controls, and oversight of contractors place the program at risk. The Federal Emergency Management Agency (FEMA), within the Department of Homeland Security, is responsible for managing NFIP. While FEMA has taken some steps to address these issues, including increasing the number of policyholders and implementing new contractor oversight processes, it continues to face complex challenges, and Congress needs to act to restructure the program.

**DHS Status:** FEMA is improving financial reporting processes and strengthening internal controls over the Write Your Own (WYO) companies by working with the Office of the Inspector General to conduct an annual audit of NFIP financial statements beginning in FY 2012. FEMA is working with the National Association of Insurance Commissioners to improve insurance expense data to determine the WYO Expense Allowance. FEMA is also enhancing the NFIP rate setting process by using Geographic Information System data to assess the impact of grandfathering and reviewing existing depth damage data to ensure consistency in reporting. FEMA has established a Project Management Office to ensure effective oversight of contractors performing key NFIP data collection, reporting, and insurance functions.

### GAO High-Risk Area: Strategic Human Capital Management (Government-wide high-risk area)

**GAO Overview:** GAO initially designated strategic human capital management as a high-risk area because of the long-standing lack of leadership of strategic human capital management. While significant steps have been taken, the area remains high risk because of a need to address current and emerging critical skills gaps that are undermining agencies' abilities to meet their vital missions. The Federal Government's current budget and long-term fiscal pressures underscore the importance of a strategic and efficient approach to recruitment, hiring, development, and retention of individuals with the needed critical skills.

**DHS Status:** DHS's Office of the Chief Human Capital Officer recently implemented a comprehensive Workforce Strategy for Fiscal Years 2011 – 2016 in support of the Department's missions and responsibilities. For more information on this strategy and our FY 2011 accomplishments, please see the [DHS Workforce Strategy](#) section previously in this report.

**GAO High-Risk Area: Federal Real Property Management (Government-wide high-risk area)**

**GAO Overview:** The federal real property portfolio is vast and diverse. It totals over 900,000 buildings and structures with a combined area of over 3 billion square feet. Progress has been made on many fronts, including significant progress with real property data reliability and managing the condition of facilities. However, federal agencies continue to face long-standing problems, such as overreliance on leasing, excess and underutilized property, and protecting federal facilities. As a result, this area remains on GAO’s High-Risk List, with the exceptions of government wide real property data reliability and management of condition of facilities, which GAO found to be sufficiently improved to be no longer considered high risk. Additionally, challenges persist with the Department of Defense’s management of its real property.

**DHS Status:** DHS continues to work through the Federal Real Property Council to improve property management and reduce overreliance on leasing, excess and underutilized property, and protecting federal facilities. The Department and our Components are committed to reducing real property spending in accordance with the Presidential memo on Real Property Planning and Cost Savings. The master plan, approved in January 2009 for DHS’s Consolidated Headquarters to reduce its 55 leased and federally-owned locations throughout the National Capital Region to 7 – 10 locations, will significantly reduce DHS’s reliance on leasing when implemented. Additionally, the U.S. Coast Guard Headquarters building and support facilities at St. Elizabeths are on schedule for occupancy in 2013.

## Low-Priority Program Activities

The 2013 Cuts, Consolidations, and Savings (CCS) Volume of the President's Budget identifies the lower-priority program activities under the *GPR Modernization Act*, 31 U.S.C. 1115(b)(10). The public can access the volume at: <http://www.whitehouse.gov/omb/budget>.

## Component Acronyms

Below is the list of DHS Components and their Acronyms.

---

AO – Analysis and Operations  
CBP – U.S. Customs and Border Protection  
DMO – Departmental Management and Operations  
DNDO – Domestic Nuclear Detection Office  
FEMA – Federal Emergency Management Agency  
FLETC – Federal Law Enforcement Training Center  
ICE – U.S. Immigration and Customs Enforcement  
IG – Office of the Inspector General  
NPPD – National Protection and Programs Directorate  
OHA – Office of Health Affairs  
S&T – Science and Technology Directorate  
TSA – Transportation Security Administration  
USCG – U.S. Coast Guard  
USCIS – U.S. Citizenship and Immigration Services  
USSS – U.S. Secret Service

### FY 2013 Budget Overview

	FY 2011 Enacted <sup>1</sup>	FY 2012 Enacted <sup>2</sup>	FY 2013 Pres. Budget	FY 2013 +/- FY 2012
	\$000	\$000	\$000	\$000
Net Discretionary:	\$ 42,206,179	\$ 46,248,145	\$ 44,942,110	\$ (1,306,035)
Discretionary Fees:	3,442,780	3,547,405	3,756,720	209,315
<i>Less rescission of prior year funds:</i> <sup>3</sup>	(524,185)	(200,736)	-	200,736
<b>Gross Discretionary</b>	<b>45,124,774</b>	<b>49,594,814</b>	<b>48,698,830</b>	<b>(895,984)</b>
Mandatory, Fee, Trust Funds:	9,682,503	10,118,541	10,333,516	214,975
<b>Total Budget Authority:</b>	<b>\$ 54,807,277</b>	<b>\$ 59,713,355</b>	<b>\$ 59,032,346</b>	<b>\$ (681,009)</b>
Supplemental: <sup>4</sup>	\$ -	\$ -	\$ -	\$ -
<i>Less rescission of prior year supplemental funds:</i>	\$ -	\$ -	\$ -	\$ -

1/ FY 2011 Enacted:

- Reflects 0.2% across the board rescission pursuant to P.L. 112-10.
- Includes a transfer of \$15.968 million from FEMA to OIG pursuant to P.L. 112-10.
- Reflects technical adjustments of -\$52.761 million to revise CBP fee levels.
- Reflects a technical adjustment of \$21.560 million to revise TSA - Aviation Security fee levels.
- Reflects a scorekeeping adjustment for a rescission of prior year unobligated balances from USCG - AC&I of -\$10.122 million.
- Excludes the following from USCG funding levels: Overseas Contingency Operations of \$254.0 million; National Science Foundation transfer of \$54.0 million.
- Reflects a technical adjustment of \$327.647 million to USCIS fee authority for the Immigration Exams Fee.

2/ FY 2012 Enacted:

- Includes a transfer of \$24.0 million from FEMA to the OIG pursuant to P.L. 112-74.
- Reflects technical adjustments of \$80.532 million for CBP fee levels.
- Reflects a technical adjustment of \$24.486 million for TSA - Aviation Security revised fee levels.
- Reflects a scorekeeping adjustment for a rescission of prior year unobligated balances from USCG - AC&I of -\$3.456 millions.
- Excludes USCG Overseas Contingency Operations of \$258.0 million P.L. 112-74.
- Includes \$63.5 million transfer to USCG - AC&I from DoD pursuant to P.L. 112-74.
- Reflects FEMA Disaster Relief base funds of \$700 million and an additional \$6.4 billion enacted separately pursuant to the Budget Control Act.
- Reflects a technical adjustment of \$24.062 million to revise the FPS offsetting fee levels.
- Reflects technical adjustments of \$438.653 million to revise USCIS fee levels.

3/ Rescissions of Prior Year Unobligated Balances:

- Pursuant to P.L. 112-10, reflects FY 2011 rescissions of prior year unobligated balances: -\$524.185 million.
- Pursuant to P.L. 112-74, reflects FY 2012 rescissions of prior year unobligated balances: -\$200.736 million.

4/ No Supplemental was received in FY 2011 & FY 2012.

**U.S. Department of Homeland Security**  
**Title V – Fiscal Year 2013 Explanation of Changes – General Provisions**

**Proposal to Delete *Old* Section 512**

**[Sec. 512. None of the funds made available in this Act may be used by any person other than the Privacy Officer appointed under subsection (a) of section 222 of the Homeland Security Act of 2002 (6 U.S.C. 142(a)) to alter, direct that changes be made to, delay, or prohibit the transmission to Congress of any report prepared under paragraph (6) of such subsection.]**

Explanation: The Department proposes deletion of this provision as it is restrictive in nature and infringes upon the Department's ability to manage administrative functions and to carry out its requirements for providing homeland security.

**Proposal to Delete *Old* Section 516**

**[Sec. 516. Except as provided in section 44945 of title 49, United States Code, funds appropriated or transferred to Transportation Security Administration ``Aviation Security'', ``Administration'', and ``Transportation Security Support'' for fiscal years 2004 and 2005 that are recovered or deobligated shall be available only for the procurement or installation of explosives detection systems, air cargo, baggage, and checkpoint screening systems, subject to notification: Provided, That quarterly reports shall be submitted to the Committees on Appropriations of the Senate and the House of Representatives on any funds that are recovered or deobligated.]**

Explanation: The Department proposes deletion of this provision as referenced funds are no longer recovered or deobligated.

**Proposal to Delete *Old* Section 521**

**[Sec. 521. None of the funds provided by this or previous appropriations Acts shall be used to fund any position designated as a Principal Federal Official (or the successor thereto) for any Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.) declared disasters or emergencies unless -- (1) The responsibilities of the Principal Federal Official do not include operational functions related to incident management, including coordination of operations, and are consistent with the requirements of subsection 509(c) and subsections 503(c)(3) and (c)(4)(A) of the Homeland Security Act of 2002 (6 U.S.C. 319(c) and 313(c)(3) and (c)(4)(A)) and section 302 of the Robert T. Stafford Disaster Relief and Assistance Act (42 U.S.C. 5143); (2) Not later than 10 business days after the latter of the date on which the Secretary of Homeland Security appoints the Principal Federal Official and the date on which the President issues a declaration under section 401 or section 501 of the Robert T. Stafford Disaster Relief and Emergency**

**Assistance Act (42 U.S.C. 5170 and 5191, respectively), the Secretary of Homeland Security shall submit a notification of the appointment of the Principal Federal Official and a description of the responsibilities of such Official and how such responsibilities are consistent with paragraph (1) to the Committees on Appropriations of the Senate and the House of Representatives, the Transportation and Infrastructure Committee of the House of Representatives, and the Homeland Security and Governmental Affairs Committee of the Senate; and (3) Not later than 60 days after the date of enactment of this Act, the Secretary shall provide a report specifying timeframes and milestones regarding the update of operations, planning and policy documents, and training and exercise protocols, to ensure consistency with paragraph (1) of this section.]**

Explanation: The Department proposes deletion of this restrictive provision in part because the Secretary is the Principal Federal Official and does not intend to appoint other individuals to this position.

#### **Proposal to Delete *Old* Section 522**

**[Sec. 522. None of the funds made available in this or any other Act for fiscal years 2012 and thereafter may be used to enforce section 4025(1) of Public Law 108-458 unless the Administrator of the Transportation Security Administration reverses the determination of July 19, 2007, that butane lighters are not a significant threat to civil aviation security.]**

Explanation: The Department proposes deletion of this provision as it is unnecessary and restricts the Department's flexibility to carry out requirements and implement policies for protecting the Homeland.

#### **Proposal to Delete *Old* Section 523**

**[Sec. 523. None of the funds provided or otherwise made available in this Act shall be available to carry out section 872 of the Homeland Security Act of 2002 (6 U.S.C. 452).]**

Explanation: The Department requests deletion of this restrictive provision to enable the Department to have the flexibility to carry out its operational and mission requirements.

#### **Proposal to Delete *Old* Section 524**

**[Sec. 524. Funds made available in this Act may be used to alter operations within the Civil Engineering Program of the Coast Guard nationwide, including civil engineering units, facilities design and construction centers, maintenance and logistics commands, and the Coast Guard Academy, except that none of the funds provided in this Act may be used to reduce operations within any Civil Engineering Unit unless specifically authorized by a statute enacted after the date of enactment of this Act.]**

Explanation: The Department requests deletion of this provision as it restricts the Department's ability to use and manage appropriated resources as may be required for protecting the Homeland.

#### **Proposal to Delete *Old* Section 529**

**[Sec. 529. Notwithstanding any other provision of law, none of the funds provided in this or any other Act shall be used to approve a waiver of the navigation and vessel-inspection laws pursuant to 46 U.S.C. 501(b) for the transportation of crude oil distributed from the Strategic Petroleum Reserve until the Secretary of Homeland Security, after consultation with the Secretaries of the Departments of Energy and Transportation and representatives from the United States flag maritime industry, takes adequate measures to ensure the use of United States flag vessels: Provided, That the Secretary shall notify the Committees on Appropriations of the Senate and the House of Representatives, the Committee on Commerce, Science, and Transportation of the Senate, and the Committee on Transportation and Infrastructure of the House of Representatives within 48 hours of any request for waivers of navigation and vessel-inspection laws pursuant to 46 U.S.C. 501(b).]**

Explanation: The Department requests deletion of this provision as unnecessary, unduly restrictive and onerous.

#### **Proposal to Delete *Old* Section 531**

**[Sec. 531. None of the funds in this Act shall be used to reduce the United States Coast Guard's Operations Systems Center mission or its government-employed or contract staff levels.]**

Explanation: The Department proposes deletion of this provision as it restricts the Department's ability to use and manage appropriated resources.

#### **Proposal to Delete *Old* Section 533**

**[Sec. 533. None of the funds appropriated by this Act may be used to conduct, or to implement the results of, a competition under Office of Management and Budget Circular A-76 for activities performed with respect to the Coast Guard National Vessel Documentation Center.]**

Explanation: The Department requests deletion of this provision as it restricts the Department's ability to use and manage appropriated resources.

#### **Proposal to Delete *Old* Section 536**

**[Sec. 536. If the Administrator of the Transportation Security Administration determines that an airport does not need to participate in the E-Verify Program as described in section 403(a) of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (8 U.S.C. 1324a note), the Administrator shall certify to the Committees on Appropriations of the Senate and the House of Representatives that no security risks will result from such non-participation.]**

Explanation: The Department requests deletion of this provision as it is unnecessary and burdensome.

#### **Proposal to Delete *Old* Section 537**

**[Sec. 537. (a) Notwithstanding any other provision of this Act, except as provided in subsection (b), and 30 days after the date on which the President determines whether to declare a major disaster because of an event and any appeal is completed, the Administrator shall publish on the Web site of the Federal Emergency Management Agency a report regarding that decision that shall summarize damage assessment information used to determine whether to declare a major disaster. (b) The Administrator may redact from a report under subsection (a) any data that the Administrator determines would compromise national security. (c) In this section -- (1) the term ``Administrator'' means the Administrator of the Federal Emergency Management Agency; and (2) the term ``major disaster'' has the meaning given that term in section 102 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5122).]**

Explanation: The Department proposes deletion of this provision because posting of the referenced information is now standard operating procedure therefore the provision is redundant.

#### **Proposal to Delete *Old* Section 538**

**[Sec. 538. (a) Notwithstanding any other provision of law during fiscal year 2012 or any subsequent fiscal year, if the Secretary of Homeland Security determines that the National Bio- and Agro-defense Facility should be located at a site other than Plum Island, New York, the Secretary shall ensure that the Administrator of General Services sells through public sale all real and related personal property and transportation assets which support Plum Island operations, subject to such terms and conditions as may be necessary to protect Government interests and meet program requirements. (b) The proceeds of such sale described in subsection (a) shall be deposited as offsetting collections into the Department of Homeland Security Science and Technology ``Research, Development, Acquisition, and Operations'' account and, subject to appropriation, shall be available until expended, for site acquisition, construction, and costs related to the construction of the National Bio- and Agro-defense Facility, including the costs associated with the sale, including due diligence requirements, necessary environmental remediation at Plum Island, and reimbursement of expenses incurred by the General Services Administration.]**

Explanation: The Department requests deletion of this provision because it is a onetime directive.

#### **Proposal to Delete *Old* Section 539**

**[Sec. 539. Any official that is required by this Act to report or to certify to the Committees on Appropriations of the Senate and the House of Representatives may not delegate such authority to perform that act unless specifically authorized herein.]**

Explanation: The Department proposes deletion of this provision as unnecessary, unduly restrictive and onerous, and contributes to delays in the Department's reporting to Congress.

#### **Proposal to Delete *Old* Section 541**

**[Sec. 541. None of the funds appropriated or otherwise made available in this or any other Act may be used to transfer, release, or assist in the transfer or release to or within the United States, its territories, or possessions Khalid Sheikh Mohammed or any other detainee who -- (1) is not a United States citizen or a member of the Armed Forces of the United States; and (2) is or was held on or after June 24, 2009, at the United States Naval Station, Guantanamo Bay, Cuba, by the Department of Defense.]**

Explanation: The Administration requests deletion of this provision which infringes upon the President's prerogative and executive authority on national security matters.

#### **Proposal to Delete *Old* Section 544**

**[Sec. 544. None of the funds made available in this Act may be used to employ workers described in section 274A(h)(3) of the Immigration and Nationality Act (8 U.S.C. 1324a(h)(3)).]**

Explanation: The Department proposes deletion of this provision as it is restrictive in nature.

#### **Proposal to Delete *Old* Section 546**

**[Sec. 546. For fiscal year 2012 and thereafter, for purposes of section 210C of the Homeland Security Act of 2002 (6 U.S.C. 124j), a rural area shall also include any area that is located in a metropolitan statistical area and a county, borough, parish, or area under the jurisdiction of an Indian tribe with a population of not more than 50,000.]**

Explanation: The Department requests deletion of this provision because it is a onetime, permanent directive.

### **Proposal to Delete *Old* Section 548**

**[Sec. 548. (a) Not later than 180 days after the date of enactment of this Act, the Administrator of the Transportation Security Administration shall submit to the Committees on Appropriations of the Senate and the House of Representatives, a report that either -- (1) certifies that the requirement for screening all air cargo on passenger aircraft by the deadline under section 44901(g) of title 49, United States Code, has been met; or (2) includes a strategy to comply with the requirements under title 44901(g) of title 49, United States Code, including -- (A) a plan to meet the requirement under section 44901(g) of title 49, United States Code, to screen 100 percent of air cargo transported on passenger aircraft arriving in the United States in foreign air transportation (as that term is defined in section 40102 of that title); and (B) specification of -- (i) the percentage of such air cargo that is being screened; and (ii) the schedule for achieving screening of 100 percent of such air cargo. (b) The Administrator shall continue to submit reports described in subsection (a)(2) every 180 days thereafter until the Administrator certifies that the Transportation Security Administration has achieved screening of 100 percent of such air cargo.]**

Explanation: The Department requests deletion of this provision because its requirements are permanent until fully complied with.

### **Proposal to Delete *Old* Section 549**

**[Sec. 549. In developing any process to screen aviation passengers and crews for transportation or national security purposes, the Secretary of Homeland Security shall ensure that all such processes take into consideration such passengers' and crews' privacy and civil liberties consistent with applicable laws, regulations, and guidance.]**

Explanation: The Department proposes deletion of this provision because it is a onetime directive which has been complied with on a permanent basis.

### **Proposal to Delete *Old* Section 550**

**[Sec. 550. (a) None of the funds made available in this Act may be obligated for construction of the National Bio- and Agro-defense Facility until the Department of Homeland Security -- (1) completes 50 percent of design planning for the National Bio- and Agro-defense Facility; (2) submits to the Committees on Appropriations of the Senate and the House of Representatives a revised site-specific biosafety and biosecurity mitigation risk assessment that describes how to significantly reduce risks of conducting essential research and diagnostic testing at the National Bio- and Agro-defense Facility and addresses shortcomings identified in the National Academy of Sciences' evaluation of the initial site-specific biosafety and biosecurity mitigation risk assessment; and (3) submits to the Committees on Appropriations of the Senate and the House of Representatives the**

results of the National Academy of Sciences' review of the risk assessment as described in subsection (c). (b) The revised site-specific biosafety and biosecurity mitigation risk assessment required by subsection (a) shall -- (1) include a quantitative risk assessment for foot-and-mouth disease virus, in particular epidemiological and economic impact modeling to determine the overall risk of operating the facility for its expected 50-year life span, taking into account strategies to mitigate risk of foot-and-mouth disease virus release from the laboratory and ensure safe operations at the approved National Bio- and Agro-defense Facility site; (2) address the impact of surveillance, response, and mitigation plans (developed in consultation with local, State, and Federal authorities and appropriate stakeholders) if a release occurs, to detect and control the spread of disease; and (3) include overall risks of the most dangerous pathogens the Department of Homeland Security expects to hold in the National Bio- and Agro-defense Facility's biosafety level 4 facility, and effectiveness of mitigation strategies to reduce those risks. (c) The Department of Homeland Security shall enter into a contract with the National Academy of Sciences to evaluate the adequacy and validity of the risk assessment required by subsection (a). The National Academy of Sciences shall submit a report on such evaluation within four months after the date the Department of Homeland Security concludes its risk assessment.]

Explanation: The Department proposes deletion of this provision as it is restrictive in nature and infringes upon the Department's ability to manage resources and to carry out its mission and operational requirements.

#### **Proposal to Delete *Old* Section 551**

[Sec. 551. (a) Notwithstanding section 1356(n) of title 8, United States Code, of the funds deposited into the Immigration Examinations Fee Account, \$10,000,000 shall be available to United States Citizenship and Immigration Services in fiscal year 2012 for the purpose of providing an immigrant integration grants program. (b) None of the funds made available to United States Citizenship and Immigration Services for grants for immigrant integration may be used to provide services to aliens who have not been lawfully admitted for permanent residence.]

Explanation: The Department requests deletion of this provision because it is a onetime directive.

#### **Proposal to Delete *Old* Section 552**

[Sec. 552. For an additional amount for necessary expenses for reimbursement of the actual costs to State and local governments for providing emergency management, public safety, and security at events, as determined by the Administrator of the Federal Emergency Management Agency, related to the presence of a National Special Security Event, \$7,500,000, to remain available until September 30, 2013.]

Explanation: The Department requests deletion of this provision because it is a onetime directive.

#### **Proposal to Delete *Old* Section 556**

**[Sec. 556. (a) For an additional amount for data center migration, \$70,000,000. (b) Funds made available in subsection (a) for data center migration may be transferred by the Secretary of Homeland Security between appropriations for the same purpose, notwithstanding section 503 of this Act. (c) No transfer described in subsection (b) shall occur until 15 days after the Committees on Appropriations of the Senate and the House of Representatives are notified of such transfer.]**

Explanation: The Department proposes deletion of this provision because it is a onetime directive.

#### **Proposal to Delete *Old* Section 558**

**[Sec. 558. Section 559(e) of Public Law 111-83 is amended -- (a) in the matter preceding the first proviso, by striking "law, sell" and inserting "law, hereafter sell"; and (b) in the first proviso -- (1) by striking "shall be deposited" and inserting "shall hereafter be deposited"; and (2) by striking "subject to appropriation," and inserting "without further appropriations,".]**

Explanation: The Department requests deletion of this provision because it is a permanent change to the U.S. Code.

#### **Proposal to Delete *Old* Section 560**

**[Sec. 560. For an additional amount for the "Office of the Under Secretary for Management", \$55,979,000, to remain available until expended, for necessary expenses to plan, acquire, construct, renovate, remediate, equip, furnish, and occupy buildings and facilities for the consolidation of department headquarters at St. Elizabeths and associated mission support consolidation: Provided, That the Committees on Appropriations of the Senate and the House of Representatives shall receive an expenditure plan not later than 90 days after the date of enactment of this Act detailing the allocation of these funds.]**

Explanation: The Department proposes deletion of this provision because it is a onetime directive.

#### **Proposal to Delete *Old* Section 561**

**[Sec. 561. None of the funds made available by this Act may be used to enforce the requirements in -- (1) section 34(a)(1)(A) of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2229(a)(1)(A)); (2) section 34(a)(1)(B) of such Act; (3) section 34(c)(1) of such Act; (4) section 34(c)(2) of such Act; (5) section 34(c)(4)(A) of such Act; and (6) section 34(a)(1)(E) of such Act.]**

Explanation: The Department requests deletion of this provision because it is a onetime directive.

#### **Proposal to Delete *Old* Section 562**

**[Sec. 562. Notwithstanding the requirement under section 34(a)(1)(A) of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2229a(a)(1)(A)) that grants must be used to increase the number of firefighters in fire departments, the Secretary of Homeland Security, in making grants under section 34 of such Act using the funds appropriated for fiscal year 2011, shall grant waivers from the requirements of subsections (a)(1)(B), (c)(1), (c)(2), and (c)(4)(A) of such section: Provided, That section 34(a)(1)(E) of such Act shall not apply with respect to funds appropriated for fiscal year 2011 for grants under section 34 of such Act: Provided further, That the Secretary of Homeland Security, in making grants under section 34 of such Act, shall ensure that funds appropriated for fiscal year 2011 are made available for the hiring, rehiring, or retention of firefighters.]**

Explanation: The Department proposes deletion of this provision because it is a onetime directive.

#### **Proposal to Delete *Old* Section 563**

**[Sec. 563. For fiscal year 2012 and thereafter, notwithstanding section 1012(a)(5) of the Oil Pollution Act of 1990 (33 U.S.C. 2712(a)(5)) and 31 U.S.C. 3302, in the event that a spill of national significance occurs, any payment of amounts from the Oil Spill Liability Trust Fund pursuant to section 1012(a)(1) of the Oil Pollution Act of 1990 (33 U.S.C. 2712(a)(1)) for the removal costs incurred by the Coast Guard for such spill, shall be credited directly to the accounts of the Coast Guard current at the time such removal costs were incurred or when reimbursement is received: Provided, That such amounts shall be merged with and, without further appropriations, made available for the same time period and the same purpose as the appropriation to which it is credited.]**

Explanation: The Department requests deletion of this provision because it is a permanent change to the U.S. Code.

#### **Proposal to Delete *Old* Section 564**

**[Sec. 564. (a) Civil Penalties for Circumventing Security Screening.--Section 46301(a)(5)(A)(i) of title 49, United States Code, is amended -- (1) by striking "or chapter 449" and inserting "chapter 449"; and (2) by inserting ", or section 46314(a)" after "44909)". (b) Criminal Penalties for Circumventing Security Screening. -- Section 46314(b)(2) of title 49, United States Code, is amended by inserting "with intent to evade security procedures or restrictions or" after "of this section". (c) Notice of Penalties. -- Section 46314 of title 49, United States Code, is amended by adding at the end the following new subsection: "(c)Notice of Penalties. -- (1)In general. -- Each operator of an airport in the United States that is required to establish an air transportation security program pursuant to section 44903(c) shall ensure that signs that meet such requirements as the Secretary of Homeland Security may prescribe providing notice of the penalties imposed under section 46301(a)(5)(A)(i) and subsection (b) of this section are displayed near all screening locations, all locations where passengers exit the sterile area, and such other locations at the airport as the Secretary of Homeland Security determines appropriate. (2) Effect of signs on penalties. -- An individual shall be subject to a penalty imposed under section 46301(a)(5)(A)(i) or subsection (b) of this section without regard to whether signs are displayed at an airport as required by paragraph (1)."]**

Explanation: The Department requests deletion of this provision because it is a permanent change to the U.S. Code.

### **Proposal to Delete *Old* Section 565**

**[Sec. 565. (a) Short Title.--This section may be cited as the "Disaster Assistance Recoupment Fairness Act of 2011". (b) Debts Since 2005. -- (1) Definition. -- In this section, the term "covered assistance" means assistance provided -- (A) under section 408 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5174); and (B) in relation to a major disaster declared by the President under section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5170) during the period beginning on August 28, 2005, and ending on December 31, 2010. (2) Waiver authority. -- The Administrator of the Federal Emergency Management Agency -- (A) subject to subparagraph (B) and paragraph (3), may waive a debt owed to the United States related to covered assistance provided to an individual or household if -- (i) the covered assistance was distributed based on an error by the Federal Emergency Management Agency; (ii) there was no fault on behalf of the debtor; and (iii) the collection of the debt would be against equity and good conscience; and (B) may not waive a debt under subparagraph (A) if the debt involves fraud, the presentation of a false claim, or misrepresentation by the debtor or any party having an interest in the claim. (3) Presumption of repayment. -- In determining whether to waive a debt under paragraph (2), the Administrator of the Federal Emergency Management Agency shall presume that, if the adjusted gross income (as defined under section 62 of the Internal Revenue Code of 1986) of the household of the debtor for the last taxable year ending in or with the calendar year preceding the date on which the income is determined exceeds \$90,000, the debtor should be required to make at least a partial payment on the debt. (4) Reporting. -- Not later than 3 months after the date of enactment of this Act, and every 3 months thereafter until the date that is 18 months**

**after the date of enactment of this Act, the Inspector General of the Department of Homeland Security shall submit a report that assesses the cost-effectiveness of the efforts of the Federal Emergency Management Agency to recoup improper payments under the Individuals and Household Program under section 408 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5174) to -- (A) the Committee on Homeland Security and Governmental Affairs and the Subcommittee on Homeland Security of the Committee on Appropriations of the Senate; and (B) the Committee on Homeland Security, the Committee on Transportation and Infrastructure, and the Subcommittee on Homeland Security of the Committee on Appropriations of the House of Representatives.]**

Explanation: The Department proposes deletion of this provision because it is a onetime directive.

#### **Proposal to Delete *Old* Section 566**

**[Sec. 566. (a) Notwithstanding section 312 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act and subject to subsection (b), recipients of Small Business Administration Disaster loans for disaster-related damage to their homes may be eligible for reimbursement at the discretion of the state, under Section 404 of that Act, for documented and eligible mitigation work performed on their home. (b) Limitations. -- (1) Any reimbursement provided to or on behalf of a homeowner pursuant to subsection (a) shall not exceed the amount of the disaster loan that may be used and was used for disaster mitigation activities; and (2) Subsection (a) shall only apply if the disaster loan and assistance provided under section 404 were made available in response to the same disaster declaration. (3) Shall be applicable only to disasters declared by the President under section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5170) during the period beginning on August 28, 2005 and ending on August 28, 2006. (c) If a state chooses to use funds under section 404 to reimburse homeowners as provided in subsection (a), it shall make payments in the following order: (1) First, to the Small Business Administration on behalf of the eligible homeowner for the purpose of reducing, but not below zero, the homeowner's outstanding debt obligation to the Small Business Administration for the disaster loan; and (2) Second, any remaining reimbursement shall be paid directly to the homeowner.]**

Explanation: The Department requests deletion of this provision because it is a onetime directive.

#### **Proposal to Delete *Old* Section 567**

**[Sec. 567. None of the funds made available under this Act or any prior appropriations Act may be provided to the Association of Community Organizations for Reform Now (ACORN), or any of its affiliates, subsidiaries, or allied organizations.]**

Explanation: The Department proposes deletion of this provision because it is a onetime directive.

### **Proposal to Insert New Section 539**

*Sec. 539. Section 401(b) of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996, as amended (8 U.S.C. 1324a note), is amended by striking "September 30, 2012" and inserting "September 30, 2013".*

Explanation: The Department requests insertion of this provision as a routine extension of authority.

### **Proposal to Insert New Section 540**

*Sec. 540. Predisaster Hazard Mitigation - Section 203 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5133) is amended by -- (1) Re-designating subparagraph (m) as (o); (2) Re-designating subparagraph (n) as (p); and (3) inserting the following new subparagraphs after subparagraph (l): "(m) Notwithstanding any other applicable limitations in prior or future fiscal year appropriations, the Administrator may make grant awards at his discretion under this section with funding otherwise defined as congressionally directed spending under this section in any prior fiscal year, if either: (A) the intended applicant for such earmarked funding informs FEMA in writing that no application will be submitted to use the funding; or (B) no application for such earmarked funding is submitted to FEMA within two years of the date of the respective appropriation for such funds (n) Notwithstanding any other applicable limitations in prior or future fiscal year appropriations, the National Pre-disaster Mitigation Fund shall be made available to FEMA for necessary and reasonable costs to administer and/or close out Pre-Disaster Mitigation grants."*

Explanation: The Department requests insertion of this provision to provide greater flexibility in carrying out its requirements and in the use of appropriated resources to help ensure national resiliency.

### **Proposal to Insert New Section 541**

*Sec. 541. DAM SAFETY ACT. The National Dam Safety Program Act, as amended (33 U.S.C. 467 note) is amended - (1) In section 8(e) (33 U.S.C. 467f) by inserting after paragraph (6) the following new paragraphs: "(7) PERFORMANCE-BASED EVALUATION-FEMA shall establish performance measures for its assessment of State programs participating in the National Dam Safety Program. FEMA shall assess State performance under this section using these measures. FEMA shall establish targets for the States for the performance measures within 120 days of the enactment of this Act and may update them, as needed, each fiscal year."(8) ALLOCATION- IN GENERAL.-Subject to subparagraphs (C) and (D), for each fiscal year, amounts made available under this subsection to carry out section 8 shall be allocated*

*among the states as follows: (A) "One-third of the funds shall be awarded among states that qualify as eligible for assistance under this section. (B) "Two-thirds of the funds shall be awarded among states that not only qualify as eligible for assistance under this section, but also meet or exceed their target established for the performance measures referred to in section 8(e)(7). (C) "MAXIMUM AMOUNT OF ALLOCATION.-The amount of funds allocated to a State under this paragraph may not exceed the funds committed by the State to implement dam safety activities. (D) "DETERMINATION.-The Administrator shall determine the amount allocated to States." (2) By redesignating sections 11 through 13, as sections 12 through 14, respectively, and by inserting after section 10, the following new section: **Sec.11. PUBLIC AWARENESS AND OUTREACH FOR DAM SAFETY.** The Administrator, in consultation with other Federal agencies, State, and local governments, dam owners, the emergency management community, the private sector, non-governmental organizations and associations, and universities and academia, and others as appropriate, shall carry out a nationwide public awareness and outreach program to provide risk information to the public related to the hazards of dam failures and related matters." (3) In section 14, as redesignated by this Act, (33 U.S.C. 467j) by - (A) striking subsection (a) and inserting (a) "APPROPRIATIONS - "There is authorized to be appropriated to FEMA to carry out the National Dam Safety Program Act (in addition to any amounts made available for similar purposes included in any other Act) \$14.8 million for fiscal year 2013, \$15.2 million for fiscal year 2014, \$15.7 million for fiscal year 2015, \$16.2 million for fiscal year 2016."; (B) striking subsections (c), (d) and (e); and (C) redesignating subsection (f) as subsection (c).*

Explanation: The Department requests insertion of this provision to provide for a nationwide public awareness and outreach program to provide risk information to Americans living and working downstream of high-hazard and significant-hazard potential dams. The information will assist emergency action planning and mitigate risk to the public from dam incidents and dam failures.

### **Proposal to Insert New Section 542**

*Sec. 542. All fees collected pursuant to the amendment made by section 601 of the United States-Colombia Trade Promotion Agreement Implementation Act of 2011 (P.L. 112-042) shall hereafter be available to reimburse directly each appropriation for the amount paid out of that appropriation for the costs incurred by the Secretary of the Treasury pursuant to section 13031(f)(3) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(f)(3)).*

Explanation: The Department requests insertion of this provision to provide greater flexibility in carrying out its requirements and in the use of appropriated resources to meet frontline mission needs.

### **Proposal to Insert New Section 543**

*Sec. 543. (a) Notwithstanding section 58c(e) of title 19, United States Code, upon the request of any persons, the Commissioner of U.S. Customs and Border Protection (CBP) may enter into reimbursable fee agreements with such persons for the provision of CBP services and any other costs incurred by CBP relating to such services. (b) Funds collected pursuant to this section shall be deposited in the "U.S. Customs and Border Protection -- Salaries and Expenses" account as offsetting collections and remain available until expended, without fiscal year limitation, and shall be used to pay for any expenses incurred by CBP in providing CBP services and any other costs incurred by CBP relating to such services. (c) The amount of the fee to be charged pursuant to an agreement authorized under subsection (a) of this section shall be paid by each person requesting CBP services and shall include, but shall not be limited to, the salary and expenses of individuals employed by CBP to provide such CBP services and other costs incurred by CBP relating to those services, such as temporary placement or permanent relocation of those individuals. (d) Failure to pay fee. Any person who, after notice and demand for payment of any fee charged under subsection (a) of this section, fails to pay such fee in a timely manner shall -- (1) be guilty of a misdemeanor, and if convicted thereof shall pay a fine that does not exceed an amount equal to 200 percent of such fee; and (2) be liable for a penalty or liquidated damage equal to two times the amount of the fee. Any amount collected pursuant to this subsection shall be deposited into the account specified under subsection (b) of this section and shall be available as described therein. (e) Provision of Facilities and Equipment. Each facility at which such CBP services are performed shall provide, maintain, and equip, without cost to the Government, facilities in accordance with CBP specifications. (f) Definitions. For purposes of this section the terms: (1) "U.S. Customs and Border Protection services" means any activities of any employee or contractor of CBP related to customs and immigration matters. (2) "Person" means any natural person or any corporation, partnership, trust, association, or any other public or private entity, including any foreign government or transit authority, or any officer, employee, or agent thereof."*

Explanation: The Department requests insertion of this provision to provide greater flexibility in carrying out its requirements and in the use of appropriated resources to meet frontline mission needs.

### **Proposal to Delete *Old* Section 570**

**[(rescissions)]**

**[Sec. 570. Of the funds transferred to the Department of Homeland Security when it was created in 2003, the following funds are hereby rescinded from the following accounts and programs in the specified amounts: (1) \$2,577,000 from Coast Guard ``Acquisition, Construction, and Improvements''; (2) \$5,355,296 from U.S. Immigration and Customs Enforcement ``Salaries and Expenses''; (3) \$99,012 from U.S. Immigration and Customs Enforcement ``Violent Crime Reduction Programs''; (4) \$3,332,541 from U.S. Customs and Border Protection ``Salaries and Expenses''; (5) \$3,121,248 from Department of Homeland Security ``Office for Domestic Preparedness''; (6) \$678,213 from Federal Emergency Management Agency ``National Predisaster Mitigation Fund''; (7) \$5,201,000 from ``Working Capital Fund''; (8) \$95,998 from ``Counterterrorism Fund''; (9) \$41,091 from**

**U.S. Customs and Border Protection ``Violent Crime Reduction Fund''; and (10) \$153,095 from U.S. Immigration and Customs Enforcement ``Violent Crime Reduction Trust Fund''.]**

Explanation: The Department requests deletion of this provision because it is a onetime rescission.

#### **Proposal to Delete *Old* Section 571**

**[(rescissions)]**

**[Sec. 571. The following unobligated balances made available to the Department of Homeland Security pursuant to section 505 of Department of Homeland Security Appropriations Act, 2011 (Public Law 112-10; 125 Stat. 147) are rescinded: (1) \$178,783 from ``Analysis and Operations''; (2) \$1,619,907 from U.S. Customs and Border Protection ``Salaries and Expenses''; (3) \$296,022 from Transportation Security Administration ``Federal Air Marshals''; (4) \$37,800,412 from Coast Guard ``Operating Expenses''; (5) \$879,153 from Coast Guard ``Acquisition, Construction, and Improvements''; (6) \$1,104,347 from United States Secret Service ``Salaries and Expenses''; (7) \$97,046 from National Protection and Programs Directorate ``Management and Administration''; (8) \$78,764 from National Protection and Programs Directorate ``Infrastructure Protection and Information Security''; (9) \$117,133 from Office of Health Affairs ``Salaries and Expenses''; (10) \$1,301,581 from ``United States Citizenship and Immigration Services''; (11) \$369,032 from Federal Law Enforcement Training Center ``Salaries and Expenses''; (12) \$279,098 from Science and Technology ``Management and Administration''; (13) \$1,072,938 from Domestic Nuclear Detection Office ``Management and Administration''; and (14) \$216,744 from Federal Emergency Management Agency ``Management and Administration''.]**

Explanation: The Department requests deletion of this provision because it is a onetime rescission.

#### **Proposal to Delete *Old* Section 572**

**[(rescissions)]**

**[Sec. 572. Of the funds appropriated to the Department of Homeland Security, the following unobligated balances are hereby rescinded from the following accounts and programs in the specified amounts: (1) \$10,000,000 from U.S. Immigration and Customs Enforcement ``Salaries and Expenses''; (2) \$10,000,000 from U.S. Immigration and Customs Enforcement ``Automation Modernization''; (3) \$5,000,000 from U.S. Customs and Border Protection ``Automation Modernization'': Provided, That no funds shall be rescinded from prior year appropriations provided for the TECS modernization program; (4) \$71,300,000 from Transportation Security Administration ``Aviation Security'' account**

**70x0550; (5) \$7,000,000 from U.S. Customs and Border Protection ``Border Security Fencing, Infrastructure, and Technology''; (6) \$2,427,336 from Coast Guard ``Acquisition, Construction, and Improvements''; (7) \$5,000,000 from the ``Office of the Chief Information Officer'' related to Emerge2; and (8) \$27,400,000 from National Protection and Programs Directorate ``United States Visitor and Immigrant Indicator Technology''.]**

Explanation: The Department requests deletion of this provision because it is a onetime rescission.

### **Proposal to Delete *Old* Section 573**

**[Sec. 573. Sections 1309(a) and 1319 of the National Flood Insurance Act of 1968 (42 U.S.C. 4016(a) and 4026) are each amended by striking ``September 30, 2011'' and inserting ``the earlier of the date of the enactment into law of an Act that specifically amends the date specified in this section or May 31, 2012''. ]**

Explanation: The Department proposes deletion of this provision because it is a permanent change to the U.S. Code.

## **BUDGET REQUEST AND SUPPORTING INFORMATION**

### **Departmental Management and Operations Office of the Secretary and Executive Management**

#### **I. Appropriation Overview**

##### **A. Mission Statement for Salaries and expenses:**

The Department of Homeland Security (DHS) Office of the Secretary and Executive Management (OSEM) supports the Department and all of its Components by providing leadership, direction, and management to the Department. OSEM establishes and implements policy and provides various support functions and oversight to all entities within the Department. The Department continues to work toward integration and consolidation of its resources and operations to create a seamless organization that shares services, information, and best practices across previously stove-piped organizations.

##### **B. Budget Activities:**

OSEM is a separate appropriation within Departmental Management and Operations (DMO) which provides resources for 15 separate Programs, Projects and Activities (PPAs) including: Immediate Office of the Secretary, Immediate Office of the Deputy Secretary, Chief of Staff, Office of the Executive Secretary (ESEC), Intergovernmental Affairs (IGA), Office of Policy, Office of Public Affairs (OPA), Office of Legislative Affairs (OLA), Office of the General Counsel (OGC), Office for Civil Rights and Civil Liberties (CRCL), Office of the Citizenship and Immigration Ombudsman (CISOMB), Privacy Office, the Private Sector Office (PSO), the Office for State and Local Law Enforcement (OSLLE), and the Office of International Affairs (OIA). The Private Sector Office, State and Local Law Enforcement Office, and Office of International Affairs are new PPAs proposed in FY 2013. Below are brief descriptive summaries of the PPAs.

*Immediate Office of the Secretary:* The Office of the Secretary's role is to provide executive leadership, management, direction, and oversight for the Department's Components. The Secretary represents the Department of Homeland Security (DHS) to the President, Congress, and the general public.

*Immediate Office of the Deputy Secretary:* The Office of the Deputy Secretary supports the Secretary by providing leadership to the Department, especially regarding internal management and direction.

*Chief of Staff:* The Chief of Staff is responsible for coordinating policy initiatives and other actions of the Department's Components, directorates, and offices.

*Office of the Executive Secretary:* ESEC supports the Offices of the Secretary and Deputy Secretary with management of their correspondence, decision documents, and other written communications, including briefing books, Congressional questions for the record, and testimony for all departmental

hearing witnesses. ESEC is charged with ensuring that all materials presented to the Secretary and Deputy Secretary for signature have been thoroughly cleared with all relevant Components.

*Office of Intergovernmental Affairs:* IGA is responsible for communicating and coordinating State, local, tribal, and territorial (SLTT) government interactions throughout and across the Department. IGA promotes an integrated national approach to homeland security by coordinating and advancing Federal interaction with SLTT governments. IGA is responsible for continuing the homeland security dialogue with our SLTT partners, along with the national associations that represent them. IGA serves as the Secretary's primary point of contact for SLTT elected and appointed officials and their associations to ensure there are open lines of communications between the Department and its homeland security partners.

*Office of Policy:* Policy's responsibilities include the coordination of Department-wide policies, programs, and planning to ensure consistency and integration of missions throughout the Department. This office provides a centralized coordination point for developing and communicating policies across the multiple internal and external Components of the Homeland Security network. The Office of Policy also interacts with other government entities, academia, and includes counternarcotics coordination and risk management functions for DHS. In FY 2013, the Department proposes to spin off the Office for State and Local Law Enforcement, Office of International Affairs (OIA), and Private Sector Office, in order to more appropriately align the resources of the Policy Office to its core mission to coordinate Department strategy and policy. While OIA will coordinate the Department's international operations and engagement, the Office of Policy will continue to work with OIA to coordinate and develop international policy.

*Office of Public Affairs:* OPA is responsible for managing external and internal communications. The office responds to national media inquiries, maintains and updates the Department's website, writes speeches for senior department officials, and coordinates speaking events for Department officials. OPA fosters strategic communication throughout the Department and with external stakeholders through development and coordination of major DHS announcements and rollouts as well as setting common goals to promote "One DHS" objectives. The office manages the Department's organizational identity program, which includes usage of the DHS seal and related guidelines. Also, the office oversees the Department's employee communication activities, which include coordinating communications for Department-wide initiatives, town hall meetings between management and employees, and the operation and management of an intranet site. Per Presidential directive, OPA's incident communications program guides overall Federal incident communication activity and coordinates with State, local, and international partners to ensure accurate and timely information is provided to the public during a crisis.

*Office of Legislative Affairs:* OLA serves as the Department's primary liaison to Congress. OLA advocates for the policy interests of the Administration and the Secretary. OLA also ensures that all DHS Components are actively engaged with Congress in their specific areas of responsibility. OLA articulates views on behalf of DHS Components and their legislative initiatives. OLA responds to requests and inquiries from congressional committees, individual Members of Congress, and their staffs. OLA also participates in the Senate confirmation process for all DHS Presidential nominees.

*Office of the General Counsel:* The General Counsel is the chief legal officer for DHS and oversees and integrates more than 1,800 attorneys throughout the Department. OGC is responsible for ensuring that departmental activities comply with applicable legal requirements, as well as establishing that the Department's efforts to secure the Nation are consistent with the civil rights and civil liberties of our citizens and observe the rule of law. OGC provides legal advice on areas such as national security, immigration, litigation, international law, maritime safety and security, transportation security, border security law, cyber security, fiscal and appropriations law, environmental law, and many others. OGC also provides legal services in several areas where the law intersects with the achievement of mission goals, such as the coordination of the Department's rulemaking activities, managing interdepartmental clearance of proposed legislation, and providing legal training for law enforcement officers. OGC provides legal counsel for all DHS offices (except those specifically excluded by statute).

*Office for Civil Rights and Civil Liberties:* CRCL supports the Department as it secures the Nation while preserving individual liberty, fairness, and equality under the law. CRCL performs four key functions to integrate civil rights and civil liberties into departmental activities:

1. Advising Department leadership, personnel, and partners about civil rights and civil liberties issues; ensuring respect for civil rights and civil liberties in policy decisions and in the implementation of those decisions.
2. Communicating with individuals and communities whose civil rights and civil liberties may be affected by DHS activities, informing them about policies and avenues of redress, and promoting appropriate attention within the Department to their experiences and concerns.
3. Investigating and resolving civil rights and civil liberties complaints filed by the public.
4. Leading the Department's equal employment opportunity programs and promoting personnel diversity and merit system principles.

*Citizenship and Immigration Services Ombudsman:* CISOMB assists individuals and employers in resolving problems connected with cases pending before United States Citizenship and Immigration Services (USCIS). In addition, as required by statute, CISOMB identifies common problems experienced by individuals and employers when seeking USCIS services, and proposes changes to mitigate such problems and improve the delivery of immigration services. In accomplishing each of these missions, the CISOMB works impartially, soliciting information and feedback from USCIS, other government agencies, immigration benefits applicants, and the immigration stakeholder community.

*Privacy Office:* The DHS Privacy Office is the first statutorily-mandated Privacy Office within the Federal Government. The Privacy Office protects the collection, use, and disclosure of Personally Identifiable Information (PII) and departmental information. It ensures that appropriate access to information is consistent with the vision, strategic mission, and core values of the Department; and implements the policies of the Department to defend and protect individual rights, liberties, and information interests of our citizens. The Privacy Office has oversight of all privacy and disclosure policy matters, including compliance with the *Privacy Act of 1974*, the *Freedom of Information Act*, and the completion of privacy impact statements on all new programs and systems, as required by the *E-Government Act of 2002* and Section 222 of the *Homeland Security Act*.

*Private Sector Office:* Previously part of the Office of Policy, the Private Sector Office (PSO) fosters strategic communications with businesses, trade associations, and other non-governmental organizations to build stronger relationships between them and the Department. The Department proposes to establish the Private Sector Office as an independent office and PPA in FY 2013. The office will report directly to the Secretary to advise Departmental leadership on prospective policies and regulations, inform the Secretary about the economic impact of DHS policies, promote public-private partnerships and best practices to improve the Nation's homeland security, and serve as the primary point of entry for the private sector into DHS.

*Office for State and Local Law Enforcement:* Previously part of the Office of Policy, the Office for State and Local Law Enforcement (OSLLE) is the Department's principal liaison with non-Federal law enforcement partners. The Department proposes to establish OSLLE as an independent office and PPA in FY 2013. OSLLE formulates and coordinates national-level policy relating to law enforcement's role in preventing acts of terrorism, and serves as the primary Department liaison with State, local, and tribal law enforcement agencies.

*Office of International Affairs:* Previously part of the Office of Policy, The Office of International Affairs (OIA) will report directly to the Secretary and will lead, coordinate, and integrate the Department's interaction with its international partners, and develop and oversee implementation of the Department's international engagement strategy. The Department proposes to establish OIA as an independent office and PPA in FY 2013. As part of this transition, International Affairs will oversee visa waiver negotiations via the Visa Waiver Program Office.

### **C. Budget Request Summary:**

The Office of the Secretary and Executive Management requests 725 positions, 725 FTE, and \$134,150,000 for the FY 2013 request. This includes the transfer, per P.L. 112-74, of 23 positions, 23 FTE, and \$4,241,000 from National Protection and Programs Directorate in FY 2012 for Risk Management and Analysis such that the FY 2012 Base becomes 701 positions, 699 FTE and \$137,400,000. The FY 2013 request results in a net increase of 3 FTE and a decrease of \$3,250,000 million from the FY 2012 base. Base adjustments include:

- Increase – Annualization of prior-year funding for 287(g) and Secure Communities (\$373,000; 2.5 FTE);
- Increase – FY 2013 Pay Increase (\$367,000);
- Increase – Working Capital Fund Adjustment for GSA Rent and NCR Infrastructure Operations (\$3,805,000);
- Increase – Annualization of CNE transfer to Policy in FY 2012 (\$1,645,000);
- Decrease – Management Efficiencies (\$8,989,000):
  - Decrease – Efficiencies in attrition, printing, supplies, advisory & assistance services, and other contractual services (\$7,110,000);
  - Decrease – Purchasing Efficiencies (\$704,000);
  - Decrease – DHS Strategic Sourcing Initiatives (\$32,000);
  - Decrease – Permanent Change of Station (PCS) costs (\$192,000);
  - Decrease – General Temporary Duty (TDY) and Travel (\$932,000);
  - Decrease – Long-term TDY more than 30 days (\$8,000);

- Decrease – Overtime (\$11,000).
- Decrease – Termination of one-time costs for Counternarcotics Enforcement (\$1,800,000); and
- Decrease – Working Capital Fund Adjustment for Data Center Migration (\$116,000).

The total program changes include 0.5 FTE and \$135,000 for the Office for Civil Rights and Civil Liberties to support the Department's role in countering domestic violent extremism, and 0 FTE and \$1,327,000 for 287(g)/Secure Communities. These changes are described in greater detail in Section IV.

<b>2013 Total Requested Budget Authority</b>	<b>12</b>	<b>12</b>	<b>4,295</b>
Total Change 2012 to 2013	-	-	(705)

OSEM requests 12 positions, 12 FTE, and \$4.295 million in FY 2013 for The Immediate Office of the Secretary. Base adjustments include:

- Increase of \$9K for FY 2013 pay increase
- Increase of \$28K for a Working Capital Fund adjustment
- Decrease of \$742K for management efficiencies:
  - Decrease of \$707K for a General TDY & Travel Offset
  - Decrease of \$35K for supplies and materials.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Secretary is appointed by the President and confirmed by the Senate to lead DHS and act as the principal adviser to the President on homeland security matters. The Secretary ensures a coordinated national effort to prevent terrorist attacks in the United States, reduce vulnerability to and minimize damage of terrorism, and lead recovery from attacks and disasters that may occur. The Secretary is a member of the Homeland Security Council, and serves as the principal spokesperson on homeland security issues for the Administration when testifying before the House Homeland Security Committee, the Senate Homeland Security and Government Affairs Committee, and the House and Senate Appropriations Committees.

<b>2013 Total Requested Budget Authority</b>	<b>8</b>	<b>8</b>	<b>2,387</b>
Total Change 2012 to 2013	-	-	469

OSEM requests 8 positions, 8 FTE, and \$2.387 million in FY 2013 for The Immediate Office of the Deputy Secretary. Base adjustments include:

- Increase of \$6K for FY 2013 pay increase
- Increase of \$463K for a Working Capital Fund adjustment

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Immediate Office of the Deputy Secretary supports the Secretary by providing leadership with a focus on the internal management and direction of the Department to ensure its efficient and effective operation. The Deputy Secretary’s role is to provide internal oversight of all Departmental operations, which allows the Secretary to focus on external matters concerning homeland security and DHS.

Total Change 2012 to 2013	-	-	198

OSEM requests 18 positions, 18 FTE, and \$2.498 million in FY 2013 for the Chief of Staff. Base adjustments include:

- Increase of \$8K for FY 2013 pay increase
- Increase of \$190K for a Working Capital Fund adjustment

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Chief of Staff oversees DHS activities, assists in the management of DHS operations, and supports the Secretary. The Office of the Chief of Staff is responsible for all operational functions that relate to the Immediate Office of the Secretary (budget, information technology, and personnel), and assists the Secretary by coordinating continuity of operations activities for Department Headquarters, directing the Department's resources, and in the Department's efforts to Mature and Strengthen the Homeland Security Enterprise.

- Increase of \$31K for FY 2013 pay increase
- Increase of \$47K for a Working Capital Fund adjustment
- Decrease of \$185K for management efficiencies:
  - Decrease of \$8K for a reduction in Overtime
  - Decrease of \$177K as a reduction through efficiencies achieved in delaying the timing of replacing personnel lost through attrition and backfilling positions with lower graded personnel as well as efficiencies for supplies and materials.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

ESEC establishes effective and proficient protocols for processing all internal communication, decision management, briefings, Congressional questions for the record and reports, and Department-wide testimony. ESEC is the principal liaison between the Department and its Components, and coordinates all external correspondence for the Immediate Office of the Secretary and all directorates. ESEC establishes and maintains budget and personnel activities for the Office of the Secretary, Deputy Secretary, and Chief of Staff, as well as the Executive Secretariat.

Total Change 2012 to 2013	-	-	(2)

OSEM requests 20 positions, 20 FTE, and \$2.648 million in FY 2013 for the Office of Intergovernmental Affairs (IGA). Base adjustments include:

- Increase of \$10K for FY 2013 pay increase
- Increase of \$16K for a Working Capital Fund adjustment
- Decrease of \$28K for management efficiencies:
  - Decrease of \$28K for a General TDY & Travel Offset

**CURRENT SERVICES PROGRAM DESCRIPTION:**

IGA serves both as an advocate for the State, local, tribal, and territorial (SLTT) elected and appointed officials within the Department and as the primary liaison between those officials senior DHS leadership.

IGA’s stakeholder community consists of over 500,000 elected and appointed officials within the United States. These officials include governors, homeland security advisors, mayors, county executives, state legislators, leadership of the 565 federally recognized Native American and Native Alaskan tribes, emergency managers, and the numerous national associations that represent these officials. IGA’s stakeholders are crafting policy and implementing budget decisions at all levels of government that impact State and local homeland security efforts as well as the Department and our operations.

IGA manages communications with SLTT officials and coordinates activities across the spectrum of issues, initiatives, and programs confronting all agencies and Components of the Department. IGA also coordinates with counterpart Intergovernmental Affairs Offices within other Executive Branch agencies and the White House, working to ensure that elected and appointed government officials across the nation at the State, local, tribal and territorial levels are informed of DHS policies, programs, and priorities. IGA coordinates messaging and activities with the other DHS stakeholder offices—including Private Sector Office, State and Local Law Enforcement, Public Affairs, and Legislative Affairs—to ensure that the full spectrum of our partners in the homeland are engaged in the homeland security process.

Total Change 2012 to 2013	(37)	(37)	(6,322)

OSEM requests 157 positions, 157 FTE, and \$33.678 million in FY 2013 for the Office of Policy. This includes the transfer, per P.L. 112-74, of 23 positions, 23 FTE, and \$4,241,000 from National Protection and Programs Directorate in FY 2012 for Risk Management and Analysis such that the FY 2012 Base for Policy becomes \$44.241 million. Base adjustments include:

- Realignment (decrease) of \$1.761M to create the Private Sector Office
- Realignment (decrease) of \$891K to create the Office for State and Local Law Enforcement
- Realignment (decrease) of \$7.988M to create the Office of International Affairs
- Increase of \$40K for FY 2013 pay increase
- Increase of \$1.124M for a Working Capital Fund adjustment
- Increase of \$1.645M for the annualization of CNE transfer to Policy in FY 2012
- Decrease of \$2.732M for management efficiencies:
  - Decrease of \$1.960M as a reduction through efficiencies for supplies and materials, contracts, and maintenance of equipment
  - Decrease of \$301K for a General TDY & Travel Offset
  - Decrease of \$8K for Long-term TDY more than 30 days
  - Decrease of \$259K for Purchasing Savings
  - Decrease of \$12K for DHS Strategic Sourcing Initiatives
  - Decrease of \$192K for PCS costs

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of Policy's responsibilities include the coordination of Department-wide policies, programs, and planning to ensure consistency and integration of missions throughout the Department. This office provides a centralized coordination point for developing and communicating policies across the multiple internal and external Components of the Homeland Security network. In addition to DHS, the Office of Policy also interacts with other government entities, academics, and now includes counternarcotics coordination and risk management functions for DHS.

The FY 2013 request includes the annualization of the FY 2012 realignment of counternarcotics coordination and risk management programs into the Office of Policy. This fulfills the intent of the Public Law 112-74, enhances DHS internal coordination of policies, and realizes efficiencies of \$0.155 M in resourcing these areas at DHS.

  - Decrease of \$14K for DHS Strategic Sourcing Initiatives

Program Changes include:

- Increase of \$135K as a program change for 1 position for Counter Domestic Violent Extremism
- Increase of \$1.327M as a program change to ICE Secure Communities and 287(g) oversight

## **CURRENT SERVICES PROGRAM DESCRIPTION:**

CRCL provides DHS with advice on the full range of civil rights and civil liberties issues, investigates complaints by the public about civil rights and civil liberties violations, and offers recommendations to solve problems uncovered by those investigations. CRCL provides training and technical assistance to DHS personnel and SLTT partners; and conducts outreach and engagement with communities whose civil rights and civil liberties are affected by DHS activities. The Office acts as the DHS-designated single point of contact for human rights treaties and complaints. CRCL also facilitate U.S. Government-wide communication to community leaders after a security or other incident through its Incident Community Coordination Teams. CRCL makes information available to the public on the responsibilities and functions of, and how to contact, the Officer for Civil Rights and Civil Liberties, including how to file civil rights and civil liberties complaints. It conducts administrative adjudication of disability discrimination claims under Section 504 of the Rehabilitation Act of 1973. CRCL leads the Department's Equal Employment Opportunity (EEO) and diversity programs and is responsible for DHS-wide policies, training, and complaint adjudication processes to promote EEO and diversity for all employees and applicants.

OSEM requests 35 positions, 35 FTE, and \$5.950 million in FY 2013 for the Citizenship and Immigration Services Ombudsman (CISOMB). Base adjustments include:

- Increase of \$21K for FY 2013 pay increase
- Increase of \$347K for a Working Capital Fund adjustment
- Decrease of \$618K for management efficiencies:
  - Decrease of \$455K through attrition, efficiencies in printing, and supplies
  - Decrease of \$24K for a General TDY & Travel Offset
  - Decrease of \$130K for Purchasing Savings
  - Decrease of \$6K for DHS Strategic Sourcing Initiatives
  - Decrease of \$3K for a reduction in Overtime

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The statutory mission of CISOMB is to assist individuals and employers in resolving immigration benefits problems, propose changes in administrative practices to improve customer service, and directly provide Congress and the Department with substantive analysis on the quality of immigration services. CISOMB accomplishes this mission through public outreach; the diligent study of important issues across the spectrum of immigration benefits and services; identifying best practices and forward-looking business models that will meet future challenges for DHS; proposing impartial, operationally sound, and credible solutions to customer-service barriers; and working cooperatively with government partners to benefit the public. Throughout the year, CISOMB publishes a series of

recommendations, updates, and other advisories focused on improving the receipt, processing, review, and adjudication of immigration benefits applications. CISOMB is also responsible for providing Congress with a comprehensive annual report analyzing serious and pervasive problems affecting the delivery of immigration services.

- Decrease of \$18K for management efficiencies:
  - Decrease of \$18K for a General TDY & Travel Offset

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Privacy Office is responsible for protecting the Department’s collection, use and disclosure of Personally Identifiable Information (PII). The Office manages departmental responsibilities related to the Freedom of Information Act (FOIA) and the Privacy Act. These responsibilities include coordinating and implementing policy development and compliance government-wide for the FOIA, and Department-wide for the Privacy Act. The Office adjudicates all appeals from denials by any Department Component of access to information under these two Acts. This Office demonstrates commitment to and encourages awareness of sound privacy policy and practice as currently accepted in the United States and internationally.

- Realignment (increase) of \$1.761M from the Office of Policy to create the Private Sector Office
- Increase of \$10K for FY 2013 pay increase
- Decrease of \$20K for management efficiencies

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The mission of the Private Sector Office (PSO) is to foster strategic communications with leaders of businesses, trade associations and other non-governmental organizations to create stronger relationships with the Department of Homeland Security (DHS). The PSO is the lead office and point of contact for advising the Secretary on prospective programs, initiatives, and regulations which relate to the private sector. As such, the PSO informs the Secretary on the economic impact to the private sector from DHS activities across all five QHSR mission areas. The Office also leads in the promotion of public-private partnerships and best practices to improve the Nation’s homeland security and aid in both economic and national security.

As primary advisor to the Secretary on issues related to the private sector, PSO coordinates active engagement between DHS and the private sector to build strong partnerships, shape policy, and enhance internal and external dialog. In times of heightened threat/crisis and emergency response the

Private Sector Office serves as an advisor as well as a resource for the Secretary with key strategic links to the private sector community.

PSO develops institutionalized and DHS enterprise-wide private sector engagement processes. The Office actively coordinates and engages DHS Components to increase transparency of programmatic activities and to provide increased opportunities for alignment of private sector engagement. This has helped reduce duplicative efforts and has allowed the Secretary and the Department to more strategically and efficiently engage the private sector.

- Realignment (increase) of \$891K to create the Office for State and Local Law Enforcement
- Increase of \$3K for FY 2013 pay increase
- Decrease of \$2K for management efficiencies

**CURRENT SERVICES PROGRAM DESCRIPTION:**

OSLLE is the Department of Homeland Security's principal liaison to the non-Federal law enforcement community, and provides the Secretary with situational awareness and real-time information with which to make informed decisions and lead the formulation of effective policy. Non-Federal law enforcement agencies, personnel, and associations are often best positioned to inform DHS on local priorities, concerns, and areas where DHS can assist and collaborate in their area. OSLLE also coordinates communication of the Department's priority programs and initiatives to non-Federal partners and solicits feedback and opportunities for enhancements. In FY 2013, OSLLE will be established as an independent office, reflecting the Department's continued focus on engagement with State, local, and tribal law enforcement agencies by providing an easily accessible single point of contact.

Program Increase							1	0.5	135
<b>Total Request</b>	-	-	-	-	-	-	<b>1</b>	<b>0.5</b>	<b>135</b>

**Description of Item**

The Office for Civil Rights and Civil Liberties (CRCL) requests 1 position, 0.5 FTE, and \$135,000 to ensure the continuation of the CRCL “Counter Violent Extremism (CVE) through Community Partnerships” training program for state, local, and federal law enforcement. This program supports the implementation of the White House’s *National Strategy on Empowering Local Partners to Prevent Violent Extremism in the United States* and the DHS CVE strategy. CRCL’s program trains thousands of law enforcement personnel annually to effectively use community partnerships to counter violent extremism. The CRCL CVE training curriculum includes three components of on-site instruction: understanding violent radicalization; cultural awareness; and community engagement. Participants receive a how-to guide for community interaction and effective policing without the use of ethnic profiling. The course orients law enforcement personnel to key cultural issues involving the American Arab, Muslim, Sikh, Somali, and South Asian communities. Between October 2010 and October 2011, DHS CRCL trained nearly 2,700 law enforcement officials on CVE and cultural awareness at 46 separate events.

**Justification**

CRCL’s continuation of the CVE training program is necessary to conduct several of the activities designated under the White House’s *Strategic Implementation Plan for Empowering Local Partners to Prevent Violent Extremism in the United States* (SIP), released on December 8, 2011. The SIP is the

blueprint for how the U.S. Government will implement the Domestic Strategy on Countering Violent Extremism, its first strategy to address violent extremism in the Homeland. The SIP lists the current and future actions the U.S. Government will take in support of a locally-focused, community-based approach, in three broad areas: (1) enhancing engagement with and support to local communities; (2) building government and law enforcement expertise; and (3) countering violent extremist propaganda while promoting our ideals. This is the first U.S. Government strategy and implementation plan to address ideologically-inspired violent extremism in the homeland.

CRCL's CVE training project is listed as one of the key initiatives in the DHS role in the implementation for the White House Strategy.

CRCL will also serve as a critical resource for the upcoming DHS-FLETC effort in furtherance of the SIP to develop a CVE curriculum to be integrated into existing training programs for federal law enforcement. The curriculum will give federal law enforcement a better understanding of CVE and how to more effectively leverage existing local partnerships.

In addition, DHS, in partnership with the Los Angeles Police Department and the National Consortium for Advanced Policing, is developing a CVE curriculum that includes a 16-hour continuing education module for executive and front line officers as well as a 30-minute module that will be introduced at police academies. Both will be certified by the Police Officers Standards and Training Council. By 2013, DHS seeks to (1) implement the curriculum across the country on a regional basis; (2) develop a national network of trainers. CRCL participation and expertise will be a critical resource in the development of this program.

### **Impacts on Performance**

The performance of the CVE project will directly support DHS's mission of *Preventing Terrorism and Enhancing Security*. CRCL will be able to dedicate full time support to continue to:

- Meet the current and future DHS planned participation in the White House SIP implementation; and
- Improve the development of and use of standardized training based on the latest intelligence and academic research, which conveys information about violent extremism; improves cultural competency; and imparts best practices and lessons learned for effective community engagement and partnerships.

**Description of Item**

The office for Civil Rights and Civil Liberties (CRCL) requests a program increase of \$1.327 million to ensure that the Department’s immigration efforts comply with all applicable civil rights statutes and constitutional requirements. In FY 2012, CRCL received a program increase of 5 positions, 2.5 FTE, and \$694K. The additional 2.5 FTE are included as an adjustment-to-base in FY 2013 at \$373K. The additional program increase of \$1.327 million will allow CRCL to further provide policy advice, investigations, and training relating to Immigration and Customs Enforcement’s (ICE) Secure Communities and 287(g) programs. CRCL will continue to participate in ICE’s 287(g) advisory committee, improve ICE’s site audits of 287(g) programs, conduct sole and joint investigations, improve data-based and statistical oversight, review policies and procedures to ensure respect for civil rights and civil liberties, and provide training and awareness briefing materials and roll call videos for state and local law enforcement. ICE’s 287(g) and Secure Communities programs directly touch upon the civil rights and civil liberties of many thousands of people who are arrested or otherwise touched by local law enforcement, and include complex issues such as potential race-based policing, violations of the Fourth and Fifth Amendments to the Constitution, support to victims of crimes who are entitled to protection under the Immigration and Nationality Act, and compliance with international human rights treaties.

**Justification**

Secure Communities has grown rapidly since the program first began in 2009 and nationwide activation is expected by FY 2013. As such, CRCL’s oversight is needed to ensure that the program complies with all applicable civil rights statutes and constitutional requirements.

CRCL is statutorily responsible to provide civil rights oversight for these two programs, but as the programs have rapidly expanded across the country, additional funding is required for CRCL to adequately staff that oversight. In particular, funding will assist CRCL in establishing a robust ability to perform the following activities:

- Investigate broad civil rights complaints against such programs;
- Work with 287(g) programs on systematic reporting and other compliance with Title VI of the Civil Rights Act of 1964 (which bans race and national origin discrimination);
- Support Secure Communities program training to assist compliance with civil rights requirements while identifying, detaining and processing immigration offenders, or to engage with affected communities to educate them about the program;
- Conduct outreach to ensure that local communities are aware of civil rights complaint procedures.

Moreover, funds will enable CRCL to:

- Conduct statistical analysis of Secure Communities to produce quarterly reports that will be made public and guide oversight analysis and investigation;
- Provide assistance to ICE on its 287(g) Office of Professional Responsibility (OPR) audit process;
- Work with ICE on training for 287(g) officers; and
- Prepare a series of awareness briefings for front-line state and local law enforcement personnel on civil rights issues related to Secure Communities.

CRCL staff will conduct investigations involving systematic or consistent discriminatory practices, augment training (both live and web-based) provided to state and local law enforcement personnel that participate in the programs, conduct sophisticated special and routine statistical analysis, provide civil rights and civil liberties policy advice, and engage with affected communities. CRCL will also be able to increase collaboration efforts with both ICE and the U.S. Department of Justice (DOJ). ICE collaboration will include assistance in program development and evolution of policies, procedures, and activities to ensure appropriate protection for civil rights and civil liberties, to assist ICE's OPR in its audits of 287(g) jurisdictions both through on-site participation and recommendations for better incorporation of civil rights and civil liberties issues into its standardized audit procedures, and to provide civil rights and civil liberties training to ICE OPR auditors and to ICE 287(g) program managers. CRCL will also further collaboration with ICE's Law Enforcement Support Center (LESC) to better survey and monitor the exercise of immigration authority by state and local law enforcement.

### **Impacts on Performance**

The performance of this program will directly support DHS's mission of Enforcing and Administering Our Immigration Laws, which is enhanced by the Secure Communities and 287(g) programs. It is crucial that these programs proceed with sufficient regard for – and support, training, oversight related to – civil rights requirements.

## **V. Exhibits and Other Supporting Material**

### **A. Justification of Proposed Legislative Language**

For necessary expenses of the Office of the Secretary of Homeland Security, as authorized by section 102 of the Homeland Security Act of 2002 (6 U.S.C. 112), and executive management of the Department of Homeland Security, as authorized by law, [\$133,159,000] \$134,150,000: Provided, That not to exceed \$51,000 shall be for official reception and representation expenses, of which \$17,000 shall be made available to the Office of [Policy] International Affairs for Visa Waiver Program negotiations in Washington, DC, and for other international activities.[: Provided further, That all official costs associated with the use of government aircraft by Department of Homeland Security personnel to support official travel of the Secretary and the Deputy Secretary shall be paid from amounts made available for the Immediate Office of the Secretary and the Immediate Office of the Deputy Secretary: Provided further, That of the total amount made available under this heading, \$1,800,000 shall remain available until March 30, 2012, for the Office of Counternarcotics Enforcement, of which up to \$1,800,000 may, notwithstanding section 503 of this Act, be transferred to the Office of Policy: Provided further, That amounts transferred pursuant to the preceding proviso shall remain available until September 30, 2012: Provided further, That the Assistant Secretary for Policy shall submit to the Committees on Appropriations of the Senate and the House of Representatives not later than March 30, 2012, an expenditure plan for the Office of Policy which includes a detailed description of any funds transferred to the Office for Counternarcotics Enforcement and activities related to Risk Management and Analysis: Provided further, That \$30,000,000 shall not be available for obligation until the Secretary of Homeland Security submits to the Committees on Appropriations of the Senate and the House of Representatives a comprehensive plan for implementation of the biometric air exit system, as mandated in Public Law 110-53, including the estimated costs of implementation.]

#### **Explanation of Changes:**

In FY 2013, the Department proposes to establish the following offices within OSEM: Office for State and Local Law Enforcement, Office of International Affairs, and Private Sector Office, in order to more appropriately align the resources of the Policy Office to its core mission to coordinate Department strategy and policy. The Visa Waiver Program is a subset of the Office of International Affairs and as such the legislative language should reflect the alignment of the official reception and representation funding in the Office of International Affairs vice the Office of Policy.

With less funding available in the Immediate Office of the Secretary and the Immediate Office of the Deputy Secretary budgets, we require flexibility to ensure we can meet all travel for mission critical operations from all available sources of funding. As such we are seeking removal of the language.

### Immediate Office of the Secretary Mission Statement

The Office of the Secretary provides central leadership, management and direction for the entire Department of Homeland Security. This office provides oversight for all offices within the Departmental Operations function as well as all other entities of the Department. It is the Secretary's role to serve as the top representative of Homeland Security to the President, Congress and the general public.

### Summary Justification and Explanation of Changes

**Immediate Office of the Deputy Secretary Mission Statement**

The Office of the Deputy Secretary directly supports the Office of the Secretary by providing leadership to the Department. This focuses on internal management and direction, which ensures that the Department will continue to operate efficiently and effectively in carrying out its mission. It is the Deputy Secretary's role to provide internal oversight to all Departmental Operations, which allows the Secretary to focus more on external matters concerning DHS.

**Chief of Staff Mission Statement**

The Office of the Chief of Staff promotes the coordination of the agencies and directorates that have been consolidated into the Department of Homeland Security. The Office of the Chief of Staff is responsible for all operational functions that relate to the Immediate Office of the Secretary (budget, information technology, and personnel), and coordinates activities with the Department Headquarters continuity of operations. With the inherent challenges of a concurrent creation of a new department, reorganization, consolidation, and several new offices, the Office of the Chief of Staff seeks to streamline, coordinate, and deliver highly effective initiatives and policies that will ensure our safety and security.

**Office of Intergovernmental Affairs Mission Statement**

The mission of the office of Intergovernmental Affairs (IGA) is to act as an advocate for the state, local, tribal and territorial officials within DHS and to operate as the primary liaison between those officials and the secretary and senior DHS leadership. IGA facilitates an integrated national approach to homeland security across a broad spectrum of issues confronting DHS by ensuring, coordinating and advancing Federal interaction with State, local, tribal and territorial governments.

**Office of Policy Mission Statement**

The Office of Policy is the primary coordinator of Department-wide policies, programs, and planning to ensure consistency and integration of missions throughout the entire Department. It provides the Department with a central office to develop and communicate policies across multiple components of the homeland security network and strengthens the Department's ability to maintain policy and operational readiness needed to protect the homeland. It also provides the foundation and direction for Department-wide strategic planning and budget priorities. A central DHS policy office that bridges Headquarters, Components, and operating agencies improves communication among DHS entities, eliminates duplication of effort, and translates policies into timely action. The Office of Policy also serves as a single point of contact for internal and external stakeholders that will allow for streamlined policy management across the Department.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	17,143	18,546	14,082	(4,464)
11.3 Other than full-time permanent	2,335	1,935	1,306	(629)

<b>23.1 GSA rent</b>	<b>\$2,250</b>	<b>\$2,457</b>	<b>\$2,798</b>	<b>\$341</b>

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2013 request reflects an increase of \$341,000 due to an increase in GSA rent costs.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>24.0 Printing</b>	<b>\$586</b>	<b>\$587</b>	<b>\$402</b>	<b>-\$185</b>

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2013 request reflects a decrease of \$185,000 to offset increases in GSA Rent.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.2 Other services</b>	<b>\$404</b>	<b>\$501</b>	<b>\$172</b>	<b>-\$329</b>

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2013 request reflects a decrease of \$329,000 due to management efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.3 Purchases from Gov't accts.</b>	<b>\$6,718</b>	<b>\$6,639</b>	<b>\$6,540</b>	<b>-\$99</b>

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
--	-------------------------------	--	--	------------------------------

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from the DHS WCF, DHS Shared Services, and other government agencies including intra-agency service requirements. The FY 2013 request reflects a decrease of \$99,000 due to management efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.7 Operation and maintenance of equipment</b>	\$349	\$349	\$293	-\$56

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2013 request reflects a decrease of \$56,000 to offset increases in GSA rent.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>26.0 Supplies and materials</b>	\$75	\$65	\$66	\$1

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2013 request reflects a decrease of \$1,000 due to a \$50,000 annualization of the CNE and RMA funds transferred in FY12 and a decrease of \$49,000 due to management efficiencies.

**Private Sector Office Mission Statement**

The Private Sector Office (PSO) is charged with providing America's private sector with a direct line of communication to the Department. PSO works directly with individual businesses and through trade associations and other non-governmental organizations to foster dialogue between the private sector and DHS. PSO functions include: advising the Secretary on the impact of DHS policies, regulations, processes, and actions on the private sector and promoting public private partnerships to address homeland security challenges.

**Summary Justification and Explanation of Changes**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	-	-	191	191

**Office of Public Affairs Mission Statement**

The Assistant Secretary for Public Affairs oversees all external and internal communications for Homeland Security. On a daily basis, the Office of Public Affairs (OPA) responds to national media inquiries, maintains and updates the Department's web site, and coordinates speaking events for Department officials across the country. OPA also develops and manages various public education programs. The Office of Public Liaison, within OPA, fosters strategic communication with the Department's external stakeholders. The Department's organizational identity, including the Homeland Security seal and wordmark, was designed and implemented by the Office of Public Affairs. OPA directs the Department's Incident Communications program that guides overall Federal incident communication activity and coordinates with state, local, and international partners to ensure accuracy and timely information to the public during a crisis.

**Summary Justification and Explanation of Changes**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	2,143	1,882	1,639	(243)

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	2,143	1,882	1,639	(243)

**Office of Legislative Affairs Mission Statement**

The Office of Legislative Affairs (OLA) is responsible for the development and advancement of the Department's legislative agenda. This includes the establishment and maintenance of constructive congressional relations, the development of Departmental protocols for interaction with Congress and contributing to the distribution and communication of the Department's strategic message.

**Summary Justification and Explanation of Changes**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	3,063	3,074	2,888	(186)
11.3 Other than full-time permanent	468	472	474	2
11.5 Other personnel compensation	67	68	68	-
12.1 Benefits	1,033	1,040	1,045	5
<b>Total, Salaries &amp; Benefits</b>	<b>4,631</b>	<b>4,654</b>	<b>4,475</b>	<b>(179)</b>

Salaries and Benefits fund compensation directly related to duties performed for the Office of Legislative Affairs by Federal civilian employees. The FY2013 request reflects an increase of \$23,000 for pay inflation of 0.5% and a decrease of \$202,000. This decrease in salaries will be achieved by backfilling attrition at lower grade levels and seeking reimbursable funding for positions that support other DHS components.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
21.0 Travel	\$27	\$28	\$15	-\$13

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY2013 request reflects a decrease of \$13,000 due to management efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
23.1 GSA rent	\$391	\$391	\$438	\$47

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY2013 GSA rent request reflects an increase of \$47,000 due to an increase in GSA rent costs.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.2 Other services	\$246	\$150	\$112	-\$38

Other services include report contractual services with non-Federal sources that are not otherwise classified under object class 25. The FY2013 request includes a decrease of \$38,000 in management efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.3 Purchases from Gov't accts.	\$688	\$686	\$942	\$256

Purchases from government accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from DHS WCF, DHS Shared Services, and other government agencies including interagency service requirements. The FY 2013 request reflects an increase of \$256,000 due to a WCF adjustment.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.4 O&M of facilities	\$101	\$35	\$3	-\$32

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2013 request reflects a decrease of \$32,000 for management efficiencies.

**Office for Civil Rights and Civil Liberties Mission Statement**

The mission of the Office for Civil Rights and Civil Liberties (CRCL) is to protect civil rights and civil liberties, to support DHS by providing policy advice on the full range of civil rights and civil liberties issues, and to serve as an information and communication channel with the public regarding all aspects of these issues. Section 705 of the Homeland Security Act provides that the Officer for Civil Rights and Civil Liberties shall: Review and assess information alleging abuses of civil rights, civil liberties, and racial and ethnic profiling by employees and officials of the Department; and make public through the internet, radio, television, or newspaper advertisements information on the responsibility and function of, and how to contact, the Officer. Submit to the President of the Senate, the Speaker of the House of Representatives, and the appropriate committees and subcommittees of Congress through the Secretary on an annual basis a report on the implementation of this section, including the use of funds appropriated to carry out this section, and allegations of abuses described under subsection (a)(1) and any actions taken by the Department in response to such allegations.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	10,712	11,498	11,528	30
11.3 Other than full-time permanent	71	71	71	-
11.5 Other personnel compensation	297	297	298	1
12.1 Benefits	3,138	3,346	3,350	4
<b>Total, Salaries &amp; Benefits</b>	<b>14,218</b>	<b>15,212</b>	<b>15,247</b>	<b>35</b>

Salaries and Benefits fund compensation directly related to duties performed for the Office for Civil Rights and Civil Liberties by Federal civilian employees. The FY 2013 request includes an increase of \$76,000 for pay inflation of 0.5%, a pay annualization of \$373,000 for 2.5 FTE for Secure Communities and 287(g) programs, and a program increase of \$135,000 for 1 FTP for Countering Domestic Violent Extremism. Decreases include management efficiencies of \$549,000.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
21.0 Travel	\$312	\$362	\$297	-\$65

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2013 request includes a decrease of \$65,000 due to management efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
23.1 GSA rent	\$2,168	\$2,168	\$2,439	\$271

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2013 request reflects an increase of \$271,000.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
24.0 Printing	\$53	\$203	\$57	-\$146

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2013 request reflects a decrease of \$146,000 due to management efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.2 Other services	\$173	\$173	\$107	-\$66

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2013 request includes a decrease of \$66,000 for management efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.3 Purchases from Gov't accts.	\$3,137	\$3,901	\$3,182	-\$719

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
--	-------------------------------	--	--	------------------------------

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from the DHS WCF and DHS Shared Services. The FY 2013 request includes a WCF increase of \$700,000, a decrease of \$2,746,000 for management efficiencies, and an increase of \$1,327,000 for the Secure Communities and 287(g) programs.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.4 O&M of facilities	\$144	\$144	\$102	-\$42

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. FY 2013 includes a decrease of \$42,000 for management efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
26.0 Supplies and materials	\$202	\$202	\$150	-\$52

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. FY 2013 includes a decrease of \$52,000 for management efficiencies.

**Citizenship and Immigration Services Ombudsman Mission Statement**

The mission of the Citizenship and Immigration Service Ombudsman (CISOMB) is to assist individuals and employers in resolving problems with the United States Citizenship and Immigration Service (USCIS). Section 452 of the Homeland Security Act of 2002 requires that CISOMB assist individuals and employers in resolving problems with the Bureau of Citizenship and Immigrations Service, identify areas in which individuals and employers have problems in dealing with USCIS, and to the extent possible, propose changes in the administrative practices of the USCIS to mitigate problems.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	2,797	3,097	2,723	(374)

**Privacy Office Mission Statement**

The Department of Homeland Security's Privacy Office protects the collection, use, and disclosure of personal and Departmental information. The Privacy Office ensures that appropriate access to information is consistent with the vision, mission, and core values of DHS, and implements the policies of the Department to defend and to protect the individual rights, liberties, and information interests of our citizens. Through internal education outreach and the establishment of internal clearance procedures and milestones for program development, the Privacy Office is helping DHS components to consider privacy whenever developing new programs or revising existing ones. The Privacy Office is evaluating the use of new technologies to ensure that privacy protections are given primary consideration in the development and implementation of these new systems. In this process, DHS professionals have become educated about the need to consider - and the framework for considering - the privacy impact of their technology decisions. The Chief Privacy Officer and the staff review Privacy Act system notices before they are sent forward and ensure that they collect only those records that are necessary to support DHS mission. The Privacy Office also guides DHS agencies in developing appropriate privacy policies for their programs and serves as a resource for any questions that may arise concerning privacy, information collection or disclosure.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change

Salaries and Benefits fund compensation directly related to duties performed for the Private Sector Office by Federal civilian employees. The FY2013 request reflects an increase of \$655,000 funded by a realignment from the Office of Policy to create the Office for State and Local Law Enforcement and \$3,000 for pay inflation of 0.5%.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
21.0 Travel	0	0	\$38	\$38

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2013 request is \$38,000 realigned from the Office of Policy to cover travel expenses.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
23.1 GSA rent	0	0	\$75	\$75

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2013 request reflects an increase of \$75,000 realigned from the Office of Policy to create the Office for State and Local Law Enforcement.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.1 Advisory and assistance services	0	0	\$8	\$8

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY2013 request reflects an increase of \$8,000 realigned from the Office of Policy to create the Office for State and Local Law Enforcement.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.2 Other services	0	0	\$10	\$10

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY2013 request reflects an increase of \$10,000 realigned from the Office of Policy to create the Office for State and Local Law Enforcement.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.3 Purchases from Gov't accts.	0	0	\$104	\$104

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from the DHS WCF, DHS Shared Services, and other government agencies including intra-agency service requirements. The FY2013 request reflects an increase of \$104,000 realigned from the Office of Policy to create the Office for State and Local Law Enforcement.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.6 Medical care	0	0	\$2	\$2

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY2013 request reflects an increase of \$2,000 realigned from the Office of Policy to create the Office for State and Local Law Enforcement.

**Office of International Affairs Mission Statement**

The Office of International Affairs (OIA) will report directly to the Secretary and will lead, coordinate, and integrate the Department's interaction with its international partners, and develop and oversee implementation of the Department's international engagement strategy. The Office of International Affairs will oversee visa waive negotiations via the Visa Waiver Program Office.

**Summary Justification and Explanation of Changes**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	-	-	3,177	3,177
12.1 Benefits	-	-	1,366	1,366
<b>Total, Salaries &amp; Benefits</b>	-	-	<b>4,543</b>	<b>4,543</b>

Salaries and Benefits fund compensation directly related to duties performed for the Private Sector Office by Federal civilian employees. The FY2013 request reflects an increase of \$4,543,000 that includes a realignment from the Office of Policy to create the Office of International Affairs and \$23,000 for pay inflation of 0.5%.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
21.0 Travel	0	0	\$351	\$351

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2013 request is \$351,000 realigned from the Office of Policy to cover travel expenses.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
23.1 GSA rent	0	0	\$628	\$628

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2013 request reflects an increase of \$628,000 realigned from the Office of Policy to create the Office of International Affairs.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.1 Advisory and assistance services	0	0	\$585	\$585

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY2013 request reflects an increase of \$585,000 realigned from the Office of Policy to create the Office of International Affairs.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.3 Purchases from Gov't accts.	0	0	\$1,765	\$1,765

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from the DHS WCF, DHS Shared Services, and other government agencies including intra-agency service requirements. The FY2013 request reflects an increase of \$1,765,000 realigned from the Office of Policy to create the Office of International Affairs.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.4 O&M of facilities	0	0	\$10	\$10

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY2013 request reflects an increase of \$10,000 realigned from the Office of Policy to create the Office of International Affairs.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.6 Medical care	0	0	\$4	\$4

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY2013 request reflects an increase of \$4,000 realigned from the Office of Policy to create the Office of International Affairs.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>26.0 Supplies and materials</b>	0	0	\$80	\$80

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c ) used to form a minor part of equipment or property, or other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY2013 request reflects an increase of \$80,000 realigned from the Office of Policy to create the Office of International Affairs.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>31.0 Equipment</b>	0	0	\$35	\$35

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY2013 request reflects an increase of \$35,000 realigned from the Office of Policy to create the Office of International Affairs.

## **K. DHS Balanced Workforce Strategy**

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce – both contracted and federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into Tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2014 budget.

OSEM requests \$0.0 and 0 FTE for the FY 2013 DHS Balanced Workforce Strategy.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **Departmental Management and Operations Under Secretary for Management**

### **I. Appropriation Overview**

#### **A. Mission Statement for Salaries and expenses:**

##### **Mission Statement**

The Management Directorate ensures delivery of effective and efficient business and management services throughout the Department, to enable the Department to achieve its mission to lead the unified national effort to secure America. It does so by providing policy, guidance, operational oversight and support, and innovative solutions for the management needs of the entire Department.

#### **B. Budget Activities:**

##### Departmental Management and Operations (DMO)

In addition to the specific organizations of the Management Directorate, DMO also includes the Office of the Chief Financial Officer (OCFO), the Office of the Chief Information Officer (OCIO), the DHS HQ Consolidation Project, and the Office of the Secretary and Executive Management (OSEM).

##### Immediate Office of the Under Secretary for Management

The Immediate Office of the Under Secretary for Management's primary mission is to provide leadership and oversight for all Departmental management functions, which include information technology, security, budget and financial management, procurement and acquisition, human capital, and administrative services.

##### Office of the Chief Administrative Officer

The Office of the Chief Administrative Officer (OCAO) provides mission support to operating Components by establishing policy and procedures as well as providing both Departmental leadership and oversight for all functional areas managed by the DHS CAO and Component Chief Administrative Officers. Functional areas include real estate, personal property, logistics, motor vehicle fleet, mail screening and delivery, environmental planning and management, historic preservation, and energy management. In addition, OCAO also provides the day to day operational support for Departmental Headquarters (HQ) and other HQ Components.

##### DHS Nebraska Avenue Complex Consolidation Project

The Nebraska Avenue Complex (NAC) currently serves as the headquarters facility for DHS, as well as the location for additional mission support functions. DHS continues to invest in this property to sustain our overall operational capabilities. The NAC investments will be leveraged as the Department

realigns the overall real estate portfolio to support the integration of DHS operations in the National Capital Region.

#### Office of the Chief Human Capital Officer

The Office of the Chief Human Capital Officer provides overall management and administration for the Department's human capital policies, programs, and practices for attracting, retaining, and developing the skilled workforce needed to protect and secure our Nation. The work of the OCHCO is critical to supporting and enabling the Secretary's workforce strategy, which centers around four key goals: 1) Building an effective, mission-focused, diverse and inspiring cadre of leaders; 2) Recruiting a highly qualified and diverse workforce; 3) Retaining an engaged workforce; and 4) Solidifying a unified DHS culture of mission performance, adaptability, accountability, and results.

#### Human Resources Information Technology

The DHS Chief Human Capital Officer (CHCO) and Component Human Capital Executives in partnership with the Office of the Chief Information Officer (OCIO) are currently redefining a long-term strategic plan for Human Resources Information Technology (HRIT). The new strategy will deliver an enterprise platform for a Title V environment that provides core HR functionality and data access across the DHS enterprise in a way that optimizes efficiency. An optimized solution must also address system shortcomings and limitations of the National Finance Center's (NFC) Pay and Personnel System. While DHS currently operates four enterprise solutions – NFC Corporate (Payroll/Personnel), EmpowHR (Personnel), webTA (Time and Attendance), and the eOPF (Electronic Personnel Folders) – there remains a critical need for enterprise solutions in areas such as staffing, learning management, performance management and personnel accountability for continued operations in the event of a declared emergency.

#### Office of the Chief Procurement Officer

The Office of the Chief Procurement Officer (OCPO) is responsible for the overall management, administration, and oversight of Department-wide acquisition, financial assistance, strategic sourcing, and competitive sourcing programs, including direct management and oversight of the Office of Procurement Operations. OCPO activities include acquisition support and oversight, strategic initiatives, and small and disadvantaged business utilization.

#### Office of the Chief Security Officer

The Office of the Chief Security Officer (OCSO) leads the collaborative security program to safeguard DHS people, information, and property so that the Department can secure the Homeland. The office develops, implements, and oversees the Department's security policies, programs, and standards; delivers security training and education to DHS personnel; and provides security support to DHS Components. The office manages operational security systems and HSPD-12 card issuance for the Department. Additionally, the OCSO provides liaison support to the intelligence community on security matters affecting DHS and investigates security matters for DHS Headquarters.

### **C. Budget Request Summary:**

The Under Secretary for Management (USM) requests 902 positions, 902 FTE and \$221.771 million for FY 2013. This is a net decrease of \$13.816 million from the FY 2012 enacted level. The USM adjustment-to-base includes:

- Increase of \$0.538M for FY 2013 pay increase.
- Increase of 14 FTE and \$2.011M for annualizations of prior year enhancements.
- Increase of \$4.927M for GSA rent.
- Increase of \$0.160M for Working Capital Fund (WCF) adjustments.
- Decrease of \$15.398M for Management Efficiencies.
- Decrease of \$4.492M for the offset to OCFO FSM.
- Decrease of \$2.010M for the transfer of functions from OCAO to OCIO.

<b>2013 Total Requested Budget Authority</b>	<b>17</b>	<b>17</b>	<b>3,112</b>
Total Change 2012 to 2013	2	2	562

The Immediate Office of the Under Secretary for Management (OUSM) requests 17 FTP, 17 FTE, and \$3.112 million for FY 2013. This is a net increase of \$0.562 million from the FY 2012 enacted level. The OUSM adjustment-to-base includes:

- Increase of 2 FTP/2 FTE and \$0.441M for the transfer of the Directives function from OCAO to OUSM.
- Increase of \$12K for FY 2013 pay increase.
- Increase of \$49K for GSA rent.
- Increase of \$160K for Working Capital Fund (WCF) adjustments.
- Decrease of \$100K for Management Efficiencies.
  - Decrease of \$6K for General TDY and Travel.
  - Decrease of \$45K for Purchasing Saving.
  - Decrease of \$1K for Overtime.
  - Decrease of \$14K for DHS Strategic Sourcing Initiatives.
  - Decrease of \$1K for HQ Admin Efficiency.
  - Decrease of \$33K through efficiencies (to include Other Services and Supplies).

**CURRENT SERVICES PROGRAM DESCRIPTION:**

OUSM ensures the offices within the Management Directorate function effectively and efficiently in support of the Department as a whole as well as the Management Directorate line-of-business offices.

The requested funding will allow the OUSM to: manage the workload of the Management Directorate offices; respond quickly to queries from within and outside the Department; further DHS efforts for functional integration; and identify and track performance measurements relating to the responsibilities of the Department.

The Office of the Chief Administrative Officer (OCAO) requests 124 FTP, 124 FTE, and \$35.117 million for FY 2013. This is a net decrease of \$5.583 million from the FY 2012 enacted level. OCAO adjustment-to-base includes:

- Decrease of \$4.269M to realign appropriate functions and personnel to other management offices.
- Increase of \$55K for FY 2013 pay increase.
- Increase of \$1.508M for GSA rent.
- Decrease of \$2.877M for Management Efficiencies.
  - Decrease of \$11K for General TDY and Travel.
  - Decrease of \$1.036 for Purchase Savings.
  - Decrease of \$53K for DHS Strategic Sourcing Initiatives.
  - Decrease of \$19,000 of Vehicles
  - Decrease of \$1.511M through efficiencies (to include Advisory and Assistance Services and Other Services).

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The primary mission and purpose of the OCAO is to provide Department level mission support to the operating Components through effective policy and guidance, business process, resource management, technical assistance, and oversight for efficient administrative services Department-wide, and direct operational support and services to Headquarters Components including NPPD, I&A, Operations, DNDO, and S&T. Functional areas include real estate, personal property, logistics, motor vehicle

fleet, mail screening and delivery, environmental planning and management, historic preservation, and energy management.

<b>2013 Total Requested Budget Authority</b>	-	-	<b>5,448</b>
Total Change 2012 to 2013	-	-	448

The DHS Headquarters Project at the Nebraska Avenue Complex (NAC) requests \$5.448 million for FY 2013. This is an increase of \$0.448 million over the FY 2012 enacted level. This funding request includes an adjustment-to-base of \$448K for ongoing NAC improvements, including the reconfiguration of space in several NAC buildings to increase utilization and to implement the Department’s Mobile Workforce Design.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The NAC currently serves as the headquarters facility for DHS. The NAC and other current locations continue to operate at nearly full capacity in order to meet the Department’s current space demands. DHS long-range plans include the retention of this property as one of the consolidated locations. Accordingly, DHS will need to continue to invest in this property to sustain our operational capabilities in order to use as one of the sites for DHS Components within the NCR. The NAC investments will be leveraged as the overall real estate portfolio is realigned to support DHS operations and integration in the NCR. In FY 2013, the Department will undertake and complete the following projects at the NAC:

- Planning and implementation for upgrades and reconfigurations of space – to support changing mission requirements – and any moves to and from consolidated locations that would change the composition of Components at the NAC.
- Continue Electrical and HVAC utility upgrades, back-up generators, along with ongoing maintenance painting and carpet replacement of DHS spaces.
- Reconfiguration of spaces in several NAC buildings to increase utilization and to implement Mobile Workforce Design.

The Office of the Chief Human Capital Officer (OCHCO) requests 122 FTP, 122 FTE, and \$25.971 million for FY 2013. This is a net increase of \$0.806 million from the FY 2012 enacted level.

OCHCO adjustment-to-base includes:

- Increase of 4 FTE/4 FTE and \$1.818M for the realignment of the Safety function from OCAO to OCHCO.
- Increase of \$82K for FY 2013 pay increase.
- Increase of \$752K for GSA rent.
- Decrease of \$1.846M for Management Efficiencies.
  - Decrease of \$33K for General TDY and Travel.
  - Decrease of \$5K for Purchasing Savings.
  - Decrease of \$2K for Overtime.
  - Decrease of \$77K for DHS Strategic Sourcing Initiatives.
  - Decrease of \$1.729M through efficiencies (to include Other Services and Purchase from Government Accounts).

**CURRENT SERVICES PROGRAM DESCRIPTION:**

OCHCO provides overall management and administration of the Department’s human capital policies, programs, and practices for attracting, retaining, and developing the skilled workforce needed to protect and secure our Nation. The future of this Department rests on the shoulders of our current and future leaders and requires participation from all DHS employees. DHS must build a strategic workforce planning capability to serve as the foundation for a balanced workforce and build a pipeline

of talent to ensure the continued development, recognition, and advancement of our current workforce. The OCHCO is committed to implementing the Secretary's Workforce Strategy, which outlines the human capital goals of the Department, and developing and implementing plans to address the inherent complexities and significant challenges the Department continues to face.

<b>2013 Total Requested Budget Authority</b>	<b>27</b>	<b>27</b>	<b>9,689</b>
Total Change 2012 to 2013	-	-	(4,483)

The Human Resources Information Technology (HRIT) requests 27 FTP, 27 FTE, and \$9.689 million for FY 2013. This is a net decrease of \$4.483 million from the FY 2012 enacted level. HRIT adjustment-to-base includes:

- Decrease of \$4.5M to offset funding for OCFO to fund high priority Financial Systems Modernization.
- Increase of \$9K for FY 2013 pay increase.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

HRIT supports the overall Mission of the Human Capital Business Systems (HCBS) portfolio to implement and manage a consolidated suite of modernized human resource information technology business solutions by means of leveraging current enterprise solutions, reducing redundancies, and increasing the functionality of HR systems across the Enterprise. HRIT funds plan for, acquire, configure, and implement Commercial off-the-Shelf/Government off-the-Shelf (COTS/GOTS) packages and eGOV/Human Resources Line-of-Business (eGov/HRLoB) shared services to consolidate, modernize, and/or replace HRIT systems at the Enterprise-level. The program is governed by the HRIT Executive Steering Committee (HRIT ESC), established per Deputy Secretary guidance, including oversight of a Human Capital Segment Architecture (HCSA) study. The goal of the study is to develop and implement a new strategy to deliver a more efficient consolidated suite of Enterprise-level HRIT solutions that will provide core HR functionality and data access across the DHS Enterprise. HCBS completed the study in FY 2011 and will develop a plan to initiate implementation of high priority Strategic Investment Opportunities (SIOs) in FY 2012.

Total Change 2012 to 2013	-	10	(4,824)

The Office of the Chief Procurement Officer (OCPO) requests 359 FTP, 359 FTE, and \$73.176 million for FY 2013. This is a net decrease of \$4.824 million from the FY 2012 enacted level. OCPO adjustment-to-base includes:

- Increase of \$217K for FY 2013 pay increase.
- Increase of 10 FTE and \$1.572M for the annualization of prior year enacted enhancements to the acquisition workforce for cost estimators, and the Program Accountability and Risk Management (PARM) division of OCPO.
- Increase of \$2.061M for GSA rent.
- Decrease of \$8.674M for Management Efficiencies.
  - Decrease of \$46K for General TDY and Travel.
  - Decrease of \$789K of Purchasing Savings.
  - Decrease of \$35K for DHS Strategic Sourcing Initiatives.
  - Decrease of \$7. 804M for efficiencies (to include Printing, Advisory and Assistance Services, Other Services, and Supplies).

**CURRENT SERVICES PROGRAM DESCRIPTION:**

OCPO activities include acquisition support and oversight, strategic initiatives, and utilization of small and disadvantaged businesses as described below.

Acquisition Support and Oversight

- Acquisition Workforce: Responsible for facilitating centralized hiring of the acquisition workforce including the Acquisition Professional Career Program for initial entry into select acquisition career fields and strategic acquisition workforce planning to ensure accession, development, and retention of a professional workforce.
- Operations Support: Principal liaison for the acquisition community.
- Acquisition Oversight: Responsible for developing and implementing a DHS acquisition oversight strategy in accordance with Management Directive (MD) 0784 and implementing internal controls for DHS's acquisition function in accordance with A-123.
- Program Management: Responsible for providing support to program managers DHS-wide and assisting in the development of a DHS-wide acquisition management system.

#### Strategic Initiatives

- Acquisition Policy and Legislation: Responsible for developing DHS acquisition regulations and policies, developing proposed acquisition legislation, and responding to proposed acquisition legislation.
- Competitive Sourcing and Privatization: Responsible for the Department's implementation of the *Federal Activities Inventory Reform (FAIR) Act of 1998*, the Revised OMB Circular A-76 and the President's Management Agenda (PMA) Competitive Sourcing Initiative.
- Strategic Sourcing and Acquisition Systems: Responsible for managing the DHS strategic sourcing program; developing corporate strategies for the acquisition of shared commodities to achieve efficiencies and economies of scale.

#### Office of Small and Disadvantaged Business Utilization (OSDBU)

- In support of the Small Business Act to maximize small business procurement opportunities, the OSDBU assists, counsels, and advises small businesses of all types on procedures for contracting with the DHS. Additionally, the OSDBU works closely with each Departmental organizational element to implement the Department's small business procurement assistance program.

A major management priority for OCPO in FY 2013 is the continued improvement of the DHS acquisition process. The Under Secretary for Management is leading an effort to improve the overall acquisition process, namely strengthening the early requirements development process and enhancing our ability to manage the implementation and execution of acquisition programs. The establishment and institutionalization of MD-102-01 and the Management Directorate's Acquisition Program Management Division (APMD) have been instrumental in helping the Department establish a foundation of acquisition practices to govern how to manage DHS acquisition investments.

OCPO has enhanced the Department's acquisition workforce by focusing on hiring systems engineers, program managers, logisticians and business cost estimators to ensure operational requirements are properly developed and provide greater oversight and accountability. This is consistent with previous recommendations from the Government Accountability Office (GAO), the Office of the Inspector General (OIG), and the Office of Management and Budget (OMB). OCPO continues managing the Acquisition Professional Career Program (APCP) to improve acquisition performance while providing effective governance and focused support to DHS's acquisition initiatives by providing experience and training to a corps of acquisition interns necessary to equip them to become journeymen-level acquisition professionals. OCPO is now fully utilizing sound and credible Life Cycle Cost Estimating

best practices within DHS acquisition programs. OCPO will continue its focus on strengthening the capabilities of the acquisition workforce through training and development initiatives, information technology enhancements, and acquisition management improvements consistent with the DHS acquisition human capital plan. OCPO continues its improvement to acquisition execution across the acquisition portfolio by ensuring key expertise resides in major programs and oversight staffs throughout the Department. OCPO has worked to increase the size of the Department's acquisition workforce, leading to better managed programs that meet cost, schedule, and performance goals. OCPO is investing \$6.8M in training programs to close specific gaps in such areas as source selection, logistics, and contract management, and to update selected tiers of coursework for contracting specialists, program management, business cost estimating, and contracting officer's technical representative (COTR) course offerings. OCPO will make targeted investments in existing systems that track and identify the acquisition workforce. With this additional management capacity, the Department will further solidify acquisition management leadership teams to help mitigate risk in daily program execution, and better determine how each program team should evolve to meet future needs.

In FY 2013, OCPO intends to continue workforce development in critical mission support programs such as strategic sourcing, acquisition program management, and cost estimating across the Department.

<b>2013 Total Requested Budget Authority</b>	<b>253</b>	<b>253</b>	<b>69,258</b>
Total Change 2012 to 2013	-	4	(742)

The Office of the Chief Security Officer (OCSO) requests 253 FTP, 253 FTE, and \$69.258 million for FY 2013. This is a net decrease of \$0.742 million from the FY 2012 enacted level. OCSO adjustment-to-base includes:

- Increase of \$163K for FY 2013 pay increase.
- Increase of 4 FTE and \$439K for the annualization of prior year enacted enhancements for the State, Local, Tribal and Private Sector (SLTPS), Security Management Division (SMD).
- Increase of \$557K for GSA rent.
- Decrease of \$1.901M for Management Efficiencies.
  - Decrease of \$3K for TDY and Travel.
  - Decrease of \$585K for Purchasing Saving.
  - Decrease of \$54K for Overtime.
  - Decrease of \$26K for DHS Strategic Sourcing Initiatives.
  - Decrease of \$59K for Vehicles.
  - Decrease of \$1.174M through efficiencies (to include Advisory and Assistance Services, Other Services, and Purchase from Government Accounts).

**CURRENT SERVICES PROGRAM DESCRIPTION:**

OCSO provides security personnel trained to lead, govern, integrate, and manage the security functions of the Department. The Chief Security Officer serves as the chair of the DHS CSO Council, in consultation with the head security officials for each Component. OCSO provides security solutions in support of DHS missions and objectives, and implements Department-wide security programs,

policies, and standards to effectively and efficiently safeguard DHS personnel, property, facilities, and information.

OCSO directly provides security services to the Components and offices within the DHS HQ organization. OCSO delivers effective business security support services to each Component of the DHS HQ organization through the integration of the following security disciplines:

- Administrative Security – implements and oversees policies, programs, and standards necessary to ensure the protection of collateral classified and sensitive but unclassified information; creates self-inspection programs that ensure classified and sensitive information is protected; and safeguards information for DHS, State and local fusion centers, major metropolitan police departments, and State emergency operations centers.
- Internal Security and Investigations – administers security audits, inspections, and investigations involving alleged crimes against DHS or its employees, and allegations of illegal activities by DHS personnel; provides investigative and liaison support to the intelligence community on security matters affecting DHS; and investigates security matters for DHS Headquarters.
- Special Security Programs – provides security policy oversight and programs to protect Sensitive Compartmented Information (SCI) and information received from the intelligence community; provides administrative, industrial, and operation security; delivers security education and training.
- Physical Security – manages and implements physical security policies, programs, and standards for DHS facilities; provides access control, physical barriers, surveillance equipment, and contract security forces.
- Personnel Security – provides personnel security and suitability policies, programs, and standards, including procedures for granting, denying, and revoking access to classified information; initiates and adjudicates personnel security and suitability background investigations and periodic reinvestigations of applicants and appointees.
- Systems Security – manages, supports, and coordinates the OCSO systems and related processes, and collaborates with the OCIO to secure the OCSO proprietary operational systems.
- Identity Management – implements the Homeland Security Presidential Directive 12 (HSPD-12) requirement for a common identification standard for federal employees and contractors.

### Office of the Chief Security Officer Mission Statement

OCSO leads the collaborative security program to safeguard the Department's people, information, and property so that the Department can secure the homeland. The office develops, implements, and oversees the Department's security policies, programs, and standards; delivers security training and education to DHS personnel; and provides security support to DHS Components. The office manages operational security systems and HSPD-12 card issuance for the Department. Additionally, the office investigates threats related to foreign intelligence, terrorism, and criminal activities within or directed against DHS.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	22,631	23,848	24,349	501
11.3 Other than full-time permanent	32	73	74	1
11.5 Other personnel compensation	1,144	1,177	1,145	(32)
12.1 Benefits	6,631	7,040	7,172	132
<b>Total, Salaries &amp; Benefits</b>	<b>30,438</b>	<b>32,138</b>	<b>32,740</b>	<b>602</b>

The Office of the Chief Security Officer requests \$32,740,000 million to fully fund and support 253 FTEs providing leadership, operational services, and business support to the Department's collaborative security program in FY 2013. This is a net increase of \$602,000 from the FY2012 base is due to FY2012 Enacted enhancements and the FY 2013 pay increase. The requested level also includes some reductions taken as part of the management efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>21.0 Travel</b>	<b>\$286</b>	<b>\$255</b>	<b>\$252</b>	<b>-\$3</b>

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The requested level includes reductions of \$3,000 taken as part of the management efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>23.1 GSA rent</b>	<b>\$2,602</b>	<b>\$3,338</b>	<b>\$3,895</b>	<b>\$557</b>

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2013 Request includes an increase of \$557,000 for increased space requirements for OCSO.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.1 Advisory and assistance services</b>	<b>\$16,433</b>	<b>\$8,705</b>	<b>\$8,038</b>	<b>-\$667</b>

This request funds the technical, administrative, and security systems contractor support provided to the office in FY 2013. The requested level includes reductions taken as part of the management efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.2 Other services</b>	<b>\$112</b>	<b>\$112</b>	<b>\$53</b>	<b>-\$59</b>

This request funds the DHS Executive Sedan service and professional training for employees. The requested level includes reductions taken as part of the management efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.3 Purchases from Gov't accts.	\$20,357	\$24,128	\$23,041	-\$1,087

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The request will fully fund the anticipated costs for the OPM background investigations and working capital fund services. The requested level includes reductions taken as part of the management efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.4 O&M of facilities	\$154	\$154	\$157	\$3

This funds the OCSO portion of the Consolidated Remote Delivery System (CRDS) mail service provided as a shared service by the Office of the Chief Administrative Officer. This request includes a \$3,000 increase from the FY 2012 base to cover increased estimated costs.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.6 Medical care	\$14	\$14	\$13	-\$1

This funds the OCSO portion of the Federal Occupational Health shared service provided by the Office of the Chief Administrative Officer. This request is \$1,000 less than the FY 2012 base amount.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
26.0 Supplies and materials	\$463	\$320	\$310	-\$10

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use; (b) converted in the process of construction or manufacture; (c) used to form a minor part of equipment or property; or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. This request funds the OCSO for micropurchases in support of mission requirements. This is a \$10,000 decrease from the FY 2012 base due to reprioritization of program funding.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
31.0 Equipment	\$726	\$750	\$673	-\$77

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. This request funds OCSO equipment requirements. This is a decrease of \$77,000 from the FY 2012 due to a reprioritization of program funding for management efficiencies.

**Office of the Chief Procurement Officer Mission Statement**

Office of the Chief Procurement Officer (OCPO) establishes the acquisition regulations, policies and procedures for DHS. It oversees the Department' acquisition programs and assists the acquisition community with implementing difficult and complex procurements to reduce risk and ensure success. OCPO has implemented a centrally funded and managed Acquisition Professional Career Program modeled after the highly successful Navy Intern Program. This program features three, single-year rotations through various components and provides Interns with experience and training necessary to become journeymen-level acquisition professionals. Additionally, OCPO strategically sources common items across DHS to create more efficient procurements, manage DHS's competitive sourcing actions, and reports externally on DHS progress. OCPO in tandem with the Office of Human Resources sets forth responsibilities and procedures for implementing acquisition workforce planning, centralized acquisition workforce recruitment, and training, for the acquisition career field across the Department. OCPO also conducts Department-wide assessments to determine gaps in key acquisition disciplines.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	29,134	31,057	32,383	1,326
11.3 Other than full-time permanent	267	288	300	12
11.5 Other personnel compensation	790	852	888	36
12.1 Benefits	9,110	9,704	10,118	414
<b>Total, Salaries &amp; Benefits</b>	<b>39,301</b>	<b>41,901</b>	<b>43,689</b>	<b>1,788</b>

This change includes the FY 2013 pay increase, and the annualization of FY2012 enacted enhancements.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>21.0 Travel</b>	<b>\$295</b>	<b>\$290</b>	<b>\$244</b>	<b>-\$46</b>

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The requested level includes reductions taken as part of the Management efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>23.1 GSA rent</b>	<b>\$1,805</b>	<b>\$1,895</b>	<b>\$3,956</b>	<b>\$2,061</b>

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2013 Request includes an increase of \$2,061,000 for increased space requirements for OCPO.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>24.0 Printing</b>	<b>\$84</b>	<b>\$75</b>	<b>\$52</b>	<b>-\$23</b>

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2013 Request for printing is a \$23,000 decrease from FY 2012 levels. The requested level includes reductions taken as part of the management efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.1 Advisory and assistance services</b>	<b>\$169</b>	<b>\$154</b>	<b>\$129</b>	<b>-\$25</b>

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The requested level includes reductions taken as part of the management efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.2 Other services	\$27,640	\$28,074	\$17,374	-\$10,700

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The requested level includes reductions taken as part of the management efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.3 Purchases from Gov't accts.	\$4,113	\$4,733	\$6,935	\$2,202

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2013 Request includes a net increase of \$2,202,000 due to anticipated increases in Working Capital Fund charges.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
26.0 Supplies and materials	\$723	\$716	\$635	-\$81

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The requested level includes reductions taken as part of the management efficiencies.

**HRIT Mission Statement**

The HRIT Investment's mission is to implement and manage a consolidated suite of modernized HRIT business solutions, reducing redundancies and increasing the functionality of HR systems across the Enterprise. HRIT funds the planning, acquisition, configuration, and implementation of COTS/GOTS packages and eGov/HRLoB shared services to consolidate, modernize, and/or replace HRIT systems at the Enterprise-level. The program is governed by the HRIT Executive Steering Committee (ESC), established per Deputy Secretary guidance. Once IT solutions have been acquired and deployed to DHS components, their Operations and Maintenance (O&M) is funded via Component contributions to Working Capital Funds (WCF).

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	916	1,181	1,190	9
11.3 Other than full-time permanent	4	5	5	-
11.5 Other personnel compensation	5	6	6	-
12.1 Benefits	254	327	327	-
<b>Total, Salaries &amp; Benefits</b>	<b>1,179</b>	<b>1,519</b>	<b>1,528</b>	<b>9</b>

Salaries and Benefits includes costs for 27 FTEs. The FY 2013 Request includes an increase in personnel compensation to fund the FY 2013 2013 pay increase.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change

## K. DHS Balanced Workforce Strategy

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce – both contracted and federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into Tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2014 budget.

Position Type	FY 2011 Actual Obligations		FY 2012 Base		FY 2012 Annualization		FY 2012 Follow On		FY 2013 Increase		TOTAL FY2011 – FY2013 DHS Balanced Workforce Strategy

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **Departmental Management and Operations Office of the Chief Financial Officer**

### **I. Appropriation Overview**

#### **Mission Statement**

The mission of Office of the Chief Financial Officer (OCFO) is to ensure that the funds necessary to carry out the Department's mission are obtained, allocated, and expended in accordance with the Department's priorities and relevant law and policies, and to provide guidance and oversight of the Department's budget, financial management, and resource management systems.

The DHS Chief Financial Office (OCFO) goals are to:

- Provide timely, accurate, useful, and actionable financial information to decision makers and stakeholders.
- Provide assurance that internal controls are effective.
- Provide efficient financial management services and operations.
- Develop program plans and budgets that are well-justified and balanced to support DHS priorities.
- Strengthen DHS financial management systems.
- Recruit, develop, and retain a talented workforce to achieve the OCFO mission.
- Strengthen financial assistance accountability.

#### **B. Budget Activities:**

Under OCFO, the following Divisions fulfill these functions:

##### Budget:

- Issue guidance to the Department's Components to ensure that all phases of budget formulation and execution are efficiently completed;
- Ensure technical accuracy of budget-related materials;
- Determine that sufficient resources are available to support activities of the appropriate fiscal year;
- Administer the Department's budget, appropriations, and expenditures of funds;
- Work with Program Analysis & Evaluation (PA&E) and DHS Components to formulate annual budget submissions, ensure these properly reflect DHS requirements, and assist in the presentation and defense of submissions to the Office of Management and Budget (OMB) and Congress;
- Coordinate and review budget execution for each Component and appropriation, conduct spend plan and execution reviews, and act on requests for modifications;

- Conduct special studies and analyses of execution of financial plans and recommend reprogrammings as necessary for effective funds utilization;
- Prepare budgetary reports as necessary or as required by OMB and Congress;
- Prepare the Secretary to testify on the budget request and coordinate responses to Questions for the Record;
- Track and monitor status of reports to Congress required by appropriations bills;
- Ensure technical accuracy and consistency of Component budget materials in accordance with OMB or Congressional guidance;
- Manage and coordinate Components' input into MAX, the on-line budget preparation data system;
- Analyze budgetary impact of pending legislation, and review reports to Congress, testimony, and other documents; and,
- Coordinate and review apportionments, reappropriations, and allotments for all DHS appropriations.

Program Analysis and Evaluation (PA&E):

- Develop and perform analyses and evaluations of alternative plans, programs, personnel levels, and budget submissions for the Department in relation to homeland security objectives, projected threats, vulnerability assessments, estimated costs, resource constraints, and the most recent homeland security strategy;
- Provide guidance and oversee the development of the Future Years Homeland Security Program (FYHSP) of the Department;
- Lead the performance measurement and reporting for DHS mission-oriented programs, and oversee preparation of the DHS performance plan and other performance reporting;
- Integrate performance measurement into strategic planning, resource allocation, program evaluation, evaluation of management personnel, and the culture of DHS;
- Act as the Deputy Program Improvement Officer (PIO) in order to supervise performance management activities, provide advice on program performance goals, convene responsible parties to assess and improve program performance, and guide the use of performance measures in personnel performance appraisals;
- Develop and promote improved analytical tools and methods for analyzing homeland security planning and the allocation of resources;
- Establish policies for and oversee the integration of the planning, programming, and budgeting system of the Department; and,
- Coordinate with and support the Office of Policy on DHS long-term strategic planning.

Financial Management:

- Develop and oversee Departmental financial management policy;
- Provide guidance for and oversee Financial Systems Modernization (FSM) efforts in conjunction with the Resource Management Transformation (RMT) division;
- Coordinate the Department's participation in government-wide financial management initiatives;

- Manage the DHS Treasury Information Executive Repository (TIER);
- Prepare the Department's consolidated financial statements and other required financial information, including the Annual Financial Report;
- Provide guidance and oversight to DHS Components on accounting and financial reporting requirements, and coordinate the annual audit of the Department's financial statements included in the Annual Financial Report; and,
- Administer the DHS Bankcard Program (purchase, travel, and fleet), develop and document bankcard policy, provide training and internal controls to provide reasonable assurance that the objectives of the Bankcard Program are met, and ensure that fraudulent or improper use and untimely payment are identified in a timely manner and appropriate corrective action is taken.

Internal Control Management Office:

- Implement the *Federal Managers' Financial Integrity Act* and its guidelines, *OMB Circular A-123: Management's Responsibility for Internal Control*, the *Chief Financial Officers Act*; the *DHS Financial Accountability Act*, and the *Improper Payments Information Act*;
- Lead the Department's assessment of internal controls;
- Coordinate the development and implementation of Mission Action Plans to address material weaknesses and other significant conditions;
- Issue guidance on and coordinate preparation of the Secretary's year-end Internal Control Assurance Statements; and,
- Conduct reviews of key financial processes to ensure internal controls are operating effectively, with the goal of identifying weaknesses before they become problems.

Financial Assistance Policy and Oversight:

- Advise senior DHS leadership regarding the situation-specific application of government-wide statutes, regulations, OMB circulars, Executive Orders, and DHS Financial Assistance Policy as these relate to use of federal funds;
- Define the DHS Financial Assistance Line of Business, including streamlining and standardizing business models and business processes and developing supporting technology;
- Lead the development of a DHS-wide, end-to-end financial assistance (grants) management system to ensure a transaction audit trail and improve financial assistance award reporting;
- Develop and distribute DHS Financial Assistance Policy for use across DHS to communicate legal requirements, regulation, circulars, Executive Directives, Comptroller General Decisions, and other legal issuances related to the use of federal funds;
- Provide oversight to ensure DHS and recipient compliance with requirements regarding the use of federal funds;
- Assess OMB Circular A-133: Audits of States, Local Governments and Non-Profit Organizations high risk audit findings, resolve high risk findings backlog, and develop Cost Policy to assist recipients in avoiding repeat high risk findings;

- Gather award data across Components to meet the reporting requirements of the Federal Financial Accountability and Transparency Act of 2006;
- Increase the accuracy, timeliness, and reliability of all DHS financial assistance award data, and ensure any end-to-end system has auto reporting capabilities, including file transfer to public venues and robust ad hoc query capability;
- Develop and maintain Grant Officer/Assistance Officer standards and qualifications; and,
- Articulate the steady state for an adequate centralized DHS Financial Assistance Policy and Oversight function.

Financial Operations:

- Oversee all aspects of budget formulation and execution for Components under Title I of the DHS Appropriations Act, except for the Office of the Inspector General (OIG) and Analysis and Operations (A&O) appropriations;
- Provide budget execution, accounting, and financial management and reporting services for Title I Components, except OIG and A&O, including managing apportionments, allotments, funds certifications, invoice processing, general ledger, payroll reconciliations, bank card, and travel;
- Oversee and manage the Department-wide Working Capital Fund (WCF);
- Perform internal audits and audit follow-up for Title I Components; and,
- Provide reasonable assurance on internal controls over financial reporting and internal controls over operations.

GAO and OIG Audit Liaison:

- Coordinate the Department's engagement in Government Accountability Office (GAO) and Office of the Inspector General (OIG) audits, including entrance and exit conferences, and the Department's response to audit reports and findings;
- Track audit recommendations and the Department's implementation of those recommendations; and,
- Provide oversight and guidance to Component-level GAO and OIG audit liaison offices and to DHS employees involved in audits, investigations, and inspections.

Resource Management Transformation:

- Manage the E-Gov travel implementation for DHS;
- Provide guidance for and oversee Financial Systems Modernization (FSM) efforts in conjunction with the Financial Management (FM) division; and,
- Oversee and develop business intelligence activities and capabilities including developing executive reporting capabilities and implementing tracking databases.

Workforce Development:

- Provide the training and tools to support personal performance and career path development, and execute talent management initiatives to recruit the next generation of financial management leaders;
- Provide experiences and opportunities designed to establish a strong foundation in financial management disciplines to optimize career building at DHS; and,

- Create a pipeline of strong candidates for senior financial management leadership roles at DHS.

**C. Budget Request Summary:**

The OCFO requests \$55.414 million, 212 full-time positions (FTP) and 212 full-time equivalents (FTE). This is an increase of \$4.554 million from the FY 2012 Enacted Budget. The total program changes include 0 FTE and \$6.7 million for the Financial Systems Modernization effort.

Total Change 2012 to 2013	-	-	4,554

PPA: Office of the Chief Financial Officer

The Office of the Financial Officer (OCFO) requests \$55.414 million, 212 FTP, and 212 FTE for Fiscal Year (FY) 2013.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

OCFO ensures that the funds necessary to carry out the Department’s mission are obtained, allocated, and expended in accordance with the Department’s priorities and relevant law and policies. This mission is supported by the Budget, PA&E, and Financial Operations divisions. OCFO also provides guidance and oversight of the Department’s budget, financial management, and resource management systems. This guidance and oversight are supported by the Financial Management, Internal Controls, Financial Assistance Policy and Oversight, GAO and OIG Audit Liaison, Resource Management Transformation, and Workforce Development divisions.

OCFO will achieve efficiencies through the timing of replacing personnel lost through attrition, strategic sourcing, and information technology infrastructure reductions. OCFO will achieve the OMB/OFPP directed purchasing savings and advisory and assistance services savings by reducing funding placed on contracts, relying on Federal staff to assume contractor responsibilities wherever possible, and reducing purchasing of supplies and equipment.

Adjustments-to-base include:

- Increase of \$144K for the FY 2013 Pay Increase.
- Increase of \$53K for the annualization of one half FTE for the FY 2012 enhancement for the CFO Special Access Program Control Office (SAPCO).
- Increase of \$966K for additional Working Capital Fund expenditures.
- Decrease of \$3.120M for management efficiencies:
  - Decrease of \$9K for General TDY and Travel;
  - Decrease of \$145K of Purchasing Saving;
  - Decrease \$10K of Overtime;
  - Decrease of \$6K for DHS Strategic Sourcing Initiative; and
  - Decrease of \$2.950M through efficiencies (to include Advisory and Assistance Services and Supplies).
- Decrease of \$189K for Working Capital Fund Rent.

## IV. Program Justification Changes

**Department of Homeland Security  
Departmental Management and Operations  
Office of the Chief Financial Officer  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 1:** Financial Systems Modernization  
PPA:  
Program Increase: Positions 0, FTE 0, Dollars \$6,700

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	6,700
<b>Total Request</b>	-	-	<b>3,992</b>	-	-	-	-	-	<b>6,700</b>

**Description of Item**

The request supports financial systems modernization requirements at DHS, specifically completing implementation of a new core financial system at the Federal Emergency Management Agency (FEMA) in FY 2013. Funding will be used for the implementation and migration to a new financial system that will deliver core accounting functionality. OCFO is working closely with FEMA during the migration to ensure use of standardized business processes and internal controls, implementation of a common line of accounting, and maintenance of data quality standards.

**Justification**

Incorporating lessons learned from other agencies and prior DHS modernization efforts, the Department now plans to target those Components with urgent financial systems modernization requirements over the next few years, using a decentralized approach and in close collaboration with the Office of Federal Financial Management. Financial systems modernization efforts within DHS will focus on providing a solution that is already operational in the Federal space. DHS has chosen FEMA as the first target for modernization, after a Department-wide evaluation revealed it to be the Component with the greatest immediate need.

FEMA’s current financial system lacks basic key financial functions which drive accounts receivables and budgets. FEMA is also experiencing a number of reporting issues and lacks the ability to pull basic financial reports without substantial manual intervention, and is operating at or near 100% of capacity on a continuous basis. The situation is exacerbated when FEMA is operating during a state of

national disaster, or an event of national significance. A new financial system is needed to be able to accurately account for, track, and report on FEMA resources, and meet minimum federal financial system processing requirements.

### **Impact on Performance**

Strong financial management and accounting systems are a fundamental prerequisite to allow the Department to meet its strategic and operational goals. The successful implementation of the Financial Systems Modernization program will directly support the missions of the Department as described in the Quadrennial Homeland Security Review, and further the Departmental goal to continue to mature and strengthen the homeland security enterprise. If funded, this request will allow FEMA to have a system that enables accurate and timely financial reporting, facilitates clean audit opinions, addresses systems security issues, and remediates financial control and financial system weaknesses.

## **V. Exhibits and Other Supporting Material**

### **A. Justification of Proposed Legislative Language**

#### **Appropriation Language**

For necessary expenses for enforcement of the Office of the Chief Financial Officer as authorized by section 103 of the Homeland Security Act of 2002 (6 U.S.C. 113), [\$50,860,000] \$55,414,000 of which [\$0] \$6,700,000 shall remain available until expended for financial systems modernization.

#### **Explanation of Changes:**

No substantive changes.

### Office of the Chief Financial Officer Mission Statement

The mission of the Office of the Chief Financial Officer (OCFO) is to provide guidance and oversight of the Department's budget, financial management, investment review, and resource management systems to ensure funds necessary to carry out the Department's mission are obtained, allocated, and expended in accordance with the Department's priorities and relevant law and policies.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	19,194	22,605	22,847	242
11.3 Other than full-time permanent	330	341	352	11
11.5 Other personnel compensation	582	603	622	19
12.1 Benefits	5,679	5,861	6,043	182
<b>Total, Salaries &amp; Benefits</b>	<b>25,785</b>	<b>29,410</b>	<b>29,864</b>	<b>454</b>

Salaries and Benefits includes costs for 212 FTEs. The FY 2013 request includes an increase \$106,000 for the annualization of 1 FTP for the FY2012 SAPCO enhancement, the FY 2013 pay increase, and a decrease of \$10,000 in Overtime Costs due to management efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>21.0 Travel</b>	<b>\$37</b>	<b>\$38</b>	<b>\$29</b>	<b>-\$9</b>

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2013 request includes a decrease of \$9,000 due to management efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>23.1 GSA rent</b>	<b>\$2,794</b>	<b>\$2,935</b>	<b>\$2,746</b>	<b>-\$189</b>

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2013 request includes a decrease for Working Capital Fund expenditures.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.1 Advisory and assistance services</b>	<b>\$14,659</b>	<b>\$34,742</b>	<b>\$16,475</b>	<b>-\$18,267</b>

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2013 request reflects a decrease due to management efficiencies, reduced contract funding, and a decrease due to FY 2011 Carryover funding from the Financial Systems Modernization effort (formerly known as TASC) being consumed in FY 2012.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.3 Purchases from Gov't accts.</b>	<b>\$4,739</b>	<b>\$4,839</b>	<b>\$5,028</b>	<b>\$189</b>

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2013 request includes an increase for Working Capital Fund expenditures.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
26.0 Supplies and materials	\$150	\$155	\$120	-\$35

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2013 request includes a reduction due to management efficiencies.

## I. Changes In Full Time Equivalent

## **K. DHS Balanced Workforce Strategy**

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce – both contracted and federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into Tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2014 budget.

OFFICE OF THE CHIEF FINANCIAL OFFICER requests \$0.0, 0 FTP, and 0 FTE for the FY 2013 DHS Balanced Workforce Strategy.

## **BUDGET REQUEST AND SUPPORTING INFORMATION**

### **Departmental Management and Operations Office of the Chief Information Officer**

## **I. Appropriation Overview**

### **A. Mission Statement for Office of the Chief Information Officer:**

The Department of Homeland Security (DHS) Office of the Chief Information Officer (OCIO), in collaboration with the DHS Chief Information Officer Council, is responsible for implementing the programs necessary to align DHS's Information Technology (IT) personnel, resources, and assets, including all systems and infrastructure, to support Department-wide missions and activities. OCIO's mission is to provide DHS and its partners with the IT services required to lead a unified national effort to prevent and deter terrorist attacks as well as protect against and respond to threats and hazards to the Homeland.

The Department's goals and priorities will advance IT capabilities and services as follows:

- Establish secure IT services and capabilities to protect the Homeland and enhance our Nation's preparedness, mitigation, and recovery capabilities.
- Strengthen and unify the Department's ability to share information and services internally and with Federal, State, local, tribal, international, and private industry partners.
- Improve IT service and program performance, transparency, accountability, and efficiencies through effective governance and enterprise architecture (EA).
- Develop and implement a comprehensive approach to IT employee recruitment, development, retention, and recognition to ensure that the right personnel and skill sets are in place to achieve Department-wide excellence in IT delivery.

These goals directly align to the Office of Management and Budget's (OMB) *25 Point Implementation Plan to Reform Federal Information Technology Management*. Specifically, the DHS CIO is committed to implementing modular system development, improving performance on IT programs, implementing a "Cloud First" policy, and reducing the number of Federal data centers. As a result, DHS has implemented OMB's TechStat review process for troubled IT programs. This process has improved the transparency of program health across the Department and is focused on identifying program risks and failures and taking corrective action in alignment with the tenets of IT reform. OCIO is driving consolidation of commodity IT, in particular IT infrastructure. Based on this consolidation activity, the overall Department FY 2013 budget request for IT infrastructure is reduced by 10 percent across all Components.

Per OMB memorandum M-11-29, *Chief Information Officer Authorities*, the role of Agency CIOs are changing from policymaking and infrastructure maintenance to managing by portfolio to deliver IT enterprise-wide solutions. The DHS CIO is directed to drive program and portfolio governance by developing and executing an investment review process and eliminating

duplicative investments across the Department. The OCIO is also responsible for implementing an enterprise information security program to protect sensitive mission data through continuous monitoring, developing an enhanced risk assessment process, and conducting CyberStat reviews. OCIO is also committed to recruiting talented, capable IT program managers that are held accountable for the performance of IT programs.

## **B. Budget Activities:**

OCIO activity functions are divided into four major Programs, Projects, and Activities (PPAs):

### **Salaries and Expenses**

Salaries and Expenses is a crosscutting program that provides executive leadership, technology management, and support acquisition and financial functions to all offices within the OCIO. It covers payments for shared services consumed, such as rent, mail services, contracting support, and financial management support received from other management chiefs' offices. Salaries and Expenses covers the IT security function, which sets IT security policy, and provides security architecture, certification and accreditation (C&A) remediation, Federal Information Security Management Act (FISMA) compliance and oversight, operations and maintenance (O&M) for legacy infrastructure and new infrastructure investments, and IT awareness and training programs. Salaries and Expenses includes the Office of Accessible Systems and Technology (OAST), which provides guidance and oversight to all DHS Components on implementing and maintaining initiatives to ensure electronic and technological information is accessible to DHS employees and customers with disabilities. Effective in FY 2012, all OCIO FTE are accounted for in the Salaries and Expenses PPA.

### **Information Technology Services**

Information Technology Services (ITS) supports development, implementation, and maintenance of IT functional services, including enterprise architecture (EA), enterprise data management, information sharing, IT strategic policy and planning, performance measurement, capital planning and investment control (CPIC), and program/portfolio management. It also covers geospatial technologies, application delivery, enterprise hosting, and portal consolidation.

### **Infrastructure and Security Activities**

Infrastructure and Security Activities (ISA) are a set of IT projects that provide integration and protection of sensitive DHS information. In FY 2013, the DHS OCIO will continue to consolidate disparate data centers into two DHS Data Centers and multiple disparate networks into DHS OneNet. ISA funds manage infrastructure support, which includes support for network and data center services and DHS Component enterprise applications. ISA also provides funds to maintain Trusted Internet Connection (TIC) capability and move all network traffic behind the TIC. The DHS OCIO's immediate and long-term goal is to protect the Department's IT resources from cyber threats, provide One DHS Infrastructure platform, and foster information sharing across the Department and with external stakeholders, such as Federal, State, and local government agencies and their partners.

### **Homeland Secure Data Network**

The Homeland Secure Data Network (HSDN) is a single program within DHS that enables agencies to collaborate and communicate effectively at a SECRET-classified level among Federal and State governments and supporting entities. HSDN provides the capabilities to enable DHS to electronically collect, disseminate, and exchange both tactical and strategic SECRET-level information throughout DHS and between DHS and its partners.

### **C. Budget Request Summary:**

The OCIO requests \$312.643M and 283 FTP/283 FTE for the FY 2013 Budget. The total net Adjustments-to-Base is a decrease of \$79.454M, and a net increase of 9 FTP/12 FTE. The Adjustments-to-Base are as follows:

- Transfer from OCAO of the Records, Forms & Printing function; \$2.010M and 9 FTP/FTE.
- Annualization of 3 FTE for the Acquisition Workforce Strategy and OAST for an increase of \$0.759M.
- Increase of \$0.200M for FY 2013 pay raise.
- Decrease of \$70.0M in non-recurring data center migration costs.
- Decrease of \$12.423M through efficiencies (to include Advisory and Assistance services and the Operation and Maintenance of Equipment).

## II. Summary of FY 2013 Budget Estimates by Program/Project Activity (PPA)

### III. Current Services Program Description by PPA

**Department of Homeland Security**  
**Departmental Management and Operations**  
**Office of the Chief Information Officer (OCIO)**  
**Salaries and Expenses**  
**Program Performance Justification**  
(Dollars in Thousands)

**PPA: Salaries and Expenses**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	<b>195</b>	<b>140</b>	<b>86,657</b>
<b>2012 Enacted Budget Authority</b>	<b>274</b>	<b>271</b>	<b>105,500</b>
2013 Adjustments-to-Base	9	12	15,170
<b>2013 Current Services</b>	<b>283</b>	<b>283</b>	<b>120,670</b>
<b>2013 Total Requested Budget Authority</b>	<b>283</b>	<b>283</b>	<b>120,670</b>
Total Change 2012 to 2013	9	12	15,170

**PPA: Salaries & Expenses**

The OCIO requests \$120.670 million for this activity. The Adjustments-to-Base include: annualization of Acquisition Workforce and OAST positions, transfer of the Records, Forms & Printing function from the Office of the Chief Administration Officer, realignment of Working Capital Fund OCIO expenses from other OCIO PPAs into Salaries and Expenses, DHS enterprise-wide efficiencies, administrative savings, and a FY 2013 pay raise.

The Adjustments-to-Base are as follows:

- Transfer from OCAO of the Records, Forms & Printing function; \$2.010M and 9 FTP/FTE.
- OCIO WCF realignment from ITS, ISA and HSDN PPAs for an increase of \$17.441M and 0 FTP/FTE in the S&E PPA.
- Annualization of 3 FTE for the Acquisition Workforce Strategy and OAST for an increase of \$0.759M.
- Increase of \$0.200M for FY 2013 pay raise.
- Decrease of \$5.240M for Management Efficiencies.
  - Decrease of \$133K for General TDY and Travel.
  - Decrease of \$108K for purchasing savings.
  - Decrease of \$1K for overtime.
  - Decrease of \$5K for DHS Strategic Sourcing Initiatives.

- Decrease of \$4.993M through efficiencies (to include Advisory and Assistance Services).

## **CURRENT SERVICES PROGRAM DESCRIPTION:**

The Salaries and Expenses PPA provides funds to the following five programs and offices: Information Security, Infrastructure Operations, Applications Operations & Maintenance, Infrastructure Transformation Program Operations, Office of Accessible Systems and Technology.

### **Information Security Program**

Through the Information Security Program, the Chief Information Security Officer (CISO) ensures existence of a secure and trusted computing environment, which enables the Department to use its information systems resources effectively to accomplish the Department's missions.

The Information Security Program ensures protection of sensitive information and allows sharing of all mission-related data. It also ensures compliance with the Federal Information Security Management Act (FISMA) and with National Institute of Standards and Technology (NIST) security policies and requirements. The Information Security Program develops and documents Departmental information security requirements; develops enterprise security management tools; and oversees the implementation of information security systems supporting Departmental Operations.

Specifically, the Information Security Program provides:

- **Security Policy** and guidance to ensure protection of DHS information resources that protect the Homeland. The CISO provides a waiver and exception process to document and manage mitigation of system control weaknesses. The program also develops the Department-wide system configuration guidance that provides baseline security configuration for the Department's hardware and software.
- **Security Architecture** that supports development of secure enterprise information-sharing capabilities and their integration with the DHS Enterprise Architecture Technical Reference Model (TRM), System Engineering Life Cycle (SELC) methodology, and the Capital Planning and Investment Control (CPIC) and acquisition processes. The CISO supports the Department's mission by protecting its information and IT resources (e.g., systems, network resources, and supporting data).
- **Security Strategy** to ensure a secure, reliable, and trusted computing environment for effectively sharing information. The CISO communicates the information security strategic plan to Components, facilitates Cyber Knowledge Management for information reuse and increased efficiency, gathers information security requirements, and drives implementation of the Department's strategic information security plan through coordination between Component information security organizations and the DHS CIO.
- **Compliance and Technology** that includes oversight, measurement, validation, and reporting of information systems security throughout the Department, including management of the FISMA System Inventory, Security Authorizations (SAs) and Plan of Actions and Milestones (POA&Ms), and IT audit management and Federal reporting. This

includes FISMA reporting and the implementation of continuous monitoring for the Department.

- **DHS IT Security Awareness, Training, and Education** to ensure DHS complies with all Federal regulations and OMB and NIST guidance governing IT security training, and Departmental standardization of security training content development.
- **National Security Systems Risk Management** to support risk acceptance and system authorization decisions. The program supports secure integrated operations of classified systems and National Security Information across the Department. It also evaluates the operational risk posture and formulates effective risk management strategies and mitigations.

### **Infrastructure Operations**

Infrastructure Operations (IO) includes initiatives for IT security and continuity operations, providing alternate sites with necessary IT communications capabilities to support emergency operations during periods of activation by the President or the DHS Secretary for Continuity of Operations (COOP).

It is critical that DHS and its Components ensure information residing, created, received, transmitted within, and shared by the Department is secured in a manner compliant with Federal Acts, Memorandums, Circulars, Executive Orders, and Presidential Directives. OCIO has a leadership role in meeting legislative requirements and Executive directives regarding information security and using best practices to ensure the viability of systems supporting DHS business missions. OCIO is also responsible for ensuring systems and accompanying security controls and measures are functional and active, which is accomplished through use of security software residing on the DHS network.

In accordance with *Presidential Decision Directive 67, Federal Continuity Directive 1 (FCD1)* and *Homeland Security Presidential Directive (HSPD)-20: National Continuity Policy*, Federal agencies are mandated to develop COOP plans. A COOP facilitates the performance of, and is crucial to, the business continuity of the Department's critical systems. A COOP functions during an emergency or any other situation that may disrupt normal operation.

### **Applications Operations & Maintenance (AO&M)**

The AO&M Program maintains and oversees the Department's Private Cloud. Services include the development, test, and production environments within both DHS enterprise data centers (EDCs) to support enterprise application services. The AO&M Program provides ongoing O&M of enterprise application services, and implements necessary controls and procedures to enable cost-effective delivery of secure services. AO&M also provides operational support for the Department's first Public Cloud offering, Enterprise Content Delivery as a Service.

### **Infrastructure Transformation Program (ITP) Operations**

The Infrastructure Transformation Program (ITP) is tasked with implementing the Department's vision of One Infrastructure. ITP is a major DHS investment with a Life Cycle Cost Estimate (LCCE) of \$1.84 billion, as detailed in the September 1, 2005, Physical Control Audit. ITP infrastructure improvements enable the Department to remove lag time and complexity in accessing data, create a robust platform on which to quickly launch new capabilities, and provide a cost-effective and reliable

IT infrastructure. This is accomplished by streamlining and standardizing the network environment, minimizing the number of overlapping elements, providing operational and security support, and developing a Department-wide network topology with centralized governance and standardized procedures. DHS infrastructure transformation includes the provision of capabilities to continuously monitor and maintain the DHS IT Infrastructure in an operational and secure state.

ITP Operations support DHS's efforts to optimize IT infrastructure by providing Configuration Management services. Configuration/Change management is an Information Technology Infrastructure Library (ITIL) "Best Practice" and assesses risk related to changes requested or required by ITSO customers or ITSO entities to a "live" IT infrastructure in order to ensure its continued availability, effectiveness and safety. ITP Operations also offset increased O&M charges and previously funded ITP investments incurred while transforming and migrating seven wide area networks (WANs), consolidating Component legacy data centers, and centralizing email.

### **The Office of Accessible Systems & Technology (OAST)**

The OAST Program provides guidance, support, and compliance oversight to DHS Components regarding implementation of Section 508 of the Rehabilitation Act (as amended). This is accomplished by ensuring qualified individuals with disabilities have fair opportunity for employment and access to the information and data necessary to perform their jobs. OAST develops policies, training, and technical assistance best practices to ensure all electronic and information technology (EIT) procured, developed, maintained, or used is accessible to individuals with disabilities.

**Compliance activities include:** Management and oversight of the Web Accessibility and Remediation Program (WARP), Section 508 Acquisition Audit Program, Trusted Agent FISMA (TAF) Section 508 Audit Program, Section 508 Compliance Enterprise Architecture, Infrastructure Change-Control, and other life cycle activities. Oversight activities include conducting compliance reviews, providing technical assistance, and verifying and validating compliance with DHS Section 508 standards. These efforts ensure the following: (1) regular Web accessibility scans are completed and that OAST-approved testing methods are followed; (2) acquisition audits for Section 508 compliance are conducted on a routine basis; (3) IT system owners have appropriately entered the required accessibility information into TAF and uploaded the requisite Section 508 artifacts; (4) Enterprise Architecture Section 508 compliance reviews are conducted; and (5) Section 508 requirements for the DHS SELC are adhered to.

**Service activities include:** Management and oversight of Section 508 compliance for DHS IT Change Management and the Learning Management System (LMS) Accessibility Assessment programs. Oversight activities include conducting EIT accessibility assessments of software, internet applications, telecommunications, multimedia and video, and desktop and portable computers to determine Section 508 compliance. Oversight requires a close working relationship with the Department's LMS managers to ensure e-learning platforms and courses are Section 508 compliant when deployed.

**Management activities include:** Management and oversight of OAST operations, including contract management, strategic planning, and administrative support and operations. The program is also responsible for managing and operating the DHS Accessibility Help Desk, along with training development and delivery and outreach activities. The Accessibility Help Desk

serves as a single point of entry for disability-related services and technical assistance for the Department. The goal of the program is to work collaboratively with existing DHS and Component-level help desks to ensure seamless delivery of IT services for customers with disabilities, including the provision of reasonable accommodations. The OAST training program provides Section 508 awareness with hands-on EIT accessibility testing training for personnel with significant development responsibilities. In addition, the program provides role-based training for relevant Section 508-related stakeholders. The goal is to develop a knowledgeable workforce and culture in compliance with Section 508 accessibility standards.

**Department of Homeland Security  
 Departmental Management and Operations  
 Office of the Chief Information Officer (OCIO)  
 Information Technology Services  
 Program Performance Justification**  
 (Dollars in Thousands)

**PPA: Information Technology Services**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	<b>74</b>	<b>72</b>	<b>55,423</b>
<b>2012 Enacted Budget Authority</b>	-	-	<b>38,800</b>
2013 Adjustments-to-Base	-	-	(10,798)
<b>2013 Current Services</b>	-	-	<b>28,002</b>
<b>2013 Total Requested Budget Authority</b>	-	-	<b>28,002</b>
Total Change 2012 to 2013	-	-	(10,798)

**PPA: Information Technology Services**

The OCIO requests \$28.002 million in FY 2013 for Information Technology Services. The Adjustments-to-Base are for a realignment of the OCIO Working Capital Fund to the Salaries and Expenses PPA for a decrease of \$10.798M.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The IT Services PPA provides funding for the following seven programs:

**Enterprise Architecture (EA)**

EA provides a “blueprint” for systematically defining DHS’s baseline environment, target environment, and transition plan for implementing mission-critical capabilities. The program establishes a Department-wide roadmap to improve mission effectiveness and efficiency, eliminate existing stovepipe systems, and increase system interoperability and information sharing. EA ensures the essential evolution of information systems and the development of a common IT environment.

**Enterprise Data Management**

The Enterprise Data Management Program provides the architecture and governance for utilization of Departmental data assets. The Enterprise Data Management Office (EDMO) establishes the guidance and provides oversight for DHS data policy, data management, and data stewardship. The program supports the development of the Department-wide roadmap for trusted and reliable data to eliminate

existing stovepipe data systems, and increase data systems interoperability and information sharing. Data architecture is the key governance tool to ensure mission needs drive technology investments. Through the use of data architecture practices and the Federal Enterprise Architecture (FEA) Data Reference Model (DRM), EDMO expects to recommend realignment of key IT investments and acquisitions that will reduce maintenance costs of existing systems and drive common requirements for development of centralized services. EDMO will also improve the reporting of data management costs for IT investments in order to demonstrate the value of existing data management efforts and the potential cost savings of improving the data management efforts across DHS.

EDMO holds the primary responsibility for the adoption, training, and implementation of the National Information Exchange Model (NIEM) within the Department. A national program supported by the federal government, NIEM connects communities of people who share a common need to exchange information in order to advance their missions. The NIEM model is applied to support the development and dissemination of enterprise-wide information exchange standards and processes. These standards and processes enable Federal, State, local and tribal jurisdictions to share critical information effectively in emergency situations and support the daily operations of agencies throughout the nation. NIEM enables information reuse, management of information as an enterprise asset, and information sharing. EDMO also supports the NIEM effort through participation on the NIEM Business Architecture Committee and through data harmonization efforts for the DHS-related domains such as screening, immigration, infrastructure protection, emergency management, and intelligence. EDMO is also responsible for documenting the Information sharing and exchange requirements of DHS and maintaining this information in the Enterprise Architecture Information Repository.

In FY 2011, NIEM established the NIEM Cyber domain to enhance cyber information-sharing capabilities and improve the effectiveness of cyber incident response efforts across Federal, State and local government agencies. The NIEM Biometrics domain was also established to enhance national and international biometric data interoperability for law enforcement, homeland security, and counterterrorism programs.

EDMO also acts as the lead for the NIEM Program Management Office (PMO) for the U.S. Government and its State, local, tribal, and international partners. The PMO provides core services such as governance, tools, training, and common processes. The NIEM PMO's executive steering council is led by DHS, Department of Justice, and Department of Health and Human Services. In addition, 13 other Federal departments have reported commitments to use NIEM.

### **Geospatial Management**

The Geospatial Management Office (GMO) serves as the central point of coordination for the alignment and integration of geospatial investments across the Department by providing oversight and guidance to DHS Components for geospatial policy and technology matters. The GMO executes a comprehensive program that enables the effective, collaborative, and integrated application of geospatial capabilities (e.g., infrastructure, software, data, and services). To accomplish these collaborative enterprise capabilities, the GMO established and manages the Department's Geospatial Information Infrastructure (GII) as an enterprise-wide geospatial service, which includes software, geospatial analysis capabilities and common geospatial foundation data for DHS and its HLS stakeholders (e.g., Geospatial as a Service).

The GII enables DHS stakeholders the ability to analyze and visualize specific mission data from a mapping perspective. Such capabilities leverage base geographic data, mission specific data/infrastructure, satellite imagery, geo-coding services, and geo-analytical tools. DHS requires coordinated and, in some cases, consolidated enterprise geospatial solutions for emergency management, law enforcement, and other DHS mission objectives to ensure efficient and cost-effective shared usage of geospatial assets.

GMO participates in the Geospatial Platform interagency collaboration effort that offers a managed portfolio of common geospatial data, services and applications. This portfolio is administered by trusted sources and hosted on a shared infrastructure.

### **Cyber Identity and Credentialing (Smartcard)**

The Cyber Identity and Credentialing (Smartcard) investment supports the DHS Identity, Credential and Access Management (ICAM) Program Management Office (PMO). The ICAM PMO provides enterprise-level coordination and planning to enable the implementation of target state ICAM processes, policies, and technologies including implementing the use the HSPD-12 Smartcard for access to IT networks, systems, and applications; Public Key Infrastructure (PKI); Single Sign-on; and fine-grained access control in support of the DHS information sharing environment. The ICAM PMO is chartered to serve as the departmental focal point for the considerable body of Federal policy, standards, and implementation guidance relating to ICAM. The ICAM PMO responds to several federal-wide and Departmental mandates, directives, goals and objectives including the continued implementation of HSPD-12 defined by OMB Memorandum (M) 11-11 and the DHS Strategic Objective 3.3 to improve cyber security. The ICAM PMO delivers Department-wide leadership and continuity by combining essential coordination between Components, leveraging existing ICAM investments, justifying and providing acquisition oversight for new ICAM investments, and by being internally and externally accountable to meet DHS ICAM statutory obligations, improve our cyber security posture department-wide, and increase mission impact for DHS and our DHS mission partners.

### **Enterprise Application Delivery**

DHS is aggressively moving to a Cloud-based, on-demand set of service offerings as part of Data Center Migration and Defense-in-Depth strategies. The benefits of adopting Cloud-type architectures include, but are not limited to, a reduction in the time-to-market for new capabilities, increased efficiencies by reusing existing capabilities (e.g., platforms, code), enhanced adoption of green technologies, and streamlined governance requirements. Enterprise Application Delivery is leading the transformation through innovation by planning and delivering secure, high-quality enterprise application services for DHS customers as part of the DHS private and public Cloud initiatives. Funding ensures execution of identified DHS OCIO Hardware Platform Interfaces by establishing robust Cloud services and deploying a Department-wide service catalog to enhance the consumer experience for DHS services. These efforts are executed by the DHS Applications Services Council, consisting of DHS Component CIO representatives, who establish capabilities and service-level agreements required to achieve Cloud services.

### **Program Management Support**

The OCIO Enterprise Business Management Office (EBMO) provides program management (PM) services to the OCIO, DHS management, and Component programs to maximize DHS IT program

productivity. EBMO also provides Departmental IT strategic planning, IT performance measurement, IT resource management and analysis, enterprise portfolio governance, IT program governance, IT acquisition review assistance, IT policy and compliance, and IT Program Management support services. The office is currently standing up Department-wide Executive Steering Committees (ESCs) to further enhance program governance. The ESCs are decision-making bodies that serve as hands-on advocates for respective programs. The ESCs roll into a Portfolio Steering Committee (PSC) or a Domain ESC depending on which of the 13 IT portfolios the program belongs.

EBMO provides Capital Planning and Investment Control (CPIC) support to all Components to ensure effective resource allocation across the Department's IT investment portfolios. EBMO is responsible for conducting annual IT Portfolio Reviews, updating the Federal IT Dashboard with monthly cost and schedule and performance data, gathering information for and presenting DHS-led TechStats, submitting annual OMB Exhibit 300s and Exhibit 53s, and conducting Privacy Act initiatives.

### **E-Gov Initiatives**

Under the OCIO EBMO, the Electronic Government (E-Gov) Program coordinates DHS participation in crosscutting, government-wide programs. The Department manages or participates in 22 E-Gov initiatives and lines of business (LoBs) such as Grants Management, Financial Management, and Budget Formulation and Execution. These initiatives seek to drive progress using internet-based technologies, which enable citizens and businesses to interact with the Federal Government more easily and streamlines citizen participation, as well as saves taxpayer dollars. The E-Gov PMO works with OMB and various internal and external stakeholders to ensure the Department remains compliant with E-Gov policies and mandates. E-Gov facilitates implementation of the Open Government Directive to support the government's commitment to increase transparency of data, participation of the public and cross-government collaboration through systems and Web sites such as USAspending.gov, Data.gov, and Performance.gov.

**Department of Homeland Security  
 Departmental Management and Operations

 (Dollars in Thousands)**

**PPA: Infrastructure and Security Activities**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	-	-	<b>163,005</b>
<b>2012 Enacted Budget Authority</b>	-	-	<b>139,000</b>
2013 Adjustments-to-Base	-	-	(81,958)
<b>2013 Current Services</b>	-	-	<b>57,042</b>
2013 Program Change	-	-	64,797
<b>2013 Total Requested Budget Authority</b>	-	-	<b>121,839</b>
Total Change 2012 to 2013	-	-	(17,161)

**PPA: Infrastructure and Security Activities**

The OCIO requests \$121.839 million for this activity. The Adjustments-to-Base are as follows:

- Decrease of \$4.775M for the OCIO WCF realignment to the Salaries and Expenses PPA.
- Decrease of \$70.0M for the non-recur of Data Center Migration Costs.
- Decrease of \$7.183M through efficiencies (to include Operation and Maintenance of Equipment).

**CURRENT SERVICES PROGRAM DESCRIPTION:**

**Watch List**

The Watch List Program supports information sharing within DHS for the Terrorist Screening Center's (TSC) database and provides technical integration and collaboration for disseminating data securely with key DHS stakeholders. This program also supports the integration of automated DHS encounter information back to the TSC, which may result in additional data added.

**Information Security & Infrastructure**

The Infrastructure Transformation Program (ITP) is a DHS Level 1 investment that improves the Department's Information Technology (IT) infrastructure by unifying disparate Component information technology networks, platforms, and services to provide a common IT infrastructure across the Department. The program/projects that are funded under Information Security &

Infrastructure (ISI) include Network Services (OneNet), Trusted Internet Connections (TIC), Policy Enforcement Points (PEPs), Email Services, and Data Center Services.

ISI funding ensures that DHS OCIO provides a reliable, resilient, and secure DHS-wide data network that streamlines appropriate sharing and discovery of information within the Department and associated organizations, such as State and local law enforcement agencies. The core of this unified environment is the consolidation of legacy networks into one enterprise-wide, integrated network called OneNet. Major services provided under ISI include:

- DHS OneNet WAN services
- Network and Security Operations Centers (NOC/SOCs)
- Traffic modeling and data analysis
- Internet Protocol (IP) address administration
- Network management
- Access controls

The network operations centers (NOCs)/ SOC centrally oversee DHS's infrastructure systems and network components. Incident response and detection is coordinated and escalated by the NOC/SOC within the network security and computing services groups, depending on the nature of the breach or failure. The NOC/SOC aids in availability and capacity management by providing respective service groups with collected monitoring data.

Email services provide additional and comprehensive communication ability across DHS and to external Federal, State, local, tribal, international, and private sector partners. Email legacy systems will be consolidated within DHS when the Email as a Service (EaaS) capability is deployed at the EDCs in FY 2013. Email services will enable personnel to access critical business communications and are designed to deliver greater security, availability, and reliability. Major email services include a consolidated DHS-wide Global Address List (GAL), a standard email-naming convention, and a DHS-wide email platform.

### **Data Center (DC) Development**

DHS is in the process of consolidating the Department's legacy data centers into two Enterprise Data Centers, known as DC1 and DC2, in alignment with the Federal Data Center Consolidation Initiative. Support at the EDCs includes management and control of DC hardware, operating systems software, and environmental systems. In addition, both EDCs are prepared to support a higher density virtual environment from both an infrastructure and managed-service perspective. The EDCs support the delivery of private cloud and "as-a-service" offerings to customers seeking a scalable and secure virtual environment of configurable computing resources that can be rapidly provisioned with minimal cost of ownership. DC1 and DC2 have the ability to continuously synchronize applications based upon mission requirements. The purpose of EDC consolidation is to ensure DHS has a seamless disaster recovery capability and to significantly enhance the cyber security posture of DHS systems. DHS EDC capabilities provide personnel the tools to successfully and efficiently manage service delivery and support activities. When migrations to the EDCs are complete, DHS anticipates significant overall cost avoidance to exceed hundreds of millions of dollars after the 'Break Even' as projected in FY 2020. Cumulative cost avoidance from FY 2019 thru FY 2030 could approximate \$2.8 billion.

Major services provided by DC1 and DC2 include capacity and availability management, system management and administration, hardware/software maintenance, facility monitoring, security management, and disaster recovery management and testing.

The Infrastructure & Security Activities PPA funds EDC consolidation and OCIO assistance to Components migrating legacy data centers to the EDCs. The Data Center Development program focuses on building capabilities at both DHS data centers.

**Department of Homeland Security  
 Departmental Management and Operations  
 Office of the Chief Information Officer (OCIO)  
 Homeland Secure Data Network  
 Program Performance Justification  
 (Dollars in Thousands)**

**PPA: Homeland Secure Data Network**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	<b>5</b>	<b>5</b>	<b>47,257</b>
<b>2012 Enacted Budget Authority</b>	-	-	<b>44,000</b>
2013 Adjustments-to-Base	-	-	(1,868)
<b>2013 Current Services</b>	-	-	<b>42,132</b>
<b>2013 Total Requested Budget Authority</b>	-	-	<b>42,132</b>
Total Change 2012 to 2013	-	-	(1,868)

**PPA: Homeland Secure Data Network**

The OCIO requests \$42.132 million for the Homeland Secure Data Network (HSDN) activity. The Adjustments-to-Base are for a realignment of the OCIO Working Capital Fund to the Salaries and Expenses PPA for a decrease of \$1.868M.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

**Homeland Secure Data Network**

HSDN enables agencies to collaborate and communicate effectively at the collateral SECRET-classification level. With HSDN capabilities, DHS can collect, disseminate, and exchange both tactical and strategic SECRET-level information throughout the Department and among Homeland Security partners including Federal, State, local, tribal, territorial and private entities. In addition, HSDN is the primary means for communicating classified information with the national network of State and Major Urban Area Fusion Centers.

HSDN has established 321 sites, comprised of 3,145 workstations, across the United States. The program has established user accounts for approximately 6,886 end-users who currently log on and exchange information across both HSDN and the broader SECRET-level community in performing daily missions. HSDN currently operates continuous—24 hours a day, 7 days a week, 52 weeks a year—system-wide capabilities.

These capabilities include the classified NOC and SOC, four-tiered helpdesk, DCs, system-wide telecommunications backbone, and enterprise applications, including office email and messaging in support of end-user mission requirements.

### **Communications Security**

The Homeland Security Communications Security (COMSEC) Central Office of Record (COR) was established in accordance with national policy as delineated in the interagency *Committee on National Security Systems Instruction (CNSSI) 4005*. The DHS Management Directive 4300B provides guidance for administering the National Security Policies required to provide for accounting, safeguarding, and management control over COMSEC keying material, controlled cryptographic items, and secure communications equipment. The COR provides consolidated COMSEC accounting services and training, and assists in acquisition and maintenance of COMSEC equipment for the Department. Additionally, the COR develops and publishes policy and procedures for the operation and use of COMSEC equipment and cryptographic keying material within DHS, ensuring compliance with National and Departmental policies and procedures.

To comply with the joint DOD and National Security Agency (NSA) Crypto Modernization program, DHS continues to migrate legacy encryptors and COMSEC accounting infrastructure. The transition to modern cryptographic equipment and account management includes systems such as the Network-Centric Key Management Infrastructure (KMI) and the COMSEC Accounting, Reporting Distribution System (CARDS), both of which are emerging and critical components of the Global Information Grid. This migration is essential to afford DHS the opportunity to automate, streamline, and restructure the COMSEC distribution and accounting infrastructure. These improvements will establish a stronger core of subject matter experts within the DHS COMSEC community, resulting in the more efficient use of our most valuable resource, DHS personnel.

## IV. Program Justification Changes

**Department of Homeland Security  
Departmental Management and Operations  
Office of the Chief Information Officer (CIO)  
Justification of Program Changes  
(Dollars in Thousands)**

**Program Increase 1:** Data Center Migration  
PPA: Infrastructure and Security Activities  
Program Increase: Positions 0, FTE 0, Dollars \$64,797

### Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	64,797
<b>Total Request</b>	-	-	<b>121,286</b>	-	-	<b>70,000</b>	-	-	<b>64,797</b>

### Description of Item

OCIO requests \$64.797M to fully complete the data center migration activities for CBP, TSA, and USCIS. Data Center (DC) Migration provides funding to Components to consolidate data center environments into the two enterprise-wide DHS data centers. DHS is committed to the integration, consolidation, and the transformation of individual Component infrastructures into a more efficient and more secure world-class IT infrastructure capable of supporting the significant demands required of an organization of more than 200,000 employees.

At the completion of the migration effort, Components will relocate their existing or new applications to the two data centers occupying a number of racks in the data centers and paying for the charges associated with this occupancy. The recurring O&M costs for operating the two enterprise-wide data centers will be administered through the DHS – wide Working Capital Fund beginning in FY 2013.

### Justification

The purpose of this request is to continue execution of the planned timeline to migrate Component information systems, applications and disaster recovery facilities to the DHS Enterprise DCs. This will enable continued closures of the major Component data centers and achieve the Secretary’s goal of the Department’s consolidation to two data centers across the enterprise.

The transition to the DHS Enterprise DC architecture is standardizing IT resource acquisitions across all DHS Components, as well as streamlining the maintenance and support contracts, allowing for less complex vendor support and expediting response times during emergencies. Benefits derived from the transition to the DHS Enterprise DCs include increased security, enhanced operability, and long-term

cost avoidances. DHS is placing information systems behind Trusted Internet Connections, thus removing exposure of essential functions to those that would exploit weaknesses. Migration makes technologies available as easily ordered services and provides for DHS-wide standardization.

### **Impact on Performance**

This funding allows the closure of CBP's Newington Data Center, TSA's Transportation Threat Assessment and Credentialing (TTAC) facilities, and USCIS's Technology Engineering Consolidation Center (TECC) facility to be completed on schedule. It enables the OCIO to manage funding on IT infrastructure investment and operations and maintenance in support of the Department's front-line operations as well as assurance of meeting the DHS's contractual liabilities to the managed service providers.

Completing these migrations will eliminate further investments by the Components in legacy data centers operations, including continuity of operations, maintenance, support, security certification and accreditation. The Department's current projection for cost avoidance is \$2.8 billion through FY 2030. An extended migration timeline will result in concurrent costs to fund both old and new data centers while the completion of DHS Enterprise data centers reduces the number and cost of Federal data centers, associated energy costs, and physical space allocations, in concert with a transition to cloud computing.

This action also directly supports OMB's Federal Data Center Consolidation Initiative to promote the use of Green IT by reducing the overall energy and real estate footprint of government data centers; reduce the cost of data center hardware, software and operations; increase the overall IT security posture of the government; and shift IT investments to more efficient computing platforms and technologies.

## **V. Exhibits and Other Supporting Material**

### **A. Justification of Proposed Legislative Language**

*For necessary expenses of the Office of the Chief Information Officer, as authorized by section 103 of the Homeland Security Act of 2002 (6 U.S.C. 113), and Department-wide technology investments, \$247,846,000; of which \$120,670,000 shall be available for salaries and expenses; and of which \$127,176,000, to remain available until September 30, 2015, shall be available for development and acquisition of information technology equipment, software, services, and related activities for the Department of Homeland Security: Provided, That in addition to the amounts provided herein, \$64,797,000 shall be available for data center migration.*

Explanation of Changes: Data Center Migration activities will be funded within the OCIO Appropriation.

### Salaries and Expenses Mission Statement

The Salaries and Expenses (S&E) PPA is a crosscutting program that provides technology-management, shared services, acquisition strategy, executive leadership support, process development, and business transformation to several offices within the DHS Office of the OCIO.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	17,233	37,978	41,414	3,436
11.3 Other than full-time permanent	237	248	260	12
11.5 Other personnel compensation	564	485	509	24
11.8 Special Service Pay	183	183	183	-
12.1 Benefits	5,201	7,588	9,192	1,604
<b>Total, Salaries &amp; Benefits</b>	<b>23,418</b>	<b>46,482</b>	<b>51,558</b>	<b>5,076</b>

The Salaries and Benefits increase in FY 2013 is largely due to the realignment of salaries from the programs (other PPAs) to be funded centrally from the Salaries and Expenses PPA. In FY 2013 there is a \$1,000 decrease in overtime due to management efficiencies, an increase of \$759,000 due to the annualization of FTE from FY 2012, and an increase due to the transfer of personnel from OCAO.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
21.0 Travel	\$636	\$592	\$459	-\$133

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The OCIO realized \$133,000 in travel savings due to management efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
22.0 Transportation of things	0	0	\$175	\$175

The increase of \$175,000 is due to correct alignment of mail transit from object class 25.8 to this object class.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
23.1 GSA rent	\$6,833	\$7,278	\$7,729	\$451

OCIO's rent portion of the Working Capital Fund.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
24.0 Printing	\$68	\$68	\$76	\$8

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2013 request includes an increase of \$8,000 due to printing materials for the IT Human Capital Strategic Plan.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.1 Advisory and assistance services	\$19,088	\$23,174	\$18,067	-\$5,107

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2013 request includes decreases due to DHS Strategic Sourcing Initiatives, and management efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.2 Other services	\$794	\$549	\$1,183	\$634

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2013 request includes an increase of \$634, 000 due to funding FY 2013 OCIO initiatives such as IT strategic planning.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.3 Purchases from Gov't accts.	\$15,810	\$15,012	\$29,357	\$14,345

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2013 request includes an increase due to centralizing all Working Capital Fund costs in the Salaries & Expenses PPA.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.4 O&M of facilities	\$162	\$3,911	\$4,115	\$204

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The increase is due to better align funds based on projected expenditures.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.6 Medical care	\$30	\$30	\$34	\$4

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2013 request has an increase of \$4,000 in the costs of Federal Health Clinic shared services.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.7 Operation and maintenance of equipment	\$5,759	\$5,156	\$4,744	-\$412

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2013 request includes a decrease of \$412,000 due to better align funds based on projected expenditures.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.8 Subsistence & Support of persons	0	\$1,724	\$1,374	-\$350

The FY 2013 request includes a decrease of \$350,000 due to a decrease in security, configuration, and quality management support, as well as realignment of mail transit services to object class 22.0.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
26.0 Supplies and materials	\$445	\$423	\$698	\$275

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The increase of \$275,000 is due to increased demand in supplies.

**Information Technology Services Mission Statement**

The IT Services PPA supports development, implementation, and maintenance of: a comprehensive and Integrated Enterprise Architecture, the information technology framework for the Department, geospatial technologies, and information sharing.

**Summary Justification and Explanation of Changes**

Object Classes	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	5,633	-	-	-
11.3 Other than full-time permanent	265	-	-	-
11.5 Other personnel compensation	106	-	-	-
12.1 Benefits	1,701	-	-	-
<b>Total, Salaries &amp; Benefits</b>	<b>7,705</b>	-	-	-

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
21.0 Travel	\$2	0	\$516	\$516

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2013 request includes an increase of \$516,000 due to programs managing their own travel budgets versus them being centrally funded to gain better transparency of travel expenditures throughout OCIO.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.1 Advisory and assistance services	\$27,393	\$23,861	\$17,763	-\$6,098

Advisory and assistance services include services acquired by contract from non-Federal sources (the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2013 request includes a net decrease of \$6,098,000. This is a result of decreases in professional services contracts.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.2 Other services	\$372	\$5,302	\$4,442	-\$860

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The decrease is due to reductions in the Enterprise Application Delivery program.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.3 Purchases from Gov't accts.	\$10,964	\$2,020	0	-\$2,020

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2013 request has a decrease of \$2,020,000 due to the Working Capital Fund realignment to the S&E PPA.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.4 O&M of facilities	\$6	0	\$2,000	\$2,000

The increase of \$2 million is due to realignment of the Office of Accessible Systems and Technology to the ITS PPA from S&E.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.7 Operation and maintenance of equipment	\$2,511	\$4,242	\$3,281	-\$961

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2013 request includes a decrease of \$961,000 in the Enterprise Application Delivery program.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
31.0 Equipment	\$6,372	\$3,375	0	-\$3,375

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
--	-------------------------------	--	--	------------------------------

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2013 decrease is due to object class realignment.

**Infrastructure and Security Activities Mission Statement**

Infrastructure and Security Activities (ISA) are a set of IT projects that provides integration and protection of sensitive DHS information. ISA funds manage infrastructure support, which includes support for network and data center services and DHS Component enterprise applications, and also provides funds to maintain Trusted Internet Connection (TIC) capability and move all network traffic behind the TIC.

**Summary Justification and Explanation of Changes**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	1,734	-	-	-
11.3 Other than full-time permanent	25	-	-	-
11.5 Other personnel compensation	56	-	-	-
12.1 Benefits	492	-	-	-
<b>Total, Salaries &amp; Benefits</b>	<b>2,307</b>	-	-	-

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.1 Advisory and assistance services	\$11,316	\$17,216	\$15,608	-\$1,608

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. This decrease of \$1,608,000 is a result of decreased funding for professional service contracts.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.7 Operation and maintenance of equipment	\$145,802	\$121,784	\$106,231	-\$15,553

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The decrease in FY 2013 is due to non-recurring funding for data center migration and management efficiencies.

**Homeland Secure Data Network Mission Statement**

Homeland Secure Data Network is a classified wide area network for DHS and its components, with specific and controlled interconnections to the intelligence community and federal law enforcement resources.

**Summary Justification and Explanation of Changes**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	270	-	-	-
11.5 Other personnel compensation	7	-	-	-
12.1 Benefits	82	-	-	-
<b>Total, Salaries &amp; Benefits</b>	<b>359</b>	-	-	-

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>21.0 Travel</b>	0	0	\$45	\$45

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. To gain better transparency of travel expenditures throughout OCIO, the FY 2013 request includes an increase of \$45,000 due to programs managing their own travel budgets versus them being centrally funded.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.1 Advisory and assistance services</b>	\$535	\$3,139	\$3,185	\$46

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2013 request is due to an increase in professional services.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.7 Operation and maintenance of equipment</b>	\$43,714	\$38,139	\$35,487	-\$2,652

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2013 request includes a decrease of \$2,652,000 for HSDN data center services.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>31.0 Equipment</b>	\$33	\$2,722	\$3,415	\$693

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The \$693K increase is for the HSDN technology refresh.

## **K. DHS Balanced Workforce Strategy**

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of Federal employee and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce – both contracted and federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into Tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2014 budget.

OCIO requests \$0 and 0 FTE for the FY 2013 DHS Balanced Workforce positions.

## **BUDGET REQUEST AND SUPPORTING INFORMATION**

### **Departmental Management and Operations DHS Headquarters Consolidation Project**

#### **I. Appropriation Overview**

##### **A. Mission Statement:**

The DHS Headquarters (HQ) Consolidation Project is responsible for the co-location of the Department through lease consolidation and build out of the St. Elizabeths campus. The mission of the DHS HQ Consolidation Project is to consolidate HQ and Component executive leadership, operations coordination, policy and program management, and “mission execution” personnel requiring a secure setting at St. Elizabeths to enhance effectiveness. We will optimize the real estate portfolio by increasing utilization efficiency and implementing Flexible Workplace Strategies (FWS) such as telework and alternate work schedule.

The DHS Management Directorate provides coordination, planning, policy, guidance, operational oversight, and innovative solutions for the management needs of the entire Department for the consolidated “One DHS” campus.

The DHS HQ Consolidation project appropriation allows the Department to facilitate better reporting and overall management of the program and provides improved visibility of the ongoing efforts to establish a consolidated DHS Headquarters.

##### **B. Budget Activities:**

#### **DHS Headquarters Consolidation – St. Elizabeths**

The current DHS Headquarters facilities portfolio is scattered in about 55 locations throughout the National Capital Region, many with sub-optimal security protections. To address this challenge, the Department will continue development of a consolidated DHS Headquarters Consolidation in a secure setting at the St. Elizabeths Campus. The co-location of the National Operations Center (NOC) with Component operations centers in a single DHS Operations Center (DOC) facility will enhance command and control functions to better prepare the Department’s response to natural disasters, terrorist attacks, and other emergency events. This integrated approach will allow DHS to effectively communicate, share information, and engage in critical events as they occur.

##### **C. Budget Request Summary:**

The Under Secretary for Management requests 0 positions, 0 FTE, and \$89.0 million for FY 2013 for the DHS Headquarters Consolidation Project to construct the West Access Road, a north-south three-lane arterial roadway that will provide vehicle and pedestrian connections between Gate 4 of the U.S. Coast Guard Headquarters Building and Malcolm X Avenue, as

specified in the Final Master Plan approved by the National Capital Planning Commission in 2009.

The HQ Consolidation – St Elizabeths 0 FTP, 0 FTE, and \$89.0 million for FY 2013.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The DHS mission is to lead a unified national effort to secure America. The mission demands an integrated approach to all hazards. The purpose of the DHS HQ Consolidation project at St. Elizabeths is to consolidate the majority of the Department on a single-site campus, effectively and efficiently support the Department’s mission as organizations mature and new programs develop, reduce facility costs, and provide quality work spaces and other amenities in order to attract and retain the best professional workforce.

The Department is committed to building a new headquarters in the District of Columbia and will continue to work with Congress to move this project forward while maintaining frontline operations. With the funding provided in FY 2011 and FY 2012, DHS will complete Phase 1 construction, which includes: the U.S. Coast Guard headquarters building; perimeter security and utilities improvements necessary to support Coast Guard occupancy; and the adaptive reuse of 6 historic buildings, which will be used to house a campus common use cafeteria, fitness facility and auditorium; as well as a USCG exchange and medical clinic.

In FY 2013, the Department requests funds to construct I-295/Malcolm X Avenue interchange improvements and West Campus access road extension from Gate 4 of the U. S. Coast Guard Headquarters Building to Malcolm X Avenue.

## IV. Program Justification Changes

**Department of Homeland Security  
Departmental Management and Operations  
DHS Headquarters Consolidation Project  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 1:** Malcolm X Interchange and Access Road  
PPA: HQ Consolidation - St. Elizabeths  
Program Increase: Positions 0, FTE 0, Dollars \$89,000

### Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	89,000
<b>Total Request</b>	-	-	<b>77,245</b>	-	-	<b>55,979</b>	-	-	<b>89,000</b>

### Description of Item

The requested funding will be used to construct the West Access Road, a north-south three-lane arterial roadway to provide vehicle and pedestrian connections between Gate 4 of the U.S. Coast Guard Headquarters Building and Malcolm X Avenue. The West Access Road segment from Firth Sterling Avenue southward to Gate 4 is currently under construction and will be completed in conjunction with the Phase 1 development for U.S. Coast Guard occupancy. The requested funding will complete this infrastructure project, expanding access to St. Elizabeths' West Campus and improving traffic flow for visitors and commuters to St. Elizabeths and Joint Base Anacostia-Bolling.

### Justification

This project is necessary to improve the traffic flow along Interstate 295 at the Malcolm X Avenue interchange and provide direct access to the future home of the Department of Homeland Security on the West Campus of St. Elizabeths, which is scheduled for initial occupancy in the spring of 2013.

The campus connection will include roadways as well as a multi-purpose bike and pedestrian pathways.

The project is a collaborative development effort between Federal, DC, and local community partners, including the General Services Administration, the Department of Homeland Security, the Department of Defense, the Federal Highway Administration, the National Park Service, the District of Columbia, the Ward 8 Community, and other regional stakeholders.

### **Impact on Performance**

While transportation needs for initial occupancy of the campus will be met by improvements to the Firth Sterling interchange, the Malcolm X interchange improvements will support the continued development of the St. Elizabeths campus.

Built over 24 months, the project will provide transportation infrastructure necessary for full development of the DHS Consolidated Headquarters on the St. Elizabeths West Campus and is a prerequisite for future construction and occupancy.

The interchange and access road will facilitate campus access for construction traffic and provide multiple routes for emergency access.

The new interchange will enhance traffic flow, providing safe and efficient transportation access minimizing the impacts on local roads and the community at large in and around the Ward 8 community, including Joint Base Anacostia-Bolling.

The direct connections to the broader regional transportation network will support the District and the community's redevelopment efforts on the St. Elizabeths East Campus and other areas within Ward 8.

In addition, the access road will contain a multi-purpose bike and pedestrian pathway, expanding the regional bicycle trail connections to a vast array of existing and planned trails, as part of the Department's commitment to environmental stewardship and minimizing the environmental impact of planned improvements at St. Elizabeths.

## **V. Exhibits and Other Supporting Material**

### **A. Justification of Proposed Legislative Language**

*For necessary expenses directly related to planning, engineering, and constructing transportation-related improvements at the Malcolm X interchange, Shepherd Parkway, and expansion of Martin Luther King Boulevard to facilitate vehicle and pedestrian access to department headquarters at the St. Elizabeths campus, [\$55,979,000] **\$89,000,000**, to remain available until September 30, 2014.*

#### **Explanation of Changes:**

No substantive changes.

# BUDGET REQUEST AND SUPPORTING INFORMATION

## Working Capital Fund

### I. Appropriation Overview

#### **A. Mission Statement for Salaries and Expenses:**

To deliver cost-effective support services throughout DHS, the Working Capital Fund (WCF) provides a mechanism for shared service costs to be distributed and recouped, and facilitates the delivery and oversight of shared services.

The WCF supports selected services, activities, and programs that benefit numerous DHS organizational Components. Furthermore, the WCF supports the funding for government-wide initiatives as well as DHS-crosscutting initiatives approved by the Office of Management and Budget (OMB) and Congress. The goal of the Under Secretary for Management is to maintain and operate a fund that promotes economy, efficiency, and accountability and to apply best practices from the public and private sectors for improving organizational performance, operational efficiencies, and ensure full cost recovery of goods and services for selected DHS agency-wide programs, activities, and services. To provide cost-effective support services throughout DHS, the WCF provides a mechanism for shared service costs to be distributed and recouped, and facilitates the delivery and oversight of shared services.

#### **B. Budget Activities:**

The key WCF activities are organized under the five active PPA categories listed below.

##### **Fee for Service Activities**

DHS WCF activity managers provide or coordinate delivery of a specific service or benefit to DHS Components. The benefit/cost for providing the WCF activity is tangible and is directly linked to a Component's use of services or products. An example of a fee for service activity is print and electronic access subscription services through the Library of Congress's FEDLINK. These WCF activities are reimbursed for the provision of services, and have characteristics typical of a business enterprise. The costs for operating the "business" are reimbursed by billing customers for the provision of goods and services at rates that are pre-approved by the Department's Chief Financial Officer and reviewed by Component customers. Each fee for service activity is expected to recover its operational expenses, usually at a much lower cost as the Components benefit from economies of scale. Examples include: GSA rent and real estate services, IT and telecommunication services, human resource services, procurement operations, and financial management services.

##### **Tri-Bureau Service Activity**

The Tri-Bureau Service Activity PPA previously included 2 FTE and \$34.250 million for the DOJ Data Center Services activity. In FY12, the WCF eliminated all activities within the Tri-bureau category.

### **Government-wide Mandated Service Activities**

Government-wide Service Activities are Administration-sponsored initiatives that are managed by a designated Federal department to improve overall government performance. Other departments are assessed for the cost of supporting the activity. The activities should also provide a direct benefit to participating Components. Examples include the government-wide e-Government initiatives and the OMB-sponsored Interagency Councils.

### **DHS Crosscutting Activities**

The DHS crosscutting activities are Department-wide programs managed by a single office that yield some benefit to all DHS Components, such as Strategic Sourcing. The actual costs of the programs are recouped by redistributing the costs to the Components based on their share of the discretionary budget, staffing or some other fair and equitable pro-rata basis.

### **WCF Management Activity**

The WCF Management Activity includes funding for the staff that develops WCF policy and procedures, formulates and executes the WCF budget and facilitates dispute resolution of issues between activity managers and customers.

### **C. Budget Request Summary:**

The DHS WCF operating requirements for FY 2013 are estimated to be 559 FTE and \$939.319 million in reimbursable authority. This is a net increase of \$248.863 million and 145 positions and 145 FTE from the FY 2012 Enacted.

The WCF will continue all services and activities from the FY 2012 Base request with the exception of the Tri-Bureau Service Activity. The FY 2013 net increase is attributable to a program increase of \$343.126 million for Fee for Service Activities, a program increase of \$.720 million for Government-wide Mandated Service Activities, a program increase of \$0.057 million for DHS Crosscutting Activities, and a program decrease of \$.006 for Working Capital Fund Operations.

The Department established a Working Capital Fund Governance Board (WCFGB) in FY 2008 to provide oversight, set policy and evaluate program requirements for all existing and new WCF activities. The WCFGB is comprised of 11 members representing the DHS Components and the WCF service providers. During the FY13 budget planning phase, the WCFGB reviewed program requirements for 14 potential WCF activities of which the following four received approval for inclusion into the fund in FY 2013:

- Data Center Consolidation O&M;
- HSPD-12;
- Personnel Accountability System; and
- Environmental Planning and Historic Preservation Support System

The WCFGB disapproved the following activities for inclusion in FY13 due to growth concerns presented in the funding requirements:

- Transit Subsidies;
- Executive Sedan Services;
- Parking Services;
- Health Clinics Services;
- Shuttle Services;
- Mail Operations;
- Facilities Management Operations;
- Chief Administrative Officer – Administrative Operations;
- Health and Safety Office; and
- Executive Dining Facility

#### **D. Funding Adjustment**

The Department revised the WCF's FY 2012 cost requirements from the enacted level of \$752M to \$630M. The revision is based on the Department's re-evaluation of the projected growth rate represented in the FY 2012 President's Budget. The revised funding levels are reflected as adjustments to base to the FY 2013 Current Service levels. The Department will submit an official notification to the Hill detailing the revisions to the FY 2012 funding requirements along with this document.

#### **Fee for Service Activity Program Changes: \$343,126 million increase and 45 FTE increase over FY 2012 Enacted**

- Financial Statement Audit -- \$.774 million increase and 0 FTE - The Financial Statement Audit activity requests additional funding to cover increases in contractor costs and for travel costs for the OIG staff. The amount includes an increase for time and material costs for audit services. The service includes a Full Scope audit cost for Customs and Border Protection (CBP), Federal Law Enforcement Training Center (FLETC) Transportation Security Administration (TSA), Immigration and Customs Enforcement (ICE), and Citizenship and Immigration Services (CIS).
- Internal Control Audit -- \$.367 million increase and 0 FTE - The Internal Control Audit activity requests additional funding to cover increases in contractor and travel requirements for the program.
- Financial Accounting and Shared Services -- \$1.391 million increase and 0 FTE- The activity Financial Accounting and Shared Services activity requests additional funding to cover contractual requirements associated with projected increases in transactions, IT contract costs, rent, administrative costs, plus overhead IT cost for each component.
- NCR Infrastructure Operations -- \$51.428 million increase and 0 FTE – DHS will continue to realize an increased need for network storage and connectivity in FY 2013. This increase will allow the Department to continuing its technology refresh for the end user equipment and refresh the backbone network equipment.

- Enterprise License Agreements -- \$48.308 million increase and 1 FTE – The FY 2013 increase is attributed to the fact that components were currently paying for Symantec and Oracle software licenses outside of the WCF. For FY 2013, this activity will continue to manage Microsoft and Adobe licenses and add management of Symantec and Oracle licenses.
- Data Center Migration -- \$64.797 million increase and 0 FTE - This increase will provide funding to consolidate and assist migrating data center environments to the two enterprise-wide DHS data centers. By creating two redundant data centers, DHS is committed to the integration, consolidation, and the transformation of individual Component infrastructures into a single, world-class IT infrastructure capable of supporting the significant demands required of an organization of more than 200,000 employees. (Funding for data center migration is included in the CIO request.)
- Enterprise Data Center – O&M -- \$180.778 million increase and 34 FTE -The Data Center Consolidation WCF activity will provide the means by which to manage the funding for the on-going O&M at the DHS data centers. By including the on-going O&M collections in the WCF, the Department is able to achieve further benefits by ensuring that the Service Provider contracts are fully funded and paid on time by providing customers their charges in advance thus reducing workload and time associated with executing interagency agreements.
- HSPD-12 -- \$23.000 million increase and 9 FTE - The HSPD-12 activity within the WCF will centralize the management and issuance of HSPD-12 security identification cards for all DHS customers. Of the \$23 million request for the HSPD-12 activity, \$1.5 million will be used to fund 9 FTE to assist in the management, oversight, and card issuance, \$15.7 million is estimated to fund the anticipated contractual requirements for Personal Identity Verification (PIV) card implementation, and \$5.8 million for other costs including equipment purchases, travel, ancillary supplies, and printing services provided by GPO.
- Environmental Planning & Historic Preservation Decision Support System (EP&HP DSS) -- \$467 thousand increase and 1 FTE - Through the use of a standard automated review process, the activity will decrease the total cost of environmental reviews, increase efficiency, improve the workflow of environmental reviews, and increase the quality of environmental reviews throughout the department.
- Personnel Accountability System -- \$1.241 million and 0 FTE - The National Continuity Implementation Plan (NCIP) lays out standards to ensure that all Federal departments and agencies continue to carry out the most critical functions necessary to lead and sustain the Nation during a catastrophic emergency. The NCIP requires each agency develop the relevant policies, procedures, and processes to address its continuity of operations. The Personnel Accountability System will satisfy this requirement by standardizing and automating processes for contacting DHS employees in case of emergency.

Program Decreases -- reduction of \$21.502 million in Fee for Service Activities.

- \$1.041 million – GSA Rent

- \$20.186 million – Consolidated Subscriptions
- \$.017 million – Financial Management Operations
- \$.046 million – Headquarters Human Capital Services
- \$.015 million – HSBS Payroll Services
- \$.003 million – DHS Executive Leadership Services
- \$.022 million – DHS Infrastructure Transfer Program
- \$.172 million – Procurement Operations

**Government-wide Mandated Service Activity Program Changes: \$.719 million increase from the FY 2012 Enacted**

- e-Training -- \$.482 million program increase will fund licensing support costs for centralized custom courseware development.
- e-gov Integrated Acquisition Environment -- \$.237 million program increase will continue to fund the Presidentially-mandated e-Gov initiative by supporting federal acquisition throughout all federal agencies.

**DHS Crosscutting Activity Program Changes: \$.057 million increase from the FY 2012 Enacted.**

- Strategic Sourcing; \$.057 million increase – In FY13, the Strategic Sourcing activity is projected to increase its overall program spend requirements in FY 2013 to fund IT and support contracts for the activity.

**Working Capital Fund Management Program Changes: \$.006 million decrease**

The Working Capital Fund Management PPA is requesting a total of \$.006 million less than the current service level for Working Capital Fund Management activity and 0 FTE due to operations efficiencies.

### III. Current Services Program Description by PPA

**Department of Homeland Security  
Working Capital Fund  
Fee for Service Activity  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: Fee for Service Activity**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	<b>460</b>	<b>455</b>	<b>577,378</b>
<b>2012 Enacted Budget Authority</b>	<b>394</b>	<b>394</b>	<b>699,962</b>
2013 Adjustments-to-Base	101	101	(152,225)
<b>2013 Current Services</b>	<b>495</b>	<b>495</b>	<b>547,737</b>
2013 Program Change	45	45	343,126
<b>2013 Total Requested Budget Authority</b>	<b>540</b>	<b>540</b>	<b>890,863</b>
Total Change 2012 to 2013	146	146	190,901

The Working Capital Fund requests \$890.863 million and 540 FTE for the Fee for Service activity in FY 2013.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

**GSA Rent – Fee for Service Activity - \$93.808 million**

*Description of Service:* The WCF Rent Activity provides services such as assisting customers with initiating requests for new space and working with the General Services Administration (GSA) to identify procure and construct appropriate office space as well as managing space assignments and growth requirements for all existing locations within the DHS HQ National Capital Region (NCR) portfolio. Along with space management, the activity is also tasked with fairly allocating the rent costs incurred for each location among the components. Costs include rental payments to GSA, Federal Protective Service (FPS) charges and funding reimbursable agreements with GSA for overtime utilities. Centrally managing these costs and transactions enables us to provide greater efficiency.

Other responsibilities include managing and forecasting space and budget requirements and developing Housing Occupancy Plans to maximize the utilization of space. In order to provide effective customer service a Space/Rent Analyst is assigned to each Component.

*Managing Office:* Office of the Chief Administrative Services Officer

**Cost Allocation Methodology:** Customers are charged based on their occupied space in each building. The square footage is multiplied by the price per rentable square foot cost for each building. The per building rentable square foot price is based on GSA rent, and also includes Federal Protective Service (FPS), overtime utilities, antenna charges and DHS shared space.

**Full Time Equivalent (FTE):** This activity requires 5 FTE.

**FEDLINK (Library of Congress) – Fee for Service Activity - \$11.120 million**

**Description of Service:** The Department of Homeland Security (DHS) Library and Information Services' mission is to provide DHS program managers and their end users with timely desktop access to mission critical, authoritative, commercial information content products and services. The activity was established in 2004 to implement DHS-wide information assets supporting decision making, enforcement, investigation, research and academic information gathering activities of the DHS workforce. The activity collaborates with the Library of Congress (LOC) FEDLINK program through which the LOC shares its expertise in information services and consolidates the buying power for Federal agencies.

**Managing Office:** Office of the Chief Information Officer

**Cost Allocation Methodology:** The FY 2013 costing algorithm is based on three differing service types: enterprise-wide availability, account specific availability, and percentage of use.

**Enterprise-wide Availability:** Services available enterprise-wide are made available to all DHS personnel as identified by Internet Protocol (IP) authentication. The cost distribution for these services is based on FTE numbers approved by the Office of the Financial Officer. Examples of products provided under the enterprise-wide available service plan include subscription to Leadership Directories, Newsbank, EBSCO, ASTM, National Fire and Protection Association, and the Oxford English Dictionary.

**Account Specific Availability:** Services available based on specific account availability are accessed using vendor provided user names and passwords. The cost for these services is distributed based on the actual cost of the user subscription service including applicable FEDLINK fees. An example of products provided under this type of service plan is West Government Services, which is only used by certain DHS Components.

**Percentage of use:** Under this service plan, products and subscriptions can be accessed by all DHS Components by using user names and passwords. The cost for these services is distributed to each component organization based on prior usage percentages related to the annual product cost. An example of a product provided under this type of service plan is Westlaw.

**Full Time Equivalent (FTE):** This activity requires 4 FTE.

**Financial Management (Finance & Accounting Shared Services) – Fee for Service Activity - \$26.394 million**

**Description of Service:** The Office of the Chief Financial Officer (OCFO) provides authorization for financial systems used by DHS. OCFO sets policy, and manages the development, implementation, operation and maintenance of Departmental financial management systems and related business processes. The US Immigration and Customs Enforcement (ICE) perform selected financial management services for the DHS HQ offices on a reimbursable basis.

**Activities include:**

- **Financial Policies and Procedures:** In conjunction with all involved parties, ICE will support the implementation of any new or modified financial management procedures for processing and reporting financial transactions. ICE in conjunction with all parties involved will work to establish appropriate policies, procedures and standards for business process activities.
- **Administration (including Customer Service):** ICE will provide administrative tasks associated with ongoing management and resourcing of financial operations on behalf of the DHS customers. Examples of these activities include: Continuity of Operations Planning (COOP), customer outreach and evaluation of services, and financial management group meetings.
- **Financial Processing:** ICE will perform financial management transaction processing tasks. In collaboration with DHS OCFO, appropriate internal controls will be maintained by ICE to provide reasonable assurance that financial information is reported in compliance with all applicable laws, regulation and accounting standards and policies established by DHS. Specifically, these activities include, but are not limited to: collections and reimbursable agreements, disbursements, payroll processing and budgetary resources.
- **Financial Analysis, Reporting, and Statements:** ICE will provide financial statement reporting and issue resolution. ICE will maintain separate general ledger accounts within the Federal Financial Management System (FFMS) for the DHS customers and maintain the DHS customers balances on the accrual basis of accounting and in conformance with the U.S. Standard General Ledger (SGL) at the transaction level. Activities with respect to this function include, but are not limited to: general ledger maintenance, fund balance with Treasury, and financial management data.
- **External Reviews and Inquiries:** When appropriate, ICE will provide response to financial management and reporting related questions and data requests from external sources, such as independent auditors, the Inspector General's Office (IG), Government Accountability Office (GAO), and Congressional offices and staff.
- **Financial Systems:** Provide financial system support tasks. These activities include, but are not limited to: hosting and maintenance of Federal Financial Management System (FFMS); administration of contract for FFMS training; FFMS and E-travel User Access; FFMS and E-travel Help Desk; Support of DHS systems modernization efforts; and system updates and enhancements.

**Managing Office:** Office of the Chief Financial Officer

**Cost Allocation Methodology:** The cost allocation methodology for this activity is based on the actual cost derived from the Customer Billing Model (CBM) of the prior year plus a 2% inflation rate or inflation rate guidelines provided by the WCF. Cost allocation methodology for this activity is based on the historical cost of providing seven categories of financial support to each participating component. The seven categories of financial support services include the following: (1) financial reports, (2) obligations and payment processing, (3) system usage, (4) receipts, (5) payroll, (6) overhead, and (7) travel and cash management services.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

**Financial Statement Audit – Fee for Service Activity - \$19.799 million**

**Description of Service:** The DHS Office of the Inspector General (OIG) awards a contract to an independent Certified Public Accounting (CPA) firm to perform financial statement audit functions. The costs include travel and incidental costs associated with the performance of the audit as permitted by the contract maintained by the Office of the Inspector General as the Contracting Officer's Technical Representative (COTR). The award is made under a GSA schedule contract.

The Financial Statement Auditor is selected by the OIG through contracting procedures (with the Bureau of Public Debt (BPD) acting as the procurement office) and must stay independent from the DHS Components that are being audited.

The Office of the Chief Financial Officer coordinates and prepares the DHS consolidated financial statements and in this role acts as primary liaison for the auditors. All DHS Departmental CFOs coordinate with the OCFO Director of Financial Management to prepare financial statements and complete of the audit.

The Office of the Inspector General is the COTR for the Financial Statement Audit contract. The OIG has the following responsibilities:

- Contracting with an independent public accounting firm to perform the FY 2012 DHS financial statement audit
- Providing oversight of the contract auditor
- Providing estimated cost information that allows the OCFO to properly budget for audit costs
- Notifying the OCFO of any potential cost overruns and the related reasons
- Reviewing and approving invoices for payment.

**Managing Office:** Office of the Chief Financial Officer

**Cost Allocation Methodology:** The cost allocation methodology is the sum of the estimated auditor's billable hours multiplied by the hourly rate plus travel and incidental costs.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

### **Internal Control Audit - Fee for Service Activity - \$2.233 million**

**Description of Service:** A contract is awarded annually to provide internal control audit services. The selected auditor provides services through a time and materials contract which includes travel and incidental costs associated with the performance of the audit. The award will be made under a GSA schedule contract and the OIG acts as the COTR.

The Internal Control Auditor is selected by the OIG (with the Bureau of Public Debt acting as the procurement office) and must stay independent from the DHS components that are being audited.

The Office of the Chief Financial Officer coordinates the assessment process and acts as primary liaison for the auditors. All DHS Departmental CFOs coordinate with the OCFO Director of Financial Management in the preparation of and completion of the independent audit, and with the Director of the Internal Controls Program Management Office on management's assessment of internal controls.

**Managing Office:** Office of the Chief Financial Officer

**Cost Allocation Methodology:** Each Component pays for its own assessment by multiplying the auditor's estimated billable hours multiplied by the hourly rate plus travel and incidental costs.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

### **Financial Management Support (Financial Operations) – Fee for Service - \$4.223 million Activity**

**Description of Service:** The Office of Financial Operations (FO) is a line of business under WCF that provides financial management to the offices within the Office of the Secretary and Executive Management (OSEM), the Under Secretary for Management (USM), the Office of the Chief Financial Officer (OCFO), and the Office of the Chief Information Officer (OCIO). The WCF Financial Operations manages the processing of multiple types of financial documents and transactions for its customers as well as FedTraveler Help Desk Support.

This funding provides the personnel and materials to perform the following activities:

- Procurement requisition operations and management
- Invoice and Inter-governmental Payment and Collection System (IPAC) operations and management
- Travel operations support and management
- Payroll reclassification, reconciliation and reporting management
- Fiscal Year end close coordination and support
- Travel cards operations and management
- Purchase card operations management
- Overall financial management services and oversight

An internal control function will be added in FY 2012 to assess entity-level controls and conduct A-123 process assessments of financial reporting processes for General Ledger Management and

overseeing the reconciliation of the Fund Balance with Treasury for OSEM and USM offices. The internal control function - helps the Office of Financial Operations meet the requirements of the Federal Managers' Financial Integrity Act and provide the required annual internal control assurance to the Secretary for Departmental Management offices.

**Managing Office:** Office of the Chief Financial Officer

**Cost Allocation Methodology:** The cost allocation methodology is percentage of FTEs per office utilizing Financial Management Support multiplied by the total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requires 32 FTE.

**Bankcard Program - Fee for Service Activity- \$.055 million**

**Description of Service:** DHS has selected Customs and Border Protection (CBP) as the servicing agent to provide for a centralized invoicing and payment system for components within DHS. CBP has developed and implemented a system that supports the receipt of daily invoices for all of DHS.

This system assures payment of those invoices within one business day of receipt, and provides transmission of an electronic file containing transaction data to each component's accounting system.

**Managing Office:** Office of the Chief Financial Officer

**Cost Allocation Methodology:** The cost allocation methodology for this activity is based on the number of each component's processed bankcard transactions divided by the total number of bankcard transactions processed for all participating components, multiplied by total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

**Treasury Information Executive Repository (TIER) – Fee for Service Activity - \$.717 million**

**Description of Service:** The Treasury Information Executive Repository (TIER) is the application used by the DHS OCFO to create Department-wide financial statements. TIER is critical for monthly, quarterly, and annual reporting requirements and meeting accelerated timeframes for financial statement audit deliverables and producing the Annual Financial Report. TIER reduces the cost of producing financial statements in a timely manner.

**Managing Office:** Office of the Chief Financial Officer

**Cost Allocation Methodology:** The cost allocation methodology for this activity is average annual cost of the TIER software equally distributed to the components.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

**National Finance Center (NFC) Payroll/Services and Reporting – Fee for Service Activity - \$36.017 million**

**Description of Service:** Department of Agriculture/National Finance Center (NFC) provides Payroll/Personnel services utilizing their legacy mainframe systems (payroll) and EmpowHR PeopleSoft application (personnel). In addition, NFC provides payroll/personnel policy supports and benefits reconciliation, tax reporting, and payroll problem resolution.

**Managing Office:** Office of the Chief Human Capital Officer (CHCO)

**Cost Allocation Methodology:** The FY2013 cost estimate is based on the following for each Component:

<b>COST AREA</b>	<b>COST DRIVER</b>
Postage-Earnings and Leave and Personal Benefits Statements	Pieces of mail*
Treasury FMS Postage Charges for Single Address Checks	Checks mailed
USDA OIG Oversight of Non-USDA Payroll Processing	Avg # of employees paid
Payroll Operations Branch Support	Avg # of employees paid
Tax Reporting	Avg # of employees paid
Payroll Policy Support	Avg # of employees paid
e-Pay Policy Support	Avg # of employees paid
Benefits Reconciliation and Liaison Area	Avg # of employees paid
Debt Management	Receivables established
Claims	Claims processed
Payroll Accounting	Avg # of employees paid
Certification	Avg # of employees paid
Ad-Hoc reporting (based on CPU Minutes used)	CPU Minutes
Data Center Operations (Other than FOCUS)	Avg # of employees paid
Payroll/Personnel Baseline Services	Avg # of employees paid
3 <sup>rd</sup> Party Garnishment Processing	# of manual garnishment accounts & NFC labor cost

\* Through the Secretary’s efficiency review initiative, OCHCO has reduced Postage costs by more than 95% by implementing paperless E&L and Personal Benefits statements in FY11/FY12.

In addition to providing NFC Payroll/Personnel services and EmpowHR hosting, NFC also provides hosting services for the webTA (time and attendance) application.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

**HQ Human Capital Services -Fee for Service Activity- \$14.214 million**

**Description of Service:** The HQ Human Capital Services activity provides efficient and effective operational human resource services for HQ managers and employees. Examples of services provided include: staffing and recruitment; position classification/position management; performance management; payroll and personnel action processing; employee and labor relations support; retirements and benefits support; time and attendance support; delegated examining unit (DEU)

administration, audits and quality control services; and new employee and other leadership/supervisory training to support ongoing initiatives. HQ Human Capital Services also provides executive resources services assisting the HQ offices (including NPPD) in recruiting, hiring and on-boarding executives and political appointees. Example of services include: continued support/guidance upon entrance on duty; organization and coordination of statutory Executive Resources Boards; and Performance Review Boards to ensure adequate oversight of the Department's executive cadre.

The HQ HCS Team provides coordinated services to all DHS HQ customers, ensures timely and effective recruitment of staff, effectively manages the "on-board" staffing process (which includes security clearances and collaboration with the Personnel Security Office), and supports the efficient facilitation of staff exiting DHS HQ.

**Managing Office:** Office of the Chief Human Capital Officer

**Cost Allocation Methodology:** The cost allocation methodology is a pro-rata share based on the percent of each HQ Component's FTE divided by the total number of participating Components' FTE multiplied by the total estimated cost of the activity.

**Full Time Equivalent:** This activity requires 81 FTE.

#### **Human Capital Business Systems (HCBS) – Fee for Service Activity - \$7.750 million**

**Description of Service:** The mission of the HCBS activity is to maintain and support DHS enterprise-wide human capital business systems and reduce costs by consolidating the number and variety of DHS human capital systems. The systems' capabilities meet the requirements specified by the user-community and provide services in a timely and cost-effective manner.

HCBS supports several enterprise-wide systems to include: web-based time & attendance; personnel and payroll; and the Enterprise Integration Environment (EIE), which allows hosting and integration of enterprise application data. In each case, the components are supported by the HCBS unit in a collaborative and leveraged approach.

**Managing Office:** Office of the Chief Human Capital Officer

**Cost Allocation Methodology:** Costs are based on three billable areas: (1) estimated FTE costs for providing HCBS operational support; (2) operations and maintenance of the HR systems and hosting environment; and (3) estimated costs for operational support and reporting (contract labor hours).

The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's FTE divided by total participating Components' FTE multiplied by the total estimated cost of the activity. Customers will only be billed for the areas that they receive service for.

**Full Time Equivalent:** This activity requires 21 FTE.

#### **Flexible Spending Accounts (FSA) Administrative Costs – Fee for Service Activity - \$2.125 million**

**Description of Service:** FSAs are employee-funded accounts that are used by the employee account holders to pay for health-care and dependent-care costs with pre-tax dollars and which are not reimbursed by another source. Contributions to the accounts come from an employee's pre-tax salary; the government does not make a contribution. There are administrative fees charged by OPM and the service provider for medical-care and dependent-care accounts.

**Managing Office:** Office of the Chief Human Capital Officer

**Cost Allocation Methodology:** Component costs for this program are based on actual invoices received in October and March of each fiscal year. The March bill includes employees of record as of January 1 of the calendar year. The October bill makes an adjustment for new employees who have entered the program since January 1 of the prior fiscal year. The cost allocation methodology is based on components' current year actual participation rates.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

**DHS Senior Executive Service Candidate Development Program (SES CDP) – Fee for Service Activity - \$.966 million**

**Description of Service:** The DHS Senior Executive Service Candidate Development Program (SES CDP) is a key element in accomplishing the Secretary's goal of "One DHS". Previously, TSA, CBP, and USSS offered CDPs for mission critical employees. The Department is consolidating its multiple Candidate Development Programs and the "One DHS" CDP will be the only CDP offered moving forward. Candidates from across the Department will be exposed to a core training program, and will have the opportunity to participate in mentoring, developmental assignments, and other activities throughout the Department. Each candidate will be closely observed by an Executive Resources Board (ERB), either at DHS HQ or their operational component. The staff will work with candidates, mentors, developmental assignment supervisors, and members of ERBs, to closely evaluate the progress of each candidate. These evaluations will ensure the candidate is taking maximum advantage of developmental opportunities and modify developmental activities as necessary.

The DHS SES CDP serves as a cornerstone for sustaining a corporate leadership identity as directed in the DHS Strategic Plan, contributes to meeting our succession planning goals, and creates a high-quality SES leadership cadre. It is also a critical element in sustaining a "Green" rating on OMB's Human Capital Scorecard.

This centralized program complements and enhances the strengths of existing component leadership development initiatives across the Department and further facilitates succession planning opportunities. It provides the opportunity for participants to take advantage of developmental/rotational opportunities in other DHS components, thereby increasing participants' corporate DHS knowledge and experience. In addition, components benefit from these rotational assignments by having a senior staff person working with them on real issues and offering different perspectives and/or business experiences.

**Managing Office:** Office of the Chief Human Capital Officer

**Cost Allocation Methodology:** The costs are allocated based on the percentage of SES slots a component has relative to the total DHS SES (or SES equivalent) population excluding military.

**Full Time Equivalent:** This activity requires 4 FTE.

**HQ Executive Leadership Development Program (HQ ELDP) – Fee for Service Activity - \$.304 million**

**Description of Service:** The HQ Executive Leadership Development Program provides executive level training to close potential competency gaps in DHS’ Headquarters leadership. The ELD program offers training through the following programs: Treasury Executive Institute (TEI), Senior Executive Service (SES) Forum, Individual Executive Development Training, and general HQ Workforce Training to HQ components.

In addition to TEI and the SES forum training, the ELD program offers additional training opportunities and courses at the Management Development Center (Shepherdstown, WV) and the Federal Executive Institute (Charlottesville, VA). The ELD program is progressive in nature, offering learning and leader development training opportunities that support qualifications for higher-level management positions and ongoing refresher training to sustain current and relevant skill sets.

**Managing Office:** Office of the Chief Human Capital Officer

**Cost Allocation Methodology:** The cost allocation methodology is based on the total cost divided by the total population serviced and then multiplied by the Component percentage of the population.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

**HQ Employee Assistance Program (EAP) — Fee for Service Activity - \$.051 million**

**Description of Service:** The EAP provides services designed to help employees, managers, and organizations meet life challenges and remain healthy, engaged, and productive. EAP provides short-term counseling and referral for issues that are having an impact on an employee’s ability to work. The EAP will either address the concerns during counseling sessions, or through referrals to appropriate community resources, counselors, and other support services. Issues addressed by the EAP include: (1) life changes: divorce, new job, new baby, aging parents, grief/loss, retirement; (2) life challenges – drug/alcohol abuse, depression, eating disorders, mental illness; (3) job stress and burnout; and (4) coping with difficult situations or difficult people.

**Managing Office:** Office of the Chief Human Capital Officer

**Cost Allocation Methodology:** The cost allocation methodology is based on the total cost of the EAP program divided by the population serviced. This activity covers headquarter offices only.

**Full Time Equivalent (FTE):** This activity requires 0 FTE. **CIO/DHS Infrastructure Transformation (ITP) Program – Fee for Service Activity - \$52.254 million**

**Description of Service:** The DHS Consolidated IT Infrastructure has served the majority of employees of the Department since its establishment on March 1, 2003. When DHS was created the Department supported numerous legacy IT programs, 43 DHS run data centers, seven wide area networks, and multiple local area networks with overlapping system circuitry. Contrasting acquisition strategies and IT infrastructure policies among Components further complicated the DHS IT environment and the ultimate goal of moving to one DHS-wide IT infrastructure in a consolidated IT data center operational environment.

Infrastructure Transformation Program (ITP) is a group of interrelated initiatives designed to improve the Department's Information Technology (IT) infrastructure by unifying disparate Component information technology networks, platforms and services into a set of enterprise-wide IT services. It implements the DHS Chief Information Officer's (CIO) vision of One Infrastructure, which requires an integrated IT infrastructure to serve as the foundation for information sharing and agile responses to threats against the homeland. ITP was chartered by the Deputy Secretary as a DHS Level 1 investment with the following initiatives included in the scope of the transformation effort: network services, email services, data center, and wireless. A majority of the ITP WCF activity supports DHS enterprise-wide IT infrastructure O&M activities for Network Services (OneNet). OneNet provides the foundation for DHS's Information Sharing Environment (ISE). DHS's unclassified, classified and secret networks utilize OneNet for information transport. OneNet also centralizes wide area networks, network and security operations centers; and contributes to the creation of a robust, reliable, scalable, secure, survivable, and cost-effective infrastructure to support Components across the DHS IT Enterprise.

ITP resides within the IT Services Office (ITSO) of the DHS CIO. ITP is managed by the ITSO Enterprise Services Division (ESD) and is led by the Director of ESD and a CIO Council member executive sponsor. Furthermore, ITP is supported by a senior executive steering group of CIOs, which is staffed by a team of technical experts hired by the Department HQ from the Components, several Components' working group members, and contractor support.

**Managing Office:** Office of the Chief Information Officer

**Cost Allocation Methodology:**  $\text{Component Contribution to DHS IT Infrastructure Investment} / \text{Total DHS IT Infrastructure Investment} = \text{Customer Percent}$ .  $\text{Customer Percent} \times \text{Total Charges} = \text{Customer Charges}$

**Full Time Equivalent (FTE):** This activity requires 17 FTE.

**National Capital Region Infrastructure Operations (NCRIO) – Fee for Service Activity - \$198.578 million**

**Description of Service:** The NCRIO serves the DHS Headquarters (HQ), select Department Components, and field offices for network and internet/intranet access; management and delivery of desktop computing applications and equipment, email, wireless communications, video (VTC), voice (phone) and messaging; communications security; and IT operations disaster planning and mitigation to ensure continuous operations. The NCRIO manages and maintains all deployed applications for full functionality and continuous availability of unclassified and classified networks, as well as full functionality of file and data storage and retrieval, printing, and remote access. The NCRIO

coordinates management and delivery of these services with build-out of new facilities and provides customer service through a 24/7 help desk.

In providing these services, the NCRIO adheres to applicable executive orders, Presidential directives, other Federal laws, management policies, handbooks, guidelines, processes, and procedures. The NCRIO continually monitors vendors' performance and technology to ensure that DHS HQ IT infrastructure services conform to specified standards for reliability, readiness, sustainability, supportability, availability, stability, security, flexibility, responsiveness and cost effectiveness. The NCRIO tracks workload data by functional service area to identify trends and statistical variations, and provides technical, logistical and financial forecasts for future years. The NCRIO conducts baseline assessments of its existing systems and infrastructure against industry standards for items such as configuration and performance metrics. Using the results of baseline evaluations, the NCRIO maintains a program for the improvement of information technology services.

The NCRIO resides within the IT Services Office (ITSO) of the DHS CIO. NCRIO is managed by the ITSO Customer Relationship Management Division (CRMD). NCRIO is led by the Director of CRMD. Cost-and activity-based analyses, are conducted, and validated by the ITSO Budget and Financial Management Division (BFMD), independent of NCRIO management. Senior executive management of the DHS HQ Directorate Components formed a review group to identify and resolve customer service issues in monthly meetings with the DHS CIO.

***Managing Office:*** Office of the Chief Information Officer

***Cost Allocation Methodology:*** The FY 2013 WCF submission is allocated among the participating organizational Components based on their total number of accounts on the network as determined by the Global Address List (GAL). For Classified Land Area Network (C-LAN), costs are driven by the number of Component accounts and devices. For Unclassified Land Area Network (A-LAN), the non-discrete costs are shared across the total number of network accounts, with the Component being charged for their prorated share of the total network accounts. A Component's discrete costs; e.g. wireless and circuits, are billed directly to the Component based on their actual consumption of these services.

***Full Time Equivalent (FTE):*** This activity requires 73 FTE.

**Enterprise License Agreements (formerly Microsoft) – Fee for Service Activity - \$102.463 million**

***Description of Service:*** This service allows Components to leverage DHS buying power by consolidating license requirements into a single enterprise-wide procurement. The activity further helps to decrease costs, reduce paperwork and save time by eliminating the need for repetitive, individual purchases from vendors. The Department continues to pursue opportunities to benefit from economies of scale, moving from Component or office specific software or hardware licenses to larger enterprise licenses for common services. The four existing WCF ELAs are:

***Microsoft:*** In the spirit of the Federal Acquisition Streamlining Act (FASA), DHS and Dell Marketing, L.P. decided to re-enter into a single Blanket Purchase Agreement (BPA) for a DHS-wide Microsoft Enterprise License Agreement to standardize office automation and communication

applications across the Component agencies' existing IT environments. The account provides for the funding and management of the Microsoft Enterprise Agreement awarded in June 2009, which provides enterprise access to the Microsoft suite of products. The products include the software needed for individual desktops, laptops, and server platforms, such as MS Office, MS Project, MS Visio, MS Advanced Server, etc. This license agreement is utilized by all of DHS and this budget request reflects the contractual obligations of each of the Components.

**Adobe:** The Secretary's Efficiency Review Board tasked the OCIO with establishing an Adobe Enterprise License Blanket Purchase Agreement (Adobe BPA) to provide DHS desktops and servers with the suite of Adobe products. The Adobe BPA reduces costs, eliminates inconsistent licensing, takes advantage of economies of scale to ensure the best pricing and streamlines the procedures required to procure all Adobe licenses for the Department. The Adobe BPA includes all Adobe products offered on the Adobe authorized resellers' GSA Schedule, and provides immediate Adobe Acrobat licensing for all DHS Components. This agreement is utilized by all of DHS. The request reflects the contractual obligations of each of the Components.

***Governance Board Approved ELAs for FY2013 Budget Submission***

**Oracle:** DHS negotiated a BPA for Oracle software products and miscellaneous services associated with Oracle software. The award of this DHS-wide ELA allows the DHS HQ and its Components to purchase Oracle program licenses, technical support services and training, as well as level-set all existing maintenance, at the most competitive pricing available. The terms of the BPA also allow for the transfer of all existing Oracle licenses owned by DHS to the new BPA. The Department-wide vehicle not only allows for the timely, renewal of software maintenance for the Department's (110,000+) Oracle licenses, but also allows for the purchase of additional software, software licenses, and software-associated products and services by Components when needed (and at greatly reduced prices) between consolidated purchase cycles.

**Symantec:** DHS negotiated a maintenance only BPA for Symantec maintenance coverage for all DHS Components. The award of this DHS-wide ELA allows the DHS HQ and its Components to purchase Symantec software maintenance, technical support services and training, as well as level-set all existing maintenance, through co-termination of existing contracts, at the most competitive pricing available.

**Managing Office:** Office of the Chief Information Officer

**Cost Allocation Methodology:** The annual costs are based on the total number of existing licenses multiplied by the pre-negotiated cost of licenses plus an administrative fee.

**Full Time Equivalent (FTE):** This activity requires 3 FTE.

**Office of Procurement Operations – Fee for Service Activity - \$47.529 million**

**Description of Service:** The DHS Office of Procurement Operations (OPO) provides full service acquisition support to OSEM, USM, S&T, USCIS, NPPD, OHA, OIG, A&O, DNDO and USVISIT. In addition, the OPO provides acquisition services for department-wide acquisition initiatives identified by both the Chief Information Officer and the various commodity councils within DHS.

Services provided include acquisition planning, training, execution, and administrative services.

**Managing Office:** Office of the Chief Procurement Officer

**Cost Allocation Methodology:** The sum of the each customer-aligned division's cost and their assigned pooled costs and administrative costs is the full cost of acquisition services support and is the amount of reimbursement that is charged to each of OPO's customers. In the case of the Department Operations Acquisition Division (DOAD), the full cost is further disaggregated and charged to each of its 15 customers according to their respective percentage of DOAD's total procurements.

**Full Time Equivalent (FTE):** This activity requires 256 FTE.

**Enterprise Data Center Consolidation - Migration – Fee for Service Activity - \$64.797 million**

**Description of Service:** The Enterprise Data Center activity will continue to use the WCF as the mechanism to pool Congressionally-designated migration funds to move Component systems and applications to the two DHS Enterprise Data Centers (EDCs) for central DHS management in FY 2013. This includes: discovery, migration planning, and scheduling activities, as well as the first 90 days of Operations and Maintenance (O&M) costs specifically related to systems/applications that will transition to the DHS Data Centers in FY 2013.

**Managing Office:** Office of the Chief Information Officer

**Cost Allocation Methodology:** DHS Components make payments into the Data Center Consolidation WCF activity in accordance with Congressionally appropriated Data Center Consolidation funding. This funding is coordinated with the approved consolidation schedule. Migration allocations are determined by the costs, as estimated by the Components, to physically relocate the application/system from the legacy data center to one or both of the DHS Enterprise Data Centers (EDCs).

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

**Department of Homeland Security**  
**Working Capital Fund**  
**Tri-Bureau Service Activity**  
**Program Performance Justification**  
(Dollars in Thousands)

**PPA: Tri-Bureau Service Activity**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	-	-	<b>34,251</b>
<b>2012 Enacted Budget Authority</b>	-	-	-
<b>2013 Current Services</b>	-	-	-
<b>2013 Total Requested Budget Authority</b>	-	-	-
Total Change 2012 to 2013	-	-	-

The Working Capital Fund does not request any funding for Tri-Bureau Service Activities in FY 2013 due to the discontinuation of data center services from the Department of Justice. In FY 2012, all data center requirements were met through the DHS data centers.

**Department of Homeland Security**  
**Working Capital Fund**  
**Government Wide Mandated Service Activity**  
**Program Performance Justification**  
(Dollars in Thousands)

**PPA: Government Wide Mandated Service Activity**

Working Capital Fund requests \$32.178 million and 7 FTE for this activity in FY 2013.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

**Interagency Council Funding - Government-wide Service activity - \$.878 million**

*Description of Service:* GSA provides oversight and administers the Interagency Council funds in consultation with the Chief Financial Officers Council, the Chief Information Officers Council, the Federal Acquisition Council and the Chief Human Capital Officers Council.

- Chief Financial Officers (CFO) Council funding supports the following activities:
  - Federal Audit Clearing House (FAC) - Disseminates audit information to Federal agencies and the public, supports OMB oversight and assessment of Federal award audit requirements, and assists Federal cognizant and oversight agencies in obtaining OMB Circular A-133 data and reporting packages.
  - Grants Streamlining – Implements P. L. 106-107, the Federal Financial Assistance Management Improvement Act of 1999. It also proposes a standard format for Federal agency use in announcing discretionary grant and cooperative agreement funding opportunities.
- Chief Information Officers (CIO) Council funding supports the following activities:
  - A contract to support the Portfolio Management Office for the ongoing e-government initiatives efforts.

- Federal Enterprise Architecture (FEA) —identifies and develops collaboration and consolidation opportunities across Federal agencies.
- Federal Acquisition Council (FAC) funding supports the following activities:
  - The Federal Competitive Sourcing Database (FCSD) Facilitates comprehensive, consistent, and timely reporting of government actions related to competitive sourcing.
  - Acquisition Workforce Competency Development and Training - Funds the Acquisition Career Management Information System (ACMIS) database which provides workforce training data and OPM data to make strategic workforce decisions that affect the agency training and certification requirements.
  - Government-wide Performance Measures for Socio-Economic Goals - Small business success is currently measured by meeting established statutory goals.
  - The Service Acquisition Reform Act (SARA), Acquisition Advisory Panel and Report to Congress - Section 1423 of SARA requires the Administrator of OMB’s Office of Federal Procurement Policy to establish an advisory panel of recognized experts in acquisition law and policy to review laws and regulations regarding the use of commercial practices, performance-based contracting, the performance of acquisition functions across agency lines of responsibility, and the use of government-wide contracts.
  - Acquisition Center of Excellence - SARA mandates the development and maintenance of a Center of Excellence in Contracting for Services.
- Chief Human Capital Officers Council (CHCO) funding supports the following activities:
  - CHCO website - Provides a vehicle for sharing and exchanging information of interest to the Federal human resource management community. The system provides a forum for the exchange of information among members of the Council in both a public and private manner.

**Managing Office:** Office of the Chief Financial Officer

**Cost Allocation Methodology:** The cost allocation methodology for this activity is pro-rata share based on the percent of each component’s adjusted total budget divided by DHS’s total adjusted budget (excluding grant funding) multiplied by the total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

**USAJOBS (formerly Recruitment One-Stop) -Government-wide Service activity - \$1.182 million**

**Description of Service:** The USAJOBS initiative is a government-wide initiative led by the Office of Personnel Management (OPM). All agencies fund their portion of this program (based on employment levels). Regulations contained in 5 CFR Parts 330, 333, and 335 implement section 4 of Public Law 1054-52 and authorizes OPM to charge fees to agencies in order to pay the cost of providing Federal employment information and services.

USAJOBS Federal Employment Information System delivers state-of-the-art on-line recruitment services to job seekers, simplifying the process of locating and applying for Federal jobs. It delivers a number of job seeker focused features including intuitive job searching; clean, concise, understandable and attractive job announcements; on-line resume submission; applicant data-mining; and on-line feedback on status and eligibility.

**Managing Office:** Office of the Chief Human Capital Officer

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's Full Time Equivalent (FTE) divided by the total DHS civilian FTE multiplied by the total estimated cost of the activity.

This activity only benefits civilian personnel; therefore, military FTE are not included in the cost allocation methodology.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

### **e-Training – Government-wide Service Activity - \$10.916 million**

**Description of Service:** Provides an enterprise approach to leveraging technology to support learning and development programs, initiatives, and capabilities. This includes an enterprise architecture approach to modernize and reduce the complexity of DHS Learning Management Systems (LMS'); building enhanced capability through tools such as web conferencing; and closing existing and future gaps in structured learning opportunities by providing every DHS employee access to over 3,000 online courses and 12,000 online books. Government-wide accomplishments derived from this activity are:

- Centralized procurement of primary DHS LMS' in use, providing greater visibility to CFOs, CIOs, and all DHS management regarding costs;
- Consistent, standardized delivery of all legislatively-mandated training to all DHS employees (and contractors where appropriate), launched IT security courses mapped to the Government Information Security Reform Act (GISRA) and the National Institute of Standards and Technology requirements;
- A 21<sup>st</sup> Century approach to training in critical areas such as Emergency Medical Technician training by assisting in the coordination of DHS Modeling and Simulation activity in regards to training; and
- Compliance with OPM and OMB requirements for reporting Enterprise Human Resources Integration training data for all DHS Federal civilian employees.

**Managing Partner:** Office of Personnel Management

**Managing Office:** Office of the Chief Human Capital Officer

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's Full Time Equivalent (FTE) divided by DHS's total FTE (excluding military) multiplied by total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requires 7 FTE.

**Enterprise Human Resources Integration – Government-wide Service Activity - \$3.740 million**

**Description of Service:**

Enterprise Human Resources Integration (EHRI) is one of five Office of Personnel Management (OPM) led e-Government initiatives designed to leverage the benefits of information technology. EHRI is responsible for maintaining the integrity of the electronic Official Personnel Folder (eOPF), which protects information rights, benefits, and entitlements of federal employees.

Through on-demand Web-based access to personnel folders, EHRI eOPF enables 24/7 concurrent access to personnel information by Human Resources (HR) staff, managers, and employees. It also allows the electronic transfer of the eOPF from one agency to another when the employee moves from one organization to another. The suite of EHRI analytical tools and a comprehensive Data Warehouse provides on-demand, custom reports to forecast the personnel needs of the Federal Government.

**Managing Partner:** Office of Personnel Management

**Managing Office:** Office of the Chief Human Capital Officer

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's Full Time Equivalent (FTE) divided by DHS's total FTE (excluding military) multiplied by total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

**e-Rulemaking – Government-wide Service Activity - \$.354 million**

**Description of Service:** e-Rulemaking is a collaborative, interagency activity designed to establish a common, automated and integrated approach to managing the Federal government's rulemaking function. The activity consolidates rulemaking systems at the various departments and agencies and is centrally managed through a web-based environment offering functionality such as one-stop access, search capabilities, and public commenting. e-Rulemaking activities include:

- Expanding public understanding of the rulemaking process
- Improving the quality of Federal rulemaking decisions
- Increasing the amount, breadth, and ease of citizen and intergovernmental participation in rulemaking
- Administering Regulations.gov, a cross-agency, front-end Web application that posts and allows comments on proposed Federal agency rules
- Writing memoranda to the President's Management Council (PMC), directing agencies to include a link to Regulations.gov on agency homepages and in the synopsis of the notice of any regulatory action requesting public comment

- Posting the dockets for nearly 300 Federal agencies, including DHS, on EPA's online system.

**Managing Partner:** Environmental Protection Agency

**Managing Office:** Office of the Chief Information Officer

**Cost Allocation Methodology:** The cost allocation methodology for this activity is pro-rata share based on the percent of each participating component's adjusted total budget divided by DHS's total adjusted budget (excluding grant funding) multiplied by the total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

**e-Grants – Government-wide Service Activity - \$.331 million**

**Description of Service:** e-Grants create a single portal for all Federal grant customers to find, apply for, and manage grants on-line. The Grants.gov storefront provides electronic functionality for applicants and grantees and reduces the paper-based processes that previously challenged the Federal grants environment. The initiative is designed to reduce inefficiencies, meet e-Gov goals, and provide benefits to both citizens and the government. Specifically, the initiative enables the government to meet many of the streamlining activities required by Grants Policy Committee and the Federal Financial Assistance Management Improvement Act, such as deploying a unified search/find capability for grant opportunities, standard data sets, and a common mechanism and processes for applying for Federal grants funds.

**Managing Partner:** Department of Health and Human Services

**Managing Office:** Office of the Chief Information Officer

**Cost Allocation Methodology:** The cost allocation methodology is a pro-rata share based on the percent of each Component's grant funding divided by DHS's total grant funding multiplied by total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

**Human Resources Line of Business (HRLoB) – Government-wide Service Activity - \$.214 million**

**Description of Service:** Historically, the Federal government has taken an agency centric approach to delivering human resources services to government employees. Agencies have their own human resources (HR) missions, staffs, management practices and technology. While it is appropriate for agencies to maintain control of some HR practices, it is also appropriate for some of the other HR practices – those that are transactional in nature and not clearly linked to agency missions – be taken out of the agency domain. This frees up agency resources to do the more valuable, strategic HR work.

The Human Resources Line of Business (HR LOB) initiative is tasked to consider business benefits and impacts and propose a service delivery model that preserves some HR functions at the agency

level – where it is appropriate – and that redirects other HR functions to federal HR service centers. Over time, as the federal HR service centers evolve and expand their capabilities, more and more functions will shift to the service center delivery mode.

**Managing Partner:** Office of Personnel Management

**Managing Office:** Office of the Chief Human Capital Officer

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's Full Time Equivalent (FTE) divided by DHS's total FTE multiplied by the total estimated cost of the activity. This activity only benefits civilian personnel; therefore, military FTE is not included in the cost allocation methodology.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

**Geospatial Line of Business (LoB) – Government-wide Service Activity - \$.062 million**

**Description of Service:** The Geospatial LoB is designed to further refine the opportunities for optimizing and consolidating Federal geospatial-related investments to reduce the cost of government and, improve services to citizens. Cross-agency coordination of geospatial activities can identify, consolidate, and reduce or eliminate redundant geospatial investments. The Geospatial LoB will result in a more coordinated approach to producing, maintaining, and using geospatial data, and will ensure sustainable participation from Federal partners to establish a collaborative model for geospatial-related activities and investments.

**Managing Partner:** Department of Interior

**Managing Office:** Office of the Chief Information Officer

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's adjusted total budget divided by DHS's adjusted total budget (excluding grant funding) multiplied by total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

**e-Gov Integrated Acquisition Environment Loans And Grants– Government-wide Service Activity - \$.188 million**

**Description of Service:** The Federal Funding Accountability and Transparency Act of 2006 (FFATA) requires OMB to “ensure the existence and operation of a single searchable website, accessible by the public at no cost to access ♦♦♦ that includes information on each Federal award. The law specifically requires a unique identifier for the entity receiving the award and of the parent entity of the recipient, should the entity be owned by another entity. Some contracts (and some grants) already require Data Universal Numbering System (DUNS) numbers. This will allow those areas to feed information into the FFATA portal.

**Managing Partner:** General Services Administration

**Managing Office:** Office of the Chief Information Officer

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's FTE, divided by DHS' total FTE and multiplied by total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

**Budget Formulation and Execution Line of Business (BFELoB) – Government-wide Service Activity - \$.104 million**

**Description of Service:** The focus of the Budget Formulation and Execution Line of Business (BFELoB) is to build a "budget of the future" by promoting information sharing across government agency budget offices and building a "community of practice." With this collaboration, the budget community can start to identify best practices for all aspects of budget formulation and execution. The BFELoB strives to find solutions that link budget formulation, execution, planning, performance, and financial information. Areas of particular interest include technology, budget performance integration, data collection and tracking, financial management integration, and human capital.

**Managing Partner:** Department of Education

**Managing Office:** Office of the Chief Information Officer

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's adjusted total budget divided by DHS's adjusted total budget (excluding grant funding) multiplied by total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

**e-Gov Benefits – Government-wide Service Activity - \$.163 million**

**Description of Service:** The e-Gov Benefits activity provides a single point of access for citizens to locate and determine eligibility for government benefits and services, GovBenefits.gov. The site's core function is the eligibility prescreening questionnaire or "Benefit Finder." Answers to the questionnaire are used to evaluate a visitor's situation and compare it with the eligibility criteria for more than 1,000 Federally-funded benefit and assistance programs. Each program description provides citizens with the next steps to apply for any benefit program of interest.

**Managing Partner:** Department of Labor

**Managing Office:** Office of the Chief Information Officer

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's civilian Full Time Equivalent (FTE) divided by DHS's total civilian FTE multiplied by total estimated cost of the activity.

*Full Time Equivalent (FTE):* This activity requires 0 FTE.

**Grants Management Line of Business (GMLoB) – Government-wide Service Activity - \$.059 million**

*Description of Service:* The Grants Management Line of Business (GMLoB) is a Government-wide solution to support end-to-end grants management activities that promote citizen access, customer service, and agency financial and technical stewardship. Its objective is to establish common target architecture approaches, best practices, and business process and system solutions in grants management. GMLoB plans to support consortiums as points of consolidation for Grants Management. GMLoB aims to be a full-circle business process for grants, from application intake through closeout of the award and financial payout. GMLoB also provides federal assistance funding for competitive and noncompetitive awards.

*Managing Partner:* Department of Health and Human Services

*Managing Office:* Office of the Chief Information Officer

*Cost Allocation Methodology:* The cost allocation methodology is a pro-rata share based on the percent of each organization element's grant funding divided by DHS's total grant funding multiplied by total estimated cost of the activity.

*Full Time Equivalent (FTE):* This activity requires 0 FTE.

**Financial Management Line of Business (FMLoB) – Government-wide Service Activity - \$.142 million**

*Description of Service:* The Financial Management Line of Business (FMLoB) goals are to define, analyze, and implement options that will enhance cost savings in the financial management systems, provide for standardization of business processes and data models, promote seamless data exchange between Federal agencies, and strengthen internal controls through integration of core financial and subsidiary systems. The FMLoB's current objective is to improve the cost, quality, and performance of financial management reducing the number of noncompliant systems by leveraging common standards, shared service solutions, and implementing other government-wide reforms that foster efficiencies in Federal financial operations.

*Managing Partner:* General Services Administration

*Managing Office:* Office of the Chief Information Officer

*Cost Allocation Methodology:* The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's adjusted total budget, divided by DHS' adjusted total budget (excluding grant funding) and multiplied by total estimated cost of the activity.

*Full Time Equivalent (FTE):* This activity requires 0 FTE.

**e-Gov Integrated Acquisition Environment – Government-wide Service Activity - \$1.668 million**

**Description of Service:** The e-Gov Integrated Acquisition Environment (IAE) is a Presidential e-Government initiative managed by GSA. IAE supports and automates the procurement process through the use of shared systems which are required by regulation.

**Managing Office:** Office of the Chief Procurement Officer

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the average percentage of each component's number of procurement transactions, dollar value of procurement transactions and number of procurement personnel.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

### **e-Gov Disaster Management – Government-wide Service Activity - \$12.178 million**

**Description of Service:** The Federal Emergency Management Agency (FEMA) has developed a Public Web Strategic Plan that focuses on achieving greater cost efficiencies, improving ease of access to key disaster preparedness and assistance information for the American public, and instituting an agency wide, web-centric culture for information sharing and collaboration. The focus of the Disaster Management (DM) Program supports this plan by ensuring that the information that is relevant to disaster survivors, the general public and the emergency management community is organized and presented in a manner that engages and improves the overall user experience. Adopting a new, up-to-date content management system (CMS), consolidating websites, centralizing operational and maintenance costs, and standardizing the way information is presented are key goals of the plan. The end result is to make the public web presence for FEMA a primary medium for information exchange in a manner that is cost effective, easier for all to use and maintain, and which has a much greater range of capabilities, including Web 2.0 functionality, all of which will help instill an internal web-centric culture within the programs across the agency.

**Managing Partner:** Federal Emergency Management Agency

**Managing Office:** Office of the Chief Information Officer

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's level of participation in disaster management divided by the total sum of all Component levels of participation in disaster management multiplied by the total estimated cost of the activity. Levels of participation are determined by measuring a Component's active participation in 16 sixteen elements of disaster management, as defined by Disaster Management e-Government Initiative Program Office within FEMA. The 16 elements of Disaster Management include the following: (1) transportation, (2) communications, (3) public works and engineering, (4) firefighting/incident command system, (5) information and planning, (6) mass care, (7) resource support, (8) health and medical services, (9) search and rescue, (10) hazardous materials, (11) food, (12) energy, (13) warnings and alerts, (14) research and development, (15) emergency/domestic preparedness, and (16) disaster relief. The 16 elements are the cost drivers for each component's assessment and because many components are involved in various activities at different levels of participation, the cost for this activity is fairly uniform across the components.

***Full Time Equivalent (FTE):*** This activity requires 0 FTE.

**Department of Homeland Security  
Working Capital Fund  
DHS Cross Cutting Activities  
Program Performance Justification  
(Dollars in Thousands)**

**PPA: DHS Cross Cutting Activities**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	<b>4</b>	<b>4</b>	<b>9,784</b>
<b>2012 Enacted Budget Authority</b>	<b>2</b>	<b>2</b>	<b>17,703</b>
2013 Adjustments-to-Base	2	2	(2,788)
<b>2013 Current Services</b>	<b>4</b>	<b>4</b>	<b>14,915</b>
2013 Program Change	-	-	57
<b>2013 Total Requested Budget Authority</b>	<b>4</b>	<b>4</b>	<b>14,972</b>
Total Change 2012 to 2013	2	2	(2,731)

The Working Capital Fund requests \$14.972 million and 4 FTE for DHS Cross-Cutting Activities in FY 2013.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

**Capital Planning And Investment Control (CPIC) – DHS Crosscutting Activity- \$7.639 million**

*Description of Service:* The Capital Planning and Investment Control (CPIC) process is a DHS Secretary’s Crosscutting Activity, and is required to comply with budget preparation guidance provided by OMB Circular A-11, and management guidance provided by OMB Circular A-130. Policy direction and process for DHS is provided by Management Directive 102 – Acquisition Management and Management Directive 1330 on Planning Programming, Budgeting and Execution (PPBE). This Activity provides services to support these efforts, including automated tools to assist with portfolio analyses, document preparation, document review and scoring, formal training, informational briefings, and remedial coaching to improve business case quality. It supports the Project Management Offices in preparing decision packages for DHS investment review boards at key acquisition decision points in their projects’ life cycle. CPIC is also the central point for the Department’s response to OMB initiatives and priorities on investment management, currently focusing on such Control Phase areas as consolidation, earned value management, and periodic project review.

*Managing Office:* Office of the Chief Information Officer

**Cost Allocation Methodology:** The Component's cost allocation methodology is based on the following factors: Number of Component Exhibits 300/Total DHS Exhibits 300 - % Contribution of Component X Total Cost of CPIC = Component Contribution for CPIC (Consolidated 300's will be distributed back to Components based on actual contribution shares).

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

**Strategic Sourcing – DHS Crosscutting Activity - \$2.105 million**

**Description of Service:** The Strategic Sourcing Program Office (SSPO) is responsible for implementing a Department-wide approach to acquiring goods and services. SSPO provides DHS stakeholders economic and performance benefits through collaboration, rigorous analysis, and enterprise planning for acquisition initiatives. The SSPO collaborates with stakeholders to develop, deploy, and maintain sourcing strategies that enhance mission performance, improve acquisition efficiency, and optimize commodity management.

**Managing Office:** Office of the Chief Procurement Officer

**Cost Allocation Methodology:** FY 2013 WCF assessments were allocated to components proportional to the average of the following two factors: (1) savings on DHS-wide contract vehicles and (2) spend excluding simplified acquisition spend. Data from Federal Procurement Data System-Next Generation is used to determine savings and spend by Component.

**Full Time Equivalent (FTE):** This activity requires 4 FTE.

**CPO Shared Reporting – DHS Crosscutting Activity - \$5.228 million**

**Description of Services:** The CPO Shared Reporting activity provides the DHS acquisition workforce with eProcurement systems and tools which leverage investment costs and promote competition, transparency, integrity and consistency.

**Managing Office:** Office of the Chief Procurement Officer

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the average percentage of each component's number of procurement transactions, dollar value of procurement transactions and number of procurement personnel.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

<b>2013 Current Services</b>	<b>8</b>	<b>8</b>	<b>1,312</b>
2013 Program Change	-	-	(6)
<b>2013 Total Requested Budget Authority</b>	<b>8</b>	<b>8</b>	<b>1,306</b>
Total Change 2012 to 2013	-	-	(326)

Working Capital Fund requests \$1.306 million and 8 FTE for this activity in FY 2013.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

**Working Capital Fund Operations – WCF Management Activity - \$1.306 million**

**Description of Service:** The Working Capital Fund Operations office manages the WCF and provides policy, procedures, budget formulation, execution and customer dispute resolution services. Services are provided to the activity managers as well as customer Components across DHS.

**Budget Formulation Services:**

- Oversee budgets, and perform or direct financial management duties and responsibilities.
- Provide direction and assistance to program managers in the development of operating plans, budgets, and supporting documents relating to use of the WCF.
- In coordination with the Director of Financial Operations, make recommendations on operating plans, rate structures and activities to be supported by the fund.

**Budget Execution Services:**

- Review financial reports for conformance with program and financial plans, and inform senior management and program officials of trends and changes.

**Managing Office:** Office of the Chief Financial Officer

***Cost Allocation Methodology:*** The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's WCF assessment amount divided by the total WCF assessment multiplied by total estimated cost of the activity.

***Full Time Equivalent (FTE):*** This activity requires 8 FTE.

## IV. Program Justification Changes

**Department of Homeland Security  
Working Capital Fund  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 1:** Financial Statement Audit  
PPA: Fee for Service Activity  
Program Increase: Positions 0, FTE 0, Dollars \$774

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	19,005
Program Increase							-	-	774
<b>Total Request</b>	-	-	<b>13,643</b>	-	-	<b>19,107</b>	-	-	<b>19,779</b>

### *Description of Item*

The DHS Office of the Inspector General (OIG) awards a contract to an independent Certified Public Accounting (CPA) firm to perform financial statement audit functions. The costs include travel and incidental costs associated with the performance of the audit as permitted by the contract maintained by the Office of the Inspector General as the Contracting Officer's Technical Representative (COTR). The award is made under a GSA schedule contract.

### *Justification*

In FY 2011, the Department received a qualified opinion on its audited Consolidated Balance Sheet and Statement of Custodial Activity. For FY 2012 and beyond, the Secretary and Senior Leadership have placed an emphasis on progressing to an unqualified opinion on a full scope audit, which includes the audit of three additional financial statements: (1) Statements of Net Cost; (2) Statements of Changes in Net Position; and (3) Statements of Budgetary Resources, and related note disclosures. The OIG has indicated that achieving a full scope audit will increase billable hours by approximately 30%. In addition, the National Flood Insurance Program will also receive an audit of its Balance Sheet.

### *Impact on Performance*

The FY 2011 audit is the result of management improvements throughout DHS, which we will continue to build upon as we strengthen and mature management processes and standards across the

Department. The Department is committed to expanding the scope of our audit, with the goal of obtaining an audit opinion on all financial statements. Without an increase in budget authority, it is unlikely that the Department will be able to complete a full scope audit in FY 2013.

**Department of Homeland Security**  
**Working Capital Fund**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 2:** Internal Control Audit  
PPA: Fee for Service Activity  
Program Increase: Positions 0, FTE 0, Dollars \$367

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	1,866
Program Increase							-	-	367
<b>Total Request</b>	-	-	<b>1,289</b>	-	-	<b>1,875</b>	-	-	<b>2,233</b>

***Description of Item***

The Internal Control over Financial Reporting is conducted in conjunction with the Financial Statement Audit. The contract includes internal control audit services with the auditor providing the services through a time and materials contract. The cost includes travel and incidental costs associated with the performance of the audit as permitted by the contract maintained by the OIG as the COTR. The award will be made under a GSA schedule contract.

***Justification***

In FY 2011, the Department received a qualified opinion on its audited Consolidated Balance Sheet and Statement of Custodial Activity. For FY 2012 and beyond, the Secretary and Senior Leadership have placed an emphasis on progressing to an unqualified opinion on a full scope audit, which includes audit of the internal controls associated with three additional financial statements: (1) Statements of Net Cost; (2) Statements of Changes in Net Position; and (3) Statements of Budgetary Resources, and related note disclosures. To achieve a full scope audit the OIG has indicated this will increase billable hours by approximately 75%. Since CBP already receives a full scope audit the likely increase in the billable rate is marginal at 5%.

***Impact on Performance***

The FY 2011 audit is the result of management improvements throughout DHS, which we will continue to build upon as we strengthen and mature management processes and standards across the Department. The Department is committed to expanding the scope of our audit, with the goal of

obtaining an audit opinion on all financial statements. Without an increase in budget authority, it is unlikely that the Department will be able to complete a full scope audit in FY 2013.

**Department of Homeland Security**  
**Working Capital Fund**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 3:** Financial Accounting and Shared Services  
PPA: Fee for Service Activity  
Program Increase: Positions 0, FTE 0, Dollars \$1,391

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	25,004
Program Increase							-	-	1,391
<b>Total Request</b>	-	-	<b>27,393</b>	-	-	<b>25,209</b>	-	-	<b>26,395</b>

***Description of Item***

The Department of Homeland Security (DHS) Office of the Chief Financial Officer (OCFO) provides authorization for financial systems in DHS and sponsors, sets policy, and manages the development, implementation, operation and maintenance of the departmental financial management systems and related business processes. It has been determined by the DHS OCFO that selected financial management services will be obtained from U.S. Immigration and Customs Enforcement (ICE), hereafter referred to as ICE, on a reimbursable basis. Financial services provided by ICE are assessed according to the following categories: (1) financial reports, (2) obligations and payment processing, (3) system usage, (4) receipts, (5) payroll, (6) overhead, and (7) travel and cash management services.

***Justification***

The cost allocation methodology for this activity is based on the historical cost of providing seven categories of financial support to each participating component. The seven categories of financial support services include the following: (1) financial reports, (2) obligations and payment processing, (3) system usage, (4) receipts, (5) payroll, (6) overhead, and (7) travel and cash management services. The FY 2013 request is \$1.391 million more than the FY 2012 request level based on the projected increases in transactions, contract costs, rent, administrative costs, plus overhead IT cost for each component.

**Impact on Performance**

Without the increase in budget authority the Financial Accounting and Shared Services activity would be required to reduce its level of financial management support to the DHS HQ offices.

**Department of Homeland Security**  
**Working Capital Fund**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 4:** NCR Infrastructure OPS  
PPA: Fee for Service Activity  
Program Increase: Positions 0, FTE 0, Dollars \$51,428

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							73	73	147,149
Program Increase							-	-	51,428
<b>Total Request</b>	<b>61</b>	<b>61</b>	<b>119,892</b>	<b>30</b>	<b>30</b>	<b>148,010</b>	<b>73</b>	<b>73</b>	<b>198,577</b>

***Description of Item***

The National Capital Region Infrastructure Operations (NCRIO) serves the DHS Headquarters' and Component users for network, email, internet, intranet, and telecom infrastructure, as well as all end-user desktop computing, telecommunications, and wireless services. The OCIO's IT Services Office (ITSO) coordinates the management and deployment of infrastructure resources along with the infrastructure build-out of new facilities and provides continuous IT operations, service desk, vendor management, financial management, and technology evaluation.

***Justification***

The DHS NCRIO will incur an increase in costs for network storage and connectivity in FY2013, specifically due to the addition of 6,000 users to the NCR as a result of the Federal Protective Service (FPS) transition and the USCG move to the St. Elizabeth's campus. The NCRIO currently has authority from the Working Capital Fund Governance Board (WCFGB) to deliver IT infrastructure services to DHS HQ Components and St. Elizabeth's tenants accessing the DHS HQ unsecured network (ALAN) and to all DHS Components accessing the top secret network (CLAN). Prior to FY2013 FPS was a part of the ICE organization and will be coming into the DHS HQ organization under NPPD in FY2013. USCG will not be part of the DHS HQ organization but will be located at St. Elizabeth's which has been acknowledged to be part of the National Capital Region (NCR) and therefore now considered a part of the NCRIO. An increase in funding is necessary to provide for the expansion of services within the NCR. This overall growth necessitates procuring more IT personal and shared file storage space with the data center service providers, additional circuit bandwidth, as well as circuit redundancy for effective continuity and sustainment of daily operations. An increased cost for network infrastructure backbone equipment and software is associated with the increase of NCRIO users, as much of the current equipment is obsolete and no longer supported by the vendor

under a maintenance contract due to its age. Because of the increased customer base, additional service desk and end-user support personnel will be needed across the DHS Headquarters and Component operational sites. In addition to requirements associated with the increased number of direct users, in FY13 the NCRIO faces increased costs for its disaster recovery initiative. In the event of a catastrophic disaster, data recovery will provide uninterrupted IT services through [explain how]. These initiatives are necessary to strengthen and provide continuity of operations and management to the DHS network served by the NCRIO.

### ***Impact on Performance***

The initiatives described and the operations and maintenance of existing capabilities is necessary to achieve DHS' objective of improved IT performance and continuity of operations for system users. These enhancements also support the DHS strategic goal to strengthen and unify the Department's ability to share information and services internally and with Federal, State, local, tribal, international and private industry partners, strengthen and unify DHS Operations and Management.

DHS cannot properly operate and achieve its mission without reliable and consistent information technology and telecommunication services. The services required by DHS Components must be both predictable and recurring, because they cannot function without continuous information technology or telecommunications services. Without additional investment in disaster recovery, DHS Headquarters and Component missions would be greatly impacted during mass system outages that could occur during times of catastrophic disaster.

If additional customers are added without funding, the NCRIO WCF activity would be required to reduce or eliminate certain levels of IT service to all users in order to absorb the increase in requirements driven by user growth and the move to the St. Elizabeth's Campus.

**Department of Homeland Security**  
**Working Capital Fund**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 5:** Enterprise License Agreement  
PPA: Fee for Service Activity  
Program Increase: Positions 1, FTE 1, Dollars \$40,385

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							2	2	62,078
Program Increase							1	1	40,385
<b>Total Request</b>	<b>2</b>	<b>2</b>	<b>52,511</b>	<b>2</b>	<b>2</b>	<b>62,486</b>	<b>3</b>	<b>3</b>	<b>102,463</b>

***Description of Item***

This service allows Components to consolidate license requirements into a single enterprise-wide procurement to leverage DHS buying power. The activity further helps to decrease costs, reduce paperwork and save time by eliminating the need for repetitive, individual purchases from vendors. The Department continues to pursue opportunities to benefit from economies of scale, moving from Component or office specific software or hardware licenses to larger enterprise licenses for common services.

Historically, the existing Microsoft Enterprise Software License Agreement Working Capital Fund (WCF) provided for the funding and management of only the Microsoft Enterprise Software License Agreement. This activity has been expanded to include additional Enterprise License Agreements (ELAs) as the agreements are developed, including the Adobe Enterprise Software License Agreement, Oracle Enterprise Software License Agreement, Symantec Software Products, and Miscellaneous Services Agreements.

***Justification***

The existing Microsoft Enterprise Software License Agreement WCF provided for the funding and management of only the Microsoft Enterprise Software License Agreement, which provides enterprise access to the Microsoft suite of products. The products include the software needed for individual desktops, laptops, and server platforms, such as MS Office, MS Project, MS Visio, MS Advanced Server, etc. In FY 2012, the Adobe Enterprise Software License Agreement was added. For FY 2013, the activity is expanded to include the Oracle Enterprise Software License Agreement and Symantec

Software Products and Miscellaneous Services Agreement. This expansion of the existing WCF enables the Department to:

- More fully achieve the Federal Acquisition Streamlining Act (FASA) strategic goals and ensure a centralized funding and tracking mechanism for department wide software licenses.
- Create a WCF activity for ELAs that will allow DHS the ability to reduce the time and resources required to procure multiple license maintenance plans across the Department with multiple periods of performance.
- Negotiate more aggressive pricing on the purchase of software licenses and maintenance plans by leveraging all software spend across the Department.

These Enterprise Software License Agreements are utilized by all of DHS and reflect the contractual obligations of each of the Components. In addition, future expansion of this WCF activity is envisioned to include other Department-wide Enterprise Software and Hardware License Agreements.

### ***Impact on Performance***

This activity helps the agency to fulfill FASA requirements. It also helps to ensure legal licensing of all desktops and servers deployed throughout the enterprise. In addition, it implements governance over the contract vehicle through which enterprise licenses are purchased by DHS Component organizations. The failure to fund this program will limit the ability to service users, gain efficiencies of scale, and maintain information sharing across the DHS.

**Department of Homeland Security**  
**Working Capital Fund**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 6:** Enterprise Data Center O&M  
PPA: Fee for Service Activity  
Program Increase: Positions 34, FTE 34, Dollars \$180,778

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							34	34	180,778
<b>Total Request</b>	-	-	-	-	-	-	<b>34</b>	<b>34</b>	<b>180,778</b>

***Description of Item***

Components have been mandated to transition all systems and applications into the two DHS Enterprise Data Centers (EDCs). DHS receives an annual appropriation from Congress, specifically to continue system and application migration to the two DHS EDCs and closure of targeted legacy data centers, along with performing other activities to migrate systems from Component legacy data centers to the EDCs, including discovery, migration planning, and scheduling activities. The funds are requested to be included into the DHS Working Capital Fund (WCF) for centralized management and transparency.

Historically, DHS Office of the Chief Information Officer (OCIO) has funded the construction and the bulk of the operations and maintenance (O&M) costs associated with the establishment of the two EDCs. Currently Components with existing systems in the two data centers are paying for O&M costs through a fee-for-service chargeback mechanism. Components that are receiving migration funds through the WCF have three months of O&M costs included in their migration funds to cover the costs of O&M while they are transitioning into the data centers, but will be responsible for paying the sustained O&M costs once they are fully transitioned. In 2013, the Department proposes to move costs for ongoing O&M at the two EDCs into the WCF, as these are steady-state, recurring charges to the customers.

For the proposed methodology of collecting funds, the WCF would be used to collect annual option period O&M and rack rate fees from Customer applications that are known or existing as of the point in time when the WCF budget is formulated. Customers that do not meet the criteria will be billed as a Direct/Reimbursable Collection until the WCF is able to capture their O&M and rack fees via reprogramming or in future budget years, whichever is sooner.

### ***Justification***

The Data Center Consolidation WCF activity will provide the means by which to manage the funding for the on-going O&M at the EDCs. The WCF will allow DHS to act as a single bill payer to the data center service providers, will reduce necessary procurement activities, and will allow for greater transparency and more effective management of the goods and services being provided to the Department. By allowing for the central management of the contracts between Data Center providers, the Enterprise Data Center activity enables Components to focus their resources on their missions, rather than contracting and administrative support for acquiring data center services.

As Components migrate to the EDCs, the Department will eliminate further investments in legacy Component data center operations, including continuity of operations, maintenance, support, security certification and accreditation. The Department current projection for cost avoidance is \$2.8 billion through FY 2030. By including the on-going O&M collections in the WCF, the Department is able to achieve further benefits by ensuring that the service provider contracts are fully funded and paid on time, providing customers advance notice of future charges and reducing workload and time associated with executing interagency agreements. The table below outlines the projected FY 2013 O&M cost by Component.

**FY 2013 Enterprise Data Center**  
(dollars in thousands)

<b>Component</b>	<b>FY 2013*</b>
U.S. Customs and Border Protection	22,900
Federal Law Enforcement Training Center	7
U.S. Immigration and Customs Enforcement	19,153
Transportation Security Administration	10,471
Federal Emergency Management Agency	13,076

<b>TOTAL</b>	<b>180,778</b>

\*Costs include customer's existing and projected O&M, enterprise, and overhead charges for applications in the two EDCs

### ***Impact on Performance***

This increase provides funding for the on-going Component O&M requirements at the two EDCs. This action directly relates to *DHS Strategic Goal 3: "Protect Critical Infrastructure"*, *Strategic Objective 3.2 to "Ensure Continuity of Government Communications and Operations"*, and *DHS*

*Strategic Goal 5:” Strengthen and Unify DHS Operations and Management”*, *Strategic Objective 5.1 “Improve Department Governance and Performance”*. This action also directly supports OMB’s Federal Data Center Consolidation Initiative to promote the use of Green IT by reducing the overall energy and real estate footprint of government data centers; reducing the cost of data center hardware, software and operations; increasing the overall IT security posture of the government; and shifting IT investments to more efficient computing platforms and technologies.

When migrations to the EDCs are complete, DHS anticipates significant overall cost savings to exceed hundreds of millions of dollars per fiscal year after the ‘Break Even’ as projected in FY 2020. Cumulative savings/cost avoidance from FY 2019 thru FY 2030 is \$2.8 billion.

***Description of Item***

The Identity Management Division (IMD), a division of the Office of the Chief Security Officer (OCSO), is a central headquarters (HQ) program that is charged with managing HSPD-12 across DHS through the issuance of a secure and reliable form of identification for its workforce and the modernization of the Department’s Physical Access Control Systems (PACS) located within an estimated 16,000 DHS facilities and sites. IMD will provide the necessary guidance and tools to facilitate this Department-wide program, creating a unified approach and solution, improving asset protection through secure and trusted facility access, enabling interoperability through standardization, achieving cost avoidance through the reduction of redundant infrastructures, and facilitating compliance with HSPD-12 and OMB M-11-11.

The HSPD-12 program supports DHS with services and technology to establish the DHS HSPD-12 infrastructure and issue DHS Personal Identity Verification (PIV) cards to customers. The HSPD-12 program will provide the following services to DHS customers: infrastructure services; policy development, governance, and compliance; service management; logistics and asset management; and PACS modernization services.

IMD is currently providing these services for all DHS users of the Identity Management System (IDMS). The IMD business activity coordinates: PIV card issuance functions at DHS PIV Card Issuance Facilities (PCIF) nationwide; HSPD-12 technology evaluation for future DHS use; continuous project management support for the deployment of enrollment/card issuance workstations (EIWS) to 1,049 DHS facilities/sites nationwide; vendor management and oversight of existing contracts; and budget and financial management. In addition, IMD coordinates PACS modernization activities across DHS, which includes the development of strategy, metrics, policy, and architectures

along with coordinating, managing, and monitoring the implementation of compliant PACS solutions across the DHS Enterprise.

The services have been provided to customers by a cadre of Government personnel and federal contractors. Since the standing up of HSPD-12, IMD Government personnel have primarily provided executive direction, planning, oversight, and only in some instances, direct service to end users. Federal contractors have provided technical and EIWS support to end users through contracts that are acquired, monitored, and managed by the IMD.

### ***Justification***

In February 2010, OMB directed DHS to identify funding for deploying, operating, and maintaining HSPD-12 in FY 2011 and future fiscal years. In addition, OMB directed the OCSO to centrally manage the funding via the Working Capital Fund to obtain HSPD-12 services and products for DHS HSPD-12 PIV card management. In FY 2011 and FY 2012, the HSPD-12 program is centrally managed by OCSO and executed under the Economy Act via Interagency Agreements (IAA) with DHS Components outside of the WCF. Although this is being requested as a new activity in FY 2013 within the WCF, this program has been an ongoing operation within DHS.

The Department will establish operational PCIFs nationwide from 25 to more than 300 by the end of FY 2013 to support borders, airports, ports of entry, Joint Field Offices for disasters, and other designated locations. The shared locations will avoid redundancies to ensure the Department gain economies of scale.

The OCSO requests inclusion of the HSPD-12 program within the WCF to gain Component efficiency and effectiveness by increasing interagency collaboration and synchronization in establishing and implementing a framework to provide mutually beneficial logistical and operation support. Of the \$23 million request for the HSPD-12 program, \$1.5 million will be used to fund 9 FTE to assist in management, oversight, and card issuance, \$15.7 million is estimated to fund the anticipated contractual requirements for PIV card program, and \$5.8 million for other costs including equipment purchases, travel, ancillary supplies, and printing services provided by GPO. The overarching rationale for a DHS-wide, centrally managed approach is as follows:

- A DHS-wide program approach will allow the Department to establish a performance-based contract, tied to defined metrics and issuance targets;
- Sharing credentialing resources among the Components for PIV card issuance will reduce redundancy and decrease card costs;
- The Department is more likely to obtain volume discounts for HSPD-12 related services and products if they are purchased collectively;
- A unified program approach will allow the Department to establish cohesive management structures. This will increase accountability and maintain program focus on meeting established program objectives and timelines; and
- Components have been actively engaged in defining the program strategy, aligning the program with Component-specific needs, and supporting a unified centrally managed approach.

### ***Impact on Performance***

The HSPD-12 Program will enhance the DHS effort of “Goal 7. Maturing and Strengthening the Homeland Security Enterprise” and is aligned to manage identification standards activity with the objective to improve DHS’s organizational and programmatic alignment and its management systems and processes.

IMD is currently reviewing the below metrics and developing a “system dashboard” to facilitate reporting to Components.

<b>Performance Area</b>	<b>Performance Standard</b>
Average PIV Processing Time	< 20 minutes
Average Cards Issued per EIWS	> 20 per day
Help Desk Responses to All Inquires	< 24 hours
EIWS Availability	> 99%
EIWS Availability Notification	> 95%
EIWS Return to Service	< 4 hours
PCIF Security Compliance Walkthroughs	Annually
System Role Account Activation/Deactivation	< 72 hours
EIWS New User Training	< 30 days upon receipt of Role Request
IDMS Software Release/Updates	< 30 business days of release

Current Services Level							-	-	-
Program Increase							1	1	467
<b>Total Request</b>	-	-	-	-	-	-	<b>1</b>	<b>1</b>	<b>467</b>

***Description of Item***

This WCF activity consists of a computerized system to facilitate environmental impact review of DHS activities, as required by the National Environmental Policy Act of 1970 (NEPA). These reviews may be required at any level of the organization; therefore the system is available to DHS employees to enter project related information. In addition to automating what is currently a manual process, the system will establish a standard of review and the capability to identify common issues and share best practices across the enterprise. Examples of DHS activities that may require this environmental impact review include but are not limited to organizational changes, federal assistance, construction, operations, purchasing, and research and development.

***Justification***

In FY13, EP&HP DSS requests I position and 1 FTE and \$.467K in total resources. The FTE will manage EP&HP DSS programmatic and contractual /hosting requirements. This will be the first fiscal year where the EP&HP DSS will be funded by the WCF. Through the use of a standard automated review process, the activity will decrease the total cost of environmental reviews, increase efficiency, improve the workflow of environmental reviews, and increase the quality of environmental reviews throughout the department. EP&HP DSS activity identified the potential for the cost avoidance derived from the system implementation to be over \$3,102,907 per year. System capabilities automate the current manual ad-hoc processes for project proponents to track the status of the reviews, supervisors to schedule workloads for environmental personnel, and program managers to collect the number and types of environmental reviews used in their component. The system will allow components to increase governance over personnel who conduct environmental reviews and allow those approved employees to focus on the review and not the collection of project information.

Currently the Department and Components conduct these reviews using a collection of locally evolved manual methods, involving reviewers to search for information, rework of information between proponents and reviews, absence of administrative record of review, no work flow oversight for supervisors and unqualified individuals conducting reviews.

***Impact on Performance***

If the FY 2013 EP&HP DSS requirements are approved the Department will be able to lower its cost of conducting environmental reviews.

<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>1,241</b>

***Description of Item***

The 2008 Federal Continuity Directive-1 (FCD-1) requires the Department to have an agency-wide methodology to contact and account for DHS personnel in the event of a man-made or natural emergency. Currently, each Component (including Headquarters) maintains its own processes for contacting and/or accounting for personnel: TSA and CBP utilize a combination of call-back procedures with some automation; USCG is using a pilot automated accountability system from the Department of Navy’s Space and Naval Warfare Systems Command (SPAWAR); while the remaining Components rely on manual telephone tree call-down procedures. Due to a lack of reliability in process and practice, the Department’s current capability to account for personnel has consistently fallen short of the standards that all executive departments and agencies must meet under FCD-1.

In early FY2011, the Office of the Chief Human Capital Officer (OCHCO) performed a Requirements Analysis, and an Analysis of Alternatives that evaluated several automated systems. OCHCO selected FEMA’s Emergency Notification System (FEMA ENS) as the automated system to provide the required accountability functionality for all of DHS. While the final four automated systems considered were all capable of meeting the FCD-1 and DHS’ requirements, the FEMA ENS is currently operated and maintained within the DHS infrastructure, thus increasing the Department’s ability to ensure accountability service and reliable data availability during an emergency.

FEMA ENS has been operating for 10 years and is currently used by six Components for emergency notification. It will concurrently implement the FCD-1 and DHS Enterprise -wide requirements for personnel accountability. Additionally, the Department will be the system’s sole personnel accountability customer, thus ensuring consistency in personnel data gathering, status information, and the lowest risk to guaranteed service. The current FEMA ENS will be enhanced, through the

acquisition of an additional module (Global Alert Link), to provide the additional capability needed to provide a uniform DHS-wide Personnel Accountability System (DHS PAS).

### ***Justification***

The Statutory requirements for PAS are:

- National Security and Presidential Directive-51 / Homeland Security Presidential Directive-20 (May 2007)
- National Continuity Policy Implementation Plan (August 2007)
- Federal Continuity Directive 1 (FCD-1). This directive provides specific direction to the Executive Branch of the Federal Government for developing continuity programs and plans.

In May 2007, the President approved the National Continuity Implementation Plan (NCIP) to ensure that all Federal departments and agencies continue to carry out the most critical functions necessary to lead and sustain the Nation during a catastrophic emergency. The NCIP requires each agency develop the relevant policies, procedures, and processes to address its continuity of operations. The 2008 Federal Continuity Directive-1 (FCD-1) defines the critical elements of an effective continuity program. Specifically, in Section J, Human Capital Functions, the Directive states that agencies must implement a process to contact and account for all staff in the event of an emergency.

### ***Impact on Performance***

Without a consistent reliability in process and practice, the Department's current capability to account for personnel has consistently fallen short of the standards that all executive departments and agencies must meet under the 2008 Federal Continuity Directive-1 (FCD-1). For example, during the H1N1 Pandemic Influenza situation in 2009, OCHCO was once again unable to provide the most basic personnel reporting, or provide general information on simple requests i.e., "How many people have reported to duty today?" The only information OCHCO could provide was a minimum of two weeks old and based on time and attendance records from the previous pay period. Implementation of the DHS PAS system will mitigate many of these challenges by automating personnel contact function during an emergency situation.

**Department of Homeland Security**

**Working Capital Fund  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 10:** Data Center Migration  
 PPA: Fee for Service Activity  
 Program Increase: Positions 0, FTE 0, Dollars \$64,797

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	64,797
<b>Total Request</b>	-	-	<b>121,311</b>	-	-	<b>70,000</b>	-	-	<b>64,797</b>

***Description of Item***

OCIO requests \$64.797M to complete migration for CBP, TSA, and USCIS. Data Center Migration provides funding to Components to consolidate and assist migrating data center environments to the two enterprise-wide DHS data centers. By creating two redundant data centers, DHS is committed to the integration, consolidation, and the transformation of individual Component infrastructures into a single, world-class IT infrastructure capable of supporting the significant demands required of an organization of more than 200,000 employees.

Through the migration effort, Components relocate their existing or new applications to the two data centers; thus occupying a number of racks in the data centers and paying for the charges associated with this occupancy.

***Justification***

The purpose of this request is to continue execution of the planned timeline to migrate Component information systems, applications and disaster recovery facilities to the DHS Enterprise DCs. This will enable continued closures of the major Component data centers and achieve the Secretary’s goal of the Department’s consolidation to two data centers across the enterprise.

The transition to the DHS Enterprise DC architecture is standardizing IT resource acquisitions across all DHS Components, as well as streamlining the maintenance and support contracts, allowing for less complex vendor support and expediting response times during emergencies. Benefits derived from the transition to the DHS Enterprise DCs include increased security, enhanced operability, and long-term cost avoidances. DHS is placing information systems behind Trusted Internet Connections, thus

removing exposure of essential functions to those that would exploit weaknesses. Migration makes technologies available as easily ordered services and provides for DHS-wide standardization.

The funding will allow DHS to adhere to the following migration schedule:

<b>FY13 Migration Funding - Work Breakdown Schedule - OMB Passback</b>		
<b>Component</b>	<b>Projects/Tasks</b>	<b>\$64.797M</b>
<b>CBP</b>	Completion of all remaining Newington (NDC) CBP systems to DC1 and DC2	34.745
	Project management, planning and engineering	1.000
	<b>Total</b>	<b>35.745</b>
<b>TSA</b>	Completion of TTAC consolidation activity	10.755
	Colorado Springs Operations Center (CSOC)	
	Annapolis Junction Operations Center (AJOC)	
	Completion of National Traffic Safety Board (NTSB) Site- FAMS (Ashburn, VA) consolidation	2.000
	Project management, planning and engineering	
<b>Total</b>	<b>12.755</b>	
<b>USCIS</b>	Completion of Manassas TECC (Development & Test) consolidation	15.297
	Completion of consolidation of systems to DHS Data Centers: • Service Centers (California, Texas, Nebraska) • HQ (DC) • Records/Benefits Center (Missouri)	1.000
	Project management, planning and engineering	
	<b>Total</b>	<b>16.297</b>
<b>Grand Total</b>		<b>64.797</b>

***Impact on Performance***

This funding allows CBP, TSA, and USCIS to complete migration per the above schedule. It enables the OCIO to manage funding on IT infrastructure investment and operations and maintenance in support of the Department’s front-line operations as well as assurance of meeting the DHS’s contractual liabilities to the managed service providers.

***Description of Item***

The DHS e-Training initiative is focused on strengthening and unifying DHS operations and management by taking an earned value approach to Information Technology Portfolio Management (IT PFM) in support of employee learning and development (L&D). Through consolidated systems and aligned business processes, the Advanced Distributed Learning Program Management Function (ADL PMF) within the Office of the Chief Human Capital Officer (OCHCO) serves to eliminate Department redundancies while increasing overall access to the highest quality ADL products and services. e-Training directly supports several government-wide initiatives as explained below. This activity benefits the Federal government, the Department, and the individual employee by:

- Reducing redundancies and achieving economies of scale in the purchase, deployment, and management of ADL technology infrastructure (e.g., Learning Management Systems (LMS), Learning Content Management Systems (LCMS) and/or other Information Technology (IT) hardware/software for Human Capital Performance Support (HCPS) tools), and the consolidation and/or sharing of hardware/software;
- Reducing redundancies and achieving economies of scale in the purchase and/or development of e-Learning courses and content (e.g., commercial-off-the-shelf (COTS) or custom-developed content to meet specific agency needs);
- Leveraging components of existing learning systems (e.g., LMS, LCMS, IT hardware, or HCPS tools) where clear value propositions exist;
- Offering user-friendly, one-stop access to a robust and high-quality learning environment;
- Encouraging ADL investments as part of a strategic, systematic, and continuous development of DHS human capital; and

- Fostering communication between Federal Human Resources Development (HRD) practitioners government-wide to identify, prioritize and develop solutions to issues of interest within the community, and to share best practices and resources where synergies are evident.

### ***Justification***

In FY 2013, the Department's projected funding requirements for this activity will increase by \$0.483 million from \$10.433 million to \$10.916 million to fund licensing support costs and an increase in dependency on centralized custom courseware development. e-Training directly supports the Department's strategic human capital management activity as defined in the Homeland Security Act (HR 5005), Title XIII, Section 1304 and academic training as described in Section 1331; the President's Management Agenda for e-Gov Initiatives; both the Office of Personnel Management's e-Training and Enterprise Human Resource Integration initiatives; and, specifically, Katrina Lessons Learned Recommendation 115.<sup>3</sup>

e-Training provides an enterprise approach to leveraging technology, to support learning and development programs, initiatives and capabilities. This includes an enterprise architecture approach to the modernization and reduction in complexity of DHS Learning Management Systems (LMS), building enhanced capability through tools such as web conferencing and closing existing and future gaps in structured learning opportunities by providing every DHS employee access to over 3,000 online courses and 12,000 online books.

### ***Impact on Performance***

The FY 2013 increase in funding will allow e-Training to continue to support the following critical goals:

- Further leverage simplicity thru reductions in Department-wide Information Technology (IT) infrastructure and redundancies in DHS-wide training needs; and
- Serve as key component to the DHS Chief Learning Officer's Strategy for establishing a Homeland Security University System.

**Department of Homeland Security**  
**Working Capital Fund**

***Description of Item***

The DHS Strategic Sourcing Program Office (SSPO) is responsible for implementing a Department-wide approach to acquiring goods and services. SSPO provides DHS stakeholders economic and performance benefits through collaboration, rigorous analysis, and enterprise planning for acquisition initiatives. SSPO collaborates with stakeholders to develop, deploy, and maintain sourcing strategies that enhance mission performance, improve acquisition efficiency, and optimize commodity management.

***Justification***

For FY 2013, SSPO requests an adjustment to base of 2 positions and 2 FTE in accordance with the DHS Balanced Workforce Initiative. Additionally, SSPO requests a program increase of \$.057K resulting from contractor conversions and improvements in operating efficiencies. SSPO previously had full time contractor support that it has since converted to government FTE positions.

***Impact on Performance***

SSPO establishes Department-wide contract vehicles to leverage DHS' buying power, receive the lowest price possible, and eliminate redundant acquisitions. The FY13 decrease in WCF funding indicated above is due to improved management efficiencies and will have minimal impact on overall SSPO performance.

**Department of Homeland Security**

<b>Total Request</b>	-	-	<b>1,668</b>	-	-	<b>1,443</b>	-	-	<b>1,668</b>

***Description of Item***

The eGov Integrated Acquisition Environment (IAE) activity is a secure business environment that facilitates and supports cost-effective acquisition of goods and services in support of mission performance. IAE reimburses the General Services Administration (GSA), the eGov Portfolio Manager, for DHS' share of costs associated with the IAE systems and program:

- Wage Determinations On-Line
- Online Representations and Certifications
- Federal Procurement Data System
- Federal Business Opportunities
- Electronic Subcontracting Reporting Systems
- Excluded Parties List System
- Central Contractor Registration
- Federal Agency Registration
- Dun and Bradstreet
  
- Managing Partner:
- Under Secretary for Management
- Office of the Chief Procurement Officer
- Office of Strategic Support
- Acquisition Systems Branch

***Justification***

With the funding increase of \$.237 million, e- Integrated Acquisition Environment (IAE) as the Presidentially-mandated e-Gov initiative charged with creating a government-wide "environment" of acquisition related systems will continue to support federal acquisition throughout all federal agencies. It constitutes approximately 17 operational systems supporting federal buyers and their own contract

writing system, which is PRISM for DHS. PRISM is directly dependent on the IAE, and interfaces with more than one of the IAE systems.

***Impact on Performance***

The increase in funding will allow DHS to reimburse the General Services Administration (GSA), the eGov Portfolio Manager, for DHS' share of actual costs associated with the IAE systems and program.

***Description of Item***

The Department of Homeland Security (DHS) Library and Information Services’ mission is to provide the DHS program managers and their end users with desktop access to mission critical, authoritative, timely, relevant, commercial information content products and services. The activity was established in 2004 to implement DHS-wide information assets supporting decision making, enforcement, investigation, research and academic information gathering activities of the DHS workforce. The activity collaborates with the Library of Congress (LOC) FEDLINK program through which the LOC consolidates the buying power for federal agencies.

***Justification***

The DHS Library and Information Services activity was established in 2004 to implement the functional integration of DHS-wide information assets supporting decision making, enforcement, investigation, research and academic information gathering activities for the DHS workforce.

In FY2013, the Department’s projected funding requirements for this activity will decrease by \$20.268 million from \$31.305 million to \$11.119 million due to a projected decrease in usage of service and account requests. The Department has strived to reduce the costs of subscriptions, publications, electronic journals, data base subscriptions and books.

***Impact on Performance***

If the FY 2013 consolidated subscription services requirements are approved the Department will continue offering subscription services to the Components thru the LOC Fedlink program.

**Department of Homeland Security**

***Description of Item***

The General Services Administration (GSA) provides workspace and related services for over 100 Federal client agencies serving more than one million workers through the Public Buildings Service (PBS). GSA also provides related real estate services including the operation and maintenance of buildings and out-leasing programs. GSA’s Computer Integrated Facility Management Program uses cutting edge technology to look at the buildings life cycle. Real estate services provided to clients appear in Federal agencies monthly electronic rent bills.

The Department has established a clearing account to expedite the payment of WCF GSA rent billings for the Department of Homeland Security headquarters offices, excluding the major Components, which pay their rent expenses directly to GSA. The monthly WCF bills include all GSA-controlled space that the Department headquarters occupies, including parking spaces allotted to the Department.

***Justification***

The net decrease of \$1.041 million in the rent cost is due revised projections in current GSA Rent customer’s occupancy agreements. In addition, the GSA Rent activity incorporated FPS as new customer into the activity. FPS is now under NPPD, their 37,474 sq ft headquarters location at 800 N Capital St will be also be added under the WCF for a total rent cost of \$2.2M.

***Impact on Performance***

If the FY 2013 rent requirements are not approved there will be an impact on meeting the Departments rent obligations to GSA and FPS.

***Description of Item***

The Office of Financial Operations (OFO) provides financial management to the offices within the Office of the Secretary and Executive Management (OSEM), the Under Secretary for Management (USM), the Office of the Chief Financial Officer (OCFO), and the Office of the Chief Information Officer (OCIO).

This funding provides the personnel and materials to perform the following budget execution activities:

- Procurement Requisition Operations and Management
- Invoice and IPAC Operations and Management
- Travel Operations Support and Management
- Payroll Reclassification, Reconciliation and Reporting Management
- Purchase Card Operations Management

***Justification***

In FY 2013, the Department’s projected funding requirements for this activity will decrease by \$.017 million from \$4.239 million to \$4.223 million due to improved financial management efficiencies.

***Impact on Performance***

The requested funding for FY 2013 will allow the Financial Management Operations branch to resource to continue providing financial management services the DHS HQ offices.

***Description of Item***

The HQ Service Center provides coordination and oversight support for outsourced services supporting HQ Human Capital operational needs. The HQ Services provide the following: Staffing and Recruitment; Position Classification/Position Management; Performance Management; Payroll and Personnel Action Processing; Employee and Labor Relations Support; Retirements and Benefits Support; Time and Attendance Support.

***Justification***

In FY 2013, the Department’s projected funding requirements for this activity will decrease by \$.046 million from \$14.260 million to \$14.214 million to provide continued operational oversight of all HQ Human Services due to improved management efficiencies.

***Impact on Performance***

The requested FY 2013 funding level will allow the HQ Service Center to continue providing staffing services, recruitment and on-boarding processes for the Department.

***Description of Item***

The mission of the HCBS is to design, develop, acquire, implement, maintain and support DHS enterprise-wide human capital business systems and reduce costs by consolidating the number and variety of DHS human capital systems maintained.

HCBS offers several enterprise-wide systems to include: web-based Time & Attendance; Personnel and Payroll; and other enterprise HR services and applications to include supporting the Enterprise Integration Environment (EIE), which allows hosting and integration of enterprise application data. In each case, the components are supported by the HCBS unit in a collaborative and leveraged approach.

***Justification***

In FY 2013, the Department’s projected funding requirements for this activity will decrease by \$.015 million from \$7.766 million to \$7.750 million due to improved management efficiencies in delivering enterprise-wide system support to the components.

***Impact on Performance***

The requested funding level will allow HCBS to continuously deliver enterprise-wide support and solutions to meet the requirements of its customers.

***Description of Item***

The DHS SES CDP serves as a cornerstone for sustaining a corporate leadership identity as directed in the DHS Strategic Plan, contributes to meeting the succession planning goals, and creates a high-quality SES leadership cadre. It is also a critical element in sustaining a “Green” rating on OMB’s Human Capital Scorecard.

This centralized program complements and enhances the strengths of existing component leadership development initiatives across the Department and further facilitates succession planning opportunities. It provides the opportunity for participants to take advantage of developmental/rotational opportunities in other DHS components, thereby increasing participant’s corporate DHS knowledge and experience. In addition, components benefit from these rotational assignments by having a senior staff person working with them on real issues and offering different perspectives and/or business experiences.

***Justification***

In FY 2013, the Department’s projected funding requirements for this activity will decrease by \$.003 million from \$0.969 million to \$0.966 million due to improved management efficiencies.

***Impact on Performance***

At the requested level, DHS will continue to support the integration of the SES CDP.

*Description of Item*

The Infrastructure Transfer Program (ITP) implements the DHS Chief Information Officer’s (CIO) vision of One Infrastructure, which requires an integrated IT infrastructure to serve as the foundation for information sharing and agile responses to threats against the homeland. ITP was chartered by the Deputy Secretary as a DHS Level 1 investment with the following project domain initiatives included in the scope of the transformation effort: Network Services, Email Services, Data Center, and Wireless. A majority of the ITP WCF supports DHS enterprise-wide IT infrastructure O&M activities for Network Services (OneNet). OneNet provides a reliable, resilient, and secure DHS-wide area data network that facilitates appropriate sharing and discovery of information within the Department and associated organizations, including state, local and tribal partners.

*Justification*

In FY 2013, the Department’s projected funding requirements for this activity will decrease by \$.022 million from \$52.276 million to \$52.254 million due to improved management costs of operations. The Department of Homeland Security (DHS) continues to make significant progress towards integrating the Department. Critical to the success of DHS is the consolidation of the information technology (IT) infrastructure, which provides the foundation for information sharing and agile responses to threats against the homeland. The Infrastructure Transformation Program (ITP) is a group of interrelated initiatives designed to create a robust platform on which to quickly launch new capabilities. The program seeks to improve the Department's Information Technology (IT) infrastructure by unifying disparate Component information technology networks, platforms and services to provide a common IT infrastructure across the Department.

***Impact on Performance***

The FY 2013 request level will allow ITP to continue operations and maintenance of high risk areas with the DHS core networks.

***Description of Item***

The DHS Office of Procurement Operations (OPO) provides full service acquisition support to OSEM, USM, S&T, USCIS, NPPD, OHA, OIG, A&O, DNDO and USVISIT. In addition, the OPO provides acquisition services for department-wide acquisition initiatives identified by both the Chief Information Officer and the various commodity councils within DHS. Services provided include acquisition planning, training, execution, and administrative services.

***Justification***

OPO’s mission is to obtain the best value products and services for our DHS customers, using innovation and continuous process improvements for managing and implementing acquisitions; while supporting the mission, ensuring compliance and preserving the trust of the public. The office of Procurement Operations has established five essential goals to ensure it will fulfill its mission:

- Goal 1: Develop the OPO Acquisition Workforce - Supports the Chief Procurement Officer’s priority to hire and retain Quality People through early identification of staffing needs, training, and priorities.
- Goal 2: Improve the Quality and Accuracy of Acquisition Documentation Submitted to OPO Supports the Chief Procurement Officer’s priorities to execute Quality Contracting and Quality Acquisition Management through improved lead times, the utilization of Integrated Project Teams to enhance customer service, and strict adherence to statutes, regulations, and DHS directives.
- Goal 3: Improve Customer Advance Acquisition Planning - Supports the Chief Procurement Officer’s priorities to execute Quality Contracting and Quality Acquisition Management by increasing competition, ensuring greater participation by small businesses, and improving the quality and presentation of solicitation and contract documents.

Goal 4: Improve Contract Administration - Supports the Chief Procurement Officer's priorities to execute Quality Contracting and Quality Acquisition Management through the timely delivery of quality products and services to meet mission objectives.

Goal 5: Achieve Accuracy and Completeness of Data Contained in Procurement and Related Systems - Supports the Chief Procurement Officer's priorities to execute Quality Contracting and Quality Acquisition Management by ensuring timely and accurate reporting for all procurement actions, eliminating redundant reporting, and making data readily accessible to respond to data calls.

In FY 2013, the Department's projected funding requirements for this activity will decrease by \$.172 million from \$47.701 million to \$47.529 million due to management's efficiencies in acquisition support services.

### ***Impact on Performance***

The requested funding level will continue to support congressional, Government Accountability Office (GAO) and the DHS Inspector General (OIG) mandates to achieve adequate acquisition workforce and skills competencies levels to ensure appropriate oversight and execution of federal contracting.

***Description of Item***

The Working Capital Fund Operations provides policy, procedures, budget formulation, execution and customer dispute resolution services in managing the WCF. Services are provided to the activity managers as well as customer Components across DHS.

***Justification***

In FY 2013, the Department’s projected funding requirements for this activity will decrease by \$0.006 million from \$1.312 million to \$1.306 million due to improved management efficiencies to reduce the costs of support services to the WCF.

***Impact on Performance***

The FY 2013 budget request level will allow DHS to continue providing oversight of the management and financial operations of the WCF.

## **V. Exhibits and Other Supporting Material**

### **A. Justification of Proposed Legislative Language**

*SEC. 504. The Department of Homeland Security Working Capital Fund, established pursuant to section 403 of Public Law 103–356 (31 U.S.C. 501 note), shall continue operations as a permanent working capital fund for fiscal year 2013 AND HEREAFTER: Provided, That none of the funds appropriated or otherwise made available to the Department of Homeland Security may be used to make payments to the Working Capital Fund, except for the activities and amounts allowed in the President’s fiscal year 2013 budget: Provided further, That funds provided to the Working Capital Fund shall be available for obligation until expended to carry out the purposes of the Working Capital Fund: Provided further, That all departmental components shall be charged only for direct usage of each Working Capital Fund service: Provided further, That funds provided to the Working Capital Fund shall be used only for purposes consistent with the contributing component: Provided further, That the Working Capital Fund shall be paid in advance or reimbursed at rates which will return the full cost of each service. Provided further, That the Working Capital Fund shall be subject to the requirements of section 503 of this Act.*

**DHS Cross Cutting Activities Mission Statement**

The DHS cross cutting activities are Department-wide programs managed by a single office that yield some benefit to all DHS Components, such as Strategic Sourcing. The actual costs of the programs are recouped by redistributing the costs to the Components based on their share of the discretionary budget, staffing or some other fair and equitable pro-rata basis.

**Summary Justification and Explanation of Changes**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	500	531	530	(1)
12.1 Benefits	140	118	120	2
<b>Total, Salaries &amp; Benefits</b>	<b>640</b>	<b>649</b>	<b>650</b>	<b>1</b>

In FY13, the WCF's DHS Crosscutting PPA requests a 0.5% pay inflation adjustment of \$2K for the Strategic Sourcing activity to support 5 positions and 5 FTE.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.1 Advisory and assistance services	\$750	\$9,732	\$9,023	-\$709

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
--	-------------------------------	--	--	------------------------------

In FY13, the WCF's DHS Crosscutting PPA requests a decrease of \$.709M to the advisory and assistance services object class. The decrease is for an object class realignment of \$709K to cover contractor conversions, travel and supply requirements.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.2 Other services	\$3,731	\$5,337	\$5,298	-\$39

In FY13, the WCF's DHS Crosscutting PPA requests a decrease of \$.039M to the other services object class in support of management efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.3 Purchases from Gov't accts.	\$2,602	\$1,984	0	-\$1,984

In FY13 the DHS Crosscutting PPA request a decrease of \$1.984M to the Purchases From Gov't Accounts due to projected reduction in interagency agreements between DHS and other federal agencies.

**Government Wide Mandated Service Activity Mission Statement**

Government-wide Service Activities are Administration-sponsored initiatives that are managed by a designated Federal department to improve overall government performance. Other departments are assessed for the cost of supporting the activity. The activities should also provide a direct benefit to participating Components. Examples include the government-wide e-Government initiatives and the OMB-sponsored Interagency Councils.

**Summary Justification and Explanation of Changes**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	513	2,350	2,332	(18)

**Fee for Service Activity Mission Statement**

DHS WCF activity managers provide or coordinate delivery of a specific service or benefit to DHS components. The benefit/cost for providing the WCF activity is tangible and is directly linked to a components use of services or products. An example of a fee for service activity is print and electronic access subscription services through the Library of Congress FEDLINK. These WCF activities are reimbursed for the provision of services, and have characteristics typical of a business enterprise. The costs for operating the business are reimbursed by billing customers for the provision of goods and services at rates that are pre-approved by the CFO and reviewed by component customers. Each fee for service activity is expected to recover its operational expenses, usually at a much lower cost as the components benefit from economies of scale. Examples include: GSA rent and real estate services, IT and telecommunication services, human resource services, procurement operations, and financial management services.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	46,921	48,681	53,890	5,209
11.3 Other than full-time permanent	5	500	500	-

## **K. DHS Balanced Workforce Strategy**

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce – both contracted and federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into Tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2014 budget.

The FY 2013 WCF requests include \$0 and 107 FTE for the DHS Balanced Workforce Strategy.

### **FY 2013 DHS Balanced Workforce Strategy**

Provide additional details on the FY 2013 DHS Balanced Workforce including:

- Amount of funding needed to hire Federal employees - \$3,686,000
- Amount of the Contract that will be terminated or reduced. \$3,868,000
- Implementation Timeline – *Do you expect any overlap of contractor and Federal employees (for training etc)? When will the contract end?* The WCF does not expect any overlap of contractor and Federal employees. The WCF service providers are using a combined strategy of reducing contracts (contractors) at the end of the option period, attrition, and right-sizing contracts to ensure that federal hiring dates are concurrent with contract reduction dates.
- Identify any contractor functions that will be eliminated or absorbed by current federal employees and do not require additional new federal positions. Currently the WCF programs have not identified contractor functions that will be eliminated or absorbed by current federal employees.

### **DHS Balanced Workforce Strategy Follow-On**

The WCF in FY2012 by reduced it's over reliance on contractor support and re-directing the contractor dollars to fund federal FTE. In doing so, the WCF will gain much greater control and accountability of outcomes, and more importantly, will be appropriately staffed to implement key program strategies and operations.

### **Working Capital Fund Customer Assessment:**

Found immediately below is the WCF's customer assessment table. The WCF customer assessment table reflects an adjusted FY 2012 Base level of \$630 million, pursuant to the Department's reprogramming request. The amount is \$122 million less than the FY 2012 Enacted level of \$752 million. The reduction based upon revised growth projections previously submitted in the FY 2012 President's Budget. Additional detail will be provided in the Department's reprogramming request, which will be submitted to Congress following the submission of this document in FY 2012.

# BUDGET REQUEST AND SUPPORTING INFORMATION

## ANALYSIS AND OPERATIONS

### I. Appropriation Overview

#### **A. Mission Statement for Analysis and Operations:**

The Analysis and Operations appropriation provides resources for the support of the Office of Intelligence and Analysis and the Office of Operations Coordination and Planning. Even though these two offices are different and distinct in their missions, they work together and with other DHS Components to support the Department's mission of protecting the homeland. The mission of Intelligence and Analysis is to provide homeland security intelligence to the Secretary, other government officials, and State, local, and Private Sector partners. The mission of the Office of Operations Coordination and Planning is to integrate DHS and interagency planning and operations coordination in order to prevent, protect, respond to, and recover from terrorist threats/attacks or threats from other man-made or natural disasters.

#### **B. Budget Activities:**

*Office of Intelligence and Analysis (I&A)* - As a member of the U.S. Intelligence Community (IC), I&A is the nexus between the Nation's intelligence apparatus and DHS Components and other State, Local, and Private Sector (SLP) partners. I&A ensures that information is gathered from all relevant DHS field operations and other SLP partners and that this information is shared with appropriate stakeholders to produce accurate, timely and actionable analytical intelligence products and services. The Under Secretary for Intelligence and Analysis (U/SIA) leads I&A, and is also the Department's Chief Intelligence Officer (CINT), responsible for managing the entire DHS Intelligence Enterprise, and the Department's Chief Information Sharing Officer, responsible for implementing the objectives of the Program Manager – Information Sharing Environment (PM-ISE) within DHS.

*Office of Operations Coordination and Planning (OPS)* - OPS plays a pivotal role in DHS's mission to lead the unified national effort to secure America by facilitating the Secretary's responsibilities across the full spectrum of incident management (prevention, protection, response and recovery). OPS provides situational awareness, assessments and operations coordination for the DHS Secretary and facilitates operational information sharing with all DHS Components, as well as for Federal, State, local, tribal, private sector and international partners. In support of the Secretary's role as principal Federal official for domestic incident management, OPS develops and coordinates Departmental and interagency strategic-level operations plans.

#### **C. Budget Request Summary:**

The Analysis and Operations account requests 925 positions, 849 FTE and \$321.98 million for FY 2013. Details regarding the program increases can be found in the classified annex.

**II. Summary of FY 2013 Budget Estimates by Program/Project Activity (PPA)**

**Analysis and Operations**

**iii. Status of Congressionally Requested Studies, Reports, and Evaluations**

**Department of Homeland Security  
Office of Inspector General**

Fiscal Year	Due Date	Reference/Citation	Requirement	Status
2008	Fourth Quarter Calendar Year 2011 report due 1/31/2012	Executive Order 13462 (as amended by Executive Order 13516); Executive Order 12333, as amended.	Intelligence Oversight and Quarterly Reporting - Final Report Each Quarter - EO 13462 requires us to report on Departmental compliance with EO12333, identifying violations and mitigating actions taken in response. Intelligence elements of DHS include the Office of Intelligence and Analysis, the USCG National Intelligence Element, and those DHS elements concerned with the analysis of intelligence information. The report, signed by the IG and DHS General Counsel, is submitted quarterly to the Intelligence Oversight Board, a standing committee of the President's Intelligence Advisory Board.	Expected to complete by 1/30/2012.
1998	2/1/2012	Office of National Drug Control Policy Reauthorization Act of 1998 (P.L. 105-277), Sec. 705(d) (Title VII of the FY 1999 Omnibus Consolidated and Emergency Supplemental Appropriations Act); ONDCP Circular: Drug Control Accounting (May 1, 2007)	Annual Office of National Drug Control Policy (ONDCP) Review – Reviews of CBP, USCG, and ICE – Under 21 U.S.C. § 1704(d) and the ONDCP Circular: Drug Control Accounting (dated May 1, 2007), our office is required to perform a review of assertions made by the Department related to all funds expended by the Department for National Drug Control Program activities during the previous fiscal year.	Expected to complete by 2/1/2012.
2012	2/15/2012	FY 2012 Omnibus Appropriations Act (P.L. 112-74)	Review of Departmental Contracts - Requires the Inspector General to review Departmental contracts awarded noncompetitively during the prior Fiscal Year and report on the results.	Ongoing: Expected to complete by 2/15/2012.
2010	3/30/2012	Improper Payments Elimination and Recovery Act (IPERA) of 2010 (P.L. 111-204)	IPERA Audit - Requires each agency's Inspector General to report each fiscal year regarding the agency's compliance with requirements of the Act.	Ongoing: Expected to complete by 3/30/2012.

1978	4/30/2012 & 10/31/2012 to Department and to Congress 30 days later	Inspector General Act of 1978 (P.L. 95-452), as amended. Sec. 5	Semiannual Report to Congress – Inspector General Act requires semiannual reports summarizing the activities of the office during the preceding six-month period	SAR for the time period 4/01/11-9/30/11 delivered to Congress on 11/30/11. SAR for time periods 10/1/11-03/31/12 and 4/01/12-9/30/12 both expected on time.
2010	4/30/2012 & 10/31/2012 to Department and to Congress 30 days later	Dodd-Frank Wall Street Reform Act (P.L. 111-203)	Information on Peer Reviews - Requires "(A) an appendix containing the results of any peer review conducted by another Office of Inspector General during the reporting period;" or "(B) if no peer review was conducted within that reporting period, a statement identifying the date of the last peer review conducted by another Office of Inspector General; "(15) a list of any outstanding recommendations from any peer review conducted by another Office of Inspector General that have not been fully implemented, including a statement describing the status of the implementation and why implementation is not complete; and "(16) a list of any peer reviews conducted by the Inspector General of another Office of the Inspector General during the reporting period, including a list of any outstanding recommendations made from any previous peer review (including any peer review conducted before the reporting period) that remain outstanding or have not been fully implemented." <i>(Note - This information is included in the SAR.)</i>	SAR for the time period 4/01/11-9/30/11 delivered to Congress on 11/30/11. SAR for time periods 10/1/11-03/31/12 and 4/01/12-9/30/12 both expected on time.
2008	First Quarter Calendar Year 2012 report due 4/30/2012	Executive Order 13462 (as amended by Executive Order 13516); Executive Order 12333, as amended.	Intelligence Oversight and Quarterly Reporting - Final Report Each Quarter - EO 13462 requires us to report on Departmental compliance with EO12333, identifying violations and mitigating actions taken in response. Intelligence elements of DHS include the Office of Intelligence and Analysis, the USCG National Intelligence Element, and those DHS elements concerned with the analysis of intelligence information. The report, signed by the IG and DHS General Counsel, is submitted quarterly to the Intelligence Oversight Board, a standing committee of the President's Intelligence Advisory Board.	Expected to complete by 4/30/2012.

2008	Second Quarter Calendar Year 2012 report due 7/31/2012	Executive Order 13462 (as amended by Executive Order 13516); Executive Order 12333, as amended.	Intelligence Oversight and Quarterly Reporting - Final Report Each Quarter - EO 13462 requires us to report on Departmental compliance with EO12333, identifying violations and mitigating actions taken in response. Intelligence elements of DHS include the Office of Intelligence and Analysis, the USCG National Intelligence Element, and those DHS elements concerned with the analysis of intelligence information. The report, signed by the IG and DHS General Counsel, is submitted quarterly to the Intelligence Oversight Board, a standing committee of the President's Intelligence Advisory Board.	Expected to complete by 7/31/2012.
2003	9/15/2012	Federal Information Security Management Act of 2002 (FISMA) (Title III of the E-Government Act of 2002) (P.L. 107-347); House Report 107-787 Sec. 3535 (b)(1), p. 34, p. 80, p. 102, p. 109	Annual Information Security Review - Annual independent evaluation of the information security program and practices of the agency to determine the effectiveness of such program and practices.	Expected to complete by 9/15/2012.
2008	9/15/2012	FY 2008 Consolidated Appropriations (P.L. 110-161)	Annual Agency-wide Periodic Privacy Act Review -Sec. 742. (a) None of the funds made available in this Act may be used in contravention of Section 552a of Title 5, United States Code (popularly known as the Privacy Act) and regulations implementing that section. (b) Section 522 of Division H of the Consolidated Appropriations Act, 2005 (Public Law 108-447; 118 Stat. 3268; 5 U.S.C. 552a note) is amended by striking subsection (d) and inserting the following: “(d) INSPECTOR GENERAL REVIEW.—The Inspector General of each agency shall periodically conduct a review of the agency’s implementation of this section and shall report the results of its review to the Committees on Appropriations of the House of Representatives and the Senate, the House Committee on Oversight and Government Reform, and the Senate Committee on Homeland Security and Governmental Affairs. The report required by this review may be incorporated into a related report to Congress otherwise required by law including, but not limited to, 44 U.S.C. 3545, the Federal Information Security Management Act of 2002. The Inspector General may contract with an independent, third party organization to conduct the review.” (Note - This review is included in the annual FISMA review.)	Expected to complete by 9/15/2012.

2002	9/15/2012	The Homeland Security Act of 2002 (P.L. 107-296), Sec. 888(f)	Annual USCG Mission Review - Annual review to assess thoroughly the performance by the Coast Guard of all missions of the Coast Guard, with a particular emphasis on examining the non-homeland security missions.	Expected to complete by 9/15/2012.
2004	9/15/2012	The Coast Guard & Maritime Transportation Act of 2004 (P.L. 108-293), Sec. 809(g)	Annual Cargo Inspection Report - Inspector General report evaluating cargo inspection targeting system for international intermodal cargo containers.	Expected to complete by 9/15/2012.
2012	9/15/2012	FY 2012 Omnibus Appropriations Act (P.L. 112-74)	ICE's 287(g) Agreements -- It is implied that OIG must review the delegation of law enforcement authority agreements that ICE enters into pursuant to section 287(g) of the Immigration and Nationality Act. Specifically, the bill requires ICE to cancel any 287(g) agreements where the Inspector General has determined that the terms of the agreement have been violated.	Not Started - Expected to complete by 9/15/2012.
1991	11/15/2012	CFO Act of 1990 (P.L. 101-576), Sec. 304	Annual Audit of DHS' Consolidated Financial Statements - The Chief Financial Officers Act requires that an annual financial statement audit be performed at DHS.	Expected to complete by 11/15/2012.
2005	11/15/2012	DHS Financial Accountability Act (P.L. 108-330), Sec. 4; OMB Circular A-123, Appendix A, II-V	Annual Audit of DHS' Internal Control Over Financial Reporting - Annual audit, jointly conducted by the Chief Financial Officers Council and the President's Council on Integrity and Efficiency (PCIE), of DHS' internal control over financial reporting to express an opinion about whether DHS maintained effective internal control. OMB Circular A-123, Management's Responsibility for Internal Control (Revised), requires agency management to assess and document internal control over financial reporting; identify needed improvements; take corresponding corrective action; and make an assertion about the effectiveness of internal control over financial reporting. The audit will assess DHS management's assertion and effort to implement the Circular, which addresses financial performance in the President's Management Agenda. (Note - This audit is included with the Consolidated Financial Statement Audit.)	Expected to complete by 11/15/2012.
2000	11/15/2012	Reports Consolidation Act of 2000 (P.L. 106-531), Sec. 3(a)	Annual Report on Major Management Challenges - Congress requires an Inspector General report that summarizes what the Inspector General considers to be the most serious management and performance challenges facing the agency and briefly assesses the agency's progress in addressing those challenges. Report is included in the Department's annual report submitted to the President, Director of OMB, and	Expected to complete by 11/15/2012.

			Congress no later than 150 days after the end of the fiscal year.	
2007	12/31/2012	Implementing Recommendations of the 9/11 Commission Act of 2007 (P.L. 110-53), Sec. 2022(a)(3) (D)	Annual Consolidated Report on Reviews of Grants to States and High Risk Urban Areas - The Inspector General of the Department shall submit to the appropriate committees of Congress an annual consolidated report regarding the audits completed during the fiscal year before the date of that report.	Expected to complete by 12/31/2012.
2007	8/3/2014	Implementing Recommendations of the 9/11 Commission Act of 2007 (P.L. 110-53), Sec. 2022(a)(3)	Annual Review of Grants to States and High Risk Urban Areas - Requires Inspector General to conduct annual audits of a sample of states and high-risk urban areas that receive certain grant monies. Also requires one audit of each state that is a recipient of grant funding in the seven year period post-enactment of the legislation.	Ongoing: 18 state audits completed; 20 audits currently ongoing. All 61 required audits expected to be completed by August 2014.
2011	9/30/2016	Reducing Over-Classification Act (P.L. 111-258)	Classification Program Review - Requires that the Inspector General (in consultation with the Information Security Oversight Office) perform at least two evaluations of the Department's classification program by September 30, 2016. The first review must be completed no later than September 30, 2013.	Not Started - Part 1 expected to complete by 9/30/2013.

## **BUDGET REQUEST AND SUPPORTING INFORMATION**

### **Office of Inspector General Audits, Inspections and Investigations**

## **I. Appropriation Overview**

### **A. Mission Statement for Salaries and Expenses:**

The Department of Homeland Security (DHS) Office of Inspector General (OIG) was established by the *Homeland Security Act of 2002* (P.L. 107-296), by amendment to the *Inspector General Act of 1978*. The OIG has a dual reporting responsibility to the Secretary of DHS and to the Congress. The OIG serves as an independent and objective inspection, audit, and investigative body to promote economy, efficiency, and effectiveness in DHS's programs and operations, and to prevent and detect fraud, waste, and abuse in such programs and operations. Based on direction from DHS, for fiscal year (FY) 2013, the OIG requests 683 full-time positions (FTP), 683 full time equivalents (FTE) and \$143.664 million. The request is an increase of \$2.664 million over the FY 2012 base.

### **Mission Statement**

The OIG contributes to DHS's success by providing objective information to promote government management, decision making, and accountability. The OIG is an agent of positive change, focusing on eliminating waste, fraud and abuse, and on identifying problems and recommendations for corrective actions by agency leadership. The OIG provides the Department and the Congress with objective assessments of opportunities to be more successful.

The OIG conducts and supervises audits, inspections, special reviews, and investigations of the Department's programs and operations, including program and financial management, contract and grant activity, and disaster relief efforts. The OIG conducts these reviews to offer recommendations for improving the economy, efficiency, and effectiveness of the Department's operations and activities, when necessary; and to deter, identify, and address fraud, waste, and abuse. The OIG annually publishes a schedule of audits, inspections, and investigations that will assist the Department in fulfilling its mission and goals, and reports its findings to the Secretary, the Congress, and the public, when appropriate. The Inspector General (IG) statements for the record and testimony may be accessed through our website at [www.dhs.gov/xoig](http://www.dhs.gov/xoig).

## **B. Budget Activities:**

The OIG has one budget for audits, inspections, and investigations; the request funds 683 FTE assigned to the following executive management and oversight teams:

*The Executive Office* consists of the IG, the Deputy IG, a Chief of Staff, a Deputy Chief of Staff, a Senior Management Analyst, and a Special Assistant. It provides executive leadership to the OIG. The office has 6 FTE.

*The Office of Legislative Affairs (OLA)* serves as primary liaison to members of Congress and their staffs, the White House and Executive Branch, and to other governmental agencies and entities involved in securing the Nation. The office staff responds to inquiries from the Congress and the White House; notifies the Congress about OIG initiatives, policies, and programs; and informs other governmental entities about OIG initiatives that affect their operations and activities. The office distributes correspondence and final audit, inspection, and special reports to the Congress and the White House. It also provides advice to the IG and supports OIG staff as they address Congressional and White House inquiries. The office has 3 FTE.

*The Office of Public Affairs (OPA)* is the principal point of contact for the OIG with all media outlets and the general public. OPA provides news organizations with accurate and timely information in compliance with legal, regulatory, and procedural rules. Additionally, OPA is responsible for an integrated communications approach, addressing external and internal communication functions. The office prepares and issues news releases, arranges interviews, and coordinates and analyzes information to support the OIG's policy development and mass communications needs. OPA ensures that information provided is current, accurate, and issued in a timely manner, promoting accountability and transparency in the work of the OIG. Furthermore, OPA provides counsel to the IG and other management officials on complex programmatic and public affairs issues that affect the OIG and its relationship with DHS, other Federal, State, and local government offices, the media, and the general public. The office has 3 FTE.

*The Office of Counsel (OC)* provides legal advice and guidance to the IG and other management officials. The office interprets laws, rules and regulations, reviews reports and correspondence, and further supports audits, inspections, and investigations by ensuring and conducting legal sufficiency reviews. OC represents the OIG in Equal Employment Opportunity actions, Merit Systems Protection Board actions, and claims filed under the *Federal Torts Claims Act*; represents OIG investigators in conjunction with the Department of Justice (DOJ) in *Bivens* actions; and assists DOJ with *Giglio* requests. The office reviews all DHS management directives and delegations to ensure protection of OIG authorities and compliance of applicable laws and regulations. The office serves as the OIG's designated ethics office, manages the OIG's *Freedom of Information Act* and *Privacy Act* responsibilities, furnishes attorney services for the issuance and enforcement of OIG subpoenas, and provides legal advice on OIG operations. The office has 14 FTE.

*The Office of Management (OM)* provides critical administrative support functions, including strategic planning and budgeting; development and implementation of administrative directives; management of information and office automation systems; and oversight of the personnel, training, procurement, security systems, and policy. It utilizes the Bureau of Public Debt to provide travel and accounting

services on a reimbursable basis. The office also prepares the OIG's annual performance plans and the semiannual reports to the Congress. The office has 65 FTE.

*The Office of Audits (OA)* conducts and coordinates audits and program evaluations of the management and financial operations of DHS. Auditors examine the methods employed by agencies, bureaus, grantees, and contractors in carrying out essential programs or activities. The office evaluates whether established goals and objectives are achieved and resources are used economically and efficiently; ensures whether intended and realized results are consistent with laws, regulations, and good business practice; and determines whether financial accountability is achieved and the financial statements are not materially misstated. The office has 173 FTE.

*The Office of Information Technology Audits (ITA)* conducts audits and evaluations of DHS's information management, cyber infrastructure, and systems integration activities; and provides technical forensics assistance to OIG offices in support of the OIG's fraud prevention and detection mission. The office reviews the cost effectiveness of acquisitions, implementation, and management of major systems, and telecommunications networks across DHS. The office evaluates the systems and related architectures of DHS to ensure they are effective, efficient, and implemented according to applicable policies, standards, and procedures. The office assesses DHS's information security program as mandated by the *Federal Information Security Management Act*. The office also provides technical forensics assistance to OIG offices in support of OIG's fraud prevention and detection program. The office has 50 FTE.

*The Office of Inspections (ISP)* provides the IG with a means to analyze programs quickly and to evaluate operational efficiency, effectiveness, and vulnerability. This work includes special reviews of highly visible or sensitive issues that arise suddenly, as well as congressional requests and mandates for studies that require immediate attention. The nature of this work requires timely reporting to high-level audiences, including the Secretary and the Congress. The office has four specialty areas: science and technology, civil rights and civil liberties, intelligence oversight, and international operations, but may examine any area of the Department in an effort to strengthen and unify DHS operations and management systems and make recommendations which can help ensure that the Department programs function efficiently, effectively, and with minimal vulnerability. The office is the lead organization in the OIG for monitoring DHS intelligence activities. DHS has two members of the Intelligence Community (IC) - the United States Coast Guard (USCG) and the Office of Intelligence and Analysis (I&A). Because USCG and I&A represent DHS's connection to the IC, it is essential that OIG provide oversight of their intelligence activities. OIG's goal is to ensure that the DHS intelligence enterprise conducts its operations according to law; that intelligence is appropriately shared among DHS components, other Federal agencies, and State and local stakeholders; and that initiatives such as fusion centers and protective security advisors operate effectively and efficiently. In this capacity, the office reports on the use of intelligence information within the Department, and coordinates the OIG's interaction with the multi-agency intelligence community. The office has 44 FTE.

*The Office of Investigations (INV)* conducts investigations into allegations of criminal, civil, and administrative misconduct involving DHS employees, contractors, grantees, and programs. These investigations can result in criminal prosecutions, fines, civil monetary penalties, and administrative sanctions and personnel actions. The office has broad investigative and oversight responsibilities which mirrors Departmental priorities in working to ensure the integrity of the Nation's immigration

system, borders, ports of entry, and national transportation network. INV is committed to protecting the civil rights and liberties of all persons in the US and investigates all referrals of detainee deaths involving unusual or suspicious circumstances, all on-duty incidents involving the discharge of a firearm by a DHS employee, and all credible allegations of criminal abuse of authority that result in the deprivation of rights or other serious criminal offense. Further, INV conducts investigations into allegations of gross misuse of classified information, privacy or law enforcement information and allegations of criminal misconduct in the administration of immigration benefits. In addition, INV oversees the integrity of programs that distribute DHS funds for routine operations; in response to disasters and disaster preparedness training and in association with programs used in the development of technologies critical to combating terrorism. INV collects, analyzes, and distributes data concerning fraud and misconduct through our national hotline operation and the National Center for Disaster Fraud (NCDF). The Investigations Hotline Correspondence Unit continues improvements to its systems for receiving, routing, and responding to thousands of routine complaints each year which report allegations of criminal or administrative misconduct, theft of Departmental funds, corruption by DHS employees or other serious misconduct involving DHS employees, contractors, grantees, and programs. The unit also receives and responds to Congressional and other official correspondence. The INV Federal Emergency Management Agency (FEMA) Support Unit maintains a liaison with FEMA and provides support to the NCDF by improving information access and communications, ensuring complaints are referred for investigation, and that prosecutions and recoveries are accurately tracked and documented. Additionally, INV continues to exercise important oversight responsibilities and monitors the investigative activity of the DHS component Internal Affairs units who are tasked with investigating administrative misconduct issues within the DHS. The newly developed Forensic Threat Analysis Unit is responsible for analyzing investigative information and associating data to identify trends, patterns, locations, and individuals suspected of corrupt behavior. Evidence of criminality will be forwarded to field components for further investigation, enhancing our effectiveness in detecting and prosecuting corruption. The office has 260 FTE.

*The Office of Emergency Management Oversight (EMO)* provides an aggressive and ongoing audit and investigative effort designed to ensure that disaster relief funds are being spent appropriately, while identifying fraud, waste, and abuse as early as possible. The office is an independent and objective means of keeping the Congress, the Secretary, the Administrator of FEMA, and other Federal disaster relief agencies fully informed on problems and deficiencies relating to disaster operations and assistance programs, and progress regarding corrective actions. EMO's focus is weighed heavily towards prevention, including reviewing internal controls, and monitoring and advising DHS and FEMA officials on contracts, grants, and purchase transactions before they are approved. This allows the office to stay current on disaster relief operations and provide on-the-spot advice on internal controls and precedent-setting decisions. The office coordinates with other Federal IG offices, meets with State and local officials on audit and investigative matters, and advises contractors and grantees on compliance requirements. The office has 65 FTE.

### **C. Budget Request Summary:**

The OIG requests 683 FTP, 683 FTE, and \$143.664 million for FY 2013. The FY 2013 OIG request includes \$1.0 million for training and \$0.468 million for supporting the Council of Inspectors General on Integrity and Efficiency (CIGIE).

The OIG's request reflects total adjustment-to-base increases totaling \$2.450 million including the funding of \$0.468 million to support CIGIE, \$1.320 million for annualization of prior year, part year funded FTE, \$0.400 million for a 0.5% pay increase, and \$0.262 million for increased GSA rent costs. The request also includes decreases totaling \$2.351 million with \$0.367 million in efficiency cost savings, \$0.069 million for permanent change of station costs, \$0.625 million for general travel, \$0.053 million for headquarters administration, and \$1.237 million for outsourcing efficiencies. Also included is a program increase of \$2.565 million to execute the *9/11 Commission Act* audits.

## **Initial Budget Request**

The OIG submitted an initial request of \$165.10 million in funding to the DHS at the beginning of the FY 2013 budget process. It requested 49 new positions and 32 FTE for investigative efforts. The request included program increases totaling \$35.1 million that consisted of three major components:

- \$19.0 million to increase investigative services
- \$ 8.0 million to support EMO program with no increase in position or FTE
- \$ 8.1 million to execute the *9/11 Commission Act* audits with no increase in positions or FTE.

However, per DHS's guidance, the OIG re-submitted the request reducing the total to \$114 million in base resources and a \$16 million transfer from the Disaster Relief Fund (DRF) without any increase for program changes.

Subsequently, the OIG submitted a modified request of \$169.37 million in funding to the Office of Management and Budget (OMB) based on a 2012 estimated funding level of \$140 million. As in the initial submission to DHS, it requested 49 new positions and 25 FTE for investigative efforts. The request included program increases totaling \$26.6 million that consisted of three major components:

- \$19.0 million to increase investigative services
- \$4.0 million to support EMO program with no increase in positions or FTE
- \$3.6 million to execute the *9/11 Commission Act* audits with no increase in positions or FTE.

However, the OMB passback settlement contained an increase totaling only \$2.56 million to execute the *9/11 Commission Act* audits. This is \$24.0 million less than the modified increase requested.

## II. Summary of FY 2013 Budget Estimates by Program/Project Activity (PPA)

<b>2013 Total Requested Budget Authority</b>	<b>683</b>	<b>683</b>	<b>143,664</b>
Total Change 2012 to 2013	-	7	2,664

The OIG requests 683 FTP, 683 FTE, and \$143.664 million for FY 2013. The request includes adjustment-to-base increases totaling \$2.450 million, including \$1.320 million for annualization of prior year part year funded FTE, \$0.400 million for pay increase, \$0.262 million for GSA rent increase, and \$0.468 million for supporting CIGIE. The decreases totaling \$2.351 million include \$1.114 million in efficiencies as outlined below, and an additional \$1.237 million in efficiencies related to outsourcing expenses. The FY 2013 request includes \$1.0 million for training.

The \$1.114 million in management efficiencies will be accomplished as follows: Permanent Change of Station (PCS) costs – (\$.069 million); General TDY and Travel - (\$.625 million); Overtime reduction - (\$.002 million); Efficiency Cost Savings - (\$.367 million) – HQ Administrative Efficiencies - (\$.052 million).

The Audits, Inspections and Investigations PPA will achieve efficiencies through personnel, travel, strategic sourcing, contractual services, and information technology infrastructure reductions.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Specifically, the OIG’s key legislated responsibilities, and the funds requested in FY 2013 are to:

- Promote economy, efficiency, and effectiveness in the management of the Department’s programs and supporting operations;

- Conduct and supervise audits, investigations, and inspections relating to the Department's programs and support operations;
- Detect and prevent fraud, waste, and abuse;
- Review existing and proposed legislation and regulations and make appropriate recommendations;
- Maintain effective working relationships with other Federal, State, and local governmental agencies, and non-governmental entities regarding the mandated duties of the OIGs;
- Inform the Secretary of Homeland Security and the Congress of serious problems and recommend corrective actions and implementation strategies; and,
- Comply with the audit standards of the Comptroller General of the Government Accountability Office (GAO); avoid duplication of GAO activities; and report violations of Federal criminal law to the U.S. Attorney General.

## IV. Program Justification Changes

**Department of Homeland Security  
Office of Inspector General  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 1:** Implementing the Recommendation of the 9/11 Commission Act  
PPA: Audits, Inspections and Investigations  
Program Increase: Positions 0, FTE 0, \$2,565

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							683	683	141,099
Program Increase							-	-	2,565
<b>Total Request</b>	<b>668</b>	<b>665</b>	<b>133,464</b>	<b>683</b>	<b>676</b>	<b>141,000</b>	<b>683</b>	<b>683</b>	<b>143,664</b>

### Description of Item

The *9/11 Commission Act* mandated that the OIG conduct audits of all states that received FEMA grant funds to prevent, prepare for, protect against, or respond to natural disasters, acts of terrorism, and other disasters. Also, the Act authorized the DHS to allocate \$8.5 million for fiscal years 2008, 2009, and 2010 and sums as are necessary for FY 2011 and each fiscal year thereafter. Accordingly, the OIG requested \$36.6 million from fiscal years 2008 - 2013. However, so far, DHS OIG has been funded with only \$3.5 million to conduct the mandated audits. Funding pays for contracted auditing services as well as OIG in-house auditors' expenses, which includes travel and supplies. The OIG will accomplish the *9/11 Commission Act* audits using both contracted and in-house auditors. The OIG expects to perform compliance audits with contracted auditors and the performance audits with in-house personnel.

### Justification

The \$2.565 million requested increase will provide the necessary funds to stay on course to conduct the Congressionally mandated audits by August 2014. Two states will be re-audited, bringing the total audits to 61. To date, the OIG has managed to complete 18 and start 20 out of 61 required audits. The \$2.565 million increase will allow the OIG to conduct most of the remaining 23 audits in FY 2013 and position the OIG to complete all 61 audits by the deadline. The lack of adequate budgetary resources will prevent the OIG from completing the mandated audits required by the Congress in a timely manner.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

The proposed increase will enable the OIG to catch up with the original audit plan and prioritize, schedule, and execute pending *9/11 Commission Act* audits according to the timeline established by Congress. Funding enables the OIG to design the right mix of contracted and in-house services, without stressing its core oversight functions or assets. Averting fraud, waste, and abuse by OIG audits contributes to the Department's goal of maturing and strengthening the Homeland Security enterprise.

## **V. Exhibits and Other Supporting Material**

### **A. Justification of Proposed Legislative Language**

**Department of Homeland Security  
Office of Inspector General  
Justification of Proposed Changes in Audits, Inspections and Investigations  
Appropriation Language**

*For necessary expenses of the Office of Inspector General in carrying out the provisions of the Inspector General Act of 1978 (5 U.S.C. App.), \$143,664,000 of which not to exceed \$300,000 may be used for certain confidential operational expenses, including the payment of informants, to be expended at the direction of the Inspector General.*

#### **Explanation of Changes:**

No substantive changes proposed.

**Audits, Inspections and Investigations Mission Statement**

The OIG is responsible for conducting and supervising audits, investigations, and inspections relating to the programs and

operations of DHS, recommending ways for the Department to carry out its responsibilities in the most effective, efficient, and economical manner possible. The OIG serves as an independent body to deter, identify and address fraud, abuse, mismanagement, and waste in DHS programs and operations.

**Summary Justification and Explanation of Changes**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	67,588	71,721	73,115	1,394
11.3 Other than full-time permanent	1,904	2,098	2,098	-
11.5 Other personnel compensation	4,877	5,028	5,028	-
11.6 Pay Diff (Sun/Night)	2	2	-	(2)
11.7 Military personnel/Awards	855	915	915	-
12.1 Benefits	24,274	25,631	25,958	327
13.0 Unemployment Compensation	25	26	26	-
<b>Total, Salaries &amp; Benefits</b>	<b>99,525</b>	<b>105,421</b>	<b>107,140</b>	<b>1,719</b>

Salaries and Benefits include costs for 683 FTE. The request includes an increase of \$1.320 million for the annualization of prior year part year funded FTE and \$0.40 million for FY 2013 pay increase.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>21.0 Travel</b>	<b>\$4,439</b>	<b>\$4,702</b>	<b>\$3,641</b>	<b>-\$1,061</b>

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2013 request reflects reduced travel needs for the OIG after incorporating the management efficiencies' savings.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>23.1 GSA rent</b>	<b>\$12,601</b>	<b>\$13,288</b>	<b>\$13,550</b>	<b>\$262</b>

GSA Rent includes all payments to GSA for rental of space and rent related services. The FY 2013 request reflects the need for space to assign new FTE.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>23.3 Communications, utilities, and misc. charges</b>	<b>\$2,405</b>	<b>\$2,947</b>	<b>\$2,443</b>	<b>-\$504</b>

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2013 request reflects communication, utilities, and miscellaneous charges after management efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.1 Advisory and assistance services</b>	<b>\$2,561</b>	<b>\$4,055</b>	<b>\$3,968</b>	<b>-\$87</b>

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2013 request reflects the anticipated advisory and assistance services needs of the OIG.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.2 Other services	\$772	\$1,224	\$934	-\$290

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2013 request reflects the anticipated expenses for other services.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.3 Purchases from Gov't accts.	\$5,403	\$7,601	\$6,038	-\$1,563

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2013 request reflects the anticipated purchase needs of the OIG including \$0.468 million to support CIGIE and savings from outsourcing efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
26.0 Supplies and materials	\$1,284	\$1,819	\$1,336	-\$483

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2013 request reflects the anticipated needs of the OIG for supplies and materials

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
31.0 Equipment	\$1,564	\$2,201	\$1,613	-\$588

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2013 request reflects the anticipated needs of the OIG for equipment.

### iii. Status of Congressional Requested Studies, Reports, and Evaluations

Fiscal Year	Due Date	Reference/Citation	Requirement	Status
2008	1/31/2011	FY 2008 Appropriations Act, Section 603/604  (Omnibus 110-497 Sec 603 and 604; Conference Rpt., Sec 603 and 604, Pg 131)	<b>National Land Border Security Plan</b> – CBP, in consultation with other appropriate Federal agencies, State and local law enforcement agencies, and private entities that are involved in international trade across the Northern or Southern border to prepare and submit a National Land Border Security Plan that shall include a vulnerability, risk, and threat assessment of each port of entry located on the Northern border or the Southern border, on a bi-annual basis (on January 31st). Additionally, CBP, in consultation with GSA, will submit an update on the assessment of infrastructure needs of all land ports of entry.	Report is being reviewed by DHS
2006	10/7/2011	Security and Accountability For Every Port Act (P.L. 109-347), Section 232	<b>Full-Scale Implementation of Pilot Scanning System (Update 7)</b> – Within 6 months after initial report on full-scale implementation of pilot scanning system is submitted (pursuant to Section 231(d)) (which is due to Congress on 4/23/09) and EVERY SIX MONTHS THEREAFTER, the Secretary shall submit a report describing the status of full-scale deployment under subsection (b) and the cost of deploying the system at each foreign port at which the integrated scanning systems are deployed.	Report is being reviewed by DHS
2010	11/14/2011	FY 2010 Appropriations Act  (Conference HR 111-298; SR 111-31)	<b>Cross-Border Tunnels (FY 2011 Quarters 3 and 4)</b> – The Committee directs the Department to provide semiannual reports on the number of tunnels discovered, their location and demolition, all activities undertaken to prosecute individuals under the Border Tunnel Prevention Act, funding requirements, and the progress made in developing and implementing detection methods used to discover new tunnels. Finally, the Committee directs the Department to designate a border tunnel coordinator to manage border tunnel activities, serve as liaison to State and local law enforcement, and advise Congress on border tunnel issues.	Report is being reviewed by DHS
2008	12/23/2011	FY 2008 Omnibus Appropriations Act, Section 605	<b>POE Technology Demonstration</b> – Not later than 1 year after the date of the enactment of this Act, and annually thereafter, the Secretary shall submit to the Committees on Appropriations of the Senate and the House of Representatives, the Senate Committee on Environment and Public Works, the Senate Committee on Homeland Security and Governmental Affairs, the House Committee on Transportation and Infrastructure, and the House Committee on Homeland Security a report on the activities carried out at each demonstration site under the technology demonstration program established under this section and include an assessment by the Commissioner of the feasibility of incorporating any demonstrated technology for use throughout U.S. Customs and Border Protection.	Report is being reviewed by OMB

2012	2/1/2012	Consolidated Appropriations Act of FY 2012 (Joint Explanatory Statement, Division D; House Report 112-91)	<b>Circumvention of Customs Duties - Imports from China --</b> CBP must submit a report on the extent and frequency of customs fraud, including circumvention of duties and misclassification on entries of imports of goods from China. This report should include information covering enforcement activities, numbers of seizures, penalties imposed, the numbers and types of personnel responsible (including interagency collaboration for enforcing laws), and estimated costs to reduce substantially the incidence of illegal transshipments.	Report is being drafted or reviewed by CBP
2012	2/13/12 Alongside FY 2013 Budget Submission	Consolidated Appropriations Act of FY 2012 (Joint Explanatory Statement, Division D; Consolidated Report HR 112-331; House Report 112-91)	<b>FY 2012 Real Property Inventory Plan --</b> The Commissioner must submit annually an inventory of the real property of CBP and a plan that includes the full costs of each activity and project proposed and underway in fiscal year 2013, listed by fiscal year.	Report is being drafted or reviewed by CBP
2009	2/13/12 Alongside FY 2013 Budget Submission	FY 2009 Appropriations Act (P.L. 110-329, HR 2638 Div D, pg 85)  Consolidated Appropriations Act of FY 2012 (Joint Explanatory Statement, Division D; Senate Report 112-74)	<b>FY 2012 LPOE Modernization 5-Year Plan (FYs 2013-2018) --</b> CBP shall, in consultation with GSA, include a detailed 5-year plan for all Federal land border port of entry projects with a yearly update of total projected future funding needs. This reporting requirement was supposed to be included in the FY 2010 Budget Submission, but was taken out by OMB after the American Recovery and Reinvestment Act of 2009 changed the expenditure amount and thus the reporting requirement.	Report is being reviewed by DHS
2012	2/13/12 Alongside FY 2013 Budget Submission	Consolidated Appropriations Act of FY 2012 (Joint Explanatory Statement, Division D; House Report 112-91)	<b>Textile Transshipment Enforcement FY 2012 --</b> CBP must submit a report with the FY 2013 budget on execution of its 5-year strategic plan. The report should include information covering enforcement activities; textile production verification team exercises and special operations; numbers of seizures; penalties imposed; and the numbers and types of personnel responsible for enforcing textile laws (including headquarters staff in the Textile Enforcement Operations Division).	Report is being reviewed by DHS
2012	2/13/12 Alongside FY 2013 Budget Submission	Consolidated Appropriations Act of FY 2012 (Joint Explanatory Statement, Division D; House Report 112-91)	<b>Multi-Year Plan for Automation Modernization --</b> CBP must submit a multi-year investment and management plan for all appropriated funds from all sources executed by OIT to provide a full picture of CBP's information technology activities. This report should fully justify requested funds for this account as well as project future-year requirements and funding levels, and it should include: (1) the proposed appropriations included for each project and activity tied to mission requirements, program management capabilities, performance levels, and specific capabilities and services to be delivered; (2) the total estimated cost and projected timeline of completion for all multi-year enhancements, modernizations, and new capabilities proposed in such budget or underway; (3) a detailed accounting of operations and maintenance and contractor services costs; and (4) current acquisition program baselines for the ACE and TECS Modernization respectively, that explains any deviations in cost, performance parameters, schedule, or estimated date of completion from the original acquisition program baseline; aligns acquisition programs to mission requirements by defining existing capabilities, identifying known capability gaps, and explaining how each increment will address such known capability gaps; and defines life-cycle costs for these programs.	Report is being drafted or reviewed by CBP

2012	2/13/12 Alongside FY 2013 Budget Submission	Consolidated Appropriations Act of FY 2012 (Joint Explanatory Statement, Division D; Consolidated Report HR 112-331; House Report 112-91; Senate Report 112-74)	<b>BSFIT FY 2013-FY 2016 Multi-Year Investment and Management Plan -- CBP</b> must submit a multi-year investment and management plan for the BSFIT account that includes for each tactical infrastructure and technology deployment (1) the funding level in that budget and projected funding levels for each of the next 3 fiscal years, including a description of the purpose of such funds; (2) the deployment plan, by border segment, that aligns each deployment to mission requirements by defining existing capabilities, identifying known capability gaps between such existing capabilities and stated mission requirements related to achieving operational control, and explaining how each tactical infrastructure or technology deployment will address such known capability gaps; and (3) a current acquisition program baseline that explains any deviations in cost, performance parameters, schedule, or estimated date of completion from the most recent acquisition program baseline approved by the DHS Acquisition Review Board, includes a phase-out and life-cycle recapitalization schedule delineated by fiscal year for existing and new tactical infrastructure and technology deployments that each deployment is intended to replace or recapitalize, and includes qualitative performance metrics that assess the effectiveness of new and existing tactical infrastructure and technology deployments and inform the next multi-year investment and management plan related to achieving operational control of the Northern and Southwest borders of the United States.	Report is being drafted or reviewed by CBP
2012	2/13/12 Alongside FY 2013 Budget Submission	Consolidated Appropriations Act of FY 2012 (Joint Explanatory Statement, Division D; Consolidated Report HR 112-331; House Report 112-91)	<b>Inspection and Detection Multi-Year Investment and Management Plan -- CBP</b> must submit a multi-year investment and management plan for inspection and detection technology supporting operations under this heading, including all NII and radiation detection technology, that provides (1) the funding level for all inspection and detection technology equipment by source; (2) the inventory of inspection and detection technology equipment by type and age; (3) the proposed appropriations for procurement of inspection and detection technology equipment by type, including quantity, for deployment, and for operations and maintenance; (4) projected funding levels for procurement of inspection and detection technology equipment by type, including quantity, for deployment, and for operations and maintenance for each of the 3 subsequent fiscal years; and (5) a current acquisition program baseline that aligns the acquisition of each technology to mission requirements (by defining existing capabilities of comparable legacy technology assets, identifying known capability gaps between such existing capabilities and stated mission requirements, and explaining how the acquisition of each technology will address such known capability gaps), defines life-cycle costs for each technology (including all associated costs of major acquisitions systems infrastructure and transition to operations) delineated by purpose and fiscal year for the projected service life of the technology, and includes a phase-out and decommissioning schedule delineated by fiscal year for existing legacy technology assets that each technology is intended to replace or recapitalize.	Report is being drafted or reviewed by CBP

2012	2/14/2012	Customs Border Security Act of 2002, sec. 311(a) and FY 2011 Appropriation Act	<b>Automated Commercial Environment Quarter 1 FY 2012</b> – The Committee directs the Department to submit the ACE quarterly progress reports on time and no later than 45 days after the close of each quarter. The report discusses the progress of ACE implementation, including goals, benefits, desired outcomes, and performance metrics.	Report is being reviewed by DHS
2012	2/15/2012	Consolidated Appropriations Act of FY 2012 (Joint Explanatory Statement, Division D; Senate Report 112-74; House Report 112-91)	<b>Resource Optimization at the POEs</b> -- CBP must update its POE staffing model with a particular emphasis on staffing requirements reflecting both the new and renovated POEs that have been brought online, as well as the increase in cross-border commercial and passenger traffic as the economy improves.	Report is being reviewed by DHS
2012	2/15/2012	Consolidated Appropriations Act of FY 2012 (Joint Explanatory Statement, Division D; Senate Report 112-74)	<b>Improving the Entry Process for Visitors to the United States</b> -- CBP must submit a report on the programs and actions it has taken to improve the entry process experience for travelers, including customer service. The report should include (1) how CBP and DHS have implemented the recommendations proposed by the Secure Borders and Open Doors Advisory Committee, such as the International Registered Traveler program, the Model Ports of Entry program, and the Global Entry Program; (2) the training CBP officers are provided regarding “welcoming” visitors, including aspects of courtesy and customer service, as well as any reasons why officers should not be provided such instruction; and (3) a detailed explanation of how these existing programs have reduced wait times, how much money has been directed to these improved entry programs for each of FYs 2008–2011, and how funds provided in FY 2012 will be used to continue and expand these and other programs.	Report is being drafted or reviewed by CBP
2012	2/21/2012 Per legislation, due date is pushed back to 2/21/12 since the original deadline had passed before enactment.	Consolidated Appropriations Act of FY 2012 (House Report 112-91)	<b>CBP Unobligated Balances Quarterly Report (FY 2012 Quarter 1)</b> -- The Committee directs CBP must report quarterly on the results of its own quarterly reviews of obligations in carryover accounts that should be de-obligated through its validation and verification process, pursuant to CBP Directive 1220–011C.	Report is being drafted or reviewed by CBP
2012	2/21/2012 Per legislation, due date is pushed back to 2/21/12 since the original deadline had passed before enactment.	Consolidated Appropriations Act of FY 2012 (House Report 112-91)	<b>User Quarterly Fees (FY 2012 Quarter 1)</b> -- The Secretary must continue to submit quarterly reports on user fees, and to include in the briefings the status of collections and steps taken to mitigate shortfalls in expected collections.	Report is being drafted or reviewed by CBP

2012	2/21/2012 Per legislation, due date is pushed back to 2/21/12 since the original deadline had passed before enactment.	Consolidated Appropriations Act of FY 2012 (House Report 112-91)	<b>CBP Staffing and Hiring (January submission)</b> -- CBP must continue submitting monthly staffing and hiring reports, including the status of hiring for the Northern and Southwest borders.	Report is being drafted or reviewed by CBP
2012	2/21/2012 60 days after enactment	Consolidated Appropriations Act of FY 2012 (House Report 112-91)	<b>Automation Modernization Expenditure Plan (FY 2012)</b> -- CBP must submit an ACE expenditure plan for fiscal year 2012, including a current acquisition project baseline for ACE and TECS Modernization.	Report is being drafted or reviewed by CBP
2012	2/21/2012 60 days after enactment	Consolidated Appropriations Act of FY 2012 (Consolidated Report HR 112-331; Seante Report 112-74; House Report 112-91)	<b>ACE Expenditure Plan for FY 2012</b> -- CBP must submit an expenditure plan for the ACE program including results to date, plans for the program, and a list of projects with associated funding from prior appropriations and provided by this Act. The report should include a current acquisition project baseline for ACE and TECS Modernization as well as CBP's progress in implementing ITDS, with regard to the technical features of ITDS as well as the recruitment of all participating government agencies.	Report is being reviewed by DHS
2010	30 days after distributions	FY 2010 Appropriations Act (Conference HR 111-298; SR 111-31); NAFTA Implementation Act, P.L. 103-182 (H.R. 3450, sec. 691)	<b>Annual ADCVD Enforcement Actions and Compliance Initiatives for FY 2011</b> -- CBP is directed to continue to work with the Departments of Commerce and Treasury, and the Office of the United States Trade Representative (and all other relevant agencies) to increase collections, and provide a public report on an annual basis, within 30 days of each year's distributions under the law. The report should summarize CBP's efforts to collect past due amounts and increase current collections, particularly with respect to cases involving unfairly traded U.S. imports from China. The report shall provide the amount of uncollected duties for each antidumping and countervailing duty order, and indicate the amount of open, unpaid bills for each such order. In that report, the Secretary of Homeland Security, in consultation with other relevant agencies, including the Secretaries of Treasury and Commerce, should also advise as to whether CBP can adjust its bonding requirements to further protect revenue without violating U.S. law or international obligations, and without imposing unreasonable costs upon importers.	Report is being drafted or reviewed by CBP

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **U.S. Customs and Border Protection Salaries and Expenses**

### **I. Appropriation Overview**

#### **A. Mission Statement for Salaries and expenses:**

As the frontline border agency in the U.S. Department of Homeland Security (DHS), U.S. Customs and Border Protection (CBP) has the dual mission of preventing suspected terrorists and terrorist weapons from entering the United States, while also facilitating the flow of legitimate trade and travel into and out of the United States. CBP ensures that all persons and cargo enter the United States legally and safely through official checkpoints and ports of entry (POE).

The Salaries and Expenses appropriation funds all operating costs associated with CBP's accomplishment of its dual mission. This appropriation supports all six CBP Lines of Business (LOBs): (1) Securing America's Borders; (2) Securing and Facilitating Flows of Cargo; (3) Securing and Facilitating Flows of People; (4) Intelligence and Targeting; (5) Mission Support and (6) Enterprise Business Services, which comprise portfolios of similar programs, projects and activities (PPAs).

CBP achieves its mission using a combination of advanced information, risk assessment, appropriate scanning and other technologies, and by partnering with Federal, state, local, tribal and foreign law enforcement agencies as well as private industry and international partners. CBP's approximately 61,000 highly-trained employees ensure that the agency performs its mission with vigilance, integrity and professionalism.

#### **B. Budget Activities:**

##### Headquarter Management and Administration

The Headquarters Management and Administration activities provide critical policy and operational direction, mission support, including equipment, training, and technical expertise to CBP frontline personnel. This PPA supports all six CBP Lines of Business.

##### Border Security Inspections and Trade Facilitation at the Ports of Entry

The Inspections, Trade, and Travel Facilitation at the Ports of Entry program also supports all six CBP Lines of Business. CBP uses resources within this PPA to mitigate the threat of terrorists' instruments of terror and contraband from entering the U.S. while facilitating the legal flow of people and trade by deploying CBP officers (CBPO) to the POEs. CBP achieves its mission in this area using a combination of technology, intelligence, risk information, targeting, and international cooperation to screen inbound international cargo and travelers and, in targeted border areas, to screen departing export cargo. Additional attention to outbound travel along areas of the Southwest border also helps prevent the exit of money and weapons for illegal purposes.

The ultimate goal of the Inspections, Trade, and Travel Facilitation at the Ports of Entry program is to protect the U.S. while improving compliance with trade regulations and other mandatory import/export guidance. CBP has extended its zone of security beyond its physical borders through the use of bilateral and private-sector partnerships, targeting, and by scrutinizing advance information on people and products coming into this country. CBP is cultivating “smart borders” through the use of technology, has established a layered defense strategy and created a unified, recognizable presence at the border to combine and capitalize on the authorities and skills of our diverse workforce.

#### Border Security and Control Between the Ports of Entry

The Border Security and Control between the Ports of Entry PPA supports the following Line of Business (LOB): LOB 1, Securing America’s Borders. LOB 1 reflects CBP’s core mission area of securing the border and preventing contraband, illegal migrants, terrorists and terrorist weapons from entering the U.S. This PPA includes funding for the people that perform the mission as well as equipment that they use; the air platforms, marine assets, and technology associated with LOB1 are funded by other Appropriations. The subprograms that comprise the LOB are organized geographically (i.e., Northern Border, Southwest Border, Coastal and Source & Transit Zone), given the distinct threat environments of each.

A national strategy that consists of five objectives has been established to achieve the mission of the Border Security and Control between the Ports of Entry PPA: (1) Establish a substantial probability of apprehending terrorists and their weapons as they attempt to enter illegally between the POEs; (2) Deter illegal entries through improved enforcement; (3) Detect, apprehend, and deter smugglers of humans, drugs and other contraband; (4) Leverage Smart Border Technology to multiply the effect of enforcement personnel; and (5) Reduce crime in border communities and consequently improve the quality of life and economic vitality of targeted areas. The National Border Patrol Strategy requires increasing national security by augmenting enforcement resources along the Northern and Southwest Border. The proper balance in the deployment of personnel, equipment, intelligence, support, technology, and infrastructure is critical to border security. Reducing vulnerability to the entry of terrorists, illegal aliens and drugs by increasing personnel and resources, is the key to the successful implementation of this strategy.

#### CBP Air and Marine – Salaries

The CBP Air and Marine Salaries PPA supports LOB 1, Securing America’s Borders. and contains funding for staff of approximately 1,900 Air Interdiction agents/pilots, Marine Enforcement officers, operational support, and administrative positions. This PPA funds enhancement of staff skills and expertise to enable deterrence, interdiction, and prevention of acts of terrorism arising from unlawful movement of people and goods across the borders of the U.S.

#### **C. Budget Request Summary:**

CBP requests 53,897 positions, 53,702 FTEs, and \$9,010.581 million for Salaries and Expenses in FY 2013, of which 351 positions, 338 FTEs, and \$261.5 million represents a transfer from National Protection and Programs Directorate (NPPD) for the United States Visitor and Immigration Status Indicator Technology (US-VISIT). In total, this represents a change of 299 positions, 453 FTE and \$330.463 million from FY 2012 to FY 2013.

In FY 2013, CBP is submitting a legislative proposal to Congress concerning “Alternative Sources of Financing: Reimbursement Authority for Enhanced CBP Services.” This legislative proposal would authorize the CBP Commissioner to approve requests from interested parties to reimburse CBP for enhanced inspectional activities.

**Program Transfer:**

Transfer of US-VISIT - The requested funding of \$261.523 million and 338 FTEs reflects the proposed transfer of US-VISIT to CBP and the sustainment of US-VISIT mission and mission support capabilities. CBP would assume responsibility for the core US-VISIT operations and the management of the biometric and biographic information storage and matching and watchlist management services, and ICE will assume responsibility of the US-VISIT overstay analysis services.

**Program Increases:**

CBP is requesting increases to the Automated Targeting System in recognition of its mission effectiveness and function as a force multiplier. Given the realities of the Budget Control Act to limit the growth of the Federal government, CBP is looking to other investments that will bring tools and information to improve the efficiency of CBP’s existing workforce. A number of additional investments in the President’s FY 2013 Budget are targeted toward this purpose and, while relatively small, will help improve the effectiveness of CBP officers and Border Patrol agents. These include enhancements for Intellectual Property Right enforcement, Centers for Excellence and Expertise, and Video Awareness from Mobile Assets. A full listing of CBP’s Program increases is as follows:

Automated Targeting Systems (ATS) Operations & Maintenance (O&M) – The requested increase of \$31.0 million addresses resource requirements for the maintenance of, and enhancements and improvements to the Automated Target System (ATS), which supports the overall operations and maintenance (O&M) of the six modules that comprises ATS.

Targeting Systems and Staff – The requested increase of \$38.702 million and 25 FTEs will support enhancements to targeting systems and staff within the Office of Intelligence and Investigative Liaison (OIIL). The OIIL program includes resources for the identification, development, implementation, and refinement of mechanisms for various methods of targeting and responding to security-related operational and real-time events involving people, goods, and conveyances entering and exiting the United States. The increase will allow CBP to increase our targeting capabilities by providing the ability to updates rules in real time and allow CBP to attain a true 24/7 targeting capability to better support CBP officers in the field.

Container Security Initiative (CSI) – The requested increase of \$13.032 million will allow CBP to continue to review high-risk cargo that can be targeted and inspected before reaching a U.S. port. Operational in 58 ports, CSI is an effective multinational program protecting the primary system of global trade – maritime containerized shipping – from being exploited or disrupted by international terrorists. The request will support the CSI rebalancing of its international footprint and maintain current operations. The program will continue the hub concept in several international locations where there are multiple CSI ports.

Intellectual Property Rights (IPR) Enforcement – The requested increase of \$10.0 million will support IPR enforcement through two operational initiatives. The request includes \$5 million for the IPR Partnership Program and Distribution Chain Management and \$5 million to support the mainstream Enforcement Link Mobile Operations (ELMO) for U.S. border operations.

ICE Medical Detention Support – The requested increase of \$8.0 million will support ICE Medical Detention program. This increase represents the projected costs of medical treatment for aliens that are in CBP’s custody. Costs are based on current requirements, plus inflation and ICE’s projections for costs.

National Targeting Center –The requested increase of \$7.98 million will allow CBP to continue to develop and implement an enhanced targeting strategy that more effectively and efficiently divides cargo and travelers according to potential threat they pose.

Industry Integration Centers - Centers for Excellence and Expertise(CEEs) – CBP requests \$3.0 million for CEEs. In October 2011, CBP established two Industry Integration Centers: the Electronics Center in Los Angeles and the Pharmaceuticals Center in New York. CEE’s are being developed in an effort to increase uniformity of practices across ports of entry, facilitate the timely resolution of trade compliance issues nationwide, improve enforcement efforts, and further strengthen critical agency knowledge on key industry practices. In FY 2013, with the additional funding provided, CBP, in consultation with its trade community partners, will establish 4 additional CEEs designed to address issues within critical trade sectors such as textiles, petroleum, consumer products and mass market retail imports, agriculture, automotive, machinery and manufacturing imports.

Financial and Budgetary Management Systems – The requested increase of \$3.0 million will provide enhancements and operations and maintenance costs to the Office of Administration’s (OA) base funding for the Systems, Application, and Products (SAP) maintenance. SAP is CBP’s integrated Enterprise Resource Planning (ERP) system for financial, procurement and asset management.

Provide Situational Awareness via Video from Air Assets – The \$3.0 million increase will support the acquisition of situational awareness via video from air assets. A project called “Big Pipe” is a video streaming capability from various CBP aerial and ground assets to provide situational awareness to CBP, DHS and other Federal agencies; including but not limited to DOD, the National Geospatial-Intelligence Agency (NGA), the North American Aerospace Defense Command ( NORAD), and Foreign Governments, as well as local and state law enforcement.

Other International Programs – The requested increase of \$2.218 million represents an increase to support non pay funding for the Office of International Affairs (INA).

### **Program Decreases**

CBP made a number of internal realignments and reductions in order to fully support the staffing level for its frontline officers and agents. Our cost for salaries and benefits continues to increase at a rate higher than general inflation primarily due to: workforce maturation; staff promotions to full-performance journeyman; low attrition rates; and an increased cost in workforce benefits, such as

retirement and healthcare. The reductions/realignments necessary to fund these staffing cost increases include:

Management and Administration Staffing and Services – Administrative reviews identified efficiencies totaling \$55.257 million and 102 FTE associated with printing services, organizational studies, and liaison work with various audit activities. This includes Human Resource Management activities and decreases to Administrative Staff and expenses within the Office of the Commissioner, the Office of Information Technology, the Office of Administration, and the Office of Public Affairs.

CBP Fleet Acquisition and Management – The requested decrease of \$41.221 million will defer replacing vehicles used for non mission critical operations resulting in a deferment of \$39.671 million. In addition, CBP will reduce projected fuel and maintenance expenses by \$1.550 million.

CBP IT Infrastructure & Systems Support – The requested decrease of \$36.751 million will be taken in CBP IT Infrastructure & Systems Support. This reduction will require CBP to defer replacement of legacy equipment and technical upgrades. CBP will work to mitigate any potential network availability or system slow down and outages.

NII Investments and O&M – The \$31.043 million reduction in LOB 2 transitions the NII program to an Operations & Maintenance (O&M) steady state mode. With this shift in strategy, the program will rely on currently fielded equipment. The NII program will develop a risk mitigation plan to shift NII resources in order to meet mission requirements for facilitating the movement of legitimate trade and intercepting and screening high risk cargo and conveyances.

Field Operations Overtime – The Office of Field Operations will reduce overtime costs by \$21.1 million. This reduction will not impact operational staffing and CBP officers will continue the full range of inspection, intelligence analysis, examination, and law enforcement activities that relates to the arrival and departure of persons, conveyances, and merchandise at our Nation's ports of entry.

Academy Training and Operations – CBP will realize a savings of \$14.7 million by reducing some specialized training such as succession management and leadership training. Mandatory training for new frontline employees to perform their duties and officer and agents certifications will be maintained.

CBP Transportation Program – CBP will realize a savings of \$12.258 million due to a reduction to transportation workload and through cost efficiencies. This savings will be acquired through reconfiguration of the assets used in meeting the lower workload requirements and cost reductions gained from the re-competition of the transportation contract.

Field Support Staff – CBP has undertaken a review of operational support requirements through the field locations and adjusted position authorizations to reflect the review recommended changes. These adjustments will yield a savings of \$9.213 million.

Air and Marine Staff – CBP will reduce OAM staff to preserve higher priority requirements. This will be achieved by aggressively managing recruiting and attrition and making use of various tools to

manage the workforce and address the highest priority missions. This reduction will yield a savings of \$7.03 million.

Suspending WHITI/LBI Procurement – CBP will decrease the Western Hemisphere Travel Initiative Land Border Integration (WHTI/LBI) procurement program by \$6.0 million. The decrease will not affect programmatic operations. CBP will maintain its current deployed investment and process improvements as well as the operations and maintenance of this program.

Extending C-TPAT Validation Cycle to 4 Years – C-TPAT will extend the validation cycle to four years as mandated by the Security and Accountability for Every (SAFE) Port Act of 2006 (P.L. 109-347). In past years, CBP accelerated the re-validation schedule to once every three years for all importers, carriers and for manufacturers and more specifically once every year for Mexico highway carriers which are considered to be high risk. This extension to a four year cycle will yield a savings of \$5 million.

Rescoping Immigration Advisory Program (IAP) in Incheon and Warsaw – CBP will realize a savings of \$3.463 million from ceasing IAP operations in Warsaw, Poland and Incheon, South Korea. The closures will allow CBP to maintain its international footprint while expanding the IAP program to other locations.

Legacy Application Standardization – CBP budget request includes a reduction of \$2.938 million for Legacy Application Standardization. CBP will be consolidating infrastructure environments where possible, and looking to retire/consolidate legacy government developed applications.

Trade's National Account Manager, Rulings, & Revenue Policy Staff – This request includes a savings of \$2.360 million which will be realized by reducing FTEs in the following offices: 2 FTE National Account Managers (NAMS); 5 FTE from Trade, Policy and Program (TPP) Revenue Branch; and 14 FTE from the Regulations and Rulings (RR) Policy Staff.

Closing 2 National Targeting & Analysis Groups – CBP will close two National Targeting and Analysis Groups (NTAG); one located in Dallas, Texas and the other in Chicago, Illinois. The workload generated by the closure of these two facilities will shift to other existing NTAG. These closures will yield a savings of \$1.386 million.

Deactivation of 9 Inland Border Patrol Stations – OBP recommends the deactivation of nine inland stations. The stations are: Billings, MT; Twin Falls, ID; Abilene, Texas; San Angelo, TX; Riverside, CA; Dallas, TX; San Antonio, TX; Lubbock, TX; and Amarillo, TX. These locations were selected based on a study that assessed the stations' operational utility relative to the Border Patrol's operating environment. The 43 agents currently assigned to these positions will be reassigned to other stations. This deactivation will result in a savings \$1.3 million.

## **Pay Reform**

Reform of CBP's personnel system is needed to address inefficiencies that resulted from the merger of employees from three different agencies into CBP. Prior to the establishment of DHS, these agencies had their own overtime systems and policies and the continuation of these different pay and benefit

systems and policies hinders CBP's ability to integrate their workforce. CBP is moving towards a uniform system that meets the agency's critical mission and encourages mobility across organizations. CBP proposes moving towards a uniform overtime system for its frontline enforcement officers that promotes efficiency while valuing the time and inconvenience to employees when overtime is needed to meet the Agency's critical mission. The standardization of CBP's overtime pay systems is necessary to achieve our mission integration objective. In order to effectively achieve this goal, DHS has proposed legislative changes in law. The legislation also brings all Law Enforcement Officer and Enhanced Customs and Border Protection Officer positions into the same retirement system and is projected to save approximately \$65 million. The proposed legislative language was provided to Congress on September 7, 2011.

## II. Summary of FY 2013 Budget Estimates by Program/Project Activity (PPA)

FY 2011 actuals includes funding from the FY 2010 Emergency Border Security Supplemental (P.L. 111-230)

FY 2012 excludes a rescission of prior-year unobligated legacy balances in the amount of \$3.3 million, pursuant to P.L. 112-74.

### III. Current Services Program Description by PPA

**Department of Homeland Security**  
**U.S. Customs and Border Protection**  
**Salaries and Expenses**  
**MA Border Security Inspections and Trade Facilitation**  
**Program Performance Justification**  
(Dollars in Thousands)

**PPA: MA Border Security Inspections and Trade Facilitation**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	<b>2,398</b>	<b>2,283</b>	<b>504,335</b>
<b>2012 Enacted Budget Authority</b>	<b>2,380</b>	<b>2,288</b>	<b>667,794</b>
2013 Adjustments-to-Base	90	90	(6,581)
<b>2013 Current Services</b>	<b>2,470</b>	<b>2,378</b>	<b>661,213</b>
2013 Program Change	(47)	(47)	(59,799)
<b>2013 Total Requested Budget Authority</b>	<b>2,423</b>	<b>2,331</b>	<b>601,414</b>
Total Change 2012 to 2013	43	43	(66,380)

CBP requests 2,423 positions, 2,331 FTE, and \$601.414 million in FY 2013 for the Headquarters Management & Administration, at the POE PPA

- A decrease of -\$10.808 million for annualization of FY 2012 Field Operations positions to staff new ports of entry and to enhance operations
- An increase of \$2.141 million for an enhancement to targeting systems and staff
- An increase of \$1.500 million for an enhancement to provide situational awareness via video from air assets
- An increase of \$1.517 million for the FY 2013 Pay Increase
- A transfer of -\$9.385 million for consolidation of rent into the Rent PPA
- An increase of \$1.500 million for an enhancement for financial and budgetary management systems
- An increase of \$67,000 for annualization of the FY10 Border Security Supplemental
- A decrease of -\$1.645 million for annualization of the FY 2012 National Targeting Center enhancement
- A decrease of -\$193,000 for an efficiency from decentralization of CBP's Discipline Program
- An increase of \$3.120 million for an adjustment for Workers and Unemployment Compensation Requirements. The increase to the Workers Compensation requirements is

attributable to more aggressive prophylaxis programs and the increased hazards of the CBP mission as well as the numbers of persons in those hazardous conditions. The increase to Unemployment Compensation Program requirements is attributable to increased attrition of interns separating because of their inability to meet requirements and is also compounded by extension of benefits offered by the Program.

- A decrease of -\$1.955 million for a DHS Management efficiency regarding Strategic Sourcing Initiatives
- An increase of \$17.045 million for a technical adjustment for the Working Capital Fund. This increase is mainly due to the inclusion of Data Center Operations & Maintenance and the cost of HSPD-12.
- A decrease of -\$24.211 million for a reduction to management and administration staffing & services
- A decrease of -\$1.469 million for a reduction to legacy application standardization
- A decrease of -\$18.375 million for a reduction to CBP IT infrastructure and systems support
- A decrease of -\$20.885 million for a reduction to CBP fleet acquisition and management
- A decrease of -\$3.612 million for a DHS Management Efficiency regarding TDY and Travel
- A decrease of -\$2.548 million for a DHS Management Efficiency
- An increase of \$11.813 million for a transfer to realign OTIA funding to S&E
- A decrease of -\$9.743 million for a DHS Management efficiency regarding OFPP-Directed Purchasing Savings
- An increase of \$42,000 for annualization of the FY 2012 Immigration Advisory Program enhancement.
- A decrease of -\$152,000 for a DHS Management efficiency regarding PCS Costs
- A decrease of -\$144,000 for a DHS Management efficiency regarding overtime

### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The Headquarters Management and Administration (M&A) PPA funds the infrastructure necessary to provide critical policy and operational direction, mission support, and technical expertise to CBP front-line personnel. Funding within this PPA is vital to sustaining the safety of our borders and expeditiously carrying out trade activities. This program is essential to performing CBP's dual mission of protecting our homeland while facilitating legitimate trade and travel.

The M&A, Border Security Inspections and Trade Facilitation PPA supports all six CBP Lines of Business (LOBs): (1) Securing America's Borders; (2) Securing and Facilitating Flows of Cargo; (3) Securing and Facilitating Flows of People; (4) Intelligence and Targeting; (5) Enterprise and Business Services (Management and Administration); and (6) Mission Support.

Note: Current Services Goals for offices associated with the M&A Border Security Inspection and Trade Facilitation PPA are included with the M&A, Border Security and Control between the Ports of Entry PPA.

**Department of Homeland Security**

- A decrease of -\$9.744 million for a DHS Management efficiency regarding OFPP-Directed Purchasing Savings
- A decrease of -\$2.533 million for a DHS Management Efficiency
- A decrease of -\$18.376 million for a reduction to CBP IT infrastructure and systems support
- A decrease of -\$137,000 for a DHS Management Efficiency regarding overtime
- A decrease of -\$1.469 million for a reduction to legacy application standardization
- A decrease of -\$24.259 million for a reduction to management and administration staffing & services
- An increase of \$17.045 million for a technical adjustment for the Working Capital Fund is mostly due to the inclusion of Data Center Operations & Maintenance and the cost of HSPD-12.
- An increase of \$11.814 million for a transfer to realign OTIA funding to S&E

- An increase of \$3.120 million for an adjustment for Workers and Unemployment Compensation Requirements. The increase to Workers Compensation Program requirements is attributable to more aggressive prophylaxis programs and the increased hazards of the CBP mission as well as the numbers of persons in those hazardous conditions. The increase to the Unemployment Compensation Program requirements is attributable to increased attrition of interns separating because of their inability to meet requirements and is also compounded by extension of benefits offered by the Program.
- A decrease of -\$193,000 for an efficiency from decentralization of CBP's Discipline Program
- An increase of \$1.5 million for an enhancement for financial and budgetary management systems
- An increase of \$1.5 million for an enhancement to provide situational awareness via video from air assets
- An increase of \$229,000 for annualization of the FY10 Border Security Supplemental
- A decrease of -\$9.385 million for consolidation of rent into the Rent PPA
- An increase of \$1.599 million for the FY 2013 Pay Increase
- An increase of \$2.141 million for an enhancement to targeting systems and staff

### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The PPA Management and Administration (M&A), Border Security and Control Between Ports of Entry (POEs) provides critical policy and operational direction, mission support, and technical expertise to CBP front-line personnel. M&A funding is essential in carrying out CBP's dual mission of protecting our homeland while facilitating legitimate trade and travel.

The M&A PPA supports all six CBP Lines of Business (LOBs): (1) Securing America's Borders; (2) Securing and Facilitating Flows of Cargo; (3) Securing and Facilitating Flows of People; (4) Intelligence and Targeting; (5) Enterprise and Business Services Management and Administration; and (6) Mission Support. The following offices are funded within this PPA : Human Resources Management (HRM); Public Affairs (OPA); Commissioner (CMSR); Chief Counsel (OCC); Congressional Affairs (OCA); Administration (OA); Intelligence and Investigative Liaison (OIIL); Internal Affairs (IA); Training and Development (OTD); Technology Innovation and Acquisition (OTIA); and Information Technology (OIT).

Offices such as CMSR, OPA, OCC, OCA, HRM and OTD manage programs and perform activities in support only for LOB 5, Enterprise Business Services, while the remaining offices within in the M&A PPA (OTIA, OIIL, OA, IA, and OIT) support multiple LOBs.

In general, offices funded from this PPA provide the mission support activities typical of headquarters. Therefore, they will appear in Lines of Business 5 & 6. However, some of these offices also have activities in multiple Lines of Business because some of their functions directly support those LOBs. For example, OA's Revenue Division appears, for obvious reasons, in LOB 2. However, from an organizational standpoint, the Revenue Division is grouped with other accounting and funds management offices under the Office of Administration. Similar situations exist for the larger HQ offices such as OIIL, IA, and OIT. Overall, while complex, the mapping between the Offices and

LOBs illustrates that there are differences between where a function is located administratively and the operational impact of that function. Taken together, the PPA, Office, and LOB views clearly articulate where funding comes from, which office manages it, and how it supports CBP's mission

## **Offices Under Enterprise Business Services (Line of Business 5)**

### **Office of the Commissioner (CMSR)**

The Office of the Commissioner is responsible for the overall management and strategic direction of CBP. As the leading CBP office, CMSR has Counselors who serve as liaisons to specific CBP program offices. These Counselors operate as Senior Program Advisors who have broad operational orientation giving senior leaders within CBP a specific point of contact to clarify the Commissioner's intent and provide operational guidance. In addition, the seven offices described below support the implementation of the Commissioner's agenda:

### **Office of Diversity and Civil Rights (DCR)**

The Office of Diversity and Civil Rights, formerly the Office of Equal Opportunity, is responsible for ensuring diversity and inclusion, and for overseeing compliance with applicable civil rights and civil liberties law. DCR provides leadership in the formulation, implementation, and evaluation of CBP's civil rights policies and programs. In addition, DCR ensures diversity and inclusion in all CBP programs and activities and processes discrimination complaints.

### **Office of Policy and Planning (OPP)**

The Office of Policy and Planning provides leadership, direction, and advice regarding CBP's overall policy development and implementation. OPP assists and works on behalf of the Commissioner and Deputy Commissioner to define and promote CBP priorities through the effective development and implementation of key policy initiatives in coordination with other CBP offices, DHS, and other governmental agencies. The OPP serves as the principal advisor to the Commissioner and other senior officials on CBP's strategic planning. In coordination with the CBP Offices of Administration and Information Technology, OPP also advises senior leadership on the integration of resource allocation with strategic-level planning and performance. Finally, OPP is implementing CBP's Strategic Management Framework (SMF), which will fully integrate CBP's investment management, resource management, and program management processes to ensure the most efficient use of CBP resources.

### **Office of Program Development (OPD)**

The Office of Program Development, through the effective development, management and oversight of the Planning, Programming, Budgeting, and Accountability (PPBA) strategic framework, increases recognition that resources management is an integrated strategy focused on mission outcomes, builds tighter linkage and alignment within the PPBA processes, and strengthens CBP's overall PPBA capability and competencies.

### **State, Local and Tribal Office**

The State, Local and Tribal Office is responsible for the impact of CBP policies and initiatives on state and local stakeholders, and collaborates with state and local stakeholders of current and proposed CBP programs.

### Office of Trade Relations (OTR)

The Office of Trade Relations is responsible for providing timely information about CBP trade policy to the international trade community (importers, exporters, carriers, customhouse brokers, forwarders, bond providers, trade associations and financial institutions). OTR conducts formal CBP outreach efforts by hosting regional and local trade roundtables, trade webinars and large trade conferences, such as the semiannual Trade Symposium, including setting the agenda, determining the message to be conveyed, and identifying CBP and Other Government Agencies (OGA) participants. OTR also serves as an objective problem resolution resource for the international trade community on strategic issues. The Director of OTR is the Designated Federal Officer (DFO) for two federal advisory committees: 1) The U.S. Customs and Border Protection Airport and Seaport User Fee Advisory Committee provides advice to the Secretary of the Department of Homeland Security on issues related to the performance of airport and seaport inspections coinciding with the assessment of an agriculture, customs, or immigration user fee; and 2) The Advisory Committee on Commercial Operations of CBP (COAC) advises the Secretaries of the Department of the Treasury and the Department of Homeland Security on the commercial operations of CBP and related DHS and Treasury functions. Through a strategic communication plan, in coordination with other CBP offices, DHS, and other government agencies, OTR determines the best practices and the most effective and efficient means of communicating policy matters to the trade community.

### Joint Operations Directorate (JOD)

In order to further advance operations integration, synergy, and to formalize and institutionalize this direction for the agency, the Joint Operations Directorate (JOD) was established in FY 2011 within the Office of the Commissioner. The mission of the JOD is to facilitate and strengthen the strategic capabilities of CBP by planning, coordinating, and executing integrated field operations.

The JOD consists of five divisions: Incident Management Division – handles all natural and man-made incidents; Joint Integrated Planning Division – handles all planning for operations involving more than one CBP operational component; Special Programs Division – handles both unclassified and classified operations and special mission planning; Joint Field Integration/Corridors Division; and Joint Communications Division.

The JOD supports CBP's mission through development of joint strategic, operational, and incident plans, and the implementation of programs and initiatives to combat international terrorism and transnational criminal organizations.

### Joint Field Command (JFC)

The Joint Field Command – Arizona (JFC-AZ) enhances and ensures the continuity of Southwest Border Security operations in Arizona through a unified and cohesive CBP approach while ensuring the facilitation of legitimate trade and travel. The JFC-AZ establishes a corporate mindset that will maximize and improve CBP capabilities across the Arizona border through a unified, integrated and cohesive approach to Border Security. The JFC-AZ serves as a direct representative of the Commissioner within Arizona and communicates and directs the implementation of the Commissioner's strategic intent for CBP joint operations through the senior field leadership. The JFC-AZ also facilitates the decision making process for the allocation of assets with the Joint Operations Directorate and other HQ elements in accordance with strategic plans and directives.

In FY12 the JFC-AZ enforcement campaign plan will be implemented. The intent of the plan is to degrade and dismantle the Transnational Criminal Organizations (TCO) support nodes attempting to exploit established smuggling infrastructure located in the Arizona Corridor. The campaign supports the JFC-AZ strategic vision and priorities and subsequently the principles and priorities set forth by the Office of the Commissioner for CBP.

### **Office of Public Affairs (OPA)**

The Office of Public Affairs is responsible for informing and managing the flow of information to the public about CBP and its missions, accomplishments, and ongoing operations. OPA prepares and disseminates timely and accurate information to the public and to other CBP offices. OPA consists of five divisions/programs (Media, Public Outreach, CBP History, Information Center, and Visual Communications).

### **Office of Chief Counsel (OCC)**

The Office of Chief Counsel is the chief legal officer of CBP and reports to the General Counsel of DHS through the Deputy General Counsel. The OCC serves as the Ethics Officer for the organization and is the principal legal advisor to the Commissioner of CBP and its officers. The OCC staff provides legal advice to, and legal representation of, CBP officers in matters relating to the activities and functions of CBP. This office is also responsible for reviewing proposed actions to ensure compliance with legal requirements, preparing formal legal opinions, preparing or reviewing responses in all court actions, civil or criminal, involving CBP. In addition, OCC develops, implements, and evaluates nationwide programs, policies, and procedures within its functional areas. The OCC has both a Headquarters and a field structure. The Headquarters office is located in Washington, D.C. and its activities are divided broadly into three functional areas: Ethics, Labor and Employment, Enforcement, and Trade and Finance, under the supervision of Associate Chief Counsels. The field structure consists of Associate and Assistant Chief Counsels located in major cities across the United States who advise CBP field managers in their geographic areas.

### **Office of Human Resources Management (HRM)**

The Office of Human Resources Management is CBP's lead for managing and developing the workforce. HRM provides centralized human resources support to nearly 61,000 CBP employees nationwide and overseas and is responsible for promoting mission accomplishment through the efficient and effective delivery of the following services: hiring and recruitment; organizational realignments; compensation and pay administration; retirement and benefits; workplace health and safety; and labor and employee relations.

### **Office of Congressional Affairs (OCA)**

The Office of Congressional Affairs acts as a conduit between DHS, CBP's internal components, and the Congress. OCA performs the vital work of advancing CBP's core mission priorities in the legislative arena by facilitating effective and timely information exchange and analysis between its stakeholders in three critical areas: Enforcement, Trade and Agriculture, and Appropriations and Management.

## **Mission Support (Line of Business 6)**

### **Office of Training and Development (OTD)**

The Office of Training and Development is responsible for centralized leadership and direction of all training programs for the entire CBP workforce

OTD ensures that all training efforts support the CBP mission and strategic goals, meet the needs of a diverse and geographically dispersed workforce, and contribute to measurable outcomes and results. The OTD establishes standards for designing, developing, delivering, and evaluating training. The office directly executes career development programs; basic and advanced training to all occupations; as well as supervisory, management, and executive development programs via the annual agency-wide national training plan.

As the focal point for centralized leadership, policy and training programs for CBP, OTD promotes achievement and a results-driven culture through effective operational and mission support training efforts and a strong leadership curriculum. OTD prepares employees to carry out the core missions of CBP and continues to evolve to meet the needs of DHS. By working with all CBP components to develop and deliver mission critical training, OTD prepares employees to protect America's frontline. OTD links to CBP's strategic goals to shape the knowledge of agency employees and to prepare them to meet the ever changing challenges of mission critical operations.

## **Offices Under Multiple Lines of Business**

### **Office of Technology Innovation and Acquisition (OTIA)**

OTIA is responsible for the acquisition, deployment, and integration of border security technology solutions. OTIA is developing into a center of excellence, mastering the essential competencies of acquisition and program management while extending their knowledge and expertise to other offices throughout CBP. OTIA will actively share best practices, useful insights, and practical breakthroughs to help CBP and DHS achieve their missions.

Under the direction of the OTIA Assistant Commissioner are four directorates:

1. Acquisition Policy and Oversight—Responsible for establishing policy, both for the conduct of acquisition program management within CBP as well as for ensuring technology initiatives are well defined, integrated across CBP, and based on sound analysis. Acquisition Policy and Oversight also provides workforce development acquisition support to CBP programs. This office serves as the principal support organization to the CBP Component Acquisition Executive (CAE).
2. Program Management—Provides direction, management oversight, and overall coordination for all acquisition and program management functions within OTIA.
3. Technology Management—Responsible for ensuring that CBP's approach to technology is forward-looking, well advised by both the state-of-the-art and the state-of-the-technology, and focused on the value of the technology to CBP's operational mission.
4. Operations Integration and Analysis—Ensures that operational requirements for goods and services are identified, documented, and approved by appropriate governance structures.

Creates and exercises appropriate analytical tools so that CBP management can effectively evaluate and select alternative solutions to meet operational end-user needs.

OTIA manages the technology portfolio and the program management offices for the Southwest Border Technology, the Northern Border programs, and other technical support capabilities. Of the four directorates, OTIA Program Management Office (PMO) is the largest and employs a number of acquisition teams responsible for planning, organizing, staffing, and leading the management of specific acquisition program or programs throughout the system life cycle. In addition to the program/portfolio offices, the PMO includes Business Operations, Systems Engineering, and Integrated Logistics Support Divisions.

OTIA PMO has implemented an Integrated Product/Project Team structure to directly assign subject matter experts from the support directorates to the programs. This strategy increases efficiency and involves each support directorate with the programs and increases accountability for program success. All OTIA acquisitions will be led by a certified and experienced Program/Project Manager (PM) to ensure the programs are properly managed. Deployed technologies will undergo an operational assessment by the Border Patrol to ensure their needs are being met along the Arizona border. At a minimum, each acquisition team will include:

1. PM
2. Lead Systems Engineer
3. Assistant PM for Logistics
4. Assistant PM for Business
5. Users Representative
6. Contracting Officer/Specialist

#### **Office of Intelligence and Investigative Liaison (OIIL)**

The Office of Intelligence and Investigative Liaison supports the following Lines of Business: Securing America's Borders (1), Securing and Facilitating Flows of Cargo (2), Securing and Facilitating Flows of People (3), and Intelligence and Targeting (4).

OIIL provides CBP front line operators and decision-makers with relevant and current situational awareness and facilitates operational responses for all crimes, threats, and hazards throughout the various CBP areas of responsibility (AOR) by utilizing resources such as the Intelligence Coordination Team in Detroit, the Tucson Intelligence and Operations Coordination Center, and the 24/7 National Intelligence Watch. Through the collection and production of intelligence and analytical products, the OIIL provides intelligence and deploys technical, analytical, targeting and collection management tools in support of front line border operations to all geographic AORs. OIIL is operationally broken down into divisions:

#### Targeting Division:

- Operates and maintains the Automated Targeting System (ATS) which is a decision support tool that assesses the risk of all travelers and cargo attempting to enter/exit the US;
- CBP has made substantial investments in its targeting capabilities over the past eight years producing impressive results such as:

- Creation of the National Targeting Centers (NTC) and National targeting rules that cover all threats/hazards;
- Processing 2.1 million air passengers and crew weekly and referring 0.06% (1,300 weekly) of these travelers for additional examination;
  - Identifying over 5,000 Terrorism Watchlist matches each year; of which approximately 300 to 350 annually are denied boarding or refused entry into the United States;
- Development and integration of modernized entity resolution capabilities;
- Development and implementation of machine learning targeting rules in land border and cargo environments;
- Identifying all 6 of the previous unknown terrorist operations as high risk, such as Najibullah Zazi's, David Headley and Faisal Shahzad; the tables below illustrates ATS's current capabilities and other agencies it supports

### Collections Division

The OIIL's Collections Division directly supports the leveraging of CBP assets and those of the Intelligence Community (IC) to provide Intelligence, Reconnaissance and Surveillance capabilities that synchronize and integrate the planning and operation of sensors, assets, and processing, exploitation, and dissemination systems in direct support of current and future operations. This provides an enhanced common intelligence picture to CBP leadership both in the field and at Headquarters levels. The OIIL Collections Division deploys cutting edge technologies and capabilities, collections subject matter experts in imagery, signal and human intelligence disciplines, tracking, tagging and locating, law enforcement technical collection enhancements, synchronizing IC airborne surveillance systems, and Tasking, Collecting, Processing, Exploitation, Dissemination procedures that serve as a force multiplier to CBP field commanders and enhances the security of our borders.

### Analysis Division

The OIIL Analysis Division is responsible for the all-source analysis, production, and dissemination of classified and unclassified tactical and strategic intelligence products specific to the primary CBP mission sets across all CBP operational environments. These products are designed to inform both the strategic and operational decision-making processes at all levels of the agency. They focus on the identification of known/unknown threats, high-risk persons/conveyances/cargo and the identification of the tactics, techniques, and procedures used by transnational criminal organizations.

### Additional Trade, Travel and Targeting Enforcement Activities

OIIL also conducts risk assessments of the large volume of regulatory and commercial data generated by commercial entities and other government agencies by verifying the identity of businesses that ship goods across our borders

OIIL provides the Analytical Framework for Intelligence, a multi-year development project to create a suite of “force multiplication” tools to automate time-consuming tasks that face CBP analysts today regarding data access, query and information retrieval, analysis, and reporting. OIIL is responsible for the deployment of all classified communications and technology within CBP . The OIIL divisions ensure that intelligence serves CBP operators through activities associated with LOB 4 – Intelligence and Targeting, links closely with collection and analysis efforts, and informs CBP leaders.

OIIL also coordinates and provides liaison support to facilitate cross-organizational operations as well as CBP operations involving non-CBP elements from throughout the IC as well as international, state, local, and tribal partners and authorities.

### **Office of Administration (OA)**

The Office of Administration (OA) supports the following Lines of Business: Securing and Facilitating Flows of People or Cargo (2), Enterprise and Business Services (5) and Mission Support (6).

#### **Enforce Trade Law and Collect Revenue**

The Enforce Trade Law and Collect Revenue subprogram supports the collection of duties, taxes, and fees tied to cargo that is imported into the United States. CBP collects for over one dozen government agencies and collected a total of \$32 billion in 2010. CBP processes associated trade payments that relate to refunds of duty, drawback and distribution of funds collected related to specific trade programs, such as the Payment to Wool Manufacturers and the Continued Dumping and Subsidy Offset Act (P.L. 106-387; CDSOA) of 2000. Since the enactment of The Trade and Development Act of 2000 (P.L. 106-200) on May 18, 2000, CBP has disbursed over \$110 million to wool manufacturers and since the enactment of CDSOA on October 1, 2000, CBP has disbursed over \$2.5 billion to affected domestic producers. CBP also maintains the inventory of trade related bonds, maintains the electronic cash registers which are used to collect over \$350 million annually across the country, and administers decals and transponders for boats, private aircraft and trucks that enter the country, accounting for over \$29 million collected annually.

#### **Management**

The Management subprogram provides a wide range of activities that indirectly support agency operations and functions. OA develops, deploys, and maintains sourcing strategies to ensure efficient and effective sourcing of goods and services while supporting strategic sourcing and process improvement efforts within CBP and DHS. OA develops required analysis of multiple programs to identify initiatives that support the capabilities and goals of the organizational strategic direction, enhancing the programs’ stewardship, service delivery and performance management. OA develops and provides oversight of core business processes, business process improvement, program and organizational performance metrics, management and scorecard management. OA also provides oversight and coordination of efficiency reviews, program management reviews, and program management structural development and change management of multiple CBP Asset and Administrative Programs. Furthermore, OA is responsible for ensuring the capabilities and goals of the multiple Asset and Administrative Programs and the overarching organization are met through the development and required analysis of strategic emphasis and initiatives.

OA delivers services through customer involvement and modern, integrated financial systems in support of CBP’s goal of developing and promoting more effective and efficient methods to obtain and

manage financial data, resources, and capital assets, consistent with the needs of customers and stakeholders. OA also provides financial management services, including budgeting, accounting, and investment analysis. OA provides for effective and efficient payroll services for the unique pay circumstances encountered by CBP.

OA operates and maintains CBP's Enterprise Resource Planning (ERP) system for integrated financial, procurement, and property management. This state-of-the-art system has eliminated many paper processes and improved efficiencies in several business areas while allowing CBP to continue its outstanding financial performance with unqualified audit opinions since 2004.

OA provides for efficient and timely payment for employee travel and the payment of goods and services provided by both private companies and other government agencies to CBP in support of mission accomplishment.

OA provides print and print related services for CBP and other DHS components. In support of the agency's core mission of keeping terrorists and their weapons out of the country while securing and facilitating trade and travel, this program procures all the necessary forms and paperwork such as the CBP Form I-94 Arrival and Departure Record and CBP Declaration. In support of international travel, this program is responsible for procuring all of the agency's travel related signage found at all land, air, and sea ports of entry.

OA provides procurement contract operations, which include all pre- and post-award contract activities required to plan, select, acquire and manage the acquisition of goods, services, supplies and equipment. Requirements range from simplified to major systems acquisitions resulting in the award of a variety of contracts, task, delivery and purchase orders, as well as interagency agreements. Many of the procurements involve complex requirements, are high-dollar value, represent multi-year efforts, are competitively awarded, and come with intense political interest. OA also handles special projects and executes CBP's extensive reimbursable interagency agreement program. OA's contracting operations support all of CBP to effectively deliver mission capability through the acquisition of critical products and services.

OA oversees CBP's internal controls over financial reporting as required by OMB Circular A-123, the Federal Managers Financial Integrity Act (P.L. 97-255; FMFIA), and Federal Financial Management Improvement Act (P.L. 104-208; FFMIA). This includes conducting internal control reviews, coordinating the development, monitoring and resolution of any corrective action plans or mission action plans resulting from any reviews or audits. Results of the internal control reviews as well as the Financial Statement Audit findings recommendations and remediation leads to increased efficiency within CBP.

OA is responsible for the coordination and oversight of the annual audit of CBP's financial statements and the annual consolidated audit of DHS' financial statements and internal controls. The Chief Financial Officers Act (P.L. 101-576) and the DHS Financial Accountability Act (P.L. 108-330) require that DHS undergo an annual financial statement audit and audit of internal controls. OA serves as the liaison with the DHS Office of Inspector General (OIG)'s contracted Independent Public Accountant firms and DHS for coordination and facilitation of this audit activity. OA also liaisons with the Government Accountability Office (GAO) and the OIG to facilitate the conduct of program

audits performed by these audit entities on all CBP programs. OA establishes processes that ensure policy and strategy align with Department and Agency guidance and the Future Years Homeland Security Program (FYHSP) and that programs are effective at meeting stated goals and objectives.

OA provides personal property management, fleet management, seized and forfeiture property management and oversees uniforms through Line of Business 6, Mission Support and Asset Management subprogram.

#### Asset Management

OA provides program management oversight for CBP personal property (approximately 400,000 assets in FY 2011) through its sustainable lifecycle, to include accurate accounting of property, efficient utilization of property resources, identification of efficiencies/effectiveness in property management, and integration of property records with financial accounting and reporting. Expected outcomes are to manage and maintain CBP's Personal Property Program to increase efficiency and effectiveness; leverage acquisition strategies; and minimize loss of all accountable, high-risk and sensitive, capitalized, and leased property to meet critical mission requirements in accordance with OMB, GSA, DHS, and CBP laws and regulations.

OA's Fleet Management facilitates the acquisition, up-fit, and disposal of vehicles necessary to maintain an operationally ready fleet (27,013 vehicles in FY 2011). OA provides vehicles to support interdiction, enforcement, intelligence gathering, pursuit, surveillance, seizure, trade and travel facilitation at and between the ports of entry and first responder activities required by officers and agents nationwide. The outcomes are best represented by the ability of CBP to maintain the current levels of operational readiness, in part, by holding the average age of the fleet steady at three to four years old and stabilizing the replacements made.

OA oversees the uniforms supply chain for CBP officers and agents. Integral to the DHS mission is the support provided by the uniformed personnel throughout DHS that guard and protect the Nation daily.

#### **Offices of Internal Affairs (IA)**

The Office of Internal Affairs supports Line of Business Intelligence and Targeting (4) and Enterprise and Business Services (5).

The Office of Internal Affairs exercises oversight authority for all aspects of CBP security including operational, personnel, facilities, as well as the CBP counterintelligence (CI) program (to include cyber protection). IA's mission is to promote the integrity and security of the CBP workforce. IA performs and manages a wide variety of functions or programs comprising seven divisions: Personnel Security, Investigative Operations, Integrity Programs, Credibility Assessment, Operational Field Testing, Security Management, and Management Inspections.

IA conducts investigations of alleged criminal and serious non-criminal misconduct on the part of CBP employees. The office coordinates its internal investigative activity with the DHS OIG, U.S. Immigration and Customs Enforcement's (ICE) Office of Professional Responsibility, the Federal Bureau of Investigations (FBI) and numerous other Federal, state and local law enforcement authorities.

CBP has implemented a Comprehensive Integrity Strategy, which integrates prevention, detection, and investigation capabilities to deter and respond to corruption and serious misconduct in the CBP workforce. The Comprehensive Integrity Strategy employs improved personnel security screening of prospective CBP employees, as well as polygraph examinations of law enforcement candidates, application of behavioral and analytical research tools to identify integrity indicators of corruption, and an intelligence-driven investigative response to integrity events. Each investigation (either initial or periodic re-investigation) costs approximately \$3,200 and each polygraph administered costs approximately \$800. The Integrity Program Division conducts research (data) and analysis (behavior) designed to detect corruption, develops data/intelligence to drive the focus of integrity investigations, and applies “Insider Threat” methodologies for advanced detection of possible integrity threats.

### **Office of Information and Technology (OIT)**

The Office of Information and Technology supports the following LOBs: Securing America’s Borders (1); Securing and Facilitating Flows of Cargo (2); Securing and Facilitating Flows of People (3); Intelligence and Targeting (4); Enterprise and Business Services (Management and Administration (5); and Mission Support (6).

The OIT supports Securing America’s Borders LOB activities along the border with Mexico by providing land mobile radio support via the National Law Enforcement Communications Center (NLECC) to CBP’s uniformed personnel. This center monitors agent and officer radio traffic for CBP and some OGAs with whom we have a reimbursable relationship. Over the air monitoring enables staff at the NLECC to perform suspect queries, to request the support of state/local support to federal officials; and to provide over the air rekeying of radios throughout the United States.

In addition, OIT’s Border Enforcement and Management System’s Program Office (BEMS) develops government software application systems to respond to the requirements of CBP’s Office of Border Patrol (OBP). Specifically, BEMS has developed the Enforcement Application for CBP (e3) which consists of five modules: processing, biometrics, assault, prosecution, and Operation Against Smugglers Initiative on Safety and Security (OASISS). Collectively, these systems provide the processing application by which Border Patrol agents (BPAs) process all apprehensions, including all biographical information for each subject apprehended.

The OIT supports Securing and Facilitating Flows of Cargo LOB by facilitating legal trade by contributing through the development, operations and maintenance of CBP’s mission critical trade systems, such as the Automated Commercial Environment/International Trade Data System (ACE/ITDS), the Automated Commercial System (ACS), and the Automated Export System (AES) provide vetting and targeting data to front line CBP officers. This data enables CBP officers an automated way to identify and target cargo for more thorough investigation. ACE, along with ATS, forms the backbone of CBP’s 21st Century trade processing and risk assessment capability. CBP’s trade systems were responsible for collecting \$32 billion in duties and fees in 2010. The OIT’s Cargo Systems Program Office (CSPO) provides the ongoing maintenance and operation of these trade applications that interface and support CBP, other government agencies, and the trade community regarding the importation, exportation and control of merchandise shipments.

The OIT’s Passenger Systems Program Office (PSPO) supports Securing and Facilitating Flows of People LOB by the development, deployment, operations and maintenance of numerous systems that

support CBP's advanced passenger screening, consolidated trusted traveler, and in-bound passenger screening. The PSPO staff maintains and develops Government passenger software applications to provide critical information to the front-line to screen and vet passengers before and/or upon arriving at our nation's borders. Through the use of CBP's passenger processing systems, CBP officers were able to vet and screen 352 million pedestrians and passengers and over 90 million aircraft passengers at our nation's ports in FY2011. PSPO supports the processing of travelers and vehicles at all POEs and supports the vetting process for external agencies, such as, Citizenship and Immigration Services (CIS), and ICE. In coordination with multiple law enforcement agencies PSPO maintains, updates, and disseminates processed advance traveler information and lookout data in real time. PSPO also provides entry exit data for US-VISIT and to intelligence agencies. PSPO supports connectivity services to the FBI's National Crime Information Center (NCIC) and state data via Nlets via TECS. PSPO is also responsible for enrolling and processing applicants in the trusted traveler programs (Global Entry, NEXUS, SENTRI and FAST). OIT and PSPO supports the Transportation Security Administration (TSA) by providing one central communication hub for carriers to use called "DHS Router". DHS Router routes the data to TSA and CBP as appropriate.

The OIT supports Intelligence and Targeting LOB capabilities through robust, rules based targeting systems in the passenger and cargo environments (land, narcotics, passenger, outbound environments, as well as for cross domain among various security levels). ATS provides direct support to OIIL and the NTC. ATS augments CBP officers' determination regarding whether a passenger, crew member, and/or in-bound cargo should receive additional screening because the traveler or cargo may pose a greater risk. ATS-Land (ATS-L) allows for the immediate analysis and risk assessment of private vehicles crossing the U.S. land borders. Within seconds, after reading and processing license plate information against various existing data, the system provides CBP officers at primary booths a risk assessment for the vehicle and passengers in the vehicle. Similarly, ATS-Inbound provides CBPOs with a more efficient and consistent method for targeting high risk inbound cargo for examination. ATS-Passenger (ATS-P) is an internet-based enforcement and decision support tool used for collecting, analyzing, and disseminating information. ATS-P is used at all US airports and seaports where international flights and voyages make ports of call and provides a risk assessment of those passengers and crew members prior to their arrival or departure. It also augments CBPOs' decision making process about whether a passenger or crewmember should receive additional screening because they pose a greater risk.

The OIT supports Enterprise Business Services LOB by providing integrated, comprehensive technical support to carry out the mission of CBP, as well as DHS. OIT is responsible for developing, acquiring, testing, and maintaining legacy and new government and commercial off-the-shelf applications, and for ensuring the reliable performance of CBP's data infrastructure which transmits critical data to and from CBP and DHS data centers which contribute to the multi-layered defense to protect our nation's borders.

These systems all depend on the availability and reliability of the IT infrastructure which OIT must operate and support. The IT infrastructure is the data network that supports among other things the data storage, retrieval, transmission, and delivery of all vetting/screening data from CBP and/or DHS data centers to CBP's front line officers and agents in order to make an admissibility decision on cargo and passengers entering at our Nation's borders. In addition, the IT infrastructure supports the day-to-day requirements of CBP's mission support personnel. The IT infrastructure provides the connectivity

and data transmission from users within CBP, OGAs, and CBP's trade and travel partners, to CBP data that is obtained and analyzed via CBP's software applications. CBP's IT infrastructure connects users to a vast array of data related to operational areas of passenger and cargo processing, targeting, and border enforcement, as well as mission support areas of finance, human resource, and training. The infrastructure is a complex network of field equipment hardware, software, data routers and switches that exist in each of CBP's 650 field locations, along with the data storage, retrieval, engineering, network monitoring, and other IT capabilities at the CBP and DHS data centers.

The IT infrastructure enables users of CBP applications to connect to CBP's mission critical applications at either the CBP and/or DHS data centers, to access data required nearly every minute of every day to conduct the CBP mission of protecting America's homeland. Further, the infrastructure requirements continue to grow in response to increased DHS and federal requirements; daily changes in the risks and threats posed to our nation's borders; and in the growth of international trade and immigration.

The OIT supports Mission Support LOB through their laboratory and science services activities. The Laboratories and Scientific Services (LSS) is the Forensic/Scientific arm of CBP providing forensic and scientific testing in the area of Trade Enforcement, Weapons of Mass Destruction (WMD), Intellectual Property Rights (IPR), and Narcotics Enforcement. The LSS consist of seven regional laboratories located throughout the United States, along with one national research laboratory. Furthermore, LSS operates several mobile laboratories that are used at our nation's borders for random trade blitzes, and/or for on-site emergency response and programmatic on-site border security operations. A specially trained laboratory forensic "jump" team provides crime scene investigation, documentation, and testing for cases involving possible terrorist activity. This team can be activated at a moment's notice.

#### Descriptions of Selected Adjustments to Base

##### Transfer to realign OTIA funding

In response to direction in the FY 2012 Consolidated Appropriations Act (P.L. 112-74) Conference Report, starting in FY 2013 all OTIA Government FTE and associated expenses were moved from the BSFIT Program Management (PM) PPA into HQ M&A Between the Ports of Entry PPA within the Salaries and Expenses appropriation. This funding restructuring complies with Congressional guidance and provides a clearer, consolidated view of Government FTE throughout CBP. This will also allow OTIA the authority to use its organizational resources across CBP (i.e. non-BSFIT programs) to fulfill its role as CBP Component Acquisition Executive (CAE.)

**Rent**  
**Program Performance Justification**  
(Dollars in Thousands)

**PPA: Rent**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	-	-	<b>455,813</b>
<b>2012 Enacted Budget Authority</b>	-	-	<b>483,749</b>
2013 Adjustments-to-Base	-	-	131,122
<b>2013 Current Services</b>	-	-	<b>614,871</b>
<b>2013 Total Requested Budget Authority</b>	-	-	<b>614,871</b>
Total Change 2012 to 2013	-	-	131,122

CBP requests \$614.871 million to fund organization-wide Rent costs. The request includes:

- An increase of \$1.590 million for annualization of FY 2012 Field Operations positions to staff new ports of entry and to enhance operations
- An increase of \$335,000 for annualization of the FY 2012 National Targeting Center enhancement
- An increase of \$97.841 million for a technical adjustment to rent. This adjustment represents the increase cost to CBP for rent and related building charges in FY 2013 for the GSA and direct leased facilities of the Office of Border Patrol (OBP), Office of Field Operations (OFO), Office of Air and Marine (OAM), and Mission Support offices. The increase is due to increases in the space inventory from new facilities (replacing of existing facilities, other space additions), and increased cost due to rent escalation clauses. It includes increases from rent-related building charges including utilities and services such as those provided by Federal Protective Service.
- An increase of \$31.356 million for consolidation of rent into the Rent PPA

**CURRENT SERVICES PROGRAM DESCRIPTION:**

CBP requests \$614.871 million in FY 2013 for the Rent PPA, which supports the Real Property Management subprogram within the Mission Support Line of Business. The Real Property Management subprogram encompasses the entire CBP facilities portfolio of owned and leased real property throughout all stages of the portfolio lifecycle, including rent and rent-related payments. CBP leases a substantial portion of its real property assets through the General Services Administration (GSA) and by direct lease delegation to non-federal sources. Specifically, CBP pays rent to GSA for various facilities including 125 land ports of entry, 49 Border Patrol Stations, 47 OFO Field and Port

Offices, 10 Border Patrol Sector Headquarters, and other Mission Support facilities such as administrative office space and laboratory facilities. This PPA includes funds to support the rental of facilities, space, buildings, structures, and land along with rent-related building charges and services, including utilities and services provided by the Federal Protective Service (FPS). The Rent PPA supports OBP, OFO, OAM, and the Mission Support activities.

*Note: Goals and accomplishments associated with the Rent PPA are included within the Congressional Justification for the Construction and Facilities Management account.*

The President's Budget requests 21,944 positions, 21,966 FTE and \$2,480.674 million for Inspections, Trade, and Travel Facilitation at the Ports of Entry. The request includes:

- A decrease of -\$987,000 for a DHS Management efficiency regarding Strategic Sourcing Initiatives
- A decrease of -\$6.0 million for the suspension of Western Hemisphere Travel Initiative /Land Border Initiative Procurement
- An increase of \$4.509 million for annualization of the FY10 Border Security Supplemental
- An increase of \$8.632 million for the FY 2013 Pay Increase
- A decrease of -\$723,000 for consolidation of rent into the Rent PPA
- A decrease of -\$987,000 for a DHS Management Efficiency
- A decrease of -\$1.917 million for a DHS Management efficiency regarding PCS Costs
- A decrease of -\$6.442 million for a DHS Management Efficiency regarding TDY and Travel
- A decrease of -\$1.386 million for a reduction associated with closing 2 National Targeting & Analysis Groups
- An increase of \$10.0 million for an enhancement to Intellectual Property Rights enforcement
- A decrease of -\$961,000 for annualization of the FY 2012 Immigration Advisory Program enhancement.
- An increase of \$5.747 million for annualization of the FY 2011 CBPO Staffing enhancement
- An increase of \$7.952 million for annualization of the FY 2010 Import Safety Initiative.

- A decrease of -\$4.618 million for a DHS Management efficiency regarding OFPP-Directed Purchasing Savings
- An increase of \$4.906 million for annualization of FY 2009 War Supp. Combating Southbound
- A decrease of -\$3.463 million for a reduction associated with closing IAP sites in Incheon and Warsaw
- An increase of \$3.0 million for an enhancement for Centers of Excellence and Expertise
- A decrease of -\$2.36 million for a reduction to Office of Trade’s National Account Manager, Rulings, & Revenue Policy Staff
- A decrease of -\$21.106 million for a reduction to Office of Field Operations overtime
- A decrease of -\$6.687 million for a reduction to management and administration staffing & services
- A decrease of -\$4.746 million for a reduction to field support staff
- An increase of \$14.076 million for annualization of FY 2012 Field Operations positions to staff new ports of entry and to enhance operations

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The PPA Inspections, Trade and Travel Facilitation at the Ports of Entry (POEs) primarily supports four Lines of Business (LOBs): Securing America’s Borders (1); Securing and Facilitating Flows of Cargo (2); Securing and Facilitating Flows of People (3); Intelligence and Targeting (4).

In addition, this PPA also supports Enterprise Business Services (Management and Administration) (5) which includes activities such as Human Resource Management Activities, Security Clearance Processing, Workforce Development, Legal Services, Public Affairs; and Mission Support (6) which includes activities such as Asset Management, Support Personnel, Agency Training Partner Programs.

Inspections and Trade Facilitation	FY 2013 Current Svc. (000)
CBPO, Ag. Specialist, Salary & Benefits	\$1,629,451
Other Salary & Benefits	615,034
Non-personnel Costs	268,936
Total	\$2,513,422

**Securing America’s Borders (LOB 1)**

The FY 2013 request for this PPA includes base resources that support contraband seizures and detention and removal activities at the ports of entry in three geographical regions corresponding to the subprograms within LOB 1: Northern Border; Southwest Border; and Coastal Regions. CBP’s primary responsibility is to identify potential terrorists and instruments of terror and to perform layered enforcement activities relative to counter-terrorism. These enforcement activities prevent the entry and exit of: terrorists and instruments of terror; harmful pests and diseases; illegal drugs and contraband; illegal aliens; and importations/exportations contrary to law and trade agreements. CBP personnel enforce the laws and regulations of a broad range of Federal, state, and local agencies, relating to the admissibility of people, cargo, and conveyances.

CBP officers (CBPOs) and Agriculture Specialists (CBPAS) conducting contraband seizures and detention and removal activities at the Northern Border, Southwest Border and Coastal POEs are multi-disciplined and perform the full range of inspection, intelligence analysis, examination, and law enforcement activities relating to the arrival and departure of persons, conveyances, and merchandise at POEs.

Detention and removal activities are primarily the function of CBP Enforcement officers [CBPO(E)]. CBPO(E)s are trained and expected to execute a different, more complex role than the typical CBP officer. The principal responsibility of CBPO(E)s is to investigate individuals suspected of or convicted of violations of criminal and civil laws, regulations, trade agreements and treaties enforced by CBP. CBPO(E)s are responsible for the apprehension, detention, and investigation of suspected and convicted criminals for the purpose of prosecution. Additionally, they play an essential role in enforcing CBP's anti-terrorism mission by participating in the Counter Terrorism Response Team, Anti-Terrorism Contraband Enforcement Team, and various special teams with local components from the Office of Border Patrol, ICE, and other federal and local agencies. The CBPO(E) is also primarily responsible for the supervision and transport of suspects in custody at the POEs.

## **Securing and Facilitating Flows of Cargo (LOB 2)**

The FY 2013 request includes funding for the following subprograms within LOB 2: (1) Facilitate Trade and Ensure Compliance; (2) Enforce Trade Law and Collect Revenue; (3) Advance National and Economic Security; (4) Modernize, Cargo and Conveyance Entry; and (5) Cargo and Conveyance Exit.

### **1. Facilitate Trade and Ensure Compliance**

#### **Trade Operations Division (TOD)**

The international trade process involves a complex web of stakeholders working together to develop trade policy, set priorities, operate daily import and export procedures at home and abroad, address security and safety concerns, and deliver and use imported goods.

CBP controls trade through the POEs as goods arrive at the border. Experienced CBP officers, Import Specialists, Agriculture Specialists, and Entry Specialists use their expertise and experience to target, examine cargo, review entry documentation, collect duties, and interact with the importing community to enforce and ensure compliance with U.S. trade laws.

CBP's TO D is responsible for supporting CBP's trade discipline role in security and enforcement matters and managing the operational implementation of trade policy at the POEs. TOD coordinates, implements, and monitors trade enforcement initiatives in the field and establishes mechanisms to conduct oversight of trade programs. TOD promotes uniformity through common measures and best practices and by developing methodologies to identify operational deficiencies and a conduit for resolution. TOD also supports the U.S. and Mexico Bilateral Strategic Plan by participating in the Bilateral Trade-Fraud Subgroup and providing input to the Intellectual Property Enforcement Coordinator within the Executive Office of the President.

### **Trade Cargo Activities (Commercial Targeting Enforcement & Trade Policy & Program)**

To ensure the swift flow of legitimate cargo, CBP must maximize its use of resources by continued national targeting, ruling out low risk shipments, recognizing trusted partners, such as Customs-Trade Partnership Against Terrorism (C-TPAT) and Importer Self Assessment (ISA) partners and concentrating on high-risk shipments that may contain IPR violations, agricultural threats and/or import safety concerns. CBP assists in the facilitation of legitimate cargo and the interception of violations by improving its national targeting efforts to also focus on the identification of goods that violate textile, anti-dumping, and trade agreement laws and regulations. CBP will also continue to coordinate national operations concentrating on multiple source countries, commodities, threats; while continuing to build on its partnerships with other agencies on the further advancement of national operations, developing and leveraging the partnerships CBP has established with their trusted partners and further explore the possibilities of increasing pre-entry and post entry verification programs. These activities include the C-TPAT, the Secure Freight Initiative (SFI), and the Container Security Initiative (CSI). This subprogram also supports activities related to ACE/ ITDS.

### **Intellectual Property Rights (IPR)**

In Fiscal Year (FY) 2011, CBP moved aggressively to implement its 5-Year IPR Strategy, which was submitted to Congress in July 2010. The Strategy is built on three pillars - Facilitate, Enforce, Deter – that are supported by modernized laws, technology and processes; partnerships with the private sector, other agencies, and foreign governments; and investment in human capital, outreach and technology. CBP's strategy is to work throughout the international trade process – pre-entry, at entry, and post-entry - to achieve its vision for an effective IPR enforcement process in which legitimate cargo is released without delay, infringing goods are intercepted, and violators are deterred.

In the current IPR enforcement process, the lack of information on legitimate supply/distribution chains available to CBP causes many shipments of authentic goods to be detained at the border for inspection. This inefficiency in targeting and selection of shipments for inspection increases costs to U.S. industry, forces CBP to expend resources inspecting shipments that do not contain counterfeit merchandise, and results in fewer inspections of shipments containing counterfeit goods.

Thus, CBP's Office of International Trade would like to pilot supply/distribution chain management as a partnership program to enhance IPR enforcement. The pilot supply distribution chain management will provide CBP access to information that will expedite the release into commerce of authentic shipments and enhance targeting and inspection of suspect shipments. The request includes \$5 million to support the Distribution Chain Management program which will establish a partnership between CBP, IPR holders, and importers. When a right holder authorizes the production of merchandise, each individual product will contain a unique identifier, something akin to an alpha-numeric code. These identifiers will be aggregated into umbrella codes so that a single unique identifier will accompany an entire shipment.

When a shipment of authorized goods is imported into the U.S., the importer will provide the shipment's unique identifier to CBP. The agency will use the unique identifier to authenticate the entire shipment of goods. The information about each product and shipment will be collected in a database, and CBP will be able to access that information using automated systems to ensure that the products in the shipment have followed a legitimate supply chain. This will remove the need to physically examine the shipment thus moving the shipment into the trusted segment of imports. By

reducing inspections of legitimate shipments, CBP will be able to focus its resources on shipments that have a high or unknown risk of containing counterfeit goods. In addition, because CBP will have access to legitimate supply chain information, CBP will be able to hone its targeting efforts to look for shipments that do not follow legitimate supply chain patterns. CBP will benefit from more efficient use of its targeting and inspection resources. U.S. importers will benefit from increased predictability in their supply chains and reduced costs because they will not have to bear the delays and costs caused by physical inspections. Right holders will benefit because CBP's increased efficiency will lead to more seizures of counterfeit goods.

## **2. Enforce Trade Law and Collect Revenue**

### **Trade Agreements**

CBP established Trade Agreements (TA) as a Priority Trade Issue (PTI) in 2011 with a goal of effectively implementing, administering and enforcing U.S. trade agreements. As these agreements and programs feature complicated rules of origin requirements, effective communication of these requirements within CBP, with OGAs, and to the trade community is essential to fulfill CBP's trade mission of protecting revenue, enforcing trade laws and protecting national and economic security. CBP's Office of International Trade leads CBP efforts in the creation of initiatives through the TA PTI, such as the development of databases to assist with targeting efforts, special operations on selected importers/industries, and increasing port uniformity in enforcement actions on non-compliant importers.

Knowing how to apply the requirements in a uniform and accurate manner is critical to successful enforcement of these conditionally duty-free or reduced duty programs. Without accurate and timely information and training, both CBP field resources and the trade community will have a more difficult time in ensuring compliant trade preference program claims. To be able to provide the information, training, and targeting needed to support this PTI, enforce our trade agreements, and ensure that the duty benefits accrue only to those importers in compliance with the terms of the trade agreements, CBP will need to ensure that current staff has the latest training.

Free Trade Agreements (FTAs) and preferential trade legislation claims for goods other than textile and apparel products accounted for over \$637 million and approximately 30 percent of all importations by value in fiscal year 2011. The United States currently has FTAs with 17 countries (Australia, Bahrain, Canada, Chile, Costa Rica, Dominican Republic, El Salvador, Guatemala, Honduras, Israel, Jordan, Mexico, Morocco, Nicaragua, Oman, Peru, and Singapore). Three FTAs (Colombia, Panama and South Korea) have been approved by Congress and will be in force once the President determines that the countries have fulfilled all necessary requirements. The United States is also currently negotiating the Trans-Pacific Partnership with Australia, Brunei Darussalam, Chile, Malaysia, New Zealand, Peru, Singapore, and Vietnam. As new FTAs are negotiated and finalized, it is paramount to address their complexities in order to minimize any potential loss of revenue.

### **Textiles and Apparel**

Proper personnel, training, and targeting need to be in place to ensure that CBP collects proper revenue against \$115 billion in entered value for textiles. Forty-three percent of the entire duty amount collected by CBP comes from textiles. In part, compliance with FTAs is essential to make certain the

correct revenue is collected in the textile area. This requires Headquarters oversight, personnel in the field, and training.

### **Fines, Penalties, and Forfeitures (FP&F)**

CBP's FP&F Division is responsible for the oversight, policy initiation, and staffing of all 41 FP&Fs offices across the U.S. These 41 offices use enhanced enforcement mechanisms to deliver immediate impact to non-compliant importers and to maximize deterrent effects. There are over 450 FP&F staff who support headquarters and field operations to execute the administrative legal processing of all enforcement actions performed by CBP officers, import specialists, entry specialists and ICE special agents. The FP&F Division is responsible for all aspects of the seized property process to ensure proper management control and accountability of all property that is seized at the POEs. The FP&F Division also adjudicates carrier fines assessed under the Immigration and Nationality Act (P.L. 82-414, as amended; INA), all liquidated damages, penalty, and seizure cases initiated under the Tariff Act (P.L.71-361), customs violations, and certain agriculture penalties. This adjudication includes oversight of both administrative and judicial actions related to violations of law referred to headquarters for initiation, as well as, providing guidance to the field on carrier fines issues.

### **Freedom of Information Act (FOIA)**

The CBP Centralized FOIA Division is responsible for receiving, tracking, conducting records searches, and responding to all incoming CBP FOIA requests (for Headquarters and the field locations). When initially established in October 2008, the Division was staffed with eight employees who were provided by different components of CBP. At that time, the number of FOIA requests received per fiscal year was approximately 8,000. In FY 2011, staffing has increased to 14 employees and the volume of FOIA requests received skyrocketed to over 25,000. CBP is working to move away from the current paper-based receipt/tracking/processing system to a more automated FOIA processing system. Currently, different components within DHS use different systems to receive/track/respond to FOIA requests. Some systems are developed internally and others are based on commercially available off the shelf software. The FOIA division is committed to standardizing the CBP FOIA process and activities.

### **Regulations and Rulings (RR)**

CBP delivers binding rulings in advance of importation in response to written requests from importers and other interested parties for rulings or information with respect to a specifically described transaction, a definitive interpretation of applicable law, or other appropriate information. These rulings and decisions are a benefit to trade facilitation as they allow importers to plan their transactions. Most rulings and decisions are published in the Customs Ruling Online Search System and represent an enormously useful research tool for the importing community. CBP also issues final administrative decisions in seizures and penalties cases involving civil violations of customs and navigation laws, and other laws enforced and administered by CBP. Civil enforcement is a benefit to CBP and the trade community as it improves compliance with trade laws, increases revenue, and improves the competitive standing of importers who act legally. Below is a list of other functional areas related to the RR mission:

FOIA Appeals Processing – CBP is responsible for issuing appellate decisions on access to information under the FOIA; litigation support in cases involving those decisions; and training CBP personnel on FOIA responsibilities. The FOIA Appeals, Policy & Litigation Branch

(FAB) is responsible for issuing determinations on appeals filed by requesters who are dissatisfied with the decision they received in response to their initial FOIA request. FAB reviews initial decisions made by FOIA Division and the field and is the only office at CBP that adjudicates FOIA appeals. FOIA appeals have grown substantially in recent years, tripling since FY 2009. FAB also provides litigation support to the Office of Chief Counsel and the Department of Justice (DOJ) in FOIA matters that are litigated. Additionally, FAB provides training to CBP personnel on FOIA compliance and responsibilities.

Privacy Act Adherence - ensures CBP's compliance with the Privacy Act (P.L. 93-579) by assisting operational offices (e.g., OFO, OBP, OIT) in drafting and reviewing System of Record Notices (SORNs) and in preparing Privacy Act Assessments where required by law.

Training and Advisory Services for Other CBP Offices and Other Agencies – National Commodity Specialists Division in coordination with the Office of Field Operations provides between 4 – 6 commodity seminars each year for import specialists on various commodities. In addition, CBP attorneys also provide training in areas such as Penalties, IPR, country of origin, marking, FOIA, value and classification of textiles.

Informed Compliance Publications/Public Outreach – In order to provide information to the public, CBP issues and maintains a series of informed compliance publications (ICP) on new or revised requirements, regulations or procedures, and a variety of classification and valuation issues. CBP also provides public outreach sessions or training on all technical trade and legal areas as part of annual events or upon request.

Civil Enforcement – CBP issued final administrative decisions in seizures and penalties cases involving civil violations of customs and navigation laws, and other laws enforced and administered by CBP.

Regulations – Regulatory documents (regulations and Federal Register Notices) for CBP, whether they concern trade and commercial issues or border security issues, are drafted to ensure that they comply with all legal and administrative requirements, including any required economic analysis, paperwork management collection, as well as, all Federal Register technical drafting requirements.

### **Regulatory Audit (RA)**

CBP performs external audits to: protect Government revenues, ensure compliance with CBP and related trade laws and regulations; facilitate legitimate trade; and protect the security and safety of American citizens from harmful goods. The CBP national audit plan universe consists of approximately 13,000 companies that import merchandise with a total import value of \$10 million or more in a Government fiscal year. The 13,000 companies represent 90% of total annual value of merchandise imported into the United States. In addition to the performance of audits, RA staff members perform consultant type work (Non-Audit Services) for DHS, CBP, and OGAs. The non-audit services provide valuable input and assistance in areas such as investigations of fraud, C-TPAT, supply chain security and import safety.

### **3. Advance National and Economic Security**

#### **Agriculture Programs and Trade Liaison (APTL)**

APTL provides leadership, expertise, and innovation to defend the U.S. from the threats of agricultural and biological terrorism (or Ag/bio-terrorism). APTL is also responsible for meeting the traditional goals of safeguarding and protecting American agriculture from the risks associated with the entry, establishment, or spread of plant pests and pathogens, noxious weeds, and foreign animal diseases.

The specific activities conducted by CBP's Agriculture Programs and Trade Liaison fall into four general areas:

1. The Agro/Bio-Terror Countermeasures Program prevents ag/bioterrorists, their equipment, and weapons from entering the U.S. In partnership with scientific, regulatory, intelligence, and law enforcement agencies, the program assesses risks and obtains information to guide the development and implementation of specific targeting and inspection systems to protect people, agriculture, food, and the economy from ag/bio-terror attacks.
2. The Agriculture Operational Oversight office is responsible for improving oversight of the agricultural mission across all CBP field offices by ensuring a more consistent application of agriculture inspection policy at all POEs. The office is the primary point of contact for all stakeholder-related issues and the implementation of the Joint Agency Task Force Implementation Action Plans, including coordination with the Animal and Plant Health Inspection Service (APHIS), Department of Agriculture, DHS, and our agriculture industry stakeholders.
3. The Agricultural Policy office provides policy, planning, and guidance for CBP agriculture inspection programs in order to prevent the intentional and unintentional introduction of plant and animal pests and diseases.
4. The Agricultural Safeguarding office is responsible for the development, clarification, and interpretation of agricultural oversight policy and procedures. In addition, this office is responsible for the application strategies for maritime cargo, air cargo, land border cargo, passenger processing (air, maritime, land border), and trade facilitation and related operations.

#### **Anti-Dumping/Countervailing Duty (AD/CVD)**

CBP's role in AD/CVD enforcement and collecting AD/CVD duties is an integral part of CBP's mission to protect national economic security. CBP is continuing to develop and implement solutions to enhance AD/CVD enforcement, and needs personnel to continue to manage the process to develop these solutions and nationally disseminate them throughout CBP's ports of entries. AD/CVD training is crucial to ensure that new and veteran CBP staff has up-to-date information and skills to successfully carry out CBP's crucial AD/CVD responsibilities. Personnel and technology resources are key to supporting CBP's targeting efforts against criminal networks which seek to evade AD/CVD duties. CBP is broadening its outreach with industry and government partners, both domestically and internationally, to strengthen partnerships against AD/CVD evasion and transshipment, promote compliance with AD/CVD laws and share best AD/CVD practices.

## **4. Modernize**

### **Policy Training and Field Guidance**

CBP's Policy Training and Field Guidance program includes the planning of CBP's Trade Compliance and Enforcement Strategy under TOD and all activities associated with broker examinations, license application, fingerprinting, and broker permits (local and national).

The Outreach Events and Informed Compliance program includes Customs-related CBPO Canine, Agriculture-related informed compliance and outreach, and all activities performed by the Passenger Service Representative (PSR). The purpose of CBP's PSR program is to provide the highest quality customer service possible at the POEs. The PSR offers a personalized approach to passenger processing. PSRs ensure passengers are aware of entry requirements to expedite processing and conduct one-on-one passenger problem resolution.

### **Commercial Targeting and Enforcement (CTE)**

This program focuses on creating the organizational capacity to coordinate and manage modernization of CBP trade processes and technologies and enhance service delivery.

CBP continues to support the majority of the measures on CBP TradePulse. CBP TradePulse is an online statistics reporting portal which allows users access to CBP trade statistical data. CBP also provides detailed analysis for the formulation of the Mid-Year and Year-End Trade Trends Reports, as well as, various ad hoc requests received by other Office of International Trade divisions and CBP components. Offices within CBP are responsible for providing trade related information and analysis to the Office of International Trade in support of the many programs administered by the office. CBP offices also provides analytical support, data collection/correlation, analysis, risk management techniques, model development and reporting systems to the National Targeting and Analysis Groups located in the field.

With the creation of the Office of International Trade, there was a need to provide CBP a bridge between the legacy reporting systems and the ACE system. CBP currently bridges the gap between the current systems, such as ACS and the future systems developed and deployed by ACE, by managing information that is correlated and reported from many divergent systems. The requirement to deliver timely and accurate trade related information until the full deployment and benefits of the ACE development can be fully realized is integral to the CTE program. All of the systems currently managed by CBP will eventually become a part of ACE system and are developed in conjunction with OIT standards.

## **5. Cargo and Conveyance Entry**

The Cargo and Conveyance Entry subprogram includes base activities related to Non-Intrusive Inspection (NII) conveyance searches and Anti-Terrorism Contraband Enforcement (A-TCET) teams.

### **Anti-Terrorism Contraband Enforcement Teams**

The Office of Cargo Conveyance and Security/NII Division of the Office of Field Operations estimates that in FY 2013 there will be over 5,000 CBP officer assigned to the Anti-Terrorism Contraband

Enforcement Teams. CBP established these teams in 2003, uniting the former Contraband Enforcement Teams, Manifest Review Units, NII, Canine, and Outbound teams to form a single A-TCET. The A-TCET also works closely with the Passenger Enforcement Rover Team and Passenger Analysis Unit (PAU) teams to coordinate all enforcement activities. Although the primary mission of A-TCET teams is anti-terrorism, their activities encompass all types of contraband, including items such as narcotics, currency, weapons, and counterfeit goods.

**Non-Intrusive Inspection Conveyance Inspections**

Since examinations with NII equipment are much faster than manual inspections, NII conveyance searches (which include large-scale x-ray and gamma ray imaging systems, radiation detection equipment, small-scale baggage x-ray systems and portable and hand-held devices) are important tools that help CBP officers fulfill their mission. Without NII equipment CBP front line personnel would be dependent on labor intensive and time consuming manual inspections. The NII equipment inventory is funded by the Inspection and Detection Technology PPA. The Inspection, Trade and Travel Facilitation PPA primarily represents salary costs associated with the NII Conveyance Inspections activities at the POEs.

**Canine Enforcement Program (CEP)**

CBP’s CEP plays a crucial role in anti-terrorism and interdiction efforts. Through the CEP, CBP has established and deployed a world-class detector dog program to augment existing technology while establishing cutting edge detection capabilities. This program provides the agency with a higher level of security and detection capability while maintaining a seamless conduit between existing technology and the proven capabilities of detector dogs. The Office of Field Operations canine teams are strategically assigned to POEs around the United States and to pre-clearance stations abroad. CBP officers use specially trained detector dogs in interdiction and to support specialized programs aimed at combating the terrorist threat at the Nation’s borders, international airports, and seaports. In FY 2011, the Office of Field Operations had approximately 667 CBP officers and CBP agricultural specialist dedicated to the Canine Enforcement Program across the nation. The below table provides a breakout of the K-9 enforcement team population by type.

<b>EOY 2011</b>	<b>Narcotic</b>	<b>Human / Narcotic</b>	<b>Currency / Firearms</b>	<b>Agriculture</b>	<b>K9 Trainers</b>	<b>Total</b>
Office of Field Operations Canine Teams	142	325	48	114	38	667

**6. Cargo and Conveyance Exit**

**Outbound Programs Division**

The Outbound Programs Division was created in 2009 to oversee current outbound operations and develop a long-term national outbound strategy for CBP. The division’s mandate is to address escalating violence in Mexico and to increase outbound operations throughout the United States.

The Outbound Programs Division plans to:

- Stem the illegal flow of firearms and currency out of the United States;

- Increase the interdictions of stolen vehicles and fugitives who are attempting to flee the country; and
- Augment compliance of the export laws.

The Outbound Programs Division works to ensure that various layers of security are strengthened. The division's efforts include ensuring that: CBP officers are trained to conduct outbound operations; CBP possesses adequate outbound facilities, equipment, and technology; CBP is working with international and other government law enforcement agencies; and CBP officers have adequate automated targeting assistance to identify violators. The Outbound Programs Division oversees outbound operations at all POEs, including land crossings, airports, international mail and express courier facilities, and seaports.

CBP employs a "pulse and surge" strategy for outbound operations on the Southwest Border. "Pulse and surge" operations are short duration, periodic outbound inspections followed by periods without inspections. This allows for immediate stand-down of outbound inspections to manage traffic flow departing the POE.

CBP will continue to build on the current cooperative efforts with federal, state, local, and tribal law enforcement agencies. In FY 2011, CBP officers along the Southwest Border seized over \$30 million in illicit currency, 242 firearms, over 5,900 firearms parts, and over 151,000 rounds of ammunition destined to Mexico. Although the outbound operations mission is similar overall to the Southwest border mission, these statistics represent outbound operations seizures destined to Mexico via the land ports.

In FY 2011, CBP detailed approximately 165 CBP officers to the Southwest Border POEs to support port operations, to include conducting 24/7 southbound operations and the Alliance to Combat Transnational Threats (ACTT). The intent of these temporary details were to utilize a collaborative enforcement approach that leverages the capabilities and resources of federal, tribal, state, and local law enforcement and public service agencies against individuals and criminal organizations that are involved in cross border activity. Ports providing temporary detail officers to support outbound operations normally supply only one or two officers. The officers detailed to outbound operations are returned to their ports on conclusion of their temporary detail.

Additionally, CBP is also conducting the following outbound activities:

#### Rail Inspections

CBP is conducting 100 percent scanning of outbound rail cars at all eight railroad crossings on the U.S.-Mexico border and has developed notification protocols with Mexican Customs for the inspection of suspect rail cars, since the cars themselves are on Mexican soil immediately after the U.S. NII scan.

#### Currency/Firearm Detection Canine Teams

The Southwest Border has 34 permanently assigned currency/firearm detector dog teams deployed to the POEs. These specially trained detector dogs are integral to CBP's interdiction and specialized detection programs.

### Low Energy Mobile X-ray Units

CBP has deployed low energy mobile NII imaging systems well-suited to scan outbound personally-owned conveyances for contraband. During pulse and surge operations, these systems can be moved from inbound usage to scan for contraband in conveyances leaving the country. There are currently 23 low energy mobile imaging systems deployed to the POEs along the Southwest Border.

### License Plate Readers (LPRs)

The 48 outbound LPRs currently installed at 16 Southwest Border crossing sites remain an invaluable enforcement tool in CBP efforts to increase the seizures of firearms and currency and to interdict stolen vehicles and fugitives. The LPR technology refresh is only one component of the total OFO Outbound Program solution which is comprised of many components.

CBP has conducted site assessments to determine the best technology configurations for all the Southwest Border crossings. There are 58 Southwest Border outbound lanes that are not currently outfitted with outbound LPRs. License plate readers are considered a fundamental law enforcement tool allowing CBP to increase targeting and real time intelligence by linking inbound, outbound and checkpoint vehicle crossings. Additionally, plans are underway to deploy handheld LPR technology to all Southwest Border crossings by the end of calendar year 2011.

## **Securing and Facilitating Flows of People (Line of Business 3)**

The FY 2013 request includes funding for the subprograms within Line of Business 3: Pre-Arrival Processing; Inbound Inspection; and Outbound Inspection.

### **Pre-Arrival Processing**

#### **Electronic System for Travel Authorization (ESTA)**

Pursuant to the Implementing Recommendations of the 9/11 Commission Act of 2007 (P.L. 110-53; 9/11 Act), DHS and CBP are required to provide an automated electronic travel authorization process to screen Visa Waiver Program (VWP) travelers prior to their travel to the United States. To fulfill this requirement, CBP, in coordination with the Department of State (DOS), has developed ESTA, which allows CBP to screen applicants in advance of travel to determine their eligibility to travel to the United States under the VWP. The VWP has expanded to 36 member nations. Beginning in FY 2011, the ESTA program became funded through user fees.

CBP has received approximately 35 million VWP applications, with an ESTA denial rate of approximately 0.34 percent. CBP began enforced compliance of the ESTA program in March 2010, which has resulted in approximately a 99 percent compliance rate for 2011. With the ESTA data and the Advanced Passenger Information provided by the airlines, CBP has been able to automate the collection of form I-94W data, resulting in a significant reduction in the use of the paper form, and the ability to provide available electronic information immediately. The \$14 for each approved ESTA authorization (comprised of \$10 for the Travel Promotion Act (P.L. 111-145) fee for the Corporation for Travel Promotion and \$4 for ESTA processing) went into effect through an interim final rule published in the Federal Register, on Sept. 8, 2010.

## **Immigration Advisory Program (IAP)**

Under IAP, CBP deploys officers overseas (to London-Heathrow, Amsterdam, Tokyo, Frankfurt, Madrid, Manchester, Paris, and London-Gatwick) to support CBP's goal of enhancing the security of air travel by preventing terrorists from boarding commercial aircraft destined for the U.S., and reducing the number of improperly documented passengers traveling from or through a country to the U.S. IAP provides information to host countries, or appropriate authorities, regarding travelers of interest. It focuses on high-risk persons through the use of targeting and passenger analysis information or an assessment of the passenger's travel documentation. The goals of this effort are the interdiction and apprehension of criminals and persons of national security interest by host countries, the disruption of attempts to smuggle aliens, and the disruption of attempts to enter the U.S. with fraudulent documents.

Since the IAP does not have enforcement authority in the host country, the program relies upon cooperation by the host country's immigration and/or control authority and the air carrier to take appropriate actions to prevent persons of interest from boarding flights destined for the U.S.

During FY 2011, IAP officers recommended 2,890 passengers not board flights, including 30 passengers with fraudulent documents; 757 passengers who were confirmed NTC records, including 74 who were matches to Terrorist Screening Database (TSDB) records; and eight passengers who matched TSA No Fly List. CBP estimates that during FY 2011 the activities of IAP have saved CBP approximately \$4.2 million dollars in processing costs and helped carriers avoid approximately \$4.8 million dollars in fines.

CBP built upon the IAP concept by launching the Joint Security Program (JSP) for Travelers in Mexico City, partnering with the Mexican government to identify air passengers linked to terrorism, narcotics, weapons and currency smuggling. Since the inception of JSP in Mexico City on September 27, 2009, JSP officers have assisted their Mexican counterparts in intercepting 217 passengers with fraudulent documents; nine passengers who were known alien smugglers; confirmed 98 NTC targets, including two passengers who matched the No Fly list; intercepted 86 passengers who were wanted fugitives; and four passengers with narcotics.

## **Inbound Inspection**

### **Western Hemisphere Travel Initiative (WHTI)**

WHTI is the joint DOS and DHS initiative implementing a key 9/11 Commission recommendation and the statutory mandates of the Intelligence Reform and Terrorism Prevention Act of 2004 (P.L. 108-458). WHTI has established document requirements for travelers entering the United States who were previously exempt, including citizens of the United States and Canada. The WHTI requirements for air travelers went into effect in January 2007 and compliance continues to be high—well over 99 percent for U.S. and Canadian citizens. WHTI secure document requirements were successfully implemented on June 1, 2009 at all of the Nation's ports.

In FY 2011, the WHTI program contained both investment and operations and maintenance components. CBP funded WHTI operations at all high volume land ports to ensure the ongoing optimal performance of the program. In an effort to achieve a 100 percent query rate against the national security and law enforcement watch for all travelers, the WHTI program has reached a

national query rate of 96 percent (99 percent on the northern border and 93 percent on the southwest border). There has also been a steady growth in the use of Radio Frequency Identification (RFID) enabled travel documents with 31 percent of all law enforcement queries initiated through such documents. At this time, there are more than 10 million RFID-enabled travel documents in the hands of travelers, an increase from 2.5 million in 2009.

In addition, CBP seeks to capitalize on the initial success, foundation and investment of the WHTI program through the use of “Triangle Strategy.” The goals of this strategy are to implement and expand innovative technologies and processes to provide efficiencies at the land border by integrating Inbound, Outbound and Border Patrol Checkpoint processing, and the sharing of information between these areas to improve targeting capabilities. These goals will be attained by adopting an integrated approach that includes:

- Pedestrian Reengineering – application of a hybrid WHTI solution to pedestrian processing;
- Outbound Strategy – development of a technical solution to support pulse and surge operations; and
- Coordination and extension of WHTI technology to Border Patrol checkpoints.

#### **Fraudulent Document Analysis Unit (FDAU)**

The mission of the FDAU is to remove fraudulent travel documents from circulation and to prevent the use of these documents by *mala fide* travelers attempting to enter the United States. The FDAU performs in-depth analyses of documents seized by CBP officers nationwide and analyzes intelligence from fraudulent documents seized overseas to uncover global patterns and trends. This information is shared within CBP and DHS and with other U.S. and foreign government agencies.

There are currently 210 CBP officers designated as Fraud Prevention officers (FPO). FPOs are located at 146 POEs, international mail and cargo facilities, and preclearance locations. In FY 2011, a total of 247 Fraud Prevention Program reports were submitted by FDAU and posted on CBPnet Secure. The FDAU page was created on CBPnet Secure to provide all CBP officers with easy access to information on the FDAU, fraudulent document use and trends, and resources for authenticating documents. FDAU Bulletins, FPO Reports, and other U.S. government and foreign government reports on fraudulent documents are posted to the FDAU’s CBPnet Secure page. This page is utilized by officers, agents, and intelligence personnel throughout CBP.

As the central location for analysis of fraudulent documents seized by CBP, the FDAU provides training and training materials regarding fraudulent use. The FDAU has worked with the CBP Academy and the Advanced Training Center (ATC) to update their document training programs. Exemplars, training, and training material are provided to other CBP and DHS entities such as the Border Patrol, TSA, CIS, and the United States Coast Guard (USCG).

The FDAU also manages the Carrier Liaison Program (CLP). The mission of the CLP is to enhance border security by increasing commercial carrier effectiveness in identifying improperly documented passengers destined to the United States. In FY 2011, the CLP trained 3,449 airline and security personnel in the United States and abroad and provided training to 476 airline and military personnel in Bagdad and Basra, Iraq, as well as building strong partnerships with CBP representatives in China,

India, Egypt, South Africa, Kenya, and Panama on maintaining close communications with the airline industry.

In 2011, the CLP revised the Carrier Information Guide which is designed to serve as a reference aid for the travel industry. The guide outlines the various documentary requirements that apply to passengers entering or departing the United States. The guide includes information on WHTI, ESTA, the Advanced Passenger Information Systems (APIS), the Trusted Traveler Programs (TTP), and it provides information on detecting international human smuggling. The guide is available on line in ten different languages worldwide at [www.cbp.gov](http://www.cbp.gov). CLP also publishes a quarterly Travel Industry Bulletin to assist and facilitate legitimate safe travel.

Additionally, CLP publishes the Vessel Inspection Guide for the maritime industry. The guide includes procedures, regulations and documentation for processing crew and passengers arriving in the United States. The vessel guide is also online at [www.cbp.gov](http://www.cbp.gov).

### **Admissibility Review Office (ARO)**

The ARO provides CBP with a dedicated resource with institutional knowledge and a consistent approach in making determinations of admissibility under the Immigration and Nationality Act. The ARO works extensively with the DOS and other agencies to determine whether inadmissible aliens may be permitted to travel as non-immigrants with waivers which include all temporary and permanent waiver applications. The ARO reviews applications submitted by aliens who have been determined by CBP officers or consular officers to be ineligible for admission to the United States because of one or more grounds of inadmissibility under section 212(a) of the INA. The ARO completed action on 20,112 cases in FY 2011.

### **Outbound Inspection**

CBP created the Outbound Programs Division in March 2009 to address the escalating violence in Mexico and to increase outbound operations throughout the United States. As part of its effort, the Outbound Programs Division has partnered with ICE to support the multi-agency task forces established to identify, disrupt, and dismantle criminal organizations posing a significant threat to border security. CBP personnel are supporting these taskforces (known as Border Enforcement Security Taskforces) at all 11 established Southwest land border sites.

In FY2011, CBP detailed approximately 165 CBP officers to the Southwest Border POEs to support port operations, to include conducting 24/7 southbound operations. The intent of these temporary details is to utilize a collaborative enforcement approach that leverages the capabilities and resources of federal, tribal, state, and local law enforcement and public service agencies against individuals and criminal organizations that are involved in cross border activity.

### **Intelligence and Targeting (LOB 4)**

The FY 2013 request includes funding for the following subprograms within LOB 4: Automated Targeting Tools and Technology, and National Security Targeting.

## **National Security Targeting**

### **Passenger Analysis Unit (PAU)**

The PAUs are responsible for all local coordination and provide support to the NTC-P by serving as the point of contact for the processing of Terrorist Screening Data Base (TSDB) matches, any identified threats to civil aviation and any other national security related issues. Additionally, PAUs conduct local advanced targeting on travelers who may be narcotics or currency smugglers, criminal aliens, immigration violators or any other subject of interest. The PAUs regularly serve as an agency point of contact for local law enforcement and investigative agencies.

### **Advanced Targeting Unit (ATU)**

The primary focus of the ATU is to identify shipments that pose a possible threat to the national security of the United States and determine the CBP operational response to those possible threats. The primary and imminent threat relates to terrorists and instruments of terrorism. Other threats include smuggling of narcotics and other contraband, alien smuggling, fraudulent documents, agricultural threats, and shipments that pose a threat to the economic security of the United States.

Total Change 2012 to 2013	-	-	11

CBP requests \$3.285 million in FY 2013 for the Harbor Maintenance Fee Collection PPA

- An increase of \$11,000 for the FY 2013 Pay Increase

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Harbor Maintenance Fee is an Army Corps of Engineers (COE) fee, which is collected for the operation and maintenance, as well as improvements, of U.S. channels and harbors. CBP is reimbursed for a portion of the costs associated with the collection of the fee for COE. This collection is part of CBPs Enforce Trade Law and Collect Revenue subprogram within the Securing and Facilitating Flows of Cargo Line of Business.

The President’s Budget requests \$71.534 million for International Cargo Screening. This is a decrease of \$3.023 million over the FY2012 Enacted Budget. The request includes:

- A decrease of -\$14.774 million for a realignment of funding within Salaries and Expenses from the International Cargo Screening PPA to the Other International Programs PPA
- An increase of \$13.032 million for CSI
- An increase of \$138,000 for the FY 2013 Pay Increase
- A decrease of -\$1.419 million for a reduction associated with CSI circuit efficiencies

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The PPA International Cargo Screening supports Line of Business (LOB) 2, Securing and Facilitating Flows of Cargo, and it supports LOB 3, Securing and Facilitating the Flows of People.

**Securing and Facilitating Flows of Cargo (Line of Business 2)**

The FY 2013 request includes funding for the Cargo Conveyance Entry subprogram within LOB 2. This subprogram supports the Office of Field Operations (OFO) Strategic Plan goal to ensure border security, prevent terrorism, and strengthen international cooperation through Container Security Initiative (CSI) and Secure Freight Initiative (SFI) activities.

The synergy between the CSI and SFI programs have resulted in a blended approach to targeting and inspecting high-risk cargo before reaching a U.S. port. The rebalancing of these programs will allow

CBP to optimize its resources and efforts to synchronize, streamline and advance operations and technology in a more efficient manner with limited resources.

### **Container Security Initiative**

Since CSI was unveiled in January 2002, it has been part of our government's strategy to secure the nation from the potential terrorist threat of using maritime cargo containers. The CSI program continues to foster partnerships with other countries and our trading partners in order to inspect high-risk shipments before they are loaded on vessels bound for the U.S. CBP through CSI ensures effective coordination with host countries by conducting periodic risk evaluations of ports to assess the level of staffing and other resource needs. CBP encourages interagency cooperation by developing a capacity to collect and share information and trade data gathered from CSI ports.

CSI is the only multinational program in the world protecting the primary system of global trade – maritime containerized shipping – from being exploited or disrupted by international terrorists. Operational in 58 ports, CSI facilitates screening of over 80% of the volume of maritime cargo destined for the U.S. by using automated tools to identify containers that pose a potential risk and using technology to scan these containers for radiological or nuclear material without impeding the flow of trade. CBP has shifted from the initial CSI operating protocols (which were heavily dependent on the placement of U.S. personnel overseas) to a more technology-based approach, relying on the National Targeting Center-Cargo (NTC-C) to conduct more bill review and targeting.

CSI personnel screen and evaluate containers before they are shipped. The shipments are screened as early in the supply chain as possible, generally at the last port of lading. Using technology to scan high-risk containers, CSI ensures rapid scanning without impeding the flow of trade. CSI technology includes large-scale X-ray, gamma ray machines, and radiation detection devices. In FY 2013, CSI will become a hybrid of different operational models to include traditional inspectional staffing with CBP personnel at foreign ports and remote targeting utilizing hubs in foreign locations, and remote targeting from the NTC-C with no foreign personnel and reciprocal arrangements.

CSI will enter into these hybrid operational models by ensuring the following:

- CSI will monitor overseas deployments and ensure that the proper numbers of personnel are stationed at each foreign port where the traditional inspectional model is utilized.
- CSI will maintain staffing levels at the NTC-C to ensure 100% review of all shipments prior to lading on a vessel destined to the U.S.
- CSI will look to expand targeting beyond the traditional weapons of mass effect to include trade violations and other trans-national criminal activity; this will be dependent on the host country's willingness to expand targeting beyond the current declaration of principles.
- CSI will expand to additional countries of strategic interest within current budget constraints.

### **Secure Freight Initiative**

The SFI system aims to scan all containers destined for the United States using Radiation Portal Monitors (RPMs) and NII scanners. The SFI personnel perform the following steps within the process: (1) electronically transmit scanned images and information for evaluation and analysis; (2) resolves all radiation alarms according to alarm resolution procedures; (3) utilizes the information collected to enhance the ATS or other relevant programs; (4) stores the information for later retrieval and analysis;

and (5) provides an automated notification of questionable or high-risk cargo as a trigger for further inspection by appropriately trained personnel.

SFI operations at pilot locations have afforded CBP the opportunity to further test possible solutions to the complex challenges posed by scanning 100 percent of U.S.-bound maritime containers, particularly at transshipment and high-volume ports. While the data can be useful, operational costs are significant even in these limited environments. CBP has documented numerous challenges associated with implementing 100 percent scanning including diplomatic challenges, international opposition, port reconfigurations, potential for reciprocal requirements on the U.S. and lack of available technology to efficiently scan transshipped cargo. DHS understands the need to proceed with container security programs in a responsible, practical manner that maximizes the security of U.S.-bound maritime cargo but believes an effective risk-based strategy will best ensure we achieve that goal. To that end, CBP has ceased SFI operations at the ports of Southampton, United Kingdom; Puerto Cortés, Honduras; Salalah, Oman and Busan, South Korea and is currently using CSI protocols of risk-based targeting in those locations.

Port Qasim, Pakistan, continues to showcase the success of the SFI program in a country where the government and terminal operators are very supportive of the initiative. In FY 2013, SFI will maintain operations in Qasim, Pakistan. CBP continues to explore options for upgrading the equipment in Port Qasim.

## **Overseas Program**

The Overseas Program (or the Program) supported 21 CBP Attaché offices in FY 2011. By advancing strategic partnerships, the Program promotes CBP initiatives and activities overseas that safeguard the American homeland well beyond our borders, while facilitating legitimate trade, The CBP Attachés perform the following duties:

- Fulfill the role of CBP officers for cargo security and trade facilitation purposes;
- Serve as liaisons to other U.S. government agencies and host government authorities on any and all matters relating to cargo security of interest to CBP; and
- Support and oversee all CBP personnel and program in-country, including the Container Security Initiative, Secure Freight Initiative and capacity building efforts.

The partnerships with foreign governments/agencies, international organizations, and U.S. agencies supported by CBP Attachés enhance CBP's ability to mitigate and avoid risks related to cargo security, and trade enforcement in a systematic. More concretely, the Attachés foment strong relationships with CSI/SFI host government officials and allow CBP to facilitate customs reform and modernization through training and technical assistance. These partnerships also facilitate information-sharing with a focus on areas of mutual interest to both CBP and its foreign counterparts, such as preventing, detecting and interdicting illegal shipments

## Description of Selected Adjustments to Base

Realignment of Funding to Other International Programs PPA:

Beginning in FY 2013, the funding associated with activities performed by the Attaché offices to support CSI and SFI will be in the International Cargo Screening PPA. The Other International Programs PPA will fund the Attaché offices that do not directly support the CSI and SFI programs. The attachés perform support to multiple programs including CSI and SFI. This change better represents the overall efforts of these personnel.

#### Reduction from CSI Circuit Efficiencies:

Beginning in FY 2013, CBP will increase efficiencies in CSI dedicated circuits at overseas ports. CBP has worked with the Office of Information Technology (OIT) to conduct an analysis of the dedicated circuits at CSI ports. CBP has identified circuits that have been under utilized in past years and will be able to downgrade some of these circuits without negatively impacting CSI operations. CSI will also implement central hubs and remote targeting in selected countries where CSI has multiple locations. This will allow CBP to disconnect the circuits in the remote CSI ports as they will no longer be staffed with CBP personnel.

- A decrease of -\$8,000 for a DHS Management Efficiency regarding overtime

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of International Affairs (INA) is CBP's lead for coordinating foreign initiatives, programs, and activities funded within the Other International Programs PPA, which contributes to Line of Business 6, Mission Support. INA administers several international *partnership* programs and 21 CBP Attaché offices that support the U.S. Government's security objectives in anti-terrorism, border

security, export controls, non-proliferation, and customs and immigration policy. In addition, INA is charged with engaging trade partners and the broader international community to facilitate foreign and international trade for the U.S. CBP's international programs serve as the conduit for CBP's participation in international forums such as the World Customs Organization (WCO), and in regional bodies such as the Asia-Pacific Economic Cooperation (APEC) forum. These programs provide the platform for the negotiation of agreements, memoranda of understanding and letters of intent. CBP's key objectives for its international programs are:

- Develop, promote, and implement CBP's international strategy;
- Negotiate international agreements and other instruments for CBP;
- Advance CBP's international policy initiatives in international forums; and
- Develop and maintain strategic international relationships

INA's efforts contribute to CBP's overall mission of securing America's borders and securing and facilitating the flow of goods and movement of people. INA strives to extend U.S. borders by implementing programs and initiatives that promote anti-terrorism, global border security, non-proliferation, export controls, immigration, capacity building, and facilitating legitimate trade. INA focuses on international cooperation and strengthening multi- and bi-lateral relationships to achieve international agreements and joint efforts that both facilitate and secure legitimate trade and travel. INA promotes expansion of the WCO Security and Facilitation in Global Environment (SAFE) Framework of Standards by providing targeted countries with training and advisory support through programs such as Capacity Building and Export Control and Border Security (EXBS). Additionally, INA identifies, develops, implements, and coordinates specialized training and developmental assistance programs for foreign customs and other law enforcement officials and organizations. INA provides in-country advisory support for broad-based customs reform and modernization and ensures CBP is represented at overseas posts and influencing policy throughout the world.

The CBP Overseas Program is composed of Attaché offices located in U.S. Embassies and Consulates in 21 countries. The Overseas Program is dedicated to supporting CBP programs and activities overseas that safeguard the American homeland from beyond our borders, while facilitating lawful trade, travel, and immigration. CBP Attachés:

- Serve as the primary representatives of the CBP Commissioner in-country, informing the U.S. ambassador or consular officer at post about CBP programs and capabilities;
- Fulfill the role of CBP officers for security, immigration, and trade facilitation purposes;
- Serve as liaisons to other U.S. government agencies and host government authorities on any and all matters of interest to CBP;
- Support and oversee all CBP personnel and program in-country, including the Container Security Program, Immigration Advisory Program, the Customs-Trade Partnership Against Terrorism, and capacity building efforts;
- Handle inquiries and requests for CBP assistance from the trade industry and the traveling public, including on issues such as intellectual property rights, boarding letters, malafide intercepts, and fraudulent documents; and
- Support CBP employees traveling overseas.

The Overseas Program builds strategic partnerships with foreign governments and enhances the ability of CBP to address risks related to cargo security, travel, and trade enforcement. CBP Attachés work

diligently on focusing on programs related to immigration threat. Specific programs include Automated Targeting System-Global (ATS-G), IAP and Global Entry (GE). The CBP Attaché is actively promoting these programs with our foreign counterparts.

The presence of a CBP Attaché overseas fosters strong relationships with host government officials and allows CBP to facilitate customs reform and modernization through training and technical assistance. Each CBP Attaché develops contacts within the host government customs and immigration community and is able to arrange high-level meetings for visiting U.S. delegations. These contacts allow CBP to cooperate in the sharing of criminal intelligence and best practices with foreign customs and immigration agencies. The Overseas Program contributes to CBP's strategic objective of building and maintaining essential partnerships with foreign government/agencies, international organizations, and U.S. agencies. These partnerships facilitate information-sharing with a focus on areas of mutual interest to both CBP and its foreign counterparts, such as preventing the entry of known terrorists and illegitimate travelers as well as detecting and interdicting illegal shipments.

Total Change 2012 to 2013	-	-	(4,897)

The President’s Budget requests \$40.082 million for C-TPAT. This is a decrease of \$4.897 million over the FY2012 Enacted Budget. The request includes:

- A decrease of -\$5.0 million for a reduction associated with extending the C-TPAT validation cycle to 4 years
- An increase of \$103,000 for the FY 2013 Pay Increase

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Customs-Trade Partnership Against Terrorism (C-TPAT) supports Line of Business 2, Securing and Facilitating Flows of Cargo. C-TPAT is CBP’s premier cargo and conveyance entry program. Cargo and Conveyance Entry programs provide CBP greater flexibility in shifting functions away from the physical border, allowing CBP to intercept potential threats before they can cause harm, while also expediting legal commerce. C-TPAT helps the agency achieve its twin goals—security and facilitation of trade moving into the United States.

The C-TPAT program helps to promote trade security by developing partnerships with members of the trade community. The purpose of C-TPAT is to partner with the trade community to secure the U.S. and international supply chains from possible intrusion by terrorist organizations. C-TPAT requires trade community participants to document and validate their supply chain security procedures in relation to existing C-TPAT criteria or guidelines, as applicable. Companies participating in C-TPAT develop an internal process to validate the existence of security measures documented in their Supply Chain Security Profile and in any supplemental information provided to CBP. As a part of the process, C-TPAT Supply Chain Security Specialists (SCSS) and C-TPAT participants jointly conduct a

validation of the company's supply chain security procedures. The validation process is essential to verify the company's commitment to C-TPAT.

C-TPAT's SCSS conduct validations, identify supply chain security vulnerabilities, and work to monitor company initiatives that address those vulnerabilities. Validations conducted by SCSS determine the accuracy and effectiveness of a company's security profiles. The validation process is essential to verify the company's commitment to C-TPAT and ensure that best practices and procedures implemented by the company are reliable, accurate, effective and meet the agreed upon security standards.

To better secure and facilitate the flow of goods into the United States, CBP will continue to ensure that existing and new C-TPAT partners fulfill their commitments by verifying that agreed upon security measures have been implemented. CBP will also continue to work with C-TPAT partners to finalize minimum applicable supply chain security criteria and security best practices. C-TPAT teams travel around the globe to visit partners, their vendors, and vendors' plants to validate that supply chain security meets C-TPAT minimum security criteria. They also ensure that best practices and procedures used are reliable, accurate, effective, and meet the agreed upon security standards. CBP will continue to provide tools and create incentives for the private sector to join C-TPAT, which is a prerequisite for the Free and Secure Trade (FAST) program and other CBP expedited processing programs

Total Change 2012 to 2013	-	-	-

The President's Budget requests \$6.311 million for Trusted Traveler Programs

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Trusted Traveler Programs PPA supports Line of Business (LOB) 3, Securing and Facilitating the Flows of People. The FY 2013 request includes operations and maintenance funding for the Pre-Arrival Processing subprogram within LOB 3. CBP's pre-arrival processing programs (Trusted Traveler Programs (TTP), NEXUS Highway and Air, Secure Electronic Network for Traveler's Rapid Inspection (SENTRI), Free and Secure Trade (FAST), Global Entry (GE) and Global Enrollment System (GES) help to improve the targeting, screening, and apprehension of high-risk international travelers, thereby preventing terrorist attacks and criminal activity while expediting the processing of legitimate travelers.

**Trusted Traveler Programs**

Since the terrorist attacks of September 11, 2001, CBP has placed great emphasis on developing and expanding TTP for passengers and commercial truck drivers at the land borders with Canada and Mexico, and developing similar programs for international air passengers. TTP helps to identify low-risk, vetted travelers by the voluntary submission of an application and subsequent vetting using automated name and fingerprint-based checks of law enforcement databases, fingerprint/name checks, and an interview with a uniformed officer. The TTP programs continue to expand and include a total of 1,133,532 members as of September 30, 2011. Currently, TTP is comprised of four programs – NEXUS, SENTRI, FAST, and Global Entry (GE) which are discussed below.

### NEXUS Highway and Air

NEXUS, a joint US/Canada enrollment program at the Northern Border land POE and at all Canadian preclearance ports, identifies low-risk travelers through: a complete biographic check; an interview with a CBP officer and a Canada Border Security Agency (CBSA) officer; and a fingerprint check. Once applicants are identified as low-risk they are enrolled in the NEXUS program and given a Radio Frequency Identification (RFID)-enabled card that is unique to the traveler. The RFID-enabled card allows the traveler to use specified primary lanes at land border ports of entry that are reserved for NEXUS enrollee use. At the Canadian preclearance airports, passengers use kiosks instead of dedicated lanes, and iris scans are utilized to identify low risk travelers rather than RFID-enabled cards. At the time of enrollment, travelers qualify for trusted traveler status in all modes of travel (air, sea, and land). The introduction of WHTI lane technology has provided local managers with the flexibility to add and subtract dedicated lanes to fit traffic demand. As of September 30, 2011, CBP had 589,871 NEXUS members. The enrollment is expected to increase to 650,000 members in FY 2012.

### Secure Electronic Network for Traveler's Rapid Inspection (SENTRI)

On the Southwest Border SENTRI provides expedited CBP processing for pre-approved, low-risk travelers. Applicants must voluntarily undergo: a thorough biographical background check against criminal, law enforcement, customs, immigration, and terrorist indices; a 10-fingerprint law enforcement check; and a personal interview with a CBP officer.

Once applicants are approved they are issued a RFID that will identify their record and their status in the CBP database upon arrival at the U.S. POEs. A sticker decal is also issued for the applicant's vehicle or motorcycle. SENTRI users have access to specific, dedicated primary lanes into the United States.

The SENTRI program was first implemented at Otay Mesa, CA in 1995, and has grown to include a total of 17 lanes at the ten largest southern border POEs along the U.S.-Mexico border. As of September 30, 2011 there are 263,937 SENTRI members, and that number is expected to grow to 275,000 members in FY 2012. SENTRI members currently account for 14% of all cross Southwest border traffic.

### Free and Secure Trade (FAST)

FAST is the cargo equivalent of the SENTRI and NEXUS facilitative programs in the passenger environment. Through FAST, importers, commercial carriers, truck drivers, and manufacturers who enroll in the program and meet agreed upon security criteria, including participation in the C-TPAT, are entitled to expedited clearance at a POE. Using electronic data transmission and transponder technology, CBP expedites clearance of approved trade participants. The FAST program fosters more secure supply chains and enables CBP to focus security efforts and inspections on high-risk commerce, where they are needed most. As of September 30, 2011 FAST has 79,344 members and assumes approximately the same total membership in FY 2012.

### Global Entry (GE)

CBP designed GE to allow for expedited clearance of pre-approved low-risk air travelers into the U.S. Through the use of automated kiosks placed in the Federal Inspection Services area of each identified airport, enrolled travelers are able to bypass queues and process through Passport Control without

having to see a CBP officer. This program facilitates entry into the United States, and is especially beneficial to frequent international flyers. Currently, GE is available at Atlanta, Boston, Dallas/Ft. Worth, Washington Dulles, Chicago, Detroit, Ft. Lauderdale, Honolulu, Houston, Las Vegas, Los Angeles, Miami, Newark, Chicago, New York (JFK), Orlando, Philadelphia, Sanford (FL), San Juan, San Francisco, and Seattle airports.

GE applications and enrollments are growing quickly. As of September 30, 2011, GE has 200,380 members and expects that number to grow to 275,000 in FY 2012. In 2012, CBP plans to expand Global Entry to 16 additional airports. Since April 2009, CBP has operated a joint pilot with the government of the Netherlands that allows qualified U.S. citizens to join Privium, the Dutch trusted traveler program, and allow Dutch citizens to join GE. Participants in this pilot must pass vetting by both CBP and the Netherlands government. On December 29, 2010, a Federal Register Notice was published announcing the expansion of GE eligibility to Mexican Nationals. Participants in this pilot must pass vetting by both CBP and Mexican government officials. In June of 2011, CBP began implementing a limited pilot with the United Kingdom (UK), allowing UK citizens to participate in GE. UK applicants are subjected to vetting by both CBP and the UK government officials.

CBP has signed joint statements with Germany and Korea, laying the framework for the development of trusted traveler's arrangements with each of these countries. CBP is working with representatives from these governments to develop individual bilateral arrangements to enable trusted travelers from either country to receive expedited clearance when traveling.

### **Global Enrollment System (GES)**

CBP has developed GES for all CBP Trusted Traveler Programs to be operational on the CBP national network. GES has integrated the independent CBP enrollment and validation processes into a single solution, and it provides a more efficient platform to share data and perform real-time watch list and lookout checks.

GES also reduces the redundancy of maintaining several application processes, and it allows for a quicker and more accurate applications process. CBP has developed a single online, paperless application process to support the GES and will allow a traveler to apply to multiple programs online. The on-line application Global On-Line Enrollment System supports all TTP applications.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and Expenses  
Inspection and Detection Technology  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: Inspection and Detection Technology**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	<b>52</b>	<b>49</b>	<b>139,849</b>
<b>2012 Enacted Budget Authority</b>	<b>52</b>	<b>50</b>	<b>148,537</b>
2013 Adjustments-to-Base	-	-	10
<b>2013 Current Services</b>	<b>52</b>	<b>50</b>	<b>148,547</b>
2013 Program Change	-	-	(30,972)
<b>2013 Total Requested Budget Authority</b>	<b>52</b>	<b>50</b>	<b>117,575</b>
Total Change 2012 to 2013	-	-	(30,962)

The President’s Budget requests \$117.575 million for Inspection and Detection Technology. This is a decrease of \$30.962 million over the FY 2011 Enacted Budget. The request includes:

- An increase of \$10,000 for the FY 2013 Pay Increase
- A decrease of -\$30.872 million for a reduction to Non-Intrusive Inspection operations and maintenance
- A decrease of -\$100,000 for a reduction to management and administration staffing & services

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Inspection and Detection Technology PPA supports Line of Business (LOB) 2, Securing and Facilitating Flows of Cargo, and LOB 3, Securing and Facilitating Flows of People. The FY13 requests includes funding for the CBP NII Technology subprogram which supports cargo and conveyance entry activities and inbound inspection activities.

CBP has long recognized that an adversary can defeat any single system or device. For this reason, CBP cannot rely on any single technology or inspection process. Instead, CBP uses various technologies in different combinations to substantially increase the likelihood of detecting a nuclear or radiological weapon or elements of these weapons, and illegal aliens or other contraband being smuggled across the U.S. borders. NII technologies are viewed as force multipliers that enable CBP officers to screen or examine a larger portion of the stream of commercial traffic while maintaining the flow of legitimate trade, cargo, and travelers.

Since September 11, 2001, NII technology has been a cornerstone of CBP's multi-layered enforcement strategy. Technologies currently deployed at and between our Nation's POEs include large-scale X-ray and Gamma-ray imaging systems, as well as a variety of portable and handheld technologies, to include radiation detection technology.

CBP has 299 large-scale imaging systems deployed at and between our POEs. There are also a total of 5,199 small-scale NII units, 1,465 Radiation Portal Monitors (RPMs), 2,437 Radiation Isotope Identification Devices (RIIDs) and 24,418 Personal Radiation Detectors (PRDs) deployed nationwide.

Each year, a number of POEs undergo reconfigurations in which the lanes of traffic that contain NII equipment and/or RPMs are moved or altered. Additionally, a number of port expansions where new lanes of traffic requiring new technologies are added. Typically these reconfigurations and port expansions account for approximately 20 percent of deployment efforts.

The Operations and Maintenance (O&M) funding for NII provides maintenance support at approximately 600 locations throughout the U.S. and its territories. These funds will ensure the deployed NII technologies meet the expected operational requirements of CBP, as well as, the requirements as defined in the Federal Information Systems Management Act (P.L. 107-347). Additionally, these funds will ensure installation of mandated security and vendor upgrades while providing CBP with the means to dispose of obsolete NII systems as mandated by Federal regulations.

The O&M funds requested will also support the RPM program to upgrade sites to be Port Radiation Inspection Detection and Evaluation (PRIDE) compliant. In addition, the funds will be used to support RPM systems that are reaching the end of their life cycle and to supplement the interdiction systems with ancillary equipment and components to enhance their capability. RPMs are an integral component of the CBP interdiction efforts because they identify illicit radiological materials and provide capabilities to prevent their entry into the United States.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and Expenses  
Systems for Targeting  
Program Performance Justification**  
(Dollars in Thousands)

<b>2013 Current Services</b>	<b>34</b>	<b>32</b>	<b>48,406</b>
2013 Program Change	-	-	65,420
<b>2013 Total Requested Budget Authority</b>	<b>34</b>	<b>32</b>	<b>113,826</b>
Total Change 2012 to 2013	-	-	72,426

CBP requests 34 positions, 32FTE, and \$113.826 million for FY 2013 to support CBP Systems for Targeting. This program conducts activities in Line of Business (LOBs) 4 – Intelligence and Targeting that provides direct support to LOB 1, 2, and 3. Within LOB 4, Systems for Targeting focuses all of its resources toward development and maintenance of sub-program 4.1.2 – ATS.

- An increase of \$31.0 million for an enhancement to ATS operations and maintenance
- An increase of \$34.420 million for an enhancement to targeting systems and staff
- An increase of \$6,000 for the FY 2013 Pay Increase
- An increase of \$7.0 million for transfer of funding from ACE PPA to ATS PPA

**CURRENT SERVICES PROGRAM DESCRIPTION:**

At the core of CBP’s ability to achieve its critical border security objectives and maintain the flow of lawful commerce is the ability to identify high-risk travelers and goods for inspection while allowing the vast majority of law-abiding travelers and commerce to move through without unnecessary delay. Recent legislation and regulatory action, such as: the *Trade Act of 2002* (P.L. 107-210); the 24-hour rule, the *Aviation Transportation Security Act of 2001* (P.L. 107-71); the *Enhanced Border Security and Visa Reform Act of 2002* (P.L. 107-173); and the *SAFE Port Act*, have made it mandatory to provide advance information about travelers, conveyances, and goods arriving in the U.S. CBP uses computer technology and rule-based software to analyze the data provided for travelers, conveyances, and shipments arriving in the U.S. CBP applies its targeting methods against the data to determine which travelers, conveyances, or shipments need to be segregated for a closer look and possible intensive inspection.

The main platform used to perform this targeting analysis is the ATS. ACS, TECS and associated databases provide CBP officers (including those stationed overseas at Preclearance stations, CSI ports, and IAP locations) with advance notice of travelers, conveyances, and goods arriving at U.S. ports of entry. This allows them to cross-check passenger, crew, and cargo manifests against subject lookouts including those contained in the Terrorist Identities Datamart Environment (TIDE) and the NCIC. CBP also uses ATS to analyze data in AES on shipments leaving the U.S.

ATS enhances the TECS, ACS, and AES data by running rules developed by CBP's subject matter experts to identify travelers, conveyances, and shipments with high-risk travel patterns. ATS also allows CBP officers to conduct advanced queries of these and other government databases to reveal emerging threat patterns.

Currently, ATS consists of six modules that focus on exports, imports, travelers and crews (airline passengers and crew on international flights, passengers and crew on sea carriers), private vehicles crossing at land borders, and import trends over time. The six modules are: (1) ATS-Inbound, which serves as the primary decision support tool for inbound targeting of cargo; (2) ATS-Outbound, which is used for targeting outbound cargo and assists in identifying exports which pose a high risk of containing goods requiring specific export licenses, narcotics, or other contraband; (3) ATS-Passenger (ATS-P), which is used at all U.S. airports and seaports receiving international flights and voyages to evaluate passengers and crewmembers prior to arrival or departure; (4) ATS-Land (ATS-L) which provides analysis and rules-based risk assessment of private passenger vehicles crossing the nation's borders; (5) ATS-Trend Analysis and Analytical Selectivity which improves CBP's ability to examine, locate, and target for action violators of U.S. laws, treaties, quotas, and policies regarding international trade; and (6) ATS-International which provides foreign custom authorities with automated cargo targeting capabilities and provides a systematic medium for exchanging best practices and developing and testing targeting concepts.

Future targeting system enhancements will focus on increasing data collection from internal and external sources and improving geographical unit interface display capabilities. Targeting improvements will enable continuous, incremental improvement of the ATS helping to replace unproductive inspections and vetting operations (false positives) with more productive / more effective enforcement activities (successful seizures / apprehensions) and expansion to better mitigate known and emerging threats. Enhancement and expansion of CBP's targeting enterprise will provide front line personnel the ability to provide comprehensive risk assessments on the large volume of regulatory and commercial data generated by commercial entities, states and other government agencies to verify the identity of businesses, cargo, and persons using and crossing our borders. This can be achieved by rapidly institutionalizing deployed stop-gap measures by developing the advanced analytics capabilities to augment the "officer developed algorithms." Further expansion of the ATS capabilities to cover additional transportation modes, such as air and sea, will enhance agency-wide responsiveness to threats. This approach will allow CBP to continue facilitating the flow of legitimate passengers and cargo, while enhancing the capability to detect and prevent terrorist threats, and resolve IPR related issues. This could include expansion of ATS capabilities to other DHS component needs; such as Visa Overstay Vetting and Refugee Screening.

## Descriptions of Selected Adjustments to Base

### Realignment of Funding for Targeting Systems:

The transfer of \$7.0 million of funding from the ACE PPA to the ATS PPA will allow CBP to consolidate all targeting funding within the Systems for Targeting PPA. This PPA supports activities which give CBP the ability to achieve its critical border security objectives and maintain the flow of lawful commerce by identifying high-risk travelers and goods for inspection while allowing law-abiding travelers and commerce to move without unnecessary delay.

**Department of Homeland Security

Total Change 2012 to 2013	-	32	13,177

The President's Budget requests \$65.127 million for National Targeting Center. This is an increase of \$13.177 million over the FY2012 Enacted Budget. The request includes:

- An increase of \$5.197 million for annualization of the FY 2012 National Targeting Center enhancement
- An increase of \$7.980 million for an enhancement for the National Targeting Center
- A decrease of -\$171,000 for a reduction to Non-Intrusive Inspection operations and maintenance
- An increase of \$171,000 for the FY 2013 Pay Increase

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The PPA National Targeting Center supports Line of Business (LOB) 4, Intelligence and Targeting. This request includes the following activities which are funded within the National Security Targeting subprogram of LOB 4.

**National Targeting Center (NTC)**

NTC, which is housed in two facilities, supports CBP's goal to develop and implement an enhanced targeting strategy that more effectively and efficiently divides cargo and travelers according to the potential threat they pose. The NTC helps to integrate the Agency's diverse intelligence capabilities into a cohesive intelligence enterprise enabling CBP to serve the Nation as a premier intelligence-driven border law enforcement agency.

The NTC was created in November 2001 in response to the terrorist attacks of September 11, 2001 to provide advanced targeting, research and coordination between numerous law enforcement and

intelligence agencies in support of the CBP anti-terrorism mission. The NTC provides around-the-clock tactical targeting and analytical research support for CBP anti-terrorism efforts in both the passenger and cargo arenas.

CBP officers, Border Patrol agents, and import specialists, all experts in passenger and cargo targeting for air, sea, and land operations in the inbound and outbound environments, primarily staff both NTC facilities. In addition to using existing databases and information to identify potential targets, the NTC also develops tactical targets from raw intelligence in support of CBP's mission to detect and prevent terrorists and terrorist weapons from entering the U.S. While the vast majority of travelers and goods are legitimate, both NTC facilities are designed to carefully examine the small minority of shipments and/or travelers that may be connected to terrorism or other transnational crimes, such as money laundering or narcotics smuggling.

### **Conduct Pre-Departure Screening of Passengers**

The NTC screens relevant information prior to a passenger's departure. NTC implements a key part of the CBP layered approach strategy to homeland security by extending U.S. borders outward and attempting to interdict possible terrorists, other *mala fide* travelers and cargo before they can board or be laded on a conveyance destined for the United States. NTC does this through the Pre-Departure Targeting program, as well as by providing 24-hour support for IAP officers posted at eight airports around the world, and conducting research and vetting on possible ESTA denials.

The NTC provides research and support for CBP's admissibility programs through: (1) the ongoing expansion of the IAP; (2) Pre-Departure and Outbound Targeting; (3) U.S. visa re-vetting; (4) the Refugee Processing Program; (5) ESTA, the expansion of the International Criminal Police Organization (INTERPOL) Stolen Lost Travel Document (SLTD) initiative and (6) a merger with the Alien Smuggling Interdiction (ASI) program and APIS. These efforts prevent such inadmissible high-risk passengers, cargo, and agriculture/bioterrorism threats from reaching U.S. ports of entry. The NTC also participates in public health, and information sharing initiatives with Canada, Mexico and the U K.

### **Pre-Departure Targeting**

The Pre-Departure Program was initiated on January 10, 2010, in an effort to identify high-risk passengers and keep them from boarding commercial carriers bound for the United States from overseas locations that do not have an IAP presence. In FY 2011, NTC reviewed 212,929 pre-departure records and kept 2,424 high-risk passengers off flights bound for the United States.

### **Immigration Advisory Program**

The IAP is now operational at eight airports in six countries (Amsterdam, Frankfurt, London-Gatwick, London-Heathrow, Manchester, Madrid, Tokyo-Narita, and Paris-Charles De Gaulle). NTC conducts research and refers the names and flight numbers of suspected high-risk passengers to IAP offices overseas. IAP officers screen the passengers to identify the targets referred from NTC and assist airlines to determine if passengers have the proper documents to enter the United States. With an expanded ATS-Passenger IAP Hotlist, more targets are being referred and more passengers are being denied boarding. In FY 2011, NTC reviewed 145,877 records and kept 757 high-risk passengers off flights bound for the United States.

### **Visa Re-Vetting**

In late March 2010, the NTC implemented the Visa Hotlist for re-vetting previously issued U.S. visas against No Fly, Terrorist Screening Database, Visa Revocation Records, Public Health, and DOS lookout records with terrorist related inadmissibility codes. Visa record matches for the categories listed above are referred to DOS for revocation of the visa, if necessary, while the NTC conducts additional research to identify possible associates. In FY 2011, NTC reviewed 12,301 records with 1,366 positive matches for subjects that did not have visa revocation records, which were forwarded to the DOS for possible action. DOS revoked 1,093 visas out of the 1,366 referred by the NTC.

### **Office of Alien Smuggling Interdiction (ASI)**

CBP established ASI in 2006 to expand the nation's zone of security beyond physical U.S. borders by preventing the boarding of individuals traveling to the U.S. who may be inadmissible or traveling on fraudulent or fraudulently obtained travel documents. ASI deters, detects, and disrupts illegal migration to the United States by focusing on migratory trends utilized to facilitate human smuggling and trafficking. ASI reduces the threat to our nation's security by combating illegal migration, disrupting organized smuggling operations, and identifying and preventing clandestine terrorist travel.

ASI continually maintains and develops relations with other government entities to identify and explore areas to enhance cooperation and information sharing between partners. ASI represents the Agency at the interagency Human Smuggling and Trafficking Center (HSTC or the Center). ASI representatives regularly provide intelligence and analysis information to the Center management. In addition, to support and advance CBP and the Center cooperation, ASI representatives are sent to the Center once a week. ASI actively participates in the DHS Blue Campaign to fight against human trafficking; ASI representatives have been working on a Blue Campaign derivative name Blue Lightening. Blue Lightening is an initiative that seeks to educate flight attendants to recognize potential victims of human smuggling.

### **Regional Carrier Liaison Group (RCLG)**

CBP's RCLGs are located at the international airports in New York (JFK), Miami and Honolulu. The RCLGs augment the NTC mission by preventing passengers who may be inadmissible, or who possess fraudulent documents, from traveling to the U.S. RCLGs also work closely with air carriers to facilitate boarding of bona-fide passengers and provide 24/7 assistance on immigration related issues. RCLG officers prevent fraudulently and improperly documented aliens from boarding U.S. bound aircraft through various targeting methods and by working with carriers and U.S. government representatives overseas. RCLG officers make recommendations to the carriers against boarding (offloading) suspect travelers and to refer these travelers to local authorities in all instances involving fraud. RCLGs provide a service to the travel industry by assisting carriers with boarding questions, and providing expert guidance on suspect passengers. The travel industry has come to rely on RCLGs as a means to navigate complicated immigration laws and as a resource for fraud prevention. Since the December 25, 2009 attempted terrorist attack, the RCLGs have taken on a greater role as part of CBP's expanded Pre-Departure Screening program and in FY 2011, RCLGs answered over 24,000 phone calls from air carriers and offloaded nearly 3,000 passengers bound for the United States, of which 240 were fraud related.

### **Electronic System for Travel Authorization (ESTA)**

The Implementing Recommendations of the 9/11 Act, requires all nationals or citizens of VWP countries, who plan to travel to the United States for temporary business or pleasure, to obtain an electronic travel authorization prior to boarding a U.S.-bound commercial flight or cruise ship. The ESTA website began accepting voluntary applications in July 2008 and the program became mandatory for travelers from the 37 VWP countries in January 2009. In FY 2011, 11.1 million ESTA applications were received with 10.9 million approved and 200,103 denied.

### **United Kingdom Border Agency (UKBA)/National Border Targeting Centre (NBTC) Memorandum of Understanding (MOU)**

DHS and the UKBA finalized an information sharing MOU in September 2008. The goal of information sharing between NBTC and NTC is to enhance border security for both countries by exchanging critical passenger information in order to disrupt the movement of criminals and terrorists, deter alien and contraband smugglers and identify those using fraudulent or stolen travel documents. NTC continues to have an exchange/liaison officer posted at the NBTC in Manchester, UK who works closely with the UKBA, as well as, other UK enforcement agencies and U.S. Embassy representatives including the DHS, CBP, ICE and Legal Attaches. As a result of the MOU, 296 Intelligence and Operations Framework System events were created in FY 2011, and NTC personnel have been involved in several joint agency anti-currency smuggling operations.

### **Outbound Targeting**

In an effort to isolate high-risk shipments in the export environment, NTC conducts daily outbound and in-transit cargo reviews which target shipments such as personal effects destined to high risk countries, controlled chemicals, and strategic equipment used in the production of WMD. Proliferation history demonstrates that countries developing WMD programs rely on imports of special equipment, materials, and components. NTC has implemented targeting tools to identify possible dual-use and licensable commodities destined to foreign entities of national concern to the United States. A recent decision to place greater emphasis on outbound passenger targeting has resulted in several high profile successes, including the apprehension of the Times Square bomber and an alleged serial killer as they attempted to take flights out of the United States.

### **Conduct Pre-Departure Screening of Cargo**

The NTC screens relevant information prior to cargo departure. The NTC also provides cargo research and analysis on positive TSDB passengers, responds to research requests from CBP domestic and CSI ports, and conducts cargo research for NTC liaisons. Additionally, the NTC: conducts national cargo sweeps in the ATS; supports Intelligence Driven Special Operations (IDSOs); and conducts WMD/Weapons of Mass Effect (WME), agro-terrorism, and bio-terrorism rules development. The NTC will continue to provide support to CSI and SFI programs. The NTC-C has dedicated staff to support and coordinate the International Container Security component of SFI. The program utilizes remote technology to facilitate near real time scanning and monitoring of cargo/containers destined to the U.S. from select foreign ports. Targeting decisions are made based on container images, radiation alarm profiles, and cargo descriptions provided from overseas.

### **Air Cargo Advance Screening (ACAS)**

The ACAS project was launched in November 2010 after the October 28, 2010 attempt to ship explosive devices through express consignment air cargo from Yemen. The NTC became the sole entity responsible for conducting targeting and analysis on all express air cargo originating from 28 countries in the Middle East and North Africa. The ACAS team is staffed with both CBP and TSA targeting analysts who jointly target and mitigate air cargo identified as high risk before allowing it to be loaded onto an aircraft. Pre-departure targeting allows CBP to push U.S. borders outward by keeping high risk cargo off international conveyances destined to the United States. The ACAS pilot program began on December 13, 2010 with electronic transmissions of key shipment data from the first ACAS air carrier, United Parcel Service (UPS).

The ACAS team currently receives data from UPS, Federal Express (FedEx), Deutsche Post DHL (DHL), and TNT express air couriers on a voluntary, pilot program basis and is expanding the program to include additional air carriers and additional countries. Modeling the Importer Security Filing in the air environment, ACAS enhances air cargo security by obtaining air manifests in advance, thereby increasing the availability and volume of data on air cargo received.

### **Conduct Agriculture/Bioterrorism Cargo Screening**

The NTC supports all agriculture-related activities including tactical targeting, research, follow-up, reporting, analysis, coordination, and automated risk management, including all activities related to targeting and researching trade activities.

The NTC has experienced a significant increase in responsibilities since the Northwest Airlines incident, the attempted bombing in Times Square, and the October 28, 2010 attempt to ship explosive devices through express consignment air cargo from Yemen. After these events, CBP re-examined its passenger and cargo targeting strategy and as a result, re-engineered its operations with an increased emphasis on pre-departure targeting and interdiction without securing a change in the ability of the targeting centers to continually meet new requirements.

CBP requests 36 positions, 35 FTE, and \$34.860 million in FY 2013 for the Training PPA

- An increase of \$14,000 for the FY 2013 Pay Increase
- A decrease of -\$2.632 million for annualization of FY 2012 Field Operations positions to staff new ports of entry and to enhance operations
- A decrease of -\$356,000 for annualization of the FY 2012 National Targeting Center enhancement

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of Training and Development (OTD) leads and directs CBP’s training programs which are designed to meet the needs of a diverse and geographically dispersed workforce. These programs support Line of Business (LoB) 6, Mission Support. The Mission Support LoB includes activities that support the primary mission of CBP, which encompasses CBP’s training related activities. This includes the development and conduct of training sessions that are tailored to meet the specific needs of all attendees. OTD establishes standards for designing, developing, delivering, and evaluating training, and executes career development programs; basic and advanced training to all occupations; and supervisory, management, and executive development programs.

As CBP’s lead for directing all CBP training programs and for developing centralized leadership programs, OTD prepares employees to carry out the core missions of CBP, continuing to evolve to meet the needs of DHS. By working with all CBP components to develop and deliver mission critical training, OTD prepares employees to protect America’s frontline. OTD links to CBP’s strategic goals to meet the ever changing challenges faced in the performance of mission critical operations.

### **Field Operations Academy (FOA)**

The FOA is located at the Federal Law Enforcement Training Center (FLETC) in Glynco, GA. The Academy is responsible for the development and delivery of mission critical training across the agency. The FOA prepares CBP trainees to safeguard the American homeland at and beyond our borders. This academy trains CBP employees from the Office of Field Operations, Office of Air and Marine, and the Office of International Trade to protect the American public against terrorists and the instruments of terror. The FOA educates CBP trainees to enforce the laws of the U.S. while fostering our Nation's economic security through lawful international trade and travel to serve the American public with vigilance, integrity and professionalism. Over 6,300 CBP officers have graduated basic training since 2008 including over 600 students in FY 2011.

### **Advanced Training Center (ATC)**

The ATC is a maturing facility designed to serve the specialized training needs of CBP. Located in Harpers Ferry, West Virginia, the ATC provides a learning environment that simulates the CBP operating environment and provides firearms and intermediate force training, advanced, and leadership training to CBP employees throughout the agency. The ATC complex includes facilities that are identical to the land, sea and air ports of entry, as well as open areas and water features found along the border between the ports of entry. Additionally, the new Global Borders College is housed at the ATC and is the critical mode for all advanced training and education for CBP leaders to develop the critical skills of strategic thinking, planning, ethical decision making and leadership required to defend our nation's borders. There are 21 total courses offered at ATC; these include Outbound Enforcement Training, Intermediate Use of Firearms, Supervisory Leadership Training, Crisis Action Team Training and Incident Command System as well as dozens of others. Due to the increase in advanced operational training requirements and other critical programs, student population has steadily increased since its first full year of training in 2006.

### **CBP Canine Program**

The CBP Canine Program is the largest civilian law enforcement canine training program in the country. With locations in El Paso, Texas and Front Royal, Virginia, CBP Canine furnishes certified training programs based upon internationally recognized standards. The Canine Center provides training and certification to CBP Canine Instructors, Canine Handlers, and Detection, Search & Rescue, and other Special Purpose Canines. It also provides training for various other local, state and Federal agencies based on requests and availability. These valuable canine resources enhance the agency's ability to combat terrorism, interdict narcotics, and other prohibited contraband while facilitating and processing legitimate trade and travel within the core operational processes of CBP. CBP Canine also continues to support the Merida Initiative providing much needed canine training support to the Government of Mexico (GoM).

### **OTD/Use of Force Policy Division (OTD/UFPD)**

The OTD/UFPD is responsible for the development, articulation and implementation of CBP use of force policy and related equipment. As the CBP lead for use of force and threat management policy, UFPD seeks to research, evaluate, and procure the best possible equipment while providing comprehensive asset and resource management for tactical equipment and body armor. The OTD/UFPD develops appropriate controls, standards, training, best practices and policies in order to enhance the safety and performance of CBP's uniformed law enforcement officers and agents.

### **OTD/Leadership and Organization Development Division (OTD/LODD)**

The OTD/LODD provides CBP leadership with the training, tools, and strategies to develop supervisory workforce in their current jobs and to prepare for future positions. As part of a structured and progressive leadership development strategy, LODD designs, develops, delivers, and evaluates training and development activities for CBP supervisors, managers, and executives supporting career development and succession management. OTD/LODD provides advanced leadership, supervisory, and management courses to meet organization, occupation, and individual needs including formal training, on-the-job developmental assignments, rotational opportunities, self-study and mentoring activities.

### **OTD/Operations Division (OTD/OPS)**

The OTD/OPS manages essential mission support activities to include budget, human capital, logistics and national programs, including the CBP Tuition Assistance Program and New Employee Orientation Program, in support of the CBP mission. The Division exercises budget authority for the National Training Plan and is responsible for the overall financial health of OTD.

### **OTD/Training Production and Standards Division (OTD/TPSD)**

The OTD/TPSD establishes and enforces a standardized instructional systems development process for delivering training throughout CBP. In coordination with all CBP offices, OTD develops a variety of training courses and curriculum designed to meet the needs of the agency while adhering to industry instructional design standards. The establishment and enforcement of standardized instructional systems and instructor development is crucial to accreditation efforts focused on ensuring OTD adheres to federal standards, regulations and statutes. These efforts are vital to ensure the agency's training programs are transparent, accountable and legally defensible. Presently, OTD has twelve programs accredited with five best practices for good governance. Overall training modes include instructor-led, on-the-job programs, distance learning through CBP's Virtual Learning Center (VLC) and tracking through the new Training Records and Enrollment Network (TRAEN) II system. The VLC provides a technological answer to distance learning.

### **Other Training**

OTD sponsors other basic and specialized training programs for various occupations within CBP. Examples of these types of training include Continuing Legal Education and Continuing Professional Education courses, Equal Opportunity Training for Counselors and Investigators, First Responder Course, and Supervisor Safety Training among dozens of others. These training programs are funded through the NTP but are often coordinated with other CBP organizations for scheduling, facilities, instructors, etc.

Total Change 2012 to 2013	(29)*	(29)*	20,846

\* Decrease is due to efficiencies realized through the reduction of support personnel. It does not reduce frontline personnel.

CBP requests 23,272 positions, 23,277 FTE, and \$3,551.840 million in FY 2013 for the Border Security and Control PPA to support Southwest border, Northern border, and Coastal borders within Line of Business (LOB) 1, Securing America's Borders and to support Intelligence and Targeting, LOB 4 and Mission Enterprise Business Services, LOB 5. The FY 2013 funding is primarily for compensation and support costs for Border Patrol Agents and operational support personnel. The request includes:

- An increase of \$12.047 million for the FY 2013 Pay Increase
- A decrease of -\$14.130 million for a transfer to centralize utilities management
- An increase of \$19.377 million for annualization of the FY10 Border Security Supplemental
- An increase of \$1.235 million for annualization of FY 2010 Combating Southbound
- An increase of \$38.091 million for an increase in pay requirements due to lower Border Patrol Agent attrition
- An increase of \$8.0 million for an enhancement to ICE Medical Detention Support
- A decrease of -\$6.983 million for a DHS Management efficiency regarding OFPP-Directed Purchasing Savings
- A decrease of -\$9.589 million for consolidation of rent into the Rent PPA
- A decrease of -\$12.258 million for a reduction to CBP's Transportation Program
- A decrease of -\$1.300 million for a reduction for deactivation of 9 inland Border Patrol stations
- A decrease of -\$3.892 million for a DHS Management Efficiency regarding TDY and Travel

- A decrease of -\$1.750 million for a DHS Management efficiency regarding Strategic Sourcing Initiatives
- A decrease of -\$1.242 million for a DHS Management Efficiency
- A decrease of -\$4.048 million for a reduction to field support staff
- A decrease of -\$1.162 million for a DHS Management efficiency regarding PCS Costs
- A decrease of -\$1.550 million for a reduction to CBP fleet acquisition and management

**CURRENT SERVICES PROGRAM DESCRIPTION:**

In FY 2012, CBP will implement a new Border Patrol approach focused on mission integration, information, intelligence, and rapid response capabilities in performing the mission of Securing America’s Borders. This new strategy involves the Border Patrol moving from a resource-dependent approach to border security to a risk- based approach that enables rapid response to areas of greatest risk in the immediate border area. The Border Patrol will deploy its capabilities to align with the threats along the border. This is a continuous process as threats adapt and change in response to Border Patrol operations.

Border Security and Control	FY 2013 Current Svc. (000)
BPA Salary & Benefits	\$3,071,896
Other Salary & Benefits	183,966
Non-personnel Costs	307,137
Total	\$3,562,996

CBP plans to maintain a staffing level of 21,370 Border Patrol agents during the fiscal year, consistent with the staffing requested in FY 2012. CBP also plans to continue to maintain its current inventory of permanent tactical infrastructure and technology deployments on the border in FY 2012 and FY 2013. In addition, CBP will continue to deploy resources, such as sensors and cameras, to increase the Border Patrol’s ability to detect illegal entries and to provide greater situational awareness.

The Tucson Sector’s area of operation, which covers most of the state of Arizona’s cross border illicit activity, is the most active of 20 Border Patrol Sectors. Agents assigned to the Tucson Sector seized more than 1,039,000 pounds of marijuana fiscal year 2011. This represents 41 percent of the marijuana seized nationwide. Additionally, agents assigned to the Tucson Sector arrested more than 123,000 illegal aliens, which accounts for more than 36 percent of all Border Patrol apprehensions.

Tucson Sector made substantial progress in enhancing border security during fiscal year 2011. Sector-wide apprehensions decreased by more than 40% and marijuana seizures increased by 2% as compared to FY 2010. Tucson’s share of apprehensions along the southwest border, compared to the rest of the Southwest border, decreased from 48% to 40% over the same period.

CBP also uses the Alliance to Combat Transnational Threats (ACTT), Surge Operations, Forward Operating Bases (FOBs), and Traffic Checkpoints to secure the border. These are described below:

### **Alliance to Combat Transnational Threats (ACTT)**

In September 2009, the Border Patrol initiated ACTT as the next stage of border operations along the Arizona border. ACTT utilizes a collaborative, cooperative enforcement approach that leverages the capabilities and resources of DHS agencies in partnership with other federal agencies, and state, local, and tribal governments. The purpose of this initiative is to increase and sustain the certainty of arrest of those who enter illegally at and between the ports of entry, and to reduce smuggling, and crimes associated with smuggling, in the state of Arizona.

ACTT operations have targeted the Arizona/Sonora border area with the objective to deny criminal organizations from operating along approximately 80 miles of the Arizona border. The enforcement strategy of the ACTT is a five-faceted approach based on collaboration, intelligence coordination, unity of effort, prioritized focus and sustained efforts. Additional agents, resources, and technology have been deployed into this focus area thus denying criminal organizations the use of terrain, infrastructure, and routes of ingress and egress away from the international border.

In July 2010, ACTT efforts began along the El Paso/Ciudad Juarez border area. The efforts included coordinating law enforcement efforts with intelligence sharing towards disrupting transnational criminal organizations' movement of money, arms, people and the location of their safe havens. In addition, the Border Patrol increased coordinated efforts with the Government of Mexico as a unified response against these criminal organizations. ACTT efforts in El Paso/Ciudad Juarez will continue through FY 2012 and into FY 2013.

In FY2012, 63 agents remain detailed to ACTT in Arizona: 40 agents are on non-lodging per diem at Operation Border Jaguar, three agents are on full lodging and per diem, and 20 El Paso Sector Agents are deploying from the Lordsburg Station at no additional cost. As Tucson Sector progresses through FY 2012 and into FY 2013, it is anticipated that a reduction of detailed assets will occur as permanent staffing continues to replace detailed positions. ACTT will continue as a collaborative enforcement effort at a Sector level. No new funds will be required in FY 2013. Tucson Sector realized a 42% decrease in apprehensions in FY 2011 as compared to FY 2010. Narcotic interdiction efforts in Tucson Sector have resulted in a 1% increase in marijuana seizures, for a total of 1,039,443 pounds (approximately 519.7 tons) in FY 2011.

### **Surge Operations**

The Border Patrol authorizes the implementation of surge operations to gain and maintain security of the border through improved enforcement. The Border Patrol's strategy for implementing surge operations across the Southwest border is based on threats, risks, vulnerabilities, and the resources of partner agencies. These operations increase the probability of preventing terrorists and their weapons from illegally entering the U.S. between the POEs. They also assist in the reduction of crime in border communities. Surge operations are implemented to proactively address intelligence, seasonal migration, and smuggling trends. Unlike ACTT operations, which encompass a large area and are sustained indefinitely, surge operations are short term and address small areas. They involve short term deployments of additional resources and technology to target areas that require, or may potentially require, a heightened presence based upon risk assessment.

### **Forward Operating Bases (FOBs)**

FOBs are permanent facilities in forward or remote locations used to sustain tactical operations. The purpose of these facilities is to reduce reaction time and provide space capable of housing agents on a continuous basis (24-hour capability). Use of FOBs began to address remote crossing points that have historically been very difficult for agents to patrol due to the vast distances and the time involved to access these areas. FOBs have proven to be very beneficial to the detection and deterrence of illegal entries in the areas in which they have been deployed and are now utilized in areas wherever the Border Patrol has a need to extend its reach.

The use of FOBs directly supports the Border Patrol's mission of gaining, maintaining, and expanding effective control of the Nation's borders. Although there are many approved FOB locations, there are currently 8 operational FOBs situated along the border. As the Border Patrol continues to gain control of the border, illegal migration activities and the tactics of criminal organizations shift in an attempt to identify and exploit vulnerabilities in border security measures, particularly in the more remote areas of the border. As a result, our tactics must also shift. Strategically placed FOBs afford a distinct advantage in that they provide a cost effective, secure staging facility that allows agents to be forward deployed in close proximity to the border – thereby improving Border Patrol's capability to rapidly respond to and counter these shifts in illicit cross-border traffic. The FOBs raise effectiveness levels and their presence has been successful in lowering response times and disrupting smuggling activity in remote areas. In FY 2011, there was a 27% decrease in apprehensions on the Southwest Border and an 18% decrease on the Northern Border. This represents a 27% reduction from FY 2010 nationwide. FOBs continue to be extremely useful in addressing operational overlaps that occur in locations where two sectors' and/or stations' geographic boundaries meet.

### **Traffic Checkpoints**

The Border Patrol is tasked with securing the Nation's borders between the POEs using a multi-tiered enforcement strategy. A major component of this strategy includes the strategic placement of checkpoints in tactical locations that contributes significantly to gaining effective security of the Nation's borders.

Traffic checkpoints are critical components of the Border Patrol's enforcement-in-depth border security strategy. There are currently 34 permanent traffic checkpoints along the border. This strategy was developed to maximize resources and to increase the certainty of arrest of anyone posing a threat to the United States. Border Patrol checkpoints are strategically located on routes of egress leading away from the border, thus, greatly increasing the Border Patrol's detection and interdiction capabilities.

A complete border security model that includes enforcement-in-depth creates an environment that denies, degrades and disrupts the criminal elements' ability to exploit the infrastructure needed to conduct operations.

The checkpoints' impact forces the criminal element to take risks that would otherwise not exist, thus raising their cost of doing business. In locations where checkpoint operations have been established, criminal organizations cannot engage in illegal activity in the border areas and then freely egress to their destination. They must instead utilize other tactics, such as using secondary staging areas and

circumvention routes, which disrupt and degrade their operations and give the Border Patrol additional time and distance to detect, deter, and interdict them.

Border Patrol is successfully implementing this strategy in a variety of locations, such as the Interstate 19 (I-19) corridor, the major route of egress from the Nogales, Arizona area. As a result, the majority of those engaged in illegal cross-border activity that takes place in the Nogales area seeks to use the corridor in an effort to exit the border area. The strategic value of a permanent checkpoint on I-19 cannot be overstated. A continuous checkpoint operation on I-19 creates an enforcement profile that denies, degrades, disrupts, and deters the criminal element from utilizing I-19 as a route of egress.

As demonstrated by the I-19 checkpoint, the overall effect of enforcement-in-depth, to include checkpoints, deters illegal activity and reduces cross-border traffic and the crime associated with it. Sustained checkpoint operations have shown to not only reduce crime in adjacent communities, but contribute significantly to an overall reduction in cross-border criminal activity in the areas south of the checkpoints.

Safe, efficient, and effective enforcement operations along the border and routes of egress, to include effective checkpoint operations, are essential to a complete enforcement strategy which will lead to increased border security and an improved quality of life in border communities.

Traffic checkpoints directly support the Southwest Border and Northern Border subprograms of Securing America's Borders LOB 1.

### **Operation Streamline**

Operation Streamline is a zero-tolerance, prosecution-based deterrence initiative that attaches a penalty to the act of illegally entering the U.S. Operation Streamline was envisioned to address three components: arrest, prosecution, and removal. Under the concept of the Operation, the sector's Chief Patrol agent designates a specific geographic area as a zero-tolerance zone and focuses his resources to ensure a high probability of apprehension and criminal prosecution.

With the cooperation of the U.S. Attorney's Office and the U.S. Marshals Service, many undocumented aliens apprehended within the designated geographic location are criminally prosecuted for their illegal entry under 8 USC 1325. The deterrent effect of this program has had pronounced results on the number of aliens attempting illegal entry/re-entry.

Performance related data specific to Streamline is collected as part of the Consequence Delivery System (CDS) process, includes recidivism, and is combined with the other 15 factors in the overall analysis. During the 1st Quarter of FY 2012, the Southwest Border posted an overall recidivism rate of 11 percent, down from a rate of 15 percent for the same time period in FY 2011. Unique subjects that received a criminal consequence through the use of Streamline, during this time period in FY 2012, had a recidivism rate of 5 percent. This result can vary depending on the classification of alien and the sector in which Streamline was applied.

Operation Streamline is one of many consequences evaluated by the Consequence Delivery System. Each consequence available within each sector is evaluated using fifteen factors covering cost, schedule, and performance. No single factor determines the overall effectiveness and efficiency of a

consequence. In most cases, multiple consequences (administrative, criminal and/or programmatic) are applied in combination to each alien apprehended.

By reducing the volume of illegal entries, the Border Patrol has greater flexibility to focus resources on apprehending terrorists, terrorist weapons, and smugglers of humans, drugs, and other contraband illegally entering the U.S. Operation Streamline has proven to be beneficial and is a key component to achieving significant ground and security of the border.

### **Special Operations Group (SOG)**

The Border Patrol Special Operations Group (SOG) is comprised of two operational components Border Patrol Search Tactical and Rescue (BORSTAR) and Border Patrol Tactical Unit (BORTAC) and robust support and intelligence sections. SOG provides DHS, CBP and the U.S. Border Patrol with specially trained and equipped tactical teams capable of rapid response to emergent and/or unusual law enforcement situations requiring special tactics and techniques, search, rescue and medical response capabilities via land, air and sea.

In 2007, the Border Patrol established, and continues to build upon, the SOG Headquarters element with full deployment capability on Biggs Army Airfield (AAF) in El Paso, Texas. Agents assigned to this office are routinely deployed throughout the U.S. in support of the Border Patrol National Strategy and are at the ready to address emergency support functions (ESFs) for national level incidents, as outlined in the National Response Framework. The SOG facility has classrooms, a new rappel tower, an obstacle course, and a live fire multi-building training complex located at McGregor Range, New Mexico.

OBP SOG, in coordination with OIOC, has established Law Enforcement Technical Collection Centers (LETCS) to improve intelligence collection and dissemination capabilities among the 20 sectors that comprise the field headquarters element. By establishing best practices, the methodologies used to collect, analyze, and disseminate actionable intelligence will be streamlined and standardized.

The possibility of widespread bio-terrorism and other pandemic perils remains a paramount concern for CBP and other federal, state, and municipal entities. Border Patrol is a major participant/facilitator in the CBP Continuity of Operations Plan (COOP) and will continue to build on established partnerships in an effort to rapidly respond and mitigate the impact of a catastrophic incident, be it an act of terrorism or a natural disaster.

### **Border Patrol Tactical Unit**

The Border Patrol Tactical Unit is a core operational component of the Office of Border Patrol Special Operations Group. BORTAC provides a tactical rapid response capability, at a national level, to resolve emergent, high-risk and unusual law enforcement situations by employing specialized skills, weapons and tactics. BORTAC supports the National Border Patrol Strategy by matching capabilities to emerging threats, through planning, training and tactical deployment, increasing the Border Patrol's ability to respond to specific terrorist and criminal threats and incidents, and supporting the traditional Border Patrol mission.

### **Border Patrol Search Trauma and Rescue Unit**

The Border Patrol Search, Trauma, and Rescue Unit (BORSTAR) is another core operational component of the Border Patrol SOG. In support of the Border Patrol National Strategy, the BORSTAR Unit provides rapid response law enforcement, search, rescue, and tactical medical capabilities for the U.S. Border Patrol. BORSTAR plans, prepares, and trains to counteract and diffuse imminent threats to national security. Additionally, BORSTAR provides mutual assistance to local, county, state, tribal, and Federal entities by responding to enforcement and search and rescue requirements, acts of terrorism, potential terrorism, and natural disasters throughout the United States.

### **Mobile Response Team (MRT)**

The Mobile Response Team program provides a national group of organized, trained, and equipped Border Patrol agents capable of rapid movement to regional and national incidents, and events in support of priority CBP operations as well as respond to intelligence driven targets and shifts in local cross-border criminal activity as deemed necessary by the Border Patrol Chief Patrol agents. In support of the Border Patrol National Strategy for enhanced mobility, the MRT provides a flexible and enhanced tiered-response capability to counter the emerging and evolving threats along the challenging operational areas of our Nation's borders.

### **CBP Transportation Program**

In FY 2011, the CBP Transportation Program administered a services contract which provides approximately one million hours of support to CBP for secure transport and guarding of illegal aliens apprehended along the Southwest border. The contract provides a transport fleet of approximately 150 vehicles (buses and vans) specially equipped to provide secure transport of detainees and over 600 certified Transportation Officers to guard detainees. The contract frees up officers and agents of transport and guard functions and increases their availability to conduct higher-priority law enforcement and inherently governmental functions. The Program is preparing a new procurement to contract for transport and guard services in FY 2012 and beyond. Analysis has shown that a commercial service contract is 35% less expensive than using agents and officers to perform non-inherently governmental guard and transport.

The Border Patrol also establishes and maintains effective partnerships, formal and informal, with other federal, state and local law enforcement agencies, as well as other federal agencies that have an interest in the border regions. Further, the Border Patrol maintains international partnerships to enhance border security primarily with agencies of the governments of Mexico and Canada. A number of these partnerships are described below.

### **Border Patrol International Liaison Unit (ILU)**

The ILU creates and maintains positive working relationships and fosters alliances with foreign counterparts in order to increase border security. The alliances established will maintain open communications and mutual respect with and between foreign and domestic law enforcement counterparts. The ILU builds partnerships and enhances border security awareness in support of the National Border Patrol Strategy.

The ILU also paved the way to programs like the Operation against Smugglers Initiative on Safety and Security (OASISS). The OASISS program was developed to address the increasing amount of alien smugglers across the Southwest border. The U.S. and Mexico established a bilateral, standardized

prosecution program in 2005. The program allows for alien smugglers apprehended in the U.S. to be prosecuted by the Government of Mexico. This program is very effective in areas along the Southwest border that are affected by guidelines that make it difficult to prosecute certain alien smuggling cases. OASISS has proven to be an invaluable tool to the Border Patrol. It also rewards the efforts of the agents by giving them another tool to be able to put criminals behind bars.

The liaison efforts with Mexican authorities that have occurred and continue to take place along the Southwest border have essentially bridged the communication gap between the U.S. and Mexico. This is an extraordinary accomplishment when one considers the economic vitality of the region and the political sensitivities between the two countries.

### **Integrated Border Enforcement Teams (IBET)**

There are fifteen IBETs in twenty-four locations working in land, air and marine environments between the ports of entry along the United States/Canada international border. IBETs are traditionally composed of the Royal Canadian Mounted Police (RCMP), Canada Border Services Agency (CBSA), U.S. Border Patrol, U.S. Coast Guard and other federal, state and local law enforcement agencies. These multi-agency intelligence driven teams augment the integrity and security of the border by identifying, investigating and interdicting individuals and organizations that pose a threat to the security of both nations.

The IBET program is governed by four core principles:

- The use of an integrated, cooperative and strategic approach to enable the establishment of joint goals and priorities
- A focus on continuous improvement through the effective and efficient uses of human resources, technology and accountability frameworks
- Subject to applicable laws, regulations, policies and agreements, the facilitation of open communication and the efficient development, analysis and exchange of information
- The development of strong working relationships at the local, regional, national and International levels

Through continuous collaboration and coordination the IBETs are able to synchronize operations between countries to expand the borders.

### **Border Patrol National Native American Program**

The mission of the Border Patrol National Native American Program is to facilitate new partnerships, improve relationships, and increase trust throughout the Native American Indian tribes that have a nexus to the U.S. border. The program champions partnerships between tribal law enforcement, various Native American organizations, and the Border Patrol to support the national strategy. The Border Patrol National Native American Program is operational in 12 of the Border Patrol sectors. The program acts as a conduit between the Border Patrol and tribal, local, state and federal law enforcement agencies, as well as tribal councils located along both the Southwest and Northern borders.

The program was designed to support ongoing enforcement operations within the respective agencies, while enhancing the liaison between them. As the relationship solidified, contact and responses to illicit activity along the borders has increased, allowing for joint law enforcement support for both Border Patrol and tribal law enforcement. Routine communication and liaison between some sectors

and tribal council officials has led to enhancing the security and safety of the agents who are working in dangerous areas along the border. Through the Border Patrol National Native American Program, information-sharing efforts have allowed the Border Patrol sectors to conduct All-Terrain Vehicle training, search and rescue training, advanced four-wheel-drive training, and vehicle stops.

The Border Patrol National Native American Program is working to standardize policies and procedures and is proactively developing performance measures for the program to evaluate and measure the effectiveness of its initiatives.

This program supports the Policy and Planning subprogram of the Enterprise Business Services LOB 5.

### **Borderlands Management Task Forces (BMTF)**

These task forces were created to facilitate an intergovernmental forum for cooperative problem-solving on common issues related to the international border. The primary mission is to address border security, human safety, and natural and cultural resource protection through shared resources, information, communication, problem-solving, standardization, and training. The goals of the BMTF are the following:

- Create a positive, intergovernmental working relationship and foster support among agencies charged with border responsibilities;
- Create mutually beneficial solutions to resource management issues within the border area;
- Provide expertise, experience, and information to address common border issues; and
- Educate our agencies and interested parties about border issues and recommendations for the implementation of possible solutions.

An integral part of the BMTF is the participation of the Sector Public Lands Liaison agents (PLLA).

The PLLA works to foster better communication, increase the interagency understanding of respective mission objectives and priorities, and serve as a central point of contact within the Border Patrol to facilitate the successful resolution of environmental issues at the local level.

### **Border Community Liaison (BCL) Program**

The purpose of this program is to facilitate the national expansion of relationships and interactions between government, law enforcement, and non-government agencies, border community partners, and Border Patrol offices (i.e., sectors and the Border Patrol Academy (BPA)). The Border Community Liaison Program provides stakeholders with a designated point of contact at Border Patrol offices and encourages communication between the Border Patrol and its border-community partners.

### **Conclusion**

In FY 2013, the Border Patrol will continue to further its mission by using a variety of programs and initiatives to support strategic objectives. A major future objective of the Border Patrol is to ensure that its workforce is highly mobile so that it can rapidly adjust to changes in the border security environment. The Border Patrol will continue to reevaluate its existing programs and planned initiatives as the threats and vulnerabilities to border security change in response to newly deployed border enforcement resources.

The Border Patrol is committed to continuing the southbound land border enforcement efforts to combat the smuggling of firearms and currency to Mexico.

CBP requests 371 positions, 369 FTE, and \$74.110 million in FY 2013 for the Training PPA

- A decrease of -\$14.671 million for a reduction to academy training and operations
- An increase of \$171,000 for the FY 2013 Pay Increase

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of Training and Development (OTD) leads and directs CBP’s training programs which are designed to meet the needs of a diverse and geographically dispersed workforce. These programs support Line of Business (LoB) 6, Mission Support. The Mission Support LoB includes activities that support the primary mission of CBP, which encompasses CBP’s training related activities. This includes the development and conduct of training sessions that are tailored to meet the specific needs of all attendees. OTD establishes standards for designing, developing, delivering, and evaluating training, and executes career development programs; basic and advanced training to all occupations; and supervisory, management, and executive development programs.

As CBP’s lead for directing all CBP training programs and for developing centralized leadership programs, OTD prepares employees to carry out the core missions of CBP, continuing to evolve to meet the needs of DHS. By working with all CBP components to develop and deliver mission critical training, OTD prepares employees to protect America’s frontline. OTD links to CBP’s strategic goals to meet the ever changing challenges faced in the performance of mission critical operations.

### **Border Patrol Academy (BPA)**

The BPA in Artesia, NM prepares CBP trainees to safeguard the American homeland by providing training for Office of Border Patrol personnel, ultimately producing agents who are prepared to serve. The BPA provides Border Patrol agents with the training necessary to enforce the laws of the U.S. and to serve the American public with vigilance, integrity and professionalism. All newly hired BPA interns are required to complete a 58-day basic training program which includes instruction in Law/Operations, Driver Training, Physical Techniques and Firearms. Interns that do not pass a Spanish examination are required to attend a 40-day Language Training Program immediately following successful completion of the 58-day program. Over 9,000 BPA interns have graduated basic training since 2008 including 1,250 in FY 2010 and nearly 1,500 in FY 2011. For FY 2012, 1,200 new Border Patrol Agents are projected to attend basic training.

CBP requests 1874 positions, 1870 FTE, and \$280.819 million in FY 2013 for the Air & Marine Salaries and Benefits PPA

- A decrease of -\$139,000 for a DHS Management efficiency regarding OFPP-Directed Purchasing Savings
- A decrease of -\$225,000 for a DHS Management efficiency regarding PCS Costs
- A decrease of -\$40,000 for a DHS Management Efficiency regarding TDY and Travel
- A decrease of -\$7.030 million for a reduction to Air and Marine mission and field support staff
- A decrease of -\$24,000 for a DHS Management Efficiency
- An increase of \$1.056 million for the FY 2013 Pay Increase
- A decrease of -\$231,000 for a DHS Management Efficiency regarding overtime
- A decrease of -\$30,000 for a DHS Management efficiency regarding Strategic Sourcing Initiatives
- A decrease of -\$419,000 for a reduction to field support staff

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of Air and Marine (OAM) supports the Southwest border, Northern border, Coastal, and Source and Transit Zone subprograms within the Securing America's Borders Line of Business. This LOB reflects CBP's core mission area of securing the border and preventing contraband, illegal migrants, terrorists and terrorist weapons from entering the U.S., and it includes the people that perform the mission as well as air platforms, marine assets, technology, and equipment that they use. The subprograms that comprise the LOB are organized geographically, given the distinct threat environments of each.

OAM helps secure the borders against terrorists, acts of terrorism, drug smuggling, and other illegal activity by operating air and marine branches at strategic locations along the borders. These branches house an integrated and coordinated air and marine force of personnel, including Air and Marine Interdiction agents who patrol the skies, oceans, lakes, and rivers in some of the most demanding situations. These personnel also conduct covert and overt operations to prevent illegal entry of weapons of terror, interdict illegal narcotics, and prevent the illegal entry of undocumented aliens. The agents deploy to natural disaster areas to assist in nighttime operations and to fly low-level over adverse terrain. They also provide airspace security over national events including the Presidential Inauguration.

See the table below for a summary of OAM on-board staffing by major occupation and location:

<b>OAM On-Board Staffing by Major Occupation and Location as of Pay Period Ending December 26, 2011</b>

CBP requests 351 positions, 338 FTE, and \$261.523 million in FY 2013 for the U.S. VISIT PPA

- An increase of \$261.523 million for a transfer of U.S. VISIT to CBP and the sustainment of U.S. VISIT mission and mission support capabilities

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The FY 2013 budget requests the transition of the United States Visitor and Immigrant Status Indicator Technology (US-VISIT) Program from the National Protection and Programs Directorate (NPPD) to CBP and ICE. CBP would assume responsibility for the core US-VISIT operations and the management of the biometric and biographic information storage and matching and watchlist management services, and ICE will assume responsibility of the US-VISIT overstay analysis services. CBP is the largest user of US-VISIT systems; using them to help determine admissibility of foreign nationals arriving at all U.S. ports of entry (POEs) and for processing aliens entering the U.S. illegally between the POEs. Currently, CBP operates numerous screening and targeting systems, supporting more than 70,000 users from over 20 Federal agencies that are responsible for a wide range of programs that rely on CBP information and systems to determine benefits, process travelers, inform investigations, support case management, and enhance intelligence capabilities. The US-VISIT systems will complement the CBP systems by adding the biometric identification and screening capabilities which are also used across and beyond DHS. While ICE will take the overstay mission, CBP and ICE will collaborate on system support for the overstay mission.

US-VISIT provides Federal staffing and other mission support activities, such as systems operations and maintenance, identity screening, fingerprint examinations, and managing capability development

projects. In addition, US-VISIT covers mission support that includes strategic planning, budgeting, acquisition facilities, logistics, and other support services. The demand for US-VISIT services continues to grow along with the need for the US-VISIT workforce to deliver these services. Over the last four fiscal years, US-VISIT has converted contractor positions into Federal staff positions in order to achieve the combined goals of promoting long-term continuity and cost efficiency.

DHS will identify potential operational and cost efficiencies through the transition of US-VISIT to CBP and ICE. This includes prioritizing transition initiatives that focus on increases in efficiency and effectiveness within mission support and “corporate” functions such as logistics and human resources to include information technology. The allocation of budget authority and responsibilities proposed for FY 2013 is based on preliminary planning, and will be refined as the transition plan is implemented, business processes are linked, and means for more efficiently conducting screening operations are achieved. Adjustments will be made through the transition as CBP and ICE coordinate to propose operational efficiencies in the fiscal years 2014-2018 timeframe and seek to achieve the mission in innovative and less costly ways.

This PPA also contains the supportive services of the Working Capital Fund (WCF) that includes rent expenses within the National Capital Region, acquisition and procurement support, financial management operations, human capital services, and logistical capabilities. In addition, the WCF provides these resources for expenses related to mission and mission support capabilities.

### **Systems Operations and Maintenance**

US-VISIT operates and maintains the Automated Biometric Identification System (IDENT) and the Arrival and Departure Information System (ADIS) systems, by providing essential biometric and biographic data to US-VISIT customers in a reliable and timely manner. Systems O&M is critical to CBP, the Department of Defense (DOD), DOS, DOJ, and to the law enforcement and intelligence communities.

### **Identity and Screening Services**

US-VISIT is the single DHS source for providing biometric identity and screening services support. US-VISIT meets mission requirements through efforts in three areas: (1) positively confirming biometric identity through IDENT, supplemented with fingerprint analyses conducted by examiners; (2) coordinating identity analysis and operational activities to improve the accuracy and usefulness of US-VISIT-maintained identities; and (3) providing technical assistance to foreign government authorities engaged in developing biometric capabilities to secure and manage their border and immigration management programs.

US-VISIT solidified business processes with the FBI’s Terrorist Screening Center (TSC) to manually promote persons identified by the TSC to the watchlist until an automated biometric process is deployed. US-VISIT analysts also manually provided biometrics of known and suspected terrorists (KSTs) to the National Counterterrorism Center (NCTC) through the DHS Office of Intelligence and Analysis watchlisting section.

In FY 2011, US-VISIT information and technical assistance expanded existing partnerships with the United Kingdom, Australia, and Canada, and forged new partnerships with New Zealand, India, South Africa, the Republic of Korea, Germany, Spain, Greece, and the Dominican Republic to support the

implementation of biometrics in border and immigration control. US-VISIT continued to provide in-depth, onsite technical assistance to three strategic partners: the United Kingdom Border Agency (UKBA), Citizenship and Immigration Canada (CIC), and Australia's Department of Immigration and Citizenship (DIAC). US-VISIT's three technical experts supported these agencies to develop biometric identity-screening capabilities.

US-VISIT engaged VWP member countries that have signed Preventing and Combating Serious Crime (PCSC) agreements with DHS and DOJ to coordinate the technical implementation of the agreements. Working with the Ministry of the Interior of Germany and partners at ICE and the FBI, US-VISIT developed a technical standard for implementing PCSC agreements with other VWP countries. US-VISIT initiated discussions with Spain and the Republic of Korea for implementing PCSC agreements.

US-VISIT information sharing and technical assistance will continue to lead US-VISIT's biometric standards development efforts to improve data sharing and interoperability between DHS, DOD, DOJ, DOS, and foreign partners. US-VISIT also will provide four secondments during FY 2013 to Australia, Canada, New Zealand, and the UK.

### **Systems Engineering**

Systems Engineering represents a discipline critical to effective and efficient operations across the systems life cycle covering systems acquisition, development, deployment and operations and maintenance. In FY 2012, Systems Engineering is focusing on server virtualization as a method of running multiple independent virtual operating systems on a single physical computer to maximize resources while reducing hardware costs. Virtualization will save resources by lowering total cost of ownership. In FY 2013, Systems Engineering plans to evaluate the virtualization prototype and adjust the US-VISIT plan as necessary. Systems Engineering also plans to begin full implementation of server virtualization.

## IV. Program Justification Changes

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and Expenses  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 1:** Enhancement for Automated Targeting Systems O&M  
PPA: Systems for Targeting  
Program Increase: Positions 0, FTE 0, Dollars \$31,000

### Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							34	32	48,406
Program Increase							-	-	31,000
<b>Total Request</b>	<b>39</b>	<b>36</b>	<b>32,376</b>	<b>34</b>	<b>32</b>	<b>41,400</b>	<b>34</b>	<b>32</b>	<b>79,406</b>

### Description of Item

The requested increase of \$31.0 million addresses resource requirements that will support the maintenance of, enhancements and improvements to the ATS, which supports the overall operations and maintenance (O&M) of the six modules that comprise ATS.

ATS is a web-based enforcement and decision support tool that that is the cornerstone for all of CBP's targeting efforts. ATS incorporates intelligence information and technologies to target suspect inbound and outbound shipments for examinations and passengers for inspection. ATS allows CBP officers to focus their efforts on cargo shipments and passengers that most warrant further attention. ATS standardizes names, addresses, ship names, and similar data so these data elements can be more easily associated with other business data to form a more complete picture of a passenger, import, or export in context with previous behavior of the parties involved. Every passenger and shipment processed through ATS is subjected to a real-time risk evaluation. Risk assessment strategies are multi-tiered in their approach and are founded on complex statistical studies, data analysis, and rules based on knowledge engineering.

## **Justification**

The performance and operation of ATS is critical to the successful performance of CBP missions. This request will maintain current service levels and ensure sustained operations and performance of ATS and its sub-systems.

The nature of the targeting support that ATS provides requires a system that responds to advances in targeting techniques and methodologies, one able to incorporate new government data sources to improve targeting capability, and capable of continued improvement to process the electronic data related to the ever-increasing number of people and goods entering the United States.

ATS requires resources to expand targeting coverage to more completely analyze the volume of passengers and cargo across all modes of transportation and to make improvements to its targeting capabilities, coordinate intelligence, support architectural improvements to the service delivered to CBP officers in the field, and to move towards true 24/7 system availability

The requested increase will fund the following:

- \$2.9M – Time-sensitive technical requirements, including daily rules updates and ad-hoc data requests;
- \$3.0M – Continued technical support for the maintenance of the Targeting Framework;
- \$4.0M – Advanced targeting capabilities to include Entity Resolution, Predictive Modeling and Visualization, and Intelligence Driven Targeting and Machine Learning;
- \$6.0M – ATS hardware and software upgrades including high availability appliances, infrastructure and circuits technology refresh, data center infrastructure refresh;
- \$4.0M – Cargo targeting methodology refresh including capture of findings information and support to outbound targeting;
- \$4.0M – Failover/Disaster recovery of the ATS modules.
- \$7.1M – Other critical costs associated with CBP Targeting Enterprise

## **Impact on Performance (Relationship of Increase to Strategic Goals)**

Without this additional funding to O&M activities, ATS becomes an at-risk system leading to:

- ATS 24/7 operations would be unsustainable and CBP may suffer losses to critical capabilities and targeting services that support all of the agency operational missions.
- Inability to provide daily Rule Updates and Weekly Rule Releases - in response to emerging terror threats.
- Inability to complete Targeting System Upgrades to support High Availability Appliances, Infrastructure Upgrades, Data Center Costs in support of the Data Center build out, and to continue to modernize and improve cargo targeting capabilities. This is essential to realize improvements to system resiliency and mitigate increased risks of system outages.

- Delayed support to Rapid Response Ad-Hoc Data Requests - staff receives several of these requests a week, often with very short turn-around requested, from CBP and other agencies (FBI, TSA, etc.). Areas of focus include the Immigration Advisory Program (IAP); new and emerging threats, and incidents such as the Dec 25, 2009 event; the Times Square Bombing; and the October 29, 2010, Yemen cargo threat.
- Inability to continue support for ACE Screening and Targeting Modules and inability to restore quarterly releases for S2 / Targeting Framework including the Intelligence Operations Framework System and S3 / Advanced Targeting.
- Inability to provide Targeting Methodology Improvement Support to expand the capture of inspection results to complete the targeting feedback loop. This provides the feedback loop from the capture of examination findings which will allow CBP management to evaluate the effectiveness of inspection and targeting techniques employed at ports of entry as well as specific inspection technologies, including Non-Intrusive Inspection technologies, to improve management and operational capability.
- Inability to complete Full Failover Disaster Recovery – unable to continue efforts to migrate targeting applications to the DHS data center and realize full fail-over disaster recovery capabilities for cargo targeting applications. This provides CBP the capability to restore full system functionality and minimize disruption of service to personnel using it in the field in the case of a disaster.

Potential risks include lengthy system outages, the inability to react to real time terrorist threats, or front line operational decision making being based on aged/out-of-date or inaccurate/incomplete intelligence and information. In the event of system outages, frontline operations would revert to manual processing and decision making. Manual examinations would increase dramatically in reaction to incomplete information, and movement of cargo and people would be degraded and delayed.

This enhancement supports CBP's Goal #2, Ensure the efficient flow of legitimate trade and travel across U.S. borders, Objective 2.2, Fully employ the use of risk management and targeting to detect and deter trade noncompliance and apply consistent enforcement actions.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and Expenses  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 2:** Enhancement to Targeting Systems and Staff  
 PPA: MA Border Security and Control between Ports of Entry  
 Systems for Targeting  
 MA Border Security Inspections and Trade Facilitation  
 Program Increase: Positions 25, FTE 25, Dollars \$38,702

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							5,003	4,819	1,433,014
Program Increase							25	25	38,702
<b>Total Request</b>	<b>4,843</b>	<b>4,608</b>	<b>1,061,631</b>	<b>4,822</b>	<b>4,638</b>	<b>1,426,503</b>	<b>5,028</b>	<b>4,844</b>	<b>1,471,716</b>

**Description of Item**

The requested increase of \$38.702 million and 25 FTEs will support enhancements to targeting systems and staff within the Office of Intelligence and Investigative Liaison (OIIL). The OIIL program includes resources for the identification, development, implementation, and refinement of mechanisms for various methods of targeting and responding to security-related operational and real-time events involving people, goods, and conveyances entering and exiting the United States. The increase will allow CBP to increase our targeting capabilities by providing the ability to updates rules in real time and allow CBP to attain a true 24/7 targeting capability to better support CBP officers in the field. A detailed description of this increase is as follows:

- Advanced Targeting Capabilities \$7.5M
  - Enterprise Data Warehouse for information storage and data standardization
  - BorderStat statistical tracking system for border enforcement
  - Continual analysis on rule effectiveness
- Targeting System Hardware and Software Upgrades \$5.5M
  - Network Improvements
  - Security and Monitoring
  - Geospatial Tools
  - Discovery and Exploration Tools
  - New Proprietary Data sources
- Cargo Targeting Methodology Improvement \$2.7M
  - Integration of Trade Interfaces for Screening and Targeting
- ATS-Global \$12.0M

Air Cargo	<ul style="list-style-type: none"> <li>- Four highest priority countries</li> </ul>	\$3.0M
NTC Infrastructure	<ul style="list-style-type: none"> <li>- Address Air Cargo Manifest Gap</li> <li>- Intel capability for anomaly detection</li> </ul>	\$5.0M
25 OIIL New Targeting FTE	<ul style="list-style-type: none"> <li>- Network Upgrades</li> <li>- Maximum Redundancy and Network Diversity</li> <li>- Localized Monitoring</li> </ul>	\$3.0M

**Justification**

The Targeting staff within OIIL responds to security-related operational and real-time events involving people, goods, and conveyances entering and exiting the United States. The requested 25 FTEs and the additional resources are needed to respond to potential terrorism alerts on a 24x7 basis, covering all international modes of transportation, at and between the ports of entry. As intelligence reporting continues to expand and automated analytical techniques become available and enhanced and other agency and international government targeting efforts are expanded, additional personnel are required to properly analyze and employ actionable intelligence, develop internal information, and enhance automated information management tools to improve targeting.

Additionally, OIIL staff collaboratively interacts with all CBP anti-terrorism border security initiatives, which require additional staff support. OIIL Targeting Division provides real-time analysis and threat assessment support to all CBP components and other participating government agencies. To accomplish this task, additional personnel are required to establish data-sharing relationships and agreements with internal and external DHS components, other law enforcement agencies, private companies, and foreign counterparts.

Currently, this work is conducted by a limited number of technical staff and managers. The additional resources would ensure that most of the ongoing deliverables would not have to be scaled back or eliminated. Through these focused targeting efforts, CBP will expand its layered risk management approach and move from a reactive posture to a more effective and proactive one.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

These enhancements including hiring of 25 additional FTE and moving to real-time rule updates and a 24/7 targeting capability will allow CBP to more effectively develop and implement intelligence in order to effectively target threats to our nation. They will also enable comprehensive reporting and sharing of information for all people, goods, and conveyances entering and exiting the United States. CBP officers and Agricultural specialists will have access to the right information at the right time and possess greater awareness of the current environment and factors affecting the POEs. CBP will gain an intelligence advantage and be prepared to respond to all threats or emergencies that arise. These initiatives support DHS and CBP strategic goals of Advance Knowledge, Effective Inspections, and Focused Security.

It specifically supports CBP Strategic goals:

1. Securing America's Borders;
2. Securing and Expediting the Movement of People and The Flow of Goods

Without this funding, CBP may not have the ability to:

- Provide Advanced Targeting Capabilities that introduce new cargo targeting enhancements and support for planned ACE releases.
- Further the Entity Resolution capability: Increased workload for NTC personnel with regard to potential matches requiring vetting, which prevents NTC personnel from using their limited time on more productive targeting activities; substantially increased workload for field personnel responsible for performing unnecessary contractor augmented primary inspections, which results in slower processing at airports and land border crossings
- Further the Predictive Modeling and Visualization Tools: Functionality on hold: Predictive Modeling and Analytics, Scaling/Cluster Analysis to complement existing (linear) rule-based targeting by incorporating multidimensional attribute descriptions of entities into targeting models. Inability to expand visualization tools to increase ease, speed and quality of information comprehension.
- Provide Machine Learning: Unable to create machine learning models that deal with very specific risks associated with air cargo. Unsupervised machine learning technology can be used to improve anomaly detection. Machine learning is a core component of any near-to-mid-term strategy to improve targeting effectiveness.
- Proceed with the Intelligence Driven Targeting: Unable to incorporate intelligence information to support real time targeting and decision making. Unable to improve collaboration to facilitate information sharing, increase ease and speed of disseminating information and findings for efficient decision making. Inability to develop an integrated risk model, incorporating both rules-based and advanced analytics techniques. Inability to develop systems and processes for continuously measuring the effectiveness of targeting.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and Expenses  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 3:** Enhancement to restore CSI to FY11 levels  
PPA:  
Program Increase: Positions 0, FTE 0, Dollars \$13,032

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							374	368	58,502
Program Increase							-	-	13,032
<b>Total Request</b>	<b>440</b>	<b>426</b>	<b>106,942</b>	<b>374</b>	<b>368</b>	<b>74,557</b>	<b>374</b>	<b>368</b>	<b>71,534</b>

**Description of Item**

The requested increase of \$13.032 million will allow CBP to continue to review high-risk cargo that can be targeted and inspected before it reaches a U.S. port. Operational in 58 ports, CSI is an effective multinational program protecting the primary system of global trade – maritime containerized shipping – from being exploited or disrupted by international terrorists. It includes the capital investments that directly support these activities.

**Justification**

The request will support the CSI's rebalancing of its international footprint. The program would move toward a hub concept in several international locations where there are multiple CSI ports. These hubs would utilize software specifically designed for CSI remote operations. The host country counterparts would perform the requested exam, upload the image utilizing the software, and send the images to the hub location. CBP officers located at the hub would review the images and either release the shipment if no anomalies are found or request a physical examination.

This software for remote operations is currently operational in Israel, Australia, and New Zealand. The CSI program serves as a workforce multiplier because it identifies and inspects high-risk cargo before it is laden on a vessel destined to the U.S. in a foreign port. Shifting to the hub concept, helps CBP to realize efficiencies within this LOB and further reduce the CSI program staff in order to maximize utilization of CBPOs.

## **Impact on Performance (Relationship of Increase to Strategic Goals)**

The CSI program will continue its mission to prevent terrorists and terrorist weapons from entering the U.S. while also facilitating the flow of legitimate trade. This enhancement right-sizes the CSI program as it currently exists.

The CSI program supports the following CBP and DHS goals and objectives:

CBP Goal 2.2: Intercept Threats Away From the Physical Border

Objective 2.2.: Develop and deploy the optimal international footprint for CBP, combining physical presence, virtual presence, use of locally engaged staff, and reciprocal relationships with foreign partners.

Initiative 2.2.1.1: Conduct a systematic review of the Immigration Advisory Program, Container Security Initiative and Secure Freight Initiative, and preclearance programs to maximize their efficiency, expand or adapt those programs as appropriate to changing threats, and systematize their operation.

Initiative 2.2.1.3: Identify foreign locations where a physical presence by CBP Attaches and Representatives is necessary to achieve CBP's strategic goals and secure approval for and placement of personnel there.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and Expenses  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 4:** Enhancement for IPR Enforcement  
PPA: Inspections Trade and Travel Facilitation  
Program Increase: Positions 0, FTE 0, Dollars \$10,000

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							22,006	22,028	2,513,422
Program Increase							-	-	10,000
<b>Total Request</b>	<b>20,793</b>	<b>20,152</b>	<b>2,541,920</b>	<b>22,006</b>	<b>21,893</b>	<b>2,484,235</b>	<b>22,006</b>	<b>22,028</b>	<b>2,523,422</b>

**Description of Item**

The requested increase of \$10 million will support Intellectual Property Right (IPR) enforcement through two operational initiatives. These initiatives are broken out in detail below.

The requested increase includes \$5 million for the IPR Partnership Program and Distribution Chain Management. CBP’s concept for an IPR supply/distribution chain management will transform IPR risk assessment, increase efficiency, and support U.S. economic competitiveness. This CBP-private sector partnership program aims to improve IPR targeting by enabling CBP to identify and release shipments of authentic goods. Rights holders will drive the program by passing unique identifiers to importers, who will provide to CBP to identify authentic shipments. This means more effective use of CBP inspection resources, lower costs to legitimate importers, and increased IPR seizures.

The table below displays the annual funding breakouts for this effort.

<b>Estimated Funding Requirement</b>	
<b>Pay</b>	-
<b>Non-Pay</b>	<b>\$ 5 million</b>
<b>TOTAL</b>	<b>\$ 5 million</b>

<b>Estimated Annual Funding Request for the IPR Partnership Program</b>		
<b>Activity</b>	<b>Description</b>	<b>Annual Funding Impact</b>
<b>Technology</b>	<ul style="list-style-type: none"> <li>Build application to enable transmission/receipt of unique identifier and link that information to targeting</li> </ul>	\$4.66M
<b>Training</b>	<ul style="list-style-type: none"> <li>Train frontline officers in ports of entry</li> </ul>	\$0.18M
<b>Stakeholder Consultations</b>	<ul style="list-style-type: none"> <li>Outreach/collaboration with private sector to drive business practice compatibility and participation</li> </ul>	\$0.16M
	<b>TOTAL</b>	<b>\$5M</b>

Additionally, the requested increase includes \$5 million to support the mainstream Enforcement Link Mobile Operations (ELMO) for U.S. border operations. This new tool has been piloted based upon the success of Automated Targeting System-Mobile (ATSm) at foreign Immigration Advisory Program (IAP) locations. Additional funding will provide for over 300 devices and peripherals for field deployment including funding for data service, development, Operations and Maintenance and travel resources for ELMO development and training.

### **Justification**

Intellectual property theft puts America’s economic vitality, consumer safety, and national security/critical infrastructure at risk. CBP’s 5-Year IPR Strategy is an aggressive, multi-layered, risk-based approach to protect America from this harm. It is built on three pillars: Facilitate, Enforce, Deter. Supply/distribution chain management is a critical objective, and CBP is working with U.S. industry to co-create an IPR supply/distribution chain management program integrating current business practices.

Currently, lack of information on supply/distribution chains for authentic products causes CBP to detain many shipments of authentic goods for inspection. This inefficiency in shipment targeting increases costs to U.S. industry, forces CBP to expend resources inspecting shipments that do not contain counterfeit goods, and results in fewer inspections of shipments containing counterfeits.

Distribution chain management will remove the need to physically examine a shipment because it will move the shipment into the trusted segment of imports. By reducing inspections of authentic shipments, CBP will be able to focus its resources on shipments that have a high or unknown risk of containing counterfeit goods. U.S. importers will benefit from increased predictability in their supply chains and reduced costs because they will not have to bear the delays and costs caused by physical inspections. Right holders will benefit because CBP’s increased efficiency will lead to more seizures of counterfeit goods.

Action	Benefits
<b>Eliminate inspection of non-infringing imports</b>	<ul style="list-style-type: none"> <li>• Lower costs to importers</li> <li>• Increased predictability in importer supply chains</li> <li>• Re-deploy CBP inspection resources to other targets</li> </ul>
<b>Shift inspection to high-risk shipments</b>	<ul style="list-style-type: none"> <li>• More efficient CBP resource use</li> <li>• Increased enforcement within current staffing resources</li> </ul>
<b>Increase targeting efficiency</b>	<ul style="list-style-type: none"> <li>• Allocate CBP resources to inspect high risk shipments</li> <li>• Increase seizures of counterfeit and pirated goods</li> <li>• Increase protection of U.S. industry, consumers and national security/critical infrastructure</li> </ul>

The second piece of this requested increase stems from the development and success of ATSm at IAP locations. Following the Christmas 2009 attempted terrorist attack on Northwest Airlines Flight 253, CBP developed ATSm for IAP officers working at foreign airports. ATSm evolved to United States border operations with the introduction of a scanning peripheral that attaches to the smartphone, allowing CBP officers and agents to scan the machine-readable zone on travel documents and access CBP enforcement systems. ELMO leverages the success of ATSm by permitting officers to enter cargo examination results and remove manifest holds in real-time, resulting in significant reductions in cargo cycle time. The devices will deliver real-time tactical targeting data to personnel via a smartphone in locations with limited or no CBP systems access. ELMO cargo is currently being piloted at Port Everglades, FL, which is the 12th busiest sea container port in the United States. ELMO applications have been integral in both Securing and Expediting the Flow of Trade and Travel.

**Impact on Performance (Relationship of Increase to Strategic Goals) –**

**IPR Partnership Program & Distribution Chain Management** – Distribution chain management will enhance CBP’s implementation of its strategic goals for trade and IPR enforcement by supporting the following goals:

DHS Strategic Goal: Protect our Nation from Dangerous People and Goods.

DHS Strategic Goal: Protect Critical Infrastructure

CBP Goal 1: Secure our Nation’s borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel

CBP Goal 2: Ensure the efficient flow of legitimate trade and travel across U.S. borders.

Performance metrics include:

- Percentage of shipments in trusted segment of imports
- Targeting efficiency (efficiency of CBP inspection resources)
- Increased number of seizures

**Enforcement Link Mobile Operations (ELMO)** – Since its initial deployment in September 2010, ELMO passenger has contributed to over 400 successful CBP enforcement actions, by both the Office of Field Operations and the Office of Border Patrol, including identification of subjects of NCIC warrants, undocumented aliens, and smugglers of narcotics, unreported currency, and weapons.

Additionally ELMO cargo has been proven to decrease the time an importer has to wait for cargo that has been cleared. CBP would lose the efficiencies gained and the enforcement results achieved within both the passenger and cargo environment if additional funding is not received.

*Efficiencies Gained:* The tool has aided in decreasing the number of IAP telephone calls necessary to the NTC-Passenger and records checks at the Sector level. There have also been major improvements to cargo inspection processes; and reductions to CBP's cargo-cycle times.

*Enforcement Results:* Continuing this strategy in the various CBP processing environments only enhances CBP operations and addresses mission requirements to Secure and Expedite the Flow of Travel and Trade while providing for more efficient use of limited CBP staffing resources.

This initiative directly supports the DHS Strategic Goal: Protect our Nation from Dangerous People and Goods.

CBP Goal 1: Secure our Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and Expenses  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 5:** ICE Medical Detention Support  
PPA: Border Security Control  
Program Increase: Positions 0, FTE 0, Dollars \$8,000

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							23,301	23,306	3,562,996
Program Increase							-	-	8,000
<b>Total Request</b>	<b>23,104</b>	<b>22,683</b>	<b>3,683,893</b>	<b>23,301</b>	<b>23,306</b>	<b>3,530,994</b>	<b>23,301</b>	<b>23,306</b>	<b>3,570,996</b>

**Description of Item**

The requested increase of \$8 million will support ICE Medical Detention program. This increase represents the projected costs of medical treatment for aliens that are in CBP’s custody. Costs are based on current requirements, plus inflation and ICE’s projections for costs.

**Justification**

DHS has determined that CBP should account for its portion of the funding requirements related to the ICE Medical Detection Support program. Traditionally, ICE has borne 100% of the cost related to this program. When DHS was created, the Detention program formerly under the Immigration and Naturalization Service was assigned to ICE along with the responsibility for the payment of alien medical costs while in the custody of DHS components. The ICE appropriation was not initially funded for the expense of the medical care program; however, grant funding was provided through the Department of Health and Human Service for this purpose. The grant program was terminated recently which resulted in ICE seeking funding to pay for these medical costs. As costs increased, ICE was unable to absorb the additional expenses, and requested funding from CBP.

As a part of the CBP’s mission, Border Patrol agents may apprehend and detain undocumented aliens and other aliens that require medical attention. While both CBP and ICE have the responsibility to take custody of aliens at the borders and, as required, obtain medical services for them, this request will allow CBP to pay its share of these detention costs, if the alien are in CBP’s custody.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

The requested increase of \$8 million will allow CBP to pay the medical costs for aliens that require medical attention while in the custody of CBP. The increase requested directly supports the DHS goals 2.1.1 and 2.3.2 for Securing and Managing Our Borders. It also supports CBP Goal 1: Secure our Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and Expenses  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 6:** Enhancement to NTC  
PPA: National Targeting Center  
Program Increase: Positions 0, FTE 0, Dollars \$7,980

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							397	391	57,318
Program Increase							-	-	7,980
<b>Total Request</b>	<b>348</b>	<b>337</b>	<b>47,111</b>	<b>397</b>	<b>359</b>	<b>51,950</b>	<b>397</b>	<b>391</b>	<b>65,298</b>

**Description of Item**

The budget request of \$7.980 million will allow CBP to continue to develop and implement an enhanced targeting strategy that more effectively and efficiently divides cargo and travelers according to the potential threat they pose.

The NTC, which is housed in two facilities, supports CBP’s goal to develop and implement an enhanced targeting strategy that more effectively and efficiently divides cargo and travelers according to the potential threat they pose. The NTC helps to integrate the Agency’s diverse intelligence capabilities into a cohesive intelligence enterprise enabling CBP to serve the Nation as a premier intelligence-driven border law enforcement agency.

Targeting responsibilities continue to grow. CBP officers, Border Patrol agents, and import specialists, all experts in passenger and cargo targeting for air, sea, and land operations in the inbound and outbound environments, primarily staff both NTC facilities. In addition to using existing databases and information to identify potential targets, the NTC also develops tactical targets from raw intelligence in support of CBP’s mission to detect and prevent terrorists and terrorist weapons from entering the U.S. While the vast majority of travelers and goods are legitimate, both NTC facilities are designed to carefully examine the small minority of shipments and/or travelers that may be connected to terrorism or other transnational crimes, such as money laundering or narcotics smuggling.

## **Justification**

Since the attempted bombings of the Northwest Airlines Flight #253, the Times Square bombing incident, and the October 28, 2010 attempt to ship explosive devices through express consignment air cargo from Yemen, CBP has re-structured its targeting efforts. Targeting must now address interdicting possible terrorists or other *mala fide* international travelers before they can board a flight destined to the United States. While these new targeting programs have been very effective, the re-structuring has caused a dramatic increase in the NTC workload leading to significantly increased overtime costs and temporary duty (TDY) staff augmentation.

NTC pre-departure vetting of passengers at foreign locations where CBP does not have an IAP presence also keeps high-risk travelers from boarding flights to the United States. This program began in January 2010 and through close cooperation with the CBP Regional Carrier Liaison Groups, the airline industry, as well as the local ICE and CBP Attachés, over 1,600 *mala fide* passengers have experienced 'refused boarding' on U.S. bound flights since the inception of the program.

NTC continues to provide 24/7 support for the expanded IAP program, which now has officers posted at ten airports in eight countries. Additionally, the new NTC Advanced Targeting team (ATT) focuses on passengers departing from the United States. Since the outbound apprehension of the Times Square bomber and the increase in the number of watch-listed individuals, a new emphasis has been placed on outbound targeting operations.

The primary areas of concern are threats to civil aviation, subjects of the NCIC arrest warrants, and new efforts to identify previously unknown terrorists by their travel to remote areas where there are known terrorist training camps.

The ACAS project was launched in November 2010 after the October 28, 2010 attempt to ship explosive devices through express consignment air cargo from Yemen. The NTC became the sole entity responsible for implementing new targeting rules and analysis for high-risk cargo. The ACAS team is staffed with both CBP and TSA targeting analysts who jointly target and mitigate air cargo identified as high risk before allowing it to be loaded onto an aircraft. Pre-departure targeting allows CBP to push U.S. borders outward by keeping high risk cargo off international conveyances destined to the United States.

The ACAS team currently receives data from UPS, FedEx, DHL, and TNT express air couriers and is expanding the program to include additional air carriers and additional countries. Modeling the Importer Security Filing in the air environment, ACAS enhances air cargo security by obtaining air manifests in advance, thereby increasing the availability and volume of data on air cargo received.

Since the efficient flow of commerce in North America is vital to both the health of our economy and our competitiveness in the world, CBP is working to develop a plan to secure the rail supply chain security through the development of secure transit zones. CBP is working with the private sector to develop a plan to best secure the supply chain through cooperation with Mexico, rail companies, and other stakeholders. This collaborative involvement of government and stakeholders is necessary for the creation of secure transit zones. The Rail Targeting Unit will be a centralized resource for information, operational awareness, intelligence collection, data analysis, reports and technological

expertise in regards to inbound and outbound rail shipments. The Rail Targeting Unit will have the ability to provide instantaneous targeting expertise and operational guidance to the operators in the field.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

The NTC is a 24/7 operation with the centralized mission of coordinating anti-terrorism targeting and support all of CBPs Anti-Terrorism activities. NTC provides research support and responds to inquiries from the field, conducts tactical targeting to identify actionable targets, develop ATS rules, and supports intelligence-driven special operations. NTC also coordinates inter-agency responses to emergent situations through the various on-site liaison officers and is in constant contact with the FBI TSC

National Targeting Center supports the following CBP Goal:

CBP Goal 1: Secure our Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel.

(Dollars in Thousands)

**Program Increase 7:** Enhancement for Centers of Excellence and Expertise  
PPA: Inspections Trade and Travel Facilitation  
Program Increase: Positions 5, FTE 5, Dollars \$3,000

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							22,006	22,028	2,513,422
Program Increase							5	5	3,000
<b>Total Request</b>	<b>20,793</b>	<b>20,152</b>	<b>2,541,920</b>	<b>22,006</b>	<b>21,893</b>	<b>2,484,235</b>	<b>22,011</b>	<b>22,033</b>	<b>2,516,422</b>

**Description of Item**

In October 2011, CBP established two Industry Integration Centers for Excellence and Expertise (CEEs): the Electronics Center in Los Angeles and the Pharmaceuticals Center in New York. In FY 2013, with the additional funding provided, CBP, in consultation with its trade community partners, will establish 4 additional CEEs designed to address issues within critical trade sectors such as textiles, petroleum, consumer products and mass market retail imports, agriculture, automotive, machinery and manufacturing imports.

The Centers will continue CBP's efforts to increase uniformity of practices across the POEs, facilitate the timely resolution of trade compliance issues nationwide, improve enforcement efforts, and further strengthen critical agency knowledge on key industry practices.

The table below displays the annual funding breakouts for these efforts:

<b>Estimated Annual Funding Request for the Centers</b>		
<b>Activity</b>	<b>Description</b>	<b>Annual Funding Impact</b>
<b>Staffing</b>	<ul style="list-style-type: none"> <li>Hiring 5 new managers to ensure proper leadership/oversight</li> </ul>	\$1.122M
<b>Technology</b>	<ul style="list-style-type: none"> <li>Software, tools, and equipment to allow for virtual interaction and collaboration</li> </ul>	\$0.6M

	with private sector, other agencies and within CBP.	
<b>Training</b>	<ul style="list-style-type: none"> <li>• Rollout to 400 center employees will require additional investment in National Training Plan</li> <li>• A total of 2 training courses, each estimated at approximately \$300K for development</li> </ul>	\$0.6M
<b>Stakeholder Consultations</b>	<ul style="list-style-type: none"> <li>• Extensive outreach and collaboration with the private sector on Center activities and operations</li> </ul>	\$0.678M
	<b>TOTAL</b>	<b>\$3.0M</b>

**Justification**

The Centers will concentrate CBP's trade expertise on a single industry in a strategic location. They will be staffed with numerous trade positions using account management principles to authoritatively facilitate trade.

Through the Centers CBP will gain:

- greater uniformity in CBP operations and trade decisions;
- stronger expertise in modern industry practice;
- reduced costs and greater facilitation of trusted traders;
- efficient risk segmentation (reducing the “size of the haystack”) thereby allowing CBP to focus its resources on high-risk trade;
- more effective enforcement to address violators.

The Centers will serve as resources to the broader trade community and to CBP’s U.S. government partners. Center personnel will develop trade facilitation strategies, address uniformity and other facilitation barriers, and address compliance concerns, while serving as a resource to small and medium-sized businesses.

The Centers will also serve as a single point of processing for businesses enrolled in CBP’s trusted shipper programs: C-TPAT and Importer Self-Assessment (ISA). Required import documents for trusted partners within the electronics and pharmaceutical industries will be routed to their respective industry center. Initially revenue collection will continue to be carried out at the ports of entry, but the centers will perform all validation activities, protests, post entry amendment/post summary correction reviews, and prior disclosure validations for the trusted partners within their industry. The scope and functions of the centers will expand incrementally until all revenue related functions reside in the centers.

<b>Action</b>	<b>Benefits</b>
<b>Eliminates unnecessary transactional work from compliant imports</b>	<ul style="list-style-type: none"> <li>• Fewer cargo delays</li> <li>• Reduced costs</li> <li>• Greater predictability</li> </ul>
<b>POE focus shifts to high-risk shipments</b>	<ul style="list-style-type: none"> <li>• More complex enforcement work for highly skilled CBP employees</li> <li>• Improved enforcement results: <ul style="list-style-type: none"> <li>• Increased import safety</li> <li>• Increased revenue protection</li> <li>• Reduced economic loss due to IPR theft</li> </ul> </li> </ul>
<b>Single Point of Contact for inquiries</b>	<ul style="list-style-type: none"> <li>• Improved relationship with CBP as small/medium-sized importers have a streamlined inquiry process for resolving concerns.</li> <li>• Increased uniformity and transparency for the trade</li> <li>• Forum to work with other government agencies to address requirements efficiently</li> </ul>
<b>Cross-functional expertise</b>	<ul style="list-style-type: none"> <li>• Environment for in-depth learning to increase CBP expertise and therefore enforcement.</li> </ul>

**Impact on Performance (Relationship of Increase to Strategic Goals) –**

Trusted traders represent roughly 15 percent of all imports by volume and 24 percent by value. By redirecting work involving trusted traders to centralized, industry-specific locations, ports of entry will be able to more effectively focus resources on high-risk shipments and importers that may pose a danger to U.S. border security, harm the health and safety of consumers, or violate U.S. trade laws and intellectual property rights critical to our nation’s economic competitiveness. In turn, the approach to trade processing facilitated by the new centers will reduce transaction costs for the trade community, facilitate legitimate trade through risk segmentation, increase agency expertise and deliver greater transparency and uniformity of action within a given industry.

Industry Integration Centers supports the following Goals and Objectives:

DHS Strategic Goal: Protect our Nation from Dangerous People and Goods.

CBP Goal 1: Secure our Nation’s borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel

CBP Objective 1.2: Using a risk-based approach, deploy and employ the most effective inspection and scanning technology available at designated land border ports, airports, seaports, permanent Border Patrol traffic checkpoints, and international areas in which CBP operates to detect and prevent the entry of hazardous materials, goods, and instruments of terror into the United States.

**Program Increase 8:** Enhancement for Financial and Budgetary Management Systems  
PPA: MA Border Security and Control between Ports of Entry  
MA Border Security Inspections and Trade Facilitation  
Program Increase: Positions 0, FTE 0, Dollars \$3,000

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							4,969	4,787	1,384,608
Program Increase							-	-	3,000
<b>Total Request</b>	<b>4,804</b>	<b>4,572</b>	<b>1,029,255</b>	<b>4,788</b>	<b>4,606</b>	<b>1,385,103</b>	<b>4,969</b>	<b>4,787</b>	<b>1,387,608</b>

**Description of Item**

The requested increase of \$3 million will provide enhancements and operations and maintenance costs to the Office of Administration’s (OA) base funding for the Systems, Application, and Products (SAP) maintenance. SAP is CBP’s integrated Enterprise Resource Planning (ERP) system for financial, procurement and asset management.

**Justification**

The annual cost to continue existing levels of support for operations and maintenance related to CBP’s SAP and associated systems have exceeded the current funding levels. The requested \$3 million increase will permit the continued essential maintenance necessary to perform critical functions to SAP. The increased costs are mainly due to rising user requirements, added development and support for new functionality, to include recent budget and cost management improvements, maintenance of interfaces to new systems, and general inflationary effects on labor expenses.

The strategic goals and objectives below were developed in the FY 2009–14 CBP Strategic Plan to provide a roadmap of activities for accomplishing the agency’s important mission. Certain cross-cutting enablers (improved intelligence and information sharing, expansion of partnerships, and management operations and organizational effectiveness) affect CBP’s ability to accomplish its mission and ultimately achieve its goals. CBP’s cross-cutting enablers are critical to its success in achieving its mission and must be a primary consideration in developing strategies and action plans to implement the CBP Strategic Plan.

The SAP program directly supports the following Cross-Cutting Enabler:

- Develop and implement the Strategic Management Framework (SMF), a strategic planning framework, to integrate CBP's multiyear strategic plan with its investment management, resource management, and program management processes, to ensure that CBP can acquire and effectively manage its resources to accomplish its top mission-focused goals and objectives in a way that maximizes return on investment.

Additionally, SAP enables DHS efforts to unify operations and management with integrated capabilities that support DHS goals and objectives via improved processing, management and reporting of financial, property, procurement, and budgetary data which result in faster and more accurate delivery of goods and services to operational capabilities. This support extends indirectly to other DHS components and other agencies that rely on support services and/or financial and related data to accomplish their performance objectives.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

This funding will provide for critical software upgrades and security patches, break fixes and mandatory changes to the system, and sufficient levels of user support to enable the accomplishment of critical business activity.

This request supports the following CBP and DHS goals and objectives:

- CBP Goal 1: Secure the Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel.
- CBP Goal 2: Ensure the efficient flow of legitimate trade and travel across U.S. borders.

U.S. Customs and Border Protection  
Salaries and Expenses  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 9:** Enhancement to Provide Situational Awareness via Video from Air Assets  
 PPA: MA Border Security and Control between Ports of Entry  
 MA Border Security Inspections and Trade Facilitation  
 Program Increase: Positions 0, FTE 0, Dollars \$3,000

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							4,969	4,787	1,384,608
Program Increase							-	-	3,000
<b>Total Request</b>	<b>4,804</b>	<b>4,572</b>	<b>1,029,255</b>	<b>4,788</b>	<b>4,606</b>	<b>1,385,103</b>	<b>4,969</b>	<b>4,787</b>	<b>1,387,608</b>

**Description of Item**

The requested increase of \$3.0 million will support the acquisition of situational awareness via video from air assets. A project called “Big Pipe” is a video streaming capability from various CBP aerial and ground assets to provide situational awareness to CBP, DHS and OGAs; including but not limited to DOD, National Geospatial-Intelligence Agency (NGA), North American Aerospace Defense Command (NORAD), and Foreign Governments, as well as local and state law enforcement entities.

**Justification**

The enhancement will provide centralized infrastructure for Big Pipe capabilities at DHS Data Center 1 and 2. Specifically, it will provide a recurring funding stream to ensure the capability can be provided to meet DHS and CBP missions in the future.

This capability started after Hurricane Katrina and has been used extensively since to obtain situational awareness in a variety of situations, including national disasters and/or high visibility events. CBP requires the capability to transmit live streaming video, data, and audio from various aerial and ground assets using satellite and wireless technologies. The assets include the following but are not limited to: aircrafts, vehicles, ground stations, maritime vessels, as well as other mobile units. The system will allow CBP and DHS officials to view areas of interest in near real time and direct ground personnel/first responders to locations appropriate for the situation.

### **Impact on Performance (Relationship of Increase to Strategic Goals)**

The Situational Awareness via Video from Air Assets project is tied to the CBP's Mission Set 3, Goal 3.2, Initiative 3.2.2.1 "Ensuring state-of-the-art information technology support to CBP operations." Big Pipe is critical to ensure the continued support to the Full Motion Video (FMV) network infrastructure and common system for incident awareness. The acquisition of this asset will assist CBP and other Federal agencies with near real time situational awareness resulting in increased response times to significant incidents and national disasters.

**Description of Item**

The requested increase of \$2.218 million represents an increase to support non pay funding for the Office of International Affairs (INA).

**Justification**

The increase is requested for INA non labor funding for establishing and maintaining relationships with our strategic foreign partners to support the CBP operational mission. INA identifies, develops, implements, and coordinates specialized training and developmental assistance programs for foreign customs and other law enforcement officials and organizations. INA provides in-country advisory support for broad-based customs reform and modernization and ensures CBP influences policy throughout the world.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

These efforts contribute to CBP's overall mission of securing America's borders and securing and facilitating the flow of goods and movement of people. INA strives to extend U.S. borders by implementing programs and initiatives that promote anti-terrorism, global border security, non-proliferation, export controls, immigration, capacity building, and facilitating legitimate trade.

CBP Goal 1: Secure our Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel

<b>Total Request</b>	<b>25,649</b>	<b>24,773</b>	<b>3,711,024</b>	<b>26,846</b>	<b>26,549</b>	<b>4,017,875</b>	<b>26,905</b>	<b>26,743</b>	<b>3,991,320</b>

**Description of Item**

Administrative reviews identified efficiencies totaling \$55.257 million and 102 FTE associated with printing services, organizational studies, and liaison work with various audit activities. This includes Human Resource Management activities and decreases to Administrative Staff and expenses within the Office of the Commissioner, the Office of Information Technology, the Office of Administration, and the Office of Public Affairs.

**Justification**

These efficiencies include an array of services provided by government and contracted personnel, as well as supplies and systems. The decreases will be achieved as follows:

- **Headquarters Mission Support Personnel:** CBP will decrease support personnel in headquarters offices, to include Office of Administration, Office of Information Technology, Office of Training and Development, and Office of Public Affairs. This decrease in personnel will not impact CBP's ability to achieve its mission on the front lines. To help achieve this decrease, CBP will explore offering early retirements.
- **Administrative Functions:** This includes printing services and production, supplies, equipment, and organizational studies.

- Human Resources Functions: This includes decreases to the systems that are used to manage CBP personnel, as well as the medical, fitness and drug collection program; the employee assistance program (EAP); recruitment, hiring, and succession planning services; and the Occupational Safety and Health programs (OSHA). CBP will continue to comply with all legal requirements

A breakout of this reduction is follows:

<b><u>Area</u></b>	<b><u>Amount (dollars in thousands)</u></b>
Administrative Services	\$13,434
Awards and succession planning services	\$721
Human resources systems	\$2,200
Management and Administration Staffing	\$29,484
Office of Commissioner Expenses	\$1,980
Office of Trade's Administrative Support Services	\$717
OSHA programs	\$2,018
Public affairs support	\$389
Recruitment and hiring services	\$2,962
Medical, fitness, and drug collection and the employee assistance programs	\$1,352
<b><u>Total</u></b>	<b><u>\$55,257</u></b>

**Impact on Performance (Relationship of Decrease to Strategic Goals)**

CBP is decreasing management and administration staffing and services to ensure our highest priority capabilities are fully funded to achieve our core missions: Mission 1, Securing America's Borders and Mission 2, Securing and Expediting the Movement of People and Flow of Goods. The decrease is necessary to offset personnel costs increasing at a rate faster than general payroll inflation factors, for the following reasons: the continued maturation of the newly hired workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and an increased cost in workforce benefits, such as retirement and healthcare.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and Expenses  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 2:** Reduction to CBP Fleet Acquisition and Management  
 PPA: MA Border Security and Control between Ports of Entry  
 Border Security Control  
 MA Border Security Inspections and Trade Facilitation  
 Program Decrease: Positions 0, FTE 0, Dollars \$(41,221)

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							28,270	28,093	4,947,604
Program Decrease							-	-	(41,221)
<b>Total Request</b>	<b>27,908</b>	<b>27,255</b>	<b>4,713,148</b>	<b>28,089</b>	<b>27,912</b>	<b>4,916,097</b>	<b>28,270</b>	<b>28,093</b>	<b>4,906,383</b>

**Description of Item**

Customs and Border Protection will defer replacing vehicles used for operations resulting in a savings of \$39.671 million. In addition, CBP will reduce projected fuel and maintenance expenses by \$1.550 million.

PPA	Dollar Amount	Program Change
Border Security and Control between Ports of Entry	1.550 M	Maintenance Service Reduction
Headquarters Management and Administration	39.671 M	Reduction to CBP Fleet
<b>Total</b>	<b>41.221 M</b>	

**Justification**

In FY 2011, CBP examined vehicle lifecycle criteria to reassess future year requirements in consideration to evolving field environments, manufacturer improvements and operational use. The resultant decisions extended vehicle lifecycles based on these stated variables. The new CBP expected vehicle lifecycle replacement criteria is 8 or 10 years, with the exception of the Office of Border Patrol Sport Utility Vehicles (SUVs), trucks, and sedans, which are now fixed at 6 years. These criteria were established by CBP Offices to maximize CBP vehicle funding while remaining sensitive to overall

impacts to CBP's mission at and between the POEs along the U.S. borders. The reassessment has in part alleviated the previously projected replacement requirement.

Concurrently, CBP continues to analyze and optimize the maintenance, repair and operation of the vehicle fleet while developing and implementing cost savings/avoidance strategies nationwide to optimize its aging fleet. This includes identifying best practices to support vehicles throughout an extended lifecycle while minimizing the impact increased maintenance activities could have to operational readiness.

**Impact on Performance (Relationship of Decrease to Strategic Goals)**

This decrease allows for the highest priority requirements to be accommodated, while accommodating other CBP capability requirements through re-allocation of financial resources.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and Expenses  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 3:** Reduction to CBP IT Infrastructure & Systems Support  
PPA: MA Border Security and Control between Ports of Entry  
MA Border Security Inspections and Trade Facilitation  
Program Decrease: Positions 0, FTE 0, Dollars \$(36,751)

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							4,969	4,787	1,384,608
Program Decrease							-	-	(36,751)
<b>Total Request</b>	<b>4,804</b>	<b>4,572</b>	<b>1,029,255</b>	<b>4,788</b>	<b>4,606</b>	<b>1,385,103</b>	<b>4,969</b>	<b>4,787</b>	<b>1,347,857</b>

**Justification**

CBP will focus its capabilities on the core missions of securing the border, and trade and travel facilitation. In order to maintain these capabilities at the highest possible level, CBP will decrease capacity on programs that do not provide acceptable returns on the investment or not focused explicitly on our primary responsibilities. This decrease in funding may require CBP to continue to depend on the existing technology and IT infrastructure.

**Impact on Performance (Relationship of Decrease to Strategic Goals)**

CBP will work to mitigate any potential network availability or system slow down and outages. Network availability is estimated to drop to 98 percent, approximately 3.36 hours of downtime a week and TECS availability may be reduced to 99 percent, approximately 1.68 hours of downtime per week. In FY 2011 network availability was 99.87 percent, approximately 15 minutes of network downtime per week, and in FY 2011 TECS availability was 99.64 percent, approximately 40 minutes of TECS downtime per week. CBP currently targets a 99.9 percent availability rate for our mission critical systems. CBP is moving towards a 99.99 percent availability with its new high availability and high assurance infrastructure. CBP's eventual target is to move to an active-active infrastructure with load balancing so that it agency will never have to do a switch over – the system will always be available in a load balanced environment between data centers – that may finally allow CBP to finally achieve a 99.999 percent applications availability. The hours reported in the Justification of Program changes are an estimate of the increased downtime that maybe experienced by CBP, as some problems or issues may take longer to resolve. CBP is taking proactive steps to install end-to-end monitoring

tools that can provide more insight into the performance of the network in order to take advance action and maintain 24x7 service.

In addition, a decrease in funding leaves CBP without the ability to upgrade the infrastructure as additional equipment reaches the end of its life and may reduce program support for enterprise architecture, training, IT Governance, and Capital Planning and Investment Control.

CBP is trying to take some proactive steps to install end-to-end monitoring tools that can provide more insight into the performance of the network in order to take advance action and maintain 24x7 service.

In addition, a decrease in funding leaves CBP without the ability to upgrade the infrastructure as additional equipment reaches the end of its life and may reduce program support for enterprise architecture, training, IT Governance, and Capital Planning and Investment Control.

**Department of Homeland Security**

**Salaries and Expenses**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 4:** Reduction to NII Investments & O&M  
PPA: Inspection and Detection Technology  
National Targeting Center  
Program Decrease: Positions 0, FTE 0, Dollars \$(31,043)

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							449	441	205,865
Program Decrease							-	-	(31,043)
<b>Total Request</b>	<b>400</b>	<b>386</b>	<b>186,960</b>	<b>449</b>	<b>409</b>	<b>200,487</b>	<b>449</b>	<b>441</b>	<b>174,822</b>

**Description of Item**

The \$31.043 million reduction in LOB 2 transitions the NII program to an Operations & Maintenance (O&M) steady state mode. With this shift in strategy, the program will rely on currently fielded equipment. The NII program will develop a risk mitigation plan to shift NII resources in order to meet mission requirements for facilitating the movement of legitimate trade and intercepting and screening high risk cargo and conveyances.

**Justification**

Since September 11, 2001, NII technology has been a cornerstone of CBP’s multi-layered enforcement strategy. CBP has 299 large-scale imaging systems deployed at and between our POEs. There is also a total of 5,199 small-scale NII units, 1,463 Radiation Portal Monitors (RPMs), 2,438 Radiation Isotope Identification Devices (RIIDs) and 24,913 Personal Radiation Detectors (PRDs) deployed nationwide. Each year, a number of POEs undergo reconfigurations in which the lanes of traffic that contain NII equipment and/or RPMs are moved or altered. Additionally, a number of port expansions where new lanes of traffic requiring new technologies are added each year. Typically these reconfigurations and port expansions accounted for approximately 20 percent of deployment efforts.

The O&M funding will be used to help deployed NII technologies meet expected CBP operational requirements. Funding will also support the RPM program to upgrade sites to be Port Radiation Inspection Detection and Evaluation (PRIDE) compliant. O&M funds provide maintenance support at approximately 600 locations throughout the U.S. and its territories. O&M funds will also be used to support RPM systems that are reaching the end of their life cycle and to supplement the interdiction systems with ancillary equipment and components to enhance their capability. Obsolescence of

equipment, lack of parts and spares will be the major impediment going forward as equipment ages and the cost to repair increases without equipment replacements.

**Impact on Performance (Relationship of Decrease to Strategic Goals):**

The NII Systems Program supports the Quadrennial Homeland Security Review Report Mission 1: Preventing Terrorism and Enhancing Security and Mission 2: Securing and Managing our Borders. The NII Systems Program also directly contributes to two DHS strategic goals: Goal 1: Protect our nation from dangerous people, and Goal 2: Protect our nation from dangerous goods.

Salaries and Expenses  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 5:** Reduction to Field Operations Overtime  
PPA: Inspections Trade and Travel Facilitation  
Program Decrease: Positions 0, FTE 0, Dollars \$(21,106)

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							22,006	22,028	2,513,422
Program Decrease							-	-	(21,106)
<b>Total Request</b>	<b>20,793</b>	<b>20,152</b>	<b>2,541,920</b>	<b>22,006</b>	<b>21,893</b>	<b>2,484,235</b>	<b>22,006</b>	<b>22,028</b>	<b>2,492,316</b>

**Description of Item**

The Office of Field Operations will reduce its overage usage by \$21.106 million.

**Justification**

The Office of Field Operations will realize savings in overtime costs of \$21.106 million. This reduction will not impact operational staffing and CBP officers will be available to administer the full range of inspection, intelligence analysis, examination, and law enforcement activities that relates to the arrival and departure of persons, conveyances, and merchandise at our Nation's POEs.

**Impact on Performance (Relationship of Decrease to Strategic Goals)**

This re-tooling of staffing will not increase the wait times at the POEs and operational personnel will implement a strategy that adds flexibility and supports the changing operations that will occur as a result of peak-time operations. CBP intends to mitigate this reduction through the increased COBRA User Fee collections due to increased travel and the removal of the COBRA exemption for select countries.

In addition, CBP continues to pursue Business Transformation Initiatives, such as ready lanes in the land border environment, Global Entry kiosks in the air environment, and new mobile technologies. These initiatives shorten processing time by segmenting high risk and low risk traffic and this helps to reduce wait times as low risk traffic is cleared more quickly and efficiently and CBPOs are free to focus upon the higher risk traffic.

The sustainment of the officer workforce directly supports the DHS Strategic Goal: Preventing Terrorism and Enhancing Security.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and Expenses  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 6:** Reduction to Academy Training and Operations  
 PPA: MA Border Security and Control between Ports of Entry  
 MA Border Security Inspections and Trade Facilitation  
 Training Between the Ports of Entry  
 Program Decrease: Positions 0, FTE 0, Dollars \$(14,671)

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							371	369	88,781
Program Decrease							-	-	(14,671)
<b>Total Request</b>	<b>175</b>	<b>171</b>	<b>36,088</b>	<b>371</b>	<b>369</b>	<b>88,610</b>	<b>371</b>	<b>369</b>	<b>74,110</b>

**Description of Item**

CBP will realize a savings of \$14.7 million by reducing some specialized training such as succession management and leadership training. Mandatory training for new frontline employees to perform their duties and officer and agents certifications will be maintained.

**Justification**

OTD leads and directs CBP’s training programs. OTD ensures that all training efforts support the CBP mission and strategic goals, meets the needs of a diverse and geographically dispersed workforce, and contribute to measurable outcomes and results.

OTD provides basic and advanced training to all CBP occupations based on identified agency and organizational requirements. Basic and mandatory training programs take priority for the agency as these programs are necessary for new recruits to perform their duties and for existing officers and agents to maintain certification in mission critical functions.

**Impact on Performance (Relationship of Decrease to Strategic Goals)**

The mandatory training for new recruits to perform their duties will be maintained and officer and agent certifications will be sustained. Funding trade-offs will occur in other advanced training designed to expand and promote growth of CBP personnel including various forms of specialty training.

This decrease preserves CBP's overall strategic goal (3.1.2) to provide CBP agents, officers and mission support personnel with the necessary resources and support for their professional development.

**Department of Homeland Security  
U.S. Customs and Border Protection

Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 7:** Reduction to CBP Transportation Program  
PPA: Border Security Control  
Program Decrease: Positions 0, FTE 0, Dollars \$(12,258)

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							23,301	23,306	3,562,996
Program Decrease							-	-	(12,258)
<b>Total Request</b>	<b>23,104</b>	<b>22,683</b>	<b>3,683,893</b>	<b>23,301</b>	<b>23,306</b>	<b>3,530,994</b>	<b>23,301</b>	<b>23,306</b>	<b>3,550,738</b>

**Description of Item**

CBP will realize a savings of \$12.258 million due to a reduction to transportation workload and through cost efficiencies. This savings will be acquired through reconfiguration of the assets used in meeting the lower workload requirements and cost reductions gained from the re-competition of the transportation contract.

**Justification**

The Transportation Program transports detainees at and between the U.S. ports of entry. The program goal is to relieve apprehending officers and agents of transport and guard functions in order to perform higher priority law enforcement missions.

The Transportation Program Management Office is developing an integrated system of detainee transportation, security, medical guard services, and administrative support serving the varying needs at the Southwest border. The decrease is associated with the planned expansion of the Transportation Program to the northern and coastal borders. In addition, further cost reductions will be made in the Southwest border by prioritizing mission support and improving operational efficiency. Contract strategies are being prepared to add additional flexibility to support changing operations along the Southwest border.

### **Impact on Performance (Relationship of Decrease to Strategic Goals)**

The decrease to the Transportation Program will reduce costs and support the highest priority of maintaining maximum agent staffing along the border. The sustainment of the agent workforce directly supports DHS goals 2.1.1 and 2.3.2 for Securing and Managing Our Borders. It also supports CBP Goal 1: Secure our Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel. The decrease in costs will ensure maximum effectiveness of the agent force at the lowest possible costs.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and Expenses  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 8:** Reduction to Field Support Staff  
 PPA: Inspections Trade and Travel Facilitation  
 Border Security Control  
 Air and Marine Operations Personnel Compensation and Benefits  
 Program Decrease: Positions (66), FTE (66), Dollars \$(9,213)

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							47,226	47,249	6,364,686
Program Decrease							(66)	(66)	(9,213)
<b>Total Request</b>	<b>45,832</b>	<b>44,734</b>	<b>6,525,941</b>	<b>47,226</b>	<b>47,114</b>	<b>6,303,130</b>	<b>47,160</b>	<b>47,183</b>	<b>6,355,473</b>

**Description of Item**

CBP has undertaken a review of operational support requirements through the field locations and adjusted position authorizations to reflect the review recommended changes. These adjustments will yield a savings of \$9.213 million.

The decreases will be taken from the following PPAs:

Funding Decrease (in thousands)	FTE Decrease	PPA
\$4,746	34	Inspections, Trade, and Travel Facilitation at the Ports of Entry
\$4,048	29	Border Security and Control Between the Ports of Entry
\$419	3	Air and Marine Salaries

**Justification**

CBP has reviewed operational support requirements throughout the field locations and has adjusted position authorizations to reflect recommended changes. CBP seeks to mirror the greater cohesion of front line staff with improved integration of CBP's field mission support staff. CBP will work to consolidate efforts by geographical locations. CBP proposes that the decreases will reflect savings from integrating and leveraging limited resources across operational offices.

### **Impact on Performance (Relationship of Decrease to Strategic Goals)**

The targeted decreases to the CBP Mission Support Line of Business across these three PPAs will enable CBP to support the highest priority of maintaining maximum agent staffing along the border. It directly supports the DHS goals 2.1.1 and 2.3.2 for Securing and Managing Our Borders. It also supports CBP Goal 1: Secure our Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel.

**Department of Homeland Security**  
**U.S. Customs and Border Protection**  
**Salaries and Expenses**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 9:** Reduction to Air and Marine Staff  
PPA: Air and Marine Operations Personnel Compensation and Benefits  
Program Decrease: Positions (42), FTE (42), Dollars \$(7,030)

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							1,919	1,915	288,268
Program Decrease							(42)	(42)	(7,030)
<b>Total Request</b>	<b>1,935</b>	<b>1,899</b>	<b>300,128</b>	<b>1,919</b>	<b>1,915</b>	<b>287,901</b>	<b>1,877</b>	<b>1,873</b>	<b>281,238</b>

**Description of Item**

CBP will reduce OAM staff in order to preserve staffing levels for core frontline personnel. This will be achieved by aggressively managing recruiting and attrition and making use of various tools to draw down the workforce.

**Justification**

A reduction of \$7.030 million equates to a loss of 42 OAM positions. This reduction will be achieved through workforce re-shaping efforts. The decrease will be achieved by managing recruiting and attrition and making use of a number of tools to draw down the workforce including Voluntary Early Retirement (VERA), and Voluntary Separation Incentive Payments (VSIP).

**Impact on Performance (Relationship of Decrease to Strategic Goals)**

This reduction will enable CBP to support its highest priority of maintaining core frontline personnel. While reductions are planned primarily through attritions and mandatory retirements, it is not anticipated these reductions will have substantial impacts on either headquarters or field operations.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and Expenses  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 10:** Reduction associated with suspending WHTI/LBI Procurement  
PPA: Inspections Trade and Travel Facilitation  
Program Decrease: Positions 0, FTE 0, Dollars \$(6,000)

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							22,006	22,028	2,513,422
Program Decrease							-	-	(6,000)
<b>Total Request</b>	<b>20,793</b>	<b>20,152</b>	<b>2,541,920</b>	<b>22,006</b>	<b>21,893</b>	<b>2,484,235</b>	<b>22,006</b>	<b>22,028</b>	<b>2,507,422</b>

**Description of Item**

CBP will decrease the Western Hemisphere Travel Initiative Land Border Integration (WHTI/LBI) procurement program by \$6.0 million. The decrease will no affect programmatic operations. CBP will maintain its current deployed investment and process improvements as well as the operations and maintenance of this program.

**Justification**

WHTI/LBI program is in a sustainment mode. CBP will implement a strategy to reduce focus on the procurement functionalities while maintaining current operational levels and focus strategies towards more critical mission areas.

**Impact on Performance (Relationship of Decrease to Strategic Goals)**

CBP anticipates a manageable operation as a result of this decrease and will employ standard mitigation procedures should the need arise.

WHTI supports the following CBP and DHS goals and objectives:

DHS Strategic Goals: Preventing Terrorism and Enhancing Security; Securing and Managing Our Borders.

CBP Goal 1: Secure the Nation’s borders to protect America from the entry of dangerous people and good and prevent unlawful trade and travel.

CBP Objective 1.1: Establish and maintain effective control of air, land, and maritime borders through the use of appropriate mix of infrastructure, technology and personnel.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and Expenses  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 11:** Reduction associated with extending C-TPAT Validation Cycle to 4 years  
 PPA:  
 Program Decrease: Positions 0, FTE 0, Dollars \$(5,000)

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							248	244	45,082
Program Decrease							-	-	(5,000)
<b>Total Request</b>	<b>279</b>	<b>270</b>	<b>44,520</b>	<b>248</b>	<b>244</b>	<b>44,979</b>	<b>248</b>	<b>244</b>	<b>40,082</b>

**Description of Item**

C-TPAT will extend the validation cycle to four years as mandated by the Security and Accountability for Every (SAFE) Port Act of 2006 (P.L. 109-347). In past years, CBP accelerated the re-validation schedule to once every three years for all importers, carriers and for manufacturers and more specifically once every year for Mexico highway carriers which are considered to be high risk. This extension to a four year cycle will yield a savings of \$5 million.

**Justification**

C-TPAT personnel have aggressively worked to identify and successfully implement travel and validation procedures aimed at maximizing remaining program resources. C-TPAT will conduct more regionally-focused operations and fewer domestic site visits, and conduct annual training for the trade community every other year. The program will pursue more mutual recognition arrangements with foreign customs administrations and strategically merge C-TPAT field offices. Additionally, the program will eliminate contractors and Personal Digital Assistants for Supply Chain Security Specialists. Finally, the program will seek to achieve a “maintenance only” status for the web-based portal system.

**Impact on Performance (Relationship of Decrease to Strategic Goals)**

CBP will use a phased approach with the implementation of the necessary enhancements to the Automated Web-Base Portal System. The enhancements will be implemented over an extended period of time. C-TPAT will delay the development of the second generation automated portal system required to meet existing and future workload requirements.

Moving to a four year validation cycle across the board will reduce the number of validations in FY 2013 resulting in fewer validations performed each fiscal year. CBP will meet all timelines and responsibilities as mandated by the Security and Accountability for Every Port Act of 2006 (P. L. 109-347).

The initiative supports the following DHS and CBP goals and objectives:

DHS Strategic Goal: Preventing Terrorism and Enhancing Security

CBP Goal 1: Secure the Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel.

CBP Objective 1.1: Establish and maintain effective control of air, land, and maritime borders through the use of the appropriate mix of infrastructure, technology, and personnel.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and Expenses  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 12:** Reduction associated with Rescoping IAP Program in Incheon and Warsaw  
PPA: Inspections Trade and Travel Facilitation  
Program Decrease: Positions 0, FTE 0, Dollars \$(3,463)

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							22,006	22,028	2,513,422
Program Decrease							-	-	(3,463)
<b>Total Request</b>	<b>20,793</b>	<b>20,152</b>	<b>2,541,920</b>	<b>22,006</b>	<b>21,893</b>	<b>2,484,235</b>	<b>22,006</b>	<b>22,028</b>	<b>2,509,959</b>

**Description of Item**

CBP will realize a savings of \$3.463 million from ceasing IAP operations in Warsaw, Poland and Incheon, South Korea. The closures will allow CBP to maintain its international footprint while expanding the IAP program to other locations.

**Justification**

CBP will maintain its risk-based international footprint by expanding the IAP program to other locations allowing CBP officers to cover known individuals of interest (matches to the watchlist), and the unknown individuals identified through targeting and intelligence.

**Impact on Performance (Relationship of Decrease to Strategic Goals)**

The goal of the IAP is to protect air travel and improve national security. IAP will incorporate mitigation strategies to ensure that security and enforcement capabilities are not degraded and to realign staff to support these functional areas.

The IAP program supports the following CBP and DHS goals and objectives:

DHS Goals: 1.1 Prevent Terrorist Attacks; 2.1 Effectively Control U.S. Air, Land, and Sea Borders;  
3.2 Prevent Unlawful Immigration:

CBP Goal 2: Securing and Expediting the Movement of People and the Flow of Goods

CBP Goal 2.2: Intercept Threats Away From the Physical Border

Objective 2.2.: Develop and deploy the optimal international footprint for CBP, combining physical presence, virtual presence, use of locally engaged staff, and reciprocal relationships with foreign partners.

Initiative 2.2.1.1: Conduct a systematic review of the Immigration Advisory Program, Container Security Initiative and Secure Freight Initiative, and preclearance programs to maximize their efficiency, expand or adapt those programs as appropriate to changing threats, and systematize their operation.

Initiative 2.2.1.3: Identify foreign locations where a physical presence by CBP Attaches and Representatives is necessary to achieve CBP's strategic goals and secure approval for and placement of personnel there.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and Expenses  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 13:** Reduction to Legacy Application Standardization  
 PPA: MA Border Security and Control between Ports of Entry  
 MA Border Security Inspections and Trade Facilitation  
 Program Decrease: Positions 0, FTE 0, Dollars \$(2,938)

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							4,969	4,787	1,384,608
Program Decrease							-	-	(2,938)
<b>Total Request</b>	<b>4,804</b>	<b>4,572</b>	<b>1,029,255</b>	<b>4,788</b>	<b>4,606</b>	<b>1,385,103</b>	<b>4,969</b>	<b>4,787</b>	<b>1,381,670</b>

**Description of Item**

CBP budget request includes a reduction of \$2.938 million for Legacy Application Standardization. CBP will be consolidating infrastructure environments where possible, and looking to retire/consolidate legacy government developed applications.

**Justification**

The deployment of Universal Technology Operating Platform & Integration Appliance (UTOPIA) will provide the infrastructure necessary to consolidate/host CBP developed applications in a manner that will give Program Offices the best opportunity to gain efficiencies in common Operations & Maintenance, consistent back-up and recovery, fail-over, and eventually shared data infrastructure.

- UTOPIA will accomplish this through the use of technologies such as load balancing, web server, application server, and database servers.
  - Support for future applications using the Common Application Integration Project/Enterprise Service Bus (ESB) model
  - Support for existing Java and .Net applications to allow them to migrate to the UTOPIA
- Provide standardized infrastructure design to support rapid provisioning of environments.
- Reduce the complexity and number of different application technology stacks.
- Facilitate adoption of standardized application technology stacks.
- Leverage application infrastructure as a general support system to drastically reduce Certification & Accreditation (C&A) efforts when deploying new applications

The goal is to consolidate commodity hardware and COTS infrastructure that supports the ability to scale both up and out. This type of environment reduces the cost of hardware and provides High Availability by removing any single points of failure. The implementation provides the ability to scale applications by adding additional commodity servers as well as by leveraging virtualization and clustering. The application framework provides additional functionality in that it supports multiple designs including portal, Single Sign-On, ESB, and Service Oriented Architecture. The flexibility of the design enables current applications to move to the environment without significant modifications. As business users identify new requirements, application teams can adopt the advanced technologies supported by the UTOPIA.

### **Impact on Performance (Relationship of Decrease to Strategic Goals)**

Without the successful deployment of UTOPIA, the development Program Offices will continue to use the current practice of installing and building each individual component of the infrastructure. This approach is complex, costly, time consuming, and significantly hinders the scalability of the CBP infrastructure.

This program decrease is being taken to support higher priority missions; Mission 1, Securing America's Borders and Mission 2, Securing and Expediting the Movement of People and Flow of Goods. CBP personnel costs are increasing at a rate faster than payroll inflation factors. The following are reasons why CBP personnel costs have continued to grow: continued maturation of the newly hired workforce, including their promotions to full performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and increased workforce benefits, such as retirement and healthcare.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and Expenses  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 14:** Reduction to Trade National Account Manager, Rulings, & Revenue Policy Staff  
 PPA: Inspections Trade and Travel Facilitation  
 Program Decrease: Positions (21), FTE (21), Dollars \$(2,360)

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							22,006	22,028	2,513,422
Program Decrease							(21)	(21)	(2,360)
<b>Total Request</b>	<b>20,793</b>	<b>20,152</b>	<b>2,541,920</b>	<b>22,006</b>	<b>21,893</b>	<b>2,484,235</b>	<b>21,985</b>	<b>22,007</b>	<b>2,511,062</b>

**Description of Item**

This request includes a savings of \$2.360 million which will be realized by reducing FTEs in the following offices: 2 FTE National Account Managers (NAMS); 5 FTE from Trade, Policy and Program (TPP) Revenue Branch; and 14 FTE from the Regulations and Rulings (RR) Policy Staff.

**Justification**

These reductions will ensure that our highest priority capabilities are fully funded to achieve our core missions.

**Impact on Performance (Relationship of Decrease to Strategic Goals)**

The cost reduction will enable CBP to support its highest priorities. The sustainment of the officer workforce directly supports the DHS goal 2: Securing and Managing Our Borders and CBP Goal 1: Secure our Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and Expenses  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 15:** Reduction associated with closing 2 National Targeting & Analysis Groups  
 PPA: Inspections Trade and Travel Facilitation  
 Program Decrease: Positions (12), FTE (12), Dollars \$(1,386)

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							22,006	22,028	2,513,422
Program Decrease							(12)	(12)	(1,386)
<b>Total Request</b>	<b>20,793</b>	<b>20,152</b>	<b>2,541,920</b>	<b>22,006</b>	<b>21,893</b>	<b>2,484,235</b>	<b>21,994</b>	<b>22,016</b>	<b>2,512,036</b>

**Description of Item**

CBP will close two National Targeting and Analysis Groups (NTAG); one located in Dallas, Texas and the other in Chicago, Illinois. These closures will yield a savings of \$1.386 million.

**Justification**

The workload generated by the Dallas and Chicago NTAG facilities would shift to other existing NTAGs. CBP will reduce its International Trade Specialists by 12 FTEs. This reduction will primarily affect the International Trade Specialists working on revenue collection issues. Consequently, the workload associated with revenue collections will be shifted to the NTAGs. International Trade Specialists at the remaining NTAGs, who currently develop targeting, analysis and measures for IPR AD/CVD, and Textiles, would absorb the targeting, analysis and measures for Agriculture, Trade Agreements, and Revenue. This strategy minimizes the effect of losing these NTAGs.

**Impact on Performance (Relationship of Decrease to Strategic Goals)**

NTAG supports the following CBP and DHS goals and objectives:

DHS Goal 2: Effectively Control U.S. Air, Land, and Sea Borders

CBP Goal 2: Ensure the efficient flow of legitimate trade and travel across U.S. borders.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and Expenses  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 16:** Deactivation of 9 inland Border Patrol Stations  
PPA: Border Security Control  
Program Decrease: Positions 0, FTE 0, Dollars \$(1,300)

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							23,301	23,306	3,562,996
Program Decrease							-	-	(1,300)
<b>Total Request</b>	<b>23,104</b>	<b>22,683</b>	<b>3,683,893</b>	<b>23,301</b>	<b>23,306</b>	<b>3,530,994</b>	<b>23,301</b>	<b>23,306</b>	<b>3,561,696</b>

**Description of Item**

OBP recommends the deactivation of nine inland stations. The stations are: Billings, MT; Twin Falls, ID; Abilene, Texas; San Angelo, TX; Riverside, CA; Dallas, TX; San Antonio, TX; Lubbock, TX; and Amarillo, TX.

**Justification**

These locations were chosen on the basis of a study that looked at a larger population of inland stations. The study assessed the stations' operational utility relative to the Border Patrol's current operating environment and their contributions to operations at the immediate border. The evaluation included an assessment of historical apprehension data and a review of the operational risk associated with deactivation. The 43 agents currently assigned to these positions will be reassigned to other stations. The \$1.3 million in estimated savings is comprised of \$1.1 million in costs associated with GSA or CBP leases and approximately \$200 thousand in utility costs.

**Impact on Performance (Relationship of Decrease to Strategic Goals):**

The deactivation of these inland stations is necessary to reduce costs and support CBP's priority to maintain maximum agent staffing along the border. It directly supports DHS goals 2.1.1 and 2.3.2 for Securing and Managing Our Borders. It also supports CBP Goal 1: Secure our Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel. The decrease will ensure maximum effectiveness of the agent force while reducing costs and realizing efficiencies elsewhere. Without this decrease, the alternative to reduce costs would be to reduce the agent force, risking increased illegal entries between the ports of entry.

## V. Exhibits and Other Supporting Material

### A. Justification of Proposed Legislative Language

For necessary expenses for enforcement of laws relating to border security, immigration, customs, agricultural inspections and regulatory activities related to plant and animal imports, and transportation of unaccompanied minor aliens; purchase and lease of up to 7,500 (6,500 for replacement only) police-type vehicles; and contracting with individuals for personal services abroad; [\$8,680,118,000] **\$9,010,581,000**; of which [\$3,274,000] **\$3,285,000** shall be derived from the Harbor Maintenance Trust Fund for administrative expenses related to the collection of the Harbor Maintenance Fee pursuant to section 9505(c)(3) of the Internal Revenue Code of 1986 (26 U.S.C. 9505(c)(3)) and notwithstanding section 1511(e)(1) of the Homeland Security Act of 2002 (6 U.S.C. 551(e)(1)); of which not to exceed \$38,250 shall be for official reception and representation expenses; of which not less than [\$287,901,000] **\$280,819,000** shall be for Air and Marine Operations; of which such sums as become available in the Customs User Fee Account, except sums subject to section 13031(f)(3) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(f)(3)), shall be derived from that account; of which not to exceed \$150,000 shall be available for payment for rental space in connection with preclearance operations; of which not to exceed \$1,000,000 shall be for awards of compensation to informants, to be accounted for solely under the certificate of the Secretary of Homeland Security: Provided, That for fiscal year [2012] **2013**, the overtime limitation prescribed in section 5(c)(1) of the Act of February 13, 1911 (19 U.S.C. 267(c)(1)) shall be [\$35,000] **\$40,000**; and notwithstanding any other provision of law, none of the funds appropriated by this Act may be available to compensate any employee of U.S. Customs and Border Protection for overtime, from whatever source, in an amount that exceeds such limitation, except in individual cases determined by the Secretary of Homeland Security, or the designee of the Secretary, to be necessary for national security purposes, to prevent excessive costs, or in cases of immigration emergencies: **Provided further, That of the amount provided under this heading, \$261,523,000 is for necessary expenses for the United States Visitor and Immigrant Status Indicator Technology program, as authorized by section 110 of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (8 U.S.C. 1365a), of which \$161,110,000 shall remain available until September 30, 2015.** [: Provided further, That the Border Patrol shall maintain an active duty presence of not less than 21,370 full-time equivalent agents protecting the borders of the United States in the fiscal year: Provided further, That the Commissioner of U.S. Customs and Border Protection shall submit to the Committees on Appropriations of the Senate and the House of Representatives, with the congressional budget justification, a multi-year investment and management plan, to include each fiscal year starting with the current fiscal year and the 3 subsequent fiscal years, for inspection and detection technology supporting operations under this heading, including all non-intrusive inspection and radiation detection technology, that provides\_]

[(1) the funding level for all inspection and detection technology equipment by source;]

[(2) the inventory of inspection and detection technology equipment by type and age;]

[(3) the proposed appropriations for procurement of inspection and detection technology equipment by type, including quantity, for deployment, and for operations and maintenance;]

[(4) projected funding levels for procurement of inspection and detection technology equipment by type, including quantity, for deployment, and for operations and maintenance for each of the 3 subsequent fiscal years; and]

[(5) a current acquisition program baseline that\_]

[(A) aligns the acquisition of each technology to mission requirements by defining existing capabilities]

of comparable legacy technology assets, identifying known capability gaps between such existing capabilities and stated mission requirements, and explaining how the acquisition of each technology will address such known capability gaps;]

[(B) defines life-cycle costs for each technology, including all associated costs of major acquisitions systems infrastructure and transition to operations, delineated by purpose and fiscal year for the projected service life of the technology; and]

[(C) includes a phase-out and decommissioning schedule delineated by fiscal year for existing legacy technology assets that each technology is intended to replace or recapitalize].(Department of Homeland Security Appropriations Act, 2012.)

**Explanation of Changes:**

## B. FY 2012 to FY 2013 Budget Change

**Rent Mission Statement**

CBP leases a substantial portion of its real property assets through GSA and also by direct lease delegation to non-federal sources. This PPA includes funds to support the rental of facilities, space, buildings, structures, and land along with rent-related building charges and services, including utilities and services provided by the Federal Protective Service (FPS). The Rent PPA supports the Office of Border Patrol, Office of Field Operations, Office of Air and Marine, and the Mission Support activities.

**Inspections Trade and Travel Facilitation Mission Statement**

The purpose of Inspections, Trade and Travel Facilitation at Ports of Entry (POEs) is to facilitate the flow of legitimate travel and trade across U.S. borders, while ensuring that threats to the United States are not allowed entry, using technology, intelligence and risk information, targeting, and international cooperation in the screening of entering international cargo and travelers and departing export cargo. This program reduces the potential of terrorists, instruments of terror, and contraband from entering our country, while facilitating the legal flow of people and trade by deploying CBP officers, agricultural specialists, and import specialists to the ports of entry. The goal of this program is to improve

compliance with trade regulations and other mandatory import/export guidance while increasing the security of the United States.

**International Cargo Screening Mission Statement**

International Cargo Screening (ICS), which includes CBP's Container Security Initiative (CSI) and Secure Freight Initiative (SFI), enhance the security of maritime containerized shipping from exploitation by terrorists. ICS's goal is three-fold: (1) to expand operations to new critical international seaports; (2) to secure and improve operations at existing ports; and (3) to encourage global efforts to enhance maritime container security through capacity building. Working with foreign administrations, CSI is designed to achieve a more secure maritime trade environment while ensuring the need for efficiency in global commerce. The three core elements of the program are: (1) establishing security criteria and identify high-risk containers; (2) scanning those containers identified as high-risk prior to arrival at U.S. ports; and (3) using technology to quickly scan high-risk containers.

**Other international programs Mission Statement**

The goal of Other International Programs is to extend the U.S. zone of security beyond U.S. Borders by promoting international border security and global standards. In this arena, CBP implements programs and initiatives that support the U.S. Government's objectives in anti-terrorism, border security, non-proliferation, export controls, immigration and capacity building. This program's efforts foster and facilitate legitimate international trade, increase compliance, build alliances to combat trans-national crime, reduce corruption, strengthen border controls, promote the rule of law and enhance economic stability throughout the world. This is accomplished through the development and maintenance of collaborative relations with foreign governments, the development of international strategies, and representation of CBP positions in various international forums, international technical assistance and training, and the negotiation of international agreements.

**C-TPAT Mission Statement**

The Customs-Trade Partnership Against Terrorism (C-TPAT) is a partnership between the Federal government and private industry. It is an effort that CBP has undertaken with the business community to secure the supply chain. The goal of C-TPAT is to develop and maintain a secure supply chain, from factory floor to port of entry, which enables CBP to facilitate trade and ensure safe and secure borders. C-TPAT is designed to use and enhance the security processes and procedures currently employed by the trade community and ensure that international shipments are not compromised or diverted by terrorists or their accomplices.

**Summary Justification and Explanation of Changes**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change

**Trusted Traveler Programs (TTP) Mission Statement**

CBP's trusted traveler programs enhance the agency's ability to expedite the process and facilitate known, low risk "trusted travelers" arriving into the United States by allowing CBP officers additional time to focus on higher risk, unknown travelers; develop and implement national policies related to trusted traveler programs; provide guidance to the field locations on the operation of trusted traveler programs; strategize the growth of current programs and the development and implementation of new programs; and respond to congressional and industry inquiries of trusted traveler program related matters.

**Inspection and Detection Technology Mission Statement**

CBP relies on Non-Intrusive Inspection (NII) technology to secure the borders has become more and more critical. In conjunction with CBP's many other initiatives (24-Hour and Trade Act rules, Automated Targeting System (ATS), Container Security Initiative (CSI), Customs-Trade Partnership Against Terrorism (C-TPAT) etc.), NII is part of a multi-layered approach which allows CBP to work smarter and faster in recognizing potential terrorist threats. These complementary layers enhance security and protect our nation. CBP has long recognized that an adversary can defeat any single system or device. For this reason, CBP cannot rely on any single technology or inspection process. Instead, CBP uses various technologies in different combinations to substantially increase the likelihood that a nuclear or radiological weapon, weapons grade material, illegal aliens or other contraband being smuggled across the United States borders will be detected. NII technologies are viewed as force multipliers that enable CBP officers to screen or examine a larger portion of the stream of commercial traffic while maintaining the flow of legitimate trade, cargo and travelers. Since 9/11, NII technology has been the cornerstone of the CBP multi-layered enforcement strategy. Technologies currently deployed to our nation's land, sea and airports of entry include large-scale X-ray and gamma-ray imaging systems, as well as a variety of portable and handheld technologies, to include radiation detection technology.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	4,869	2,219	2,116	(103)

**Systems for Targeting Mission Statement**

At the core of CBP's ability to achieve its critical border security objectives and maintain the flow of lawful commerce is CBP's ability to identify high-risk travelers and goods for inspection while allowing the vast majority of law abiding travelers and commerce to continue to their destination without unnecessary delay. Legislation and regulatory action, such as the Trade Act of 2002 and the Safe Port Act, respectively, have made it mandatory to provide advance information about passengers and goods arriving in the U.S. CBP uses computer technology and rule-based applications to analyze the data provided on passengers and shipments arriving in the U.S. CBP applies its targeting methods against the data to determine which passengers or shipments need to be segregated for a closer look and possibly inspection. The main platform CBP uses to analyze arriving passenger and shipment data is the Automated Targeting System (ATS). ATS is a web-based enforcement and decision support tool that is the cornerstone for all CBPs targeting efforts. ATS incorporates intelligence information and technologies to target suspect inbound and outbound shipments for examinations and passengers for inspection. In this way, ATS allows CBP officers to focus their efforts on cargo shipments and passengers that most warrant further attention. ATS standardizes names, addresses, ship names, and similar data so these data elements can be more easily associated with other business data to form a more complete picture of a passenger, import, or export in context with previous behavior of the parties involved. Every passenger and shipment processed through ATS is subjected to a real-time risk evaluation. Risk assessment strategies are multi-tiered in their approach and are founded on complex statistical studies, data analysis, and rules based on knowledge engineering.

**National Targeting Center Mission Statement**

The priority mission of the U.S. Customs and Border Protection's National Targeting Centers is to provide around-the-clock tactical targeting and analytical research support for CBP anti-terrorism efforts. The NTC facilities are primarily staffed by CBP officers, border patrol agents and field analysis specialists who are experts in passenger and cargo targeting for air, sea, and land operations in the inbound and outbound environments. The NTC staff develops tactical targets from raw intelligence in support of the CBP mission to detect and prevent terrorists and terrorist weapons from entering the United States. NTC supports all CBP field elements, including CSI personnel stationed in countries throughout the world, with additional research assets for passenger and cargo examinations.

**Training at the Ports of Entry Mission Statement**

The Office of Training and Development exists to develop and deliver basic, mid, and advanced level training programs for all CBP employees, especially mission critical occupations (e.g., CBP Officers, Agricultural Specialists, Imports Specialists, and Entry Specialists) at the ports of entry. This training empowers CBP employees with the necessary skill sets to achieve the goal of combating terrorism, improving border security, improving inspection and control, and facilitating trade.

**Border Security Control Mission Statement**

The Office of Border Patrol (OBP) prevents the entry of terrorists and their instruments of terror, illegal immigrants, and contraband between the ports of entry. This mission accomplished through the judicious use of resources including personnel, surveillance technology, communications, transportation, facilities, and mission support activities. Border Patrol agents deter uncontrolled entry into the interior of the U.S. by: the rapid detection, interception, and apprehension of illegal entrants at or near the border; interdicting or deterring illegal aliens, drug smugglers, potential terrorists and criminals from attempting illegal entry between ports-of-entry; and causing persons seeking admission into the U.S. to present themselves at designated ports for inspection.

### Summary Justification and Explanation of Changes

**Training Between the Ports of Entry Mission Statement**

The Office of Training and Development exists to provide core operational training for Border Patrol Agents whose primary responsibility lies between the ports of entry. This training empowers CBP employees with the necessary skill sets to achieve the goal of safeguarding the borders of the United States. This training ensures that CBP is able to rapidly deploy a highly motivated, well-trained workforce, both on a temporary and permanent basis, who can quickly respond to potential terrorist threats, shifts in smuggling patterns and other national security threats.

**Air and Marine Operations Personnel Compensation and Benefits Mission Statement**

The purpose of Air and Marine Salaries is to apply the skills and expertise of CBP air and marine personnel to deter, interdict, and prevent acts of terrorism arising from unlawful movement of people and goods across the borders of the United States. Having aircraft and vessels along the borders reduces the quantity of drugs entering the U.S. and minimizes threat levels. The goal of this program is to deny the use of air, land and coastal waters for conducting acts of terrorism and other illegal activities against the United States.

**US-VISIT Mission Statement**

The mission of US-VISIT program is to provide biometric identification through the collection, maintenance, and sharing of biometric information and selected biographic data to authorized DHS, Federal, State, local government and law enforcement agencies, and through international data-sharing agreements with strategic foreign partners in support of the DHS mission. Through its use of biometrics, US-VISIT collects, stores, and shares digital fingerscans and digital photographs for subsequent verification. This biometric information is paired with biographic information used to establish and verify an individual's identity, as well as match that identity against criminal and immigration violator watchlists. US-VISIT also analyzes biographic data for identification of criminal and immigration violator watchlists criminal and immigration violator watchlists.

## **BUDGET REQUEST AND SUPPORTING INFORMATION**

### **U.S. Customs and Border Protection Border Security Fencing, Infrastructure, and Technology (BSFIT)**

#### **I. Appropriation Overview**

##### **A. Mission Statement for Border Security Fencing, Infrastructure, and Technology:**

The Border Security Fencing, Infrastructure, and Technology appropriation supports the Department of Homeland Security (DHS) and CBP missions by delivering detection and surveillance technology systems, Tactical Infrastructure (TI), and Tactical Communications Modernization (TACCOM). DHS's border security mission, as outlined in the 2010 Quadrennial Homeland Security Review (Mission II – Securing and Managing Our Borders), is to prevent the illegal flow of people and goods across U.S. air, land, and sea borders while both expediting the safe flow of lawful trade and commerce, and disrupting and dismantling transnational criminal organizations. DHS has set an objective of substantially increasing situational awareness at our borders in order to help detect and classify potential threats and effectively resolve them. In addition, DHS has made a priority of building our existing partnerships with our North American neighbors in order to collaboratively address threats to the continent.

Correspondingly, a priority mission of CBP, as outlined in CBP's Missions, Goals, and Priorities, Fiscal Years (FY) 2011-2013, is Securing America's Borders (Line of Business [LOB] 1), with a goal to secure the Southwest border by increasing the probability of apprehension and consequences of attempting to enter the United States illegally or engaging in cross-border crime. LOB 1 reflects CBP's core mission area of securing the border and preventing contraband, illegal migrants, terrorists and terrorist weapons from entering the United States. LOB 1 includes the people that perform the mission as well as air platforms, marine assets, technology, and equipment that they use.

CBP's top priority along the Southwest border is securing the border in Arizona while managing illegal flows elsewhere. Given the threat level, this requires a heavy personnel presence as well as a variety of detection and surveillance technologies and tactical infrastructure. The Northern border is a very different threat environment. It spans thousands of miles where Federal law enforcement personnel assets are limited; therefore, intelligence, aviation assets, partnerships, and technology are essential to addressing threats and reducing vulnerabilities.

The final component of the Arizona Plan is the delivery of Integrated Fixed Tower (IFT) systems in five Border Patrol station Areas of Responsibility (AoR). CBP's acquisition strategy is to procure, deploy and test the first AoR deployment as quickly as possible (using FY 2012 enacted funds). The FY 2013 BSFIT request supports the acquisition of additional IFT AoR system deployments in Arizona. CBP is aggressively pursuing cost savings and other efficiencies to complete the procurement and deployment for four out of an expected five systems with this and prior year requests. Simultaneous procurement and deployment of multiple systems offers CBP the opportunity to take advantage of cost efficiencies (bulk procurement of system hardware components) and construction efficiencies (better management of labor resources). The program cost and schedule is ultimately dependent on the costs and technical viability (readiness) of industry bids received through the source

selection process as well as continued negotiations with land owners. The IFT contract will be awarded by the end of FY 2012.

The BSFIT technology portfolio including the Arizona Plan is managed by the Office of Technology Innovation and Acquisition (OTIA) Program Management Office (PMO). BSFIT technology programs deliver detection and surveillance systems to both the Southwest and Northern borders. These technologies increase situational awareness and assist law enforcement personnel in identifying and resolving illegal activity. The TI program, which is managed by the Office of Administration's Border Patrol Facilities and TI (BPFTI) PMO, consists of projects that provide persistent impedance (fencing, etc.) and agent access (roads, drainage, etc.) to the border. TACCOM, which is managed by the Office of Information and Technology (OIT) Wireless Systems Program Office (WSPO), provides communications capabilities that permit CBP agents and officers to coordinate their activities in all environments and are essential to agent safety.

Additionally, CBP is actively engaged with senior-level and working-level elements of the Department of Defense (DoD) to identify and exploit DoD technologies to further border security efforts. OTIA is executing a Memorandum of Understanding (MOU) with Joint PMO Guardian and the U.S. Army's Rapid Equipping Force PM NV/RSTA to facilitate the transfer of DoD technologies and resources, specifically from the Southwest Asia retrograde operations, as these resources become available for immediate reuse within CBP. CBP often works with DoD to tailor already-existing technology (originally designed for a DoD application) to CBP's mission and evaluate potential future technologies.

In response to direction in the *FY 2012 Consolidated Appropriations Act* (P.L. 112-74) Conference Report that "all funds for OTIA shall be requested within the "Salaries and Expenses" appropriation for fiscal year 2013," CBP has taken two actions. First, starting in FY 2013, all OTIA Government Full Time Equivalent (FTE) and associated expenses were moved from the BSFIT Program Management (PM) PPA into either the Headquarters Management and Administration (HQ M&A) PPA within Salaries and Expenses (S&E) or, in the case of those associated with tactical infrastructure, to Facilities Management. This funding restructuring complies with Congressional guidance and provides Congress a clearer, consolidated view of Government FTE throughout CBP. This also removes ambiguity regarding OTIA authority to use its organizational resources across CBP (i.e. non-BSFIT programs) to fulfill its role as CBP Component Acquisition Executive. Second, starting in FY 2013, CBP requests program management support services and environmental mitigation via the BSFIT Development and Deployment (D&D) PPA. Historically, these activities resided in the BSFIT PM PPA. The result of this accounting restructuring is the better alignment of these resource requests to the actual programs and projects that determine the need for the service(s), and also the liquidation and discontinuation of the BSFIT PM PPA.

### **B. Budget Activities:**

The BSFIT appropriation is comprised of two major investment accounts PPAs: 1) Development and Deployment and 2) Operations and Maintenance.

- **Development and Deployment**

Development and Deployment funds provide engineering, development, testing, construction, and fielding of surveillance and detection technologies, including sensor systems, radars, and day/night cameras to improve the ability of CBP operational forces to detect, identify, classify, and track illegal entries and items of interest (IOIs) across all border environments. These sensor systems are deployed on fixed towers, mobile platforms (wheeled vehicles and aircraft), and through agent portable systems. Starting in FY 2013 project-specific environmental activities and support contract will be included in the D&D request.

- **Operations and Maintenance (O&M)**

Operations and Maintenance funds provide logistics support – supply, maintenance, and training services – to operate and maintain all border surveillance technology deployments as well as legacy surveillance and communication systems. A combination of Government and contractor logistics activities will provide maintenance management, system support analysis, call center operations, asset management, critical property, spare parts storage, inventory records management, field services, and training.

### **C. Budget Request Summary:**

DHS requests \$327.099 million for the FY 2013 BSFIT appropriation. The FY 2013 BSFIT request will fund acquisition, delivery, and sustainment of prioritized border security capabilities and services for the operational users. Funding will also be used to respond to changing threats and evolving operational needs. The Department's FY 2013 BSFIT request includes funding for the following:

1. **Integrated Fixed Towers** – Southwest border technology investment remains focused in Arizona utilizing existing, proven technology tailored to the distinct terrain and population density of each border region. The FY 2013 appropriations request funds the acquisition of at least one IFT AoR system, as described in the Arizona Technology Plan. Through potential cost and construction efficiencies, CBP seeks to accelerate the procurement of IFT systems for all five AoRs. IFT systems will be classified as a Non-Developmental Item (NDI) and use a full and open competition acquisition strategy with a Firm-Fixed Price contracting vehicle.
2. **Northern Border Programs** – The Northern Border programs provide technology deployments and demonstrations for addressing the needs and vulnerabilities of the Northern border maritime (river/lake) and cold weather environment. The FY 2013 request will support continued investment in technologies such as the continuation of procurement/testing and evaluation efforts for Low Flying Aircraft Detection (LFAD), the deployment of Maritime Detection Project (MDP), and an Advanced Video Download Link (AVDL).
3. **Tactical Communications Modernization** – The TACCOM project is managed by WSPO, which is responsible for upgrading the Land Mobile Radio (LMR) systems used by CBP agents. TACCOM systems are the primary communications lifeline for more than 44,000 agents and officers and are critical to the success of CBP missions and operations. TACCOM capabilities are fundamental tools that permit CBP agents and officers to coordinate their activities in all environments, thus increasing agent safety and effectiveness.

4. **Program and Technical Support** – Provides for activities related to technical and program support such as systems engineering services, contractor PMO support, advanced technology road mapping, and modeling and simulation.
5. **Operations and Maintenance of Fielded Systems** – Provides logistics support—supply, maintenance, repair and training services—to operate and maintain border surveillance technology systems, as well as legacy surveillance and communication systems. A combination of government and contractor logistics activities will provide maintenance management, system support analysis, call center operations, asset management, spare parts storage, management and inventory records, field services, and training.

In collaboration with CBP Facilities Maintenance & Engineering (FM&E), O&M provides maintenance and repair (M&R) services for all types of tactical infrastructure, both legacy and newly constructed, to include maintenance and repair of fences, gates, roads, bridges, drainage structures, grates, lighting, electrical systems, and debris removal. O&M also includes the development and implementation of a tracking system to capture and store data so that future maintenance work can be better scoped and planned. Finally, O&M provides M&R services for the real property associated with RVSS towers including maintenance and repair of the site itself, mechanical and electrical components, fuel tanks, racks and other components and may even include the replacement of the entire physical tower itself.

1. FY 2011 actuals includes funding from the *FY 2010 Emergency Border Security Supplemental* (P.L. 111-230)
2. FY 2012 excludes a rescission of prior-year unobligated balances in the amount of \$7.0 million, pursuant to P.L. 112-74.

### III. Current Services Program Description by PPA

**Department of Homeland Security**  
**U.S. Customs and Border Protection**  
**Border Security Fencing, Infrastructure, and Technology:**  
**Program Management**  
**Program Performance Justification**  
(Dollars in Thousands)

**PPA: Program Management**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	<b>205</b>	<b>205</b>	<b>80,323</b>
<b>2012 Enacted Budget Authority</b>	<b>205</b>	<b>205</b>	<b>54,375</b>
2013 Adjustments-to-Base	(205)	(205)	(54,375)
<b>2013 Current Services</b>	-	-	-
<b>2013 Total Requested Budget Authority</b>	-	-	-
Total Change 2012 to 2013	(205)	(205)	(54,375)

CBP requests \$0 million for Program Management

- Decrease of -\$23.627 million for a transfer to realign OTIA funding to Salaries and Expenses (S&E)
- Decrease of -\$3.247 million for a transfer to realign OTIA Funding: TI
- Decrease of -\$27.327 million for an adjustment in Program Management PPA and realign funding to D&D PPA
- Decrease of -\$174.000 million for consolidation of rent into the Rent PPA

**CURRENT SERVICES PROGRAM DESCRIPTION:**

In response to direction in the *FY 2012 Consolidated Appropriations Act* Conference Report that “all funds for OTIA shall be requested within the “Salaries and Expenses” appropriation for fiscal year 2013,” CBP has taken two actions. Starting in FY 2013, all OTIA Government FTE and associated expenses were moved from the BSFIT PM PPA into either the S&E HQ M&A PPA or, in the case of those associated with tactical infrastructure, to Facilities Management. This funding restructuring complies with Congressional guidance and provides Congress a clearer, consolidated view of Government FTE throughout CBP. This also removes ambiguity regarding OTIA authority to use its organizational resources across CBP (i.e. non-BSFIT programs) to fulfill its role as CBP Component Acquisition Executive (CAE).

<b>2013 Total Requested Budget Authority</b>	-	-	<b>138,283</b>
Total Change 2012 to 2013	-	-	5,035

CBP requests \$138.3 million for Operations & Maintenance. The request includes:

- Increase of \$5.035 million for an increase to Operations & Maintenance PPA

**CURRENT SERVICES PROGRAM DESCRIPTION:**

O&M funds provide logistics support—supply, maintenance, repair and training services—to operate and maintain border surveillance technology systems, as well as legacy surveillance and communication systems. A combination of Government and contractor logistics activities will provide maintenance management, system support analysis, call center operations, asset management, spare parts storage, management and inventory records, field services, and training.

O&M provides maintenance and repair (M&R) services for all types of tactical infrastructure, both legacy and newly constructed, to include maintenance and repair of fences, gates, roads, bridges, drainage structures, grates, lighting, electrical systems, and debris removal. O&M also includes the development and implementation of a tracking system to capture and store data so that future maintenance work can be better scoped and planned. Finally, O&M provides M&R services for the real property associated with RVSS towers including maintenance and repair of the site itself, mechanical and electrical components, fuel tanks, racks and other components and may even include the replacement of the entire physical tower itself.

FY 2013 funding will also be used to support O&M requirements for fielded systems, specifically, mobile agent-centric systems and Northern border air & marine awareness technology deployed in FY

2012. Moreover, additional BSFIT funding is required to support the continued sustainment of SBI net Block 1 and RVSS (new & replacement).

**Department of Homeland Security**  
**U.S. Customs and Border Protection**

**Development and Deployment**  
**Program Performance Justification**  
(Dollars in Thousands)

**PPA: Development and Deployment**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	-	-	<b>193,174</b>
<b>2012 Enacted Budget Authority</b>	-	-	<b>212,377</b>
2013 Adjustments-to-Base	-	-	(165,326)
<b>2013 Current Services</b>	-	-	<b>47,051</b>
2013 Program Change	-	-	141,765
<b>2013 Total Requested Budget Authority</b>	-	-	<b>188,816</b>
Total Change 2012 to 2013	-	-	(23,561)

CBP requests \$188.8 million for Development and Deployment. The request includes

- Increase of \$27.327 million for an adjustment in Program Management PPA, of which all is from realignment of existing funding to D&D PPA
- Decrease of -\$192.653 million to non-recur the FY 2012 Development & Deployment enhancements
- Increase of \$10.0 million for an enhancement for Northern Border Technology
- Increase of \$91.765 million for an enhancement for Integrated Fix Towers
- Increase of \$40.0 million for an enhancement for Tactical Communications

**CURRENT SERVICES PROGRAM DESCRIPTION:**

D&D funds new investments and surveillance and detection technologies, including sensor systems, radars, and day/night cameras to improve CBP operational forces' ability to detect, identify, classify, and track illegal entries and items of interest across all border environments. These systems are deployed on fixed structures, mobile platforms (wheeled vehicles and aircraft), and on the ground.

Additionally, D&D provides for related activities, such as technical support, systems engineering services, prime contractor program management, advanced technology development, Operational Test & Evaluation support, and environmental planning, assessment, and mitigation activities associated with deploying technology and Tactical Infrastructure.

D&D investment funding is requested as a program change, causing a portion of D&D funding to be recorded as a “new initiative.” The adjustments-to-base reflect the non-recurrence of previous D&D program changes and funds previously requested through the Program Management PPA. The FY 2013 request consists of three program increases (which are described in greater detail in section IV: Program Justification Changes).

FY 2013 funding for the Arizona Technology plan will be used to procure one or more IFT AoR systems in Arizona. TACCOM will receive funding to complete the P-25 modernization and the Digital in Place project while conducting initial planning for TacNet. Northern border will continue to enhance surveillance, detection, and intelligence gathering by further investment in Advanced Video Download Link (AVDL), Low Flying Aircraft Detection, and the Maritime Detection Project Funding for Technology/Systems Engineering Support provides systems engineering services, advanced technology roadmapping, and modeling and simulation.

Starting in FY 2013, BSFIT environmental funds and activities related to sustaining ongoing efforts and technical support such as systems engineering services, program management office support, advanced technology roadmapping, and modeling and simulation will be requested through the D&D PPA. Previously, these funds were requested through the PM PPA.

Also beginning in FY 2013, all program contractor support funds will be moved from the BSFIT PM PPA to the BSFIT D&D PPA. BSFIT programs utilize contractor support resources to provide specialized program management skills and expertise, not readily available in the Government workforce. Contractors provide support personnel, tools, planning, processes, procedures, and other resources to enable program objectives to be successfully implemented.

## IV. Program Justification Changes

**Department of Homeland Security  
U.S. Customs and Border Protection  
Border Security Fencing, Infrastructure, and Technology:  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 1:** Enhancement for Integrated Fixed Towers  
PPA: Development and Deployment  
Program Increase: Positions 0, FTE 0, Dollars \$91,765

### Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	47,051
Program Increase							-	-	91,765
<b>Total Request</b>	-	-	<b>193,174</b>	-	-	<b>212,377</b>	-	-	<b>138,816</b>

### Description of Item

The FY 2013 request for \$91.8 million is designed to support the acquisition and delivery of one or more Integrated Fixed Tower (IFT) Areas of Responsibility (AoR) systems.

### Justification

\$91.8 million is requested to support the continued deployment of proven, effective surveillance technology along the highest trafficked areas of the Southwest Border in Arizona. Funds will be used to procure and deploy commercially available technology tailored to the operational requirements of the Border Patrol, distinct terrain, and population density of each border region. These funds will allow CBP to fully deploy a mix of IFT and other mobile equipment along the Southwest border.

Currently, the final component of the Arizona Plan to be delivered is Integrated Fixed Tower (IFT) systems in five AoR. CBP's acquisition strategy is to procure, deploy and test the first AoR system as quickly as possible (using FY 2012 enacted funds). The FY 2013 BSFIT request supports acquisition of follow-on IFT AoR system deployments in Arizona. CBP is aggressively pursuing cost savings and other efficiencies in order to accelerate the procurement of all five systems. Based on the current program cost estimate for the fixed price, commercial system, CBP is cautiously optimistic that funds made available in FY 2012 and FY 2013 will support the procurement of up to four total deployments. Simultaneous procurement and deployment of multiple systems offers CBP the opportunity to take

advantage of cost efficiencies (bulk procurement of system hardware components) and construction efficiencies (better management of labor resources). The program cost and schedule is ultimately dependent on the costs and technical viability (readiness) of industry bids received through the source selection process as well as continued negotiations with land owners. The IFT contract will be awarded by the end of FY 2012.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

This investment aligns to CBP's top priority, reducing illicit flows and crimes in Arizona, as stated in CBP's Missions, Goals, and Priorities, FYs 2011-2013. Funds requested will be used to respond to the operational needs of Office of Border Patrol (OBP) by delivering situational awareness of border activity through surveillance and detection to facilitate apprehension.

The IFT systems will provide automated, persistent, wide-area surveillance for the detection, tracking, identification, and classification of illegal entries. With the comprehensive, wide-area, persistent surveillance that IFT would provide, CBP will have increased opportunities to thwart or deter threats.

**Department of Homeland Security**  
**U.S. Customs and Border Protection**  
**Border Security Fencing, Infrastructure, and Technology:**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 1:** Enhancement for Tactical Communications  
PPA: Development and Deployment  
Program Increase: Positions 0, FTE 0, Dollars \$40,000

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	47,051
Program Increase							-	-	40,000
<b>Total Request</b>	-	-	<b>193,174</b>	-	-	<b>212,377</b>	-	-	<b>87,051</b>

**Description of Item**

The FY 2013 request includes \$40 million in Development and Deployment funding that will be used to:

- Complete development and deployment for the El Paso, Rio Grande Valley, and Houlton Border Patrol sectors
- Continue implementation of Digital in Place (DIP) project
- Initiate DHS Tactical Communications Network (TacNet) project
- Provide Wireless Systems Program Office (WSPO) support, such as staff salaries, supplies, leases, travel and etc.

**Justification**

CBP’s Land Mobile Radio (LMR) Tactical Communication (TACCOM) systems are the primary communications lifeline for more than 44,000 agents and officers that are critical to the success of CBP missions and operations. The TACCOM program upgrades and expands legacy analog hand-held radio communications to provide new digital technology with Advanced Encryption Standard (AES) protection, expanded coverage and capacity, and enhanced interoperability.

In FY 2010, CBP observed that there were some significant and critical limitations with its modernization approach that would not adequately address the growing need for mission-critical data like full motion video, sensor data, still-images, biometric information and location based situational awareness sought by CBP, Federal agencies and other public safety organizations. In late FY 2010, CBP recommended evaluating other models to deliver these capabilities, including subscription model on networks owned

by others such as the proposed National Public Safety Broadband Network. CBP tentatively refers to this new initiative as “TacNet” and is striving to award technology demonstrator projects to assess the feasibility of purchasing broadband communication systems through a third-party network service provider. Early in FY 2011, CBP outlined its new approach during an Acquisition Decision Event 1 (ADE-1) presentation to DHS, and was granted permission to proceed with an Analysis of Alternatives including Technology Demonstrators that will be the basis of the Analyze/Select phase of the DHS Acquisition Review Process.

On April 25, 2011, the CBP Executive Steering Committee provided approval for OIT to move forward with implementing the DIP project. This project will use funds formerly planned for the Laredo Focus Area Modernization to refresh in place all remaining CBP analog land mobile radio equipment nationwide to the digital P25 interoperability standard with AES and Over the Air Rekeying (OTAR) capabilities. It will also serve as the baseline configuration from which to continue modernization under TacNet. Since it would not involve new site build-out or frequency licenses (maintaining current capacity and coverage) many of the cost drivers and schedule delays inherent in a full-scale modernization effort would be avoided. Furthermore, this approach addresses CBP’s immediate need for a P25, AES platform and would allow CBP to achieve all the operational, training, and sustainment benefits of working from a common, unified, and digitized platform by FY 2014.

In summary, TACCOM will now focus on completing ongoing modernization projects in three Focus Areas (Houlton, El Paso, and Rio Grande Valley) and conduct a DIP “capstone” replacement of any remaining legacy analog LMR equipment in the remaining sectors. DIP will not provide any of the coverage or capacity enhancements provided by the other modernization projects, but will ensure a uniform baseline technology across the CBP TACCOM infrastructure. Moreover, it will position CBP for migration to next-generation tactical communications capabilities. Through TacNet, CBP is analyzing the most operationally effective and cost efficient way to provide data and video communications to the current voice-only capability as the next generation of tactical communications to support current, emerging, and future requirements.

### **Impact on Performance (Relationship of Increase to Strategic Goals)**

Specifically, TACCOM aligns with the initiative to “Design and implement a tactical communications plan” in CBP’s Missions, Goals, and Priorities, FYs 2011-2013. The TACCOM Modernization Program is upgrading tactical communications radio systems employed by CBP Border Patrol agents, Air Interdiction agents, Marine Interdiction agents, and CBP officers nationwide to provide a robust, open architecture P25-based system.

The LMR systems are the primary communications lifeline for agents and officers and are critical to their safety, as well as the success of their missions and operations. Upgrades will benefit CBP law enforcement agents and officers by providing increased capability, including security, and improved interoperability. These improved abilities will dramatically increase agent effectiveness and enhance Border Patrol’s mobile and flexible response capabilities.

CBP’s approach to providing tactical voice communications capabilities to end-users has evolved over the years. The immediate need for a P25, AES platform would allow CBP to achieve all the operational, training, and sustainment benefits of working from a common, unified, and digitized platform by the end of FY 2014. The need for a more life-cycle cost effective approach to tactical communications has driven

CBP to pursue an Analysis of Alternatives for the next generation of tactical communications delivery and to re-scope its own TACCOM Modernization Program to minimize LMR investments while meeting critical near-term communications needs. The TACCOM investment will have a lifecycle of at least 10 years, and thus will support CBP law enforcement end-users through the transition period needed to establish a next-generation broadband network.

**Department of Homeland Security**  
**U.S. Customs and Border Protection**  
**Border Security Fencing, Infrastructure, and Technology:**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 1:** Enhancement for Northern Border  
PPA: Development and Deployment  
Program Increase: Positions 0, FTE 0, Dollars \$10,000

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	47,051
Program Increase							-	-	10,000
<b>Total Request</b>	-	-	<b>193,174</b>	-	-	<b>212,377</b>	-	-	<b>57,051</b>

**Description of Item**

FY 2013 funding of \$10 million is requested to support continued investment in technologies for the Northern Border, such as continuation of FY 2011 procurement/testing and evaluation efforts for Low Flying Aircraft Detection (\$5 million), the deployment of Maritime Detection Project (\$4 million), and Aircraft Video Downlink (\$1 million). The Northern Border program has already invested \$16.7 million in FY 2010 and FY 2011 for these projects.

**Justification**

The threats of concern on the Northern border include, but are not limited to: terrorist activity, drug smuggling, contraband smuggling, human smuggling, and *mala fide* travelers.

The Northern Border programs provide technology deployments and demonstrations for addressing the needs and vulnerabilities of the Northern border maritime (river/lake) and cold weather environment. Proven, stand-alone technologies are deployed to provide immediate operational benefits. These demonstrations and deployments explore how best to integrate various sensors, border security organizations, and mission operations in order to optimize border security in a vast, geographically challenging environment.

**Projects planned for 2013:**

Low Flying Aircraft Surveillance – Drug Trafficking Organizations (DTOs) have used float planes, helicopters, and fixed-wing aircrafts to deliver loads of narcotics along the Northern border to catchers on the ground (often leaving and returning to Canada within 15 – 30 minutes). Current law

enforcement resources are not sufficient due to a lack of persistent detection, identification, and tracking technology to support appropriate law enforcement resolution to this threat. The area's remoteness limits chances of being seen or receiving eye-witness reports. The topography along the Northern Border is varied, from flat plains to heavily forested mountainous terrain; consequently radar cannot be the "one-size-fits-all" solution along the Northern Border. Therefore, CBP seeks to provide a solution that will include a mix of technologies for low-flying aircraft surveillance.

Maritime Radar – The Maritime radar capability will provide detection and sorting capabilities to identify cross-border traffic and suspicious vessel activities. Radar will also provide intercept solutions and aids threat classification based on movement patterns (speed, position, and other factors). The project will deploy up to three radar systems in the Buffalo Sector area.

Aircraft Video Data Link (AVDL) – OAM utilizes a number of technologies, including the collection of full-motion video (FMV) by sensors mounted on various air and maritime assets, to provide a line of sight for agents to conduct interdiction and intelligence gathering. This OAM asset currently has limited ability to transmit and receive this video to ground stations where agents/officers can leverage the information in support of operations. The AVDL project will expand OAM's current ability to share and exploit FMV collected by OAM air and maritime assets that are monitoring the Northern Border.

Further investments will be focused on interoperability and collaboration between representatives of all components of CBP, United States Coast Guard and other DHS organizations, Federal law enforcement agencies, state and local law enforcement, and Canadian officials. The objective is to make balanced investments in filling capability gaps against priority threats in high-threat areas across the Northern border.

### **Impact on Performance (Relationship of Increase to Strategic Goals)**

Northern Border investments further CBP's strategic objective to secure the Northern border through an integrated approach to border enforcement as shown in CBP's Missions, Goals, and Priorities, FYs 2011-2013. This request enhances U.S. and Canadian coordination regarding shared intelligence with state, local, and tribal law enforcement.

## **V. Exhibits and Other Supporting Material**

### **A. Justification of Proposed Legislative Language**

For expenses for border security fencing, infrastructure, and technology, [400,000,000] **\$327,099,000** to remain available until September 30, [2014] **2015**.[: Provided, That, of the total amount made available under this heading, \$60,000,000 shall not be obligated until the Committees on Appropriations of the Senate and House of Representatives receive a detailed plan for expenditures, prepared by the Commissioner of U.S. Customs and Border Protection, and submitted not later than 90 days after the date of enacted of this Act, for a program to establish and maintain a security barrier along the borders of the United States of fencing and vehicle barriers, where practicable, and of other forms of tactical infrastructure and technology: Provided further, That the Commissioner of U.S. Customs and Border Protection shall submit to the Committees on Appropriations of the Senate and the House of Representatives, at the time that the President's budget is submitted each year under section 1105(a) of title 31, United States Code, a multi-year investment and management plan for the Border Security Fencing, Infrastructure, and Technology account, that includes for each tactical infrastructure and technology deployment: (1) the funding level in that budget and projected funding levels for each of the next 3 fiscal years, including a description of the purpose of such funds; (2) the deployment plan, by border segment, that aligns each deployment to mission requirements by defining existing capabilities, identifying known capability gaps between such existing capabilities and stated mission requirements related to achieving operational control, and explaining how each tactical infrastructure or technology deployment will address such known capability gaps; and (3) a current program baseline that:(A) notes and explains any deviations in cost, performance parameters, schedules, or estimated date of completion from the most recent acquisition program baseline approved by the Department of Homeland Security Acquisition Review Border;(B) includes a phase-out and life-cycle recapitalization schedule delineated by fiscal year for existing and new tactical infrastructure and technology deployments that each deployment is intended to replace or recapitalize; and (C) includes qualitative performance metrics that assess the effectiveness of new and existing tactical infrastructure and technology deployments and inform the next multi-year investment and management plan related to achieving operational control of the Northern and Southwest borders of the United States.] (Department of Homeland Security Appropriations Act, 2012.)

### Development and Deployment Mission Statement

Development and Deployment provides for surveillance and detection which consist of sensor systems, such as Unattended Ground Sensors (UGS), radars, and day/night cameras to improve CBP operational forces ability to detect, identify, classify, and track illegal entries and items of interest (IOIs) across all border environments. These sensor systems are deployed on fixed and relocatable towers, mobile platforms (wheeled vehicles and aircraft), and on the ground. Examples include newly developed systems, such as SBI-net Block 1, and existing systems, such as the Remote Video Surveillance System and Mobile Surveillance System. Development and Deployment also provides for Command, Control, Communications, and Intelligence (C3I) which includes sensor control and data processing, tracking, identification and classification, friendly (blue) force tracking, enhanced intelligence collection and analysis/dissemination tools, and shared situational awareness, i.e., Common Operating Picture (COP). This integrated network relies on upgraded and interoperable digital field communications, improved Command and Control (C2) facilities, an enhanced wireless communications network such as P-25 Tactical Communications, and network and security operations. Development and Deployment

funds Tactical Infrastructure (TI), built to create persistent impedance against illicit cross-border activity. TI includes pedestrian and vehicle fencing, roads, bridges, brush removal, and lighting installed in relevant areas to support border enforcement activities. Finally, Development and Deployment provides for related activities, such as technical support, systems engineering services, prime contractor program management and systems engineering, advanced technology development, Operational Test & Evaluation support, and environmental planning, assessment and mitigation activities associated with fielding technology and tactical infrastructure.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change

**Operations and Maintenance Mission Statement**

Operations and Maintenance funds provide logistics support, supply, maintenance, and training services to operate and maintain all SBInet deployments and legacy surveillance and communication systems. A combination of government and contractor logistics activities will provide maintenance management, system support analysis, call center operations, asset management, critical property, spare parts storage, management and inventory records, field services, and training. In addition, O&M provides maintenance and repair (M&R) services for all types of TI, both legacy and newly constructed, to include maintenance and repair of fences, gates, roads, bridges, drainage structures, grates, lighting, and electrical systems; vegetation management and control; and debris removal. It also includes the development and implementation of a tracking system to capture and store O&M data so that future maintenance work can be better scoped and planned.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **U.S. Customs and Border Protection Automation Modernization**

### **I. Appropriation Overview**

#### **A. Mission Statement for Automation Modernization**

U.S. Customs and Border Protection's (CBP) core mission of securing our nation's borders, while facilitating the flow of legitimate travel and trade is complex and constantly evolving. As a result, sufficient maintenance and modernization of CBP's automated systems is critical to meet our organizational mandates and to achieve the 24x7 availability of critical functionality to CBP officers and agents. Modernization efforts, in particular, often increase the efficiency of CBP's workforce as they have better and faster access to data and services that help frontline personnel to protect the nation's borders and facilitate the flow of cargo and people. CBP's automation framework comprises two large information technology structures: the Automated Commercial Environment (ACE) and the Critical Operations Protection and Processing Support (COPPS). ACE and COPPS are funded by the Automation Modernization Appropriation and directly supports Line of Business (LOBs) 2, 3, and 5. ACE funding supports the Cargo and Conveyance subprogram under LOB 2, Securing and Facilitating Flows of Cargo. The COPPS PPA supports two subprograms and their associated LOBs: the Inbound Inspection subprogram under LOB 3, Securing and Facilitating Flows of People and the Management subprogram under LOB 5, Enterprise Business Services. Modernizing these structures will help increase the growth, collaboration, and professionalism of all CBP staff, as well as help to increase domain awareness.

ACE represents the most ambitious automation effort CBP has undertaken to date. It has been developed and deployed in phases that have already yielded tangible benefits to CBP, other government agencies and the trade community. As ACE functionality is introduced, the associated segments of its predecessor Automated Commercial System (ACS) will be replaced. Given the wide-ranging functions that ACE will automate, future phases will be designed to provide a useful segment of capability. As each segment is completed, users will have more robust, easy-to-use and accessible tools to aid in securing U.S. borders, facilitating legitimate trade, and targeting illicit goods.

COPPS funding supports COPPS IT infrastructure, Terrorism Prevention Systems Enhancement (TPSE), and TECS Modernization; all three efforts collectively support the ongoing CBP and DHS missions to defend and protect the Nation. CBP manages the operational availability of its infrastructure via COPPS, which provides nearly all the CBP information technology (IT) infrastructure necessary to operate and maintain mission-critical IT systems required to secure the borders while facilitating legitimate trade and travel. CBP TECS Modernization Program is modernizing TECS, a key system for border enforcement and sharing of information concerning people who are inadmissible or may pose a threat to the United States. These capabilities will be modernized through the TECS Modernization multi-year project. TECS Modernization will improve and sustain DHS and other Federal agency screening capabilities into the future and support new

screening requirements and functionalities. TPSE focuses on enhancing our system infrastructure and the supporting enterprise services that enhance our continuity of operations.

## **B. Budget Activities**

### **Automated Commercial Environment (ACE)/ International Trade Data System (ITDS)**

ACE is an initiative designed to reengineer trade business processes and modernize the IT systems that support them. Initially, ACE was created in response to the Title VI of the North American Free Trade Agreement Implementation Act, (P.L. 103-182; commonly referred to as the Modernization Act (Mod Act) of December 1993), to focus on import processing. Later, other elements of customs modernization, such as enforcement, were included. An overarching goal of the Mod Act was to place greater responsibility on the trade community to comply with import requirements.

The terrorist attacks of September 11, 2001, changed ACE's focus from a multi-year modernization effort to an initiative that enhances national border security and expedites lawful trade. This will allow for unprecedented integration of information and communication between CBP, other participating government agencies (PGAs), and the trade community. This change in direction incorporated International Trade Data System (ITDS) into the ACE initiative. ITDS assists PGAs in making use of ACE to support their border security, product safety, and international trade missions. Specifically, ITDS is the program that assists the PGAs to design, develop, and integrate PGA requirements into ACE Cargo Release functionality. Additionally, ITDS provides guidance on the legal implications of PGA integration into ACE and serves as a forum for agency issues. Through ITDS, ACE will provide a "single window" for filing and facilitating the exchange of trade and transportation information to improve business operations and facilitate lawful trade. A total of 46 government agencies are currently participating in the ACE/ITDS initiative.

CBP has aligned ACE with the DHS 2010 Quadrennial Homeland Security Review Mission 2: Securing and Managing our Borders. ACE will help reduce our Nation's vulnerability to changing threats without diminishing economic security, by providing threat awareness, prevention, and protection for the homeland. Specifically, ACE will provide DHS personnel with more automated up-to-date tools and information to decide, before a shipment reaches U.S. borders, what cargo should be targeted because it poses a potential risk and what cargo should be expedited because it complies with U.S. laws. ACE also supports the revenue collection activity under Mission 6, Providing Essential Support to National and Economic Activity.

### **Critical Operations Protection and Processing Support**

COPPS funding supports COPPS IT infrastructure, TECS modernization, and TPSE. COPPS provides nearly all of CBP's IT infrastructure to operate and maintain mission-critical IT systems requisite to securing borders while facilitating legitimate trade and travel.

TECS Modernization is a multi-year project that will enhance CBP's mission. It provides critical border enforcement and POE processing capabilities and is a key tool for the sharing of data information for consideration of benefits and regarding inadmissible individuals. TPSE focuses on enhancing our system infrastructure and the supporting enterprise services that enhance our continuity

of operations. The TPSE will enable 24x7x365 systems operational availability to meet the processing and storage/backup requirements for passenger screening while enhancing the existing systems.

### **C. Budget Request Summary**

In FY 2013, CBP requests \$327.526 million 63 positions and 63 full-time equivalents (FTEs) for Automation Modernization. This request includes an adjustment to base decrease of \$-11.749 million and a program increase of \$5.0 million.

### III. Current Services Program Description by PPA

**Department of Homeland Security  
U.S. Customs and Border Protection  
Automation Modernization:  
ACE ITDS  
Program Performance Justification  
(Dollars in Thousands)**

**PPA: ACE ITDS**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	<b>62</b>	<b>62</b>	<b>193,749</b>
<b>2012 Enacted Budget Authority</b>	<b>62</b>	<b>62</b>	<b>140,000</b>
2013 Adjustments-to-Base	-	-	794
<b>2013 Current Services</b>	<b>62</b>	<b>62</b>	<b>140,794</b>
<b>2013 Total Requested Budget Authority</b>	<b>62</b>	<b>62</b>	<b>140,794</b>
Total Change 2012 to 2013	-	-	794

CBP requests \$ 140.794 million for ACE/ITDS. This request includes:

- An increase of \$32,000 for the FY 2013 Pay Increase
- A decrease of -\$7.0 million for transfer of funding from ACE PPA to Automated Targeting Systems PPA
- An increase of \$7.762 million to maintain current operational capability

#### **CURRENT SERVICES PROGRAM DESCRIPTION**

The Automated Commercial Environment/ International Trade Data System Program, Project, Activity (PPA) supports the Cargo and Conveyance subprogram under Line of Business 2, Securing and Facilitating Flows of Cargo. ACE is a CBP program designed to reengineer agency business processes and modernize the IT systems to support them. The goal of ACE is to allow and assist importers to institute reasonable care in fulfilling requirements as outlined in the MOD Act, and to facilitate efficiencies in processing for both federal agencies and the trade community.

ACE benefits include:

- Enhanced cargo control business processes for imports and exports;
- Reduction of costly labor and paper intensive activities;
- Reporting of trade data to multiple agencies via a single, secure, Internet based portal;
- Enhanced revenue collection capability;
- Ability to view and manage trade activity from a national account perspective;
- Provision of, through ITDS, a “single window” for the collection and dissemination of trade data.

In addition, ACE allows other Government agencies to better fulfill the mandate set forth under the *Security and Accountability for Every Port (SAFE) Act of 2006* (P.L. 109-347), which requires agencies with licensing and admissibility requirements to participate in the ITDS. ITDS is the mechanism for coordinating intergovernmental involvement with ACE. Approximately 46 government agencies are currently participating in the ACE/ITDS initiative. Once fully utilized, ITDS will provide unprecedented interagency coordination and information sharing, ultimately making ACE the “single window” for the collection and dissemination of trade data. This capability reduces Government and private sector costs through the elimination of unnecessary paperwork while enabling electronic processing of trade documentation.

**Capabilities Delivered:**

To date, ACE has deployed 12 drops or phases of functionality, which are strengthening national security, facilitating the flow of legitimate trade, and providing industry with new tools that save them money and help them comply with U.S. laws.

Delivered Capabilities – 12 Successful Releases ACE Foundation, Account Creation, Periodic Payment, e-Manifest: Trucks, Screening Foundation, Targeting Framework, Advanced Targeting, Enhanced Accounts, Reference Data, Initial Entry Summary Types, Remaining Entry Summary Types (Anti-Dumping and Countervailing Duties (AD/CVD)), Post Summary Corrections (PSC) and Additional Functionality	
<b>Anti-Terrorism/Import Safety</b>	<b>Trade Facilitation</b>
Targets new information	Enables quicker processing
Links information on all entities	Fosters efficiency in the primary booth
Sends enforcement alerts	Provides trade partner savings
Uses business rules-based engine	Expands Participating Government Agency involvement
Allows end users to define and maintain rules	Provides trade community access to import data
Provides access to external intelligence data sources	Increases communication between CBP and trade partners
Increases efficiency between CBP and PGAs	Eliminates filing of routine paper forms
Provides enhanced targeting of all entry summaries via the Automated Targeting System (ATS)	Enables approximately 99 percent of entry summaries to be filed via ACE
Focused targeting increases referrals to secondary	Provides new ACE portal and Electronic Data Interchange (EDI) capabilities specific to AD/CVD entries and AD/CVD case management

**ACE Secure Data Portal**

This capability gives CBP and the trade community an account-based view of data, enabling companies to proactively monitor compliance issues and gives CBP a broader, national view of trade activities. Overall, there are more than 19,000 unique ACE portal accounts.

**Periodic Monthly Statement**

This capability allows importers and brokers with ACE accounts to centralize payment processing and to utilize Periodic Monthly Statement and payment capabilities through Automated Clearinghouse Credit and Debit. It also provides an initial customer account-based subsidiary ledger to interface with the CBP general ledger, for financial transaction processing and an expanded account view into account activity logs and exam findings. Other benefits include cash flow benefits through payment of duties and fees on a monthly basis, online tracking of trade activities through customized account views, and access to more than 100 customizable reports that can be used to track compliance and

monitor daily operations. On average, 55 percent of duties and fees are paid via Periodic Monthly Statement, representing approximately \$1.5 billion dollars per month.

### **The e-Manifest: Trucks**

This capability includes an automated truck manifest system that expedites information processing and brings the ACE portal interface to CBP officers. This enhanced security facilitates the clearance of trucks entering the country by providing CBP officers with access to shipment, crew, and conveyance data before the truck reaches the border. E-Manifest: Trucks enables targeting of illicit goods that require scrutiny and allows the free flow of legitimate trade. This capability is now operational at all land border Ports of Entry (POE). ACE has reduced truck processing times by more than 30 percent, enabling CBP officers to dedicate more time to border security activities.

### **The Screening and Targeting**

This capability is comprised of Targeting Framework and Advanced Targeting. The Screening and Targeting performs automated screening and targeting of inbound and outbound cargo across the borders of the United States and provides the framework for all U.S. Government agencies involved in security, economic, and safety missions to leverage advanced risk assessment information and automated targeting systems. This framework provides a modernized system with National Targeting Center analyst workflow, case management, and single sign-on capability. Through the Targeting Framework, the National Targeting Center has the ability to initiate activities, foster collaboration among analysts, and access past activity logs and external data sources for additional intelligence.

### **Entry Summary, Accounts, and Revenue (ESAR): Master Data and Enhanced Accounts (A1)**

These capabilities provide ACE access to virtually every entity doing business with CBP, and enhanced ACE Secure Data Portal account management features that have helped lay the foundation for a future integrated, account-based financial and entry summary processing system in ACE.

### **Initial Entry Summary Processing**

This functionality allows the trade community and CBP to file and process the most common entry summary types via ACE. These entry summaries represent nearly 99 percent of the annual volume of entry summaries that could be filed via ACE. The new ACE entry summary processing capabilities allow ACE Secure Data Portal account holders the option to receive and respond to CBP forms electronically through the ACE portal. Electronic responses are stored with associated entry summaries, enabling sharing of information within CBP nationwide. Modernizing the entry summary process enhances uniformity and facilitates compliance for those filing for entry. Entry summary processing for remaining entry types will be added in the future. In addition to the primary benefits of the capabilities above, actual benefits realized by stakeholders such as PGAs, CBP, and the trade community through ACE include the following:

- The Food Safety Inspection Service (FSIS) can act faster to detect, detain, and remove from commerce potentially dangerous agricultural products. Between FY 2005 and FY 2006, the amount of ineligible product detected, detained, and removed from commerce increased from 97,000 pounds to 2.87 million pounds. Seizures continued in FY 2007 with 2.04 million pounds; in FY 2008 with 3.69 million pounds; and in FY 2009 with 1.87 million pounds of ineligible product.

- Agencies are now able to administer and maintain real-time screening and targeting systems that help CBP officers and analysts secure the supply chain and support CBP's layered defense strategy for inbound and outbound cargo.
- ACE facilitates the collection and analysis of information, integrating that information into larger analytic efforts, as well as developing and evaluating targeting rules that are intelligence-based and constantly refreshed.
- ACE offers periodic payment capabilities whereby the trade community can wait until the 15th working day of the next month to pay for shipments released during the previous month, which can result in significant cash flow benefits. CBP currently collects approximately \$1.5 billion per month via the ACE system.
- ACE deployed the first automation of the truck manifest, e-Manifest, Truck (Release 4), that has reduced border processing time of truck cargo by more than 30 percent compared to paper-based manifests (based on a national average of select land border POEs).
- ACE offers targeted reports to support in-house audits, discrepancy reports to identify systemic errors and entry summary reports to provide insight into cargo entries under review by CBP.
- The ACE Secure Data Portal provides trade users with near real-time access to their CBP transactional data.
- ACE portal users can access approximately 390 standard and customizable reports on company-specific compliance, transaction, and financial data from both ACE and the ACS.
- ACE provides the collection of additional trade information to segregate high risk cargo while facilitating lawful entry of legitimate goods.

### **Entry Summary Types (Anti-Dumping and Countervailing Duties (AD/CVD))**

This functionality adds AD/CVD entries summaries to ACE. In addition, ACE became the system of record for AD/CVD case management. These cases are linked to filers' accounts, so it is a more efficient way to keep track of AD/CVD entries and associated activity with these entries.

This release of functionality brought CBP team reviews of entry summaries to ACE, which allows:

- Electronic tracking of entry summary reviews.
- Electronic correspondence to the Trade to improve the speed at which reviews can be completed and revenue collected.
- Enhanced targeting capabilities in the post entry environment.

### **Post Summary Corrections (PSC) and Additional Functionality capabilities include:**

- Electronic submission by the Trade of changes to entry summaries.
- Consistent enforcement of changes trade filers make to entry summaries.
- Revenue collection is more effective.
- Paper-filing of Post-Entry Amendments are reduced.
- All PSC changes to entry summaries are connected to the filer's account in ACE.

## **ACE Adjustments to Base**

The transfer of \$7.0 million of funding from the ACE PPA will allow CBP to consolidate all targeting funding within the Systems for Targeting PPA. This PPA supports activities which give CBP the ability to achieve its critical border security objectives and maintain the flow of lawful commerce by identifying high-risk travelers and goods for inspection while allowing law-abiding travelers and commerce to move without unnecessary delay.

The increase of \$7.8 million will allow CBP to maintain current operations and maintenance (O&M) requirements for all delivered ACE/ITDS functionality includes maintaining system hardware, software, servers, troubleshooting, outreach to stakeholders, training users how to use the system, end-user support, and program management. ACE/ITDS is scheduled to deploy additional functionality in March 2012. This release of functionality modernizes Rail and Sea manifest as well as the In-Bond process. Deploying this additional functionality will result in increased O&M costs for the first year post-deployment. After initial technical bugs and defects are corrected, the O&M costs will decrease in FY 2014. This ongoing support prevents disruptions in the flow of cargo at the borders.

**Department of Homeland Security

<b>2013 Current Services</b>	<b>1</b>	<b>1</b>	<b>181,732</b>
2013 Program Change	-	-	5,000
<b>2013 Total Requested Budget Authority</b>	<b>1</b>	<b>1</b>	<b>186,732</b>
Total Change 2012 to 2013	-	-	(7,543)

CBP requests \$186,732,000 million for COPPS. The request includes:

- A decrease of -\$12.543 million for a DHS Management Efficiency regarding IT Infrastructure
- An increase of \$5.0 million for an enhancement for TECS Modernization

**CURRENT SERVICES PROGRAM DESCRIPTION**

The COPPS PPA supports two subprograms and their associated LOBs: the Inbound Inspection subprogram under LOB 3, Securing and Facilitating Flows of People and the Management subprogram under LOB 5, Enterprise Business Services. Funding in the COPPS PPA supports the following three areas:

- COPPS IT infrastructure – COPPS IT infrastructure funding supports the operation and maintenance of a complex network of hardware, software, and data switches and routers that must be in place to transmit screening, targeting, terrorist watch list, and apprehension data from CBP’s mission-critical IT systems to the front line.
- TECS modernization – TECS Modernization is a multi-year project that will enhance CBP’s passenger screening capabilities by developing and deploying a modernized TECS to transition to the CBP common IT infrastructure and to better meet operational needs of CBP officers at our nation’s POEs.
- Terrorism Prevention Systems Enhancement (TPSE) – TPSE will enable 24x7x365 systems operational availability to meet processing and storage/backup requirements for passenger screening.

The following is further description of the three areas funded via the COPPS PPA.

## **COPPS IT Infrastructure**

The IT infrastructure is the data network that supports among other things, the data storage, transmission, and delivery of all vetting/screening data from CBP and/other DHS data centers to CBP's front line. In addition, the IT infrastructure supports the day-to-day requirements of CBP's mission support personnel. The IT infrastructure provides connectivity and data transmission for users within CBP, PGAs, and CBP's trade and travel partners. CBP's IT infrastructure connects users to a vast array of data related to operational areas of passenger and cargo processing, targeting, and border enforcement, as well as mission support areas of finance, human resource, and training. The infrastructure is a complex network of field equipment hardware, software, data routers and switches that exist in each of CBP's 1,200 field locations, and connects to the data center (data storage, retrieval, engineering, network monitoring, etc.) capabilities. The IT infrastructure enables users of CBP applications to connect to CBP's mission critical applications, from CBP and DHS data centers, to access data necessary to conduct the mission of CBP nearly every minute of every day.

As such, it is critical that CBP's IT infrastructure is secure, available, and reliable 24x7x365 to enable CBP officers and agents to make timely decisions and to take appropriate action in protecting our Nation's borders. The network and application systems must also be accessible to meet growing pre-screening requirements in response to daily changing risks and threats, and the growth of international trade and immigration. On a typical day, CBP systems process data from over 1,000,000 inbound passengers, 350,000 passenger vehicles, 60,000 truck, rail, & sea containers, 2,500 aircraft, 550 vessels, and 85,000 merchandise entries – collecting over \$74 million in revenue.

The processing of these passengers, vehicles, trucks, rail, sea, etc. are all dependent on the availability and quick data response from CBP's IT infrastructure to transmit passenger and cargo vetting and screening data to the front-line. CBP's infrastructure provides the rapid accessibility of vetting data so that admissibility decisions can be made by CBP's front line within seconds. Further, pre-departure manifest data from world-wide locations must be received and vetted, providing a board/no-board response, before the departure of international flights destined for the United States. The applications supported by CBP's IT infrastructure allow for a unified border presence and provide for more efficient and effective sharing of information among trade and law enforcement agencies.

The CBP's IT infrastructure also serves a variety of Federal, state, local, and international government agencies. These agencies have varying missions and strategic goals, but collectively their purpose is to minimize threats to the American people. The IT applications and the quick access to data to make admissibility decisions are vital tools that CBP and other federal agencies use to defend our borders.

The COPPS funding provides the majority of funding for on-going necessary operations and maintenance of network services, data center services, Technical Support Desk (help desk), hardware/software and e-mail. Network Services include the hardware, software, and communication services that allow any two computers or other devices to exchange data.

Data Center Services include any facility (room or building) used for equipment or the storage, management, and dissemination of electronic data and information to multiple users. Data Center Operations includes the management and oversight of data center facilities and computer operations activities that support the DHS and CBP's missions. The services provided include Continuity of

Operations and Disaster Recovery planning and execution, conduct change control boards (to validate and document any change made to production systems), manage equipment within the data center, provide email services, ensure efficient system operations, database and information management, operate and report incidents from the Situation Room, and perform duty officer operations (24x7 monitoring of data and operations from one point to another).

Help Desk Services include an information and assistance resource that troubleshoots problems with computers and other information technology products. The Technology Service Desk is the initial single point of contact for reporting system, application, email, LAN, communications and hardware problems for CBP IT worldwide.

Hardware includes backup generators, scanners, hand held computers, a network operations center, LANs, WANs, routers, encryptors, gateways, firewalls, mainframe computers, workstations, file/email/database/application servers, modems, and VAN connections. Software includes application development tools, Operating Systems, Program and Configuration Management tools, Office Automation tools, Section 508 tools, testing tools, LAN/WAN administration tools, and other management tools.

Email Services include the acquisition, deployment and ongoing support for email platform hardware and software. Examples of costs included in email services” are system software (e.g. Microsoft Exchange, Lotus Notes), hardware (servers, workstations, storage – SAN, tape backup), diagnostic tool, troubleshooting tools, antivirus, intrusion detection, and management tools for change, configuration and release management.

Numerous major mission critical systems, applications, and programs depend on the information technology infrastructure to access and transmit data from some 3,600 CBP facilities to the CBP National Data Center (NDC) to perform and execute CBP’s mission of protecting our nation’s borders.

Listed below are some of CBP’s major applications: Automated Commercial Environment (ACE) / International Trade Data System (ITDS);

- Automated Commercial System (ACS);
- TECS;
- Automated Export System(AES);
- Advanced Passenger Information System (APIS) and e-APIS;
- CAOS (Combined Automated Operating System);
- Free and Secure Trade (FAST);
- Seized Asset and Case Tracking System (SEACATS);
- CBP’s Financial and Human Resources Management Systems;
- Port Radiation Identification Detection and Evaluation (PRIDE) system;
- Enterprise Data Warehouse system;
- Border Patrol Enforcement Tracking System 2 (BPETS2);
- Automated Targeting Systems (various ATS environments);
- Container Security Initiative (CSI);
- Secure Freight Initiative (SFI);
- Global Enrollment System/Global Online Enrollment System (GES/GOES);

- Electronic System Travel Authorization (ESTA);
- US Passport;
- Western Hemisphere Travel Initiative (WHTI);
- DHS Secure Flight;
- DHS Router;
- Enterprise Geospatial Information Services (eGIS);
- ENFORCE (E3); and
- Virtual Learning Center (VLC).

These systems directly support CBP's mission. Many of these IT systems are funded by and described under other accounts but could not function without the basic IT infrastructure provided by COPPS.

### **TECS Modernization**

TECS Modernization is also funded within the COPPS PPA. TECS is a key passenger border enforcement system for CBP and DHS, and plays an essential role in the screening of travelers entering the U.S. and in supporting the screening requirements of other federal agencies. Maintaining TECS functionality is critical to CBP's border enforcement mission. The current TECS system is more than 20 years old and uses technology that will be increasingly difficult to support in the future. It is also expensive to maintain and is not easily adapted to meet future operational challenges. The multi-year TECS Modernization project will use an incremental approach with the following projects:

- Secondary Inspection is consolidating and replacing the functionality of three legacy processes for supporting passport control (immigration), baggage control, and agriculture inspections and the ability to view the results of previous secondary inspections. It will also modernize inspection logs, where additional information is documented regarding physical inspection of travelers, vehicles, or their belongings. It also navigates to the adverse actions application. This project will migrate the secondary inspection data from the legacy system to the target databases.
- High Performance Primary Query (HPPQ) will improve the backend processing capabilities to perform person and vehicle searches to better integrate available data within TECS and improve the effectiveness and efficiency of primary inspections. The Advance Passenger Information System (APIS) will also be modernized under this project. This is the first TECS Mod project to initiate the migration of data from the legacy system to the target databases.
- Travel Document and Encounter Data (TDED) will provide improved functionality for querying and/or validating travel documents and encounter data for passengers and conveyances. This project will support the migration of travel document and encounter data from the legacy system to the target databases.
- Lookout Record Data and Services will migrate mainframe-based lookout records to target infrastructure and provide CBP and will support the creation and maintenance of the lookout records. The project will also support internal CBP systems and external agencies with access to lookout records and TECS screening/vetting via services.
- Primary Inspection Processes will complete modernization for existing primary applications (Air, Sea, and Land), transitioning data and processing off of the legacy system and onto the modernization infrastructure and target databases. Business operations will be modernized to support random referral and operational messaging to primary officers (CAOS).

TECS provides critical border enforcement and POE processing capabilities. TECS is a key system for border enforcement and sharing of information about people who are inadmissible or may pose a threat to the security of the United States. CBP is collaborating with U.S. Immigration and Customs Enforcement (ICE) in the development of TECS Modernization to ensure the case management capabilities of the current TECS system are modernized. TECS is the primary lookout record database for all of DHS. TECS currently:

- Provides subject record “watch list” processing for DHS and other agencies. This includes maintenance of lookout records and vetting services against these records with PGAs and international partners;
- Supports primary and secondary inspections for persons and conveyances at the POEs.
- Tracks crossing history for persons and conveyances;
- Receives and processes passenger manifests from carriers.
- Provides screening services for more than 20 PGAs, trusted traveler programs, ESTA, and to support targeting analysis;
- Supports more than 70,000 users from over 20 federal agencies responsible for screening to determine benefits, traveler processing, investigations, case management, and intelligence.
- Provides entry/exit data to other systems/agencies;
- Provides a real time interface with Federal Bureau of Investigation’s National Criminal Information Center (NCIC) and Integrated Automated Fingerprint Information System (IAFIS) for on line-queries of wants/warrants and criminal history records;
- Provides a real time interface to National Law Enforcement Telecommunications System (Nlets) for on-line-queries of driver’s licenses, vehicle registration and state wants/warrants from all 50 states and Canada;
- Provides a real time interface with the US-VISIT IDENT system for collection and verification of fingerprints of non-U.S. citizens.
- Provides a real-time interface to travel document issuing authorities. The travel document photos and biographic data are displayed at primary and secondary inspection, and made available for data share with other federal stakeholders as provisioned in the memoranda of understanding. These issuing authorities include the Department of State, U.S. Citizenship and Immigration Services, CBP’s Trusted Traveler Programs, departments of motor vehicles of states and Canadian provinces with enhanced driver’s licenses, and Indian Tribes;
- Processes over two million transactions daily; and
- Supports the case management solution for ICE investigations including functions such as Investigative Case Management, Money Laundering Tracking and Reporting, Casino and Bank Secrecy Act data, Telephone Analysis and other functionalities unique to ICE’s mission. Included within ICE’s budget is funding to modify the portion of TECS that is unique to its mission.

### **Terrorism Prevention Systems Enhancements**

Additionally, TPSE is funded within the COPPS PPA. TPSE was initiated in FY 2008 to enhance critical infrastructure, monitoring capabilities, networking and computing capabilities to support our worldwide passenger vetting requirements such as facilitating electronic travel authorization, pre-clearance of passengers coming into all POEs and analyzing passenger data for terrorist and threat

analysis. TPSE is intended to ensure 24x7 systems availability, network redundancy, and monitoring in the Passenger and Targeting areas. The TPSE infrastructure enhancements will be implemented at the CBP National Data Center (NDC), the two DHS Data Centers, and targeted POEs, thereby improving availability and reliability. TPSE will further CBP's efforts to enable 24x7x365 systems operational availability to meet the future processing and storage/backup requirements for passenger screening while enhancing the existing systems.

Strategic investments such as TPSE will ensure that the critical infrastructure services that enable continuous passenger systems operations are improved to meet the mission demand. These services include enhancing our monitoring capabilities, improving our current data center infrastructure, and enhancing our capability to maintain exact copies from our production facility to our continuity facility.

## IV. Program Justification Changes

**Department of Homeland Security  
U.S. Customs and Border Protection  
Automation Modernization:  
Justification of Program Changes  
(Dollars in Thousands)**

**Program Increase 1:** Enhancement for TECS Modernization  
**PPA:** **Critical Operations Protection and Processing Support**  
**Program Increase:** Positions 0, FTE 0, Dollars \$5,000

### Funding Profile

Current Services Level							1	1	181,732
Program Increase							-	-	5,000
<b>Total Request</b>	<b>1</b>	<b>1</b>	<b>197,603</b>	<b>1</b>	<b>1</b>	<b>194,275</b>	<b>1</b>	<b>1</b>	<b>186,732</b>

### Description of Item

CBP requests a \$5 million increase to the TECS Modernization program. This modernization effort is to be completed in September 2015. TECS Modernization will be solely maintenance beginning in FY 2016.

### Justification

#### **TECS Modernization**

TECS is a key border enforcement system for CBP and DHS. As such, TECS provides critical processing capabilities for sharing of information about people who are inadmissible or may pose a threat to the security of the United States. TECS is the primary lookout record database for all of DHS and plays an essential role in the screening of travelers entering the U.S. and in supporting the screening requirements of other federal agencies. Modernizing TECS functionality is critical to CBP's border enforcement mission. The current TECS system is more than 20 years old and uses technology that will be increasingly difficult to support in the future and expensive to maintain. The multi-year Modernization project will employ an incremental approach that addresses seven objectives as established in the CBP Mission Needs Statement:

1. Reduce the possibility of missing someone who should be intercepted by improving data integration and search capabilities. TECS Modernization will improve both the integrity of data

as well as search capabilities so front-line CBP officers can effectively make border crossing decisions;

2. Improve access to person-centric information by Government officials. TECS Modernization will provide an updated system with better access, improved information sharing, and tighter security over sensitive person-centric information;
3. Improve the effectiveness and efficiency of secondary inspections. TECS Modernization will simplify and streamline one of the most important CBP functions – Secondary Inspections. TECS Modernization will eliminate the need to re-enter redundant data and make it easier for end users to do their jobs;
4. Improve flexibility to incorporate new capabilities and respond to evolving threats. TECS Modernization will provide a more modular environment, more receptive to changes for meeting critical business objectives;
5. Provide a highly reliable and scalable system with quick response times. TECS Modernization is built on a much more scalable foundation so that CBP can grow and meet new emerging requirements;
6. Eliminate dated technologies that are no longer able to support the CBP mission over the long term. TECS Modernization will provide newer technologies that make it easier to maintain the system without taking the entire system down which disrupts critical field activities; and
7. Comply with CBP and DHS mandates such as Service Oriented Architecture. TECS Modernization will significantly improve how components and functions can be combined and configured into an overall compliant architecture.

### **Impact on Performance (Relationship of Increase to Strategic Goals)**

The requested funding will enhance the ability of TECS Modernization to meet technical and schedule requirements which allows for cost avoidance of maintaining the mainframe and associated database beyond FY 2015.

During FY 2013 TECS Modernization will have all five major projects under the TECS Modernization program under way. The requested increase of \$5 million will facilitate the coordination and dependencies between these projects to ensure that TECS Modernization stays on schedule and is completed by the end of FY 2015. Not completing TECS Modernization by the end of FY 2015 extends the reliance on expensive, unsupportable technology of critical border security functions for CBP, DHS, and OGAs who depend on TECS for their daily operations.

The COPPS PPA supports two subprograms and their associated LOBs: the Inbound Inspection subprogram under LOB 3, Securing and Facilitating Flows of People and the Management subprogram under LOB 5, Enterprise Business Services. This PPA supports the following CBP and DHS goals and objectives:

DHS Goal 1: Protect our Nation from Dangerous People.

CBP Mission Set 2: Securing and Facilitating the Movement of People and Goods.

Goal 2.1 More effectively divide shipments and travelers according to potential threats they pose.

## V. Exhibits and Other Supporting Material

### A. Justification of Proposed Legislative Language

For expenses for U.S. Customs and Border Protection automated systems, [\$344,275,000] \$327,526,000, to remain available until September 30, [2014] 2015, of which not less than [\$140,000,000] \$140,794,000 shall be for the Automated Commercial Environment.[: Provided, That of the total amount made available under this heading, \$25,000,000 may not be obligated for the Automated Commercial Environment program until the Commissioner of U.S. Customs and Border Protection submits to the Committees on Appropriations of the Senate and House of Representatives, not later than 60 days after the date of enactment of this Act, an expenditure plan for the Automated Commercial Environment program including results to date, plans for the program, and a list of projects with associated funding from prior appropriations and provided by this Act. (Department of Homeland Security Appropriations Act, 2012.) ]

### Critical Operations Protection and Processing Support Mission Statement

The Critical Operations Protection & Processing Support (COPPS) mission is to consolidate all U.S. Customs and Border Protection (CBP) Information Technology (IT) infrastructure requirements together.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	-	91	91	-
12.1 Benefits	-	31	31	-
Total, Salaries & Benefits	-	122	122	-

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
21.0 Travel	\$458	\$127	\$85	-\$42

In FY 2013, a decrease of \$42,000.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
23.3 Communications, utilities, and misc. charges	\$14,769	\$17,456	\$16,118	-\$1,338

In FY 2013, a decrease of \$1.338 million.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.2 Other services	\$109,676	\$114,118	\$101,636	-\$12,482

In FY 2013, a decrease \$12.482 million.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.7 Operation and maintenance of equipment	\$11,124	\$3,302	\$2,294	-\$1,008

In FY 2013, a decrease of \$1.008 million.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
26.0 Supplies and materials	\$196	\$18	0	-\$18

In FY 2013, a decrease of \$18,000.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
31.0 Equipment	\$61,380	\$72,039	\$66,477	-\$5,562

In FY 2013, a decrease of \$5.562 million.

**ACE ITDS Mission Statement**

ACE will provide tools and enhance the business processes that are essential to securing the U.S. borders from terrorists by providing intelligence required to target illicit goods, while ensuring the efficient processing of legitimate goods. ACE capabilities have been designed to identify potential risks, analyze information prior to arrival of people and cargo, and provide intelligence in easy-to-use formats. As a web-based system, ACE will provide users from government and the trade community with new, more efficient ways of accessing, processing, and sharing trade-related information.

### Summary Justification and Explanation of Changes

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **U.S. Customs and Border Protection Construction and Facilities Management**

### **I. Appropriation Overview**

#### **A. Mission Statement for Construction and Facilities Management**

U.S. Customs and Border Protection (CBP) strives to improve the planning, acquisition, execution, and management of its real property program and facilities portfolio. The Construction and Facilities Management account provides consolidated resources to plan, acquire, finance, manage, and sustain CBP's dynamic, multifaceted real property program and facilities portfolio across the acquisition life cycle. It enables CBP to determine the most appropriate facilities solution and strategy required to meet CBP's mission needs and fulfill operational priorities required to secure the Nation's borders. CBP occupies more than 3,600 facilities and 3,200 acres of land in the United States and internationally, which includes CBP owned and leased facilities, General Services Administration (GSA) owned and leased facilities, and other facilities acquired through interagency or other agreements.

#### **Mission Statement**

CBP is the frontline border security agency within the U.S. Department of Homeland Security (DHS) charged with the priority mission of preventing terrorists and terrorist weapons from entering the United States, while also facilitating the flow of legitimate trade and travel. More than 61,000 CBP employees manage, control, and protect the Nation's borders at and between the official ports of entry (POEs). CBP is responsible for protecting more than 5,000 miles of border with Canada, 1,900 miles of border with Mexico, and 95,000 miles of shoreline.

The CBP Construction and Facilities Management account provides the facilities solutions and associated infrastructure required to obtain and maintain operational control of the border. This account supports the Real Property Management Program in the Mission Support Line of Business. The Real Property Management Program encompasses the entire CBP facilities portfolio of owned and leased real property through all stages of the portfolio life cycle.

The Construction and Facilities Management account addresses the requirements for new, modernized, expanded, and sustained facilities to fulfill immediate mission-driven operational needs; accommodates increasing capacity demands associated with new agent, officer, pilot, and asset deployments; provides resources to correct deficiencies within existing facilities and structures; and allows CBP to proactively manage the real property inventory and facilities portfolio. The success of CBP's mission depends heavily on its physical infrastructure, specifically the facilities and infrastructure that support its operations and administrative support requirements. Adequate facilities and a robust real property program provide critical logistical and operational support to CBP's agents, officers, pilots, and other personnel.

CBP's diverse real property portfolio includes, but is not limited to: land, air, and sea POEs, Border Patrol stations, Border Patrol sector headquarters, Border Patrol checkpoints, forward operating bases or camps, laboratories, aviation hangars, marine piers/docks, administrative office space, classrooms and other training facilities, maintenance and repair facilities, parking facilities, vaults, firing ranges, intelligence and operations coordination centers, residential housing units, and parcels of land. In addition, CBP occupies land ports of entry (LPOEs) and office space in GSA's portfolio. The GSA rent associated with these facilities is funded in the Salaries and Expenses appropriation.

CBP facilities efforts are planned, executed, and managed by the Office of Administration, Facilities Management and Engineering (FM&E) Directorate, operating in conjunction with CBP offices, service providers, and its stakeholders. FM&E delivers facilities solutions through four integrated Program Management Offices, each supporting a single CBP office. This model provides customer-centric facility solutions to best fulfill the driving mission needs.

## **B. Budget Activities**

The Construction and Facilities Management account consists of two major Program, Project, and Activities (PPAs). These include the Facilities Construction and Sustainment PPA and the Program Oversight and Management PPA.

### Facilities Construction and Sustainment

The Facilities Construction and Sustainment PPA provides resources for all activities supporting the construction, acquisition, leasing, sustainment, and management of CBP's real property program and facilities portfolio. This includes, but is not limited to: program, facilities, and portfolio planning activities; environmental program support and environmental compliance requirements; real estate acquisition and disposal including leasing activities, right of entry, and fee-simple purchases; construction and demolition of real property assets, such as buildings and structures; property improvements including modernization, enhancements, expansion, and alterations of facilities and land improvements; design, architecture, and engineering services; construction and project management support; infrastructure connectivity; sustainment activities, such as maintenance, repairs, and operations; and all related activities and operational support required to provide turnkey facilities solutions. Resources for rent and rent-related costs, such as security services provided by the Federal Protective Service, are included in the Salaries and Expenses appropriation.

This PPA also includes funding to support CBP tunnel remediation. Tunnel remediation is the process whereby cross-border tunnels are physically secured and rendered unusable after discovery. The remediation process includes initial analyses, environmental services, project oversight and support, obtaining rights of entry, engineering/surveying, filling/plugging, inspection/acceptance, and reporting of associated status.

Currently, CBP's facilities plan calls for the following LPOEs to be completed in FY 2013: Nogales West/Mariposa, Arizona; Guadalupe, Texas; Van Buren, Maine; and Phase I of San Ysidro, California. Additionally, design and construction is planned to commence on Phase II of San Ysidro, California, and CBP will begin implementing the Tier III Outbound Infrastructure program across 10

Southwest Border LPOEs in order to implement a range of outbound infrastructure improvements. This work bolsters CBP's southbound inspection capabilities while facilitating processing efficiency and ensuring port security and officer safety. In addition, operations and maintenance costs are expected to rise in Fiscal Year (FY) 2014 to support these new facilities.

#### Program Oversight and Management

The Program Oversight and Management PPA provides for the necessary Government and support personnel, tools, planning, processes, procedures, and resource requirements in an integrated and effective manner to enable the Facilities Management and Engineering objectives to be successfully implemented. It provides resources for program management and support activities at the enterprise level to maximize operational efficiencies and guide strategic initiatives of the CBP Facilities Management and Engineering Directorate.

#### **C. Budget Request Summary**

DHS requests \$243.666 million and 243 full-time equivalents (FTEs) employees for the FY 2013 Construction and Facilities Management appropriation. This request includes a net adjustments-to-base increase of \$16.214 million, which reflects a transfer of existing resources for centralized utilities management, and tactical infrastructure that include Government personnel (24 FTE) and associated operational requirements. In addition, the request includes a program decrease of \$9.144 million.

<b>2013 Current Services</b>	-	-	<b>195,358</b>
2013 Program Change	-	-	(9,144)
<b>2013 Total Requested Budget Authority</b>	-	-	<b>186,214</b>
Total Change 2012 to 2013	-	-	3,714

U.S. Customs and Border Protection (CBP) requests \$186.214 million for Facilities Construction and Sustainment. The request includes:

- A decrease of -\$270,000 from the Fiscal Year (FY) 2012 National Targeting Center enhancement
- An increase of \$14.130 million for a transfer to centralize utilities management
- A decrease of -\$9.144 million for a reduction to Facilities Maintenance, Repairs, and Operations
- A decrease of -\$1.002 million from the FY 2012 Field Operations positions to staff new ports of entry (POEs) and to enhance operations

**CURRENT SERVICES PROGRAM DESCRIPTION**

CBP requests \$186.214 million in FY 2013 for the Facilities Construction and Sustainment Program, Project, Activity (PPA), which supports the Real Property Management Program in the Mission Support Line of Business. The Real Property Management Program encompasses the entire CBP facilities portfolio of owned and leased real property through all stages of the portfolio life cycle.

CBP depends heavily on the health and effectiveness of its physical infrastructure, specifically the facilities, buildings, structures, and land that support its operations and administrative support requirements. The Facilities Construction and Sustainment PPA provides the facilities and associated infrastructure required to obtain and maintain operational control of the border, a primary factor of CBP’s mission to prevent terrorists and terrorist weapons from entering the United States. Specific CBP facility types include, but are not limited to: POEs, Border Patrol stations, Border Patrol sector

headquarters, traffic checkpoints, forward operating bases, laboratories, aviation hangars, marine piers/docks, classrooms and other training facilities, maintenance and repair facilities, parking facilities, vaults, firing ranges, intelligence and operations coordination centers, administrative office space, residential housing units, and parcels of land. CBP occupies more than 3,600 facilities and 3,200 acres of land in the United States and internationally, which includes CBP owned and leased facilities, General Services Administration (GSA) owned and leased facilities, and other facilities acquired through interagency or other agreements. The Real Property Inventory Plan contains additional details and is submitted with these budget materials.

Resources in the Facilities Construction and Sustainment PPA in FY 2013 will focus on the sustainment and operations of CBP's existing facilities portfolio and real property inventory. Prior year investments to replace and expand CBP facilities have resulted in a much newer and more capable portfolio. These capital improvements will be maintained to protect against premature deterioration and to ensure safe and effective operating environments for CBP personnel. To this end, resources in the FY 2013 Facilities Construction and Sustainment PPA will center on providing the appropriate level of funding for sustainment and operational needs for the modernized facilities portfolio. This effort entails delivery of facilities solutions to meet mission-driven operational requirements, which include critical maintenance, repairs, and operations activities, including baseline building services, to keep the portfolio from deteriorating; renewals of expiring leases; alterations and configuration of space to accommodate operational requirements and additional personnel and asset deployment; tunnel remediation activities; and required program and portfolio management support to enhance CBP's multifaceted real property program. Consolidated resources in this PPA allow CBP to manage its construction and facilities management program more efficiently by funding the highest priorities within CBP's facilities portfolio and program requirements. Rent management and related costs are addressed separately in the Salaries and Expenses appropriation.

Major priorities planned for FY 2013 include executing environmental, sustainability, and energy management activities related to facilities acquisition and disposal projects; expanding regional preventive maintenance and operational contracts for CBP-owned facilities; delivering baseline building services such as custodial services, snow removal, waste disposal, lawn services, and building functions; renewing and administering expiring leases; and remediating tunnels as they become ready for remediation.

Primary cost drivers in the FY 2013 budget include facilities requirements associated with disaster recovery and emergency preparedness; life and safety requirements; compliance violations including fire, building code, structural, environmental compliance, and physical security violations; baseline building services; recurring sustainment activities and services including preventive maintenance, deferred maintenance, and emergency and unscheduled repairs; and lease expirations including any mandatory relocations.

**Department of Homeland Security

Program Performance Justification  
(Dollars in Thousands)**

**PPA: Program Oversight and Management**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	-	-	<b>59,947</b>
<b>2012 Enacted Budget Authority</b>	<b>219</b>	<b>219</b>	<b>54,096</b>
2013 Adjustments-to-Base	24	24	3,356
<b>2013 Current Services</b>	<b>243</b>	<b>243</b>	<b>57,452</b>
<b>2013 Total Requested Budget Authority</b>	<b>243</b>	<b>243</b>	<b>57,452</b>
Total Change 2012 to 2013	24	24	3,356

U.S. Customs and Border Protection (CBP) requests \$57.452 million for Program Oversight and Management. The request includes:

- An increase of \$5,000 for the Fiscal Year (FY) 2012 Field Operations positions to staff new ports of entry and to enhance operations
- An increase of \$1,000 for the FY 2012 National Targeting Center enhancement
- An increase of \$103,000 for the FY 2013 Pay Increase
- An increase of \$3.247 million for a transfer from Border Security Fencing, Infrastructure and Technology (BSFIT) funding for staff support of tactical infrastructure

**CURRENT SERVICES PROGRAM DESCRIPTION**

CBP requests 243 positions and \$57.452 million in FY 2013 for the Program Oversight and Management Program, Project, Activity (PPA), which supports the Real Property Management subprogram in the Mission Support Line of Business. The full-time equivalents will support the entire CBP Construction and Facilities Management program including all activities associated with the Facilities Construction and Sustainment PPA.

CBP is currently launching a balanced workforce initiative to achieve the appropriate mix of Federal and contractor skills, expertise, experience, and other assets necessary to effectively manage CBP's real property program. This initiative will realize efficiencies, risk reduction, and cost savings for the facilities management program. The savings will be reinvested to support mission-critical requirements of the CBP facilities portfolio.

The Program Oversight and Management PPA enables the successful implementation of all program objectives and ensures strategic alignment across the CBP real property program by providing the necessary Government and support personnel; planning tools, processes, and procedures; and resource

matrices in an integrated and effective manner. A cadre of highly skilled specialists supporting the Construction and Facilities Management program is instrumental in the development and delivery of mission-critical core capabilities. Among other abilities, facilities management personnel offer architectural, environmental, energy, real estate, and engineering services, along with long-term strategic planning expertise that allows CBP to provide the most appropriate facilities solutions to strengthen operational support and maximize operational capabilities and efficiencies. An array of program management and oversight activities and initiatives produce critical facilities data and information assessments that facilitate the effective planning and management of CBP's facilities portfolio and real property inventory.

CBP's FY 2013 budget submission reflects the transfer of salaries and operational program resources from the Salaries and Expenses appropriation to the Program Oversight and Management PPA enacted in FY 2012. The transfer allows greater flexibility to allocate scarce resources to the highest priority requirements of CBP's facilities portfolio. This consolidation of all CBP facilities-related program management and support resources into a single appropriation account enables CBP to consistently plan, finance, acquire, manage, oversee, and administer the Construction and Facilities Management program to best fulfill the driving mission needs. The FY 2013 budget submission includes a transfer from the BSFIT appropriation for the salaries and resources associated with the Government and support personnel required to administer the Tactical Infrastructure program.

Major priorities planned for the FY 2013 Program Oversight and Management PPA include Government personnel and critical contract services required to administer CBP's Construction and Facilities Management program; develop and acquire critical core capabilities necessary to support facilities requirements; implement a balance workforce initiative to provide the appropriate mix of Federal and contract support; develop and implement environmental, sustainability, and energy management initiatives enterprise wide; and implement an integrated workplace management system to provide portfolio management network solutions.

Primary FY 2013 costs in the Program Oversight and Management PPA include all Government personnel, development of core capabilities, and enterprise-level program requirements supporting facilities requirements associated with disaster recovery and emergency preparedness; life and safety requirements; compliance violations including fire, building code, structural, environmental compliance, and physical security violations; baseline building services; recurring sustainment activities and services including preventive maintenance, deferred maintenance, and emergency and unscheduled repairs; and lease expirations including any mandatory relocations.

### **Program Oversight and Management Adjustments to Base**

This PPA includes a transfer of \$3.247 million from the BSFIT appropriation into the Construction and Facilities Management appropriation for the salaries and resources associated with the Government and support personnel required to administer the Tactical Infrastructure program.

## IV. Program Justification Changes

**Department of Homeland Security  
U.S. Customs and Border Protection  
Facilities Management  
Justification of Program Changes  
(Dollars in Thousands)**

**Program Decrease 1:** Reduction to Facilities Maintenance, Repairs, and Operations  
**PPA:** Facility Construction and Sustainment  
**Program Decrease:** Positions 0, FTE 0, Dollars \$(9,144)

### Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	195,358
Program Decrease							-	-	(9,144)
<b>Total Request</b>	-	-	<b>427,358</b>	-	-	<b>182,500</b>	-	-	<b>186,214</b>

### Description of Item

The reduction of \$9.144 million is applied to activities within the Facilities Construction and Sustainment Program, Project, Activity (PPA) in order to prioritize frontline U.S. Customs and Border Protection (CBP) operations. This PPA supports critical maintenance, repairs, and operations requirements of existing CBP facilities. These core facilities activities support the Real Property Management subprogram in the Mission Support Line of Business, which provides efficient delivery of facilities solutions for CBP's multifaceted facilities portfolio and real property inventory.

### Justification

The reduction will primarily affect the existing CBP facilities portfolio and real property inventory and may extend to leasehold improvements of GSA leased spaces. Planned facilities management and sustainment activities, such as maintenance, repairs, operations, alterations, and lease renewals, will be delayed, deferred, or foregone, as a result of this reduction. To minimize the effect on critical operational needs, CBP will assess its facilities portfolio to identify and prioritize core mission and facilities requirements.

### Impact on Performance (Relationship of Decrease to Strategic Goals)

Although the reduction may affect planned facilities, management, and sustainment activities, CBP will ensure its highest priority operations are not significantly affected.

## **V. Exhibits and Other Supporting Material**

### **A. Justification of Proposed Legislative Language**

For expenses to plan, acquire, construct, renovate, equip, furnish, operate, manage, and maintain buildings, facilities, and related infrastructure necessary for the administration and enforcement of the laws relating to customs, immigration, and border security, [\$236,596,000] **\$243,666,000**, to remain available until September 30, [2016], **2017**: Provided, That for fiscal year [2012] **2013** and thereafter, the annual budget submission of U.S. Customs and Border Protection for “Construction and Facilities Management” shall, in consultation with the General Services Administration, include a detailed 5-year plan for all Federal land border port of entry projects with a yearly update of total projected future funding needs delineated by land port of entry: Provided further, That the Commissioner of U.S. Customs and Border Protection shall submit to the Committees on Appropriations of the Senate and House of Representatives, at the time that the President’s budget is submitted each year under section 1105(a) of title 31, United States Code, an inventory of the real property of U.S. Customs and Border Protection and a plan for each activity and project proposed for funding under this heading that includes the full cost by fiscal year of each activity and project proposed and underway in fiscal year 2013. (Department of Homeland Security Appropriations Act, 2012)

## G. Capital Investment and Construction Initiative Listing

### Construction and Facilities Management Appropriation

- \$243.666 million
- U.S. Customs and Border Protection (CBP) Construction and Facilities Management includes:
  - Facilities Construction and Sustainment
  - Program Oversight and Management

PROGRAM	FY 2013 FUNDING REQUEST (\$000)			FUNDING FROM:	
	Current Services Level	New Initiative	Total	Program, Project Activity (PPA)	Appropriation
Facilities Construction & Sustainment	\$195,358	(\$9,144)	\$186,214	Facilities Construction & Sustainment	Construction and Facilities Management
Program Oversight & Management	\$57,452	-	\$57,452	Program Oversight & Management	Construction and Facilities Management
<b>Total Investments</b>	<b>\$252,810</b>	<b>(\$9,144)</b>	<b>\$243,666</b>		

### NAME OF CONSTRUCTION INITIATIVES

#### 1. Project Description, Justification and Scope

The CBP Construction and Facilities Management account provides the facilities solutions and associated infrastructure required to obtain and maintain operational control of the border. It addresses the requirements for new, modernized, expanded, and sustained facilities to fulfill immediate mission-driving operational needs; accommodates increasing capacity demands associated with new agent, officer, pilot, and asset deployments; provides resources to modify and/or correct deficiencies within existing facilities and structures; and allows CBP to proactively manage the real property inventory and facilities portfolio and support facilities' program-wide efforts. The Fiscal Year (FY) 2013 budget submission request will focus on sustainment activities of CBP's real property program and facilities portfolio and associated infrastructure requirements, leasing management activities, and program planning and management support.

**5. Cost Estimate Detail and Changes  
(Dollars in Thousands)**

N/A

**6. Method of Performance**

**CBP Construction and Facilities Management requirements are executed through the U.S. Army Corps of Engineers (USACE), U.S. General Services Administration (GSA), and the CBP Office of Procurement.**

**Through a memorandum of agreement, the USACE provides CBP with consolidated program management services for real estate planning and acquisition, planning and programming, environmental planning and compliance, design and cost engineering, construction and warranty enforcement, and integrated occupancy services.**

Project schedules and cost estimates are developed by the Facilities Management and Engineering program management offices and are tracked through Program Management reviews. Project completion schedules and funding allocated to specific projects are tracked within the current CBP accounting system. This system includes modules that store specific information on each asset. That information is automatically linked to key information systems and includes modules that cover all aspects of the assets. The real property profile performance data can be used to produce financial, procurement, and real property indices for measuring the performance of the assets. Projects in Progress are tracked and reported on

a monthly basis by project managers in the field. The tracking consists of monitoring the project delivery for construction and leasing through industry standards, including tracking each specific project's schedule, scope, and budget.

Across CBP's owned facilities, the general performance indices include:

1. Facility Condition – Condition surveys are performed on a periodic basis to ascertain the true condition of the asset. A Strategic Resource Assessment will be the primary means by which this information will be generated in the future.
2. Facility Utilization – These indices track the square footage of space and the number of full-time equivalents assigned.
3. Operating Costs – These indices track the cleaning/janitorial, maintenance, and utility costs at the asset level.

**Mission Dependency – Primary categories include: Mission Critical, Mission Dependent Not Critical, and Non Mission Dependent**

4. Energy Consumption – As part of the Operating Costs Indices, energy consumption and conservation measures are tracked separately.
5. National Historical Preservation Assets – Real Property Assets that could be eligible for the National Historical Preservation List are tracked.

Within the Land Ports of Entry, CBP applies an additional set of performance indices including:

1. Mission and Operations – Factors for the mission and operations criterion measure the facility's compatibility with specific inspection responsibilities. Individual factors address the type of activities performed within the facility and features of the facility necessary for successful inspection services. This criterion contains factors that cause the most significant disruptions to inspection activities and conditions that reflect the significance of the facility's operations.
2. Life Safety and Security – The factors for security and life safety measure a facility's ability to protect occupants and visitors and allow law enforcement functions to maintain safe and secure control of the public and detained individuals. The individual factors address compliance with security and life safety standards (features incorporated in the facility to resist assault and allow staff to maintain operations during emergencies) and deficiencies that represent hazards to the occupants. Safety standards include building life safety codes, as well as Federal standards developed in response to terrorist attacks or other threats faced by the occupants.
3. Space and Site Deficiencies – Space and site deficiencies are related to the functional work environment and the overall facility site. Space deficiencies are determined by

applying utilization rates, based on space standards, to existing personnel and functions to calculate the amount of usable space that should be available in an existing facility. In addition, the major facility systems and site and building layouts are evaluated for functionality and expansion potential.

4. Personnel and Workload Growth – The personnel and workload growth criterion contains factors related to both current and future personnel, along with current and projected workload categories that generate the need for additional personnel and space at each facility. The points for many of the factors are determined through a national ranking system.

## **BUDGET REQUEST AND SUPPORTING INFORMATION**

### **U.S. Customs and Border Protection Air and Marine Interdiction**

#### **I. Appropriation Overview**

##### **A. Mission Statement for Air and Marine Interdiction:**

Customs and Border Protection (CBP) protects the Nation through the coordinated use of integrated air and marine forces to detect, interdict, and prevent acts of terrorism and the unlawful movement of people, illegal drugs, and other contraband toward or across the borders of the United States. The CBP Office of Air and Marine's (OAM's) core competencies include air and marine interdiction, air and marine law enforcement, and air and national border domain security.

OAM has a staff of personnel, including pilots and aircrew, air and marine law enforcement officers, operations specialists, logistics and maintenance support personnel, and administrative personnel. Based on the FY 2013 request, mission critical assets would consist of 277 aircraft (including fixed wing, rotary helicopters, and unmanned aircraft systems), approximately 324 marine vessels, a national Air and Marine Operations Center (AMOC), fixed and mobile surveillance equipment, ground vehicles, training facilities, maintenance facilities, aircraft hangars, and marine facilities located along all of the Nation's borders and at key interior support locations.

##### **B. Budget Activities:**

The Air and Marine Interdiction appropriation supports the Southwest Border, Northern Border, Coastal, and Source and Transit Zone subprograms within Line of Business (LOB) 1, Securing America's Borders. This LOB reflects CBP's core mission area of securing the border and preventing contraband, illegal migrants, terrorists and terrorist weapons from entering the United States. Included within this LOB are the people that perform the mission as well as air platforms, marine assets, technology, and equipment that they use. The subprograms that comprise the LOB are organized geographically, given the distinct threat environments of each area.

The Air and Marine Interdiction appropriation is comprised of two major accounts (or Program, Project, and Activities (PPAs): Operations and Maintenance and Procurement.

### Operations and Maintenance:

Operations and Maintenance funds provide logistics support – supply, maintenance, and training services – to operate and maintain aircraft and marine vessels. A combination of government and contractor logistics activities provide maintenance management, system support analysis, asset management, critical property, spare parts storage, inventory records management, and field services via a National Aircraft Maintenance contract and the National Marine Center (NMC). Aviation law enforcement training services are available by funding for the National Aircraft Training Center (NATC). Funding is also provided to the Federal Aviation Administration (FAA) to ensure that a Long Range Radar (LRR) capability is maintained and operated for joint Department of Defense (DOD)/Department of Homeland Security (DHS) use.

The Air and Marine Operations Center (AMOC) receives Operations and Maintenance funding. The AMOC provides detection, monitoring, sorting, tracking and coordination of law enforcement response to suspect airborne and maritime activity and is used to conduct airspace security, respond to natural disasters and act as the clearinghouse for information.

Operations and Maintenance funds also support field operating costs, including costs for Regional Director Offices, Air and Marine Branches, and Units, as well as headquarters operations and Field Centers, training and travel expenses, and fuel, which is a major portion of the field office expense.

### Procurement:

Procurement funds are used to buy new aircraft and marine vessels and recapitalize existing assets to extend their service lives and lower maintenance costs.

### **C. Budget Request Summary:**

DHS requests \$435.8 million for FY 2013 Air and Marine Interdiction. This request includes a non-recurring \$138.9 million for prior OAM procurement, a program change of \$5.8 million for Operations and Maintenance, and \$67.0 million for procurement of the following:

- \$28.1 million for P-3 Service Life Extension Program (SLEP)
- \$17.5 million for UH-60 A-L Black Hawk Recapitalization
- \$20.5 million for KA-350CER MEA
- \$0.9 thousand for Marine Vessels (various)

### III. Current Services Program Description by PPA

**Department of Homeland Security  
U.S. Customs and Border Protection  
Air and Marine Interdiction:  
Operations and maintenance  
Program Performance Justification  
(Dollars in Thousands)**

**PPA: Operations and maintenance**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	-	-	<b>431,301</b>
<b>2012 Enacted Budget Authority</b>	-	-	<b>365,087</b>
2013 Adjustments-to-Base	-	-	(2,100)
<b>2013 Current Services</b>	-	-	<b>362,987</b>
2013 Program Change	-	-	5,812
<b>2013 Total Requested Budget Authority</b>	-	-	<b>368,799</b>
Total Change 2012 to 2013	-	-	3,712

CBP requests \$368.8 million for Operations and Maintenance. The request includes:

- Decrease of -\$2,100,000 for consolidation of rent into the Rent PPA
- Increase of \$5,812,000 for an enhancement to Operations & Maintenance Support

**CURRENT SERVICES PROGRAM DESCRIPTION:**

CBP requests \$368.8 million for Operations and Maintenance to support the Southwest Border, Northern Border, Coastal, and Source and Transit Zone subprograms within Line of Business 1, Securing America’s Borders.

**Field Operations**

Operations and Maintenance funds provide logistics support – supply, maintenance, and training services – to operate and maintain aircraft and marine vessels. A combination of government and contractor logistics activities provide maintenance management, system support analysis, asset management, critical property, spare parts storage, inventory records management, and field services via a National Aircraft Maintenance contract and the National Marine Center. Aviation law enforcement training services are available by funding for the National Aircraft Training Center. Funding is also provided to the Federal Aviation Administration to ensure that a Long Range Radar is maintained and operated for joint Department of Defense/Department of Homeland Security use.

In FY 2011, OAM provided air support to the Office of Border Patrol (OBP) in the Arizona surge by providing resources to the Tucson and Yuma Air Branches. In FY 2012 and FY 2013, both air and marine operations will continue to expand along the Great Lakes, the northwestern, and northeastern maritime approaches to the Nation's borders, as additional aircraft and marine vessels are deployed. The delivery of new aircraft will provide increased tactical support to the Border Patrol along the southwest, northern, and southeast coastal borders as the number of agents on the ground increases. The UAS Program will expand its operations as additional systems are delivered and deployed. Within the southeast/coastal and source/transits zone AOR's, P-3 Airborne Early Warning (AEW) and long range tracker aircraft operations will increase as assets are delivered from extensive depot-level rework.

#### Marine Operations

Maritime demonstrations of UAS capabilities in the southeast coastal approaches to the U.S. have been conducted and CBP is in the process of establishing a permanent UAS Branch along the gulf coast and eastern shore of Florida. Marine operations in the Gulf of Mexico will be enhanced as new interceptor vessels replace the aging Black Night Interceptors and additional sea-borne radar platforms are acquired.

#### Strategic Intelligence, Surveillance, and Interdiction Capability

The UAS program will support CBP's efforts to maintain priority coverage along the southwest and northern borders and increase effectiveness at the southeast/coastal borders. Additionally, the UAS program supports Immigration and Customs Enforcement (ICE) investigative efforts, extends cross-border operations into the source and transit zones, as well as augments and enhances the crewed air and marine assets. The strategic plan currently calls for up to three squadrons of UASs to be deployed along the southwest border, northern border, southeast/coastal and source and transit zones operating areas. CBP's UAS program is the key element of the agency's strategic intelligence, surveillance, and interdiction capability.

CBP Air and Marine's total strategic intelligence, surveillance, and interdiction capability will include the P-3 Maritime Patrol Aircraft and the DHC-8/Q200 and Q300 Multi-Role Patrol Aircraft (MPA). The end-state objectives for the MPA changed when the manufacturer closed the DHC-8/Q300 production line in favor of a larger, more commercially viable DHC-8/Q400. OAM concluded that the larger Q400 was not suitable for its missions, and focused on the acquisition of a smaller, twin-engine, Multi-Role Enforcement Aircraft (MEA) capable of operating effectively over land and water.

#### Aged Aircraft Risk Management

CBP works to maintain its aging aircraft in order to keep pace with mission demands. To accomplish this, an aged aircraft investigation was conducted to determine how long selected assets, such as the OH-6 helicopters and C-12/C-12M aircraft, will remain operational. The aged aircraft investigation will help determine the operating life limitations of the aircraft types most at risk. Based on the results, a sustainment regimen will be established for each aircraft type that employs additional inspections, shortened maintenance intervals, and additional repairs. Along with the additional inspections and repairs, CBP will revise its maintenance reporting requirements to capture the data needed to identify key indicators of aged aircraft condition that would drive CBP to retire the aircraft from service. In accordance with House Report 111-157, as modified in the joint Conference Report 111-298, CBP provided the Committees on Appropriations in the House and the Senate with a briefing on its plans to

manage its aging aircraft, details of which are contained in the updated Strategic Air and Marine Implementation Plan submitted to the Committees on Appropriations in the House and the Senate.

**Department of Homeland Security

<b>2013 Current Services</b>	-	-	-
2013 Program Change	-	-	66,970
<b>2013 Total Requested Budget Authority</b>	-	-	<b>66,970</b>
Total Change 2012 to 2013	-	-	(71,909)

CBP requests \$67.0 million for Procurement. The request includes:

- Increase of \$28.1 million for P-3 SLEP
- Increase of \$17.5 million for UH-60 A-L Black Hawk Recapitalization
- Increase of \$20.5 million for KA-350CER MEA
- Increase of \$0.9 million for Marine Vessels (various)
- Decrease of -\$138.9 million to non-recur the FY 2012 Air and Marine Procurement enhancements

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Procurement investment funds are used to procure new aircraft and marine vessels and recapitalize existing assets to extend their service lives and lower maintenance costs.

The budget requests \$67.0 million in Procurement to support the Southwest Border, Northern Border, Coastal, and Source and Transit Zone subprograms within Line of Business 1, Securing America's Borders.

### Aircraft Safety and Service Life Extension

The highest priority remains the P-3 SLEP since it rectifies serious flight safety concerns and provides an unmatched capability to interdict bulk drug shipments to Mexico through the source and transit zones. The average age of 49 percent of CBP's aircraft is 33 years, and the average age of the aircraft in the P-3 fleet is over 40 years old. The P-3 SLEP began with the repair of fleet-wide wing stress cracks and the development of the requirements for extending the lives of the 16 P-3 aircraft by 20 years. A total of nine wing kits have been procured to date. In total, CBP plans to send 14 of its 16 P-3s through SLEP. The remaining two platforms may also go through SLEP, pending decisions.

### Air Recapitalization and Modernization

The present air fleet consists of 19 different aircraft types. Currently, seven of ten aircraft types have exceeded their normal service life expectancy, some by nearly two times the industry average. The impact has been an unavoidable loss of operational readiness, as a result of additional maintenance down time due to increased inspections and a shrinking pool of spare parts. To accomplish its border security, anti-drug, and customs and immigration enforcement missions, CBP requires a more flexible and supportable air fleet. To this end, the air fleet is being standardized, and will emphasize the use of multi-mission assets that can be deployed to multiple locations as the threat changes over time. The strategic objective is to reduce the types of aircraft used to eight or nine, and to increase the total number of aircraft to a level consistent with operational demands. The total will likely change over time, as the nature of the threat changes; therefore, the CBP strategic plan and end-state model will be updated accordingly.

### Marine Recapitalization and Modernization

A portion of marine funding was used to acquire an Advanced Concept Technology Demonstration (ACTD) vessel for a new class of fast coastal interceptors. The results of the ACTD effort have enabled CBP to define its requirements for a highly capable replacement for the currently employed slower, aging Midnight Express Interceptors. In FY 2010, using the information learned from the Demonstration Evaluation of the ACTD, OAM initiated an effort to procure a new Coastal Interceptor Vessel (CIV) that will improve mission effectiveness and enhance officer safety. In January 2012, CBP awarded a contract for up to 70 CIV's. The CIV will be the replacement of the aging Interceptor "go-fast" fleet. CBP has also awarded a contract in September 2011 for the Riverine Shallow Draft Vessel (RSVD) which will enable CBP agents to pursue suspects across extremely shallow water and small sand bars at high speeds. The contract award is for up to 80 RSVD's.

## IV. Program Justification Changes

**Department of Homeland Security  
U.S. Customs and Border Protection  
Air and Marine Interdiction:  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 1:** Enhancement for P-3 SLEP  
PPA: Procurement  
Program Increase: Positions 0, FTE 0, Dollars \$28,070

### Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	28,070
<b>Total Request</b>	-	-	<b>196,065</b>	-	-	<b>138,879</b>	-	-	<b>28,070</b>

### Description of Item

The budget requests \$28.1 million for the P-3 Service Life Extension Program

### Justification

CBP's P-3 aircraft are high-endurance, all-weather, tactical turbo-prop aircraft, which are utilized primarily for long-range patrols along the entire U.S. border, near choke points off the coast of source and transit zone countries, and throughout Central and South America. It is the primary DHS asset used to detect and target bulk drug shipments carried by self-propelled semi-submersible vessels. The aircraft provides advanced sensor capabilities, can track and identify targets over extended periods, and remains vital to Joint Interagency Taskforce South (JIATF-S) support. In short, the P-3 provides mission support capabilities beyond those of any other aircraft available to law enforcement. Each P-3 airframe is over 40 years old. The two-phase SLEP that will eventually add another 18 years (15,000 flight hours) to 14 of the 16 aircraft in the inventory (two aircraft have sufficient remaining service life to forgo the SLEP). The first phase consisted of special structural inspections and repairs that enabled CBP to keep some aircraft available for its ongoing mission. To date, CBP has returned 12 aircraft to full operation, and four aircraft have completed the final wing and tail replacement. The second phase consists of wing and tail replacements and other upgrades needed to keep the aircraft in service for most of the next two decades.

### **Impact on Performance (Relationship of Increase to Strategic Goals)**

CBP's P-3 aircraft is the most successful surveillance and interdiction asset in DHS, having disrupted hundreds of thousands of pounds of bulk drug shipments to Mexico and the U.S. and detected 87 percent of the self-propelled semi-submersible vessels captured in the source and transit zones. OAM P-3s provide more counter-narco-terrorism and counter-drug air mission hours for JIATF-S than any other partner agency; in FY 2010 approximately 72 percent of OAM P-3 funded flight time was flown in direct support of the JIATF-S mission set. Despite increasing operational demands placed upon a limited air wing, a record total of 7,399.5 mission flight hours were flown in support of JIATF-S in FY 2011. CBP P-3's were directly responsible for disrupting over 500,000 pounds of bulk drugs over the past four years. This accomplishment represents a full 1,000 hours plus over the previous year's effort flown in support of counter-drug operations in the JIATF-S Area of Operations (AOR). Without funding to SLEP the remaining P-3 aircraft, OAM will be required to decrease operational support to the JIATF-S mission.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Air and Marine Interdiction:  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 1:** Enhancement for UH-60 A-L Black Hawk Recapitalization  
PPA: Procurement  
Program Increase: Positions 0, FTE 0, Dollars \$17,500

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	17,500
<b>Total Request</b>	-	-	<b>196,065</b>	-	-	<b>138,879</b>	-	-	<b>17,500</b>

**Description of Item**

The budget requests \$17.5 million for UH-60 A-L Black Hawk Recapitalization.

**Justification**

UH-60A Black Hawk medium lift helicopters (MLH) perform missions such as border security, insertion of agents in remote areas and rapid-response to acts of terrorism, natural disasters and other emergencies.

The MLH modernization program envisions a fleet of new or refurbished UH-60 helicopters equipped with Electro-optical/Infrared (EO/IR) sensors, secure communications, weather radar, video data downlinks and essential law enforcement equipment.

- Four new UH-60M helicopters are due for delivery between April 2011 and August 2012.
- Three of 16 UH-60A to L conversions were requested in FY 2011 and two in FY 2012. CBP obtains a “zero-time” UH-60L aircraft for \$17.5 million each, based on aircraft condition.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

The UH-60 Black Hawk Medium Lift Helicopter is the most capable and rugged helicopter in the CBP inventory; it is the best suited for dangerous operations in a hostile environment. CBP has two recapitalizations in production under an Army contract with the original aircraft manufacturer.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Air and Marine Interdiction:  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 1:** Enhancement for KA-350CER MEA  
PPA: Procurement  
Program Increase: Positions 0, FTE 0, Dollars \$20,500

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	20,500
<b>Total Request</b>	-	-	<b>196,065</b>	-	-	<b>138,879</b>	-	-	<b>20,500</b>

**Description of Item**

The budget requests \$20.5 million for a KA-350CER Multi-Role Enhancement Aircraft

**Justification**

In response to the loss of DHC-8 production capability, OAM awarded a contract for up to 30 modified King Air 350CER MEA. The new MEA is a highly versatile aircraft with a broad area search radar, day/time camera system, signals direction finding equipment, and satellite communications capability. It can be employed on all borders, above the land borders and along the maritime approaches to the U.S. The projected requirements include 50 MEA aircraft to cover the planned retirements of its aging C-12/C-12M, PA-42 and B200 aircraft that are experiencing increasing stress, fatigue, corrosion, and supportability issues and to make up for the shortfall in DHC-8 assets. CBP awarded a contract for up to 30 MEAs. Funds are available for five aircraft, the first of which was delivered in early calendar year 2011 to the Tucson Sector.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

The KA-350CER Multi-Role Enforcement Aircraft is the most capable new, twin-engine patrol aircraft to be purchased by CBP. A contract for 30 aircraft is in place, against a total requirement for 50 aircraft, with the first two to be delivered in December 2011. CBP has not ordered any new MEAs in three years. With the additional funding for one MEA provided in the FY 2012 Appropriation, CBP

will need a second MEA funded as shown in the FY 2013 President's request to keep the production line open through FY 2013

**Department of Homeland Security  
U.S. Customs and Border Protection  
Air and Marine Interdiction:  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 1:** Enhancement for Marine Vessels (various)  
PPA: Procurement  
Program Increase: Positions 0, FTE 0, Dollars \$900

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	900
<b>Total Request</b>	-	-	<b>196,065</b>	-	-	<b>138,879</b>	-	-	<b>900</b>

**Description of Item**

Funding of \$900 thousand for vessels in FY 2013 will allow CBP to procure one Coastal Interceptor Vessel (CIV) and up to three Riverine Shallow Draft Vessels (RSDV).

**Justification**

OAM was given the responsibility to organize, train, and equip marine operations falling under OAM, the Office of Border Patrol and the Office of Field Operations, and to assume control of operations in the coastal and Great Lakes regions, in August of 2006. In February 2008, OAM reported its first revision of the Strategic Plan for Air and Marine to the Committees on Appropriations. The revised plan contained a broad approach for enhancing marine operating capabilities by expanding the number of marine units along the Northern Border and Southeast Coastal operating areas, increasing the number of Marine Interdiction Agents (MIAs) and support personnel, and increasing the number of marine vessels. The number and types of vessels to be acquired was based on operating environment and the planned operating tempo for each CBP marine unit, and the need to replace some existing assets deemed to be of limited value due to age, capability, and/or safety.

In FY 2008 and FY 2009, Congress provided funding for 11 new marine units, 197 new marine agents, and 59 new marine vessels, including 14 new interceptors, of which six would be Interim Coastal Interceptors. A portion of marine funding was used to acquire an Advanced Concept Technology Demonstration (ACTD) vessel for a new class of fast coastal interceptors. The results of the ACTD effort have enabled CBP to define its requirements for a highly capable replacement for the currently

employed slower, aging Midnight Express Interceptors. In FY 2010, using the information learned from the Demonstration Evaluation of the ACTD, OAM initiated an effort to procure a new Coastal Interceptor Vessel (CIV) that will improve mission effectiveness and enhance officer safety. In January 2012, CBP awarded a contract for up to 70 CIV's. The CIV will be the replacement of the aging Interceptor "go-fast" fleet. CBP has also awarded a contract in September 2011 for the Riverine Shallow Draft Vessel (RSVD) which will enable CBP agents to pursue suspects across extremely shallow water and small sand bars at high speeds. The contract award is for up to 80 RSVD's.

**Impact on Performance (Relationship of increase to strategic goals)**

Over the past few years CBP has been funded to hire 197 Marine Interdiction Agents (MIAs) however; many of these agents are currently in a training status and remain uncertified to serve as vessel commanders. The current number of vessels on-hand is not adequate to support the increase of MIAs once they are all fully trained and certified. Additional certified vessel commanders require additional vessels to meet CBPs planned operating tempo.

As CBP approaches its personnel end states, the vessel increases will provide for the deployment of multiple vessels during each shift, allowing for greater coverage and enhanced security. (Note: A minimum crew of two is required however; a crew of three is preferred).

**Department of Homeland Security  
U.S. Customs and Border Protection  
Air and Marine Interdiction:  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 1:** Enhancement for Operations & Maintenance Support  
PPA: Operations and maintenance  
Program Increase: Positions 0, FTE 0, Dollars \$5,812

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	362,987
Program Increase							-	-	5,812
<b>Total Request</b>	-	-	<b>431,301</b>	-	-	<b>365,087</b>	-	-	<b>368,799</b>

**Description of Item**

Customs and Border Protection (CBP) requests a \$5.812 million increase to Air and Marine Operations and Maintenance (O&M).

**Justification**

OAM leverages several capabilities to successfully perform Reconnaissance, Surveillance, and Target Acquisition (RSTA) missions in support of OAM’s law enforcement partners. One of these cornerstone RSTA capabilities is the CBP Unmanned Aircraft System (UAS). CBP is the only federal law enforcement agency routinely operating advanced UAS; the Predator B and its maritime variant called the Guardian. The UAS is a strategic asset for homeland security operating at and beyond the Nation’s borders to detect, identify, track, and cue the interdiction of threats to the United States. The UAS is also the only covert, long dwell reconnaissance asset OAM operates capable of operating in hazardous situations while transmitting video and radar data in near-real-time to agents, analysts, and operators across the US Government. OAM is adding this asset to the source/transit zone counter narcotics fight. CBP’s Guardian UAS is equipped with highly effective maritime surveillance radar capable of detecting and sorting surface vessels, to include TCO semi-submersible vessels. The radar is coupled with high-resolution electro-optical and infrared sensors, making the Guardian a first of its kind and significantly increasing maritime domain awareness to aid in combating transnational smuggling.

The OAM Predator B program continues to expand its operational reach and effectiveness as new FAA COA’s allow greater coverage of both the Southern and Northern Borders. By FY 2013, 10 complete systems will be in operation. OAM expects to fly a combined 8,500 UAS flight hours across our 10

systems in FY 2013. The \$5.8M O&M increase will ensure that a consistent flight program can be supported through FY 2013, especially for the highest priority missions along the Southwest Border.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

The increase of \$5.8M to aircraft operations and maintenance will provide support the 10 unmanned aircraft systems that will be fully operational for all of FY 2013, at roughly the same flight hour levels expected to be flown in FY 2012.

## V. Exhibits and Other Supporting Material

### A. Justification of Proposed Legislative Language

For necessary expenses for the operations, maintenance, and procurement of marine vessels, aircraft, unmanned aircraft systems, and other related equipment of the air and marine program, including operational training and mission-related travel, the operations of which include the following: the interdiction of narcotics and other goods; the provision of support to Federal, State, and local agencies in the enforcement or administration of laws enforced by the Department of Homeland Security; and, at the discretion of the Secretary of Homeland Security, the provision of assistance to Federal, State, and local agencies in other law enforcement and emergency humanitarian efforts, [\$503,966,000] \$435,769,000, to remain available until September 30, [2014] 2015: Provided, That no aircraft or other related equipment, with the exception of aircraft that are one of a kind and have been identified as excess to U.S. Customs and Border Protection requirements and aircraft that have been damaged beyond repair, shall be transferred to any other Federal agency, department, or office outside of the Department of Homeland Security during fiscal year [2012] 2013 without the prior [approval of] notice to the Committees on Appropriations of the Senate and the House of Representatives: Provided further, That the Secretary of Homeland Security shall report to the Committees on Appropriations of the Senate and the House of Representatives, not later than 90 days after the date of enactment of this Act, on the update to the 5-year strategic plan for the air and marine program directed in conference report 109-241 accompanying Public Law 109-90 that addresses missions, structure, operations, equipment, facilities, and resources including deployment and command and control requirements, and includes a recapitalization plan with milestones and funding, and a detailed staffing plan with associated costs to achieve full staffing to meet all mission requirements.(Department of Homeland Security Appropriations Act, 2012.)

## B. FY 2012 to FY 2013 Budget Change

### 1. Project Description, Justification and Scope

#### Project Description

In the summer of 2006, CBP OAM developed and submitted to Congress a Strategic Air Plan that defines the end state for the air force based on ongoing threat assessments and mission requirements determined by higher authority. In 2007, this Plan was updated to incorporate Marine vessels and UAS. The UAS PPA was formally merged into the CBP OAM Procurement PPA in FY 2007.

The Plan calls for the air and marine fleets to be standardized, emphasizing the use of multi-mission assets that can be deployed to multiple locations as the threat changes over time. The OAM Procurement PPA non-recurs each fiscal year and is used to acquire new aircraft and marine vessels, UAS, retire unserviceable assets, upgrade sensors and surveillance capabilities, and support the expansion of mission capabilities along the borders in response to ongoing threat assessments and mission assignments directed by higher authority.

### **Program Justification**

CBP protects the American people and Nation's critical infrastructure through the coordinated use of integrated air and marine force to detect, interdict and prevent acts of terrorism and the unlawful movement of people, illegal drugs and other contraband toward or across the borders of the United States. Terrain, weather, and distance are significant obstacles along much of the southern, northern, and coastal borders. CBP OAM support acts as a force multiplier, allowing personnel and equipment to be transported efficiently and effectively. This support also provides rapid-response relocation of personnel and equipment, to safeguard people and critical infrastructure from acts of terrorism, natural disasters and other emergencies. The Air Safety and Life Extension Contract support the aircraft that makes it possible for CBP OAM to perform this mission.

### **2. Significant Changes**

The funds requested will enable continued support for program operations through FY 2013.

- **Project Schedule**

	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013
Aircraft Acquired	2	6	8	7	2
UAS Acquired	1	0	1	0	0
Vessels Acquired	18	29	30	4	4

### **4. Schedule of Project Funding (Dollars in Thousands)**

	FY 2011 Actuals	FY 2012 Enacted	FY 2013 Request	Total
Appropriation	144,395	138,879	66,970	\$350,244
Obligation (planned)	196,065	138,879	66,970	\$401,914
Expenditure (planned)	196,065	138,879	66,970	\$401,914

### **5. Cost Estimate Detail and Changes (Dollars in Thousands)**

Not Applicable

### **6. Method of Performance**

1. Is there a project (investment) manager assigned to the investment?

Yes

If so, what is his/her name?

John A. Wells

2. Is there a contracting officer assigned to the investment?

Yes

If so, what is his/her name?

Susan Baptist

3. Is there an Integrated Project Team (IPT)?

Yes

If so, list the skill set represented.

The IPT is comprised of individuals from the CBP Office of Air and Marine, Office of Administration, Office of Information and Technology, Technology Systems Program Office), Office of Chief Counsel, Office of Technology Innovation and Acquisition, and Office of Border Patrol representing systems acquisition, project management, systems engineering, legal review and test and acceptance.

4. Is there a sponsor/owner for this investment?

Yes

If so, identify the sponsor/process owner by name and title and provide contact information.

Michael C. Kostelnik, Assistant Commissioner, Office of CBP Air & Marine, (202) 344-3950.

<b>Fiscal Year</b>	<b>Strategic Goal(s) Supported</b>	<b>Performance Measure / Type</b>	<b>Explanation or Description</b>	<b>Target or Goal</b>	<b>Actual Performance Results</b>	<b>Performance Metric Improvement</b>
2011	DHS Prevention Goal 2 and Objective 2.1 Secure our Borders Against Terrorists, Means of Terrorism, Illegal Drugs, and other Illegal Activity	Percent of detected conventional aircraft incursions resolved along all borders of the United States  Long Term/ Output	This measure shows the percent of conventional aircraft that once detected are suspected of illegal cross - border activity and are brought to a successful law enforcement resolution. The Office of Air and Marine (OAM) determines whether an incursion is legal or illegal. If illegal, the Office of Air and Marine operations continue through the apprehension phase to successfully resolve the incursion.	2011 – 100%	95.3%	OAM will evaluate and improve tactics, techniques, and procedures where possible in order to bring individuals that commit illegal incursions to a successful law enforcement resolution.
2011	DHS Prevention Goal 2 and Objective 2.1 Secure our Borders Against Terrorists, Means of Terrorism, Illegal Drugs,	Percent of air support launches accomplished to support Homeland Security missions  Long Term/ Output	A primary and important measure for Air and Marine is its capability to launch an aircraft when a request is made for aerial support. This measure	2011 - >95%	84%	OAM will determine whether additional funding should be requested in the budget in the future for aircraft maintenance

	and other Illegal Activity		captures the percent of all requests made for air support to which the program was able to respond.			
2011	DHS Prevention Goal 2 and Objective 2.1 Secure our Borders Against Terrorists, Means of Terrorism, Illegal Drugs, and other Illegal Activity	Percent of detected non- compliant maritime vessels resolved before reaching U.S. border shoreline	Maritime entry upon U.S. soil is considered a failure under the previous Administrations Maritime Domain Awareness Program as the one vessel that touches shore could contain a Weapon of Mass Destruction. The measure will be increasing the percentage of non-compliant vessels resolved before reaching U.S. border shoreline. In the past, this measure was stated as the actual number of forcible stops only, which does not answer the question of how many non- compliant vessels were stopped but resolved.	>95%	88.80%	

2011	DHS Prevention Goal 2 and Objective 2.1 Secure our Borders Against Terrorists, Means of Terrorism, Illegal Drugs, and other Illegal Activity	Percent of Joint Interagency Task Force – South (JIATF-S) annual mission hour objective achieved	CBP Air and Marine’s core competencies are air and marine interdiction, air and marine law enforcement, and air domain security. In this capacity, the Office of Air and Marine (OAM) targets the conveyances that illegally transport narcotics, arms, and aliens across our borders and in the Source, Transit and Arrival Zones. In support of Source and Transit Zone interdiction operations, the Air and Marine Strategic Air Asset Program (P-3, Dash 8, Chet, and C12M fixed wing aircraft, Blackhawk rotor wing and Guardian UAS) have a dedicated minimum of 7,200 hours a year in support of Joint Interagency Task Force – South.	100%	100%

### Procurement Mission Statement

The Office of Air & Marine (OAM) is responsible for the protection of the borders of the United States. OAM identifies, deters, interdicts, and investigates acts of terrorism and smuggling arising from unlawful movement of people and goods into and out of the United States with an integrated and coordinated air and marine force. OAM has historically conducted missions along the southern borders of the United States, Mexico, South America and the Caribbean. Since September 11, 2001, OAM has established a presence along the northern border. OAM has a staff of over 1,865 pilots, law enforcement officers, operational support, and administrative positions. Mission critical assets consist of aircraft (including fixed wing and rotary helicopters), marine vessels, P-3 surveillance aircraft, surveillance equipment, maintenance facilities and hangers. With the transfer of the Unmanned Aircraft Vehicles (UAS) and Border Patrol assets, U. S. Customs and Border Protection (CBP) has been able to achieve increased effectiveness and economies of scale in the operation, procurement and maintenance of CBP's assets.

## **BUDGET REQUEST AND SUPPORTING INFORMATION**

### **U.S. Customs and Border Protection COBRA Passenger Inspection Fee**

#### **I. Appropriation Overview**

##### **A. Mission Statement for COBRA Passenger Inspection Fee**

The *Consolidated Omnibus Budget Reconciliation Act of 1985* (P.L. 99-272; COBRA) created a series of user fees to recover costs incurred by U.S. Customs and Border Protection (CBP). P.L. 99-272, codified as 19 U.S.C. 58c (a)(1-8), established processing fees for air and sea passengers, commercial trucks, railroad cars, private aircraft and vessels, commercial vessels, dutiable mail packages, broker permits, barges and bulk carriers from Canada and Mexico, cruise vessel passengers, and ferry vessel passengers.

Collections from the COBRA user fees are made available through permanent/indefinite appropriation created by the aforementioned user fee statute. The fees are deposited in the Customs User Fee Account (No Year) at the U.S. Treasury. Collections are available without fiscal year limitation. COBRA user fees support the following strategic goals: CBP Goal 1, Secure the Nation's Borders to Protect America from the Entry of Dangerous People and Goods and Prevent Unlawful Trade and Travel; CBP Goal 2, Ensure the Efficient Flow of Legitimate Trade and Travel Across U.S. Borders; Quadrennial Homeland Security Goal 2.1, Effectively Control U.S. Air, Land, and Sea Borders; and Quadrennial Homeland Security Goal 2.2, Safeguard Lawful Trade and Travel.

##### **B. Budget Activities**

COBRA collections fund the salaries and benefits of Customs and Border Protection Officers (CBPOs) that ensure all carriers, passengers, and their personal effects entering the United States are compliant with U.S. customs laws. To the extent that revenues are available, the estimated Fiscal Year (FY) 2013 collections will fund the activities in the COBRA statute. However, the fees are not set to be full cost recovery. Therefore, the estimated collections will not fully fund the authorized activities.

The *Trade Act 2002* (P.L. 107-210) section 337, codified as 19 USC 58c (b)(9)(A) (ii) and (b) (9)(B), authorized the establishment of the Express Consignment Courier Facilities (ECCF) fee to reimburse CBP for the processing costs incurred at those facilities. The original fee was set at 66 cents per individual airway bill or bill of lading and was later increased to \$1 effective July 2008. Congress also mandated that 50 percent of the ECCF fee collection be transferred to Treasury's General Fund. Because the ECCF fees are deposited in the Customs User Fee Account, for budgetary purposes, they are reported as part of the COBRA user fees.

COBRA activities support the following CBP Lines of Business (LOBs):

- LOB 2, Securing and Facilitating Flows of Cargo, in which COBRA has the greatest impact on subprogram 3, Advance National and Economic Security, and subprogram 5, Cargo/Conveyance Entry;

- LOB 3, Securing and Facilitating Flows of People, in which all subprograms are supported by COBRA, to include Pre-Arrival Processing, Inbound Inspection, and Outbound Inspection;
- LOB 5, Mission Support, to include rent, travel, and contractual services; and
- LOB 6, Enterprise Business Services, to include salaries, benefits, and expenses (such as equipment, communication, and contractual services) for managing IT infrastructure.

### **C. Budget Request Summary**

CBP requests 1,683 positions, 1,683 full-time equivalent employees, and \$529.352 million in FY 2013 for COBRA user fees and the ECCF fees to partially recoup the costs incurred for performing COBRA- related inspections. The order of reimbursement is noted as follows:

- All inspectional overtime;
- Premium pay;
- Civil Service Retirement and Disability Fund (agency contribution);
- Excess preclearance;
- Foreign language proficiency awards; and
- Enhanced equipment and support.

CBP projected FY 2013 collections by applying global economic growth figures released by the Office of Management and Budget. Because historical revenue trends show that fluctuations in collections from the ECCF fee are correlated with collections from air passenger fees, CBP used the same anticipated economic growth rates to project revenues from this fee.

#### CURRENT SERVICES PROGRAM DESCRIPTION

The components of the COBRA User Fees account are: international air and sea passenger; commercial trucks; loaded/partially loaded rail cars; commercial vessels; private aircraft and vessels; dutiable mail; customs broker permits; barges/bulk carriers; cruise vessel passenger fees; and express consignment carrier fees. However, the current fee levels are not set to recover the full costs. The remaining costs will be funded by direct appropriations.

Effective November 5, 2011 certain North American Free Trade Agreement customs fees exemption fees were eliminated. Section 601 of the *United States-Columbia Trade Promotion Agreement Implementation Act* (P.L. 112-42) lifted the exemption that excluded air and sea passengers from Canada, Mexico, and the Adjacent Islands<sup>1</sup> from having to pay the COBRA air, sea, and cruise vessel (ferry passengers are still exempted) passenger fees.

Section 601 of the *United States-Columbia Trade Promotion Agreement Implementation Act* (P.L. 112-42) lifted the exemption that excluded air and sea passengers from Canada, Mexico, and the Adjacent Islands<sup>1</sup> from having to pay the COBRA air, sea, and cruise vessel (ferry passengers are still exempted) passenger fees. CBP estimates additional COBRA revenue of \$83 million in FY 2012 and \$110 million in FY 2013, in addition to increases due to predicted volume growth. CBP plans to use the increased fee collections to narrow the gap between COBRA collections and expenses under the hierarchy referenced in the statute (19 U.S.C. § 58c(f)(3); COBRA).

Revenues from user fees will support CBP’s inspection functions, helping the organization meet: CBP Goal 1, Secure the Nation’s Borders to Protect America from the Entry of Dangerous People and Goods and Prevent Unlawful Trade and Travel; CBP Goal 2, Ensure the Efficient Flow of Legitimate Trade and Travel Across U.S. Borders; Quadrennial Homeland Security Goal 2.1, Effectively Control

U.S. Air, Land, and Sea Borders; and Quadrennial Homeland Security Goal 2.2, Safeguard Lawful Trade and Travel.

### COBRA passenger inspection fee Mission Statement

Customs and Border Protection user fees are authorized under 19 U.S.C. 58c, fees for certain customs services. The fees were created by the *Consolidated Omnibus Budget Reconciliation Act of 1985* (COBRA). COBRA fees are made available through permanent /indefinite appropriation created by the user fee statute. CBP collects customs fees to cover the cost of providing customs inspections of commercial operations, including, but not limited to, all costs associated with commercial passenger, vessel, vehicle, aircraft, and cargo processing. In order to maintain the operation supported by this fee, CBP retains a carryover of \$50 million annually to prevent any disruption between fiscal years and collections of fees.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	167,391	201,242	215,236	13,994
11.5 Other personnel compensation	51,899	62,395	66,734	4,339
11.6 Pay Diff (Sun/Night)	125,049	150,338	160,791	10,453
11.7 Military personnel/Awards	1,130	1,359	1,453	94
12.1 Benefits	57,418	69,030	73,830	4,800
12.4 Allowances	8,397	10,095	10,797	702
<b>Total, Salaries &amp; Benefits</b>	<b>411,284</b>	<b>494,459</b>	<b>528,841</b>	<b>34,382</b>

In FY 2013, an increase of \$26.974 million is the estimated amount the COBRA collections will increase from lifting the country exemption. In FY 2013, an increase of \$7.408 million in collections is estimated.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.2 Other services	\$398	\$478	\$511	\$33

In FY 2013, an increase of \$26,000 is the estimated amount the COBRA collections will increase from lifting the country exemption. In FY 2013, an increase of \$7,000 in collections is estimated.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **U.S. Customs and Border Protection Immigration Inspection User Fee**

### **I. Appropriation Overview**

#### **A. Mission Statement for Immigration Inspection User Fee**

The *Department of Justice Appropriation Act of 1987* (P.L. 99-591) authorized the collection of user fees from international passengers traveling into the United States. This fee is primarily used to fund inspection and detention services at air and sea ports-of-entry. This law, codified as 8 U.S.C. 1356(h), established the air and sea passenger fees to generate revenues that would reimburse the “expenses incurred by the Attorney General in providing immigration inspection and pre-inspection services for commercial aircraft or vessels.”

After the creation of the Department of Homeland Security (DHS), most of the immigration inspection functions were transferred to U.S. Customs and Border Protection (CBP). However, the functions funded by the Immigration Inspection User Fees (IUF) for detention and removal of inadmissible aliens and other investigative activities were transferred to the U.S. Immigration and Customs Enforcement (ICE). As a result, a Memorandum of Agreement (MOA) was established between CBP and ICE in 2004 to determine the allocation of fee collections between the two DHS Components.

The IUF supports the following strategic goals: CBP Strategic Goal 1, Secure the Nation’s Borders to Protect America from the Entry of Dangerous People and Goods and Prevent Unlawful Trade and Travel; the Quadrennial Homeland Security Strategic Goal 2.2, Safeguard Lawful Trade and Travel; and the Quadrennial Homeland Security Goal 3.2, Prevent Unlawful Immigration.

#### **B. Budget Activities**

In FY 2013, the IUF will be used to fund a portion of the salaries, benefits, and overtime for the Customs and Border Protection Officers (CBPOs) performing immigration inspection and detention and removal of inadmissible aliens. These functions support the following Lines of Business (LOBs):

- LOB 2, Securing and Facilitating Flows of People, in which the IUF has the greatest impact on subprogram 2, Inbound Inspection.
- LOB 5, Enterprise Business Services, to include salaries and benefits for managing information technology infrastructure.

In addition, the IUF funds administrative support, to include rent, contractual services, supplies, equipment, and printing that are associated with LOBs 2 and 5, and LOB 6, Mission Support.

### **C. Budget Request Summary**

CBP requests 2,754 positions, 2,706 full-time equivalent employees, and \$568.792 million in FY 2013 for the IUF. The IUF is composed of Administrative Carrier Fines and Airline and Vessel User Fees. The IUF is shared between CBP and ICE. Although CBP retains 100 percent of Administrative Carrier Fines, CBP receives 82.63 percent of the Airline and Vessel User Fees. The remaining 17.37 percent of the Airline and Vessel User Fees collection goes to ICE.

The Administrative Carrier Fines differ from the fines collected under the Illegal Immigration Reform and Immigrant Responsibility Act. CBP projected the FY 2013 collections by analyzing external statistics, including Federal Aviation Administration forecasts for passengers, the economic growth prescribed by Office of Management and Budget, and internal projections by the Office of Field Operations.

#### **CURRENT SERVICES PROGRAM DESCRIPTION**

As established in a Memorandum Of Agreement between U.S. Customs and Border Protection (CBP) and U.S. Immigration and Customs Enforcement (ICE), funds from the IUF account are used by CBP (82.63 percent) and ICE (17.37 percent) to recover some of the costs of immigration inspection services and detention and removal of inadmissible aliens related to the inspection and pre-inspection services for commercial aircraft or vessels. At air and sea ports of entry specifically, the fees cover some of the costs of immigration personnel, the maintenance and updating of systems to track criminal and illegal aliens in areas with high apprehensions, and the repair and maintenance of equipment. Revenues from IUF will support CBP’s inspection functions, helping the organization meet: CBP Strategic Goal 1, Secure the Nation’s Borders to Protect America from the Entry of Dangerous People and Goods and Prevent Unlawful Trade and Travel; the Quadrennial Homeland Security Strategic Goal 2.2, Safeguard Lawful Trade and Travel; and Quadrennial Homeland Security Goal 3.2, Prevent Unlawful Immigration.

### Immigration inspection user fee Mission Statement

The *Department of Justice Appropriation Act of 1987* (P.L. 99-591) authorized the collection of user fees for processing commercial air and sea passengers. This law, codified as 8 U.S.C. 1356(h), established the two fees to generate revenues that would reimburse the appropriation for expenses incurred by the Attorney General in providing immigration inspection and pre-inspection services for commercial aircraft or vessels.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **U.S. Customs and Border Protection Land Border Inspection Fee**

### **I. Appropriation Overview**

#### **A. Mission Statement for Land Border Inspection Fee**

The *Department of Justice Appropriation Act* of 1990 (P.L. 101-515), as codified as 8 U.S.C. 1356(q), authorizes the Land Border Inspection Fees (LBIF) to recover costs incurred for the inspection services provided at land border ports of entry. In actuality, the fees collected do not fully cover the costs of the programs. The funds in the LBIF account are used to support the following U.S. Customs and Border Protection (CBP) activities (in hierarchal order):

- Overtime inspection services;
- Expansion, operation, and maintenance of information technology systems for non-immigrant control;
- The hiring of temporary and permanent inspectors;
- Minor construction costs associated with the addition of new traffic lanes;
- Detection of fraudulent travel documents; and
- Administrative expenses of account.

The LBIF supports CBP Strategic Goal 1, Secure the Nation's Borders to Protect America from the Entry of Dangerous People and Goods and Prevent Unlawful Trade and Travel; CBP Strategic Goal 2, Ensure the Efficient Flow of Legitimate Trade and Travel Across U.S. Borders; Quadrennial Homeland Security Goal 2.1, Effectively Control U.S. Air, Land, and Sea Border; and Quadrennial Homeland Security Goal 3, Prevent Unlawful Immigration.

#### **B. Budget Activities**

Collections from LBIF fund the salaries and benefits of Customs and Border Protection officers (CBPOs), as well as operational and maintenance costs. To the extent that funding is available from the LBIF account, the CBP appropriation can be reimbursed for its full cost of inspection services at the land border ports of entry. The following fees are deposited into the LBIF account.

- Dedicated Commuter Lane additional vehicle (DCL) \$42
- Arrival/Departure Land Border (I-94) \$6
- Non-Immigrant Visa Waiver (I-94W) \$6
- Canadian Boat Landing Permit Individual (I-68) \$16
- Canadian Boat Landing Permit Family (I-68) \$32
- Replacement of Papers for Non-resident Mexican Crossing (I-190) \$26
- NEXUS \$50 (every 5 years)
- SENTRI (Secure Electronic Network for Travelers Rapid Inspection) \$129 (individuals); \$160 (families). Both fees cover 5 years.
- Free and Secure Trade Program (FAST) Driver Application Fee \$50 (every 5 years)

In Fiscal Year (FY) 2013, all LBIF funding will be used to cover salaries, benefits, and overtime for CBPOs performing LBIF-related inspections. The LBIF funds are utilized in Line of Business 2, Securing and Facilitating Flows of People, in which the LBIF fee has the greatest impact on subprogram 1, Pre-Arrival Processing; subprogram 2, Inbound Inspection; and subprogram 3, Outbound Inspection.

In FY 2012, CBP will initiate fee studies for some of these programs to assess the costs of the programs against the fee collections.

### **C. Budget Request Summary**

CBP requests 237 positions, 234 full time equivalent employee, and \$35.935 million in FY 2013 for LBIF. This request will fund the salaries and benefits of CBPOs and related operational and maintenance costs. This estimate is based on growth of the overall economy (Gross Domestic Product), as projected by the Congressional Budget Office.

#### CURRENT SERVICES PROGRAM DESCRIPTION

As authorized by law, Land Border Inspection Fees are used to recover part of U.S. Customs and Border Protection (CBP's) costs for immigration inspections at land border ports of entry, including inspections of pedestrians, buses, passenger occupancy vehicles, and rail cars. It also includes antiterrorism efforts, dedicated lane programs, and forms processing. These collections will help CBP meet: CBP Strategic Goal 1, Secure the Nation's Borders to Protect America from the Entry of Dangerous People and Goods and Prevent Unlawful Trade and Travel; CBP Strategic Goal 2, Ensure the Efficient Flow of Legitimate Trade and Travel Across U.S. Borders; Quadrennial Homeland Security Goal 2.1, Effectively Control U.S. Air, Land, and Sea Border; and Quadrennial Homeland Security Goal 3, Prevent Unlawful Immigration.

### Land border inspection fee Mission Statement

The *Department of Justice Appropriation Act of 1990* (P.L. 101-515), as codified as 8 U.S.C. 1356(q), authorizes the fees to recover costs incurred in the following categories involving the operation of various pilot programs: Overtime inspection services; Expansion, operation, and maintenance of information technology systems for non-immigrant control; Hiring of temporary and permanent inspectors; Minor construction costs associated with the addition of new traffic lanes; Detection of fraudulent travel documents; and Administrative expenses of account.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	15,276	16,107	16,396	289
11.6 Pay Diff (Sun/Night)	7,899	8,328	8,478	150

## **BUDGET REQUEST AND SUPPORTING INFORMATION**

### **U.S. Customs and Border Protection Immigration Enforcement Fines**

#### **I. Appropriation Overview**

##### **A. Mission Statement for Immigration Enforcement Fines**

The Immigration Enforcement Account was established under Section 382 of the *Illegal Immigration Reform and Immigrant Responsibility Act of 1996* (P.L. 104-208; IIRIRA). In addition to creating this account, IIRIRA also added new types of fines to include fines levied against aliens for failure to depart the United States if so ordered. Fines are also levied on carriers transporting passengers to the United States that violate element(s) of immigration law. The Immigration Enforcement Account supports the U.S. Customs and Border Protection (CBP) Strategic Goal 1, Secure the Nation's Borders to Protect America from the Entry of Dangerous People and Goods and Prevent Unlawful Trade and Travel; Quadrennial Homeland Security Strategic Goal 2.2, Safeguard Lawful Trade and Travel; and Quadrennial Homeland Security Goal 3.2, Prevent Unlawful Immigration.

##### **B. Budget Activities**

Subject to the availability of funds, the fines collected are used to support the following CBP officer activities: identification, investigation, apprehension, detention, and removal of criminal aliens; the maintenance and updating of systems to track criminal and illegal aliens on the border in areas with high apprehensions to deter illegal entry; and the repair, maintenance, and construction of border facilities. The Immigration Enforcement Account supports the Inbound Inspection subprogram under the CBP's Line of Business 3, Securing and Facilitating Flows of People.

##### **C. Budget Request Summary**

CBP requests two positions, two full-time equivalents, and \$1.093 million in FY 2013 to support collection of enforcement fines. Because violations of the law are not easily quantifiable, enforcement-related collections are relatively fluid and difficult to forecast.

<b>Net, Enacted Appropriations and Budget Estimates:*</b>	<b>2</b>	<b>2</b>	<b>201</b>	<b>2</b>	<b>2</b>	<b>1,041</b>	<b>2</b>	<b>2</b>	<b>1,093</b>	<b>-</b>	<b>-</b>	<b>52</b>	<b>-</b>	<b>-</b>	<b>-</b>	<b>-</b>	<b>-</b>	<b>52</b>

\*Although the FY 2012 Enacted and the FY 2013 Request for full-time equivalent employees (FTEs) in the above table and other supporting material is shown as two FTEs, upon further analysis, CBP has refined the FTE estimate for FY 2012 to seven FTEs and in FY 2013 to eight FTEs. Historically, the unpredictability of collections in Immigration Enforcement Fines has created difficulty in determining the appropriate amount of FTEs, which could be supported from these user fees.

Historically, the unpredictability of collections in Immigration Enforcement Fines has created difficulty in determining the appropriate amount of FTEs, which could be supported from these user fees.

### Immigration enforcement fines Mission Statement

The Immigration Enforcement account was established under Section 382 of the *Illegal Immigration Reform and Immigrant Responsibility Act (IIRIRA) of 1996*. Previously, similar fines were collected and deposited into the Immigration User Fee account. In addition to creating this account, IIRIRA also added new types of fines, such as those levied against aliens for failure to depart the United States after being so ordered. The authorized uses of this fund consist of: the identification, investigation, apprehension, detention, and removal of criminal aliens; the maintenance and updating of systems to track criminal and illegal aliens on the border in areas with high apprehensions to deter illegal entry; and the repair, maintenance, and construction of border facilities.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change

## **BUDGET REQUEST AND SUPPORTING INFORMATION**

### **U.S. Customs and Border Protection Global Entry User Fees**

#### **I. Appropriation Overview**

##### **A. Mission Statement for Global Entry User Fees**

The Global Entry Program is authorized under the *Consolidated Appropriations Act of 2008* (P.L. 110-161) Section 565(3) (A). The program supports the following strategic goals: U.S. Customs and Border Protection (CBP) Strategic Goal 2, Ensure the Efficient Flow of Legitimate Trade and Travel Across U.S. Borders; and Quadrennial Homeland Security Strategic Goal 2.1, Effectively Control U.S. Air, Land, and Sea Borders.

The program establishes an international registered traveler program that incorporates technologies, such as biometrics and e-passports, and security threat assessments to expedite screening and processing of international passengers. All applicants must be pre-approved, and they must undergo a rigorous background check and interview before enrollment. Global Entry allows expedited clearance for pre-approved and low-risk travelers upon arrival in the United States. Though intended for frequent international travelers, there is no minimum number of trips necessary to qualify. Participants may enter the United States by using automated kiosks located at selected airports.

Section 565 (3) (B) of the *Consolidated Appropriations Act of 2008* authorized the imposition of a fee to recover the full cost of the program. The implementing regulation to establish an application fee was issued in November 2009 (74 FR 59936 (2009-11-19)). On the basis of cost estimates and enrollment projections, a charge of \$100 per application is deemed appropriate to generate necessary revenue to cover the full cost of processing Global Entry applications. CBP will initiate a review of the Global Entry application charge to ensure that program costs continue to be fully covered.

Currently, Global Entry kiosks can be found in 20 international U.S. airports and four Canadian pre-clearance locations. In FY 2012, CBP plans to expand Global Entry to 16 additional airports. Additionally, beginning in Fiscal Year (FY) 2012, the Asian-Pacific Economic Cooperation Business Travel Card (P.L. 112-54) was developed as an extension to the Global Entry Program in response to the need for business people to gain streamlined entrance to the economies of the Asia-Pacific region. This enables business people to explore new business opportunities, attend meetings, and conduct trade and investment activities.

##### **B. Budget Activities**

The Global Entry user fee is used to support the technology required to administer the program. Global Entry funds support the Pre-Arrival Processing subprogram within Line of Business (LOB) 3, Securing and Facilitating Flows of People.

The program has been used as a basis for cooperation with other nations and other agencies in order to further expedite passenger processing. Global Entry participants can join the Fast Low Risk Universal Crossing program, offered by the Netherlands to provide preferred treatment at the Amsterdam Airport.

### **C. Budget Request Summary**

CBP requests \$13.743 million in FY 2013 for Global Entry. The budget request is based on an estimate of 32,300 additional enrollees in FY 2013.

**CURRENT SERVICES PROGRAM DESCRIPTION**

The program authorizes the use of technologies, such as biometrics and e-passports, and security threat assessments to expedite screening and processing of international passengers. Currently there is a fee of \$100 per applicant to cover the costs of the program. This fee will be reviewed in 2012 to ensure that it is set at an appropriate level to recover the full costs of the Electronic System for Travel Authorization operations. Revenues from Global Entry user fees will support U.S. Customs and Border Protection (CBP's) inspection functions, helping the organization meet: CBP Strategic Goal 2, Ensure the Efficient Flow of Legitimate Trade and Travel Across U.S. Borders; and Quadrennial Homeland Security Strategic Goal 2.1, Effectively Control U.S. Air, Land, and Sea Borders.

Items funded with the Global Entry fees are available technologies, such as biometrics and e-passports, and security threat assessments to expedite the screening and processing of international travelers. These items include equipment such as kiosks, software, and background investigations (via an interagency agreement with the Federal Bureau of Investigation).

### Global Entry User Fees Mission Statement

The Global Entry Program is authorized under the *Consolidated Appropriations Act of 2008* (P.L. 110-161) Section 565(3)(A). The program established an international registered traveler program that incorporated available technologies, such as biometrics and e-passports, and security threat assessments to expedite screening and processing of international passengers. In addition, Section 565 (3)(B) of the *Consolidated Appropriations Act of 2008* authorized the imposition of a fee to recover the full cost of the program. The current fee rate has been set at \$100 per applicant.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.2 Other services	\$2,550	\$9,694	\$9,869	\$175

In FY 2013, an increase of \$175,000 in collections is estimated.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.4 O&M of facilities	\$1,000	\$3,802	\$3,870	\$68

In FY 2013, an increase of \$68,000 in collections is estimated.

## **BUDGET REQUEST AND SUPPORTING INFORMATION**

### **U.S. Customs and Border Protection Electronic System for Travel Authorization Fee**

#### **I. Appropriation Overview**

##### **A. Mission Statement for Electronic System for Travel Authorization Fee**

P. L.110-53, or the *Implementing Recommendations of the 9/11 Commission Act of 2007* (or the Act) established an electronic authorization system to pre-screen aliens prior to arrival in the United States. This mandate was made operational by the creation of the Electronic System for Travel Authorization (ESTA). ESTA operates under informed compliance, requiring all Visa Waiver Program travelers to obtain authorization prior to travel.

Section 711 (h)(3)(B) of the Act authorizes the Secretary of the Department of Homeland Security to establish a fee via regulation to recover the cost of operating and administering ESTA. CBP conducted a fee study and, in August 2010, published the results in an interim final rule. This rule set the fee at \$4 per application to recover the full costs associated with operating ESTA. The authorization to travel to the United States is valid for a 2-year period, and travelers pay only once during the 2-year period.

ESTA supports the following strategic goals: CBP Strategic Goal 1, Secure the Nation's Borders to Protect America from the Entry of Dangerous People and Goods and Prevent Unlawful Trade and Travel; Quadrennial Homeland Security Goal 2.1, Effectively Control U.S. Air, Land, and Sea Border; and Quadrennial Homeland Security Goal 3.2, Prevent Unlawful Immigration.

##### **B. Budget Activities**

ESTA collections fund operational costs to administer the ESTA program and maintain information technology (IT) equipment. Fee revenue funds the salaries and benefits of personnel, overtime and the cost to maintain kiosks and other IT equipment.

ESTA funds support subprogram 1, Pre-Arrival Processing, within Line of Business 3, Securing and Facilitating Flows of People. The purpose of Pre-Arrival Processing is to improve the targeting, screening, and apprehension of high-risk international travelers to prevent terrorist attacks and criminal activity while speeding the processing of legitimate travelers.

##### **C. Budget Request Summary**

CBP requests 27 positions, 27 full-time equivalent employees, and \$46.318 million in Fiscal Year (FY) 2013 for ESTA. The Office of Field Operations estimates that more than 11 million applications will be processed by CBP in 2013.

#### **CURRENT SERVICES PROGRAM DESCRIPTION**

All passengers from countries that are part of the Visa Waiver Program (VWP) are required to submit an application via the Electronic System for Travel Authorization (ESTA) to determine eligibility to travel to the United States. A passenger whose ESTA application has been rejected must apply for a visa before traveling to the United States. The objective of ESTA is to make entry procedures into the United States more efficient and ensure visitors feel welcome. ESTA counterbalances vulnerabilities inherent in visa-free travel by adding a layer of advance scrutiny that enables CBP frontline personnel to focus even more on the small population of potentially dangerous travelers. Revenues from user fees fund ESTA operations and support the following goals: CBP Strategic Goal 1, Secure the Nation's Borders to Protect America from the Entry of Dangerous People and Goods and Prevent Unlawful Trade and Travel; Quadrennial Homeland Security Goal 2.1, Effectively Control U.S. Air, Land, and Sea Border; and Quadrennial Homeland Security Goal 3.2, Prevent Unlawful Immigration.

### Electronic System for Travel Authorization Fee Mission Statement

P. L.110-53 or the *9/11 Act* (or the Act) includes languages to establish an electronic authorization system to pre-screen aliens prior to arrival in the United States to avoid security risks. This mandate was made operational by the creation of the Electronic System for Travel Authorization (ETSA or the System). ESTA operates under informed compliance, requiring all VISA Waiver travelers to obtain authorization prior to travel.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	1,613	2,335	2,376	41
11.6 Pay Diff (Sun/Night)	258	373	380	7

# BUDGET REQUEST AND SUPPORTING INFORMATION

## U.S. Customs and Border Protection APHIS User Fees

### I. Appropriation Overview

#### A. Mission Statement for APHIS User Fees

Section 2509 of the *Food, Agriculture, Conservation and Trade Act of 1990* (P.L. 101-624) authorized the United States Department of Agriculture (USDA) to collect user fees for various services. The law codified, as 21 U.S.C. 136a, authorized the Secretary of Agriculture to prescribe and collect fees to recover the costs of providing Agriculture Quarantine and Inspection (AQI) services for international arrival of passengers, conveyances, animals, plants, and agricultural goods at ports of entry. This authority established fees on five modes of international passenger transportation: (1) commercial aircraft; (2) sea going vessels; (3) trucks with single entry; (4) trucks operating under a multiple entry decal; and (5) loaded rail cars.

The *Homeland Security Act of 2002* (P.L. 107-296) transferred certain inspection functions from USDA to the Department of Homeland Security (DHS). The revenues from these fees are to be used to reimburse the full cost incurred in providing inspectional activities. Section of 421(f) of the *Homeland Security Act of 2002*, mandates U.S. Customs and Border Protection (CBP) and USDA to agree on a periodic transfer of funds from the latter to the former. Under a Memorandum of Agreement between CBP and USDA, CBP receives approximately 60.64 percent of the collections from the AQI user fee. The revenues from the current fee level cover 75 percent of the costs incurred in providing the inspectional activities associated with the passengers and conveyances that are subject to fees. In Fiscal Year (FY) 2012, USDA and CBP will complete a fee study to determine the appropriate fee level to recover the USDA and CBP cost associated with this program.

The APHIS fee supports the CBP Strategic Goal 1, Secure the Nation's Borders to Protect America from the Entry of Dangerous People and Goods and Prevent Unlawful Trade and Travel; and the Quadrennial Homeland Security Goal 2.1, Effectively Control U.S. Air, Land, and Sea Border.

#### B. Budget Activities

CBP agriculture specialists and officers perform biological and agricultural inspections to prevent entry of organisms that might be used for biological warfare or terrorism, and to prevent the introduction of harmful agriculture pests and diseases into the United States. CBP agriculture specialists and officers inspect passenger declarations and cargo manifests, international air passengers, baggage, cargo, and conveyances, and may hold suspect articles in quarantine to prevent the introduction of plant or animal diseases.

Most of the AQI fee funds the salary and benefits and overtime costs for Customs and Border Patrol officers (CBPOs) who perform APHIS-related functions. APHIS funds support Line of Business 2,

Securing and Facilitating Flows of Cargo. APHIS fees primarily support subprogram 3, Advance National and Economic Security and subprogram 5, Cargo/Conveyance Entry.

### **C. Budget Request Summary**

In FY 2013, CBP requests 2,169 positions, 2,134 full-time equivalent employees, and \$339.150 million for AQI to fund salaries, benefits, and overtime costs for CBPOs who perform AQI-related functions.

#### CURRENT SERVICES PROGRAM DESCRIPTION

APHIS funds will be used for international air passenger, commercial aircraft clearance, commercial vessel, commercial truck (per crossing and annual decal), and loaded rail car inspectional activities associated with APHIS user fees. Revenues from these fees will support U.S. Customs and Border Protection (CBP) inspection functions and help CBP meet: CBP Strategic Goal 1, Secure the Nation’s Borders to Protect America from the Entry of Dangerous People and Goods and Prevent Unlawful Trade and Travel; and Quadrennial Homeland Security Goal 2.1, Effectively Control U.S. Air, Land, and Sea Border.

### APHIS User Fees Mission Statement

Section 2509 of the *Food, Agriculture, Conservation and Trade Act of 1990* (P.L. 101-624) authorized the United States Department of Agriculture to collect user fees for various services. The law codified as 21 U.S.C. 136 established seven types of Plant Protection and Quarantine user fees, six of which are the Agricultural Quarantine and Inspection fees, known to CBP as the APHIS user fees. The six established processing fees are for international air passengers, commercial aircraft clearance, commercial vessels, commercial trucks, commercial truck decals, and loaded rail cars. The revenues from the current fee level cover 75 percent of the costs incurred in providing the inspectional activities associated with the passengers and conveyances that are subject to fees.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change

## **BUDGET REQUEST AND SUPPORTING INFORMATION**

### **U.S. Customs and Border Protection Small Airport User Fee**

#### **I. Appropriation Overview**

##### **A. Mission Statement for Small Airport User Fee**

The Small Airport User Fee is authorized under 19 U.S.C. 58b and administered under 19 U.S.C. 58c(b)(9)(A)(i). The Small Airport User Fee program supports inspection services at participating small airports on a fully reimbursable basis. The fee charged under this program is set forth in a Memorandum of Agreement between the user fee airports and U.S. Customs and Border Protection (CBP), and it may be adjusted annually as costs and requirements change.

The Small Airport User Fee supports CBP Strategic Goal 1, Secure the Nation's Borders to Protect America from the Entry of Dangerous People and Goods and Prevent Unlawful Trade and Travel; and Quadrennial Homeland Security Goal 2.1, Effectively Control U.S. Air, Land, and Sea Border.

##### **B. Budget Activities**

The Small Airport User Fee provides funding for inspection services by CBP officers. Currently, CBP supports 57 small airports. In FY 2012, CBP began operations at Ellington Field in Houston, Texas. These small airports across the country pay CBP a startup and recurring fee, which reimburses the cost of CBP inspection services. In FY 2011, there was a decrease in revenue due to the timing of revenue recognition.

Collections from the Small Airport User Fee support Line of Business 3, Securing and Facilitating Flows of People. Within that Line of Business, the Small Airport Fee has the greatest impact on subprogram 2, Inbound Inspection, which supports screening and inspection of all travelers. The Pre-Arrival Processing and Outbound Inspection subprograms are also supported by the Small Airport User Fee.

##### **C. Budget Request Summary**

In FY 2013, CBP requests 70 positions, 69 full-time equivalent employees, and \$8.318 million in anticipated collections from the Small Airport User Fee.

Total Change 2012 to 2013	-	-	151

#### **CURRENT SERVICES PROGRAM DESCRIPTION**

The Small Airport User Fee program supports inspection services provided to participating small airports on a fully reimbursable basis. The amount charged is determined by how many CBP Officers are stationed at the port and whether it is a new or existing facility. Revenue from this fee will help CBP meet: CBP Strategic Goal 1, Secure the Nation's Borders to Protect America from the Entry of Dangerous People and Goods and Prevent Unlawful Trade and Travel; and Quadrennial Homeland Security Goal 2.1, Effectively Control U.S. Air, Land, and Sea Border.

## **BUDGET REQUEST AND SUPPORTING INFORMATION**

### **U.S. Customs and Border Protection Puerto Rico Trust Fund**

#### **I. Appropriation Overview**

##### **A. Mission Statement for Puerto Rico Trust Fund**

Title 48 U.S.C. 740 authorizes the collections of duties and taxes in Puerto Rico and the creation of the Puerto Rico Trust Fund (PRTF). Collections in Puerto Rico, less the costs of collecting duties and taxes, are transferred to Puerto Rico's Treasury (Hacienda) to be expended as required by law for the Government of Puerto Rico and the benefit thereof.

The PRTF collections fund inspection of passengers and merchandise entering Puerto Rico from foreign locations, and they help to combat criminal elements that have focused on Puerto Rico as a gateway to illegally introduce narcotics into the U.S. mainland.

The PRTF supports CBP Strategic Goal 1, Secure the Nation's Borders to Protect America from the Entry of Dangerous People and Goods and Prevent Unlawful Trade and Travel; and the Quadrennial Homeland Security Goal 2.1, Effectively Control U.S. Air, Land, and Sea Border.

##### **B. Budget Activities**

CBP administers the PRTF and retains a portion of the funds to pay for its expenses associated with the collection of duties and taxes in Puerto Rico. CBP annually transfers funding from PRTF to U.S. Immigration Customs Enforcement (ICE) for enforcement duties it performs in Puerto Rico. The reimbursement from the PRTF to ICE is based on biennial agreements which ICE has negotiated with the Government of Puerto Rico. This transfer, however, is subject to availability of funds in the PRTF. PRTF funding is prioritized in the following order: the Office of Field Operations, ICE, and then the Office of Air and Marine. Any remaining balance is then remitted to the Government of Puerto Rico.

Collections from the PRTF are utilized in support of Lines of Business (LOBs) 1, 2, 3, 5 and 6 as follows:

- LOB 1, Securing America's Borders
- LOB 2, Securing and Facilitating Flows of Cargo
  - Subprogram 3, Advance National and Economic
  - Subprogram 5, Cargo/Conveyance Entry and Security
- LOB 3, Securing and Facilitating Flows of People
  - Pre-arrival Processing
  - Inbound Inspection and Outbound Inspection
- LOB 5, Enterprise Business Services
- LOB 6, Mission Support
  - Partner Programs

Funding for this program is used for salaries and operating expenses incurred to identify, apprehend, detain, and (when necessary) remove illegal aliens from the United States and U.S. Territories. For CBP, most of the PRTF collections cover the cost of performing collection and inspection duties in Puerto Rico. This includes the salaries and benefits of personnel, contractual services, information technology, equipment and technical support.

### **C. Budget Request Summary**

CBP requests 296 positions, 291 full-time equivalents employees, and \$96.367 million in Fiscal Year 2013 for the PRTF. This estimate is based on projected import duties and certain tax collections.

#### **CURRENT SERVICES PROGRAM DESCRIPTION**

U.S. Customs and Border Protection (CBP) is authorized to use collections in the Puerto Rico Trust Fund to cover costs related to the collections of duties and taxes in Puerto Rico. CBP's Office of Air and Marine and U.S. Immigration and Customs Enforcement negotiate biennial agreements with Puerto Rico's Treasury that are funded with the anticipated surplus Puerto Rico expects to receive after CBP covers its customs-related costs. Revenues from import duties and taxes will support CBP's inspection functions and help CBP meet: CBP Strategic Goal 1, Secure the Nation's Borders to Protect America from the Entry of Dangerous People and Goods and Prevent Unlawful Trade and Travel; and Quadrennial Homeland Security Goal 2.1, Effectively Control U.S. Air, Land, and Sea Border.

### Puerto Rico Trust Fund Mission Statement

The duties and taxes related to the Puerto Rico Trust Fund are authorized under 48 U.S.C. 740. The duties and taxes collected in Puerto Rico, less the costs of providing inspection and law enforcement services, are paid into the treasury of Puerto Rico, to be expended as required by law for the Government of Puerto Rico and the benefit thereof. These funds are intended to combat criminal elements who have focused on Puerto Rico as a gateway to illegally introduce narcotics into the mainland of the United States.

<sup>1</sup> FY 2012 excludes a rescission of prior-year unobligated balances in the amount of \$20 million, pursuant to P.L. 112-74.

<sup>2</sup> The Homeland/Non-Homeland allocation shown in OMB MAX is incorrect. The display on the above table is the correct allocation.

### iii. Status of Congressionally Requested Studies, Reports, and Evaluations

#### Department of Homeland Security U.S. Immigrations and Customs Enforcement

<b>Fiscal Year</b>	<b>Due Date</b>	<b>Reference/Citation</b>	<b>Requirement</b>	<b>Status</b>
2009	2/1/2010	House Report 111-157, Title II p. 55	Alternatives to Detention Cost/Benefit Analysis- ICE is directed to develop a benefit-cost analysis of its various Alternatives to Detention approaches, and include this information in the 2011 budget submission for the program.	Report is with DHS for clearance.
2011	7/1/2011	Conference Report 111-298, Title II, p.75; Senate Report 111-31, Title II p. 50; House Report 111-157, Title II p. 54	Second Semi-Annual Deportation of Parents of U.S.-Born Citizens FY11- Provide semiannual data to the Committees and the Office of Immigration Statistics on the deportation of parents of U.S.-born children; data should start being collected no later than July 1, 2010.	Report is within ICE for clearance.
2011	8/15/2011	Conference Report 111-298, Title II, p.74; Senate Report 111-31, Title II, p.51	DRO FY11 Q3- Continue to submit quarterly reports on detention and removal statistics, as discussed in the Senate report.	Report is with OMB for clearance.

2011	11/1/2011	House Report 111-157, Title II p. 53	Medical Care for ICE Detainees FY11 Q4- Report within 30 days of the end of each quarter of the fiscal year on actions taken to address inadequacies in the medical services to detainees.	Report is with DHS for clearance.
2011	11/15/2011	Conference Report 111-298, Title II, p.74; Senate Report 111-31, Title II, p.51	DRO FY11 Q4- Continue to submit quarterly reports on detention and removal statistics, as discussed in the Senate report.	Report is with DHS for clearance.
2011	11/15/2011	Conference Report 111-298, Title II, p.72-73 House Report 111-157, Title II p. 50	Secure Communities FY11 Q4- Within 45 days of the close of each quarter of the fiscal year, submit a report to the Committees on progress to make sure all aliens who have been convicted of crimes and ordered removed from the United States are indeed deported to their country of origin.	Report is with DHS for clearance.
2012	1/1/2012	Senate Report 112-74 p. 58	First Semi-Annual Deportation of Parents of U.S. Born Children Report FY12 - The Committee directs ICE to continue to submit the report on collection of data on deportation of parents of U.S.-born children, as mandated in the joint explanatory statement accompanying Public Law 111-83, to the Senate Committee on Appropriations and the Committee on the Judiciary.	Report is within ICE for clearance.

2012	2/13/2012	House Report 112-91 p.56	TECS Modernization Investment and Management Plan - the bill includes a requirement for a multi-year investment and management plan to be provided at the time of the President's budget submission and updated on an annual basis to fully justify requested funds for this activity and other activities under this account, as well as project future-year requirements and funding levels.	Report is within ICE for clearance.
2012	11/15/2012	Conference Report 2055, p. 0565 Senate Report 112-74 p. 56	Worksite Enforcement Annual Report - SENATE LANGUAGE: The Committee directs ICE to provide an annual report on the number of worksite enforcement investigations opened and closed, employee and employer arrests—both criminal and administrative, and the fines assessed and collected each fiscal year. This report shall be submitted to the Committee within 45 days after the end of each fiscal year. The Committee also directs that the report for fiscal year 2011 should include the same statistics for fiscal years 2007–2010. CONFERENCE LANGUAGE: Further, ICE shall provide an annual report on worksite enforcement activities as directed in the Senate report.	Report is within ICE for clearance.

2012	2/13/2012	House Report 112-91 p.51	Textile Transshipment Report - The committee directs ICE to provide a report with its fiscal year 2013 budget request on its actual and projected obligations of this funding, covering fiscal years 2007 to 2012. The report should include staffing level by fiscal year since 2007 and a five year enforcement plan for transshipment violations.	Report is within ICE for clearance.
2012	2/13/2012	Conference Report 2055 p. 0562 House Report 112-91 p. 51 Senate Report 112-74 p. 53	AD/CVD and National IPR Coordination Center Three Year Enforcement Improvement Plan - SENATE LANGUAGE: The Committee also directs ICE to submit by February 13, 2012, a 3-year strategy to improve AD/CVD enforcement, per the Senate report, and the information required on the National IPR Coordination Center in the House report. HOUSE LANGUAGE: ICE is directed to report to the Committee on the budget for the National IPR Coordination Center for fiscal year 2012, the number of Agents in the U.S. and abroad dedicated to IPR investigations, and the number of hours spent by Agents in fiscal year 2011 on IPR investigations.	Report is within ICE for clearance.

2012	2/15/2012	Conference Report 2055 p. 0562 House Report 112-91 p.50	Investigative Activities and Expenditures Report FY12 Q1 - HOUSE LANGUAGE: The Committee directs ICE to continue to provide quarterly data on investigative activities and expenditures on a timely basis. CONFERENCE LANGUAGE: ICE is directed to continue to provide quarterly data on investigative activities and expenditures on a timely basis.	Report is within ICE for clearance.
2012	2/15/2012	Conference Report 2055 p. 0564 House Report 112-91 p.55-56 H.R. 2055 P. 0564	Staffing and Hiring Report FY12 Q1 - HOUSE LANGUAGE: The Committee directs ICE to begin submitting monthly staffing and hiring reports, as well as quarterly briefings on its hiring progress. Further, the Committee is concerned that the target staffing levels should be lower than authorized full-time equivalent levels. CONFERENCE LANGUAGE: ICE shall submit quarterly staffing and hiring reports. Further, as directed in the House report, ICE shall brief the Committees on appropriate staffing levels.	Report is within ICE for clearance.

2012	2/15/2012	Conference Report 2055 p.0564 Senate Report 112-74 p. 60	DRO Quarterly Report FY12 Q1 - SENATE LANGUAGE: The Committee continues to request ICE to submit a quarterly report to the Committee which compares the number of deportation, exclusion, and removal orders sought and obtained by ICE. Currently, the report is broken down: by district in which the removal order was issued; by type of order (deportation, exclusion, removal, expedited removal, and others); by agency issuing the order; by the number of cases in each category in which ICE has successfully removed the alien; and by the number of cases in each category in which ICE has not removed the alien. The Committee welcomes suggestions from ICE on ways to provide more appropriate data in this report and urges ICE to provide suggestions to the Committee on revisions to the details of this report by November 1, 2011. The first fiscal year 2012 quarterly report is to be submitted no later than January 15, 2013.	Report is within ICE for clearance.
------	-----------	--	--	-------------------------------------

2012	2/15/2012	Senate Report 112-74 p. 58	Detention Process Improvement and Reform Report - The Committee directs ICE to submit a report not later than December 1, 2011, detailing the specific steps it has taken since submission of the October 6, 2009, Immigration Detention Overview and Recommendations report to improve and reform the detention process and meet the goals outlined in that report, as well as what steps have been taken to rectify the issues identified in OIG-11-62.	Report is within ICE for clearance.
2012	2/15/2012	House Report 112-91 p.56	Unobligated Balances Report FY12 Q1 - The Committee directs ICE to report to the Committees on Appropriations quarterly on the results of its own quarterly reviews of obligations in carryover accounts that should be de-obligated through its validation and verification process.	Report is within ICE for clearance.
2012	2/15/2012	Conference Report 2055 p. 0564 House Report 112-91 p.53-54 Senate Report 112-74 p. 60	Secure Communities Quarterly Report FY12 Q1 - CONFERENCE LANGUAGE: ICE is directed to continue quarterly reports on the Secure Communities program, submit those reports within 45 days of the close of the quarter, and provide briefings within 45 days of the close of the quarter.	Report is within ICE for clearance.

2012	3/22/2012	Senate Report 112-74 p. 53	Commercial Fraud Investigators Expenditure Plan - The Committee directs ICE to consider whether additional commercial fraud investigators in the field offices would be a helpful resource addition to address the AD/CVD problem. The Committee directs ICE to submit a plan for expenditure of these additional, targeted resources within 90 days after the date of enactment of this act.	Report is within ICE for clearance.
2012	4/21/2012	Senate Report 112-74 p. 54	Visa Overstay Strategy Report with US-VISIT - Directs ICE to coordinate with US-VISIT and develop a comprehensive strategy to address the visa overstay problem. The strategy should consider the suggestions offered by the GAO and should be submitted not later than 120 days after the date of enactment of this act.	Report is within ICE for clearance.
2012	5/15/2012	Conference Report 2055 p.0564 Senate Report 112-74 p. 60	DRO Quarterly Report FY12 Q2 - SENATE LANGUAGE: The Committee continues to request ICE to submit a quarterly report to the Committee which compares the number of deportation, exclusion, and removal orders sought and obtained by ICE. Currently, the report is broken down: by district in which the	Report is within ICE for clearance.

			<p>removal order was issued; by type of order (deportation, exclusion, removal, expedited removal, and others); by agency issuing the order; by the number of cases in each category in which ICE has successfully removed the alien; and by the number of cases in each category in which ICE has not removed the alien. The Committee welcomes suggestions from ICE on ways to provide more appropriate data in this report and urges ICE to provide suggestions to the Committee on revisions to the details of this report by November 1, 2011. The first fiscal year 2012 quarterly report is to be submitted no later than January 15, 2013.</p>	
2012	5/15/2012	<p>Conference Report 2055 p. 0562 House Report 112-91 p.50</p>	<p>Investigative Activities and Expenditures Report FY12 Q2 - HOUSE LANGUAGE: The Committee directs ICE to continue to provide quarterly data on investigative activities and expenditures on a timely basis.</p>	<p>Report is within ICE for clearance.</p>

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **U.S. Immigration and Customs Enforcement Salaries and Expenses**

### **I. Appropriation Overview**

#### **A. Mission Statement for Salaries and Expenses:**

Programs funded through the Salaries and Expenses account contribute to the ICE mission of bringing a unified and coordinated focus to the enforcement of federal immigration and customs laws. Salaries and Expenses resources are used to combat terrorism, protect our Nation's borders, deter illegal immigration, and protect our cyber border. ICE accomplishes these missions by investigating, detaining, and prosecuting criminals and aliens who pose a risk to national security and public safety. These activities protect the infrastructure and persons within the United States.

#### **B. Budget Activities:**

##### **Management and Administration**

Management and Administration provides a range of mission and operational support for ICE. M&A oversees ICE's budget, expenditures, accounting, finance, and procurement. M&A is responsible for all human resources services, workforce recruitment, equal employment opportunity, and training for all employees and special agents. M&A oversees all information technology systems, facilities, and property and equipment, as well as the National Firearms and Tactical Training Unit, which ensures that ICE, Customs and Border Protection, and the Federal Protective Service have the necessary firearm, protective equipment and training to complete their jobs. In addition, M&A identifies and tracks the agency's performance measurements to ensure that strategic priorities, missions, and goals are met.

##### **Legal Proceedings**

The Office of the Principal Legal Advisor (OPLA) provides the legal advice, training, and services required to support the ICE mission. As the legal representative for the United States Government at immigration court hearings, OPLA attorneys handle a variety of immigration-related issues that range from contested removals to custody determinations to applications for administrative relief. Additionally, OPLA provides legal advice in customs-related enforcement actions, represents the Government in Merit System Protection Board and Equal Employment Opportunity hearings, provides ethics advice, and handles matters involving commercial and administrative law.

##### **Domestic Investigations**

The ICE Office of Domestic Investigations (OI), as part of Homeland Security Investigations (HSI), enforces trade and immigration laws through the investigation of activities, persons, and events that may pose a threat to the safety or security of the United States and its people. OI also

investigates illegal trafficking in weapons (including weapons of mass destruction), the smuggling of narcotics and other contraband, human smuggling and trafficking, money laundering and other financial crimes, fraudulent trade practices, identity and benefit fraud, child pornography, child sex tourism, and health and public safety dangers.

### **International Affairs**

The ICE Office of International Affairs (OIA), as part of HSI, represents DHS's largest investigative law enforcement presence abroad and helps protect the Nation beyond its borders. ICE OIA has the broadest international footprint in DHS with 69 offices in 47 countries. Through OIA, ICE works with foreign counterparts to identify and combat criminal organizations before they can adversely impact the United States. ICE's international mission is to protect the United States through international criminal investigations; to prevent acts of terrorism by targeting the people, money, and materials that support terrorist and criminal activities; and to identify and eliminate vulnerabilities in the Nation's border, economy, transportation networks, and infrastructure security systems.

### **Intelligence**

The Office of Intelligence (Intel), as part of HSI, collects, analyzes, and distributes information on critical homeland security vulnerabilities that could be exploited by terrorist and criminal organizations. Intel utilizes data and information on the movement of people, money, and materials into, within, and out of the United States to provide accurate and timely reporting to ICE leadership and field agents. Intel's Field Intelligence Groups (FIGs) are the agency's primary vehicle for intelligence analysis in support of field operations and enforcement. FIGs link headquarters and field components to facilitate intelligence collection, integration, analysis, and dissemination.

### **Enforcement and Removal Operations**

Enforcement and Removal Operations (ERO) is responsible for ensuring that every alien who has been ordered removed departs the United States through enforcement of the Nation's immigration laws and coordination with foreign governments to ensure countries will accept removable aliens. ERO is comprised of five Program/Project Activities:

**Custody Operations Program** – This program provides safe, secure, and humane detention of removable aliens who are held in government custody because they present a risk of flight, a risk to public safety, or are subject to mandatory detention. ICE carefully monitors which aliens are detained to ensure its limited detention space is used to best support border security and public safety.

**Fugitive Operations Program** – This program locates and apprehends fugitive aliens in the United States. ICE strives to identify and apprehend all fugitives, with an emphasis on those aliens posing the greatest risk to public safety. This creates a deterrent to potential absconders and promotes the integrity of the immigration process.

**Criminal Alien Program** – This program identifies criminal aliens incarcerated within federal, state, and local correctional facilities. To ensure that these criminal aliens are removed rather than released into the community, ICE strives to secure a final order of removal prior to the termination of their sentences. Upon completion of their criminal sentences, aliens are transferred into ICE custody to be removed from the United States.

**Alternatives to Detention Program** – This program places low-risk aliens under various forms of intensive supervision or electronic monitoring rather than in jail-like detention. These systems can be a cost-effective way to ensure individuals’ appearance for immigration hearings and for removal. This program also lowers the risk that aliens ordered removed will become fugitives.

**Transportation and Removal Program** – This program provides for the safe and secure transportation of aliens in ICE custody and the removal of aliens from the United States.

**Secure Communities / Comprehensive Identification and Removal of Criminal Aliens (SC/CIRCA)**

Secure Communities/Comprehensive Identification and Removal Criminal Aliens (SC/CIRCA) is a comprehensive plan to improve community safety by transforming the way the federal government cooperates with state and local law enforcement agencies to identify, detain, and remove criminal aliens held in custody and at large. SC/CIRCA is working to revolutionize immigration enforcement by using technology to share information between law enforcement agencies and by applying risk-based methodologies to focus resources on assisting local communities in the removal of those criminal aliens representing the greatest threat to community safety. By the end of FY2013 SC/CIRCA will be deployed nationwide.

**C. Budget Request Summary:**

U.S. Immigration and Customs Enforcement (ICE) requests 21,758 positions, 19,996 FTE, and \$5,296,692,000 in FY 2013 for the Salaries and Expenses (S&E) appropriation. In order to accomplish the agency’s objectives and mission, ICE requests \$5,359,844,000 and 19,985 FTE to maintain current services, and (\$63,152,000) and 11 FTE in program changes for the S&E account appropriation.

The request includes a reduction of \$68.3 million representing cost savings attributed to an Enterprise Wide Efficiency initiative to reduce overall administrative expenses. It is a reduction to areas such as vehicle fleet, PCS costs, TDY and travel, professional service contracts, and overtime. The request also includes \$170.1 million of other administrative reductions, including the attrition of mission support FTE.

***Program Change Requests***

ICE requests program changes for the Salaries and Expenses appropriation in the following key areas:

- **Alternatives to Detention Expansion.....\$39.9M (35 FTE)**

These funds will expand program participation, while working with the Executive Office for Immigration Review (EOIR) on a new approach to prioritize aliens on ATD. This expansion is correlated with the reduction in the planned level of funded detention beds.

- **Co-Location of ICE Facilities – A City Solution**  
**Approach.....\$6.2M (0 FTE)**  
 This request funds the fourth year of the ICE-wide co-location strategy to consolidate ICE personnel and operations scattered across multiple buildings in select metropolitan areas with the intended result of improved operational efficiency and long-term cost savings.
- **Video Tele-Conferencing Expansion.....\$7.0M (0 FTE)**  
 These funds will expand video tele-conferencing services to 83 new locations, including detention facilities and Executive Office of Immigration Review offices and courtrooms, in FY 2013.
- **Transfer of US-VISIT.....\$17.6M (78 FTE)**  
 This request would transfer the overstay analysis functions of the US-VISIT program from the National Protections and Programs Directorate (NPPD) to ICE.
- **Realignment and Reduction of 287(g).....(\$17.0)M (-24 FTE)**  
 This request would reduce the budget for the 287(g) program by 25 percent by leveraging Secure Communities interoperability deployment.. The Secure Communities screening process is more consistent, efficient and cost effective in identifying and removing criminal and other priority aliens. To implement this reduction in 2013, ICE will begin by discontinuing the least productive 287(g) task force agreements in those jurisdictions where Secure Communities is already in place and will also suspend consideration of any requests for new 287(g) task forces.
- **OPLA Reduction.....(\$5.0M) (0 FTE)**  
 This reduction includes reducing contracts, utilizing courtroom wiring in lieu of air cards, utilizing video teleconferencing, and reducing non-corporate training in the Office of Legal Proceedings.
- **Reduction in Detention Beds to 32,800.....(\$53.4)M (0 FTE)**  
 This reduction would reduce ICE’s detention bed level from 34,000 to 32,800 beds in FY 2013 at an average bed rate of \$122.00 per day. This reduction is proposed in conjunction with the Alternatives to Detention expansion request
- **Secure Communities Reduction.....(\$40.8M) (0 FTE)**  
 This reduction eliminates funding previously required for the large-scale deployment of Secure Communities interoperability because only eleven percent deployment remains in FY 2013. The Secure Communities interoperability system will be deployed nationwide by the end of FY 2013.

Total Change 2012 to 2013	(7)	(15)	(13,129)

**CURRENT SERVICES PROGRAM DESCRIPTION:**

In FY 2013, ICE requests \$220.1 million, 1,820 positions, and 1,716 FTE for the five offices that comprise the Personnel, Compensation and Benefits PPA to provide management and administrative support, such as finance, human resources, and procurement, to the ICE operational programs. This is a net \$13.1 million decrease from the FY 2012 enacted amount. The net \$10.3 million Adjustments to Base decrease includes changes for pay inflation, GSA rent, enterprise-wide efficiencies, attrition of mission support FTE, and other administrative efficiencies. The \$2.8 million programmatic change decrease includes changes for Co-Location and adjustments to properly adjust funding for the 287(g) program. All of these changes are described in more detail in the programmatic change section.

**HSR Alignment**

**6.3 Conduct and Support Other Law Enforcement Activities**

**ICE Strategic Plan Alignment**

**4.4 Use Resources Wisely**

**Justification**

*Salaries (\$150.8 million)*

The ICE M&A offices will have a staffing level of 1,716 FTE in FY 2013.

*Expenses (\$69.3 million)*

In FY 2013, \$6.2 million in enhancement funding will be spent on the co-location of ICE facilities through a city solution approach to consolidate leases around the country.

## **Description**

Management and Administration provides a range of mission and operational support for ICE. M&A oversees ICE's budget, expenditures, accounting, finance, and procurement. M&A is responsible for all human resources services, recruitment, equal employment opportunity, and training for all employees and special agents. All information technology systems, facilities, and property and equipment are overseen by M&A as well as the National Firearms and Tactical Training Unit, which ensures that ICE, Customs and Border Protection, and the Federal Protective Service have the necessary firearm, protective equipment and training to complete their jobs. In addition, M&A identifies and tracks the agency's performance measurements to ensure that strategic priorities, missions, and goals are met.

The Office of the Assistant Secretary (OAS) – directs the overall advancement of the agency's objectives outlined in the ICE strategic plan. This includes both operational and management support to meet day-to-day organizational needs, as well as long-term agency goals. The operational support areas provide leadership and coordination of all of ICE's operational components, address operational challenges, and support ICE's continued growth and development as a

*ICE's average processing time for FOIA requests is 17 business days.*

premier law enforcement agency. The management support areas provide coordination of all

*The ICE Instructor Development Course is now accredited by the Federal Law Enforcement Training Accreditation (FLETA) Board.*

administrative and managerial components of ICE. Offices that report directly to the OAS are responsible for human capital, Congressional relations, public affairs, policy, diversity and civil rights, training and development, Freedom of Information Act (FOIA) activities, privacy, and the National Firearms and Tactical Training Unit.

The Office of Professional Responsibility (OPR) – investigates allegations of misconduct involving employees of ICE and U.S. Customs and Border Protection (CBP). OPR conducts independent inspections and reviews of ICE offices, operations, and processes in order to provide executive management with an independent review of the agency's organizational health, effectiveness, and efficiency. OPR ensures that all ICE applicants are properly screened prior to entering on duty. OPR also manages the Security Management Unit providing physical, communication and operational security for ICE employees and facilities. In addition, the OPR Office of Detention Oversight (ODO), investigates all allegations of detainee abuse and/or detainee deaths referred by DHS, the Office of Civil Rights and Civil Liberties (CRCL), and the Joint Intake Center.

*ICE completes 90 percent of initial integrity investigations within 40 days and 90 percent of adjudications within 20 days.*

The Office of the Chief Financial Officer (OCFO) – manages ICE's financial and physical resources, promotes integrity and accountability, delivers financial management services, provides facilities and property management services, and manages the development, execution and monitoring of budgets.

Included in its work is an effort to deliver best-in-class customer service and the co-location initiative to consolidate 351 leases in 55 U.S. metropolitan areas to support operational effectiveness.

*ICE's managerial cost account model is one tool to help quantify the unit costs for key ICE operations.*

The ICE OCFO maintains a funds control policy and budget execution handbook for all ICE programs and continues to advance the accuracy and sophistication of its managerial cost accounting model, which is compliant with

FASAB standards.

The Office of Acquisition Management (OAQ) – is a customer-focused organization with an enterprise-wide, strategic approach to procurement. OAQ operates as a full business partner with internal and external organizations and is dedicated to improving the agency's overall business performance.

The Office of State, Local, and Tribal Coordination (OSLTC) partners with non-federal U.S. law enforcement agencies to enforce immigration and customs law and protect our communities. OSLTC builds awareness and understanding of partner services offered under ICE Agreements of Cooperation in Communities to Enhance Safety and Security (ACCESS).

### **FY 2013 Planned Activities**

In FY 2013, M&A will coordinate staff re-locations in support of the Rotational Instructor Program at the ICE Academy locations in Georgia, South Carolina and Texas to ensure that agents with recent exposure to the field are available to train Law Enforcement Officers. ICE/OPR will conduct reviews of the 287(g) program and support an investigations unit to review complaints and allegations against 287(g) agencies and offices. Using enhancement funding included in this request, ICE/OCFO will proceed with the co-location of ICE facilities by implementing city specific solutions in Phoenix. ICE will also continue ongoing efforts to find efficiencies in the delivery of mission support services to ICE.

The Management and Administration (M&A) offices will reduce non-mission critical spending by \$10.4 million through administrative, vehicle fleet, PCS, TDY, and professional service contract efficiencies.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

In FY 2013, ICE requests \$157.2 million, 348 positions, and 350 FTE for the ICE Office of the Chief Information Officer (OCIO) Headquarters Managed Information Technology Investment (HQIT) program to provide IT infrastructure and support to over 20,000 ICE personnel. This is a net \$27 million decrease from the FY 2012 enacted amount. The net \$31.5 million Adjustments to Base decrease includes changes for pay inflation, GSA rent, reduced IT infrastructure support, attrition of mission support FTE, and administrative efficiencies. The FY 2013 HQIT budget request also includes an increase of \$4.5 million as part of the re-alignment and reduction of the 287(g) program. This change is described in more detail in the programmatic change section.

**QHSR Alignment**

**3.2 Prevent Unlawful Immigration**

**ICE Strategic Plan Alignment**

**3.1 Detaining and Removing Aliens Seeking Illegal Entry**

**Justification**

*Salaries (\$56.1 million)*

OCIO will have a staffing level of 350 FTE in FY 2013.

*Expenses (\$101.1 million)*

OCIO will spend \$94.5 million to develop new IT solutions, purchase equipment, and provide maintenance and oversight to the existing IT infrastructure.

## **Description**

OCIO provides IT services and products that contribute to the achievement of ICE's mission. OCIO has developed a number of critical IT initiatives that will help ICE modernize its IT systems, adapt and conform to modern IT management disciplines, and provide IT solutions throughout ICE. Specifically, OCIO handles the operation and maintenance, as well as other back-end support functions, for Automation Modernization initiatives. OCIO is also responsible for the regular IT refresh of computers, file and print servers, local area networks, cables, and switches. OCIO works to ensure that the IT enterprise architecture is in place to provide ICE with full IT capabilities including disaster recovery, cyber security, IT operations, IT systems development, and engineering. OCIO also provides the delivery of IT equipment to state and local law enforcement while they are participating in the 287(g) program.

## **FY 2013 Planned Activities**

In FY 2013, OCIO will focus on addressing four IT Infrastructure areas: IT Refresh, IT Deployment and Implementation, IT Security and Monitoring, and IT Migration.

### **IT Refresh**

OCIO will begin implementing a Virtual Desktop infrastructure by upgrading outdated legacy clients. This will include refreshing 7,500 desktops and/or laptops with modern client devices capable of running today's software including MS Windows 7 and Office 2010. In addition, OCIO will close several security vulnerabilities within the ICE enterprise and provide site access to streaming media to 200 ICE sites for training and other purposes. OCIO will refresh the ICE TV system in order provide this site access.

### **IT Deployment and Implementation**

OCIO will seek to achieve Full Operating Capability (FOC) for the Federal Desktop Core Configuration. Achieving FOC will increase the security of a user's desktop and bring ICE into compliance with federal information technology standards. In addition, OCIO will develop and implement an Electronic Serial Number Voice Network for the National Capital Region (NCR). This network will help ICE establish a centralized management solution for voice functions including provisioning, operations and maintenance, and fault and performance monitoring.

### **IT Security and Monitoring**

OCIO will begin enabling device and port control on 25,000 end points while simultaneously providing anti-virus and end-point security for all desktops and servers. This will better secure data on mobile storage devices by only allowing ICE-approved, encrypted thumb drives to be connected to ICE desktops and laptops. OCIO will also provide end-point security and patching compliance monitoring on 1,000 Immigration Health Services Corps (IHSC) systems by installing BigFix and McAfee software on those IHSC workstations and servers. Finally, OCIO will implement a Creation of

Trust relationship with other DHS components in the realm of Application Authentication. This will allow for increased information sharing and partnering among DHS components.

### IT Migration

OCIO will work to complete the migration of all ICE workstation infrastructure to MS Windows 7 with Federal Desktop Configuration Controls. Doing so will bring ICE into compliance with federal information technology standards and increase security of each user’s desktop. In addition, OCIO will migrate 85 percent of ICE to an enhanced OneNet. This enhanced OneNet will provide faster application connectivity for users and will optimize the ICE-wide area network so that it can conform to modern networking standards. OCIO will also migrate 250 ICE sites to the new OneNet Optimization Design, which will enable users to experience faster connections to applications located in the DHS datacenters. Finally, OCIO will migrate all user mailboxes to the DHS data center, upgrade all ICE BlackBerry operating systems, and migrate 20,000 user workstations to MS Windows 7.

Total Change 2012 to 2013	(2)	(10)	(8,355)

**CURRENT SERVICES PROGRAM DESCRIPTION:**

In FY 2013, ICE requests \$207.6 million, 1,270 positions, and 1,437 FTE for the Office of the Principal Legal Advisor (OPLA). It is the largest legal program in DHS and the exclusive legal representative for the U.S. government in exclusion, deportation and removal proceedings before the Department of Justice’s Executive Office of Immigration Review (EOIR). The FY 2013 budget request is an \$8.4 million decrease from the FY 2012 enacted amount. The net \$3 million Adjustments to Base decrease includes changes for pay inflation, GSA rent, enterprise-wide efficiencies, attrition of mission support FTE, and other administrative reductions. The \$5.3 million program decrease is due to utilizing video teleconferencing with clients to reduce operational travel costs, capitalizing on docket efficiencies with the EOIR, and adjustments to properly adjust funding for the 287(g) program. These changes are described in more detail in the programmatic change section.

**QHSR Alignment**

*3.1 Strengthen and Effectively Administer the Immigration System*

**ICE Strategic Plan Alignment**

*3.4 Protect the Integrity of the Immigration System*

**Justification**

*Salaries (\$163.3 million)*

The FY 2013 budget request will support 966 attorneys to litigate and process immigration and customs cases generated by Homeland Security Investigations (HSI) and Enforcement and Removal

Operations (ERO). Attorneys also provide administrative and legal counsel.

*Expenses (\$44.3 million)*

In FY 2013 OPLA will fund operational support and services, including the release of a new case management system to improve litigation management.

## **Description**

The ICE Office of the Principal Legal Advisor (OPLA) provides legal advice, training and services in cases related to the ICE mission. OPLA attorneys handle immigration-related hearings that involve criminal aliens, terrorists and human rights abusers, as well as provide critical legal support to ICE components focusing on customs, worksite enforcement, ethics, employment law, tort claims and administrative issues.

OPLA's work is pivotal to ICE operations through two of its main components: the Homeland Security Investigations Law Division (HSILD) and the Enforcement and Removal Operations Law Division (EROLD). HSILD handles national security matters and works closely with other law-enforcement and intelligence agencies to provide immigration-related legal advice on national security, human rights and criminal issues. EROLD provides legal advice and training to ERO officers and agents, and litigation support and legal guidance on ERO matters including detainee medical care.

ICE also employs 54 attorneys as Special Assistant U.S. Attorneys (SAUSAs). Through September 2011, ICE SAUSAs have reported a total of 4,287 convictions with over 92 percent of these convictions relating to improper entry, re-entry of removed aliens, bringing in and harboring aliens, and fraud (18 U.S.C. 1028, 8 U.S.C. 1324, 8 U.S.C. 1325, 8 U.S.C. 1326, and 18 U.S.C 1546).

## ***Major Divisions:***

Homeland Security Investigations Law Division (HSILD) - HSILD is composed of three sections that specialize in providing legal advice and training to HSI special agents, and litigation support and legal guidance on HSI matters to OPLA field offices:

National Security Law Section (NSLS) - NSLS provides legal advice, training and guidance in immigration cases involving national security matters and works closely with other law-enforcement and intelligence agencies to provide immigration-related advice.

Human Rights Law Section (HRLS) - HRLS coordinates ICE's litigation efforts with other intelligence agencies and non-governmental organizations to provide legal advice in the identification, investigation, prosecution and removal of individuals involved in human rights abuses, including genocide, extrajudicial killings, the recruitment or use of child soldiers and torture. HRLS currently has a caseload of over 1,500 cases involving individuals from 85 different countries.

Criminal Law Section (CLS) - CLS provides counsel on HSI legal issues, excluding denaturalization cases, Student and Exchange Visitor Program matters, and issues addressed by

either HRLS or NSLS. CLS directly supports the Cyber Crimes Center, National Intellectual Property Rights Coordination Center, Bulk Cash Smuggling Center, Counterterrorism and Criminal Exploitation Unit and Office of International Affairs.

Enforcement and Removal Operations Law Division (EROLD) – EROLD is composed of two sections that specialize in providing legal advice and training to ERO officers and agents, and litigation support and legal guidance on ERO matters to OPLA field offices. For special interest cases, EROLD also coordinates with OPLA field offices, headquarters ERO agents and HSI agents, and other U.S. government agencies to achieve the most-favorable resolution of a matter and to ensure consistency in the application of immigration laws nationwide.

Enforcement Law Section (ELS) - ELS provides legal advice and training to operational divisions, including the Criminal Alien Program, Secure Communities, the Juvenile and Family Residential Management Unit, the Fugitive Operations Unit, and the HSI Student Exchange and Visitor Program. Attorneys provide advice and legal counsel on significant immigration enforcement related issues including, but not limited to: requirements of the 4th Amendment, rapid repatriation of criminal aliens, 287(g) delegation of immigration authority, and the authorities related to the detention of families and/or unaccompanied alien children. ELS also manages the litigation of civil and/or criminal denaturalization cases to the Office of Immigration Litigation.

Detention and Removal Law Section (DRLS) - DRLS provides legal advice, counsel and training on issues including, but not limited to, detainee medical and mental health care, detention officer authorities, expedited removals, detainees, deferred actions, alternatives to detention, and continued detention under specialized authorities. DRLS also provides legal and procedural guidance to the Office of Detention Policy and Planning regarding liability and/or litigation risks that could impact detention reform initiatives and new policies.

Immigration Law & Practice Division (ILP) – ILP has four areas of responsibility: (1) providing immigration law advice and counsel to the Offices of the Chief Council (OCCs), ICE programs and leadership, the DHS Office of General Counsel (OGC), and other agencies; (2) providing specialized advice on sensitive issues related to refugee status, asylum, Temporary Protected Status, withholding of removal, the Convention Against Torture and helping to make asylum fraud prevention tools available to the OCCs; (3) overseeing OPLA’s advocacy before EOIR and its appellate caseload before the Board of Immigration Appeals (BIA); and (4) monitoring immigration-related federal circuit court and Supreme Court developments, and working with DOJ to address immigration cases on appeal to the circuit courts of appeals.

OPLA is also comprised of several other administrative and informational law divisions such as the District Court Litigation Division (DCLD), the Commercial and Administrative Law Division (CALD), the Government Information Law Division (GILD), the Labor and Employment Law Division (LELD), and the Ethics Office.

### **FY 2013 Planned Activities**

In FY 2013, OPLA will transition all OCCs into full-service legal operations. Under this concept, the

OCCs will be tasked with providing legal services on a broader range of topics to their local Enforcement and Removal Operations (ERO) and Homeland Security Investigation (HSI) clients. The implementation of this model will enhance the Chief Counsels' relationships with their SAC, FOD and their managerial staffs, and ensure that the OCC is fully engaged in, and current with, the legal issues, policies and procedures faced by HSI and ERO personnel in the execution of their duties.

Additionally, OPLA will complete deployment and achieve full operational capability of its new case management system. Finally, OPLA will continue to meet quarterly with representatives from the Executive Office for Immigration Review (EOIR) and U.S. Citizenship and Immigration Services (USCIS) to improve the coordination between agencies. These DHS-EOIR Docket Efficiency Working Group meetings will improve docket scheduling and create other efficiencies in immigration court with the goal of increasing the number of priority cases handled. In addition to creating greater efficiencies in court proceedings, the working group will improve the expeditious handling of cases involving alternate removal methods such as stipulated and reinstated orders of removal.

OPLA will reduce non-mission critical spending by \$3.5 million through administrative, vehicle fleet, PCS, TDY, and professional service contract efficiencies.

dismantlement*

*Dollar value of fines assessed for  
employers who have violated the I-9  
requirements*

FTE in FY 2013.

*Expenses (\$376.6 million)*

Domestic Investigations will spend \$376.6 million on general expenses to support ICE's mission. This includes contractual support for wiretap and surveillance services and the purchase of equipment to maintain field operations at 26 SAC offices nationwide.

**Description**

Domestic Investigations, as part of Homeland Security Investigations (HSI), identifies, disrupts, and dismantles transnational criminal organizations, and the illicit pathways they exploit, that pose a threat to the United States' national security, public safety, and border security. Types of crimes include: trade and commercial fraud; intellectual property crimes; immigration violations; human rights violations; human smuggling and trafficking; smuggling of narcotics; weapons and other types of contraband; financial crimes; cyber crimes; and export violations involving weapons, ammunition and sensitive technology. Domestic Investigations also investigate crimes impacting critical infrastructure and industries that are vulnerable to sabotage, attack or exploitation.

Domestic Investigations leads and partners in the investigative and enforcement efforts of many federal, state, local, tribal and foreign law enforcement organizations and agencies. Domestic Investigations also participates and leads multi-agency task-force and fusion center operations. This results in the greater sharing of law enforcement information across agencies and provides more efficient leads for HSI investigation. Additionally, partnering with other agencies, which have differing legal authorities, allows for more efficient and effective gathering of information and enforcement options.

Domestic Investigations has four investigative divisions:

**(1) National Security Investigations**

- The Counter Proliferation Investigations (CPI) Unit leads efforts to prevent foreign adversaries from illegally obtaining U.S. military products and sensitive technology, including weapons of mass destruction components. In FY 2011, ICE expanded counter-proliferation efforts to incorporate additional agency partners and increase the scope of targeting, interdiction, and investigation of the smuggling of weapons from the U.S. into Mexico.

See <http://www.ice.gov/news/library/factsheets/counter-proliferations.htm> for more information on the Counter

- The Counterterrorism and Criminal Exploitation Unit (CT-CEU) enforces the laws covering non-immigrant visa status. An estimated 100,000 non-immigrant aliens annually overstay or violate the terms of their authorized period of admission for economic, personal, and criminal reasons. The CT-CEU collects data and leads from the Student and Exchange Visitor Information System (SEVIS), and U.S. Visitor and Immigrant Status Indicator Technology (US-VISIT), tracks non-immigrant over-stay violations, initiates investigations to locate status violators or identify potential terrorists or other criminals, and enforces the relevant

immigration laws and statutes to identify disrupt, and dismantle terrorists and terrorist organizations attempting to exploit or harm our homeland or people.

- The Threat Analysis Section (TAS) is a specialized group of special agents and intelligence analysts who proactively identify persons of interest from within the non-immigrant community of visitors, students and temporary workers. TAS uses the latest computer technology to access immigration, law enforcement and intelligence information to identify hidden links and associations between persons and events that could indicate a previously unknown threat.
- The Human Rights Violator and War Crimes Unit oversees investigations involving torture, genocide, extrajudicial killings, recruitment of child soldiers, war crimes, extreme forms of religious persecution, and immigration and visa fraud where the underlying offense is based on substantive human rights abuses and war crimes. The unit attempts to deny safe haven in the United States to human rights violators.

## **(2) Financial Investigations**

In view of the significant role that financial assets and money laundering play in sustaining criminal organizations and their illicit activity, all domestic investigations include a financial component. One of the most effective methods of dismantling transnational criminal organizations is to attack the criminal proceeds that fund their operations. HSI's Domestic Investigations takes a holistic approach towards investigating money laundering, illicit finance, and financial crimes by looking at the ways individuals and criminal organizations earn, move, and store their illicit proceeds. Domestic Investigations uses this approach by targeting the illicit funds from criminal, corrupt, fraudulent and commercial sources. For transnational financial investigations, Domestic Investigations is uniquely positioned as the only investigative agency that has border search authority and exclusive access to commercial trade data.

Three unique efforts focus exclusively on financial issues:

- The Cornerstone initiative focuses on coordination and cooperation with domestic and foreign private sector entities to identify vulnerabilities in U.S. financial systems. This information exchange greatly helps ICE in its efforts to disrupt and dismantle alternative financing mechanisms, while at the same time assists the financial and trade sectors to strengthen their anti-money laundering detection and prevention systems.
- The Trade Transparency Unit (TTU) provides the analytical infrastructure to support international financial and trade investigations. TTU provides the capability to identify and analyze complex trade-based money laundering schemes where criminals use international trade to hide and move proceeds within legitimate trade transactions. Domestic Investigations works closely with foreign government law enforcement agencies to share investigative methods and techniques and foster cooperation in jointly analyzing foreign and domestic trade and financial data.

- ICE also leads the National Bulk Cash Smuggling Center (BCSC). The BCSC is an operational, intelligence driven investigative unit that targets bulk cash smuggling from both national and international perspectives. Bulk cash smuggling is one of the preferred methods used by all types of transnational criminal organizations to move their funds. The BCSC is focused on the disruption of facilitation pipelines used to move currency derived from illicit activity including drugs, weapons, human trafficking, foreign political corruption and contraband.

### (3) Transnational Crime and Public Safety Investigations

HSI's Domestic Investigations identifies, disrupts, interdicts, and dismantles criminal organizations involved in the unlawful movement of people and goods into and out of the country. These investigations are targeted at disrupting and dismantling activities of groups and individuals engaged in human, narcotics and contraband smuggling, human rights violations, exploitation of individuals, importation of hazardous and prohibited items, identity and benefit fraud, and worksite violations.

HSI's Domestic Investigations efforts cover a wide range of activities:

- Domestic Investigations targets child pornographers, child sex tourists, and facilitators of human smuggling and trafficking of minors, criminal aliens convicted of offenses against minors, and those deported for child exploitation offenses who have returned illegally.

- The Maritime Port Security Program aims to eliminate the threats posed by internal conspiracies and smuggling organizations by focusing investigative initiatives on the maritime port environment.

*ICE is the largest federal contributor to the Joint Terrorism Task Force (JTTF) program and has Special Agents assigned to all 104 JTTFs nationwide. Since 2007, ICE agents assigned to JTTFs have initiated 5,564 cases, resulting in approximately 1,119 criminal arrests and 2,010 administrative arrests.*

- Domestic Investigations targets transnational street gang members and disrupts and dismantles gang organizations that have violent criminal

*Since inception, BESTs have initiated more than 5,700 cases with more than 7,100 criminal arrests and 5,600 administrative arrests. ICE has seized more than 55,000 pounds of cocaine, 870 pounds of heroin, 593,000 pounds of marijuana, 3,700 pounds of ecstasy, and more than 3,200 pounds of methamphetamine. In addition, ICE has seized more than 5,900 weapons, 2,600,000 rounds of ammunition, 2,900 vehicles, and \$94.3 million in currency. See more at <http://www.ice.gov/best>.*

histories, with arrests and convictions for crimes such as murder, rape, robbery, assault and extortion. Using the enforcement of immigration laws hand-in-hand with enforcement by state, local and tribal agencies, Domestic Investigations disrupts gang activity and develops enterprise investigations aimed at dismantling the entire gang.

- Domestic Investigations leads ICE’s Border Enforcement Security Task Forces (BESTs). BESTs partner law enforcement agencies to combat illicit activities that fuel much of the violence on our borders. There are 23 regional BESTs active along our borders and in major ports of entry, including one in Mexico.
- The Commercial Fraud Unit and National Intellectual Property Rights Coordination Center (IPR Center) target predatory and unfair trade practices that threaten our economic stability, restrict the competitiveness of U.S. industry in world markets, and place the public health and safety of the American people at risk. ICE is the only federal agency that investigates predatory and unfair trade practices under Title 19 of the U.S. Code.

*The National Intellectual Property Rights Coordination Center (IPR Center) is one of the U.S. government's key weapons in the fight against criminal counterfeiting and piracy. The IPR Center uses the expertise of its 19 member agencies to share information, develop initiatives, coordinate enforcement actions, and conduct investigations related to IP theft. Through this strategic interagency partnership, the IPR Center protects the public's health and safety and the U.S. economy.*

- Domestic Investigations targets identity and benefit fraud through 18 special task forces across the country. Identity fraud crimes enable terrorists and criminals to exploit the legitimate immigration process and obtain legal status in the United States. Benefit fraud is an extremely lucrative form of organized white-collar crime. It is complex and challenging to investigate and often involves sophisticated multi-layered schemes with multiple co-conspirators that take years to investigate and prosecute.

- Domestic Investigations’ worksite enforcement initiatives promote collaboration with the private sector to prevent criminals and terrorists from penetrating and harming the U.S. economy through employment in critical and sensitive areas. Investigations involving national security or public safety implications receive top priority, as do investigations involving allegations of egregious worker exploitation where the welfare of the employees may be at risk. Domestic Investigations applies criminal sanctions to employers who exploit workers and whose employment practices involve alien smuggling or fraud.
- Domestic Investigations conducts enforcement operations and Form I-9 inspections to identify non-compliance with Employment Eligibility Verification requirements and employers whose practice is to strategically and repeatedly hire unauthorized workers. Domestic Investigations conducts proactive outreach under the ICE Mutual Agreement between Government and Employers (IMAGE) program to foster compliance by employers and trade associations and to reduce unauthorized employment. IMAGE provides training on proper hiring procedures, fraudulent document detection, and use of E-Verify for employment eligibility verification.

#### **(4) Law Enforcement Information Management and Investigative Support**

Domestic Investigations includes many other investigations entities, including;

- The Cyber Crimes Center investigates and provides computer forensics support to investigations;

- The Undercover Operations Unit is responsible for providing guidance and oversight for all undercover activity;
- The Forensic Document Laboratory is the only federal crime laboratory specializing in the scientific authentication and research of travel and identity documents; and
- The Law Enforcement Parole Unit oversees temporary parole authority for aliens admitted to the United States to assist in criminal proceedings.

### **FY 2013 Planned Activities**

In FY 2013, HSI’s Domestic Investigations will increase its resources toward Commercial Trade Fraud investigations. Also, HSI will focus on the following as the top four priorities:

- Commercial Fraud Enhancement;
- Protect U.S. Citizens Through Enhanced Investigations into Products That Place the Health and Safety of the U.S. Consumers at Risk;
- Keep Counterfeit and Substandard Products Out of the Federal Government Supply Chain; and
- Continue to Attack Criminals Illegally Importing and Selling Fraudulent Consumer Goods.

Domestic Investigations will also continue to coordinate all export enforcement activities and will establish a Child Exploitation Investigations Center (CEIC) in FY 2012. The CEIC will be the central point of contact for all DHS programs dedicated to combating the sexual exploitation of children and will oversee the continued expansion of the “Operation Angel Watch” system, which identifies potential child predators who attempt to travel to countries known as destinations for child sex tourism. As part of the creation of the CEIC in FY 2012, ICE will work to develop a strategy and timetable for the nationwide expansion of the Operation Angel Watch system.

Also, in FY 2013, Domestic Investigations will expand and institutionalize the Extraterritorial Criminal Travel Strike Force initiative, as well as establish Trade Transparency Units in the Americas, Europe, Africa and Asia, which will enhance the original trade transparency concept from a bilateral to a multilateral approach. Domestic Investigations will also reinforce the use of “Knowingly Hire” and “Continue to Employ” laws against businesses that hire or continue to employ workers identified as unauthorized aliens and promote a culture of compliance through the expansion of IMAGE.

Domestic Investigations will reduce non-mission critical spending by \$55.6 million through administrative, vehicle fleet, PCS, TDY, and professional service contract efficiencies.

Total Change 2012 to 2013	-	(3)	(4,558)

**CURRENT SERVICES PROGRAM DESCRIPTION:**

In FY 2013, ICE requests \$110.4 million, 320 positions and 278 FTE to maintain current services for the Office of International Affairs (OIA), part of ICE's Homeland Security Investigations (HSI). This is a net Adjustment to Base decrease of \$4.6 million from the FY 2012 enacted amount. The Adjustments to Base include changes for pay inflation, GSA rent, enterprise-wide efficiencies, attrition of mission support FTE, and other administrative efficiencies.

**Justification**

*Salaries (\$59.7 million)*

In FY 2013, OIA will maintain a staffing level of 278 FTE, 222 of whom are posted abroad in 47 countries.

*Expenses (\$50.7 million)*

In FY 2013, OIA will fund general expenses to support ICE's international investigations and activities.

**QHSR Alignment**

**3.2 Prevent Unlawful Immigration**

**ICE Strategic Plan Alignment**

**1 Prevent Terrorism and Enhance Security**

**2 Protect the Borders Against Illicit Trade, Travel and Finance**  
**Target Drug Trafficking**

## Description

The ICE Office of International Affairs conducts proactive international investigations overseas involving individuals and organizations responsible for the illegal movement of people, goods, and technology. OIA works with foreign counterparts to identify and combat transnational criminal organizations before they can adversely impact the United States. Special agents investigate human trafficking, child sexual exploitation, counter-proliferation, illegal arms trafficking, smuggling and immigration violations, intellectual property rights violations, commercial fraud, money laundering, bulk cash smuggling, and drug trafficking.

*OIA is a key component of ICE's Illicit Pathways Attack Strategy (IPAS) to target, identify, and dismantle illicit networks and pathways utilized by transnational organized crime.*

OIA Attaché offices around the world conduct critical law enforcement operations and provide investigative support to domestic offices in combating transnational crime. They support other U.S. government components and initiatives, refer requests from host country law enforcement agencies to appropriate U.S. agencies, and serve as advisor to U.S. missions. OIA provides training and conducts outreach to foreign officials and coordinates with foreign counterparts to share information under negotiated bilateral agreements and mutual legal assistance treaties. OIA conducts and coordinates training for law enforcement officials through International Law Enforcement Academies (ILEAs). These offices are staffed by ICE agents, deportation liaison officers, and foreign service nationals who serve to enhance the investigative and administrative ability of our overseas offices with their bicultural and bilingual skills.

*The expansion of Project Global Shield into a World Customs Organization-endorsed program was spurred by ICE's facilitation of the arrest of 19 suspects and 23 seizures of more than 33 metric tons of explosive raw material sufficient to make thousands of improvised explosive devices.*

ICE coordinates the activities of Transnational Criminal Investigative Units (TCIUs) in collaboration with foreign investigative counterparts, to deter, disrupt and dismantle transnational criminal organizations and individuals perpetrating a wide range of crimes including: human trafficking and smuggling, child labor and sexual exploitation, illegal arms trafficking, alien smuggling, proliferation of sensitive technology, intellectual property rights violations, commercial fraud, money laundering, bulk cash smuggling, and narcotics trafficking.

*OIA has developed a vetted anti-gang unit comprised of Jamaican Constabulary Force officers that targets violent street gangs and increases intelligence on their members, associates, criminal activities and international movements.*

Through the use of dedicated Assistant Attachés for Removals (AARs) deployed at critical locations abroad, OIA coordinates the return of removable aliens with host governments and facilitates transits and country clearances.

In collaboration with ICE Enforcement and Removal Operations (ERO), AARs coordinate with host-country governments to return aliens who have final orders of removal. This coordination speeds up the removal process and reduces detention costs by reducing the number of detention days and daily bed expense incurred before removal. The Department of State (DOS) benefits from OIA support at U.S. embassies through assistance in sensitive removal discussions with receiving and transit countries. ICE and DOS engage with foreign governments to reinforce their commitment under international law to accept the return of their

citizens, even as the number of returned criminals increases. OIA works through problematic repatriation and removals by providing support for country clearances and then coordinating removals with the flight operations unit.

OIA also furthers law enforcement coordination through the development of international agreements. OIA coordinates international information sharing through the negotiation of Customs Mutual Assistance Agreements, mutual legal assistance treaties and other agreements as needed in cooperation with other U.S. agency partners. OIA works with DOS and ERO to negotiate and maintain removal agreements with foreign countries, and serves as a primary point of contact for all repatriation issues.

*Operation Firewall is a bilateral joint task force between Attaché Mexico City special agents and the Government of Mexico to combat cross-border illicit currency flow and has led to Mexican and Venezuelan seizures and arrests.*

OIA is pursuing collaborative international strategies to:

- Establish and strengthen information sharing with receiving countries to provide ample lead time to prepare a re-orientation;
- Identify third-party international and non-governmental organizations to help in the transition of criminal aliens returning to their country of origin through ICE Attachés;
- Participate in multilateral forums with partner countries to discuss alien removal issues (e.g., Four Country Conference, Regional Conference on Migration, Shared Border Accord Coordinating Committee, and others);
- Provide additional training for ICE representatives overseas to increase the number of subject matter experts to deal with complex removal issues worldwide; and
- Expand the use of the Electronic Travel Document (eTD) system to reduce travel document issuance times, thereby reducing the average length of stay and bed costs.

### **FY 2013 Planned Activities**

In the future OIA will continue to explore methods to improve efficiency by reviewing current processes and procedures as well as identifying the potential for labor-saving data system modifications. OIA will focus on solidifying new Transnational Criminal Investigative Units (TCIUs) in Africa and Asia, and continuing the implementation of a TCIU management program at headquarters to guide Attaché offices in forming and managing their TCIUs.

*Transnational Criminal Investigative Units are special host country police units that assist ICE with investigations in source and transit countries. TCIUs identify targets, gather evidence, share investigative intelligence, and facilitate the prosecution of individuals involved in transnational organized crime through joint investigative activities. By working in partnership with TCIUs, ICE can target the entire criminal network, not just the portion operating in the United States.*

OIA will expand the IPAS concept beyond human smuggling and trafficking, to include illicit finance and counter proliferation. Also creating an IPAS Intelligence Unit to enhance intelligence and information sharing across agencies and with key international partners, and to protect financial systems and strategic markets by addressing how criminal organizations earn, move and store illicit proceeds.

OIA’s investigative resources at the Southwest Border will continue growing to address violence along the U.S./Mexico border and focus on cross-border threats in the region, including contraband smuggling, money laundering and bulk cash smuggling, human smuggling and trafficking, transnational criminal gangs, and clandestine tunnels.

OIA will reduce non-mission critical spending by \$4.4 million through vehicle fleet, PCS, TDY, professional service contract, and other administrative efficiencies. TDY savings will be gained as supplemental agent positions are deployed to the Southwest Border, reducing the number of TDY assignments required in Mexico and Central America.

Total Change 2012 to 2013	-	2	(1,273)

**CURRENT SERVICES PROGRAM DESCRIPTION:**

In FY 2013, ICE requests \$32.6 million, 80 positions, and 64 FTE to support current services for the Visa Security Program (VSP). This includes a net Adjustment to Base decrease of \$1.3 million from the FY 2012 enacted amount. The Adjustments to Base include changes for annualization of prior year funding, termination of one-time costs, pay inflation, GSA rent, enterprise-wide efficiencies, attrition of mission support FTE, and other administrative efficiencies.

**Justification**

*Salaries (\$16.9 million)*

In FY 2013, VSP will maintain a staffing level of 64 FTE. This includes seven special agent positions enacted in FY 2012 for two new posts.

*Expenses (\$15.7 million)*

In FY 2013, VSP will spend \$15.7 million on general expenses to support ICE's Visa Security Program at headquarters and 21 overseas posts; this includes two new posts.

**QHSR Alignment**

**3.2**  
*Prevent Unlawful  
Immigration*

**ICE Strategic Plan  
Alignment**

**1.1**  
*Prevent Terrorist  
Entry into the United  
States*

## Description

The Visa Security Program represents ICE's front line in protecting the United States against terrorist and criminal organizations. VSP enhances the security of the visa issuance process at high-risk

overseas posts by deploying trained special agents to identify and investigate potential terrorist and criminal threats before they reach the United States and interdict those who would exploit the legal visa process.

VSP special agents currently work closely with the Department of State (DOS) and take a hands-on approach in conducting visa security activities at 19 overseas posts in 15 countries. These activities include, but are not limited to, examining visa applications for fraud, initiating investigations, coordinating with

law enforcement partners, and providing law enforcement training and advice to U.S. consular officials.

Many visa security screening activities involve face to face interaction and on the ground follow up which can only be conducted in the field. ICE agents follow up on investigative leads by coordinating

*An increase in VSP performance can be attributed to ICE's ongoing efforts to clarify and standardize VSP operations. In support of this effort, ICE and DOS established a Memorandum of Understanding defining the roles, responsibilities, and collaboration of VSP agents and DOS personnel in daily operations. As VSP posts align operations with this guidance, performance will continue to improve.*

with foreign government law enforcement to verify a visa applicant's true country of origin, discover past criminal arrests or convictions, identify potential affiliations with terrorist or criminal organizations, confirm derogatory information identified in data screening, substantiate recommendations to deny visas to high risk individuals, as well as to "clear" eligible applicants incorrectly associated with derogatory information.

VSP identifies known and not-yet known terrorist or criminal threats by conducting targeted, in-depth vetting of individuals who apply for visas overseas. The Security Advisory Opinion Unit (SAOU) is a part of VSP dedicated to participating in the interagency checks of visa applicants conducted through the SAOU process. The SAOU checks DHS-held derogatory information on visa applicants and provides liaison and operational de-confliction with other participating agencies. The VSP and SAOU foster coordinated decision-making across DHS and DOS to utilize law enforcement expertise and analysis to maximize the enforcement benefit to the visa process.

ICE's presence overseas is vital to prevent criminals or terrorists from traveling to the United States. ICE maintains interactive relationships with foreign law enforcement counterparts to combat and disrupt the efforts of transnational criminal organizations before they adversely affect the United States. ICE agents interview applicants on site to review identity and application documents for authenticity.

*In addition to determining whether a given applicant is eligible for a visa, vetting by ICE special agents generates additional law enforcement value, including:*

- *Creation of watch-list records;*
- *Identification of new terrorist tactics or fraud schemes;*
- *Generation of intelligence products;*
- *Revocation of fraudulent petitions; and*
- *Initiation of investigations leading to arrest, seizure, prosecution*

ICE coordinates VSP post deployments with DOS but the exact deployment schedule is dependent on DOS approval and other factors such as, scheduling site visits to plan and coordinate facilities build out of communications, securing government housing or DOS-approved leased housing, procuring and deploying armored vehicles and other specialized equipment, recruiting and staffing ICE positions including foreign nationals, coordinating specialized training, identifying educational requirements for dependents of ICE agents, and scheduling PCS deployment of staff and families from the U.S. VSP posts become fully operational when all staff are deployed overseas.

**FY 2013 Planned Activities**

VSP will continue to exploit IT solutions to increase ICE’s efficiency in screening, vetting, and recording of visa applications. ICE aims to have the capability to screen all visa applications and identify patterns and potential national security threats in process through technology and by leveraging the capabilities of our law enforcement and intelligence community partners.

The VSP will reduce non-mission critical spending by \$1.5 million through administrative, vehicular fleet, PCS, TDY, and professional service contract efficiencies.

**ICE Strategic Plan Alignment**

**1.2 Remove Individuals Posing a Security Threat**

**Justification**

*Salaries (\$66.5 million)*

The Office of Intelligence will have a staffing level of 383 FTE.

*Expenses (\$12.2 million)*

In FY 2013, the Office of Intelligence will fund general expenses to support intelligence activities and lead ICE emergency preparedness and response efforts.

## Description

The Office of Intelligence within Homeland Security Investigations (HSI) develops, processes, analyzes, and disseminates relevant information and intelligence needed to support executive management and investigative units. Information is gathered to identify threats, patterns, trends, methods, and organizations related to transnational crimes. This information supports law enforcement efforts and investigations across ICE, DHS and many levels of government.

The primary tool used by the Office of Intelligence to collect information and conduct analysis is the Intelligence Fusion System (IFS). IFS is a comprehensive analytical and investigative tool to access and analyze large volumes of data from sources such as the Enforcement Apprehension Booking Module (EABM), US-VISIT Automated Biometric Identification System (IDENT), portions of Tracking Enforcement Case System (TECS), Student Exchange Visitor Information System (SEVIS), Intelligence Reporting System (IRS), Significant Event Notification (SEN) system, and digitized content obtained from Intelligence Document Exploitation (IDocX). The IFS database includes indexed names, subject records, and investigative and intelligence reports, as well as global intelligence information on topics that include smuggling, terrorism and transnational trends.

The Office of Intelligence responds to needs based on formal and ad hoc requests by investigative units and other intelligence users within ICE, elsewhere within DHS and from the intelligence and law enforcement communities, in support of the following programmatic areas:

- Southwest Border, where the Office of Intelligence provides a wide spectrum of intelligence support to enforcement entities on the Southwest Border, including state, tribal, local, and other federal law enforcement and Intelligence Community (IC) partners. These efforts support ICE's surge in law enforcement personnel and activity to deal with increased Southwest Border violence and are managed by the Southwest Border Intelligence Coordination Section of the Office of Intelligence;
- Human Smuggling and Public Safety, focusing on human smuggling, trafficking in persons, immigration benefit fraud, mass migration, and threats to public safety emanating from transnational street gangs and other criminal aliens;
- Contraband Smuggling, where the Office of Intelligence provides intelligence to assist in the disruption of activities related to the international trafficking of narcotics and other prohibited goods;
- Illicit Finance and Trade Fraud, involving illicit movements of money or financial instruments, and other commerce-related crime issues such as international trade violations, protection of intellectual property rights, and public health threats that cross our borders; and

*The Office of Intelligence is a key tool in ICE's successful investigations of threats such as transnational gangs, Southwest Border violence, and all types of smuggling.*

- Counter-Proliferation Intelligence, focusing on the identification and disruption of individuals and organizations involved in the unauthorized movement and procurement of critical technology, dual-use goods, chemical, biological, radiological, nuclear/conventional weapons, and unauthorized U.S. exports to prohibited countries.

The Office of Intelligence performs its mission through the following functional areas:

- Intelligence Operations Division sets standards for, and coordinates, intelligence activities throughout the Office of Intelligence enterprise including intelligence personnel assigned to the 26 SAC Intelligence Groups supporting Special Agent in Charge offices, the Special Collections Section, and the Southwest Border Intelligence Coordination Section;
- Analysis and Targeting Division provides analytic support at the strategic, operational and tactical level to ICE national programs, ICE Homeland Security Investigations attachés operating overseas, and IC and law enforcement partners operating nationwide;
- Collections and Requirements Division coordinates the intelligence collection and reporting efforts within ICE, and is responsible for the management and oversight of the Joint Intelligence Operations Center (JIOC), and provides ICE with classified connectivity and secure communications support through the Intelligence Technology Section;
- The National Emergency Management Division guides agency responses to emergencies and possible catastrophic events by recommending policy, promoting training, and sponsoring exercises. NEMD promotes information sharing within ICE and enables rapid response to intelligence-based threat warnings; and
- Human Smuggling and Trafficking Center (HSTC) achieves greater integration and overall effectiveness in the U.S. government's enforcement and other response efforts, and works with other nations to address the related issues of alien smuggling, trafficking in persons and clandestine terrorist travel.

*To support the Illicit Pathways Attack Strategy (IPAS) on Western Hemisphere human smuggling, ICE has created an IPAS Intelligence Unit within the HSTC to enhance intelligence and information sharing across agencies and with key international partners. The unit supports investigations focused on high risk transnational criminal networks and pathways used by smuggling and trafficking organizations. See <http://www.ice.gov/ipas/> for more information.*

## **FY 2013 Planned Activities**

In FY 2013, the Office of Intelligence will support the increase in focus by Domestic Investigations on Commercial Trade Fraud investigations. The Office will also support the Administration's strategy to combat Transnational Criminal Organizations at the Human Smuggling and Trafficking Center. The Office will focus on enhancing analytic techniques, dissemination capabilities, product quality, and training provided to ICE intelligence analysts. Finally, other key activities will include developing and satisfying strategic, operational, and tactical collection strategies aimed at gathering intelligence that satisfies national requirements, maintaining global situational awareness to receive, coordinate, and disseminate classified and unclassified information, and facilitate the exchange of law enforcement and national intelligence, and participating in any National Level Exercise for emergency preparedness.

The Office of Intelligence will reduce non-mission critical spending by \$2.8 million through administrative, vehicle fleet, PCS, TDY, and professional service contract efficiencies.

Total Change 2012 to 2013	(7)	(79)	(91,182)

**CURRENT SERVICES PROGRAM DESCRIPTION:**

In FY 2013, ICE requests \$1.959 billion, 5,196 positions, and 4,506 FTE for the Custody Operations program within Enforcement and Removal Operations (ERO) to fund 32,800 detention beds and related operations. This is a \$91.2 million decrease from the FY 2012 enacted amount.

Funding includes a \$53.2 million Adjustment to Base decrease and a net \$38 million programmatic change decrease. The \$53.2 million Adjustment to Base net decrease includes changes for pay inflation, GSA rent, enterprise-wide efficiencies, attrition of mission support FTE, and other administrative efficiencies. The \$38 million programmatic change decrease includes changes for decreased detention bed funding, video tele-conferencing expansion, and technical adjustments to properly adjust funding for the 287(g) program to align with ERO's management of the program. All of these changes are described in more detail in the programmatic change section.

## Justification

*Salaries (\$622 million)*

Custody Operations will have a staffing level of 4,506 FTE in FY 2013.

*Expenses (\$1,337 million)*

In FY 2013, ICE will maintain 32,800 detention beds at a rate of \$122.00/day and an average length of stay (ALOS) of 35 days for criminal aliens. 30,083 beds are funded through the Custody Operations PPA and 2,717 beds are paid for from fee sources (Breached Bond Detention Fund and Immigration Inspection User Fees).

## Description

The ERO provides policy guidance for and oversight of the administrative custody of a highly diverse alien detainee population. ERO manages these detention operations as efficiently and effectively as possible to provide for the safety, security, and appropriate care of aliens in its custody.

### (1) Bed Space Management

- **Inter-Governmental Service Agreements (IGSAs).** ICE obtains detention bed space through inter-governmental service agreements with state and local detention facilities and through an agreement with the Federal Bureau of Prisons for the Federal Detention Center in Oakdale, Louisiana, and at several smaller locations. Approximately 70 percent of ICE's detained population are housed at IGSA facilities with an average daily population of 23,380. There are approximately 220 IGSAs in 50 states at an average bed rate of \$115.19 per day. ICE has no assurance of bed space at the IGSAs; bed space availability is generally based on state and local county populations and, as their local populations fluctuate, so do the beds available for ICE.

- **Service Processing Centers (SPCs).** ICE owns and operates six secure detention facilities, called Service Processing Centers, located in Batavia, New York; El Centro, California; El Paso, Texas; Florence, Arizona; Miami, Florida; and Los Fresnos, Texas. The SPCs are dedicated facilities housing roughly 12 percent of the detained population with an average daily population of 4,008. Using SPCs provides ICE with complete control over who is accepted into

### QHSR Alignment

**3.2 Prevent Unlawful Immigration**

### ICE Strategic Plan Alignment

**3.1 Detaining and Removing Aliens Seeking Illegal Entry**

### Associated HPPG Measures

*Average length of stay in detention of all convicted criminal illegal immigrants prior to removal from the United States.*

*Estimated average bed cost per day.*

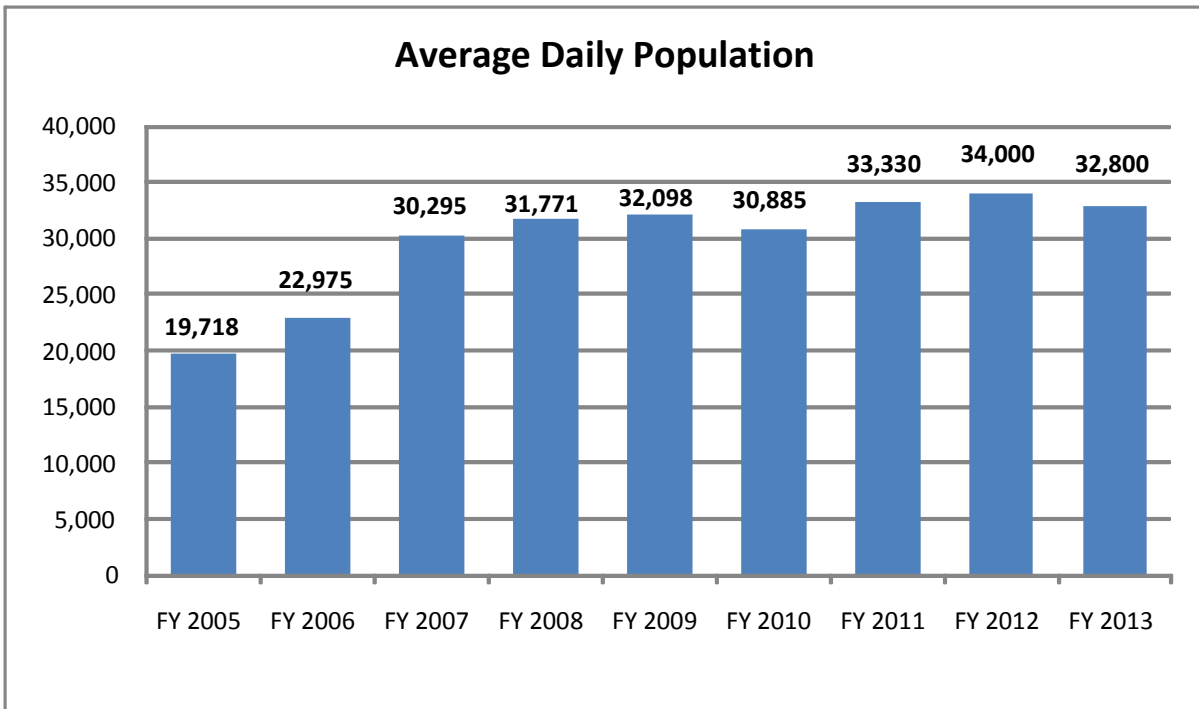

### Associated GPRA Measures

*Percent of detention facilities found in compliance with the national detention standards by receiving an inspection rating of acceptable or greater on the last inspection.*

*In FY 2011, due to localized detention needs exceeding existing capacity and in an effort to consolidate detention services and improve conditions for detainees, ICE acquired additional IGSA space in key areas such as Los Angeles, Miami, New York/Newark, San Antonio, and San Francisco.*

the facility and bed space availability is not dependent on a third party. Notwithstanding this, SPCs on average are more expensive – the average bed rate is \$117.27 per day - than other detention alternatives. There are many factors in the costs – SPCs serve additional functions beyond just detention such as office space and courtroom space. ICE undertook a study of SPCs to look at all factors and is now planning to reduce the use of some of them. The El Paso SPC is currently being converted to office space and ICE field offices may co-locate with the El Centro SPC. Both changes are expected to yield cost avoidance. The remaining SPCs, with the exception of Batavia in New York, are being reviewed to see if appropriate replacement facilities are available. ERO is developing Statements of Objectives (SOOs) that would commence the procurement process. Previously, ICE discontinued use of Aguadilla, Varick, and San Pedro which led to a considerable cost savings.

- Contract Detention Facilities (CDFs).** ICE utilizes seven contract detention facilities to house approximately 16 percent of ICE’s detained population. While not owned by ICE, CDFs are run solely for ICE and, like SPCs, offer ICE great control over bed space. These facilities are located in Aurora, Colorado; Houston, Texas; Tacoma, Washington; Elizabeth, New Jersey; Broward County, Florida; Pearsall, Texas; and San Diego, California. The seven CDF facilities have an average daily population of 5,344 and an average bed rate of \$84.70 per day. Changes are being explored such as tiered rates and guaranteed minimums to produce cost efficiencies as well as to meet detention reform requirements.

\*FY 2005 – FY 2011 are the average daily population maintained by ICE during that year, while FY 2012 and FY 2013 are the funded levels of ICE detention beds.

## (2) Detention Bed Costs

The cost of detaining an alien for a single day varies by region and facility type. The bed cost has several components, including expenses incurred for direct detention bed acquisition, detention guard services, meals provided to detainees, welfare items, detainee health care, and indirect costs such as overhead costs, facility maintenance, and printing costs associated with case management. In FY 2011, ICE was able to maintain the average bed cost per day at or below estimated rates, to include inflation, at the level funded by Congress by:

- Discontinuing use of three high-cost SPCs – Aguadilla, Varick, and San Pedro;
- Increasing the use of the ICE Health Service Corps (IHSC) to deliver detainee healthcare; and
- Taking advantage of guaranteed minimums with reduced or free beds after occupying a specified number of beds.

### *Analysis of Bed Space Costs and Managerial Cost Accounting Model*

In FY 2009, ICE was able to define cost components and properly review financial and operational data to calculate overall average bed costs. This analysis provided insight into detention operations and costs including contracts for detention bed space, healthcare, and overhead costs. This analysis also showed cost differences across ICE's geographic areas of responsibility and types of facilities. In FY 2011, ICE built on the bed cost information and developed its first Managerial Cost Accounting (MCA) model. The MCA model facilitates managing the entire alien removal process by showing key costs (e.g., bed costs, transportation costs) along with their associated cost drivers (e.g., Average Length of Stay, Healthcare, Flight Costs). By using the MCA model, ICE will be able to better manage its costs and make informed decisions to keep costs low.

ICE has gained insight into two of the main cost drivers associated with bed costs:

- **Average Length of Stay (ALOS).** A reduction in ALOS of one day is estimated to result in a three percent reduction overall in the total detention cost requirement. Currently ICE is taking steps to reduce ALOS by:
  - Signing an Memorandum of Understanding (MOU) with the Department of State (DOS) on April 18, 2011 formalizing an agreement between ICE, DOS, and the Bureau of Consular Affairs in an effort to gain compliance from recalcitrant countries regarding their obligations to issue travel documents and accept their nationals;
  - Reducing transfers of detainees between detention locations. Transfers increase costs by increasing detention time; and
  - Working with the ICE Office of International Affairs in reducing the number of days of advanced notification to process removals via commercial aircraft.
- **Healthcare.** Healthcare accounts for approximately 12 percent of ICE detention cost requirements. Though healthcare costs nationwide have risen far more quickly than other costs, ICE saw only a four percent increase in its healthcare expenditures from FY 2009 to FY 2010. ICE is using its bed cost analysis and MCA to help to continue to effectively manage healthcare

*The criminal alien Average Length of Stay was 34.7 days in FY 2011.*

cost requirements. Additionally, ICE has moved to utilizing IHSC to deliver detainee healthcare when possible instead of contracted medical services.

The negotiated contractual cost for bed space is subject to upward adjustment under the *Service Contract Act of 1965*, under which the Department of Labor ensures that each service employee, primarily guards in ICE’s case, is not paid less than the minimum wage and fringe benefits applicable to the locality and industry where they are employed. Over the years, ICE has experienced significant upward adjustments to the contractual component of bed cost as a result of provisions of this act. To counter the effect of these upward adjustments, ICE continues to maximize use of less expensive detention resources and to identify opportunities to centralize procurement. In addition to the upward adjustments to the wage component, the detainee healthcare component is also subject to increases due to the increased identification of healthcare needs of detainees and requests for outside services.

**(3) Average Length of Stay**

Another significant detention cost driver is the ALOS for an alien in detention before his or her final removal. ALOS is computed from the length of the adjudication process for detained aliens, including their appearance before the Executive Office for Immigration Review (EOIR), leading to a final order. EOIR has 268 immigration judges conducting hearings for the detained docket. On average, about 45 percent of detained criminal aliens must appear before an immigration judge.

**Average Length of Stay: FY 2009 – FY 2011**

Fiscal Year	ALOS		
	Criminal	Non-Criminal	Weighted
2009	41	25.8	31.3
2010	36.6	25.9	31.5
2011	34.7	22.7	29.2

ERO continuously works with EOIR to accelerate the legal review with full regard for due process in order to help reduce the ALOS. Additionally, ICE is planning to increase detention capacity in locations where detainee transfers occur most often, since these transfers significantly impact the ALOS.

**(4) Healthcare Related Costs**

ERO provides primary healthcare for detainees, which is managed by the ICE Health Service Corps (IHSC) through comprehensive health screening and the provision and oversight of direct patient care services to the detainee population,

### **FY 2011 Medical Service Changes**

*ICE created medically-trained Field Medical Coordinators to provide on-site medical advice, assist in decisions for care, and coordinate with other facilities to determine best placement of detainees with medical conditions based on availability of medical services.*

*ICE developed the system requirements and acquisition strategy for an electronic Health Record System (eHR) to be deployed in all IHSC-staffed facilities. System development will begin in 2011 with an estimated deployment date of December 2013. eHR will increase provider productivity and patient safety throughout IHSC staffed medical clinics.*

IHSC is working on several initiatives focused on improving health care services provided to detainees while enhancing health care operational capabilities and strengthening accountability and decision making processes based on credible data. Typically immigration detainees lack regular access to professional health care services and in many instances, the care provided in ICE custody is the first professional medical attention they have received.

IHSC is finalizing an enhanced medical and mental health classification system to ensure detainees are placed at facilities that can best meet their needs thus reducing transfers. Final modifications on the web-based version of the database will be completed in FY 2012 with full implementation throughout the IHSC system to follow. IHSC has also implemented a new program to place new Field Medical Coordinators at ERO Field Offices. These new personnel will serve as consultants addressing a host of

medical issues to include health care case management and compliance with health care standards at facilities within the field office area of responsibility. ICE is also developing a comprehensive electronic health records system (eHR) to enhance communication among facilities to improve the reporting and delivery of care to detainees.

Benefits of eHR include:

- Provider productivity by eliminating repetitive and manual administrative and documentation requirements;
- Rapid access to patient records without having to request them from previous institutions;
- Access to more complete medical records that are sometimes not provided in transfer and eliminates potential duplication of unnecessary testing;
- More consistent, complete and time efficient documentation, that allows for more time to be spent on direct patient care;
- Complete patient record availability to multiple providers who can access the record simultaneously;
- Quick identification of possible adverse outcomes due to known allergies and alerts to prevent drug-to-drug interaction; and
- Real time access to medical personnel when the detainee is transferred to another facility.

### **(5) Detention Standards Compliance Oversight**

The On-Site Detention Compliance Oversight Program relies on the oversight of Detention Service Managers (DSMs) for compliance with both the National Detention Standards and the Performance-Based National Detention Standards to ensure the safe,

secure, and humane housing of all detainees. ICE created the DSM position in FY 2010 in response to ICE's initiative on Immigration Detention Reform to enhance oversight and care of detainees in ICE custody. DSMs are a vital contributor leading to a reduction in detainee grievances, improved standards compliance, and an increase in the overall final ratings assigned to facilities during the annual detention review process, currently conducted by a contract service provider. These personnel report directly to ICE headquarters in order to provide an independent reporting of conditions. ICE monitors detention facilities for compliance with applicable detention standards that specify the living conditions and services required to provide detainees with appropriate care. Each authorized facility receives an annual inspection by an independent contractor.

In FY 2011, 95 percent of ICE detention facilities were found to be in compliance with the national detention standards by receiving an inspection rating of acceptable or greater during the annual review. The other 5 percent found not to be in compliance with the standards are afforded an opportunity to correct the identified deficiencies. There were no contracts terminated in FY 2011.

## **(6) Detention Reforms**

Detention reform is an important and difficult challenge. The present immigration detention system grew at a rapid pace over the past 15 years. At any given time, ICE has a detention population of more than 33,000 individuals housed in hundreds of facilities. Many of these facilities are jails designed for penal - not civil - detention. ICE now has underway a series of comprehensive detention reforms designed to ensure that conditions of confinement are safe, secure, and humane.

The goal is to move towards a system designed for and based on ICE's civil detention authorities. ICE is working to design new facilities and implement new policies that will bring improved conditions of confinement, medical care, and oversight. To achieve the goals of detention reform, ICE has:

- Consolidated the number of facilities from 340 to 260, and has developed a plan for further consolidating our detained population in new, improved facilities. The new facilities will be located in areas that are near the site of detainees' apprehensions, as well as near legal service providers, medical providers, immigration courts, and transportation hubs. By keeping detainees in nearby facilities as often as possible, ICE hopes to minimize disruptions to families, and legal and court services.
- Designed a new intake process, which is in the process of being automated, to ensure consistent nationwide decision making about who is detained, placed into a monitoring program, released, or granted bond. This system takes into account public safety and risk of flight factors. The intake process will also take into consideration many of the special vulnerabilities relevant to detention: disability, advanced age, pregnancy, nursing, sole caretaking responsibilities, mental health issues, and whether the individual is a victim of torture, persecution, abuse or trafficking.

### ***Contracting Changes to Reflect Reforms***

*In FY 2011, ICE completed negotiations to begin contract modifications necessary in implementing Performance - Based National Detention Standards in ICE's top 22 facilities, which held approximately 18,700 of the 33,330 ADP through September 30, 2011.*

*In FY 2011, ICE acquired a detention facility uniquely suited to ICE's civil detention authority which is based on individual characteristics of a diverse population. The first such facility involves the acquisition of 600 residential beds in Karnes, Texas which will provide appropriate housing for low risk detainees.*

- Developed a new set of detention standards that will substantially improve conditions of confinement and ensure enhanced medical care, religious programming, recreation and visitation.

ICE has made progress improving medical care provided to detainees, which is at the forefront of the agency’s reforms. For example, ICE has addressed delays associated with detainees’ health care by eliminating the need for prior approval for medically-necessary care. ICE has also eliminated restrictions on the treatment of pre-existing conditions. These changes simplify the process for detainees to receive health care services.

A newly reorganized ICE Health Service Corps (IHSC), with a staff of approximately 900 personnel, maintains clinics at 21 detention and staging facilities. IHSC continues to reduce medical staff vacancies by actively recruiting officers from the United States Public Health Service and by increasing its medical civilian workforce. IHSC has also placed medical officers at twelve Field Offices to help manage complex medical cases. To further enhance detainee medical care, ICE will devise and implement a medical classification system that will improve awareness of an individual detainee's medical and mental health conditions from the time the individual first enters detention. ICE has taken a number of steps to improve transparency and accountability in our detention system including:

- launching an Online Detainee Locator System, translated into nine languages, which allows families, counsel and friends to locate detainees;
- hiring and training a corps of more than new 40 detention service monitors (DSM) posted to our major detention facilities, who ensure that facilities in compliance with detention standards and who report back to the agency their findings; and
- establishing the Office of Detention Oversight within the Office of Professional Responsibility, which conducts targeted inspections and investigations at detention facilities.

ICE is currently developing a new generation of detention facilities. These new facilities will be dedicated to ICE detainees, have conditions appropriate to the needs of our diverse population, and provide safe, secure and humane environments for all detainees and staff. Notable progress includes a new civil detention facility near completion in Karnes County, Texas scheduled to open in February 2012, and proposals being evaluated in Northern California, Miami, Chicago, the Carolinas, and the Northeast area of the country.

**Average Daily Population, ALOS, and Removals and Returns Statistics**

In FY 2012 and FY 2013, ICE will maintain an average daily population of 34,000 and 32,800 detainees respectively, while managing the average length of stay and removal numbers.

Statistic	ERO Plans	
	FY 2012 est.	FY 2013 est.
Average Daily Population	34,000	32,800
Average Length of Stay (Criminal Aliens)	35.0 days	35.0 days
Total Criminal Alien Removals and Returns	210,000	224,000

Custody Operations will reduce non-mission critical spending by \$47.2 million through vehicle fleet, PCS, TDY, professional service contract, and other administrative efficiencies.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

In FY 2013, ICE requests \$132.9 million, 788 positions, and 695 FTE for the National Fugitive Operations Program (NFOP) to identify, locate, arrest, or otherwise reduce the fugitive alien population in the United States. This is a net Adjustment to Base decrease of \$21.7 million from the FY 2012 enacted amount. The Adjustments to Base include changes for pay inflation, GSA rent, enterprise-wide efficiencies, attrition of mission support FTE, and other administrative efficiencies.

**QHSR Alignment**

**3.2 Prevent Unlawful Immigration**

**ICE Strategic Plan Alignment**

**3.1 Detaining and Removing Aliens Seeking Illegal Entry**

**Justification**

*Salaries (\$107 million)*

NFOP will have a staffing level of 695 FTE in FY 2013.

*Expenses (\$25.9 million)*

NFOP will fund the Fugitive Operation Support Center (FOSC), which analyzes the outstanding cases of U.S. fugitive aliens and the at-large criminal alien population as recorded in the Enforce Alien Removal Module (EARM) in order to assist NFOP in locating aliens or determine that a case should be closed.

## Description

The NFOP locates, arrests, and removes aliens from the United States who have failed to comply with removal orders. NFOP teams plan and conduct complex investigations on fugitive cases, giving priority to fugitive criminal aliens and cases that pose a threat to public safety.

*A fugitive is defined as any alien who has failed to leave the U.S. following the issuance of a final order of removal, deportation or exclusion, or has failed to report to ICE after receiving notice to do so.*

## Fugitive Operations Teams (FOTs)

Each of the 24 ICE Enforcement and Removal Operations (ERO) field offices has at least one operational FOT. In total, ERO has 104 FOTs that are operational and conducting enforcement activities across the United States. Enforcement activity involves analysis and cross-referencing of records; surveillance; investigative interviews; liaison with federal, state and local public safety agencies as well as foreign government representatives; administration of subpoenas; and execution of both administrative and criminal warrants to make arrests.

Actions to remove an alien from the fugitive backlog include: physical arrests; detainers placed on individuals located in a federal, state or local facility; docket management including case category changes that result in a fugitive being removed from the backlog; and case closures.

Operations Return to Sender, Secure Streets and Cross Check are the primary enforcement initiatives utilized by FOTs.

*The NFOP was launched in 2003 with eight FOTs nationwide. Today, ICE has 104 FOTs deployed nationwide.*

- *Operation Return to Sender* is an initiative that applies an organized and methodical approach to the identification, location, and arrest of fugitives. The operation combines Fugitive Operations resources with other federal, state and local law enforcement entities. As of September 30, 2011, FOTs have arrested 2,532 aliens under Operation Return to Sender.
- *Operation Secure Streets* is an initiative to locate and arrest aliens who have been convicted of violations involving operating a motor vehicle while under the influence. As of September 30, 2011, FOTs have arrested 732 aliens under Operation Secure Streets.
- *Operation Cross Check* serves as the operational umbrella for other focused enforcement efforts conducted by FOTs that target specific criminal and fugitive alien populations, such as aliens who have been convicted of violent crimes. NFOP joins forces and leverages authorities during these operations with other DHS components and numerous federal, state and local law enforcement agencies. As of September 30, 2011, FOTs have arrested 5,342 aliens under Operation Cross Check.

FOT cases may also be developed from various sources, including the ICE TIPLINE, Interpol, the FOISC, U.S. Citizenship and Immigration Services referrals and other DHS entities, Probation and

Parole, and other law enforcement agencies. FOT members attend specialized training that includes ERO policy and guidance, immigration law, arrest techniques, and program-specific training to enable them to conduct operations specific to Fugitive Operations, including high-profile escapes, high-risk entries, and service of criminal warrants, and the location and arrest of foreign fugitives wanted abroad and found at-large in the United States.

### **Fugitive Operations Support Center (FOSC) and Fugitive Backlog**
