Through the use of technology and partnerships with law enforcement agencies, the FOSC focuses on analyzing the nature and characteristics of the U.S. fugitive alien population. FOSC addresses long-established interoperability problems associated with the many DHS databases containing alien information. FOSC uses IT solutions to address these issues by electronically comparing fugitive data in the EARM against other DHS and non-DHS databases. FOSC identifies fugitives that have adjusted to a legal status, have departed the United States, are incarcerated, or who may have violent criminal records previously unknown to the field officer.

*“By focusing our resources on arresting and removing fugitive aliens, convicted criminal aliens, and those who re-enter the country after removal, we are addressing significant security vulnerabilities.”*

-ICE Spokesperson, August 9<sup>th</sup>  
News Briefing

The success of FOSC’s integrated efforts within the NFOP has, for the first time, resulted in a decrease in fugitive growth. For FY 2011, the backlog reduction exceeded the fiscal year goal of five percent with an actual decrease of 5.25 percent. In contrast, from September 2003 to September 2006 – before the growth of the NFOP and FOSC – the fugitive backlog grew by an average of 5,682 fugitives per month, or 68,184 per year.

NFOP’s primary goal is to reduce the fugitive backlog. As of September 30, 2011, there were 479,773 fugitives in the United States. Of the fugitives on the backlog, 7,950 were Secure Communities (SC) Level I, 11,905 were SC Level II, and 5,098 were SC Level III. Reduction is accomplished by arresting fugitives and by reconciling fugitive alien records. Reconciliation involves the elimination of cases relating to fugitives based on evidence that the subject alien left the country, successfully adjusted status, died, or was discovered to be incarcerated and is therefore no longer a fugitive. New cases are continuously added to the backlog when final orders of removal are received, but the alien fails to depart the United States. Much of the credit for the reduction in the fugitive backlog can be attributed to the expansion of the program and the establishment of the FOSC.

<b>Fugitive Backlog by Fiscal Year</b>	
October 1, 2006	632,726
October 1, 2007	594,756
October 1, 2008	557,761
October 1, 2009	534,497
October 1, 2010	506,332
October 1, 2011	479,773
As of December 31, 2011	475,604

## FY 2013 Planned Activities

In FY 2013, ICE will continue to conduct targeted fugitive alien operations to reduce the fugitive alien backlog. The 104 FOTs will target criminal fugitive aliens, non-criminal fugitive aliens, aliens previously removed from the United States, at-large aliens convicted of crimes, and aliens found to be a threat to community safety, such as members of transnational street gangs, child sex offenders, and aliens with prior convictions for violent crimes. In FY 2013, the NFOP plans to conduct national and regional Cross Check and Return to Sender Operations.

Fugitive Operations will reduce non-mission critical spending by \$22 million through vehicle fleet, PCS, TDY, professional service contract, and other administrative efficiencies.

<b>2012 Enacted Budget Authority</b>	<b>1,627</b>	<b>1,376</b>	<b>196,696</b>
2013 Adjustments-to-Base	-	(7)	20,028
<b>2013 Current Services</b>	<b>1,627</b>	<b>1,369</b>	<b>216,724</b>
<b>2013 Total Requested Budget Authority</b>	<b>1,627</b>	<b>1,369</b>	<b>216,724</b>
Total Change 2012 to 2013	-	(7)	20,028

**CURRENT SERVICES PROGRAM DESCRIPTION:**

In FY 2013, ICE requests \$216.7 million, 1,627 positions, and 1,369 FTE for the Criminal Alien Program (CAP) to maintain existing efforts towards the DHS mission of preventing unlawful immigration and removing high-risk criminal aliens. This is a net Adjustment to Base increase of \$20 million from the FY 2012 enacted amount. The Adjustments to Base include changes for pay inflation, GSA rent, attrition of mission support FTE, and other administrative efficiencies.

**Justification**

*Salaries (\$165.2 million)*

CAP will have a staffing level of 1,369 FTE in FY 2013.

*Expenses (\$51.5 million)*

The LESC, with the exception of the TIPLINE, was transferred from ICE's Homeland Security Investigations to ICE's Enforcement and Removal Operations (ERO) in FY 2012. A large part of LESC's function is to respond to requests for immigration status determinations received from law enforcement and shifting the management to ERO will enhance efficiency. Since a majority of LESC inquires are related to

**QHSR Alignment**

**3.2 Prevent Unlawful Immigration**

**ICE Strategic Plan Alignment**

**3.1 Detaining and Removing Aliens Seeking Illegal Entry**

**Associated HPPG/GPRA Measure**

*Number of convicted criminal aliens removed per fiscal year.*

ERO, CAP will now be able to recognize criminal aliens sooner as queries come into the LESC from around the country. In FY 2013, CAP will spend \$29.4 million for the LESC for salaries and general expenses.

*The LESC, located in Williston, Vermont, operates a communications center that provides National Crime Information Center confirmations within 10 minutes to law enforcement agencies 24 hours a day, 7 days a week.*

## **Description**

The Criminal Alien Program is responsible for identifying, processing, and removing criminal aliens incarcerated in federal, state and local prisons and jails throughout the United States. CAP's goal is to prevent the release of these criminal aliens into the general public after they complete their sentences by securing a final order of removal prior to the end of their sentences. CAP also pursues at-large criminal aliens found removable after release based on criminal convictions.

## **Risk-based Approach**

CAP uses a risk-based approach that places priority on criminal aliens based on their threat to the community.

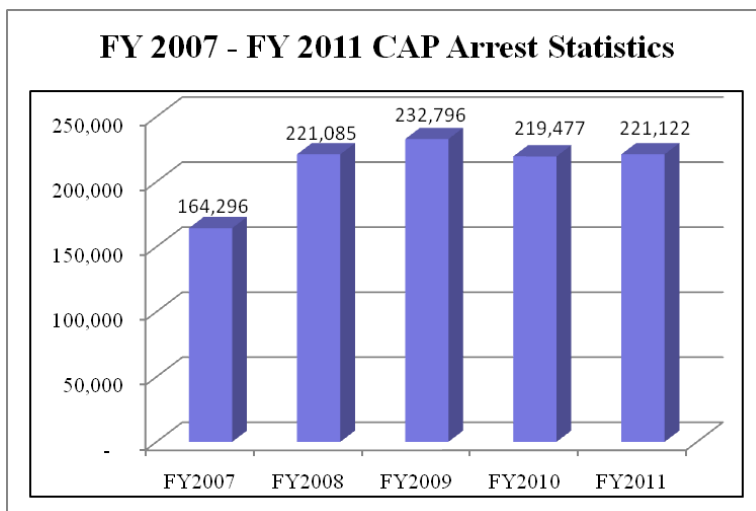

Resources are focused on those areas of the United States that contain the highest number of criminal aliens who may be threats to both public safety and national security. ICE uses federal information sharing through the Secure Communities program and gains force multiplication through state and local law enforcement officers currently participating under the 287(g) jail model program, which provides certain delegated immigration authorities.

## **CAP Teams**

*There are more than 1,200 CAP Officers that monitor over 4,300 facilities.*

CAP officers screen prison and jail populations to identify aliens for removal processing and prioritization. When an alien is identified and found to be amenable to removal through either a screening or an interview, a detainer is lodged. Subsequently, proceedings will begin to remove the alien from the United States.

The identification and processing of incarcerated criminal aliens before release decreases or eliminates time that would be spent in ICE custody following release, which greatly reduces the cost to the federal government.

### Violent Criminal Alien Section

ICE's Violent Criminal Alien Section (VCAS) screens recidivist criminal aliens encountered through CAP, the National Fugitive Operations Program, and local law enforcement to seek criminal prosecution of these aliens to reduce future recidivism, either through deterrence or incarceration. Integral to success in this effort is collaboration with United States Attorney's offices (USAOs) to prosecute VCAS-identified criminal offenders.

There were 9,453 indictments and 9,730 convictions in FY 2011 compared to 8,233 indictments and 8,101 convictions in FY 2010. This was a nearly 15 percent increase in indictments and a 20 percent increase in convictions.

### Initiatives

- Joint Criminal Alien Removal Taskforce.** ICE's Joint Criminal Alien Removal Taskforce (JCART) focuses on locating and arresting at-large criminal aliens with convictions for drug trafficking, violent crimes and sex offenses. Working closely with other agencies, JCART conducts special operations including criminal aliens who have been released from federal, state, or local custody.

*Other agencies that JCART works with include:*

- *United States Marshal's Service;*
- *ICE Homeland Security Investigations;*
- *U.S. Customs and Border Protection;*
- *Bureau of Prisons; and*
- *Probation and Parole Offices*

- Phoenix Law Enforcement Area Response (LEAR).** The Phoenix Law Enforcement Area Response provides a method for state and local law enforcement agencies (LEAs) in Arizona to directly contact ICE regarding suspected immigration violators. LEAR staff responds to LEA requests 24 hours a day/seven days a week. ICE officers determine nationality, immigration status, and removability. Immigration detainers are placed, and removable aliens are processed by ERO. Responses are provided for 100 percent of LEA calls received. The LEAR program has resulted in more than 1,700 arrests in FY 2011.

- **Law Enforcement Support Center.** The Law Enforcement Support Center (LESC) was aligned under ERO in FY 2011. LESL operates 24 hours a day/seven days a week to provide timely and accurate information to LEAs on the identity and immigration status of individuals who have been arrested or who are under investigation for criminal activity. LESL technicians have ready access to a wide range of databases and intelligence resources. In addition, the LESL analyzes and disseminates information received from the public about suspicious or criminal activity. Information obtained from the public via ICE’s toll-free tip hotline is analyzed by the professional law enforcement staff at the LESL and quickly forwarded to ICE field units for investigation or other action.
- **Rapid REPAT.** The Rapid Removal of Eligible Parolees Accepted for Transfer (Rapid REPAT) program offers selected criminal aliens incarcerated in U.S. prisons and jails the opportunity to accept early release in exchange for voluntarily returning to their country of origin. Aliens who have been convicted of non-violent offenses may receive early conditional release if they have a final order of removal and agree not to return to the United States. Eligible aliens must agree to waive appeal rights associated with their state convictions. If aliens re-enter the country following removal under the Rapid REPAT program, state statutes may provide for revocation of parole and incarceration for the remainder of the alien’s original sentence. Additionally, aliens illegally re-entering may face additional federal charges and penalties. Rapid REPAT also helps participating states reduce the costs associated with detention.

**FAQ: What is the difference between CAP and Secure Communities (SC)?**

*CAP is responsible for the identification, arrest, and processing for removal of aliens that are found incarcerated in Federal, state, and local facilities and at-large in the community. SC is a federal information sharing initiative between DHS and DOJ through which fingerprint biometrics are matched against immigration databases when an alien is booked into a jail after having been charged with a crime by a law enforcement agency. The SC information sharing initiative assists in making the identification of criminal aliens in federal, state, and local facilities more efficient and effective.*

**FY 2013 Planned Activities**

By the end of FY 2013, the Secure Communities information sharing initiative will be activated nationwide and CAP will work to strategically place resources to most efficiently respond to the related increased workload, including at the LESL. CAP will work to ensure that those aliens identified as amenable to removal are placed into proceedings and receive a final order of removal prior to their release from jail or prison. This will decrease the cost of detention to the Federal government. As funding permits, CAP plans to initiate “surge” operations to identify, arrest, and remove at-large criminal aliens that pose a risk to public safety and national security.

While CAP will reduce non-mission critical spending by \$2.4 million through vehicle fleet, PCS, TDY, professional service contract, and other administrative efficiencies, this is offset by other increases to “right-size” the program’s budget based on its core salaries and expenses. In FY 2013 ICE plans to complete nationwide implementation of SC/CIRCA interoperability, covering 100 percent of the country’s jails and prisons and increasing the workload and daily activities of CAP and the Law Enforcement Support Center (LESL).

Total Change 2012 to 2013	70	33	39,217

**CURRENT SERVICES PROGRAM DESCRIPTION:**

In FY 2013, ICE requests \$111.6 million, 274 positions, and 219 FTEs for the Alternatives to Detention (ATD) program within Enforcement and Removal Operations (ERO) to contribute to the DHS mission of preventing unlawful immigration. This is a \$39.2 million increase from the FY 2012 enacted amount. The net decrease of \$0.7 million for Adjustments to Base includes changes for pay inflation, GSA rent, enterprise wide efficiencies, attrition of mission support FTE, and other administrative efficiencies. The ATD program budget request also includes a \$39.9 million increase, including 70 IEAs, to address the expansion of the ATD program correlated with the reduction in the planned level of funded detention beds. This change is described in more detail in the programmatic change section.

<b><u>QHSR Alignment</u></b>
<b>3.2 Prevent Unlawful Immigration</b>
<b><u>ICE Strategic Plan Alignment</u></b>
<b>3.1 Detaining and Removing Aliens Seeking Illegal Entry</b>

**Justification**

*Salaries (\$43.7 million)*

ATD will have a staffing level of 219 FTE in FY 2013.

*Expenses (\$67.9 million)*

In FY 2013, ATD will use general expense funds for contractual support and equipment for the Full-Service and Technology-Only programs.

## **Description**

The ATD program uses technology such as ankle bracelets and parole-like supervision to track aliens who have been accused of immigration violations. ICE will continue to focus its use of detention beds on those high priority individuals who have criminal convictions or fall under other priority categories. Recognizing that not all aliens apprehended by ICE require a detention bed, the Administration believes that alternate forms of detention such as electronic monitoring and supervision can be just as effective for low priority individuals as traditional detention.

## **ATD Participation Determination**

*Currently, the cost of placing a participant in an ATD program component can range from \$0.17 to \$17.78 per alien per day, depending on the type of service required and the technology used.*

The ATD program provides alternate detention options for those aliens for whom ICE has determined traditional detention is neither mandated nor appropriate. The decision to utilize ATD resources for aliens not subject to mandatory detention is based on assessment criteria

including an alien's risk of absconding, possible threat to public safety, immigration status, medical and mental health factors, removability, and other factors.

## **Full-Service (FS) Program**

In the FS program, contractors monitor participants using a combination of home and office visits, as well as some form of technology assistance (e.g., global positioning system or telephonic reporting). FS programs are currently available in over 30 locations nationwide for aliens residing within a 50 to 85 mile radius of an ICE office.

Within 24 hours of referral to the ATD program by an ERO officer, an assessment on each participant is conducted, from which an individual service plan is created. That plan includes residence verification and referral services for legal, translation, transportation, travel documents, departure, and other community services. Contract case specialists also help to assure that aliens appear at their scheduled removal hearings.

The FS program features five stages of supervision for program participants:

- Pre-Order
- Post-Order
- Appeal
- Post-Order Custody Review, Reasonably Foreseeable Removal (POCR RFR)
- Post-Order Custody Review, Not Foreseeable Removable (POCR NFR).

## **Technology-Only (TO) Program**

TO services are available at all 24 field offices and 44 sub-office locations. With a virtually unlimited capacity, TO can be used when FS is not available or if FS is not necessary for the program participant.

In the TO program, a contractor provides the equipment and monitoring services, while ICE officers supervise and administer case management services to participants.

The principal difference between Full-Service and Technology-Only ATD is the human factor. Cases in Full-Service ATD are managed by contractors while cases in Technology-Only ATD are overseen by ICE employees using contractor-supplied hardware.

ICE determines which program to use in a given case based on flight risk, likelihood of imminent removal, and prior compliance history, among other factors.

**FY 2013 Planned Activities**

Expansion of the ATD program in FY 2013 is in coordination with the reduction of 1,200 detention beds in FY 2013. ICE proposes that increasing ATD can allow for oversight of the lowest risk aliens, decreasing the need for detention capacity while maintaining enough beds to achieve the Administration’s goals of removing priority aliens. Additionally, the Budget proposes administrative flexibility for the Secretary of Homeland Security to redirect funds from other ICE programs to detention to ensure all high-priority aliens, including criminals, continue to be detained. The Administration will only enroll low-risk aliens in ATD programs.

ATD will reduce non-mission critical spending by \$4 million through vehicle fleet, PCS, and professional service contract, and other administrative efficiencies.

Total Change 2012 to 2013	-	(10)	(18,405)

**CURRENT SERVICES PROGRAM DESCRIPTION:**

In FY 2013, ICE requests \$258.2 million, 59 positions, and 49 FTE for the Transportation and Removal Program (TRP) to plan and execute the removal and return of illegal aliens within ERO. This is a net Adjustment to Base decrease of \$18.4 million from the FY 2012 enacted amount. The Adjustments to Base include changes for pay inflation, enterprise-wide efficiencies, attrition of mission support FTE, and other administrative efficiencies.

**Justification**

*Salaries (\$9.5 million)*

TRP will have a staffing level of 49 FTE in FY 2013.

*Expenses (\$248.7 million)*

TRP will coordinate the removal of over 224,000 convicted criminal aliens primarily through contractual arrangements with commercial and charter air carriers managed by the Removal Coordination Unit (RCU) and ICE Air Operations.

<b><u>QHSR Alignment</u></b>
<b>3.2 Prevent Unlawful Immigration</b>
<b><u>ICE Strategic Plan Alignment</u></b>
<b>3.5 Achieve Efficiency in the Removal Process</b>

## Description

TRP coordinates the safe and secure transportation of aliens in ICE custody and their removal from the United States. Several key ERO units support this mission.

ERO's Removal Management Division formulates all transportation and removal policy, conducts planning, defines and projects requirements, and oversees and supports Field Office Directors' (FODs) execution of transportation resources. The division carries out its responsibilities through three support units: the Travel Document Unit; the Removal Coordination Unit; and the ICE Air Operations Unit located in Kansas City, Missouri.

### Travel Document Unit (TDU)

TDU supports field offices, ICE Attachés, and foreign embassies and consulates for travel document and removal related issues to ensure the safe and orderly removal of aliens from the United States. TDU also has oversight of the electronic Travel Document System (eTD) and conducts liaison with governmental and non-governmental organizations, over 200 embassies and consulates within the United States, foreign governments and law enforcement organizations worldwide.

### Removal Coordination Unit (RCU)

RCU manages commercial airline removals. ICE utilizes commercial air travel for escorted and unescorted removals. RCU accomplishes this through the management of assigned contract personnel and the oversight of multiple contract service providers. These services include requesting country clearances through both the Secure Message and Routing Terminal cabling system and the Department of State's electronic Country Clearance system.

Departures by Type			
	Criminal*	Non-Criminal	Total <sup>2</sup>
<b>FY2007</b>	102,024	189,036	291,060
<b>FY2008</b>	114,415	254,806	369,221
<b>FY2009</b>	136,126	253,708	389,834
<b>FY2010</b>	195,772	197,090	392,862
<b>FY2011</b>	216,698	180,208	396,906

*By discontinuing use of the Joint Prisoner Alien Transportation System in October 2011, ICE will save \$27.6 million in FY 2012.*

\*Level 1 Criminals: FY2009 51,221; FY2010 64,466; FY2011 75,086

### **ICE Air Operations (IAO)**

ICE contracts for the use of flight hours on one small and eight large frame charter aircrafts to support the ICE removal mission. These aircraft are based in San Antonio, Texas (two aircraft); Alexandria, Louisiana (two aircraft), Miami, Florida (one aircraft), and Mesa, Arizona (three aircraft). IAO manages all ICE air charter operations. This includes domestic and international flights on any of the IAO charters. IAO oversees domestic and foreign scheduling of all ICE-managed aircraft. Scheduling is based on the operational requirements of the 24 ERO field offices, along with coordination with each respective receiving country and ICE Attaché office.

In October 2011, to ensure the most efficient use of removal resources, ICE discontinued use of the Joint Prisoner Alien Transportation System (JPATS) aircraft. This action saved ICE \$27.6 million in FY 2012. With this savings, TRP will use more cost-effective air charters that will allow ICE to affect increased removals. Some of the savings will also be used to help offset the rising costs in areas like ground transportation.

### **Mexican Interior Repatriation Program (MIRP)**

MIRP is a humanitarian initiative that also helps to combat cross-border smuggling by repatriating Mexican citizens to the interior of Mexico on direct flights from Southern Arizona. The U.S. border with Mexico between the states of Arizona and Sonora, Mexico, has accounted for some of the highest levels of illegal immigration into the United States in the past eight years. The United States and Mexico, by joint accord, designated the Tucson Sector’s western corridor as a “high risk” area under the bi-national Border Safety Initiative.

In FY 2011, MIRP began on July 11 and ended on September 28 resulting in 8,893 repatriations. From 2004 through 2011, MIRP has accounted for 111,094 repatriations to Mexico.

### **FY 2013 Planned Activities**

<sup>2</sup> Of this total, 2,044 were removed in prior fiscal years but reported removed in FY 2009; 19,422 were removed in prior fiscal years but reported removed in FY 2010; and 11,761 were removed in prior fiscal years but reported removed in FY 2011. This is due to a lag in disposition of all removal cases and because ICE reports yearly statistics within a few weeks of the end of the fiscal year. Beginning in FY 2009, ICE began to “lock” removal statistics on October 5<sup>th</sup> at the end of each fiscal year and counted only the aliens whose removal or return was confirmed. The removals and returns confirmed after October 5<sup>th</sup> are included in the next fiscal year.

In FY 2013, ICE will coordinate the removal of over 224,000 convicted criminal aliens and 401,900 total removals.

TRP will reduce non-mission critical spending by \$16.5 million through professional service contract and administrative efficiencies. Operating expenses will be reduced due to efficient management of ICE air operations and TRP will continue to look for other ways to reduce contract costs.

**Budget Change FY 2012 – FY 2013**

<b>Budget Change Detail</b>

Total Change 2012 to 2013	-	108	(50,351)

**CURRENT SERVICES PROGRAM DESCRIPTION:**

In FY 2013, ICE requests \$138.7 million, 782 positions, and 727 FTE for Secure Communities/Comprehensive Identification and Removal of Criminal Aliens (SC/CIRCA) to maintain efforts that contribute to the DHS missions of preventing unlawful immigration and of removing aliens seeking illegal entry to the United States. This is a \$50.3 million decrease from the FY 2012 enacted amount. The net \$9.6 million Adjustments to Base decrease includes changes for pay inflation, GSA rent, attrition of mission support FTE, and other administrative efficiencies. The \$40.8 programmatic change decrease reflects planned savings in equipment and services as SC/CIRCA reaches full deployment. This change is described in more detail in the programmatic change section.

**Justification**

*Salaries (\$103.6 million)*

CIRCA will have a staffing level of 727 FTE.

**QHSR Alignment**

**3.2 Prevent Unlawful Immigration**

**ICE Strategic Plan Alignment**

**3.1 Detaining and Removing Aliens Seeking Illegal Entry**

---

**Associated HPPG Measures**

*Percent of aliens arrested or charged who will be electronically screened through Secure Communities*

*Number of aliens removed convicted of the most serious crimes (level 1 offenders)*

*Expenses (\$35.1 million)*

*Secure Communities helps ICE identify a significant percentage of the convicted criminals that are removed or returned each year.*

In FY 2013, CIRCA will fund general expenses to support the final deployment of CIRCA interoperability.

**Description**

Secure Communities enables ICE's strategy to identify and remove criminal aliens from the United States. The program helps ICE to more efficiently identify more criminal aliens, allowing the prioritization of enforcement actions on those posing the greatest threat to public safety. Through improved technology, continual data analysis, and timely information sharing with a broad range of law enforcement agency (LEA) partners, Secure Communities is another tool ICE uses to support its efforts to protect communities across the country. The cornerstone of this strategy is to increase state and local partnerships to ensure time-sensitive screening of all foreign born detainees and identification of criminal aliens.

To accomplish the SC goals, ICE uses an automated information sharing tool to assist in the identification of criminal aliens through fingerprint-based biometric identification technology to identify aliens lawfully or unlawfully present in the United States. It uses an already-existing federal information-sharing partnership between ICE and the FBI that helps to identify criminal aliens without imposing new or additional requirements on state and local law enforcement. This capability is part of ICE's comprehensive strategy to improve the identification and removal of criminal aliens. SC/CIRCA leverages the existing information-sharing capability between DHS and the Department of Justice to quickly and accurately identify aliens who are arrested for crimes.

*Secure Communities imposes no new or additional requirements on state and local law enforcement, and the federal government, not the state or local law enforcement agency, determines what immigration enforcement action, if any, is appropriate. Only federal DHS officers make immigration enforcement decisions, and they only do so after an individual is arrested for a criminal violation of state law, separate and apart from any violations of immigration law.*

ICE estimates that approximately 900,000<sup>3</sup> arrests of aliens for crimes occur every year and that approximately 550,000 criminal aliens convicted of crimes exit law enforcement custody every year. ICE has never had the capability to identify, arrest and remove all of these criminal aliens. ICE estimates that 1.9<sup>4</sup> million removable criminal aliens are in the United States today. This population of criminal aliens poses a major threat to public safety. A more comprehensive approach to address this threat is a priority of the Secretary of Homeland Security and of Congress.

<sup>3</sup> Secure Communities Criminal Alien Population Projection Analysis (CAPPA), Version 1.2 as delivered October 27, 2010. This version of the model has been validated by the CAPPA Working Group, but has not been made public. CAPPA includes analysis from the following sources: FBI Uniform Crime Report, 2007; Census Bureau American Community Survey, 2008; Bureau of Justice Statistics Felony Defendants in Large Urban Counties, 2006; Federal Justice Statistics Resource Center, 2008.

<sup>4</sup> Estimate calculation based on data pulled from U.S. Census Bureau, American Community Survey, 2008, <http://www.census.gov/acs/www>, adjusted for ACS undercount of the non-citizen population using the DHS OIS methodology and Bureau of Justice Statistics, Prevalence of Imprisonment in US Population, 1974-2001, 8/2003, <http://www.ojp.usdoj.gov/bjs/pub/pdf/piusp01.pdf>

To reduce this threat, Congress created Secure Communities in FY 2008 to establish a nationwide capability to identify all criminal aliens or potential criminal aliens at the time of arrest. To best protect public safety using available resources, ICE prioritizes enforcement actions toward the highest threat criminal aliens among those identified. ICE is committed to enforcement action against all identified criminal aliens convicted of an aggravated felony and as many others as resources permit. By prioritizing enforcement actions in this manner, ICE will remove the highest threat criminal aliens from the United States before they can exit the criminal justice system and re-enter our nation's communities. A complete list of all of these activations, which is updated weekly, is available at <http://www.ice.gov/doclib/secure-communities/pdf/sc-activated.pdf>.

**FY 2013 Planned Activities**

In FY 2013, ICE plans to complete implementation of nationwide interoperability by expanding to cover 100 percent of the national jurisdictions, including any jurisdictions originally planned for FY 2012.

ICE will detain and remove all criminal aliens who are subject to the mandatory detention provisions of the Immigration and Nationality Act by prioritizing its enforcement resources. ICE will also continue presenting criminal aliens who repeatedly re-enter the United States illegally to U.S. Attorney Offices for aggressive prosecution under felony immigration charges. As part of Secure Communities deployment, ICE will continue its outreach efforts to the national law enforcement community to strengthen information sharing partnerships.

### Description of Item

Under this Administration, U.S. Immigration and Customs Enforcement (ICE) has focused its immigration enforcement efforts on identifying and removing criminal aliens and those who fall into other priority categories including national security threats, repeat immigration law violators, recent border entrants and immigration fugitives. Commensurate with this shift toward targeted enforcement and to realize the most cost effective use of federal resources, this budget includes flexibility to transfer funding between immigration detention and the Alternatives to Detention (ATD) program. Consistent with its stated enforcement priorities and recent policy guidance, ICE will continue to focus detention and removal resources on those individuals who have criminal convictions or fall under other priority categories, to the greatest extent permitted by law. For low risk individuals, ICE will increase resources to enhance the effectiveness of Alternatives to Detention, which provides a lower per day cost than detention. Coupled with the FY 2013 custody operations request, the additional ATD funding will enable ICE to place lower-risk individuals on ATD, maintaining the current capacity through detention and supervision.

ICE requests an additional \$39.9 million in FY 2013 to increase the effectiveness of the ATD program by focusing on greater program oversight to manage the non-detained docket in order to reduce the cycle time on ATD and associated costs. At same time, ICE will increase the number of available slots on ATD. This proposal will require a new approach and close partnership with

EOIR to focus on priority cases on the non-detained docket, with the goal of strengthening and leveraging the ATD program.

### **Non-Personnel Costs - \$27.266 million**

Coupled with the FY 2013 custody operations request, additional ATD funding will enable ICE to place lower-risk individuals on ATD, maintaining the current capacity through detention and supervision. As part of this proposal, ICE will work with EOIR on a new approach to priority aliens on ATD. Through this partnership, ICE will focus on leveraging the ATD program to increase its efficiency and making it a cost-effective method for tracking individuals who do not require detention or who have been ordered released on bond by an immigration judge.

### **Personnel Costs - \$12.637 million**

In addition to the contract support, to address alternatives to traditional detention holistically, ICE requests \$12.637 million in personnel costs for the following:

- \$9.837 million for 70 Immigration Enforcement Agents (IEAs): ICE requires IEAs to supervise aliens enrolled in ATD full service and technology-only monitoring programs
- \$2.8 million for staff administrative efforts that will overall reduce the cycle time of docket management. This effort will include reviewing alien files, tracking process during cases, and performing work like the FOSC for Fugitive Operations to ensure cases are up to date or closed as the case may be. This approach will overall make the non-detained docket management more efficient.

### **Justification**

The FY 2013 request will allow ICE to expand the ATD program while streamlining ATD operations to ensure the program is a cost-effective alternative form of detention. As Federal agencies address out-year spending constraints established in the Budget Control Act, developing lower-cost methods for monitoring and supervising low-risk aliens will be an important part of the overall strategy to drive down costs at DHS. Simultaneously, as ICE re-focuses its detention system on additional criminals identified through programs like Secure Communities, ICE detention systems and priorities will ensure that all priority individuals are held in physical detention when appropriate.

As part of this proposal, ICE will work with EOIR on a new approach to priority aliens on ATD. Through this partnership, ICE will focus on leveraging the ATD program to increase its efficiency and making it a cost-effective method for tracking individuals who do not require detention or who have been ordered released on bond by an immigration judge.

Additionally, the budget proposes administrative flexibility for the Secretary of Homeland Security to redirect funds from other ICE programs to detention to ensure all high-priority aliens, including criminals, continue to be detained.

### **Impact on Performance (Relationship of Increase to Strategic Goals)**

With this funding, ICE will achieve improved efficiency due to increased contractor support who will help review the non-detained cases in order to reduce removal period time within the non-detained docket. This reduction also reduces the time required to monitor aliens in turn providing greater capacity within existing ATD monitoring resources. This approach directly aligns with the current ATD Fiscal Year Homeland Security Priority (FYHSP) “*Number of ATD participants who are removed or returned*”.

**Department of Homeland Security**  
**U.S. Immigration and Customs Enforcement**  
**Salaries and Expenses**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 2:** Co-Location of ICE Facilities – A City Solution Approach  
PPA: Personnel Compensation and Benefits, Services, and Other Costs  
Program Increase: Positions 0, FTE 0, Dollars \$6,163

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	3,981
Program Increase							-	-	6,163
<b>Total Request</b>	-	-	<b>49,467</b>	-	-	<b>3,981</b>	-	-	<b>10,144</b>

**Description of Item**

ICE has developed a co-location plan to consolidate personnel and operations ICE-wide. Through this consolidation, ICE expects to enhance operational efficiencies and minimize the fiscal impact associated with the agency’s space requirements. The plan focuses on the consolidation of 367 leases within 55 cities. The space that ICE occupies in these 55 cities is approximately 4.1 million square feet (SF). The targeted locations represent 65 percent of ICE’s total 6.4 million SF leased inventory.

ICE’s co-location strategy was built primarily to mitigate rising real estate costs due to market rate escalations. When leases expire, new leases must be negotiated at current market rates. The majority of the expiring leases were negotiated 15 or more years ago. Commercial market conditions yielded rental rates on average of \$11.00 per SF at that time. Current market rental rates are at \$33.00 per SF on average, leading to a critical need to mitigate these cost pressures through consolidation and the application of smarter space management standards.

ICE has received \$109.0 million for co-location between FY 2009 and FY 2011 to fund the consolidation in 16 of the 55 cities identified in the co-location plan. No co-location funds were appropriated to ICE in FY 2012. With prior appropriations, ICE is consolidating its leased footprint in each of the 16 cities into a single location, reducing the number of leases from 57 to 16. Despite the challenge of accommodating the agency’s growth and increasing market rate rental conditions, the consolidation effort has resulted in a reduction of 74,000 SF.

ICE requests \$6.2 million in FY 2013 to continue to reduce its footprint and achieve long-term cost savings by consolidating operations and implementing more efficient space standards. This funding will allow ICE to consolidate portions of its leased footprint in Phoenix, Arizona.

## **Justification**

### *City Solution Approach*

Since 2009, ICE has implemented the consolidated leased locations within each city into a single location. As a result of this strategy, ICE has seen benefits in terms of cost savings, cost avoidance, and operational efficiencies. However, the agency has also observed some ways in which the approach to the consolidation program can be enhanced to be more responsive to the current budget environment by tailoring plans to certain cities.

Of the remaining 39 cities included in the original Co-location Plan, there are a total of 294 leased locations. According to the original plan, this would require a \$531 million investment to acquire new space. While consolidation of all ICE programs is still the focal point of this initiative, circumstances do not always make this the most feasible option economically and/or operationally. While long-term efficiencies such as rent reduction may be achieved through co-location, the up-front costs associated with acquiring and constructing new space may outweigh the long-term benefits. Sometimes a tailored *city solution* is the more fiscally responsible approach.

After factoring in local real estate conditions in a given city, a preferred acquisition solution is selected from amongst a range of alternatives. The most cost effective solution which allows the agency to meet its mission objectives is chosen. In some cases, the optimal city solution is not the consolidation of all program offices into a single location.

For example, ICE has applied this approach in Detroit where the initial co-location solution was to consolidate all program offices into a single 128,000 square foot facility. The construction costs associated with the tenant improvements for this single project would have been \$20.6 million. ICE developed an alternative plan leveraging existing space in two federally owned facilities. By renovating existing space, the agency was able to accommodate the program requirements for a total cost of \$7.4 million, avoiding \$13.2 million in construction costs and \$2 million in annual rent payments. In this case, the co-location alternative was cost prohibitive, especially when considering the numerous real property requirements across ICE's domestic operations.

Based on the success achieved in Detroit, ICE continues to look for cost effective opportunities and is currently exploring alternative solutions in Phoenix, Indianapolis, Buffalo, El Paso, El Centro, and Dallas.

### *FY 2013 Requested Funding - \$6.2 million*

\$6.2 million would allow ICE to start implementing the Phoenix, AZ co-location project with an anticipated completion timeline of one to three years. ICE will consolidate eight leases that are expiring with no renewal options, making relocation necessary. Currently, Homeland Security

Investigations staff is housed in four locations and Enforcement and Removal Operations are in two locations. This project will enable ICE to accommodate agency growth along the Southwest border and increase efficiency by reducing square footage by 66 SF per person; ICE will be able to accommodate an additional 127 positions.

The FY 2013 funds will be used to address the inefficiencies of having multiple investigative units and detention operations scattered across several locations within the same metropolitan area. The funds will be used to acquire and occupy office space in secure facilities that meet ICE mission and law enforcement requirements. Funds will be used for interior construction (“build-out” costs), voice and data cabling, furniture, fixtures, equipment, and outfitting expenses for special spaces such as holding cells and secured spaces.

This project will result in an estimated \$26 million in cost avoidance over a 10-year period.

### **Impact on Performance (Relationship of Increase to Strategic Goals)**

This initiative supports the DHS Goal #5: Strengthen and unify DHS Operations and Management as it will allow ICE to consolidate personnel and manage a cohesive workforce. The program increase will help to advance ICE co-location efforts and to realize potential savings associated with FPS security, administrative support costs, rent through shared building support spaces and shared utility costs, costs for above-standard build-out, GSA overhead, and operational efficiencies.

The ICE mission is to protect national security by enforcing our national customs and immigration laws and is the largest investigative agency in DHS. ICE has significantly expanded its workforce over the past four years to address growing and evolving requirements. The growth in personnel and increased enforcement initiatives have strained existing ICE infrastructure, but will be mitigated by the right-sizing provided by co-location.

**Department of Homeland Security**  
**U.S. Immigration and Customs Enforcement**  
**Salaries and Expenses**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 3:** VTC Expansion  
PPA: ERO - Custody Operations  
Program Increase: Positions 0, FTE 0, Dollars \$7,012

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	7,012
<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>7,012</b>

**Description of Item**

ICE requests \$7.0 million to expand video tele-conferencing (VTC) capabilities at 83 new locations in FY 2013.

VTC is a communication technology that permits users at two or more different locations to interact by creating a face-to-face meeting environment. VTC systems transmit bi-directional audio, video and data streams during the session. For the purposes of ICE’s mission, VTC equipment enables officers to question apprehended detainees at various locations without the agents being physically in the same location as the detainee. It also allows the immigration court proceedings to occur in one location while the Immigration Judge is in a different location.

VTC systems can either be installed within an existing structure to be stationary in nature, or manufactured to be transportable. The aggregate cost to acquire, install, calibrate, and utilize a typical VTC system is approximately \$50,000.

The ICE utilization of additional funding for VTC expansion is summarized in the table below:

Location Type	Number of Locations	Number of VTCs	Cost
Existing Detention Facilities	29	44	\$2,200,000
New Detention Facilities	4	14	\$700,000
Existing Field and Sub Offices	39	50	\$2,500,000
EOIR Locations	11	22	\$1,100,000
Maintenance Contract	-	-	\$512,000
<b>TOTAL</b>	<b>83</b>	<b>130</b>	<b>\$7,012,000</b>

Note: The average unit cost is an estimated blended rate for stationary and portable systems. Actual costs may vary.

## **Justification**

### ***Uses of Expanded Video Tele-Conferencing***

VTC will enable immigration proceedings to be conducted without the transportation of inmates from the secure confines of the correctional institutions; therefore saving travel costs and improving safety. For the immigration courts, VTC saves travel time for Immigration Judges – allowing them to adjudicate more cases – as well as ICE attorneys. VTC capability also promotes effective case management by allowing immigration judges to conduct hearings, on an ad hoc basis, for their counterparts in other immigration court locations, thereby assisting with unusually heavy caseloads in certain areas. For the respondent, VTC can provide a more expedient hearing. These efficiencies will allow immigration courts to hear more cases, contributing to ICE’s efforts to reduce the number of detainee transfers and decrease the average length of stay for detainees. Moreover, the use of VTC in removal proceedings has been critical to the success of ICE’s prosecutorial discretion initiatives.

Additionally, VTC will be used for local ICE training and communication between ICE officers and ICE attorneys with whom they consult. Legal matters such as claims to U.S. citizenship and habeas corpus actions require close consultation and coordination between ERO and the local Office of Chief Counsel (OCC). VTC will allow for direct, effective, and efficient communications between the various parties.

### ***Expansion Plan***

In FY 2013, ICE plans to expand VTC services in detention facilities that house ICE detainees, and install it at Field Offices and various locations within the Department of Justice, Executive Office for Immigration Review (EOIR) court system to promote both efficiency and collaboration with EOIR. ICE has identified the following ICE locations in need of initial VTC equipment and will have VTC installed with resources provided in this request:

#### **Existing Detention Facilities and Offices:**

Washington, DC

- Three detention facilities, Farmville, VA, Rappahannock, VA and Hampton Roads, VA

San Diego, CA

- Two detention facilities, Otay Mesa, CA and El Centro, CA
- Field office
- Sub-office at El Centro, CA

Dallas, TX

- One detention facility, Tulsa County, OK
- Field office
- Four sub-offices, Amarillo, TX, Eden, TX, Oklahoma City, OK and Tulsa, OK

Los Angeles, CA

- Two detention facilities, Adelanto, CA and Mira Loma, CA
- Three sub-offices, Santa Ana, CA, Long Beach, CA and Ventura, CA

Phoenix, AZ

- Three detention facilities, Mohave, AZ, Eloy, AZ and Florence, AZ
- Field office
- Two sub-offices, Tucson, AZ and Yuma, AZ

Baltimore, MD

- Field office

Buffalo, NY

- One detention facility, Batavia, NY
- One sub-office, Champlain, NY

Atlanta, GA

- Two detention facilities, Stewart County, GA and the Bureau of Prisons in Savannah, GA
- Field office
- Nine sub-offices, Raleigh, NC, Greensboro, NC, Charlotte, NC, Hendersonville, NC, Savannah, GA, Tallahassee, FL, Jacksonville, FL, Gadsden, AL, Nashville, TN

Miami, FL

- Field office

Houston, TX

- Field office

Philadelphia, PA

- One detention facility, York County, PA

San Antonio, CA

- Four detention facilities, South Texas, Port Isabel, TX, Bexar County, TX and Karnes, TX
- Field office
- Four sub-offices, Harlingen, TX, Waco, TX, Austin TX, and Grand Junction, TX

El Paso, TX

- Two detention facilities, El Paso, TX and DIGSA in NM
- Field office

Saint Paul, MN

- Field office

Salt Lake City, UT

- Field office

Detroit, MI

- Field office

San Francisco, CA

- Five detention facilities, Contra Costa, CA, Sacramento, CA, California City, CA, Yuba County, CA and Saipan IGSA
- Field office
- Two sub-offices, Bakersfield, CA and Fresno, CA

Newark, NJ

- Three detention facilities, Delaney Hall, NJ, Elizabeth, NJ and Essex County, NJ

New Detention Facilities: In preparation for the eventual replacement of many of the ICE-owned Service Processing Centers (SPCs), ICE plans to use some of the funding to replace capabilities currently covered by the SPCs. For planning purposes related to VTC expansion, ICE estimates two detention centers for each SPC replacement resulting in the need for four new VTC locations with the enhancement funds.

- Detroit, MI: One new detention facility
- Philadelphia, PA: Berks County new detention facility
- Chicago, IL: Two new detention facilities

EOIR Locations. In collaboration with Executive Office for Immigration Review (EOIR), ICE plans to install VTC infrastructure at 11 additional EOIR locations. These locations include:

- Atlanta, GA
- Philadelphia, PA
- Los Angeles, CA
- Lancaster, PA
- New York, NY
- Buffalo, NY
- Houston, TX
- Miami, FL
- San Diego, CA
- San Antonio, TX
- Dallas, TX

### **Impact on Performance (Relationship of Increase to Strategic Goals)**

The VTC improvements allow greater communication between ICE and the OCCs and provide the connectivity which will facilitate greater amounts of training at substantially less cost and disruption to the ICE program.

It is anticipated that increased effective utilization of VTC technology will support ICE's ongoing efforts to lower the number of days an alien spends in detention prior to removal. This is measured in the ICE strategic performance measure *Average Length of Stay (ALOS)* in detention.

VTC will contribute to an overall shortening of the time it takes to remove an alien from this country while also reducing the overall cost of detention and removal.

**Department of Homeland Security**  
**U.S. Immigration and Customs Enforcement**  
**Salaries and Expenses**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 4:** Transfer of US-VISIT  
PPA: Domestic Investigations  
Program Increase: Positions 78, FTE 78, Dollars \$17,610

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							78	78	17,610
<b>Total Request</b>	-	-	-	-	-	-	<b>78</b>	<b>78</b>	<b>17,610</b>

**Description of Item**

The FY 2013 budget request includes an increase of \$17.6 million for the transfer of the overstay analysis functions of the US-VISIT program from the National Protections and Programs Directorate (NPPD) to ICE. This transfer will allow DHS to realize operational efficiencies by consolidating US-VISIT analytical operations with ICE’s overstay enforcement mission. After the transfer is complete, previously independent overstay analysis functions and overstay investigative functions will both be managed by ICE’s Homeland Security Investigations (HSI), increasing both the effectiveness and efficiency of overstay enforcement operations.

The transfer includes \$11.029 million for 78 US-VISIT Overstay Analysts and the associated costs such as rent and utilities, plus \$6.581 million for contract support and the costs of providing office space and equipment for the contract staff.

**Justification**

Through its use of biometrics, US-VISIT collects, stores and shares digital finger scans and digital photographs for subsequent verification. This biometric information is paired with biographic information and used to establish and verify an individual’s identity, as well as to match that identity against criminal and immigration violator watch lists. US-VISIT Overstay Analysts work with this data to identify and verify overstay violators. Lookout records are created for overstay violators and persons of interest with known immigration violations or criminal records.

Travelers who have exceeded their periods of admission and remain in the United States are referred to as in-country overstays. Identifications of in-country overstays result in referrals to ICE as lead recommendations. ICE then undertakes an overstay investigation for law enforcement action. Combining these functions under HSI will allow for improved coordination of overstay analysis with the investigative work that HSI already performs.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

Transferring the overstay analysis work from US-VISIT to ICE will allow for seamless coordination of efforts to identify potential overstays and investigations by ICE field operations to locate and remove aliens who have overstayed their visas. This coordination will improve the overall outcome of the program.

**Department of Homeland Security**  
**U.S. Immigration and Customs Enforcement**  
**Salaries and Expenses**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 1:** Realignment and Reduction of 287(g)  
PPA: Personnel Compensation and Benefits, Service, and Other Costs  
ERO - Custody Operations  
Headquarters Managed IT Investment  
Legal Proceedings  
Domestic Investigations  
Program Decrease: Positions (24), FTE (24), Dollars \$(17,000)

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	68,321
Program Decrease							(24)	(24)	(17,000)
<b>Total Request</b>	-	-	<b>68,321</b>	-	-	<b>68,321</b>	<b>(24)</b>	<b>(24)</b>	<b>51,321</b>

**Description of Item**

The Budget reduces the 287(g) program by \$17.0 million since Secure Communities will reach nationwide deployment in FY 2013. The Secure Communities screening process is more consistent, efficient and cost effective in identifying and removing criminal and other priority aliens. To implement this reduction in 2013, ICE will begin by discontinuing the least productive 287(g) task force agreements in those jurisdictions where Secure Communities is already in place and will also suspend consideration of any requests for new 287(g) task forces.

**Personnel Costs**

- \$3.75M to reduce legal, acquisitions, investigations, enforcement and outreach staff:
  - Office of the Principal Legal Advisor – (-2 FTEs) -\$0.34M
  - Office of Acquisition (OAQ) – (-1 FTE) -\$0.11M
  - Homeland Security Investigations (HSI) – (-8 FTEs) -\$1.5M
  - Enforcement and Removal Operations (ERO) – Deportation Officers– (-7 FTEs) - \$0.8M
  - Office of State and Local Coordination (OSLTC) – (-3 FTEs) -\$0.5M
  - Office of Professional Responsibility (OPR) – (-3 FTE) - \$0.5M

## Non-Personnel Costs

- \$13.25M in reductions will include the following general expenses:
  - 287(g) Program Management Office: -\$7.68M for basic and refresher training for the state and local law enforcement officers, travel, PCS, and other administrative costs
  - Office of Professional Responsibility (OPR): -\$0.24 for travel for compliance reviews
  - Office of the Chief Information Officer (OCIO): -\$2.99M for IT connectivity and maintenance services
  - Office of State and Local Coordination (OSLTC): - \$0.79M for travel and costs associated with outreach and communications
  - Homeland Security Investigations (HSI):- \$1.55M for travel, vehicles and equipment, and other administrative costs

## Funds Realignment and Reduction by PPA

The reductions above reflect reductions to the functional areas of operations. The PPA distribution for FY 2013 will reflect the proper alignment of responsibility that has shifted, e.g., overall management of the program now officially resides in the Office of Enforcement and Removal Operations instead of the Office of the Assistant Secretary or HSI. IT funds will now be directly appropriated to OCIO instead of the 287(g) Program Management Office.

PPA	FY 2012 Appropriated Totals	New FY 2013 Appropriated Totals
Office of the Assistant Secretary (OAS)	\$ 9,858,000	\$ 1,744,233
Office of the Chief Financial Officer (OCFO)	\$ 261,000	\$ -
Office of Acquisition (OAQ)	\$ 768,000	\$ 658,000
Office of Professional Responsibility (OPR)	\$ 5,842,000	\$ 5,364,000
Office of the Principal Legal Advisor (OPLA)	\$ 638,000	\$ 303,000
Office of the Chief Information Officer (OCIO)	\$ 3,670,000	\$ 8,175,273
Homeland Security Investigations (HSI)	\$ 29,085,000	\$ 8,483,000
Enforcement and Removal Operations (ERO) - Custody	\$ 18,199,000	\$ 26,593,494
<b>TOTAL</b>	<b>\$ 68,321,000</b>	<b>\$ 51,321,000</b>

## Justification

Given the nationwide deployment of the Secure Communities interoperability system by the end of FY2013, it will no longer be necessary to maintain the more costly and less effective 287(g) program.

## Impact on Performance (Relationship of Decrease to Strategic Goals)

Secure Communities deployments have increased criminal alien identifications and removals by 89 percent since 2009. Discontinuing low performing 287(g) agreements will not negatively impact ICE's enforcement efforts.

**Description of Item**

ICE’s Office of the Principal Legal Advisor (OPLA) provides the legal representation, advice, training, and services required to support the ICE mission. As the legal representative for the U.S. Government during immigration court hearings, OPLA attorneys handle a variety of immigration-related issues that range from contested removals to custody determinations to applications for protection or relief from removal. Many of the hearings involve criminal aliens, while others involve terrorists and human rights abusers. Additionally, OPLA provides critical legal support to ICE operations concerning criminal immigration and customs law violations, ethics, employment law, tort claims, and administrative law issues.

In FY 2013, OPLA will reduce non-mission critical spending \$5.0 million by streamlining staffing support, and capitalizing on programmatic efficiencies.

**Justification**

In FY 2013 ICE will continue to make the identification and removal of criminal aliens and other priority individuals a high priority, but will reduce operating costs of OPLA by \$5.0 million to account for cost savings generated through initiatives that are currently underway. ICE will realize cost savings from the following initiatives:

- Deployment of New Case Management System – ICE will achieve full operational capability of its new case management system in FY 2013. The new case management system will improve litigation management by providing more accurate and timely information, and will allow ICE to streamline staff support as the need for additional case management support will be reduced; and
- Increased Video Conferencing – ICE will reduce OPLA operational travel by increasing the use of video conferencing. ICE has requested \$7.0 million in FY 2013 for VTC expansion, which will help OPLA achieve this reduction.

Savings will also be realized as ICE continues to work with DOJ to implement monthly work group meetings. These DHS-EOIR Docket Efficiency Working Group meetings will improve docket scheduling and create other efficiencies in immigration court with the goal of increasing the number of cases handled and the quality of the decisions rendered. ICE will also continue to work with DOJ and U.S. Citizenship and Immigration Services (USCIS) to implement procedures to promptly identify each case where an alien's removal proceedings should be dismissed to allow the alien to pursue bona fide immigration relief avenues before USCIS rather than through the EOIR hearing process.

**Impact on Performance (Relationship of Decrease to Strategic Goals)**

The initiatives outlined above to achieve a \$5.0 million reduction in funding to OPLA will enable attorneys and legal staff to maintain current performance levels. ICE will continue to make the identification and removal of criminal aliens a high priority.

Current Services Level							-	-	1,514,020
Program Decrease							-	-	(53,436)
<b>Total Request</b>	-	-	<b>1,456,825</b>	-	-	<b>1,514,020</b>	-	-	<b>1,460,584</b>

**Description of Item**

The Budget reduces ICE detention capacity to 32,800 detention beds. ICE will prioritize the detention of criminal aliens and those who fall into other priority categories including repeat immigration law violators, recent border entrants and immigration fugitives in FY 2013. As ICE continues to focus on criminal and other priority cases, the agency also anticipates reducing the time removable aliens spend in detention custody.

While shifting some resources to Alternatives to Detention to ensure the most cost effective use of Federal resources, the Budget proposes flexibility to reallocate funding as needed to detain all high-risk aliens apprehended by ICE. Consistent with its stated enforcement priorities and recent policy guidance, ICE will continue to focus detention and removal resources on those individuals who have criminal convictions or fall under other priority categories. At the same time, ICE will enhance the effectiveness of Alternative to Detention for low risk individuals, monitoring them at a lower per day cost than detention.

The FY 2013 budget request reflects an average bed rate at a rate of \$122.00 per day that has been held constant from FY 2012 due to ICE’s concerted effort to make detention and removal practices more efficient. ICE is planning on offsetting increases in detention contract and healthcare costs by maximizing the use of contracts with guaranteed minimums which provide reduced or free beds after occupying the minimum number of beds on the contract.

The FY 2013 bed rate does not include the potential impact of Department of Labor (DOL) service contract rate adjustments. Beginning in FY 2012, ICE may face increased annual costs due to a change

from a sole-source wage determination to an area-wide wage rate for the 13 largest IGSA's where 100 percent of the work is sub-contracted out. Such wage rate adjustments have not yet been determined by DOL.

### **Justification**

The reduction of \$53.436 million in FY 2013 is based on funding 32,800 beds at a rate of \$122.00 per day.

The reduction in beds has been made in coordination with expansion of the ATD program in FY 2013. The ATD program uses technology such as ankle bracelets and parole-like supervision to track aliens who have been accused of immigration violations. ICE will continue to focus its use of detention beds on those individuals who have criminal convictions or fall under other priority categories. While recognizing that not all aliens apprehended by ICE require a detention bed, the Administration believes that alternate forms of detention such as electronic monitoring and supervision can be just as effective as traditional detention.

In order to ensure there are sufficient resources to detain high-risk aliens, the budget proposes flexibility to transfer funding between immigration detention and ATD. Consistent with its stated enforcement priorities and recent policy guidance, ICE will continue to detain aliens that fall into ICE's civil enforcement priorities or are subject to mandatory detention by statute, while shifting lower-risk aliens into the ATD program.

### **Impact on Performance (Relationship of Decrease to Strategic Goals)**

ICE prioritizes its resources by focusing on those aliens who pose the greatest risk to public safety and national security and who pose a threat to border security or the integrity of the immigration court system. ICE will detain aliens that fall into ICE's civil enforcement priorities or are subject to mandatory detention by statute, while shifting lower-risk aliens into the ATD program. This change will support the efforts to increase the number of criminal aliens who are removed from the United States by focusing physical detention resources on criminal and other high-risk aliens.

**Department of Homeland Security**  
**U.S. Immigration and Customs Enforcement**  
**Salaries and Expenses**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 4:** Secure Communities Reduction  
PPA: Comprehensive Identification and Removal of Criminal Aliens  
Program Decrease: Positions 0, FTE 0, Dollars \$(40,794)

Funding Profile

Current Services Level							782	727	179,507
Program Decrease							-	-	(40,794)
<b>Total Request</b>	<b>552</b>	<b>553</b>	<b>199,600</b>	<b>782</b>	<b>619</b>	<b>189,064</b>	<b>782</b>	<b>727</b>	<b>138,713</b>

**Description of Item**

The FY 2013 budget request includes a reduction of \$40.794 million for the Secure Communities program based on planned nationwide deployment in FY 2013. According to the current Secure Communities roll-out plan, ICE will complete nationwide activation of the Secure Communities initiative in 2013 when the remaining 11 percent of jurisdictions deploy interoperability. Completion of the plan in FY 2013 will allow ICE to reduce expenditures for equipment and services by \$40.794 million in comparison to the FY 2012 enacted amount.

ICE will maintain payroll support for law enforcement and mission support personnel who support criminal alien enforcement, and will also continue support of the ACRIME, Automated Threat Prioritization, and Status Determination Support IT systems.

**Justification**

The reduction of \$40.794 million in FY 2013 is based on the planned deployment schedule and reflects the reduced need in FY 2013 for equipment and services to support the program.

**Impact on Performance (Relationship of Decrease to Strategic Goals)**

The Office of Enforcement and Removal Operations program promotes DHS strategic objective 3.2.4 of the DHS Strategic Plan “Prevent unlawful immigration” and is aligned to the ICE Strategic Plan Goal 3.3 – “Prosecute and remove criminals and gang members.”

ICE plans to meet the current deployment goals and performance targets in FY 2013. This includes rollout in FY 2013 to the remaining 339 communities to reach 100 percent coverage of jurisdictions in the current Secure Communities plan. The requested funding supports the goal of nationwide deployment.

## V. Exhibits and Other Supporting Material

### A. Justification of Proposed Legislative Language

*For necessary expenses [for enforcement of immigration and customs laws, detention and removals, and investigations] to conduct investigations of criminal violations of Federal law relating to border security, customs and trade, immigration and naturalization, intellectual property rights, and travel and transportation, including overseas vetted units operations; and purchase and lease of up to 3,790 (2,350 for replacement only) police-type vehicles; [\$5,528,874,000]\$5,296,692,000; of which not to exceed \$10,000,000 shall be available until expended for conducting special operations under section 3131 of the Customs Enforcement Act of 1986 (19 U.S.C. 2081); of which not to exceed \$12,750 shall be for official reception and representation expenses; of which not to exceed \$2,000,000 shall be for awards of compensation to informants, to be accounted for solely under the certificate of the Secretary of Homeland Security; of which not less than \$305,000 shall be for promotion of public awareness of the child pornography tipline and activities to counter child exploitation; of which not less than \$5,400,000 shall be used to facilitate agreements consistent with section 287(g) of the Immigration and Nationality Act (8 U.S.C. 1357(g)); and of which not to exceed \$11,216,000 shall be available to fund or reimburse other Federal agencies for the costs associated with the care, maintenance, and repatriation of smuggled aliens unlawfully present in the United States: Provided, That none of the funds made available under this heading shall be available to compensate any employee for overtime in an annual amount in excess of \$35,000, except that the Secretary of Homeland Security, or the designee of the Secretary, may waive that amount as necessary for national security purposes and in cases of immigration emergencies: Provided further, That of the total amount provided, \$15,770,000 shall be for activities to enforce laws against forced child labor, of which not to exceed \$6,000,000 shall remain available until expended: Provided further, That of the total amount available, not less than \$1,600,000,000 shall be available to identify aliens convicted of a crime who may be deportable, and to remove them from the United States once they are judged deportable, of which [\$189,064,000]\$138,713,000 shall remain available until September 30, [2013]2014: Provided further, That the Assistant Secretary of Homeland Security for U.S. Immigration and Customs Enforcement shall report to the Committees on Appropriations of the Senate and the House of Representatives, not later than 45 days after the end of each quarter of the fiscal year, on progress in implementing the preceding proviso and the funds obligated during that quarter to make such progress: Provided further, That the Secretary of Homeland Security shall prioritize the identification and removal of aliens convicted of a crime by the severity of that crime: [Provided further, That funding made available under this heading shall maintain a level of not less than 34,000 detention beds through September 30, 2012:] Provided further, That of the total amount provided, not less than [\$2,750,843,000]\$2,666,192,000 is for [detention]enforcement and removal operations, including transportation of unaccompanied minor aliens: Provided further, That of the total amount provided, \$10,300,000 shall remain available until September 30, [2013]2014, for the Visa Security Program: Provided further, That not less than \$10,000,000 shall be available for investigation of intellectual property rights violations, including the National Intellectual Property Rights Coordination Center: Provided further, That none of the funds provided under this heading may be used to continue a delegation of law enforcement authority authorized under section 287(g) of the Immigration and Nationality Act (8 U.S.C. 1357(g)) if the Department of Homeland Security Inspector General determines that the terms of the agreement governing the delegation of authority have been violated: Provided further, That none of the funds provided under this heading may be used to continue any contract for the provision of detention services if the two most recent overall performance evaluations*

*received by the contracted facility are less than "adequate" or the equivalent median score in any subsequent performance evaluation system: Provided further, That pursuant to section 503 of this Act, the Secretary may propose to reprogram funds necessary to ensure the detention of aliens prioritized for removal: Provided further, That of the total amount provided, up to \$5,000,000 may be transferred to the Department of Justice, Executive Office of Immigration Review, to increase the efficiency of the immigration court process: Provided further, That nothing under this heading shall prevent U.S. Immigration and Customs Enforcement from exercising those authorities provided under immigration laws (as defined in section 101(a)(17) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(17))) during priority operations pertaining to aliens convicted of a crime.(Department of Homeland Security Appropriations Act, 2012.)*

### Personnel Compensation and Benefits, Service, and Other Costs Mission Statement

ICE Management and Administration (M&A) resources provide for top-level agency-wide management in the following areas: the Offices of the Assistant Secretary (OAS), Professional Responsibility (OPR), the Chief Financial Officer (OCFO), the Office of Acquisition Management (OAQ). The M&A activities include executive and overall leadership direction, strategic planning, policy development, and administrative support for the human, financial, information, and physical resources required to facilitate the

operational capabilities of a productive ICE workforce.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	98,580	113,891	108,953	(4,938)
11.3 Other than full-time permanent	3,268	3,031	2,876	(155)
11.5 Other personnel compensation	10,004	2,482	2,193	(289)
12.1 Benefits	36,389	38,565	36,819	(1,746)
<b>Total, Salaries &amp; Benefits</b>	<b>148,241</b>	<b>157,969</b>	<b>150,841</b>	<b>(7,128)</b>

**Legal Proceedings Mission Statement**

ICE Legal Proceedings (also referred to as the Office of the Principal Legal Advisor or OPLA) provides the legal advice, training, and services required to support the ICE mission while defending the immigration laws of the U. S. in the administrative and federal courts and is the legal representative for ICE. OPLA is the DHS legal component within ICE that is authorized to represent the Government in immigration proceedings that end up in immigration courts.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	123,270	125,948	121,384	(4,564)
11.3 Other than full-time permanent	5,554	5,513	5,199	(314)
11.5 Other personnel compensation	1,540	1,529	1,442	(87)
12.1 Benefits	37,346	37,393	35,266	(2,127)
<b>Total, Salaries &amp; Benefits</b>	<b>167,710</b>	<b>170,383</b>	<b>163,291</b>	<b>(7,092)</b>

Salaries and Benefits includes regular salaries and wages paid to civilian employees for full-time, part-time, temporary or intermittent employment; compensation above the basic rates paid directly to civilian employees such as overtime, holiday pay, night work differential, hazardous duty pay, supervisory differential, incentive awards, and royalties; and benefits including life insurance, health insurance, employee retirement, work injury disabilities, professional liability insurance, recruitment, retention and other incentives.

**International Investigations Mission Statement**

The HSI Office of International Investigations includes 69 offices in 47 countries. International Investigations represents the international assets of all ICE programs and collaborates with U.S. Citizenship and Immigration Services, U.S. Customs and Border Protection, and other DHS components. OIA liaises with foreign governments and international partners to facilitate the enforcement of U.S. customs and immigration laws beyond our borders in an effort to interdict criminals and prevent or disrupt criminal activity.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change

**Visa Security Program Mission Statement**

The Visa Security Program (VSP) represents ICE's front line in protecting the United States against terrorist and criminal organizations. VSP enhances the security of visa issuance at high-risk overseas posts by deploying trained special agents to identify and investigate potential terrorist and criminal threats before they reach the United States and interdicting those who would exploit the legal visa process.

### Summary Justification and Explanation of Changes

**Intelligence Mission Statement**

The Office of Intelligence focuses on data and information related to the movement of people, money and materials into, within and out of the United States to provide accurate and timely reporting to ICE leadership and field agents in support of enforcement operations. ICE's intelligence functions are managed by a highly trained team of professionals with expertise in data and threat analysis, languages, financial investigations, counterterrorism and a number of other areas. ICE intelligence professionals process information from a variety of sources to provide assessments of patterns, trends and new developments in a wide range of law enforcement areas. These include the following areas: Terrorism, Human Smuggling and Trafficking, Money Laundering and Financial Crime, Drug Smuggling, Criminal Aliens, Air and Marine Smuggling, Cyber Crimes, Identity Fraud and Document Fraud, and Arms Trafficking.

**ERO - Custody Operations Mission Statement**

Immigration enforcement authorities apprehend potentially removable aliens. In many cases, these aliens must be detained while they go through immigration proceedings and until they are removed. Enforcement and Removal Operations prioritizes which cases will be detained based on ICE's enforcement priorities while low-risk aliens are enrolled in ATD programs or released on immigration bond. Custody Operations provides safe, secure, and humane confinement for these aliens. It also ensures that aliens in ICE custody appear for their immigration hearings, and then for their subsequent removal.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	335,774	341,975	345,189	3,214
11.3 Other than full-time permanent	2,636	2,548	2,544	(4)
11.5 Other personnel compensation	100,681	96,883	96,735	(148)
11.8 Special Service Pay	242	159	159	-
12.1 Benefits	173,695	176,288	178,016	1,728
<b>Total, Salaries &amp; Benefits</b>	<b>613,028</b>	<b>617,853</b>	<b>622,643</b>	<b>4,790</b>

Salaries and Benefits includes regular salaries and wages paid to civilian employees for full-time, part-time, temporary or intermittent employment; compensation above the basic rates paid directly to civilian employees such as overtime, holiday pay, night work differential, hazardous duty pay, supervisory differential, incentive awards, and royalties; and benefits including life insurance, health insurance, employee retirement, work injury disabilities, professional liability insurance, recruitment, retention and other incentives.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
21.0 Travel	\$6,453	\$5,213	\$5,205	-\$8

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
22.0 Transportation of things	\$1,234	\$987	\$985	-\$2

Transportation of Things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
23.1 GSA rent	\$59,460	\$58,433	\$60,463	\$2,030

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
23.2 Other rent	\$204	\$214	\$225	\$11

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
23.3 Communications, utilities, and misc. charges	\$21,772	\$22,861	\$19,973	-\$2,888

Communications, Utilities, and Miscellaneous Charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services, including Blackberry/pager/cellular phones.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.1 Advisory and assistance services	\$36,087	\$28,870	\$20,561	-\$8,309

Advisory and Assistance Services include services acquired by contract from non-Federal sources (i.e. the private sector, foreign governments, state and local governments, tribes, etc.), as well as from other units within the Federal government.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.2 Other services	\$75,391	\$55,313	\$40,684	-\$14,629

Other Services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.3 Purchases from Gov't accts.	\$8,165	\$6,448	\$5,151	-\$1,297

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.4 O&M of facilities	\$765,107	\$1,055,895	\$995,660	-\$60,235

Operation and Maintenance of Facilities include all payments for such when done by contract with the private sector or another Federal Government account.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.6 Medical care	\$169,212	\$165,146	\$159,074	-\$6,072

Medical Care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.7 Operation and maintenance of equipment	\$5,637	\$5,919	\$6,206	\$287

Operation and Maintenance of Equipment includes costs for operation, maintenance, repair, and storage of equipment when done by contract with the private sector or another Federal Government account.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.8 Subsistence & Support of persons	\$103	\$108	\$114	\$6

Subsistence and Support of Persons includes costs for contractual services with the public or another Federal Government account for the board, lodging, and care of persons, including prisoners.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
26.0 Supplies and materials	\$25,990	\$21,099	\$16,074	-\$5,025

Supplies and Materials are defined as commodities that are: (a) ordinarily consumed or expended within one year after they are put into use; (b) converted in the process of construction or manufacture; (c) used to form a minor part of equipment or property; or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
31.0 Equipment	\$7,837	\$3,784	\$3,778	-\$6

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
42.0 Insurance Claims and Indemnity	\$3,232	\$2,394	\$2,559	\$165

Indemnity includes insurance claims and benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act.

**ERO - Criminal Alien Program Mission Statement**

The Criminal Alien Program (CAP) ensures that aliens are not released back into the community before they are removed from the United States. Through the CAP, ICE officers interview incarcerated aliens to determine whether they are amenable to immigration proceedings. If a case receives a final order of removal, ICE officers will immediately take that alien into custody upon completion of his or her criminal sentence and then prepare that case for removal.

**ERO - Alternatives to Detention Mission Statement**

The Alternatives to Detention program places low-risk aliens under various forms of intensive supervision or electronic monitoring rather than physical detention as a cost-effective way to ensure their appearance for an immigration hearing and for removal.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	12,718	13,065	31,145	18,080
11.3 Other than full-time permanent	64	57	57	-
11.5 Other personnel compensation	3,287	3,340	3,340	-
12.1 Benefits	6,435	6,538	9,175	2,637
<b>Total, Salaries &amp; Benefits</b>	<b>22,504</b>	<b>23,000</b>	<b>43,717</b>	<b>20,717</b>

Salaries and Benefits includes regular salaries and wages paid to civilian employees for full-time, part-time, temporary or intermittent employment; compensation above the basic rates paid directly to civilian employees such as overtime, holiday pay, night work differential, hazardous duty pay, supervisory differential, incentive awards, and royalties; and benefits including life insurance, health insurance, employee retirement, work injury disabilities, professional liability insurance, recruitment, retention and other incentives.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
23.1 GSA rent	\$1,788	\$1,877	\$1,971	\$94

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
23.3 Communications, utilities, and misc. charges	\$1,891	\$1,986	\$2,085	\$99

Communications, Utilities, and Miscellaneous Charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services, including Blackberry/pager/cellular phones.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.1 Advisory and assistance services	\$30,200	\$44,358	\$62,625	\$18,267

Advisory and Assistance Services include services acquired by contract from non-Federal sources (i.e. the private sector, foreign governments, state and local governments, tribes, etc.), as well as from other units within the Federal government.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.2 Other services	\$13,560	\$335	\$375	\$40

Other Services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25.

## **BUDGET REQUEST AND SUPPORTING INFORMATION**

### **U.S. Immigration and Customs Enforcement Automation Modernization**

#### **I. Appropriation Overview**

##### **A. Mission Statement for Automation Modernization:**

The U.S. Immigration and Customs Enforcement (ICE) Automation Modernization account includes Atlas Information Technology (IT) Infrastructure, Law Enforcement Systems Modernization, TECS Modernization, Detention and Removal Operations Modernization (DROM), Electronic Health Records (eHR), Financial System Modernization, and ICE Decision Support Systems (IDSS).

The Automation Modernization account allows ICE to improve information sharing with the Department of Homeland Security (DHS) and other partner organizations. These initiatives strengthen information availability, improve detainee tracking and preparation of travel documents, provide a fully secure IT environment, and enhance financial management and audit practices.

##### **B. Budget Activities:**

###### *Atlas IT Infrastructure*

The Atlas program integrates enforcement capability rooted in a “One DHS” vision that includes sharing information, coordinating systems for identifying threats, forging DHS-wide standards, and weaving together networks. To this end, the Atlas program seeks to create and sustain a secure, scalable IT environment that supports ICE law enforcement programs. Prior to 2008, the Atlas Program consisted of 8 major projects with 21 subprojects. By January 2009, 10 sub-projects were completed. To better align with the DHS IT strategic direction and to allow for more efficient management, the remaining sub-projects were realigned and Atlas was further expanded to include several new IT initiatives. The Atlas program currently consists of 3 projects with 11 associated subprojects. These projects improve infrastructure, consolidate and standardize IT equipment, improve IT products and services, and increase the security of equipment.

A description of current Atlas projects follows:

Infrastructure Modernization – This project was initiated to improve information-sharing across DHS and ICE, strengthen information availability, provide a fully secure IT environment, improve workforce productivity, and migrate ICE infrastructure to the DHS One Network.

Tactical Communications - This project is designed to modernize mission-critical tactical communications for ICE. This project will replace legacy tactical communications equipment and infrastructure with digital, encrypted, narrowband, Project 25-compliant systems. ICE will

design, engineer, acquire, integrate, program, install, test, and optimize its tactical wireless communications systems nationwide. Additionally, the TC project will provide infrastructure and subscriber unit training for ICE agents and officers, ensuring users understand how to use the modernized communications systems to support their mission-critical operations.

Cyber Security Modernization – This project will create a robust IT environment in which authentication is rigid. This rigidity greatly increases ICE’s capability to identify threats and respond in an effective manner to those threats. It also increases ICE’s ability to control security assurance and risk management decisions. This increased security control ensures that ICE will better protect its sensitive information, that critical IT resources are available to its workforce when needed, and that information integrity is maintained.

#### Law Enforcement Systems Modernization

This initiative includes the following projects:

TECS Modernization – This system will modernize the existing TECS functions that are specific to ICE. These include Investigative Case Management (including Bank Secrecy Act data access, Money Laundering reporting and tracking, and Telephone Link analysis), Intelligence Reporting and Dissemination, Management Reporting and Workflow, Security and Oversight, Shared Services, Data Management, and Infrastructure Acquisition and Deployment. TECS modernization is a joint U.S. Customs and Border Protection and ICE initiative.

Mobile Automated Biometric Identification System (IDENT) – This project gives ICE agents the ability to identify and process an individual in the field using mobile processing units. Currently, suspected illegal aliens are transported to brick and mortar facilities for fingerprint identification. Mobile IDENT provides near real-time identification of aliens, decreases transportation costs, and increases officer safety by reducing the number of instances of alien transport.

ICE Pattern Analysis and Information Collection System (ICEPIC) – ICEPIC provides the capability to generate statistics, enact geospatial data, and link analysis for criminal and terrorist activities. ICEPIC is also the part of the information-sharing initiative that allows the integration of all law enforcement data into a single repository and allows the data to be shareable to local, State, and Federal law enforcement agencies.

ICE ACCESS – This initiative provides the resources to help ICE’s State and local partners in the ICE ACCESS program and will integrate ICE information on gangs with U.S. Department of Justice’s gang database.

Law Enforcement Information Sharing System (LEISS) - ICE is the steward for DHS in the Law Enforcement-Shared Mission Community space and is responsible for development, coordination, and support of policies, procedures, and processes that facilitate the mission and the DHS Secretary’s priorities for information sharing.

Intelligence Support – This initiative will fund improvements to ICE’s IT for its intelligence programs. This includes the migration of Data Analysis and Research for Trade Transparency

System and Cyber Crimes Center (C3) into the enterprise solution. This initiative will fund the maintenance of hardware and software for cyber-crime investigations, the National Child Victim Identification System, e-crimes, overt and covert networks, and an upgrade to the Digital Forensic Lab.

International Affairs Modernization – This initiative will fund the modernization of the tools currently being used to screen visa applicants at consular offices overseas.

Forensic Document Lab (FDL) – This modernization project will fund the expansion of the technology infrastructure for the FDL Automated Document Library System. The FDL provides tools and information to ICE agents performing criminal investigations. The modernization of the FDL will ensure applications and tools are available to the agents and will improve information-sharing capabilities and will ensure the systems are incorporated into the FDL enterprise.

#### *DRO Modernization (DROM)*

This initiative supports the system upgrades and improvements of Enforcement and Removal Operations (ERO), as well as supports the requirements of DHS in providing a secure border. DROM will effect improvements in the areas of real-time dynamic data reporting, detainee management, management of detention beds and tracking detainees, bed-space availability management, and transportation management for detention and removals. Through the system upgrades and improvements, the ICE Office of the Chief Information Officer (OCIO) continues to support ERO with effective, responsive, and accurate computer and control systems that advance the ERO mission.

#### *Electronic Health Records (eHR)*

The ICE Health Services Center (IHSC) serves as the health authority for ICE on all matters related to detainee healthcare. IHSC provides direct patient care at 24 facilities (housing approximately 50-60 percent of the detainee population) and authorizes managed care services to the remaining ICE detainees housed at more than 350 contracted detention facilities without on-site IHSC staff nationwide. The eHR initiative will provide enhanced medical documentation quality across all IHSC and Intergovernmental Service Agreement facilities; faster dissemination and improved exchange of detainee health information; and improved data quality and access to support trend analysis, as well as the identification of national and global public health threats.

#### *Modernization of Financial Systems (MFS)*

The MFS initiative supports the DHS enterprise-wide initiative of consolidating a number of financial systems. This initiative will assist ICE in achieving and sustaining unqualified financial audit opinions and performing effective financial management.

ICE Decision Support Systems (IDSS)

The IDSS facilitates business and organizational decision-making activities across the ICE enterprise. This program is the sponsor of the IDSS, which provides ICE law enforcement users with information-sharing capabilities by addressing information sharing and applications interoperability. IDSS is the program’s vehicle for providing self-service reporting and analysis at users’ fingertips, allowing decision makers to spend less time looking for answers and more time making strategic decisions. This initiative will assist law enforcement agents and ICE decision makers in collecting and generating data to aid them in their investigative, intelligence, and case management activities.

**C. Budget Request Summary:**

ICE requests \$30,500,000 to continue the modernization of its information technology and systems infrastructure for the following program initiatives:

**Information Technology Improvements.....\$30.500M (0 FTE)**

- **DRO Modernization (\$4.0M):** This request will fund the ENFORCE Alien Removal Module (EARM) v4, which will provide data to State and local law enforcement to help identify, process, and detain immigration offenders. Specifically, DROM will complete development of the EARM-Executive Office for Immigration Review (EOIR) system-to-system interface. The new interface will provide EOIR with real-time access to detainee case information in support of court-based activities and actions.
- **Electronic Health Records (\$3.50M):** This request will support partial development of interfaces with key DHS systems, such as EARM, as well as with key external systems, such as the Bureau of Prisons’ Sentry system. The requested funding will also support initial development of an integrated electronic medical records system with basic core functionality for clinic support.
- **Law Enforcement Systems Modernization (\$23.0M):** This request will fund TECS Modernization, a joint CBP and ICE initiative supporting investigative information sharing that is scheduled for completion in FY 2015.

## II. Summary of FY 2013 Budget Estimates by Program/Project Activity (PPA)

### Department of Homeland Security U.S. Immigration and Customs Enforcement Automation Modernization

### III. Current Services Program Description by PPA

**Department of Homeland Security  
U.S. Immigration and Customs Enforcement  
Automation Modernization  
Program Performance Justification  
(Dollars in Thousands)**

**PPA: Automation Modernization**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	<b>36</b>	<b>36</b>	<b>73,762</b>
<b>2012 Enacted Budget Authority</b>	-	-	<b>21,710</b>
2013 Adjustments-to-Base	-	-	(21,710)
<b>2013 Current Services</b>	-	-	-
2013 Program Change	-	-	30,500
<b>2013 Total Requested Budget Authority</b>	-	-	<b>30,500</b>
Total Change 2012 to 2013	-	-	8,790

**CURRENT SERVICES PROGRAM DESCRIPTION:**

In FY 2013, ICE requests \$30.5 million for Automation Modernization to enable ICE to improve information sharing with the Department of Homeland Security (DHS) and other partner organizations. This request reflects a change of \$8.8 million from the FY 2012 enacted amount, including a reduction of \$21.7 million for the termination of one-time costs and a program change increase of \$30.5 million. The program change of \$30.5 million (described more fully in the program change section) will fund continued development of IT systems for detention and removal operations, electronic health records and law enforcement systems. The Automation Modernization initiatives strengthen information availability, improve detainee tracking and preparation of travel documents, provide a fully secure IT environment, and enhance financial management and audit practices across ICE.

<b><u>QHSR Alignment</u></b>
<b>3.1</b> Strengthen and Effectively Administer the Immigration System
<b>3.2</b> Prevent Unlawful Immigration

**Program Description**

There are seven ICE Automation Modernization initiatives.

### Atlas IT Infrastructure (AITI)

The Atlas program integrates enforcement capability rooted in a “One DHS” vision that includes sharing information, coordinating systems for identifying threats, forging DHS wide standards, and weaving together networks. To this end, the Atlas program seeks to create and sustain a secure, scalable IT environment that supports ICE law enforcement programs. These projects improve infrastructure, consolidate and standardize IT equipment, improve IT products and services, and increase the security of equipment.

### Law Enforcement Systems Modernization (LESM)

To address shortcomings identified after the attacks of 9/11/2001, the Federal Government has been working to share law enforcement information with state, local, tribal, and international law enforcement partners. In order to meet this mandate, ICE is modernizing critical law enforcement information systems. The LESM program will increase efficiency and effectiveness by providing improved information-sharing capabilities. LESM includes a number of case management, information sharing, and operational support service projects that will improve ICE law enforcement personnel access to critical law enforcement information. This information will allow agents to build more solid cases, enforce immigration laws, and share information with other agencies and partners.

### TECS Modernization

This initiative will modernize the existing TECS functions that are specific to ICE. These include Investigative Case Management (including Bank Secrecy Act data access, Money Laundering reporting and tracking, and Telephone Link analysis), Intelligence Reporting and Dissemination, Management Reporting and Workflow, Security and Oversight, Shared Services, Data Management, Infrastructure Acquisition and Deployment. TECS modernization is a joint U.S. Customs and Border Protection (CBP) and ICE initiative.

### DRO Modernization (DROM)

This initiative supports the system upgrades and improvements of Enforcement and Removal Operations (ERO), as well as supports the requirements of DHS in providing a secure border. DROM will effect improvements in the areas of real-time dynamic data reporting, detainee management, management of detention beds and tracking detainees, bed-space availability management, and transportation management for detention and removals. Through the system upgrades and improvements, the ICE Office of the Chief Information Officer (OCIO) continues to support ERO with effective, responsive, and accurate computer and control systems that advance the ERO mission.

### Electronic Health Records System (eHR)

The ICE Health Services Corps (IHSC) serves as the health authority for ICE on all matters related to detainee healthcare. IHSC provides direct patient care at 21 facilities (housing approximately 50-60 percent of the detainee population) and authorizes managed care services to the remaining ICE detainees housed at more than 350 contracted detention facilities without on-site IHSC staff nationwide. The e-HR initiative will provide enhanced medical documentation quality across all IHSC

and Intergovernmental Service Agreement (IGSA) facilities; faster dissemination and improved exchange of detainee health information; and improved data quality and access to support trend analysis, as well as the identification of national and global public health threats.

#### Modernization of Financial Systems (MFS)

The MFS initiative supports the DHS enterprise-wide initiative of consolidating a number of financial systems. This initiative will assist ICE in achieving and sustaining unqualified financial audit opinions and performing effective financial management.

#### ICE Decision Support Systems (IDSS)

The IDSS project facilitates business and organizational decision-making activities across the ICE enterprise. This project provides ICE law enforcement users with information-sharing capabilities by addressing information sharing and applications interoperability. IDSS is the program's vehicle for providing self-service reporting and analysis at users' fingertips, allowing decision makers to spend less time looking for answers and more time making strategic decisions. This initiative will assist law enforcement agents and ICE decision makers in collecting and generating data to aid them in their investigative, intelligence, and case management activities.

### **FY 2013 Planned Activities**

#### TECS Case Management Modernization (CM-M)

ICE will initiate design and development activities for Release 1.0 Core Case Management (CCM) capabilities and complete Critical Design Review (CDR) and Test Readiness Review (TRR). ICE will also develop a deployment strategy for Release 1.0 of CCM and award the Training Implementation contract and conduct training activities for Release 1.0. TECS CCM will seek System Definition Review approval from ICE OCIO Architecture. Finally, ICE will complete Data Migration from the Legacy TECS system to the target database and initiate design activities for subsequent CCM releases.

#### DRO Modernization (DROM)

ENFORCE Alien Removal Module (EARM) – ICE will add cash bonds processing and digital bond documentation to EARMs to reduce alien preparation and processing time. Secondly, ICE will incorporate threat levels to national security into EARM and provide automated business rules to appropriately classify detainees. Finally, ICE also will integrate the Risk Intake Classification Assessment (RCA) with EARM and the DROM portfolio. The enhancements to EARM will allow for a services interface to the Executive Office for Immigration Review (EOIR), which will enable real-time access to case information in support of court-based activities and actions.

Alternatives to Detention (ATD) – ICE will enhance its ATD tracking system to display upcoming appointment dates on the ATD Active Report so that activities occur seamlessly.

Electronic Travel Documents (eTD) – ICE will enhance the eTD application to meet security and Section 508 requirements and allow Statistical Tracking Unit to generate reports via IDSS. ICE will

also enhance the eTD interface by creating and managing travel documents through EARM, which will improve consistency and quality of ad hoc analytical reporting, eliminate duplicate travel document requests, and enhance dashboard reporting. Finally, ICE will roll out the eTD application to the Micronesian countries and Costa Rica.

**Electronic Health Records (eHR)**

ICE will acquire and deploy an ONC/CCHIT Complete Ambulatory eHR (Increment 1) to all 22 IHSC-staffed facilities, to include support for: 1) Delivery of Care and Detainee intake processing/screening (admissions); 2) Scheduling (appointments), referrals, and task lists; 3) Computerized Provider Order Entry (CPOE) – medications, diets, special needs; 4) Delivery of care (encounters) and provider notes using a SOAP (Subjective, Objective, Assessment, and Plan) structure; and 5) Detainee transfer clearances and transfer medications. ICE will also implement a Medication Management (pharmacy) system, replace the existing Kalos CIPS™ or upgrade it, and integrate the system to support the five medication rights (right patient, right medication, right dosage, right time, and right delivery mechanism). Finally, ICE will address Quality of Care in two areas: 1) Basic CPOE for procedure authorizations and prescriptions through validation of medication delivery and medical administration; and 2) Better data that complies with accrediting bodies and sharing with ICE for case management purposes.

**Budget Change FY 2012 – FY 2013**

<b>Total Request</b>	-	-	<b>6,720</b>	-	-	<b>6,720</b>	-	-	<b>4,000</b>

### Description of Item

The Detention and Removal Operations Modernization (DROM) Program is an initiative intended to modernize the Enforcement and Removal Operations (ERO) IT systems. The major goal of DROM is to streamline its existing system in order to minimize the length of detention, increase bed space utilization, and increase removals of aliens ordered removed from the United States. The program and requisite projects ensure ERO has the technical ability to continue to meet DHS goals and continue to contribute in supporting: the DHS Border Security Program; the 287(g) program by providing state and local law enforcement officers' support in identifying, processing, and when appropriate, detaining immigration offenders; the Criminal Alien Program by identifying criminal aliens while incarcerated and providing automated processing to remove aliens upon prison release; and other ICE enforcement initiatives.

*Non-Personnel Costs (\$4.0 million):*

Enforce Alien Removal Module (EARM) V.4 - Performance enhancements to the EARM application and database will address capacity challenges to the system's infrastructure. The enhancements to EARM provide greater utilization and productivity of the system and enable ERO to perform automated business processes in a timely and efficient manner.

## **Justification**

This funding will add to the ERO systems functionality in supporting the business needs of the organization. These systems will be better integrated and reduce the creation of duplicate sources of data that contribute to better data quality, reliable performance, and better decision support metrics.

The DROM Program was initiated to improve the effectiveness of ERO and strengthen ERO alignment with the Border Security Program. The DROM Program modernizes ERO IT systems and automates manual processes with highly scalable robust IT solutions. As a result, the DROM Program is focused on closing the following performance gaps:

- Integration & Information Sharing;
- Systems Automation;
- Systems Flexibility;
- Trend Analysis & Resource Management; and
- Data Quality.

In FY 2013, DROM will complete development of the EARM-Executive Office for Immigration Review (EOIR) system-to-system interface. The new interface will provide EOIR with real-time access to detainee case information in support of court-based activities and actions. These data provide courtroom officials real-time detainee information that aids in preventing the release of detainees that may pose a threat. Additional enhancements to the EARM application and database will address capacity challenges to the system's infrastructure. The enhancements to EARM provide greater utilization and productivity of the system and provide ERO with the ability to perform automated business processes in a timely and efficient manner. This allows agents to spend more time in the field as opposed to performing administrative duties.

These enhancements are critical to increasing efficiencies in the detention and removal process. The funding will allow ERO to complete automated business processes and provide EOIR real-time detainee case information in support of court-based activities and actions.

## **Impact on Performance (Relationship of Increase to Strategic Goals)**

The DROM Program was established to oversee the systems upgrades and improvements of ICE ERO business processes for the detention and removal of illegal aliens from the United States. Specifically, the DROM program is designed to improve:

- real-time reporting, statistics, and metrics on detainees through the detention and removals life cycle;
- detainee case management and tracking;
- detainee bed-space availability management; and
- transportation management.

Automating the tracking process will result in benefits in collecting and retrieving detainee location information. By implementing a modern tracking system with data in electronic format, retrieval will become considerably easier. ERO will be able to answer questions from courts, trace individuals with contagious diseases, and get accurate counts on bed space usage. The new solution will provide the

following abilities:

1. *Identify current detainee location:* Through automatic tracking, the majority of manual data entry activities will be eliminated resulting in a more efficient process and more accurate records. Real-time access to detainee location also improves operational efficiency because less time is spent trying to locate detainees.
2. *Track detainee movement:* Electronic records support more accurate and efficient retrieval of detainee movement and reporting information becomes less of a burden on ERO resources. When combined with case management data or compared to detention standards, detainee location data can improve the overall efficiency and effectiveness of operations.
3. *Identify detainees:* Through biometrics, detainee identification can be verified at more points during the detention and removal life cycle and also verify that the correct detainee is selected for transport.
4. *Validate the length of detention at a facility.*
5. *Improved reporting:* Reports will provide advanced views about detainee population characteristics and improve management and forecasting of the detainee population. The system will be able to report on adherence to detention standards by location, length of detention, and detainee population by characteristics.

The DROM release schedule is as follows:

FY2011				FY2012				FY2013			
Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4
			<p>EARM v3.2</p> <p>EARM v4.0</p>								
					<p>EARM (new enhancements, e.g., RCA)</p>				<p>EARM (enhanced capabilities)</p>		

**Department of Homeland Security**  
**U.S. Immigration and Customs Enforcement**  
**Automation Modernization**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 1:** Electronic Health Records  
PPA:  
Program Increase: Positions 0, FTE 0, Dollars \$3,500

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	3,500
<b>Total Request</b>	-	-	<b>8,420</b>	-	-	<b>8,420</b>	-	-	<b>3,500</b>

**Description of Item**

The objective of the Electronic Health Records (eHR) System is to replace multiple systems and manual processes with a centralized eHR system that supports comprehensive medical services management for ICE detainees. The eHR System will enable full life cycle oversight and management of detainee healthcare. Extensions and new capabilities will be delivered on an annual basis after the initial release. The centralized eHR system will:

- streamline the care provided to detainees;
- automate medical documentation reducing staff paper workloads;
- enhance Immigration Health Services Corps (IHSC) medical management and oversight;
- enhance the standardization of care provided to detainees;
- reduce risk and legal liability of the overall system; and
- improve the accuracy and timeliness of Enforcement and Removal Operations (ERO) and IHSC metrics.

*Non-Personnel Costs (\$3.5 million):*

Key System Interfaces (\$1.5 million) - funding will support partial development of interfaces with key DHS systems, such as EARM, as well as with key external systems, such as the Bureau of Prisons' Sentry system.

Development of eHR Core Module (\$2.0 million) - funding will support initial development of an integrated electronic medical records system with basic core functionality for clinic support.

## **Justification**

Medical encounters with detainees are recorded in paper-based systems and disparate IT applications throughout the ICE environment. The requested funds will increase application interoperability integration, and information availability between sites. Additionally, the funding will support critical components available in current Health Information Technology (HIT) systems needed to become certified by the (federally endorsed) Commission on the Certification of Health Information Technology (CCHIT) as well as meet compliance with the 2004 Executive Order, President's Health Information Technology Plan, and other applicable HIT guidelines.

The FY 2013 request will provide the needed capability for ERO to increase the speed and efficiency of submittal and approval of treatment authorization requests (TARs), and to interface with other Federal systems (e.g., ENFORCE, the Bureau of Prisons' Sentry, and Plexus) necessary to track detainees across multiple instances of detention.

Funding is requested to:

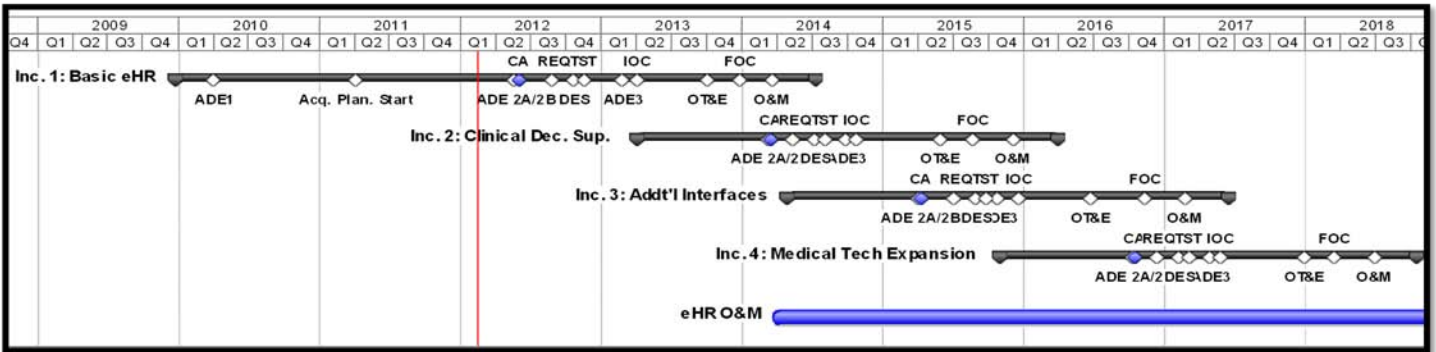

1. Remediate quality-of-care issues and duplicative costs, such as those identified in the 2008 DHS Office of Inspector General (OIG) report (OIG-08-52);
2. Improve current systemic problems, including:
  - a. Inadequate medical and data-tracking to manage care and compliance with detention standards;
  - b. Medical and custody decision-making information not available on a timely basis;
  - c. Significant risk of avoidable medical errors delivering detainee health care; and
  - d. Deployed detection of potentially serious public health issues.
3. Replace obsolete, legacy Health IT applications (CaseTrakker, MedEZ, CIPS); and
4. Improve medical operational effectiveness and efficiency.

## **Impact on Performance (Relationship of Increase to Strategic Goals)**

The objective of the eHR Program is to acquire and deploy a new system that supports comprehensive medical services management for ICE detainees, which will replace multiple systems and manual processes by leveraging advancements in the Health Care IT Industry.

Estimated eHR milestone schedule:

## Program Level

## eHR-S Increment-1 Project Level

**Program Increase 1:** Law Enforcement Systems Modernization  
PPA:  
Program Increase: Positions 0, FTE 0, Dollars \$23,000

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	23,000
<b>Total Request</b>	-	-	<b>23,906</b>	-	-	<b>23,906</b>	-	-	<b>23,000</b>

**Description of Item**

The ICE Law Enforcement Systems Modernization (LESM) initiative includes a number of case management, information-sharing, and operational support projects that will improve ICE law enforcement personnel’s access to law enforcement information.

*Non-Personnel Costs (\$23.0 million)*

TECS Modernization - The ICE TECS Modernization program will focus on implementing Core Case Management (CCM) functionality and discontinuing the use of the legacy TECS mainframe by FY 2015. Any existing legacy TECS functionality that is not part of CCM will be deferred to a later release. This will allow ICE to target a CCM system that supports its mission and avoids incurring an annual \$23.6 million legacy TECS operations and maintenance (O&M) cost.

**Justification**

Funding for the LESM initiative will provide ICE with improved interoperability with DHS and other Federal law enforcement and homeland security intelligence analysis toolsets; enhanced quality law enforcement information sharing within and external to DHS; and improved collection of more consistent, timely, and accurate performance information on law enforcement activities and outcomes. It will expand the ability of DHS to collect data using Federal standardized data formats and support investigators with a primary source for information sharing within the Information Sharing Environment and national law enforcement (LE) community.

The TECS Modernization effort will support the investigative arm of ICE and update a 20-year-old legacy system, giving ICE improved capabilities for case management, money laundering tracking and reporting, telephone analysis, intelligence reporting and dissemination, Bank Secrecy Act data access, information sharing of subject record data, and statistical/performance reporting.

ICE will save an annual \$23.6 million legacy TECS O&M cost when the functionality specific to the ICE mission is moved off the mainframe by the time CBP discontinues its use of legacy TECS.

### **Impact on Performance (Relationship of Increase to Strategic Goals)**

The modernized TECS system will strengthen and unify DHS O&M by increasing interoperability and improving operations, resource utilization, and management decision making.

Some of the most important TECS Modernization functional improvements are:

- Information sharing and access with other law enforcement agencies (Federal, tribal, State and local);
- Search capabilities through structured and unstructured queries;
- Data quality and integration through auto population of data between systems and removal of duplicate data entry;
- Case management functionality by visually linking subjects and personalizing user homepage for quick access to desired information;
- Deliver intelligence-driven and other situational data to the front line;
- Automate support for investigative, law enforcement, and intelligence reporting and dissemination of unclassified information; and
- Update user interface to streamline processes and simplify user interactions.

Additional technical improvements include:

- Interoperability with other systems;
- Alignment to DHS/ICE architecture standards for long-term sustainability;
- Reduced support costs and flexibility to quickly meet evolving mission needs; and
- An environment with limited planned outages.

**V. Exhibits and Other Supporting Material**  
**A. Justification of Proposed Legislative Language**

For expenses of immigration and customs enforcement automated systems, [\$21,710,000] \$30,500,000 to remain available until September 30, [2016] 2017.

*(Department of Homeland Security Appropriations Act, 2012.)*

### Automation Modernization Mission Statement

In FY 2013, ICE has included three information technology (IT) transformational initiatives in the Automation Modernization program: ICE Law Enforcement Systems Modernization - TECS Modernization, Detention and Removal Operations Modernization, and Electronic Health Records. The Automation Modernization program will allow ICE to improve information sharing across the DHS and ICE organizations, strengthen information availability, improve detainee tracking and preparation of travel documents, provide a fully secure IT environment, and enhance financial management and audit practices.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	520	-	-	-
11.5 Other personnel compensation	6	-	-	-
12.1 Benefits	157	-	-	-
<b>Total, Salaries &amp; Benefits</b>	<b>683</b>	-	-	-

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
21.0 Travel	\$84	\$276	\$188	-\$88

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
22.0 Transportation of Things	\$165	0	\$1	\$1

Transportation of Things includes all costs of the care of such things while in the process of being transported, and other services incident to the transportation of things.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
23.2 Other rent	\$125	\$11	\$15	\$4

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
23.3 Communications, utilities, and misc. charges	\$54	\$51	\$53	\$2

Communications, Utilities, and Miscellaneous Charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services, including Blackberry/pager/cellular phones.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.1 Advisory and assistance services	\$50,104	\$19,888	\$28,140	\$8,252

Advisory and Assistance Services include services acquired by contract from non-Federal sources (i.e. the private sector, foreign governments, State and local governments, Tribes), as well as from other units within the Federal Government. Because of the reduction in appropriation for Automation Modernization, ICE has subsequently reduced the amount spent on advisory and assistance services, which funds most IT system development activities.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
26.0 Supplies and materials	\$12	\$6	\$9	\$3

Supplies and Materials are defined as commodities that are: (a) ordinarily consumed or expended within one year after they are put into use; (b) converted in the process of construction or manufacture; (c) used to form a minor part of equipment or property; or (d) other property of little monetary value that does not meet any of the three criteria listed, at the option of the agency.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>31.0 Equipment</b>	\$10,990	\$1,478	\$2,094	\$616

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **U.S. Immigration and Customs Enforcement Construction**

### **I. Appropriation Overview**

#### **A. Mission Statement for Construction:**

Immigration and Customs Enforcement (ICE) maintains 18 ICE-owned and directly leased facilities and provides housing, processing, medical, administrative, and support facilities needed to assist and meet the needs of Enforcement and Removal Operations (ERO) and other ICE programs and Department of Homeland Security (DHS) tenants. The construction account funds are available until expended.

#### **B. Budget Activities:**

With the Construction account, ICE has the authority to plan, design, and construct housing and processing, medical, administrative, and support facilities to support the detention of aliens, as well as perform repair and alteration of existing structures.

#### **C. Budget Request Summary:**

ICE requests \$5 million to fund critical repairs and maintenance. Critical projects include: items that pose a life, health or safety issue, items such as adding additional space in processing, medical, administrative, and support facilities, and capital and non-capital improvement projects to replace critical systems that are approaching their maximum life expectancy.

<b>2013 Total Requested Budget Authority</b>	-	-	<b>5,000</b>
Total Change 2012 to 2013	-	-	5,000

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Construction resources are authorized for necessary expenses to plan, construct, renovate, equip, maintain, and repair ICE-owned facilities necessary for administration and enforcement of the laws relating to customs and immigration. These ICE-owned facilities support the detention of aliens including general housing, medical screening, processing, administrative support and legal proceedings. These facilities accommodate approximately 4,000 ICE detainees, approximately 12 percent of the total population. In addition, ICE-owned facilities are utilized to support ICE field operations such as investigations, legal and administrative support functions. This includes Homeland Security Investigations, the Office of the Principal Legal Advisor, the Office of Professional Responsibility, the National Firearms Tactical Training Unit, and others.

The ICE-owned portfolio consists of approximately 1.5 million square feet of space at eighteen (18) sites.

Enforcement Removal Operations (ERO), as the primary tenant, operates Service Processing Centers (SPCs) and related mission operations at six of the ICE-owned sites. The active SPC locations are: Batavia, New York; El Centro, California; El Paso, Texas; Florence, Arizona; Miami, Florida; and Los Fresnos, Texas.

Other ICE-owned facilities include space for Border Enforcement Security Task Forces (BEST), Criminal Alien Program (CAP) teams, the National Firearms Tactical Training Unit, and tactical communications and other office space at these locations for ICE programs: Aguadilla, Puerto Rico; San Pedro, California; Altoona, Pennsylvania; Broadview, Illinois; Calipatria, California; Fishkill,

New York; Guam; Honolulu, Hawaii; Huntsville, Texas; Oakdale, Louisiana; St. Thomas, U.S. Virgin Islands; and St. Croix, U.S. Virgin Islands.

ICE Construction Program funds are multi-year, non-expiring funds. For the past 3 years, ICE has reviewed prior year spending to recover and redirect funds to accomplish critical repair and maintenance projects. Critical projects include the repair, replacement or alteration of facilities to address health and safety as well as mission-critical operational issues. Additionally, capital improvement projects are needed to replace critical systems that are approaching or have exceeded their maximum life expectancy (deferred maintenance). This includes updating mechanical systems and other important infrastructure necessary to maintain ICE operations.

In FY 2013, ICE will use any available carry-forward funds and \$5 million in new funding to perform the most-critical repairs and alterations to maintain ICE-owned facilities. As discussed below, ICE has identified the current most-critical projects that will be prioritized and completed in FY 2013; this could change on the basis of any health, life, or safety issues that may arise.

### Description of Item

The ICE Construction Program supports ICE Enforcement and Removal Operation (ERO), Homeland Security Investigations, the Office of the Principal Legal Advisor, the Office of Professional Responsibility, and the National Firearms Tactical Training Unit. The program provides funds to build, maintain, and repair ICE-owned operational facilities, such as medical screening, processing, administrative, housing, and support facilities, needed to support the detention of and processing of aliens.

The ICE-owned portfolio consists of approximately 1.5 million square feet of space at eighteen (18) sites. ERO, as the primary tenant, operates Service Processing Centers (SPCs) and related mission operations at six ICE-owned sites. These facilities accommodate approximately 4,000, or 12 percent, of ICE detainees. The other 12 owned locations are used to house and support ICE field operations such as the Border Enforcement Security Task Force, Criminal Alien Program, and other investigations, legal, and administrative staff.

ICE requests \$5 million to provide for critical maintenance and repairs at these facilities.

## **Justification**

ICE Construction Program funds are multi-year non-expiring funds. ICE has diligently reviewed prior fiscal year spending to recover and redirect funds to accomplish most critical repairs for the last 3 years.

Critical projects include the repair, replacement or alteration of facilities to address health and safety as well as mission-critical operational issues. Additionally, capital improvement projects are needed to replace critical systems that are approaching or have exceeded their maximum life expectancy (deferred maintenance). This includes updating mechanical systems and other important infrastructure necessary to maintain ICE operations.

ICE requests \$5 million to address 20 percent of the most-critical maintenance and repair projects that pose a threat to the life and safety of detainees and ICE employees at ICE-owned facilities.

The request will provide for the following projects; these could change on the basis of any health, life, or safety issues that may arise:

<b><u>Facility</u></b>	<b><u>Work Description</u></b>	<b><u>Project Type</u></b>	<b><u>Project Cost</u></b>
Batavia (SPC)	Replace failing heating, ventilation, and air conditioning (HVAC) mechanical systems. Recommended replacement frequency is 10 years. Current system is more than 20 years old.	Critical Deferred Maintenance	\$1,340,000
El Centro (SPC)	Repair and replace deteriorating road and parking infrastructure. Extreme temperature and high volume of traffic is causing accelerated replacement cycle. Repair and re-surface requirement should be every 10 years	Critical Deferred Infrastructure Maintenance	\$650,000
El Paso (SPC)	Install security bi-fold gates at Sally Port and modify compound fencing to improve operations security and safety.	Operational Security	\$600,000
Honolulu	Emergency generator for back-up power to the ICE facility. This is an operational security requirement critical to maintain the detention operation.	Operational Security	\$500,000
Port Isabel (SPC)	Replace perimeter fence line. Proximity to ocean causes corrosion and deterioration. Fencing replacement cycle is 10 years. Existing fence is past the 10-year cycle and is rapidly deteriorating.	Operational Security	\$500,000

Florence (SPC)	Repair and replace deteriorating road and parking infrastructure. Extreme temperature and high volume of traffic is causing accelerated replacement cycle. Repair and re-surface requirement is every 10 years.	Critical Deferred Infrastructure Maintenance	\$450,000
El Paso (SPC)	Repair and replace deteriorating road and parking infrastructure. Extreme temperature and high volume of traffic is causing accelerated replacement cycle. Repairs and re-surface requirement is every 10 years.	Critical Deferred Infrastructure Maintenance	\$300,000
Port Isabel (SPC)	Replace failing HVAC mechanical systems. Recommended replacement frequency is 10 years. Current system is past the 10-year life cycle.	Critical Deferred Maintenance	\$175,000
El Centro (SPC)	Repair/replace complex lighting system to improve site operations security. Current lighting system does not provide enough lumens to provide adequate visibility.	Operational Security	\$150,000
El Paso (SPC)	Construct additional restrooms (male and female) to increase capacity. Current restroom configuration does not meet Americans with Disabilities Act (ADA) standards.	Health and Safety	\$125,000
El Paso (SPC)	Add facility perimeter lighting to improve safety and operations security. Current lighting system does not provide enough lumens to provide adequate visibility.	Health and Safety & Operational Security	\$125,000
El Centro (SPC)	Replace aging oil/water separator. Environmental contamination could occur if the separator is not functioning properly.	Health and Safety	\$85,000
<b>TOTAL</b>			<b>\$5,000,000</b>

**Impact on Performance (Relationship of Increase to Strategic Goals)**

At the requested \$5 million funding level, ICE will remediate the most egregious issues listed in the preceding table. ICE will work to identify recoveries of prior year funds to put toward remaining critical repair and maintenance projects.

## **V. Exhibits and Other Supporting Material**

### **A. Justification of Proposed Legislative Language**

*For necessary expenses to plan, construct, renovate, equip, and maintain buildings and facilities necessary for the administration and enforcement of the laws relating to customs and immigration, \$5,000,000, to remain available until expended.*

## B. FY 2012 to FY 2013 Budget Change

## **G. Capital Investment and Construction Initiative Listing**

The Illegal Immigration Reform and Immigrant Responsibility Act of 1996 and other immigration statutes authorize ICE to detain aliens who are charged with immigration violations, have entered the United States illegally, or have been ordered to leave the country. These aliens can be detained while their immigration proceedings are administered, which in turn facilitates their proper and expedient removal from the country.

The ICE Construction Program provides construction, maintenance, sustainment, and expansion of housing, processing, medical, administrative, and support facilities needed to support the detention of aliens. These projects are part of an ongoing capital investment program that is intended to meet the growing national demand for detention capacity. ICE continues to address the need for bed space and support facilities required to handle the processing and removal of aliens during immigration proceedings, relative to the total number of potentially removable aliens in the country.

### **Facility Repair & Alterations**

#### **1. Project Description, Justification, and Scope**

Repair and alteration projects are continually identified at existing ICE-owned facilities. These projects are not capital construction projects, but maintenance, repair, and alteration projects necessary to maintain government-owned facilities and ensure they comply with life safety and code requirements in support to ICE tenant activities.

#### **2. Significant Changes**

In FY 2013, the no-year Construction account will be used for deferred maintenance, emergency repairs and alterations, and approved capital improvements. Only critical repairs will be funded.

#### **3. Project Schedule**

	<b>Work Initiated</b>	<b>Work Completed</b>	<b>Physical Start</b>	<b>Physical Complete</b>	<b>Total Estimated Cost (000)</b>	<b>Total Project Cost (000)</b>
FY 2013 Budget Request	N/A	N/A	10/01/2012	9/30/2013	\$5,000	\$5,000

**4. Schedule of Project Funding  
(Dollars in Thousands)**

	<b>Prior</b>	<b>FY 2011</b>	<b>FY 2012</b>	<b>FY 2013</b>	<b>Total</b>
Obligation (actual and planned)	\$5,000	\$16,476	\$0	\$5,000	\$26,476
Expenditure (actual and planned)	\$5,000	\$16,476	\$0	\$5,000	\$26,476

**5. Cost Estimate Detail and Changes  
(Dollars in Thousands)**

	<b>Current Estimate</b>	<b>Previous Estimate</b>
Construction: \$5,000		
Other costs: \$0		
Project total for FY13: \$5,000		

**6. Method of Performance**

All detention projects are currently planned, managed, and monitored by the ICE Chief Financial Officer, Office of Facilities Administration. ICE entered into a memorandum of understanding (MOU) with the United States Army Corps of Engineers (USACE) to provide environmental documentation, planning, design, construction, procurement, and project management services.

**7. Compliance with Applicable Public Laws, Regulations, Standards, and Executive Orders**

USACE is responsible for ensuring ICE projects comply with all applicable laws, codes, regulations, and standards. The services being provided by USACE are managed and monitored by ICE/OFA.

ICE projects must comply with the following life-safety codes and standards:

- Local building codes or the latest edition of one of the model building codes, and the most current International Building Code
- National Fire Protection Association Standard 101 Life Safety Code
- National Electric Code

ICE OFA must also comply with the ICE Detention Design Guidelines (2002 edition) and the ICE Detention Construction Guidelines (2004 edition).

Handicapped accessibility codes and standards apply to ICE facilities as follows:

- Facilities must comply with the Uniform Federal Accessibility Standards, Federal Standard 795
- Facilities must also comply with the Americans with Disabilities Act Accessibility Guidelines

## **BUDGET REQUEST AND SUPPORTING INFORMATION**

### **U.S. Immigration and Customs Enforcement Student Exchange and Visitor Program**

#### **I. Appropriation Overview**

##### **A. Mission Statement for Student Exchange and Visitor Program:**

The Student Exchange and Visitor Program's (SEVP's) mission is to enhance national security by collecting, maintaining, and providing reliable information on foreign students, exchange visitors, and the schools and exchange programs that host them. SEVP is an enforcement tool to assist in keeping our Nation safe while facilitating the participation of students and exchange visitors in the academic programs in the United States.

##### **B. Budget Activities:**

SEVP administers for the School Certification Program and manages the Student and Exchange Visitor Information System (SEVIS), a web-based system for maintaining information on international students and exchange visitors (F, M, and J visa classifications) in the United States. SEVP also provides outreach and training for SEVIS users. SEVIS is used by the Compliance Enforcement Unit (CEU) to identify foreign students and exchange visitors who fail to enroll or maintain status at their schools. The CEU also uses SEVIS to identify schools and exchange visitor programs that are not in compliance with regulatory requirements.

##### **C. Budget Request Summary:**

Immigration and Customs Enforcement (ICE) requests \$120 million, 387 positions, and 269 FTE for SEVP in FY 2013. The requested funds will provide the resources needed to fund base requirements for salaries and benefits and operational expenses. A portion of SEVP collections will be used to develop and redeploy an improved SEVIS, which will be known as SEVIS II. As discussed below, SEVIS II deployment has been delayed until November 2014.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Student Exchange and Visitor Program (SEVP) enhances national security by managing the collection, maintenance, and use of information regarding F and M nonimmigrant foreign students and J exchange visitors. SEVP certifies schools to enroll F and M students. The Department of State designates exchange visitor programs. SEVP facilitates F and M student participation in academic and vocational programs in the United States while ensuring that school certification is not used to permit aliens to illegally enter and reside in the United States. SEVP information, combined with information from law enforcement data systems, is fundamental to identify and investigate immigration benefit fraud perpetrated by individuals and schools or programs attempting to exploit or harm the United States and its people.

**QHSR Alignment**

**3.2**  
Prevent Unlawful Immigration

**ICE Strategic Plan Alignment**

**3.4**  
Protect the Integrity of the Immigration System

**Student and Exchange Visitor Program Highlights**

**School Recertification Program:** The Enhanced Border Security and Visa Entry Reform Act of 2002 mandated that the Department of Homeland Security (DHS) conduct recertification of certified schools every 2 years. SEVP reviews previously certified schools and adjudicates the recertification to affirm compliance with recordkeeping, retention, and reporting regulations and requirements. The focus of recertification is past performance coupled with a review to ensure that the school maintains its basic eligibility for initial certification. The process may include an on-site review. Approximately 10,368

schools have been certified by SEVP. As of the end of 2011, U.S. Immigration and Customs Enforcement (ICE) recertified 1,811 schools from the 2,667 schools that had successfully submitted a recertification package.

**Field Representatives:** SEVP has developed a Field Representative initiative to recruit and develop a highly trained nationwide cadre of Liaison Officers to coordinate the operation of the SEVIS system and the future deployment of SEVIS II. The Field Representatives will provide comprehensive training to ensure stakeholder understanding, acceptance, and compliance with immigration laws, regulations, and SEVP policies and procedures, as well as the stakeholder benefits of SEVIS and SEVIS II implementations. They will receive a regimen of training in all aspects of SEVP to provide full service to stakeholders regarding the application of immigration law with respect to SEVP and SEVIS II deployment. The Field Representatives will be located in ICE Special Agent-In-Charge offices across the United States to ensure proximity and availability to stakeholders including more than 10,000 SEVP certified schools. The Field Representative initiative will help SEVP establish a more proactive relationship with stakeholders that will foster communication, optimal compliance with immigration laws and regulations, and greater data integrity in SEVIS and SEVIS II.

*SEVP provides excellent customer service to law enforcement partners and fee contributors. The customer satisfaction rate of SEVIS users is 98 percent in an industry where 90 percent is the benchmark.*

**ICE Counterterrorism and Criminal Exploitation Unit (CTCEU)**

SEVP plays a key role in the efforts of ICE to prevent terrorists and other criminals from exploiting our Nation’s immigration and visitor system. The CTCEU, a part of ICE’s Homeland Security Investigations program, uses SEVIS data to identify F and M students and J exchange visitors who fail to enroll in school or their programs, maintain their status, or otherwise violate the terms of their visa status. CTCEU analyzes and refers school fraud criminal investigation leads to the respective ICE field office. It implements and manages an Agent/SEVIS School Outreach Program that educates others about potential SEVP exploitation. During Fiscal Year (FY) 2011, HSI Special Agents initiated 151 outreach presentations to SEVP-approved academic institutions nationwide. The program also improves communication between designated school officials and HSI field agents and provides subject matter expertise to partnering agencies when exploitation is suspected. In FY 2011, CTCEU analyzed 299,409 SEVP leads, an increase of 48 percent from FY 2010. CTCEU also responded to 190 requests for analysis to support major criminal cases. This is 27 percent higher than the 147 requests for analytical support in FY 2010.

**Student and Exchange Visitor Information System**

SEVP administers SEVIS, which allows ICE to collect, maintain, and provide information on foreign students, exchange visitors, and their dependents on F, M, and J visas while studying in the United States. SEVIS also maintains information on the schools and program sponsors authorized to use SEVIS and host F and M students and J exchange visitors. SEVIS assists in the identification of those who are not in compliance with visa rules and immigration law and who may be a threat to national security.

SEVIS is a web-based system that provides real-time, up-to-date information on F, M, and J visa holders. The system can be accessed at any time, making it an effective law enforcement tool used by other agencies within DHS and the Departments of State (DOS) and Justice. SEVIS is used by the ICE CTCEU to identify F and M students and J exchange visitors who fail to enroll or maintain status at their schools or programs. SEVP and CTCEU also use SEVIS to identify schools and exchange visitor programs that are not in compliance with regulatory requirements. Information maintained in SEVIS is instrumental in supporting ICE's role in conducting visa fraud and human smuggling investigations that identify and prosecute criminal organizations involved in the transporting and harboring of illegal aliens into the United States. In FY 2011, SEVP implemented three updates to SEVIS, adding functionality and improving performance.

### ***SEVIS II***

In FY 2011, SEVP continued the technical development of the second generation of SEVIS (i.e., SEVIS II) to fundamentally modernize information collection and tracking F, M, and J non-immigrants, SEVP-certified schools, and DOS-designated exchange visitor programs. SEVIS II will provide system interoperability to better meet the needs of the intelligence and enforcement communities and fundamentally improve capability to track and monitor individuals; integrate more seamlessly with other intelligence systems; provide real-time critical individual-based information; and eliminate critical vulnerabilities through interoperability with all stakeholder data systems to track and monitor individuals rather than records.

Because of repeated revisions to the SEVIS II development process as well as ongoing oversight of the SEVIS II acquisition by the Department's Acquisition Review Board, SEVIS II is currently planned for deployment in November 2014 at the earliest.

### **SEVP Fees**

All SEVP operations, including services provided by other ICE offices, are paid for by fees collected from students, exchange visitors, and schools. No appropriated funds are used to support SEVP. All prospective students and exchange visitors are required to pay an SEVP processing fee using the Form I-901 prior to seeking a visa at consulates and embassies overseas. Current fees are \$200 for F and M visa holders and \$180 or \$35 for J exchange visitors, depending on the purpose of their visit. This fee, in addition to the fees collected from schools seeking certification to host F and M students, provides the full funding for SEVP, including CTCEU agents that support enforcement of SEVP policies and regulations.

Statutory and regulatory guidance requires SEVP to review its fee structure every 2 years to ensure that the costs of the services that are provided are fully captured by fees assessed on those receiving the

services. The latest fee study was completed in the 2<sup>nd</sup> Quarter of FY 2011. The study concluded that no fee increase will be required for FY 2013 FY 2014.

### Student Exchange and Visitor Program Mission Statement

The Student and Exchange Visitor Program (SEVP) administers the School Certification Program and manages the Student and Exchange Visitor Information System (SEVIS), a web-based system for maintaining information on international students and exchange visitors (F, M, J visa classification) in the United States. SEVIS is designed to keep our nation safe while facilitating the participation of students and exchange visitors seeking to study in the United States.

<b>BUDGET REQUEST AND SUPPORTING INFORMATION</b>
--

**U.S. Immigration and Customs Enforcement  
Breached Bond Detention Fund**

**I. Appropriation Overview**

**A. Mission Statement for Breached Bond Detention Fund:**

The Breached Bond Detention Fund was authorized in Section 112 of the Department of Justice Appropriations Act of 1993 (P.L. 102-395). The Act amended Section 286 of the Immigration and Nationality Act of 1952, as amended, by establishing, in the General Fund of the Treasury, a separate account to be called the Breached Bond Detention Fund. The first \$8 million in breached cash and surety bonds collected are allocated to the General Fund. All collections in excess of \$8 million are deposited as offsetting collections into this fund.

**B. Budget Activities:**

Amounts deposited into the Breached Bond Detention Fund can be used for expenses incurred in the collection of breached bonds, bond management, litigation activities to obtain compliance from surety companies found to be delinquent in their obligations, and for expenses associated with the detention of criminal and illegal aliens. Funds remain available until expended.

**C. Budget Request Summary:**

For FY 2013, ICE requests \$75 million for new collections and corresponding spending authority. ICE uses this money as part of its overall detention budget, and in FY 2013, this funding will allow ICE to fund an estimated 1,460 detention beds and related costs such as healthcare and compliance oversight.

<b>2013 Total Requested Budget Authority</b>	-	-	<b>75,000</b>
Total Change 2012 to 2013	-	-	-

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Breached Bond Detention Fund is authorized by Section 112 of the Department of Justice Appropriations Act of 1993 (P.L. 102-395). The Act amended Section 286 of the Immigration and Nationality Act (INA) of 1952, as amended, by establishing, in the General Fund of the Treasury, a separate account to be called the Breached Bond/Detention Fund. The first \$8 million in breached cash and surety bonds collected are allocated to the General Fund. All collections in excess of the first \$8 million are deposited as offsetting collections into this fund. Amounts deposited into the fund, which remain available until expended, are available for expenses incurred in the collection of breached bonds, bond management, litigation activities to obtain compliance from surety companies found to be delinquent in meeting their obligations, and for expenses associated with the detention of aliens.

In FY 2013, ICE will use \$65 million of these resources to fund 1,460 detention beds, using a projected \$122 average daily rate of detention, which includes related costs such as healthcare. The remaining \$10 million will be used to support the Bond Management Unit (BMU). The BMU supports field operations by providing guidance related to immigration bond management, and ensures field compliance with bond laws, regulations, policies, and procedures through training, site visits, and technical oversight. The BMU also coordinates with other Immigration and Customs Enforcement (ICE) programs to facilitate the timely resolution of bond litigation issues as well as financial reporting to ICE leadership.

<b>BUDGET REQUEST AND SUPPORTING INFORMATION</b>
--

**U.S. Immigration and Customs Enforcement  
Immigration Inspection User Fees**

**I. Appropriation Overview**

**A. Mission Statement for Immigration Inspection User Fees:**

The Immigration and Customs Enforcement (ICE) Immigration Inspection User Fee account is a repository for fees collected from passengers arriving on commercial aircraft and vessels at U.S.-operated air and sea ports of entry as codified in 8 U.S.C. 1103, 1356, Section 286, the Immigration and Nationality Act. These fees finance a portion of the costs of ICE operations to deter, detect, detain, adjudicate, and remove passengers attempting to make an unauthorized landing or to unlawfully bring aliens into the United States through air and sea ports. Funds in the Immigration Inspection User Fee account remain available until expended.

**B. Budget Activities:**

The Immigration Inspection User Fee will fund 1,257 detention beds in Fiscal Year (FY) 2013.

**C. Budget Request Summary:**

ICE requests \$116,869,000 in spending authority for FY 2013. The requested funds will finance a portion of the costs of ICE operations to deter, detect, detain, adjudicate, and remove passengers attempting to make an unauthorized landing or to unlawfully bring aliens into the United States through air or sea ports.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Immigration User Fee account was established as a repository for fees collected from passengers arriving on commercial aircraft and vessels at U.S.-operated air and sea ports of entry. These fees finance a portion of the costs of Immigration and Customs Enforcement (ICE) operations to deter, detect, detain, adjudicate, and remove passengers attempting to make an unauthorized landing or to unlawfully bring aliens into the United States through air or sea ports. These ICE operations encompass:

- expanding, operating, and maintaining information systems for nonimmigrant control;
- detecting fraudulent documents used by passengers traveling to the United States;
- investigating crimes relating to admissibility and establishing the government’s legal position regarding all detentions;
- representing the government in all legal proceedings involving immigration and admissibility;
- transporting detained aliens who arrive at air and sea ports of entry to immigration legal proceedings;
- providing detention and removal services for inadmissible aliens arriving on commercial aircraft or vessels and for any inadmissible alien who has attempted illegal entry into the United States through avoidance of immigration inspection at air or sea ports-of-entry;
- providing training and technical assistance to commercial airline and vessel personnel regarding detection of fraudulent documents; and
- program oversight and management.

In FY 2013, ICE will use \$56 million of these resources to fund 1,257 detention bed and related expenses such as healthcare. The remainder of the funds will be split between other expenses such as investigations, legal proceedings, intelligence gathering, and alien transportation.

### Immigration Inspection User Fees Mission Statement

The Immigration User Fee account was established as a repository for fees collected from passengers arriving on commercial aircraft and vessels at U.S.-operated air and sea ports of entry. These fees finance a portion of the costs of ICE operations to deter, detect, detain, adjudicate, and remove passengers attempting to make an unauthorized landing or to unlawfully bring aliens into the United States through air or sea ports.

### Summary Justification and Explanation of Changes

#### iv: Schedule of Authorized/Unauthorized Appropriations by PPA

### Department of Homeland Security Transportation Security Administration

#### Schedule of Authorized/Unauthorized Appropriations by Program Project/Activity (Dollars in Thousands)

Budget Activity	Last Year of Authorization	Authorized Level	Appropriation in Last Year of Authorization	FY 2013 Request
	Fiscal Year	Amount	Amount	Amount
<b>Aviation Security</b>	<b>2011</b>	<b>Such sums</b>	<b>N/A</b>	<b>5,098,639</b>
- Screening Partnership Program	2011	Such sums	N/A	143,190
- Screener Personnel Compensation and Benefits	2011	Such sums	N/A	3,107,649
- Screener Training and Other	2011	Such sums	N/A	225,012
- Checkpoint Support	2011	Such sums	N/A	120,239
- EDS/ETD Procurement and Installation	2011	Such sums	N/A	117,349
- Screening Technology Maintenance	2011	Such sums	N/A	309,000
- Operation Integration	2011	Such sums	N/A	---
- Aviation Regulation and Other Enforcement	2011	Such sums	N/A	371,989
- Airport Management and Support	2011	Such sums	N/A	569,615
- Federal Flight Deck Officer and Flight Crew Training	2011	Such sums	N/A	12,500
- Air Cargo	2011	Such sums	N/A	122,096
<b>Surface Transportation Security</b>	<b>2011</b>	<b>N/A</b>	<b>N/A</b>	<b>124,276</b>
- Surface Transportation Security Operations and Staffing	2011	N/A	N/A	36,711
- Surface Transportation Security Inspectors and Canine	2011	N/A	N/A	87,565
<b>Credentialing</b>	<b>2005</b>	<b>Such sums</b>	<b>54,919</b>	<b>272,351</b>
- Secure Flight <sup>1</sup>	2005	Such sums	34,919	107,074
- Other Vetting Programs	N/A	N/A	N/A	85,557
- Crew Vetting <sup>1</sup>	2005	Such sums	10,000	---
- TWIC - Fee	N/A	N/A	N/A	47,300
- HAZMAT - Fee	N/A	N/A	N/A	12,000
- General Aviation at DCA - Fee	N/A	N/A	N/A	100
- Indirect Air Cargo - Fee <sup>2</sup>	N/A	N/A	N/A	---
- Certified Cargo Screening Program - Fee <sup>2</sup>	N/A	N/A	N/A	---
- Large Aircraft Security Program - Fee <sup>3</sup>	N/A	N/A	N/A	---
- Commercial Aviation and Airport - Fee [Secure Identification Display Area Checks - Fee]	N/A	N/A	N/A	8,000
- Other Security Threat Assessments - Fee <sup>3</sup>	N/A	N/A	N/A	120
- Sensitive Security Information - Fee <sup>3</sup>	N/A	N/A	N/A	---
- Air Cargo - Fee <sup>2</sup>	N/A	N/A	N/A	7,200
- Alien Flight Student Program - Fee <sup>1</sup>	2005	Such sums	10,000	5,000

Budget Activity	Last Year of Authorization	Authorized Level	Appropriation in Last Year of Authorization	FY 2013 Request
	Fiscal Year	Amount	Amount	Amount
<b>Transportation Security Support</b>	N/A	N/A	N/A	<b>969,709</b>
- Intelligence	N/A	N/A	N/A	45,130
- Headquarters Administration	N/A	N/A	N/A	281,554
- Human Capital Services	N/A	N/A	N/A	225,829
- Information Technology	N/A	N/A	N/A	417,196
<b>Federal Air Marshal Service</b>	<b>2011</b>	<b>Such sums</b>	<b>N/A</b>	<b>929,610</b>
- Management and Administration	2011	Such sums	N/A	815,639
- Travel and Training	2011	Such sums	N/A	113,971
<b>Aviation Security Capital Fund <sup>4</sup></b>	2028	Such sums	N/A	250,000
<b>Total Direct Authorization/Appropriation</b>				<b>7,644,585</b>

<sup>1</sup> Through FY 2005, these programs were under the Aviation Security Appropriation and were therefore authorized. The Transportation Threat Assessment and Credentialing Appropriation has not been authorized.

<sup>2</sup> Indirect Air Cargo Fee and Certified Cargo Screening Program Fee included under the Air Cargo Fee in FY 2013.

<sup>3</sup> Large Aircraft Security Program Fee and Sensitive Security Information Fee included in Other Security Threat Assessment Fee in FY 2013.

<sup>4</sup> P.L. 110-53 reauthorized the Aviation Security Capital Fund from FY 2008 through FY 2028.

**Department of Homeland Security  
Transportation Security Administration  
Acronym List**

ACAS	Advanced Cargo Automated System
ACSP	Aviation Channeling Service Provider
ACTS	Aircraft Training Simulators
AFGE	American Federation of Government Employees
AFRICOM	US Africa Command
AFSD	Assistant Federal Security Director
AFSD-LE	Assistant Federal Security Director-Law Enforcement
AFSP	Alien Flight Student Program
AIT	Advanced Imaging Technology
AMS	Asset Management System
AOA	Analysis of Alternatives
AOSSP	Aircraft Operator Standard Security Program
APATA	Arming Pilots Against Terrorism Act of 2003
ARRA	American Recovery and Reinvestment Act
ASAP	Aviation Screening Assessment Program
ASCF	Aviation Security Capital Fund
ASP	Advanced Surveillance Program
ASSIST	Aviation Security Sustainable International Standards Teams
ASW	Airspace Waivers
AT	Advanced Technology
AT-2	Advanced Technology-2
ATR	Automated Targeting Recognition System
ATS	Automated Targeting System
ATSA	Aviation and Transportation Security Act
AW	Aviation Workers
AWT	Automated Wait Times
BAO	Bomb Appraisal Officer
BASE	Baseline Assessment for Security Enhancement
BDO	Behavior Detection Officer
BLS	Bottled Liquids Scanners
BPSS	Boarding Pass Scanning Systems
BTS	Bureau of Transportation Statistics (Department of Transportation)
CAD	Chemical Analysis Devices
CAO	Chief Administrative Officer
CAPPS II	Computer Assisted Passenger Pre-Screening System
CAT	Category - TSA Security "Category" for Airports (i.e., CAT X, I, II, III, and IV)
CAT/BPSS	Credential Authentication Technology/Boarding Pass Scanning System
CBP	U.S. Customs and Border Protection
CCSF	Certified Cargo Screening Facility
CCSP	Certified Cargo Screening Program
CCTV	Closed Circuit Television
CDL	Commercial Drivers License

**Department of Homeland Security  
Transportation Security Administration  
Acronym List**

CDP	Candidate Development Program
CFATS	Chemical Facilities Anti-Terrorism Standards
CFI	Critical Facility Inspection
CFO	Chief Financial Officer
CFR	Code of Federal Regulations
CFSR	Critical Facility Security Review
CHRC	Criminal History Records Check
CIMG	Critical Incident Management Group
CMSD	Crew Member Self Defense
COLA	Cost of Living Adjustment
CR&L	Civil Rights and Liberties
CSAC	Chemical Security Analysis Center
CSR	Corporate Security Review
CTEB	Canine Training and Evaluation Branch
CVP	Crew Vetting Program
CWP	Compliance Work Plan
DC	Data Center
DFO	Dual Function Officer
DHS	Department of Homeland Security
DLA	Defense Logistics Agency
DOL	Department of Labor
DOS	Department of State
DOT	Department of Transportation
EAGLE	Enterprise Acquisition Gateway for Leading Edge Solutions
EBSP	Electronic Baggage Screening Program
ECAC	European Civil Aviation Conference
EDS	Explosives Detection System
EEO	Equal Employment Opportunity
EMC	Environmental Management Coordinator
EMD	Electronic Metal Detection
EMS	Environmental Management System
EPA	Environmental Protection Agency
ETD	Explosives Trace Detection
EXIS	Exercise Planning and Information Management System
FAA	Federal Aviation Administration
FAM	Federal Air Marshal
FAMIS	Federal Air Marshal Information System

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **Transportation Security Administration Aviation Security**

### **I. Appropriation Overview**

#### **A. Mission Statement for Salaries and expenses:**

The Aviation and Transportation Security Act (ATSA), P.L. 107-71, enacted on November 19, 2001, established the Transportation Security Administration (TSA) to protect the transportation system and ensure the freedom of movement for people and commerce. The Aviation Security Appropriation consists of programs whose primary focus is to secure aviation transportation. The path to achieving this mission has evolved in the years since the September 11<sup>th</sup> attacks. Enhancements in aviation security have included emphasis in explosives detection training and technology, modifications to the prohibited items list, and changes to TSA security screening protocols.

#### **B. Budget Activities:**

The Aviation Security appropriation includes two distinct components: (1) Transportation Security Officer (TSO) Operations and Equipment and (2) Aviation Direction and Enforcement.

TSO Operations and Equipment includes the Programs, Projects and Activities (PPAs) that support the pay, training, outfitting, and operating costs for the TSO workforce. Funding is also included for checkpoint support, purchase, installation, and maintenance of screening equipment, to include Advanced Imaging Technology (AIT), Explosives Detection Systems (EDS) and Explosives Trace Detection machines (ETD).

Aviation Direction and Enforcement includes activities that ensure TSA continues to build a strong security regulation and enforcement presence on-site at the Nation's commercial airports. Funding requested supports air cargo and airport/airline regulation compliance through inspections, international programs, and the airport management and direction staff and airport administrative support.

Terrorism in the aviation domain is an enduring and highly adaptive threat. Terrorists study our vulnerabilities to learn how to exploit our procedural and technological security gaps to increase the lethality and political impact of their attacks. Aviation continues to be a target of coordinated terrorist activity and despite all efforts and advances in intelligence, technology, and screening processes, the threat to the U.S. transportation sector remains high. Examples include the 2010 attempted bombing of a cargo jet using a bomb disguised as an ink jet cartridge, the 2009 attempted attack of Northwest Airlines Flight 253 from Amsterdam to Detroit on Christmas Day, an alleged terrorist plot to detonate liquid explosives onboard multiple aircraft departing from the United Kingdom for the United States in August 2006, and terrorists' intended attacks on U.S.-bound flights originating from multiple foreign airports in December 2003.

Since its inception, TSA has significantly reduced terrorist threats through a multi-layered, risk-based, intelligence-driven approach to security. TSA is undertaking efforts to test new security protocols to improve the passenger experience at aviation security checkpoints by applying new risk-based, intelligence-driven screening procedures and enhancing its use of technology. TSA's risk-based, intelligence-driven screening approach is based on the following premises:

- These efforts will enhance security at the Nation's airports.
- The majority of airline passengers are low risk.
- By having passengers voluntarily provide more information about themselves, TSA can better segment the population in terms of risk.
- Behavior detection and interviewing techniques should be strengthened in the screening process.
- TSA must continue its efforts to optimize screening processes and use of technology to gain system-wide efficiencies.
- TSA must better calibrate operational responses to specific threat information.

TSA will explore new procedures and technologies to learn more about the individuals who fly and tailor security accordingly while balancing five overarching objectives:

In an effort to continuously improve aviation transportation security, TSA began undertaking new initiatives to focus its resources and improve the passenger experience at aviation security checkpoints by applying new risk-based, intelligence driven screening procedures and enhancing the use of technology. These changes included providing expedited screening procedures for known travelers through the TSA Pre✓™ program. TSA Pre✓™ places more focus on pre-screening individuals who volunteer to participate in order to expedite the travel experience. TSA Pre✓™ expedited screening procedures include options such as no longer removing shoes, leaving laptops in the bag, leaving on light jackets/outerwear and belts, and leaving compliant liquids/aerosols/gels in the carry-on bag. Building on the initial success of the first four TSA Pre✓™ proof of concept airport checkpoints launched in October 2011, TSA is working with diverse partners and stakeholders to add additional airlines and airports once operationally ready.

TSA is conducting a host of other strategically-aligned activities to build on the concept of a risk-based, intelligence-driven approach to passenger screening, including modified screening procedures for the 60,000 children traveling nationwide through the aviation system each day, and a Known Crewmember proof of concept that provides a dedicated location for aircraft operator crew members traveling in uniform to be screened using alternate procedures as part of a layered, risk-based security approach. TSA is also piloting enhanced behavior detection techniques in which specialized behavioral analysis techniques have been used to determine if a traveler should be referred for additional screening at the checkpoint. Analyses from multiple proof of concept efforts will inform next steps for how larger-scale implementation could improve capabilities in a risk-based security environment.

While TSA is testing these new procedures and technologies, the agency must retain a certain element of randomness to prevent terrorists from exploiting aviation security. The testing of these concepts holds the potential to significantly change the travel experience. If the pilot programs prove successful, these changes will allow officers to better focus their efforts on passengers who are more likely to pose a risk to transportation. TSA has funded and will continue to fund these programs within base resources, as investments in risk-based screening will be offset by savings achieved through a more targeted screening process. These savings will be identified in future budgets as adjustments-to-base as a result of risk-based screening.

### **C. Budget Request Summary:**

The Transportation Security Administration requests 58,783 positions, 54,088 FTE, and \$5,098,639,000 in discretionary appropriated funding for the Aviation Security appropriation. This appropriation also includes an additional \$250,000,000 in mandatory fee collections (0 FTP/FTE) for a total budget authority of \$5,348,649,000. The total adjustment-to-base includes an increase of 34 positions and 1,383 FTE; and a decrease of \$6,215,000 in appropriated funding, and a decrease of \$149,102,000 in program changes including:

- Reduction in Checkpoint Support of \$31,046,000.
- Reduction in Explosives Detection Systems (EDS) Procurement and Installation of \$87,815,000
- Reduction in Screening Technology Maintenance of \$17,600,000

- Reduction in Federal Flight Deck Officer (FFDO) and Flight Crew Training of \$12,641,000

TSA also requests an adjustment to the aviation security passenger fee (0 FTP/0 FTE, \$317,159,000), of which \$117,000,000 will increase TSA's discretionary offsetting collections and \$200,159,000 will be applied as mandatory savings for the purpose of deficit reduction.

## II. Summary of FY 2013 Budget Estimates by Program/Project Activity (PPA)

### III. Current Services Program Description by PPA

**Department of Homeland Security  
Transportation Security Administration  
Aviation Security:  
Screening Partnership Program  
Program Performance Justification  
(Dollars in Thousands)**

**PPA: Screening Partnership Program**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	-	-	<b>153,289</b>
<b>2012 Enacted Budget Authority</b>	-	-	<b>144,193</b>
2013 Adjustments-to-Base	-	-	(1,003)
<b>2013 Current Services</b>	-	-	<b>143,190</b>
<b>2013 Total Requested Budget Authority</b>	-	-	<b>143,190</b>
Total Change 2012 to 2013	-	-	(1,003)

TSA requests \$143.2 million for the Screener Partnership Program. The adjustments-to-base include a decrease of \$1.0 million for management efficiencies.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Screener Partnership Program (SPP) was established under Section 108 of the ATSA to permit an airport operator to request screening services through a private screening company. There are currently 16 airports participating in the program. Private screening contractors are to perform equal to or better than Federal screening operations under Federal oversight following the same operating procedures, which are continuously updated to ensure both Federal and private screening airports are able to mitigate any new threats which have been identified.

Below is a list of the 16 airports currently participating in the program:

San Francisco International Airport (SFO)	Roswell Industrial Airport (ROW)
Kansas City International Airport (MCI)	Dawson Community Airport (GDV)
Greater Rochester International Airport (ROC)	Wokal Field (GGW)
Jackson Hole Airport (JAC)	Havre City-County Airport (HVR)
Tupelo Regional Airport (TUP)	Lewiston Municipal Airport (LEW)
Sioux Falls Joe Foss Field Regional Airport (FSD)	Frank Wiley Field (MLS)
Key West International Airport (EYW)	Clayton Airport (CAO)
Charles Schulz – Sonoma County Airport (STS)	Sidney-Richland Regional Airport (SDY)

In FY 2013, the Screening Partnership Program PPA will be reduced by \$1.0 million due to efficiencies from the purchase of supplies and materials, as well as the operation and maintenance of equipment, and other expenses.

**Management Efficiencies – (\$1.003 Million)**  
**(dollars in thousands)**

Item	Sub-Total	Total
Enterprise-Wide Efficiencies		(\$2)
General TDY	(\$2)	
Management Adjustments		(\$1,001)

2013 Adjustments-to-Base	-	1,111	81,878
<b>2013 Current Services</b>	<b>52,877</b>	<b>48,356</b>	<b>3,107,649</b>
<b>2013 Total Requested Budget Authority</b>	<b>52,877</b>	<b>48,356</b>	<b>3,107,649</b>
Total Change 2012 to 2013	-	1,111	81,878

TSA requests \$3.1 billion for Screener PC&B. The adjustments-to-base include: an increase of \$11.3 million for pay COLA, an increase of 402 FTE and a \$24.9 million for annualizations of Transportation Security Officers (TSO) received in FY 2012; an increase of 72 FTE and \$6.3 million for the annualization of Behavior Detection Officers received in FY 2012; and an increase of 637 FTE and \$40.1 million to annualize second year funding for screeners to staff initial 1,000 Advanced Imaging Technology equipment; and a decrease of \$771,000 for management efficiencies.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Passenger and baggage screening protects commercial air travelers by detecting and removing dangerous or deadly objects that individuals attempt to smuggle onto aircraft, either on their person, and in their carry-on or checked baggage. TSA’s screening process must strike the appropriate balance between preventing security breaches and maintaining the efficient movement of law-abiding passengers through the security checkpoints. After passenger check-in, TSOs use various types of electronic detection and imaging machines, including X-ray machines, Explosives Trace Detection (ETD) equipment, Walk-Through Metal Detectors (WTMD), Advanced Imaging Technology (AIT), and hand-held metal detectors. At the checkpoints, TSOs may perform physical searches of carry-on baggage and pat-down searches of airline passengers, crew, and airport employees. This is in conjunction with the use of behavior recognition techniques and the validation of travel documents.

TSA began deploying state-of-the-art AITs in 2007. This technology can detect a wide range of threats to transportation security in a matter of seconds to protect passengers and crews. Imaging technology is an integral part of TSA's effort to continually look for new technologies that help ensure travel remains safe and secure by staying ahead of evolving threats. TSA uses two types of imaging technology, millimeter wave and backscatter. As of January 2012, there are 563 AIT units at 119

airports. AIT screening is safe for all passengers, and the technology meets national health and safety standards. TSA has implemented strict measures to protect passenger privacy, which is ensured through the anonymity of the image. Additionally, AIT screening is optional to all passengers; however, if a passenger opts out, they will be subject to comparable screening. Since 2010, the size of the TSO workforce has increased to facilitate the deployment of AIT machines. In FY 2011, TSA hired 8,000 new TSOs. These additional TSOs have helped facilitate the successful rollout of the AIT fleet, which has significantly enhanced the detection capabilities for non-metallic threats. The FY 2013 request annualizes positions authorized to be hired in FY 2012 in order to operate these machines.

### TSO Workforce

ATSA established the employment standards for security screening personnel. Security screening personnel - both private and Federal - are required to be U.S. citizens; pass a background investigation; and have a high school diploma, a general equivalency diploma, or sufficient experience. Newly hired officers must undergo extensive training and be certified to screen passengers and baggage through the use of detection equipment. The screening workforce is subject to ongoing training and testing requirements. Failure to pass any phase of training or a certification examination is grounds for employment termination.

TSOs are just one of the layers of security needed to thwart the threats to the aviation system. TSA has added more specialized security positions with different skill sets, such as Travel Document Checkers (TDCs) and BDOs, to enhance the level of security and to move security beyond the checkpoint environment. TSA has seen the benefits of these new positions in providing a career path for TSOs, which has had a direct impact on reducing attrition and enabling TSA to retain a more tenured TSO workforce.

The TSO budgeted FTE levels are broken down as follows:

### TSO Budgeted FTE by Job Title <sup>1</sup>

Job Title	Band	FY 2011 FTE	FY 2012 FTE <sup>2</sup>	FY 2013 FTE
TSO	D,E	31,636	31,533	32,551
Lead /Master	F	6,615	6,615	6,615
Supervisory/Expert TSO	G	4,850	4,850	4,850
BDOs	F,G,H,I	2,986	3,059	3,131
Transportation Security Specialist (formerly called Bomb Appraisal Officers)	H, I	406	Realigned to Airport Mgmt	Realigned to Airport Mgmt
Managers	H, I	1,137	1,188	1,209
<b>TOTAL</b>		<b>47,630</b>	<b>47,245</b>	<b>48,356</b>

1/ The TSO workforce is composed of approximately 14,000 part time TSOs and 37,000 full time TSOs.

2/ The TSO FTE level in FY 2012 was adjusted downward by 1,860 FTE (after adjusting for annualizations and program increases). This technical adjustment is proposed to more accurately reflect sustainable staffing levels. There is not a concurrent reduction to budgetary resources.

**Job Descriptions:**

- Transportation Security Officers (TSO) – Front-line workforce performing checkpoint security, document checking, airport employee screening and unpredictable security measures.
- Lead TSO/Master TSO – Provides intermediary leadership at the checkpoint. Master TSOs can also perform training duties and operate in airport coordination centers.
- Supervisory TSO (STSO)/Expert TSO – Supervises checkpoint operations. Expert TSOs can also perform training duties and operate in airport coordination centers.
- Behavior Detection Officers (BDO) – Perform Screening Passengers by Observation Technique duties.
- Transportation Security Specialist-Explosives (TSS-E) (formerly Bomb Appraisal Officers (BAOs)) – Provide expert guidance on explosive devices, respond to and resolve alarms.
- Transportation Security Managers – Perform overall oversight duties of security operations.

**TSO FTE Allocated to Security Duties**

<b>Job Duty</b>	<b>FY 2011 FTE</b>	<b>FY 2012 FTE</b>	<b>FY 2013 FTE</b>
TDC	2,001	2,001	2,001
Playbook/REFs	1,654	1,654	1,654
BDOs	2,986	3,059	3,131
Transportation Security Specialist (formerly called Bomb Appraisal Officers)	406	Realigned to Airport Mgmt	Realigned to Airport Mgmt
Checkpoint/Other	40,583	40,531	41,570
<b>TOTAL</b>	<b>47,630</b>	<b>47,245</b>	<b>48,356</b>

TSA has installed labor-saving technology in many airports around the country. Most notable, in-line checked baggage systems have reduced the staffing required for baggage checks and have reduced costly workplace injuries. These efficiencies have allowed TSA to invest in other effective security measures, such as TDCs, Aviation Direct Access Screening Program/Playbook, BDOs and TSS-Es. Please see the table below for a cumulative list of reinvested resources.

<b>Estimated Cost Avoidance from In-Line Savings</b>		
	FTE	Dollars <sup>1</sup>
Cumulative through FY 2011	2,482	\$139,572,833

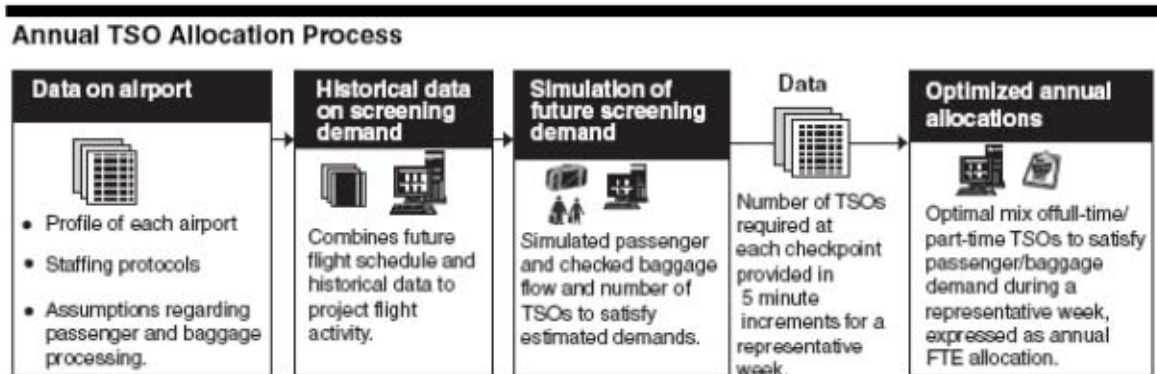

1/Estimated FTE avoidances multiplied by the weighted average of TSOs, Lead, and Supervisory TSO Salaries.

<b>Within-Base Growth of Security Programs</b>			
	Total Budgeted FTE	Self Funded FTE	% of FTE Self Funded
Travel Document Checker	2,001	1,086	54%
Target Random Security Plays	1,654	904	55%
Behavior Detection Officers	2,986	2,326	78%
TSS-Es (formally BAOs)	406	297	73%
<b>TOTAL</b>	<b>7,047</b>	<b>4,613</b>	<b>65%</b>

### Workforce Initiatives

TSA determines and allocates FTE to the airports through the Staffing Allocation Model (SAM). This is a robust process run by each airport representative (Scheduling Operations Officers, which utilizes:

- Official Airline Guide Flight Data representing airport specific flight activity
- Airport specific facility layout and equipment configuration details
- Input of Program Offices and Risk Analysis
- A discrete event simulation model to project staffing requirements
- An airline industry accepted scheduling application to apply workforce scheduling requirements

Source: GAO analysis of TSA Staffing Allocation Model.

This model is constantly refined to effectively allocate and manage the TSO workforce. Through the SAM process, TSA has been able to identify operational and efficiency gains made possible through better scheduling, increased use of part-time and split shift employees, technology improvements and improved management practices. These gains have led to the expansion of security initiatives, largely accomplished within existing resources, which have significantly strengthened air transportation security. The workforce initiatives include:

Travel Document Checker (TDC) Program - The TDC Program is an added layer of security at all 446 federalized airports, including 16 Screening Partnership Program (SPP) airports, to verify an individual's identity and their travel documents before allowing entry into the security screening checkpoint to access the sterile area or board an aircraft. TDC-qualified TSOs are positioned in front of the checkpoint and use black lights and magnifying loupes to validate boarding passes and authenticate various forms of acceptable photo ID presented by passengers, airport / airline personnel, and law enforcement officers. TDCs also make a visual comparison of the individual with the ID photograph, and ensure the boarding pass presented was issued to that individual, for that day's travel and from the correct airport. Any suspect or questionable ID issues are relayed to the STSO for resolution and to contact the Identity Verification Coordination Center to verify the individual's identity to continue.

Screening of Passengers by Observation Techniques (SPOT) – This essential behavior recognition and analysis program adds an important layer of security in all areas of an airport. It provides a non-intrusive means of identifying potentially high-risk individuals who exhibit behaviors that deviate from an established environmental baseline (indicative of stress, fear and deception), which could possibly reflect intentions of terrorism and/or criminal activity. SPOT looks at involuntary physical and physiological reactions. In FY 2010, SPOT's BDOs were evaluated under the Performance and Accountability Standards System (PASS) program and required to successfully qualify on technical proficiency assessments germane to their screening functions. This included job knowledge tests, practical skills evaluation, and a proficiency checklist. SPOT is in the process of increasing the size of its National Training Team to provide additional standardization visits and training courses to the approximately 161 SPOT airports. A recent study sponsored by the DHS Science & Technology Directorate and conducted by the American Institutes for Research examined the SPOT indicators' effectiveness compared against a strict random protocol was completed and provided to TSA in April 2011. The study confirmed that SPOT was significantly more effective at identifying persons of interest than random. This study is the most significant effort undertaken on the validation of a large scale behavior-based security program to date. TSA is also piloting a BDO assessor program which will enhance the ability to segment and screen passenger populations based on potential risk. During this pilot TSA is using specially trained BDOs in an enhanced role, known as Assessors, focusing on 100 percent passenger interactions and behavior analysis in conjunction with boarding pass and ID review at the entrance to the checkpoint. This involves greater engagement of passengers and review of travel documents. The pilot will provide TSA with a means of real time risk assessment to complement or enhance previous assessments of passenger risk. This additional layer has become even more critical as TSA moves forward on rolling out Risk Based Security (RBS).

Visible Intermodal Prevention and Response (VIPR) teams – These teams may consist of TSOs, BDOs, Transportation Security Inspectors, TSS-Es and Federal Air Marshals. Their duty is to screen passengers, look for suspicious behavior and act as a visible deterrent in multiple transportation sectors, including general aviation, buses, and mass-transit. New technology, including the use of mobile radiological screening equipment, has expanded the reach and capability of TSA's VIPR teams.

Playbook – The objective of Playbook is to establish uniform procedures and standards for TSOs to screen individuals, their accessible property, vehicles upon entering a direct access point screening location, and conduct visual inspections of aircraft.

Playbook is designed as a comprehensive, flexible deployment system of countermeasures that are coordinated at the local airport level in order to respond quickly to emergency conditions or hostile acts. It's supported through local decision-making between the Airport Operator and the Federal Security Director (FSD). Playbook involves working collaboratively with stakeholders and coordinating the assets of TSA, local law enforcement, and other DHS agencies to improve an airport's overall security posture.

Performance Accountability and Standards System (PASS) – TSA's innovative pay-for-performance system has been rewarding high performing TSOs for over six years. The objective rating system has been refined and the system overall has become more successful as employees become familiar with expectations and scoring techniques. PASS grants TSOs the opportunity to earn a pay raise every year, in addition to the federal cost of living adjustment, if applicable. PASS serves as an effective motivator for the workforce and represents the cutting edge of government pay-for-performance systems.

The Aviation Screening Assessment Program (ASAP) – This program measures TSO screening performance using realistic and standardized assessment scenarios. The primary purpose of ASAP is to provide statistical data to determine reasons for failure within the checkpoint and checked baggage screening process. ASAP test results provide critical data to TSA leadership that helps with the improvement of aviation security and the identification of vulnerabilities across screening operations. There are two, six-month test cycles per year with the number of assessments required per cycle based on the factors to be evaluated.

### **Career Progression Program**

TSA continues its focus on career progression for TSOs. As the TSA mission has evolved, TSA created higher-level positions for TSOs, such as BDOs and TSS-Es. TSA's adoption of RBS will further evolve the skill sets of TSOs.

TSA provides career-advancement tools and resources in its online system called Security Officer Advancement Resources. These resources include a career toolbox, training opportunities, and detailed overviews of what makes a TSO competitive for positions within TSA and across DHS. TSA supplements this service with career coaching and the Career Resident Program. The Career Resident Program is an entry level, full time, career development program designed to capitalize on the technical expertise and agency knowledge resident in the field and to create a mechanism for TSOs and field personnel selection for career opportunities other than the current TSO/LTSO/STSO career path. In addition, TSA has partnered with community colleges to provide TSOs and uniformed officers the opportunity to work toward a TSA Homeland Security Certificate and/or an associates' degree in Homeland Security or related field.

The career progression structure allows TSA to distinguish and retain the more experienced and top performing TSOs. Test results show a positive correlation between longevity and performance, including detection ability, screening efficiency, and customer service. As threats evolve and increase in complexity, the advanced skills of the TSA workforce are necessary to stay ahead of terrorist capabilities.

In 2011, TSA continued to achieve near record low attrition rates, continuing the progression to a more experienced workforce. The chart below indicates the historical trend of decreasing attrition rates.

**Historical Attrition Rates:**

Attrition Type	Work Schedule	FY05	FY06	FY07	FY08	FY09	FY10	FY11
Voluntary	Full-Time ONLY	13.4%	12.6%	11.6%	10.8%	5.3%	4.2%	4.5%
Voluntary	Part-Time ONLY	44.1%	38.6%	37.4%	31.8%	15.5%	12.9%	15.1%
Voluntary	TOTAL	17.4%	16.5%	17.4%	15.8%	7.7%	6.2%	7.2%

**Workers' Compensation**

TSA continues to aggressively reduce U.S. Department of Labor Office of Workers' Compensation Program costs through strategies of prevention, education, case management, and nurse intervention. TSA field operations are required to develop a local safety program targeted at inspections, hazard recognition and analysis, hazard abatement, and injury documentation. TSA's Office of Occupational Safety, Health and Environment (OSHE) provides field support to the Nation's airports to develop their safety programs. OSHE provides, through the Online Learning Center, 11 safety courses aimed at injury prevention. The national nurse case management program has successfully assisted TSOs in returning to employment in a shorter time. The Periodic Roll Initiative, established in April 2007 is a joint effort with the Nurse Case Management team where all of the long-term disability (Periodic Roll) cases are examined for opportunities to return employees to work when medically feasible.

The President's Safety, Health, and Return to Employment Initiative requires Federal agencies to reduce the Total Case Rate and Lost Time Case Rate by three percent each fiscal year. As noted in the chart below, TSA has exceeded its goal of reducing the number of TSO injuries and illnesses, and in FY 2013, TSA will seek to continue the trend of reducing numbers of TSO injuries and illnesses. In addition, TSA's Workers' Compensation has decreased by over \$15 million from FY 2006 to FY 2011.

**TSO Injury Rate**

	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011	Percent Change FY 2005 - FY 2011
<b>Total Case Rate (TCR)</b>	22.89	36.27	29.06	16.46	13.93	10.15	7.55	7.16	5.50	-81.07%
<b>Lost Time Case Rate (LTCR)</b>	--	--	12.89	8.94	7.19	5.14	3.53	3.37	2.76	-78.59%

**Collective Bargaining**

Following the Federal Labor Relations Authority (FLRA)'s decision that directed a union election among TSOs, on February 4, 2011, TSA issued a Determination permitting Transportation Security Officers to vote on whether they want representation for limited collective bargaining on non-security employment issues. The FLRA conducted both an initial election and a runoff election at TSA during

FY 2011. In June 2011, The American Federation of Government Employees (AFGE) was certified by the FLRA as the exclusive representative of the bargaining unit resulting in the transition to the collective bargaining environment and full implementation of the Administrator’s Determination. Bargaining unit employees are full-time and part-time non-supervisory personnel performing screening functions (TSOs and LTSOs, Master and Expert TSOs, including BDOs, Security Training Instructors (STIs), and Equipment Maintenance Technicians.)

All aspects of the transition to collective bargaining are governed by the Determination. The Determination states that “TSA will not bargain about security policies or procedures or issues affecting security”. The Determination’s framework for collective bargaining is unique to TSA and protects the resources and flexibility we need to secure the Nation’s transportation systems.

TSA plans to fully implement the Determination including establishment of a Unitary Resolution System. Collective bargaining will commence in FY 2012. Training for TSA leadership and bargaining unit employees will commence and continue throughout FY 2012, and is projected to be completed in FY 2013.

In FY 2013, the Screener PC&B PPA will be reduced by \$756,000 for Enterprise-wide efficiencies, and \$15,000 for management adjustments including efficiencies from workers compensation and/or staffing.

**Management Efficiencies – (\$.771 Million)**

Total Change 2012 to 2013	18	17	(24,784)

TSA requests \$225.0 million for Screener Training and Other. The adjustments-to-base include: 3 FTP/FTE for Balanced Workforce Strategy Follow-On; an increase from a transfer of 15 FTP/14 FTE and \$948,000 between the Aviation Security appropriation and the Transportation Security Support appropriation; an increase of \$28,000 for pay COLA; a decrease of \$4 million for annualizations associated with FY12 program increases; a decrease of \$8 million to annualize second year costs associated with staffing of initial 1,000 Advanced Imaging Technology equipment; and a decrease of \$13.7 million for management efficiencies.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

This activity provides the resources to support new and recurring training requirements for the TSO workforce, as well as other direct costs associated with screening operations.

The following table provides the components of this PPA.  
(dollars in millions)

	<b>FY 2012 Enacted</b>	<b>FY 2013 Request</b>
Transportation Security Officer Training	\$123.5	\$101.2
Screener Consumables, Uniforms, and Other	\$89.4	\$ 87.6
National Deployment Office (NDO)	\$ 24.9	\$ 24.2
Environmental Programs	\$ 12.0	\$ 12.0
<b>Total</b>	<b>\$249.8</b>	<b>\$225.0</b>

**Transportation Security Officer Training: \$101.2 million:** Given the ever changing threats that face the aviation domain, screener training is constantly evolving. TSO training is comprised of a compendium of courses that includes basic training for initial hires, on-the-job training, lead and supervisor technical training, recurrent training, advanced technical skills training, remedial training, and return-to-duty training. All new hires receive a combination of instructor-led, hands-on, and web-based training. Recurrent and specialized training courses are provided by either classroom instruction or the TSA Online Learning Center (OLC).

TSA uses a measurement and evaluation process to ensure training programs meet established objectives and standards. Training effectiveness is assessed using a four-level model measuring trainee reaction, learning, behavior, and results. TSA also conducts assessments to ensure a high level of instructional quality is maintained.

Training under this PPA includes:

**New Hire Training Program (NHTP):** The bulk of the security training funding provides for classroom instruction on checkpoint procedures and strategy, to include the tenants of checkpoint evolution as well as on-the-job training and certification required by ATSA. NHTP provides web-based training, 40 hours of instructor-led training and hands-on equipment-specific labs at the home/hub airport. The checked baggage screening procedures module includes on-screen-resolution protocol training for all new hires depending upon the equipment in place at their duty location. TSA develops and delivers training in support of emerging technologies, such as Advanced Imaging Technology (AIT) for persons and Advanced X-Ray Technology (AT), into the mainstream passenger screening process. In FY 2013, TSA will redesign the new hire training course to incorporate changes warranted through training task analysis completed in 2012.

<b>Metric</b>	<b>Min. Hrs</b>	<b>Evaluation Components</b>
<b>Checkpoint TSO-one ETD</b>

<b>Total Hours</b>	<b>222.00</b>	

<sup>1/</sup> OSARP = On-Screen Alarm Resolution Protocol

- **Recurrent Training:** All TSOs are required to undergo recurrent security training to ensure they maintain proficiency of skills learned during basic training. Additionally, the recurrent courses are designed to keep the workforce up-to-date with procedural changes; new technologies introduced into the screening operations, such as AIT; equipment used by the TSOs in the performance of their duties; and new threat items. This training is planned and communicated through an annual National Training Plan (NTP). In FY 2013, TSA plans to design and develop interactive computer based recurrent training for key security specialty positions and activities to include Transportation Security Managers (TSMs), STIs, STSOs/LTSOs, and BDOs.
- **Supervisor Technical Training Course:** The technical and leadership competence of Supervisory Transportation Security Officers (STSOs) and Lead TSOs (LTSOs) is a critical component of workforce effectiveness and retention. TSA developed and deployed a course to establish a basic understanding of the technical and general supervisory responsibilities of the STSOs and LTSOs to provide tools needed to successfully manage the daily responsibilities and challenges faced at the checkpoint and/or checked baggage screening locations. TSA conducts additional courses to provide ongoing skills enhancement and technical expertise training to their STSOs and LTSOs at their home airports.
- **Leadership Training:** This training supports the requirements of 5 CFR 412.202 Systematic Training and Development of Supervisors, Manager, and Executives. Leadership training programs have been developed and are deployed for different levels of TSOs. All leadership

training programs cover topic areas such as communications skills, managing employee performance, coaching and mentoring, and team building. Examples of such programs are:

- The Real Time Leadership Skills program - a new course of study designed for approximately 8,000 team leads that include LTSOs, Expert BDOs, and STIs.
- Foundations of Leadership program - basic leadership training for the 5,000 STSOs.

Additional initiatives are underway to provide additional training in basic employee relations, supervisory responsibilities in managing safety, and diversity training.

- **Expanding Skills and Critical Thinking Training:** This strategy focuses on the interaction and communication between TSA's workforce and the public. Every TSO working at the checkpoint receives training that consolidates the latest methods for all prohibited items, including explosives detection, as well as the human factors that can affect security. This training will help TSOs become more analytical and less "check-list oriented." In FY 2011, TSA designed, and is in the process of delivering, the next phase of developmental training that will continue to build upon the principles of critical thinking and effective communications.
- **Travel Document Checker (TDC) Training:** This curriculum provides training for all TSOs and other TSA personnel assigned to conduct checks of travel documents and verify identification for individuals seeking access through a screening checkpoint. The curriculum includes training on Standard Operating Procedures, detecting fraudulent documents, utilizing document checking technology, and recognizing acceptable forms of identification. The training will continue to be updated as needed.
- **Transportation Security Managers (TSM) Technical Training Course:** The technical and leadership competence of TSMs is critical to TSA objectives that serve to protect the traveling public by preventing and/or deterring any deadly or dangerous objects from being transported onto aircraft. TSA developed and is deploying a course to strengthen TSMs' technical and managerial skills and provide tools needed to successfully manage the daily operations. This training will help prepare TSMs effectively respond to and assess the potential impact of all unresolved issues at the checkpoint and in checked baggage screening locations.
- **Behavior Detection Officer (BDO) Training:** This curriculum provides training in behavior observation and analysis at the checkpoint for the purpose of identifying passengers exhibiting behaviors indicative of hostile intent. This program, known as Screening Passengers by Observation Techniques, is performed by BDOs at all major airports. The curriculum for this program will continue to be upgraded and updated annually to include additional techniques and/or information related to the field of behavior detection.
- **Transportation Security Specialist-Explosives (TSS-E) Training:** The TSS-Es (formally BAOs) in all major airports require specialized security training. These in-house explosives experts provide rapid response for advanced resolution of alarms and also provide on-site familiarization training to TSOs to help them identify potential Improvised Explosive Devices (IED) and IED components.

- **Security Training Instructor (STI)**: This training supports the permanent TSA in-house instructor certification program. TSA provides annual skills enhancement training to the STI workforce to ensure they are able to effectively deliver technical training. The STIs perform instructional duties 80 percent of their time and perform security screening duties the remaining 20 percent of their time to ensure they maintain proficiency in the screening activities they instruct.
- **Training Aids/Training Tools**: Due to the ever-changing threat from terrorism and the terrorist adaptation to security and screening procedures, TSA is constantly developing and updating training and training aids. As new threats emerge, some of the existing training, and the training aids and tool sets have to be quickly upgraded. TSA employs a variety of automated training and testing tools to enhance TSO skills, including simulated computer based image interpretation practice sessions, and simulated weapons and IED kits. TSA also develops “Threat in the Spotlight” training documents for TSOs and their supervisors, which describes and shows actual pictures and x-ray images of threats found by TSOs at airports or from other intelligence resources.
- **Emerging Technology Training**: This training supports the operational evaluation and deployment of emerging screening technologies for passenger, carry-on, and checked baggage. TSA designs and develops training to be conducted during operational tests and evaluations of emerging technologies and develops and delivers training for emerging technologies that have been determined to be operationally effective and efficient to ensure TSOs are knowledgeable, skilled, and prepared to operate all technologies. For example, TSA designed, developed, and delivered training courses/materials to support new technology deployments. This included AIT [with and without Automated Target Recognition (ATR) upgrades], reduced-size EDS for use at checkpoints, bottled liquids scanners, credential authentication technology and checkpoint AT X-ray.
- **Training Evaluation**: TSA uses a measurement and evaluation process to ensure that training programs meet established objectives and standards. TSA training effectiveness is assessed using three levels of measuring trainee reaction, learning, behavior, and results. TSA also conducts assessments to ensure that a high level of instructional quality is maintained.
  - Level 1 Evaluation (trainee reaction): Completed at the end of every training program. All Level 1 evaluation data is scanned into a central database, and results are reviewed to determine if course content or delivery should be modified.
  - Level 2 Evaluation (learning): Fulfilled via a test or demonstration at the completion of a training program. The OLC is the repository for these results. Scores achieved indicate level of learning achieved.
  - Level 3 Evaluation (transfer/behavior): Level 3 evaluation is completed for the Basic Screener Training Course, which collects data through surveys. Analysis of the reports for this effort helps to determine if training is achieving its specific target. A Level 3 evaluation is conducted after the training participant has had at least 6 months on-the-job for the position for which he or she was trained. The Level 3 includes an inquiry

sent to participants and their supervisors. Additional Level 3 evaluations are conducted as determined appropriate.

As TSA continues to explore alternatives to its current training programs, TSA anticipates finding ways to offer more effective training at the same cost.

### **Associates Program:**

In FY 2010, TSA piloted an Associates Program at selected CAT X and I airports and more than 3,000 TSOs participated. The Associates Program provides additional skills to the workforce and provides cutting-edge professional training and development that is critical for TSOs to fully accomplish the TSA mission and fulfill its vision. It also provides for career development and supports overall retention efforts. In FY 2012, this program will roll out to the entire TSO workforce, primarily through long distance learning, to CAT II, III, and IV airports. The Program offers three core courses as follows:

- Introduction to Homeland Security: TSOs explore the state, national, and international laws impacting homeland security, including an examination of the most critical threats confronting homeland security.
- Intelligence and Analysis and Security Management: TSOs explore intelligence analysis and its indispensable relationship to the security management of terrorist attacks, man-made disasters and natural disasters.
- Transportation and Border Security: TSOs explore an in-depth view of modern border and transportation security. Specific topics include security for aircraft, trains, trucks, seaports, ships, pipelines, buses, etc.

### **Performance Reviews:**

All TSOs, LTSOs, STIs, BDOs and STSOs must participate in an Annual Proficiency Review to ensure that they meet all of the qualifications and performance standards required to perform their duties as required by ATSA. TSOs will continue to be certified annually based on overall performance as defined by the PASS. In 2011, PASS Technical Proficiency testing focused on image recognition, proper screening techniques, and the ability to identify, detect, and locate prohibited items. Technical proficiency is measured in the following ways:

- Measuring Image Proficiency – One image assessment per year administered using the X-ray simulation;
- Measuring Practical Skills – A series of Practical Skills Evaluations, including the detection of prohibited items, of all TSOs every year; and
- Measuring On-Screen Alarm Resolution Protocol (OSARP) Proficiency – One OSARP assessment per year administered using the Employee Assessment Management System software.

More than 40,000 TSOs were successfully recertified using an end-to-end paperless evaluation and reporting system. The evaluation criteria has been restructured into a more focused results-based measure centered on a TSOs ability to find prohibited/threat items. TSA also created more realistic object recognition assessments to accommodate the evolving technology deployed at airports.

**Screener Consumables, Uniforms, and Other: \$87.6 million:** Consumable supplies are critical materials used by TSOs to ensure effective screening of passengers, carry-on, and checked baggage. These consumable supplies include disposable gloves, sample swabs/wands, reactant materials, label seals to identify bags inspected by TSOs, and baggage inserts, which both notify passengers that their bag has been inspected and provide contact information in the event of a problem. In addition, TSA provides uniforms to new hires, as well as provides replacement uniforms to all TSOs through the annual allowance program. Costs of uniforms have increased in 2013 under current law. In response to this, TSA has realigned funds and increased the uniform allowance from \$200 to \$225.

**National Deployment Office (NDO): \$24.2 million:** The NDO provides additional TSOs, BDOs and other operations personnel to FSDs for screening support during crisis response and recovery operations, seasonal demands, special security events, risk mitigation or other activities that require higher-than-normal security related staffing levels, while protecting the Nation’s transportation system. Each request for NDO support is analyzed from a cost/benefit/risk perspective to ensure the optimal use of these limited security personnel resources. For various types of disaster response operations, the NDO is responsible for deploying 14 Transportation Security Advance Teams, which include 200 personnel, and 41 Transportation Security Support Teams, which include 895 personnel.

**Environmental Program: \$12.0 million:** This program provides for the disposition of hazardous materials and abandoned personal property collected by TSA at checkpoints, as well as the maintenance of the environmental management system. TSA has an extensive and complex program to safely and securely identify, sort, store, and protect assets; as well as to remove and dispose of hazardous and voluntarily abandoned property. TSA’s national hazardous materials disposal program protects the traveling public from exposure to hazardous materials and complies with Federal, State, and local environmental regulations and laws.

In FY 2013, the Screener Training & Other PPA will be reduced by \$13.7 million due to efficiencies from Administrative/Professional Support contracts and other expenses, and from the purchase of consumables and supplies.

**Management Efficiencies – (\$13.692 million)  
(dollars in thousands)**

Item	Sub-Total	Total
Enterprise-Wide Efficiencies		(\$4,622)

Total Change 2012 to 2013	7	7	(84,529)

TSA requests \$120.2 million for Checkpoint Support. The adjustments-to-base include: a decrease of \$39.4 million for funds provided in FY 2012 for additional Advanced Imaging Technology; an increase of 4 FTP/4 FTE for DHS Balanced Workforce Strategy Follow-On; an increase of 3 FTP/3 FTE for realignments; a decrease of \$186,000 for transfers from the Aviation Security appropriation to the Transportation Security Support appropriation; an increase of \$35,000 for pay COLA; a decrease of \$13.9 million for management efficiencies. The program change includes a decrease of \$31.0 million.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The following table provides the components of the PPA's Current Services:

(dollars in millions)

	<b>FY 2012</b>	<b>FY 2013</b>
Checkpoint Technology	\$190.4	\$105.8
Advanced Surveillance Program	6.0	5.0
Payroll	8.4	9.4
<b>Total</b>	<b>\$204.8</b>	<b>\$120.2</b>

The checkpoint support program provides the resources required to test, evaluate, integrate, and deploy passenger screening and carry-on baggage screening capabilities. This involves technologies, training, checkpoint reconfigurations, closed circuit television (CCTV) surveillance equipment, and the

operational integration of systems at over 2,300 passenger checkpoint lanes in our Nation's airports. TSA developed a strategic plan to enhance screening through improved checkpoint technology that will refine passenger security for aviation. This initiative extends beyond the airport checkpoint and considers the end-to-end passenger experience to improve security and increase efficiency. The focus is on a layered security and risk-based screening approach including improved explosives detection and enhanced hostile intent detection.

Current technologies that have been deployed include Enhanced Walk-through Metal Detectors (WTMD) that screen persons for metallic weapons such as guns or knives; Explosives Trace Detection (ETD) units which are used to test for explosive residue on selected carry-on items that allow for increased security and an added layer of random screening within the sterile area; Bottled Liquids Scanners (BLS) which screen bottles to determine if they contain explosives or benign liquids; Chemical Analysis Devices (CAD) which are small devices used to identify suspect substances; Advanced Technology (AT-2) systems which are X-ray systems with advanced visual detection capabilities that use multi-view capabilities or automated explosives detection capabilities; Advanced Imaging Technology (AIT) consisting of millimeter wave and backscatter X-ray units; Automated Wait Times (AWT) systems calculate wait times for the lines that form in front of checkpoints; and Credential Authentication Technology/Boarding Pass Scanning System (CAT/BPSS) digitally validates the ID and boarding pass used by the traveling public.

AIT millimeter wave technology uses non-ionizing radio frequency energy in the millimeter wave spectrum to generate a three-dimensional computer image of the body based on the energy reflected from the body. AIT backscatter technology uses a narrow, low-intensity X-ray beam scanned over the surface of the body at a high speed that is converted into a computer image of the body.

In FY 2011 and FY 2012, TSA is installing new software on TSA's millimeter wave AIT machines, making upgrades designed to enhance privacy by eliminating passenger-specific images. TSA worked with the DHS S&T and private industry to develop the new software. This software, also referred to as Automated Target Recognition (ATR), auto-detects items that could pose a potential threat using a generic outline of a person for all passengers. By eliminating the image of an actual passenger and replacing it with a generic outline of a person, passengers are able to view the same outline that the TSO sees. Further, a separate TSO will no longer be required to view the image in a remotely located viewing room. In addition to further enhancing privacy protections, this new software will increase the efficiency of the screening process and expand the throughput capability of AIT. In February 2011, TSA successfully tested the new software at Hartsfield-Jackson Atlanta International, Las Vegas McCarran International and Ronald Reagan Washington National airports. ATR will be included on all future AIT procurements.

**Checkpoint Technology: \$105.8 million:** This request includes funding to test, procure, and deploy improved technology systems to further extend explosives and prohibited item detection coverage at aviation checkpoints. It includes funding to test, purchase, and install new screening equipment and update existing equipment with such enhancements as AT-2 tier upgrades. Funds will also be used for program, engineering, technical support and travel, original equipment manufacturer training, warehousing, consumables, and refurbishing equipment, to provide functionality and performance enhancements, as well as for life-cycle replacements for units reaching the end of their useful life.

TSA analyzes the integration of new and modified systems and concepts of operation to ensure operational effectiveness and suitability prior to full system production and deployment. The purpose of this work is to test, evaluate, and analyze pre-production or production representative systems under realistic conditions, including operation by those who will use the equipment under the proposed concept of operations, in the field under a variety of environmental conditions. In particular, this includes:

- Operational Test and Evaluation (OT&E) in support of regulatory and policy decisions;
- OT&E as part of the acquisition process for items procured by TSA, including Early Utility Assessments, Initial OT&E, and follow-on OT&E over the project lifecycle;
- Pilots, concept demonstrations, and field experimentation in support of mission area analyses, concept of operations development, process optimization and improvement, and workforce / vector characterizations; and
- T&E capabilities development to improve the quality and utility of evaluation products.

The following chart depicts TSA’s checkpoint equipment purchase status relative to the Full Operational Capability (FOC):

Technology	FOC	Planned Purchases with Prior Year Funds	After Prior Years Purchases	Planned Purchases with FY 2012 Funds	After FY 2012 Purchases	Planned Purchases with FY 2013 Funds	After FY 2013 Purchases	PLANNED PURCHASES TOTAL
Advanced Imaging Technology <sup>1/</sup>	1,800	1,000	56%	250	69%	0	69%	<b>1,250</b>
NextGen Explosives Trace Detector	1,500	865	58%	100	64%	50	68%	<b>1,015</b>
Portable Explosives Trace Detector	811	811	100%	0	100%	0	100%	<b>811</b>
Advanced Technology	2,325	1847	79%	50	82%	150	88%	<b>2,047</b>
Credential Authentication Technology <sup>2/</sup>	1,400	830	59%	570	100%	0	100%	<b>1,400</b>
Automated Wait Times	470	470	100%	0	100%	0	100%	<b>470</b>
Bottled Liquids Scanner <sup>3/</sup>	1,690	1,300	77%	0	77%	75	81%	<b>1,375</b>
Chemical Analysis Device	255	255	100%	0	100%	0	100%	<b>255</b>
Shoe Scanning Device <sup>4/</sup>	0	0	0%	0	0%	0	0%	<b>0</b>

1/ FOC for AIT may change based on TSA's Risk Based Security initiatives, potential reductions in processing times, and qualification of new and innovative AIT solutions.

2/ FOC for CAT was adjusted from 2,325 to 1,400 as a result of changes to the Concept of Operations and allocation model.

3/ FOC for BLS has been increased from 1,300 to 1,690 to better align with TSA's lane distribution strategy.

4/ The solicitation for SSD technologies did not result in any viable systems that met TSA's current needs due to both limited technical maturity and operational feasibility.

### Checkpoint Technology Average Costs per Unit

Technology	Average Costs
Advanced Imaging Technology	\$175,000 (Est)
NextGen Explosives Trace Detector	\$45,000
Portable Explosives Trace Detector	\$48,000 (Est)
Advanced Technology	\$135,000
Credential Authentication Technology	\$25,000 (Est)
Automated Wait Times	\$48,000 (Est)
Bottled Liquids Scanner	\$35,000
Chemical Analysis Device	\$50,000

**Advanced Surveillance Program: \$5.0 million:** The Advanced Surveillance Program (ASP) provides additional security capabilities as part of TSA’s layered approach. This is accomplished by partnering with transportation authorities to expand their existing surveillance systems. The result is the Federal Government gains the ability to observe and detect people and property moving through the security screening process and facilities. Advanced surveillance systems have proven to be a key component in the “best practices” of the security industry world-wide. They provide threat identification, situational awareness, deterrence, loss prevention, investigative and legal activities along with standard management functions within the checkpoint areas to include exit lanes, sterile areas, and queue lanes. ASP promotes a cooperative partnership and sharing of information between Federal and local authorities and provides invaluable coordination for command and control for first responders in the event of an incident or threat. Additional funding is requested in the EDS Procurement and Installation PPA to support ASP in baggage handling areas.

	Projects Completed with Prior Year Funds	Projects to be Completed with FY 2013 Funds
Advanced Surveillance Program Projects	73	2

**Payroll: \$9.4 million:** The request provides funding to support 61 full time positions to support TSA’s Passenger Screening Program activities. These personnel consist of experienced technical and scientific professionals, such as engineers, logistics specialists, and health physicists, who are able to work closely with airports, vendors, and domestic and international transportation security partners in order to carry out the mission.

In FY 2013, the Checkpoint Support PPA will be reduced by \$13.9 million due to efficiencies from Administrative/Professional Support contracts and other expenses, and savings from the purchase of supplies and materials, as well as efficiencies in the operation of equipment.

**Management Efficiencies – (\$13.957 Million)**  
(dollars in thousands)

<b><u>Item</u></b>	<b><u>Sub-Total</u></b>	<b><u>Total</u></b>

TSA requests \$117.3 million for EDS Procurement and Installation. The adjustments-to-base include: 2 FTP/ 2 FTE for DHS Balanced Workforce Strategy Follow-On; a decrease of \$14,000 for transfers from the Aviation Security appropriation to the Transportation Security Support appropriation; an increase of \$70,000 for pay COLA; a decrease of \$17.6 million for management efficiencies. The program change includes a decrease of \$87.8 million.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The following table provides the components of the PPA's Current Services:

(dollars in millions)

	<b>FY 2012</b>	<b>FY 2013</b>
Purchase of Checked Baggage Equipment	\$200.6	\$183.9
Installation	248.6	160.6
Advanced Surveillance Program (ASP)	5.0	4.0
Payroll	18.5	18.8
<b>Total <sup>1/</sup></b>	<b>\$472.7</b>	<b>\$367.3</b>

<sup>1/</sup> Includes mandatory funding of \$250 million from the Aviation Security Capital Fund

The FY 2013 request will be used to test, evaluate, procure, and deploy electronic baggage screening technology systems. TSA's Electronic Baggage Screen Program (EBSP) is responsible for ensuring

that 100 percent of all checked baggage is screened with Explosives Detection Systems (EDS) or a suitable alternative. The two primary technologies acquired and deployed include EDS equipment and Explosives Trace Detection (ETD) devices. TSA’s activities related to purchasing and installing EDS and ETD systems consist of some or all of the following, depending on the equipment and specific location: 1) operational testing and evaluation (OT&E), 2) equipment purchase, 3) site survey and design, 4) site preparation, 5) facility modification, 6) warehousing and shipping, 7) equipment installation, integration, and multiplexing, 8) independent verification and validation testing, and 9) program support.

In 2006, TSA developed a Strategic Plan for achieving risk-based, optimal screening solutions. Implementation of these optimal solutions has resulted in decreased life cycle costs for the EBSP. TSA’s progress towards completing airports of highest priority as identified in TSA’s risk-based EBSP Integrated Deployment Model is shown below.

***Program progress relative to EDS/ETD deployment and facility modifications***

*Projections through FY 2013\**

	Total Number of TSA Airports**	Entire Airport Completed	Some Screening Areas with Completed Systems	Total Number of Airports with Some Completed Systems	Percentage of Airports with Some Completed Systems
CAT X	28	15	12	27	96%
CAT I	57	38	7	45	79%
CAT II	77	61	10	71	92%
CAT III	125	102	1	103	82%
Total	287	216	30	246	86%

\* As of August 31, 2011, and subject to change based on enacted funding levels.

\* Projects planned to be completed with FY 2009, American Recovery and Reinvestment Act (ARRA), and FY 2010-FY 2013 funds. FY 2012 and FY 2013 funding levels are based on the FY 2012 - FY 2016 Capital Investment Plan for the EBSP. This forecast will be impacted by new planning criteria included in the Recapitalization and Optimization Plan.

\* Assumed legislative approval to allow the Aviation Security Capital Fund to be used for procurement and installation of equipment.

\*\*Based on TSA Threat Category listing as of May 2, 2011.

**Prioritization**

TSA historically focused on completing the highest priority systems at Airport Security Threat Category (CAT) X – III airports with risk being a major factor in determining the priorities. As shown in the chart above, considerable progress has been made towards this goal.

As of December 2011, TSA had approximately 2,000 EDS units deployed at airports nationwide. A large portion of the EDS and ETD fleet was deployed in 2002 and 2003 to meet the requirements of the Aviation and Transportation Security Act of 2001 (PL 107-71). As a result, many EDS and ETDs are reaching the end of their useful lives of approximately seven to ten years. In FY 2012, EBSP shifted its planning and programming focus to make recapitalization a priority, looking first at operational performance then at equipment age.

This change in emphasis reduced TSA's need to fund major facility modification projects and increased the funding requirements for the purchase and installation of new equipment to replace the aging fleet. As a result, TSA requested legislative changes to restrictions on the use of funding received from the Aviation Security Capital Fund (ASCF), which previously restricted the use of funds to facility modifications at airports. Upon legislative approval in FY 2012, TSA began using ASCF funds for the procurement and installation of EDS equipment required for its recapitalization effort in addition to facility modifications.

### **Recapitalization and Optimization**

Recapitalization addresses the programmatic and project-specific elements requisite for EDS and ETD life cycle replacement. Recapitalization efforts focus on a like-in-kind replacement of existing equipment with minimal additional modifications. Optimization refers to efforts that also include significant system changes designed to enhance safety and security, improve performance, increase efficiency, reduce operating costs, and address personnel considerations associated with in-line EDS.

To address the significant need to recapitalize the existing EDS and ETD fleet, TSA has developed a formal recapitalization plan. The recapitalization plan:

- Identifies and defines the processes needed for implementing a successful recapitalization and optimization effort;
- Defines information needs and sources to support the plan, and technical decisions for prioritization, scheduling, resource planning, and execution;
- Ensures process consistency across all projects; and
- Defines and prioritizes a list of eligible recapitalization and optimization projects.

### **Technology**

EDS equipment can exist in two configurations: stand alone or in-line. In-line configurations integrate the EDS equipment into the baggage handling system. TSA benefits from operational improvements associated with this type of automation. For instance, working conditions for Transportation Security Officers (TSOs) can improve with in-line systems. Alarms can be resolved in quieter, dedicated spaces that are properly designed for the alarm resolution function.

Continuous improvements are required to enhance threat detection, increase equipment reliability, reduce downtime, extend service life, and eliminate TSO safety hazards in order for TSA to substantially improve the effectiveness and efficiency of the deployed screening equipment.

In FY 2010, TSA began a competitive procurement effort for EDS that involves rigorous processes for establishing requirements, testing the products, evaluating the tests, and weighing the value of available options to determine which combination of factors provide the best solution. TSA will use the competitive procurement effort as the primary tool for driving the technological changes necessary to achieve improved security and increased performance at a lower life cycle cost. TSA has established procurement windows during which vendors can submit proposals associated with one or more of the following EDS technologies:

- High-speed (HSEDS): Throughput > 900 bags per hour (bph)
- Medium-speed (MSEDS): 400 < Throughput ≤ 900 bph
- Reduced-size (RSEDS): 100 < Throughput ≤ 400 bph

ETDs are used both as primary and secondary screening methods (i.e., resolving EDS alarms). ETDs are the second largest component of equipment cost within the EBSP program. ETDs are designed to detect explosives residue left on an item.

**Purchase of Checked Baggage Equipment: \$183.9 million:** The FY 2013 request includes funding to support the purchase of 155 EDS for deployment in our Nation’s airports. The procurement will consist of RSEDS, MSEDS, and HSEDS. Purchases in FY 2013 are planned to support projects where facility modifications will be completed from prior year funded projects and to purchase units to replace aging equipment in the field. TSA will continue implementation of its competitive procurement strategy and initiate data collection activities for more stringent detection requirements. Efforts will continue toward reducing purchase costs through competitive procurements in addition to the implementation of contracts for EDS and ancillary equipment that incorporate direct shipping to airports instead of warehouses. TSA will also continue to pursue potential equipment upgrades capable of extending the life of existing equipment as part of its effort to contain procurement costs.

The following table provides a breakout of planned technology purchases:

(dollars in millions)

EDS Type	FY 2012		FY 2013 Budgeted	
	Planned Purchases	Projected Costs	Planned Purchases	Projected Costs
Reduced-Size	90	\$45.0	29	\$14.5
Medium Speed	124	155.6	112	134.4
High Speed	0	0	14	35.0
<b>Total</b>	<b>214</b>	<b>\$200.6</b>	<b>155</b>	<b>\$183.9</b>

**Installation: \$160.6 million:** The FY 2013 request includes funding for installation. Installation funding supports the multi-year Letter of Intent requirement and the installation of electronic baggage screening equipment in the Nation’s airports. In addition to equipment installation, integration, and multiplexing, installation activities include independent verification and validation testing, site survey and design, facility modification, site preparation, warehousing and shipping, OT&E, and program

support. TSA will continue efforts to reduce and avoid program support costs via improvements to data and document management and processing systems.

Installation funding is also used to evaluate the impact of new security technologies, procedures, and policies. TSA analyzes the integration of new and modified systems and concepts of operation to ensure operational effectiveness and suitability prior to full system production and deployment. The purpose of this work is to test, evaluate, and analyze pre-production or production representative systems under realistic conditions, including operation by those who will use the equipment under the proposed concept of operations in the field under a variety of environmental conditions. In particular, this includes:

- OT&E as part of the acquisition process for items procured by TSA;
- OT&E in support of regulatory and policy decisions in areas such as air cargo;
- Pilots, concept demonstrations, and field experimentation in support of mission area analyses, concept of operations development and workforce characterization; and
- T&E capabilities development to improve the quality and utility of evaluation products.

**Advanced Surveillance Program (ASP): \$4.0 million:** The ASP provides additional security capabilities as part of TSA’s layered approach. This is accomplished by partnering with transportation authorities to expand their existing surveillance systems. In doing so, the Federal Government gains the ability to observe and detect people and property moving through the security screening process and facilities. Advanced surveillance systems have proven to be a key component in the “best practices” of the security industry world-wide. They provide threat identification, situational awareness, deterrence, loss prevention, investigative and legal activities along with standard management functions within the checked baggage areas. ASP promotes a cooperative partnership and sharing of information between Federal and local authorities and provides invaluable coordination for command and control as well as first responders in the event of an incident or threat. Funding is requested in the Checkpoint Support PPA to support ASP within the checkpoint areas, to include exit lanes, sterile areas, and queue lanes.

ASP will complete two projects in FY 2013, bringing the total number of projects completed to 75.

	Projects Completed with Prior Year Funds	Projects to be Completed with FY 2013 Funds
Advanced Surveillance Program Projects	73	2

**Payroll: \$18.8 million:** The request provides funding for 122 full time positions to support TSA’s Electronic Baggage Screening Program activities. These personnel consist of experienced technical and scientific professionals, such as engineers and logistics specialists, who are able to work closely with airports, vendors, and domestic and international transportation security partners in order to carry out the mission.

In FY 2013, the EDS Procurement/Installation PPA will be reduced by \$17.6 million due to Enterprise-wide Efficiencies, efficiencies from Administrative/Professional Support contracts and other expenses, as well as savings due to efficiencies from the purchase of supplies and materials, and the operation of equipment,.

**Management Efficiencies – (\$17.630 Million)**  
(dollars in thousands)

<u>Item</u>	<u>Sub-Total</u>	<u>Total</u>
Enterprise-Wide Efficiencies		(\$ 11,982)
General TDY	(\$ 69)	
Conferences	(\$ 18)	
OFPP Directed Purchasing Savings	(\$ 11,895)	
Admin/Professional Support Contract Efficiencies		(\$ 1,250)
Management Adjustments		(\$ 4,398)

**Department of Homeland Security  
Transportation Security Administration  
Aviation Security:  
Screening Technology Maintenance  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: Screening Technology Maintenance**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	-	-	<b>322,555</b>
<b>2012 Enacted Budget Authority</b>	-	-	<b>320,365</b>
2013 Adjustments-to-Base	-	-	6,235
<b>2013 Current Services</b>	-	-	<b>326,600</b>
2013 Program Change	-	-	(17,600)
<b>2013 Total Requested Budget Authority</b>	-	-	<b>309,000</b>
Total Change 2012 to 2013	-	-	(11,365)

TSA requests \$309.0 million for Screening Technology Maintenance. The adjustments-to-base include: an increase of \$17.1 million to support screening technologies that are no longer under original manufacturer warranty beginning in FY 2013; a decrease of \$10.8 million for management efficiencies. The program change includes a \$17.6 million decrease for contract efficiencies, as well as the procurement of more efficient screening security equipment.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The following table provides the components of the PPA's Current Services:

(dollars in millions)

	<b>FY 2012</b>	<b>FY 2013</b>
Checked Baggage Equipment Maintenance	\$257.3	\$234.8
Checkpoint Equipment Maintenance	59.4	72.2
Disposal	3.6	2.0
<b>Total</b>	<b>\$320.3</b>	<b>\$309.0</b>

Funding in this PPA supports the maintenance and disposal of Transportation Security Equipment (TSE) in the Nation's airports. Maintenance is essential to preserve the operational capability of

security technology equipment. Once warranties expire (normally after 12 - 24 months), all TSA checkpoint and checked baggage screening equipment is under a maintenance contract throughout its life cycle. TSA plans to reduce maintenance costs by obtaining two-year warranties for screening equipment procured in FY 2012 and beyond. Most maintenance is performed by contractor Field Service Technicians working for Original Equipment Manufacturers or a third party Maintenance Service Provider. Preventive maintenance is performed according to the manufacturer's recommended schedule (e.g., monthly, annually, etc). Corrective maintenance support is provided 24 hours a day, 7 days a week, to perform unplanned corrective repairs in the field. Maintenance contracts include labor costs for all preventive and corrective maintenance, as well as material costs for repair parts or consumables (e.g., Explosives Trace Detector swabs).

**Checked Baggage Equipment Maintenance: \$234.8 million:** This request includes funding for preventive and corrective maintenance activities required to maintain the operation of deployed checked baggage screening systems. These costs include labor; repair parts; packaging and transportation of repair parts; initial consumables for ETDs; tools, test equipment and calibration; maintenance training; and related logistics, data management, safety, occupational health, and environmental management functions.

Below is a breakout of projected maintenance costs for checked baggage screening equipment. The FY 2013 requirement represents the maintenance cost for units no longer under warranty, not the unit cost for the total number of fielded units.

Equipment*	FY 2013 Fielded Quantity	Average Number of Units Out of Warranty	Average Number of Units in Warranty	FY 2013 Requirement
<b>EDS</b>				
CTX-5500	272	272	0	\$22,520,719
CTX-9000	269	269	0	\$29,039,337
CTX-9400	142	142	0	\$15,329,316
CTX-9800	93	39	54	\$4,210,164
e6000/6600	724	664	60	\$76,618,553

<b>Subtotal</b>				<b>\$66,638,785</b>
<b>Call Center/Excepted Maintenance/Program Management</b>				<b>\$3,946,681</b>
<b>Support Services</b>				<b>\$1,565,500</b>
<b>Total Checkpoint Maintenance Requirement</b>				<b>\$72,150,966</b>
<b>Disposal</b>				<b>\$1,000,000</b>

\*The make/model of the equipment is subject to change based on actual acquisitions.

**Disposal: \$2.0 million:** This request includes funding for the disposal of equipment. Security equipment is decommissioned when evolving operational requirements (e.g., higher screening throughput), technological advancements (e.g., improved detection capability), or supportability problems (e.g., frequent failures) dictate the need for replacement. Sometimes equipment is redeployed to satisfy screening requirements at other airports, or loaned to partner nations based on requirements from the TSA Office of Global Strategies. Upon request, security equipment that is not redeployed is offered to other DHS and federal agencies, or returned to manufacturers for credit on future procurements. Otherwise, surplus equipment is provided to the Defense Logistics Agency (DLA) Disposition Services for salvage and destruction. This budget includes funding to remove Sensitive Security Information and hazardous material from disposal equipment and for DLA disposal services.

In FY 2013, the Screening Technology Maintenance PPA will be reduced by \$10.8 million due to enterprise-wide efficiencies, savings from Administrative/Professional Support contracts, and savings due to efficiencies from maintenance of equipment and other expenses. The following table provides a further breakout of the efficiencies planned for the PPA:

**Management Efficiencies (\$10.819 Million)**  
(dollars in thousands)

<u>Item</u>	<u>Sub-Total</u>	<u>Total</u>
Enterprise-Wide Efficiencies		(\$ 1,431)

Total Change 2012 to 2013	6	180	2,005

TSA requests \$371.9 million for Aviation Regulation and Other Enforcement. The adjustments-to-base include: an increase of 6 FTP/6 FTE for DHS Balanced Workforce Strategy Follow-On; a decrease of \$10,000 for transfer from Aviation Security appropriation to Transportation Security Support; an increase of \$734,000 for pay COLA; an increase of 174 FTE and \$31.9 million for annualizations associated with FY 2012 program increases for 12 multi-modal Visible Intermodal Prevention and Response (VIPR) Teams, Passenger Screening Canines, and international staff working in support of air cargo security enhancements; and a decrease of \$30.6 million for management efficiencies.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Aviation Regulation is responsible for providing law enforcement and regulatory presence at airports to ensure compliance with required security measures and response to security incidents. It also provides an international component to foster consistency in worldwide security requirements.

The following table provides the components of this PPA:

(dollars in millions)

	<b>FY 2012 Enacted</b>	<b>FY 2013 Request</b>
Regulatory Inspection and Enforcement	\$119.5	\$120.7
International Operations	\$ 70.1	\$ 65.8
International Repair Station Inspections	\$ 2.6	\$ 2.6

Airport Law Enforcement & Assessments	\$ 81.4	\$ 70.6
National Explosive Detection Canine Training Program (NEDCTP)	\$ 64.4	\$ 62.1
General and Commercial Aviation	\$ 12.7	\$ 12.7
Visible Intermodal Prevention and Response (VIPR)	\$ 19.2	\$ 37.4
<b>Total</b>	<b>\$369.9</b>	<b>\$371.9</b>

**Regulatory Inspection and Enforcement: \$120.7 million (\$107.3 million domestic and \$13.4 million international):** The mission of the regulatory inspection program is broad and involves the evaluation of the security integrity of more than 450 U.S. airports, 550 foreign airports, and a combined total of over 1,500 domestic and international carriers that operate in the United States. These inspectors also conduct periodic inspections of over 7,500 indirect air carriers operating in the United States.

Over the past few years, TSA’s inspector community has made significant efforts to ensure that various airport inspections are scheduled in a way that balances/maximizes oversight while identifying possible efficiencies in scheduling. Risk scores are used to drive and prioritize inspection activity and take into account various factors, including the latest intelligence information.

The following chart provides historical and current information on the total number of Transportation Security Inspector (TSI) positions. This PPA includes 898 TSI-Aviation Domestic Inspectors, of which 166 are Canine Handlers; 45 TSI-Aviation International Inspectors; and 15 TSI International Repair Station Inspectors

	<b>FY 2011</b>	<b>FY 2012</b>	<b>FY 2013</b>
<b>Aviation Regulation</b>	<b>915</b>	<b>958</b>	<b>958</b>
Aviation Regulation - Domestic Inspectors	657	657	657
Aviation Regulation - Domestic Canine Inspectors *	123	166	166
Aviation Regulation - Domestic VIPR Inspectors	75	75	75
Aviation Regulation - International Inspectors	45	45	45
Aviation Regulation - International Repair Station Inspectors	15	15	15

Air Cargo - International Inspectors	10	10	10
<b>Surface</b>	<b>404</b>	<b>404</b>	<b>404</b>
Surface - Domestic Inspectors	250	250	250
Surface - VIPR Inspectors	154	154	154
<b>Total TSA Inspectors</b>	<b>1,949</b>	<b>1,992</b>	<b>1,992</b>

\* FY12 includes 23 proprietary Federal Air Marshal canine handlers converted into domestic canine inspectors plus 20 additional passenger screening canine teams received as part of P.L. 112-74

Aviation TSIs (TSI-As) have an essential role in executing local annual inspection plans based on the national inspection plan. As part of their inspection responsibilities, TSI-As review records and files pertaining to criminal history records checks performed pursuant to federal law. The inspectors also review records and files to ensure compliance of indirect air carriers; private passenger and/or cargo charters; and airmen and aircrew with security requirements. In addition to inspections, TSI-As also perform testing to determine compliance with transportation security regulations. The TSI-As investigate incidents related to violations of TSA regulations, security directives, and approved security programs. Inspectors deliver technical briefings and provide assistance to the aviation industry in interpreting agency policies to ensure compliance with rules. Inspections are both scheduled and random and may include one or all of the critical security elements required by TSA.

In FY 2011, TSA completed over 1,595 airport inspections, 30,056 aircraft operator inspections and 646 foreign air carrier inspections. To ensure the adequacy and integrity of security at airports, TSIs evaluate the types of fences, lighting, and locks being used, among other important security measures through visual and hands-on inspection. Based on these assessments inspectors will recommend enhancements, where appropriate, for non-regulated airports/facilities, including general aviation landing facilities and airports, and for aircraft operators. Areas of emphasis for inspection and/or assessment include: access control systems, security identification systems, surveillance systems, law enforcement response capabilities, physical security of aviation facilities and aircraft.

Inspectors are given the authority to initiate enforcement actions against airports, air carriers, and indirect air carriers where compliance violations have occurred or corrections have not been made. This includes misconduct of employees that threaten the security of an airport and/or aircraft. In FY 2011, 22 congressionally mandated Joint Vulnerability Assessments at CAT X and CAT I airports were completed in coordination with the Office of Law Enforcement/Federal Air Marshal Service. Inspectors must be well trained and knowledgeable in order to assist the agency Chief Counsel in the preparation of formal enforcement actions against those who violate security requirements.

For FY 2013, the regulatory inspection and enforcement program plans to continue to conduct one comprehensive annual baseline inspection of all airports, aircraft operators, flight schools, repair stations, and foreign air carriers at domestic airports; conduct bi-monthly multi-week airport and flight school strikes, issue quarterly special emphasis inspections that focus on threat, risk, and previous year compliance; and support VIPR, and Playbook activities.

**International Programs (including International Repair Station Inspections): \$68.4 million:**

TSA's Office of Global Strategies (OGS) promotes alignment and consistency between the security requirements of the U.S. and foreign governments and is responsible for all facets of the agency's activities at foreign locations. Its statutory and regulatory responsibilities focus on identifying and mitigating security risks to transportation modes used extensively by U.S. citizens and foreign governments. When a new threat or vulnerability emerges, OGS must coordinate the implementation of appropriate responses to mitigate the likelihood of a successful attack with both foreign governments and industry. TSA takes a leadership role as a permanent U.S. member in the regional and international organizations concerned with transportation security [i.e., International Civil

Aviation Organization (ICAO), the Group of Eight (G8) Transportation Security Subgroup, and the European Civil Aviation Conference (ECAC)].

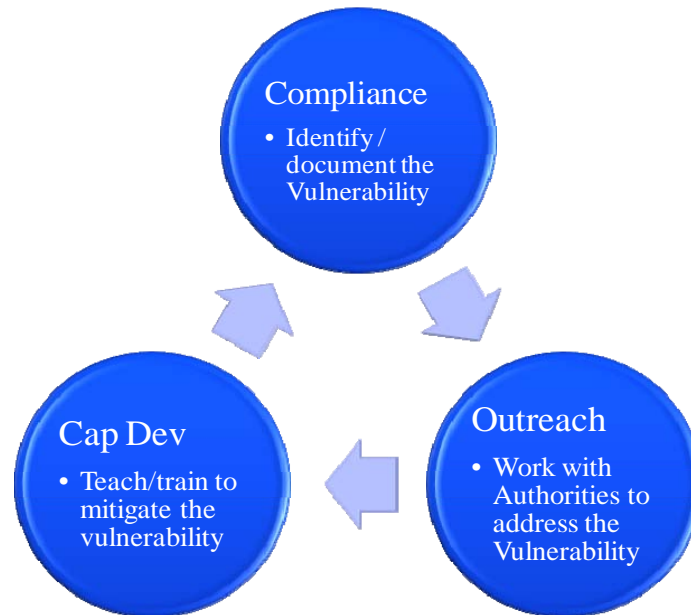

TSA strives to lead worldwide improvements in transportation security using a multi-layered approach, which includes:

- Liaison activity and representation with over 100 foreign governments, on-site liaison activity and representation in 25 foreign countries;
- Evaluation and documentation of vulnerabilities at nearly 300 airports and 900 air carrier stations located in foreign countries around the world;
- Liaison activity and representation with approximately 240 foreign air carriers;
- Active leadership within the regional and international community that comprises the world's transportation security expertise engaged in policy development; and
- Capacity building program for nations needing assistance in order to meet international standards.

In addition to the President's request, in FY 2012, TSA received an increase of \$3.5 million and 14 positions for International Air Cargo Aviation Security Enhancements. The increase will be used to provide additional inspection, regulations and security specialists to ensure compliance with screening requirements, conduct risk assessments, and perform aviation security operations overseas. Dependant on country approval and space at the embassies, these positions included one Transportation Security Administration Representatives (TSAR) in Canada International Civil Aviation Organization (ICAO), one Regional Director for the Africa Middle East region (AME), three International Security Support staff for AME, Western Hemisphere region (WH) and Asia Pacific region (AP), three Global Policy and Planning Analysts, four Security Technical Analysts and two Security Specialists responsible for AME and WH regions.

TSA seeks to work proactively with foreign partners and overseas transportation operations affecting the United States by identifying risk through compliance, mitigating risk through outreach/engagement and capacity development, and responding to incidents as they occur.

## IDENTIFICATION OF RISK

As threats and risks evolve, mitigation efforts will continue to be re-evaluated. As identified in the Transportation Sector Security Risk Assessment, international aviation represents the highest risk category. As a result, outreach and engagement with foreign partners, industry, and within the interagency is necessary to support threat mitigation to ensure policies are understood and implemented. As the threats evolve and shift international locations, TSA must be proactive in evaluating and shifting staff and resources to ensure that mission coverage is located where needed. This right-sizing ensures that the right people are in the right place at the right time. Each region presents its own challenges, but also its own best practices and lessons learned that, when combined, will enhance TSA's ability to affect change globally.

### Transportation Security Administration Representatives (TSARs)

TSARs serve as on-site coordinators for the TSA response to terrorist incidents and threats to U.S. assets at foreign transportation modes. The TSARs also serve as principal advisors on transportation security affairs to U.S. Ambassadors and other embassy officials. TSARs handle all modes of transportation and are responsible for ensuring the National Civil Aviation Security Programs meet international standards for aviation security. TSARs also facilitate the TSA compliance effort by planning and coordinating airport assessments.

TSA increased TSAR positions by three in the FY 2011 using funding from within the programs current base. These positions were for Dubai, United Arab Emirates (UAE); Dakar, Senegal; and New Delhi, India. The embassy in Dubai, UAE does not have adequate space for a TSAR, therefore OGS has shifted this position to Abu Dhabi, UAE, and the request has been approved by UAE and the Department of State (DOS). The TSAR position in New Delhi was rejected by the Government of India. This TSAR position shifted to a Regional Director position to provide coverage in the field. There were space constraints at the Embassy in Dakar so TSA shifted this position to Accra, Ghana,

This request has been denied. TSA is working with other countries in the Africa Middle East region to determine a location. Further, in evaluating the OGS's staffing scorecard and analyzing position locations in respect to threat levels, the decision was made to close the TSAR office in Athens, Greece and relocate it to The Hague, Netherlands and to place a TSAR position in Hawaii to work closely with the Asia Pacific island region. This additional TSAR was created using an existing headquarter position. These shifts occurred in FY 2011. As previously mentioned, a portion of the FY 2012 increase will be allocated to fund an additional TSAR in Canada.

TSA developed, distributed, and analyzed a comprehensive staffing scorecard to determine the number of countries that should be assigned to each TSAR. The scorecard accounts for the number of Last Point of Departure (LPD) airports in a given country, the vulnerabilities at those airports, the number of carriers and weekly flights from the airports, threat level in the country, the level of cooperation between the host government and the United States, the amount of assistance needed (and likelihood of sustainment of any help provided), and the level of priority of the country for TSA and the U.S. Government. The resulting data enables TSA to determine the appropriate distribution of countries to each TSAR to ensure an equivalent workload is maintained across the workforce.

<b>TSARs</b>

## Pre-Clearances

At 14 airports (eight in Canada, two in the Bahamas, one in Bermuda, one in Aruba, and two in Ireland), Customs and Border Protection (CBP) officers pre-clear passengers and baggage for entry into the United States. Inspection procedures, which are commensurate with U.S. port of entry screening, involve immigrations, customs, and agriculture screening. Pre-cleared international flights arrive at a U.S. domestic gate and passengers deplane directly into the sterile area at more than 65 U.S. airports without having another U.S. government inspection. Upon arrival at the U.S. domestic terminal facility, the traveler may either connect to a U.S. domestic flight or they may leave the airport. In order to permit these passengers to bypass TSA screening, TSA must ensure that the screening measures applied to passengers and their carry-on baggage at the pre-clearance foreign airport is equivalent to those measures performed at domestic U.S. airports. Determination of comparability entails extensive negotiation with the host government and frequent observations of operations.

## Capacity Development

TSA's Capacity Development works to raise the baseline of transportation security and address the needs of partner nations to build sustainable aviation security practices through capacity development. An important part of this effort is aviation security training which is in response to needs identified by a number of entities (Department of Homeland Security, Anti-Terrorism Assistance Program, Department of State (DOS), Department of Transportation, and the Organization of American States (OAS)/Inter-American Committee Against Terrorism). In addition to assisting these entities, TSA provides sponsored civil aviation training resulting from foreign airport assessments or at the request of civil aviation authorities of foreign governments as conveyed through TSARs abroad.

TSA training is available to both government and non-governmental entities responsible for performing or overseeing security measures. The following represents a myriad of opportunities that can be provided:

- Auditor/Inspector Techniques;
- Cargo Security Management;
- Essential Instructor Skills Workshop;
- Excellence in Screening Techniques;
- Incident Management and Response;
- Instructional Design and Instructor Skills; and
- Preventive Security Measures.

Aviation security training is conducted on-site in the requesting country, at an international airport or alternate training venue. TSA solicits the assistance of men and women across the agency that have a desire to serve as instructors and provide their subject matter experience to provide assistance to nations in need.

In FY 2011, the DOS sought TSA assistance in providing 17 aviation assistance training missions in 16 countries. Also, the OAS, which is made up of foreign nations in this hemisphere, also sought TSA

assistance in providing 16 aviation assistance training missions in 14 countries. Both DOS and OAS paid for all TSA travel costs associated with these missions.

### Aviation Security Sustainable International Standards Team (ASSIST)

In addition to conducting aviation security training courses in support of TSA initiatives the ICAO, the Organization of American States and the U.S. Department of State, and TSA developed and fielded its own capability for providing focused and comprehensive support to willing partner countries with the goal of appreciably enhancing their aviation security programs. ASSIST deploys single and multifaceted teams of subject matter experts to provide in-depth training and technical assistance that help willing aviation security officials develop and sustain suitable aviation security institutions and procedures that meet all international standards and recommended practices. ASSIST focuses geographically on Africa, the Latin America/Caribbean area, and the Asia-Pacific region in light of the exponential growth in traffic from these regions to the United States, as well as concerns about the security of transiting U.S. passengers and cargo.

### Cargo Security

Air cargo security, especially those measures applied to goods carried on passenger aircraft, remains important to DHS. TSA continued several efforts initiated in FY 2010 to ensure that cargo destined for the United States is subjected to the required level of screening. These efforts include:

- Convening the International Cargo Workgroup and focusing on the full spectrum of cargo security issues such as determining acceptance of other countries' cargo programs, identifying best practices for dissemination to other cargo experts, and incorporating all-cargo operations into the Compliance Work Plan;
- Revising the comprehensive Risk Methodology that aligns with the process used for passenger airports;
- Ensuring that the FY 2012 Work Plan reflects a comprehensive review of all airports and carriers involved in transporting cargo directly to the United States;
- Implementing the airport assessment methodology for those airports providing only cargo operations/service to the United States;
- Beginning compliance/verification procedures for new ICAO standards pertaining to Supply Chain Security; and
- Conducting visits to all airports and air carrier stations involved in transporting cargo on passenger aircraft to the United States.

As mentioned above, TSA received an additional \$3.5 million and 14 positions in FY 2012 for International Air Cargo Aviation Security Enhancements. These funds and positions will be utilized for the coordination of cargo security efforts.

### Transportation Security Specialists (TSS)

TSA's OGS identifies vulnerabilities at foreign locations through two primary means – assessments of foreign airports and inspections of air carriers that fly from those airports.

Under 49 United States Code (U.S.C.) 44907, TSA is charged with assessing all foreign airports with flights to the United States and those from which U.S. air carriers operate (regardless of the destination). TSA has a cadre of Security Specialists who visit the nearly 300 airports at one- to three-year intervals. Frequency of the visits is based on risk computations of current threat, documented vulnerabilities, and flight data. During the assessments, TSA evaluates the security posture of the airport in accordance with security standards established by the ICAO. The observations focus on screening (passengers, accessible property, and checked bags), access control (e.g., fence integrity, badge display and control, vehicle access), aircraft security (e.g., ensuring the aircraft was guarded against any unauthorized access), cargo, catering, and quality control (e.g., ensuring that screeners were properly trained).

Annual visits are conducted to ensure that all U.S. air carriers operate in compliance with TSA regulations identified in the Aircraft Operator Standard Security Program (AOSSP) and supporting Security Directives (SDs). TSA also inspects foreign air carriers that fly to the United States from each airport that they operate to ensure compliance with the Model Security Program and supporting Emergency Amendments (EAs). At airports where the vulnerability shortfalls have been documented as particularly egregious, these inspections occur semi-annually.

TSA has a spectrum of responses available to mitigate issues identified during these visits. Options range from providing on-the-spot correction recommendations, to conducting formal training, to recommending enacting a Public Notice that the airport does not implement adequate security measures, to suspending service. These last two responses are usually only considered when all other attempts have failed in assisting the airport or host government to improve security. Interim measures may also include issuance of site-specific SDs and EAs (that require additional measures by the regulated air carriers) or repeated visits by Security Specialists to evaluate progress.

The TSS and support staff will enable TSA to continue airport assessments, air carrier inspections, and in the very near future, foreign repair stations audits. In FY 2012, TSA increased the TSS Cargo Inspectors by 37 - reference the PPA Air Cargo for funding information.

<b>TSS</b>	
<b>Location</b>	<b>Number</b>
Dallas	22

HQ	9
<b>TOTAL</b>	<b>127</b>

\*FY12 FTP location subject to space availability at Embassies

\*\*AME ROC location TBD – working with countries

The nine headquarters staff are made up of 6 TSS Desk Officers, one Compliance Assistant, one Cargo TSS Program Analyst, and one dedicated Inspection Trainer.

### Repair Station Inspection Program

TSA is required under Vision 100 (49 U.S.C. 44924) to establish security regulations for foreign and domestic aircraft repair stations and to conduct audits of foreign repair stations. The Aviation Repair Station Security Notice of Proposed Rule Making (NPRM), TSA-2004-1713 RIN 1652-AA38, proposes security requirements for repair stations that are certificated by the Federal Aviation Administration (FAA) and codifies TSA's inspection authority.

This program serves to ensure the security of maintenance, overhaul, repair and assembly work conducted on air carrier aircraft and components at foreign and domestic repair stations. This will be achieved through specific inspection activities including security reviews and audits, vulnerability assessments and surveys. Implementation of the Vision 100 legislation for repair stations will allow FAA to certify new repair stations regulated under 14 CFR part 145.

On November 17, 2009, TSA issued a NPRM for aircraft repair station security that clarifies the agency's inspection authority and imposes security requirements for both domestic and foreign repair stations, notably pertaining to control access for aircraft and aircraft components. Efforts include, but are not limited to, conducting voluntary reviews for security enhancement of foreign and domestic repair stations, inspecting for compliance of approximately 4,100 domestic repair stations and 700 foreign repair stations and identifying security gaps through security analysis and action programs. The final NPRM was drafted and is currently in the approval process with an expected issuance date in calendar year 2012.

The Repair Station Inspection program uses a risk-based methodology to schedule foreign airport assessments and foreign air carrier inspections. Currently, all air carriers are inspected once annually unless they have a high "Airport Vulnerability" rating. This rating is used to determine the frequency of assessment and inspection planning based on the outcome of threat, vulnerability, and consequence analysis. This methodology allows TSA to efficiently utilize its workforce by visiting airports with a higher likelihood of being a target for criminal or terrorist acts, while taking into account analysis of the protective measures in place and the potential impact for loss.

This program engages industry through a voluntary audit program which involves a three-tier approach for conducting audits: 1) scheduling visits using the risk-based prioritization in conjunction with TSA Foreign Airport Assessment Program; 2) outreach to U.S. air carriers to capture the foreign repair stations they contract; and 3) contacting corporations with multi-station ownership for information on their foreign repair stations.

### Global Policy and Programs

TSA's Global Policy and Programs (GPP) guide TSA's development of policy, including cargo policy, affecting international operations and stakeholders. This includes planning international projects and diplomatic approaches, strategic planning, cargo related outreach, and ensuring consistent messaging

to international industry members concerning policy and change. TSA also assigns a point of contact to the ICAO to work collaboratively towards the development of global aviation security standards. Since FY 2010, GPP has performed the ICAO policy development and implementation responsibilities that had been conducted by International Operations Division.

International Industry Representatives

International Industry Representatives (IIRs) serve as TSA's principal representative to the international aviation industry. The role of the IIR has become increasingly involved as more stringent rules, requirements, and procedures have been imposed on foreign air carriers with scheduled or public charter operations to and from the United States from foreign locations. The IIRs provide oversight and guidance to each foreign air carrier and are responsible for ensuring air carriers understand and comply with U.S. regulations and TSA-accepted security programs and initiatives.

In FY 2012, there are twelve IIRs in the field supported by five headquarters desk officers that support the IIR staff in the field. They serve as the headquarters communication and coordination link for the field when resolving highly sensitive security issues associated with international incidents, and develop and analyze the risk assessments and metrics. They communicate intelligence information, assist in the preparation and distribution of DHS/TSA policies and plans for threats to worldwide transportation security systems, and assist IIRs with technical direction for both foreign air and cargo carriers. As the table below indicates, IIRs are placed globally to assist TSA outreach efforts in locations with foreign partners. The IIR locations are determined by regional need, country approval and embassy space.

<b>IIRs</b>	
<b>Location</b>	<b>Number</b>
Abu Dhabi UAE	1
Asia Pacific Islands (Hawaii)	1
Beijing China	1
Caribbean/Central America	2
Frankfort Germany	3
Mexico City Mexico	1
Ottawa Canada	1
Singapore Singapore	1
Warsaw Poland	1
HQ	5
<b>Total</b>	<b>17</b>

The number of active foreign air carriers fluctuates per year as new carriers either begin or cease operations to the United States. At the close of FY 2011, there were 222 TSA-regulated passenger and all-cargo carriers.

**Airport Law Enforcement & Assessments: \$70.6 million**

Law Enforcement Officer (LEO) Reimbursement Program: In accordance with the ATSA, TSA established cooperative agreements with state and local law enforcement agencies to provide uniformed officers at passenger security checkpoints under the flexible response authorities granted to TSA. These agreements provide financial assistance to partially reimburse airports at screening points throughout the United States for post 9/11 law enforcement hours. They ensure that a consistent law enforcement presence is always available to deter suspicious activity and respond quickly in the event of a breach of security at designated checkpoints.

In FY 2011, TSA funded 327 cooperative agreements that included the following LEO patrol and response hours:

Airport Category	Hours
Cat I	524,851
Cat II	454,435

<b>Cat III</b>	348,771
<b>Cat IV</b>	244,179
<b>Cat X</b>	813,666
<b>Total</b>	<b>2,385,902</b>

In FY 2012 and FY 2013, TSA will continue to improve program efficiencies and maximize the use of available program funds by reviewing participants' actual annual expenditures and adjusting award levels accordingly. The review process will include site visits to a select number of airports during the course of the fiscal year to ensure operational and fiscal compliance.

Assistant Federal Security Directors for Law Enforcement (AFSD-LEs):

In addition to these agreements, AFSD-LEs further coordinate and support TSA's security efforts with local law enforcement. AFSD-LEs partner with law enforcement officials from other Federal, State, and local agencies to address significant issues, share intelligence and ensure the safety of airports. AFSD-LEs are assigned to a hub airport, but most are also responsible for spoke airports in their district. By the end of FY 2012, TSA will have 104 AFSD-LEs positions that cover 275 airports due to an increase of 22 additional positions.

These positions will help to mitigate response times for investigations and to ease congestion at the checkpoint. Given the increased threat to aviation security, the additional strategically placed AFSD-LEs will provide an additional layer of support to the airports.

Joint Vulnerability Assessments:

Joint Vulnerability Assessments (JVAs) are a joint effort undertaken by TSA and FBI with the purpose of assessing current and potential threats to commercial air transportation facilities within the United States. The process is a direct result of the increasing threats to aviation, which prompted Congress to pass Section 310 of the Federal Aviation Reauthorization Act of 1966. Section 310 requires the FAA and the FBI to conduct joint threat and vulnerability assessments of security at U.S. airports. This responsibility was transferred to TSA under ATSA.

Man-Portable Air Defense System (MANPADS) Vulnerability Assessments (MVAs) are designed to enhance security of air transportation by minimizing the potential for missile or stand-off weapons attack against aircraft. The program is designed to deter, detect, and mitigate the MANPADS threat.

Multiple Disciplinary Vulnerability Assessment (MDVA) is a vulnerability assessment initiative that capitalizes on a multi-layered approach to gather and analyze information identified as vulnerabilities from personnel, physical and information systems within the inter-security environment of an airport. The MDVA will identify and mitigate insider threats. Oversight of the MDVA program was transferred from the TSA's Office of Inspections to TSA's Office of Law Enforcement/Federal Air Marshal Service (OLE/FAMS), in January 2011.

TSA also conducts international MANPADS Assist Visits (MAV) to partner with international allies on joint international assessments that are appropriate and mutually beneficial to the U.S. Government

and the host nation. These visits are similar to the domestic MANPADS Vulnerability Assessments and are conducted at foreign airports at the host country's request to help identify and define potential launch locations in areas surrounding the airport by using known terrorist methodology and weapon employment tactics and capabilities.

**National Explosives Detection Canine Training Program (NEDCTP): \$62.1 million**

TSA's NEDCTP develops, trains, deploys, and certifies explosives detection canine teams to deter and detect the introduction of explosive devices into the transportation system. Each team is composed of a specially trained canine and either a TSA or State and local law enforcement handler. Bomb threats cause disruption of air, land, and sea commerce and pose an unacceptable danger to the traveling public. Explosives detection canine teams are proven and reliable resources in the detection of explosives and are a key component in a balanced counter-sabotage program. Fostering partnerships throughout the Federal government, State and local law enforcement, and the international community is a key element of TSA's mission.

The use of TSA Passenger Screening Canine (PSC) teams in the airport passenger environment is an effective and efficient way to screen the general public in mass amounts. The Passenger Screening Canine (PSC) detection methodology relies on the canine's ability to process air currents and recognize odors that it is trained to detect, carried or body worn explosives whether someone is moving or still. The canine handler is trained to read the canine's behavioral changes to determine when and where the canine is indicating an explosives odor without knowledge of the targeted subject and follow the vapor wake to the explosive source.

Through Other Transaction Agreements (OTAs), TSA provides funding for training, certification and maintenance of the explosives detection capable canines, training for the handlers, and partial reimbursement of handlers' salaries and other costs. Through reimbursable (formerly cooperative) agreements, TSA provides funding for training, certification and maintenance of the explosives detection capable canines, training for the handlers, and partial reimbursement of handlers' salaries and other costs. In FY 2013, TSA plans to annualize the 20 additional PSC teams received in FY 2012.

<b>Explosives Detection Canine Team Assignments</b>	<b>FY 2012</b>	<b>FY 2013</b>
<b>AVIATION REGULATION &amp; ENFORCEMENT</b>		
<b>Aviation:</b> State & Local Law Enforcement-led teams <i>Funded 75% from Aviation Regulation &amp; Enforcement</i>	<b>497 teams @ 78 airports</b>	<b>497 teams @ 78 airports</b>
<b>Multi-Modal:</b> State & Local Law Enforcement-led teams	<b>21 teams @ 6 locations</b>	<b>21 teams @ 6 locations</b>
<b>Proprietary/Proprietary Multi-Modal:</b> Fed-led team	<b>23 teams @ 7 locations, 22 locations TBD</b>	<b>23 teams @ 7 locations, 22 locations TBD</b>
<b>Passenger Screening Canine Teams:</b> Fed-led teams <sup>1</sup>	<b>120 teams @ 30 airports</b>	<b>120 teams @ 30 airports,</b>
<b>AIR CARGO</b>		
<b>Legacy Cargo-Centric:</b> State & Local Law Enforcement-led teams <i>Funded 25% from Air Cargo for time spent in the Air Cargo environment.</i>	<b>Same team and location totals as Aviation Regulation</b>	<b>Same team and location totals as Aviation Regulation</b>
<b>Proprietary Cargo-Centric:</b> Fed-led teams	<b>120 teams @ 20 airports</b>	<b>120 teams @ 20 airports</b>
<b>SURFACE</b>		
<b>Mass Transit/Maritime:</b> State & Local Law Enforcement-led teams	<b>117 teams @ 18 locations</b>	<b>117 teams @ 18 locations</b>
<b>TOTAL NUMBER OF CANINE TEAMS</b>	<b>920</b>	<b>920</b>

<sup>1</sup> Passenger Screening Canine (PSC) is now used versus “Vapor wake ®” which is a trademarked term associated with Auburn University.

## **Transportation Security Network Management (TSNM) \$12.7 million**

TSNM coordinates aviation security efforts with airlines, airports, and within the general aviation community.

The Commercial Aviation Division is formed by the Office of Commercial Airlines and the Office of Commercial Airports. This division enhances communication and collaboration in policy development and management to improve the security of our Nation's commercial airports and airlines by working collaboratively with airline and airport industry stakeholders and their representatives to develop and manage aviation security policies and programs based on evolving threats.

### ***Commercial Airlines***

The Commercial Airlines program is responsible for 69 U.S. certificated aircraft operators. This activity includes the TSA/Aircraft Operator Corporate liaison function, development of new aviation security policy, and management of existing policy for necessary modification or elimination based on the evolving threat against full program commercial airlines. Assigned to multiple commercial airlines, Principal Security Specialists (PSSs) act as the TSA representative to provide the industry with supporting interpretations, clarifications, and assessments of the regulations. This office monitors the specific operator's compliance level and takes action when a trend is identified. PSSs are subject matter experts on their assigned carriers, included approvers of carrier's security training programs provided to the flight deck and cabin crew, and ground security coordinators. Additionally, staff from the Policy Branch provides vital subject matter expertise for critical incident management during times of national emergencies and conduct outreach to airlines when developing aviation security measures to mitigate threats. The Policy Branch initiates AOSSP changes, amendment and alternative procedures.

### ***Commercial Airports***

The Commercial Aviation Airports program builds relationships with the commercial airport industry and oversees the development of policies and programs to enhance security at the Nation's commercial airports. This office tasked the Homeland Security Study Analysis Institute (HSSAI) with developing a framework to assist commercial airport operators with resource allocation decisions, allowing TSA and the FSDs to understand factors that airport operators consider in making decisions regarding security resources in a fiscally constrained environment, and to inform airport operators of the various costs and benefits of innovative security measures in use at a range of commercial airports. TSA also continues to promote airports' biometrically enabled interoperable solutions based upon federal standards to include PIV-I, for non-federal issuers of credentials and FIPS-201. In spring 2010, TSA in partnership with industry, began revisions to this document which focuses on best practices with the intent to assist airport operators with incorporating security elements in planning, design and construction efforts. The revised document was published in May 2011. The In Depth Security Review (IDSR) completed the review of all 1,542 security directives, alternate procedures and security program amendments. It has organized requirements by area (such as patrols, access points, and vehicle inspections) and is putting forth recommendations to rescind, clarify, or consolidate requirements as necessary.

## **General Aviation (GA)**

General Aviation coordinates aviation security efforts with airlines, airports, and within the general aviation community. GA includes corporate operators, recreational and private aircraft, and charter operations; private and public use of general aviation airports, airmen, and airspace. The program works collaboratively with industry and government stakeholders to develop innovative methods to enhance security and to develop, disseminate, and consistently apply a framework of appropriate and feasible security standards. TSNM serves as the “one-stop” shop for all GA security matters. The program uses a threat based and risk management approach to develop strategies, policies, plans, and programs to reduce the security risks and vulnerabilities associated with GA operations.

### **Visible Intermodal Prevention and Response (VIPR): \$37.4 million**

The objective of VIPR deployments is to augment capabilities that disrupt and deter potential terrorist activity. To achieve this end, TSA utilizes risk-based, periodic random deployments that are unpredictably executed in timing, location, and types of activities. VIPR operations teams consist of TSA personnel that may include TSIs, TSOs, FAMs, BDOs, TSS-Es, Explosives Detection Canine teams, and Federal, State and local law enforcement officers. Uniformed VIPR team members provide a visible and official security presence apparent to all who use or are observing the mass transit or passenger rail system. VIPR activities bolster the system’s efforts to prevent an adversary from orienting on and breaching a pattern in security activities. The total number of VIPR deployments across transportation modes increased to approximately 170 to 190 per week in 2011. In FY 2013, TSA plans to annualize the 12 multi-modal VIPR teams received in FY 2012.

In FY 2013, the Aviation Regulation & Enforcement PPA will be reduced by \$30.6 million due to Enterprise-wide Efficiencies, and efficiencies from Administrative/Professional Support, and savings supplies, materials, operations and maintenance of equipment, and other expenses.

The following table provides a further breakout of the Administrative Savings for this initiative:

#### **Management Efficiencies – (\$30.574 Million) (dollars in thousands)**

<b>Item</b>	<b>Sub-Total</b>	<b>Total</b>
Enterprise-Wide Efficiencies		(\$598)
General TDY	(\$372)	
Overtime	(\$41)	
Conferences	(\$185)	
Management Adjustments		(\$29,976)

**Department of Homeland Security  
Transportation Security Administration  
Aviation Security:  
Airport Management and Support  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: Airport Management and Support**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	<b>2,622</b>	<b>2,313</b>	<b>488,672</b>
<b>2012 Enacted Budget Authority</b>	<b>3,081</b>	<b>2,974</b>	<b>570,226</b>
2013 Adjustments-to-Base	1	48	(611)
<b>2013 Current Services</b>	<b>3,082</b>	<b>3,022</b>	<b>569,615</b>
<b>2013 Total Requested Budget Authority</b>	<b>3,082</b>	<b>3,022</b>	<b>569,615</b>
Total Change 2012 to 2013	1	48	(611)

TSA requests \$569.6 million for Airport Management and Support. The adjustments-to-base include: an increase of 1 FTP/1 FTE for DHS Balanced Workforce Strategy Follow-On; a decrease of \$5,000 for transfer from Aviation Security appropriation to Transportation Security Support appropriation; an increase of \$1.3 million for pay COLA; an increase of 18 FTE and \$2.4 million for annualizations associated FY 2012 program increases for field staff and other support costs related to Transportation Security Officers (TSOs), 12 multi-modal Visible Intermodal Prevention and Response Teams, Passenger Screening Canines, and international staff; an increase of 29 FTE and \$4.5 million for annualizations associated with prior year field staff and other support costs related to TSOs hired for the first 1,000 deployed Advanced Imaging Technology machines; a decrease of \$26,000 for Enterprise-Wide efficiencies; and a decrease of \$8.7 million in Management Adjustments including efficiencies from supplies, materials, and other expenses.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The following table provides the components of this PPA.

(dollars in millions)

	<b>FY 2012 Enacted</b>	<b>FY 2013 Request</b>
Federal Security Directors (FSD) Staff and Headquarters	\$353.8	\$355.0
Transportation Security Operations Center (TSOC)	\$ 22.3	\$ 22.0
Airport Parking, Transit, and Fleet	\$ 27.2	\$ 27.0
Airport Rent, Furniture, Utilities, and Janitorial	\$166.9	\$165.6
<b>Total</b>	<b>\$570.2</b>	<b>\$569.6</b>

**Federal Security Directors (FSD) Staff and Headquarters: \$355.0 million:** This funding supports the salaries and benefits of FSDs and their staff, as well as travel, training, and contract requirements support. There are currently 120 FSD positions located throughout the Nation’s airports. The current list of airports by category is as follows:

<b>Airports by Category</b>	
CAT X	28
CAT I	57
CAT II	78
CAT III	126
CAT IV	157
<b>Total</b>	<b>446</b>

In addition, this funding provides for headquarters positions that direct the policy, analysis, and administration of aviation screening. Total staffing for the FSDs is as follows:

	<b>FTP</b>	<b>FTE</b>
Headquarters	242	242
Field	2,284	2,199
Transportation Security Specialist. - Explosives	455	438
<b>Total</b>	<b>2,981</b>	<b>2,879</b>

FSDs and staff are critical to supporting the front line operations of the TSOs. To streamline the administrative operations and gain efficiency at the airports, larger airports have been designated as hubs. These hubs provide security direction, administrative support, and staffing/personnel as needed to smaller, lower staffed airports (spokes). For example, Boston-Logan International Airport is the hub for seven spoke airports (Bedford-Hanscom, Barnstable, Martha’s Vineyard, Nantucket, Provincetown, Westover and Worcester airports).

FSDs and staff travel frequently between the hubs and spoke airports. Funding for airport management and staff provides the proper direction, support, and staff at the spokes to ensure efficient and effective operations.

FSDs and staff develop operational strategies to make the screening process more efficient for the traveling public especially during peak travel seasons. They continue to be the central reference point on policy development, information technology, training, performance management, finance, and human resources to support the mission of TSA.

TSA adapts to a dynamic and changing environment with industry accepted scheduling and modeling programs. These applications allow TSA to efficiently determine and schedule the TSO workforce at the Nation’s diverse airports. By accurately predicting, executing, and measuring the number of TSOs required, TSA ensures that the public has a positive experience while maintaining the proper number of TSOs at each airport.

This activity also includes funding for Transportation Security Specialist – Explosives (TSS-Es) (formerly called Bomb Appraisal Officers (BAOs)). The TSS-E program strengthens the security of the Nation's transportation systems by providing frequent interaction and formal training to TSOs to increase their ability to recognize potential Improvised Explosive Devices (IEDs) and IED components. TSS-Es are highly skilled individuals who have undergone training in the disposal of explosive ordinance. This program provides preventative measures against IEDs while reducing costly airport delays and closures. In FY 2011, TSS-Es responded to 9,833 calls for advanced alarm resolution, which prevented the need for bomb squad response and the related terminal disruption time. The TSS-E Program currently operates at 123 airports.

TSS-Es are assigned to select FSDs to provide subject matter expertise to TSA and its stakeholders on chemical, biological, nuclear, radiological, and explosive threats to the Nation's infrastructure. Although TSS-Es are assigned to selected FSD staffs they have regional responsibilities making them available to all FSDs within their region to assist in multi-modal explosives security issues. TSS-Es conduct explosives vulnerability assessments in all transportation modes, participate in aviation related Joint Vulnerability Assessments and MANPAD Vulnerability Assessments. They assist in the development of mitigation plans, conduct tailored explosives recognition and response training, and develop exercises for all transportation modes. TSS-Es also provide transportation specific expertise to the FBI Explosives Unit and the National Transportation Safety Board during investigations where explosives are suspected or confirmed.

**Transportation Security Operations Center (TSOC): \$22.0 million:** The TSOC is located at TSA's Freedom Center in Northern Virginia. The TSOC provides 24/7/365 coordination, communications, collaboration of intelligence and domain awareness for all DHS transportation-related security activities worldwide. The TSOC correlates and fuses real-time intelligence and operational information, ensuring unity of action in the prevention of, and response to, terrorist-related incidents across transportation modes. The TSOC is co-located and closely aligned with TSA's Continuity of Operations and Emergency Preparedness activities. During FY 2011, TSA finished construction of an updated operational pod for the National Capital Region Coordination Center, a multi-agency collaborative effort to oversee the security of the National Capital Region, on the TSOC Watch Floor to enhance the National Capital Region security with seven federal partners and three departments. The TSOC absorbed the security related functions of the TSA Contact Center. The TSOC TCC vets reported security-related gaps and vulnerabilities received via phone and email from the general public. Further, the program initiated the acquisition to develop and deliver a training program, across the TSA enterprise, to prepare those involved with critical incident management with the ability to understand and carry out their roles and responsibilities.

**Airport Parking, Fleet Services, and Transit Benefits: \$27.0 million:** This program provides parking at 28 participating airports for field staff. In addition, TSA provides transit benefits for field office employees as well as provides fleet services. TSA will conduct site visits and assessments to ensure policies and procedures are adhered to and provide spot training/corrections to eliminate waste, fraud and abuse.

**Airport Rent and Furniture: \$165.6 million:** In support of its field operations, TSA leases over 3 million square feet of space with more than 700 leases at more than 450 airport locations. On-airport

space is used for mission-critical direct TSO support, such as break rooms, lockers, emergency coordination rooms and training facilities. These airport leases are typically short-term, requiring frequent re-negotiation due to the lease terms and conditions required by local airport authorities. The annual rent is set by the local airport authority based on formulas to recapture operating costs, capital improvements, and major repairs. Annual increases are generally far greater than the change in the Consumer Price Index or any other general economic measure. Airport rent is far more expensive and far less predictable than general office space in other commercial buildings. TSA also manages a Checkpoint License program under which airports are reimbursed for the cost of providing electrical service to the TSA equipment and operations at the checkpoint, as well as providing janitorial and trash removal service to the TSA checkpoints.

In FY 2013, the Airport Management & Support PPA will be reduced by \$8.7 million due to management efficiencies and savings from the purchase of supplies, materials, and other expenses. The following table provides a further breakout of the Administrative Savings for this initiative:

**Management Efficiencies – (\$8.701 Million)**  
**(dollars in thousands)**

<b>Item</b>	<b>Sub-Total</b>	<b>Total</b>
Enterprise-Wide Efficiencies		(\$26)

<b>2013 Total Requested Budget Authority</b>	<b>44</b>	<b>42</b>	<b>12,500</b>
Total Change 2012 to 2013	-	-	(12,961)

TSA requests \$12.5 million for this activity. The adjustments-to-base include: \$23,000 for pay COLA, a decrease of \$13,000 for Enterprise-Wide efficiencies; and a decrease of \$343,000 for management efficiencies. The request also reflects a program decrease of \$12.6 million.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The following provides the components of this PPA:

(dollars in millions)

	<b>FY 2012</b>	<b>FY 2013</b>
Federal Flight Deck Officer	\$24.1	\$12.5
Crew Member Self Defense	\$1.4	-
<b>Total</b>	<b>\$25.5</b>	<b>\$12.5</b>

The Federal Flight Deck Officer Program (FFDO) program was created by the Arming Pilots Against Terrorism Act of 2003 (APATA – P.L. 107-296), which authorizes the deputation of qualified airline pilots to act as Federal law enforcement officers in order to defend the flight decks of aircraft against acts of criminal violence or air piracy. This voluntary program provides a combination of law enforcement training in firearms proficiency, self-defense tactics, authority, use-of-force, and decision-making in defense of both commercial and cargo aircraft.

The Crew Member Self Defense (CMSD) Program was established via the Vision 100 – Century of Aviation Reauthorization Act (FAA Reauthorization Act) in 2004. The Act requires TSA to develop and make available to flight and cabin crewmembers a voluntary, advanced self-defense training program as another means of safeguarding the civil aviation system.

In FY 2013, the FFDO PPA will be reduced by \$343,000 due to enterprise-wide efficiencies and savings from the purchase of supplies. The following table provides a further breakout of the Administrative savings for this initiative:

**Management Efficiencies - (\$0.343 Million)**  
(dollars in thousands)

<b><u>Item</u></b>	<b><u>Sub-Total</u></b>	<b><u>Total</u></b>

Total Change 2012 to 2013	-	18	1,442

TSA requests \$122.1 million for this activity. The adjustments-to-base include: an increase of \$327,000 for pay COLA, an increase of 18 FTE and \$2.5 million to annualize additional inspectors provided in FY 2012, and a decrease of \$1.4 million for management efficiencies.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Aviation and Transportation Security Act of 2001 charges TSA with the implementation of statutory requirements for ensuring the security of transportation systems and passengers when cargo is transported by air.

The following table provides the components of this PPA.

(dollars in millions)

	<b>FY 2012</b>	<b>FY 2013</b>
Air Cargo Policy Programs	\$17.0	\$16.6
Air Cargo Screening Technologies	\$10.1	\$12.4
Air Cargo Inspectors	\$63.3	\$65.7
Canine Program (Air Cargo)	\$30.2	\$27.4
<b>Total</b>	<b>\$120.6</b>	<b>\$122.1</b>

## **Air Cargo Policy Programs: \$16.6 million**

The program is responsible for securing the air cargo supply chain including cargo, conveyances, and people. The air cargo transportation system consists of approximately 450 domestic airports, 225 air carriers, and 4,100 indirect air carriers and shippers. An estimated 32 billion pounds of cargo is shipped within the United States by air annually. TSA focuses on two primary security threats related to the air cargo transportation system: (1) introduction of an explosive device on a passenger aircraft, and (2) the hijacking of an all-cargo aircraft resulting in its use as a weapon of mass destruction.

The *Implementing Recommendations of the 9/11 Commission Act of 2007* (9/11 Act) required TSA to implement a system to ensure that 100 percent of all cargo on passenger aircraft is screened at a level commensurate with checked baggage. To meet this requirement, TSA has employed two phases for screening air cargo: one phase for cargo departing U.S. airports, and the other phase for international inbound cargo. As of August 1, 2010, 100 percent of all cargo transported on a passenger aircraft departing U.S. airports are required to be screened. In January 2011, Secretary Napolitano and TSA Administrator Pistole asked passenger carriers to comment on their ability to screen 100 percent of air cargo on international inbound passenger aircraft by December 31, 2011. The Department has completed its evaluation of formal industry comment to this proposal. TSA is now implementing a risk-based strategy to achieve the 100% screening of international inbound cargo on passenger aircraft by December 1, 2012. TSA will work with industry to leverage and enhance ongoing TSA programs and certify foreign aviation security programs that are commensurate with TSA standards through TSA's National Cargo Security Program recognition process. As of December 2010, TSA implemented requirements for 100 percent of high-risk cargo on international flights bound for the United States to be screened on both passenger and all-cargo air carriers.

For cargo departing U.S. airports on passenger carriers, TSA recognized that 100 percent screening could not be achieved solely by the carriers screening cargo. To limit screening capacity to a single point within the cargo supply chain would create significant delays and missed flights, and ultimately impede the flow of commerce. To support the requirement on industry to screen 100 percent of air cargo transported on passenger aircraft from U.S. airports, TSA developed the Certified Cargo Screening Program (CCSP). CCSP allows screening of cargo at points throughout the supply chain by an approved Certified Cargo Screening Facility (CCSF) prior to the arrival of the cargo at airport. Under the CCSP, TSA certifies cargo screening facilities located throughout the United States to screen cargo prior to providing it to airlines for shipment on passenger flights. Participation in the program is voluntary and designed to enable vetted, validated and certified supply chain facilities to comply with the 100 percent screening requirement. CCSP is a practical, supply chain solution, which provides security while ensuring the flow of commerce. Cargo is screened at the most efficient and effective point. It is done before individual pieces of cargo are consolidated for shipment.

In support of systems for the enhanced screening of international air cargo, TSA formally established an agreement with the Customs and Border Protection (CBP) National Targeting Center Cargo in FY 2010 to increase information sharing between the agencies and explore the feasibility of leveraging CBP's Automated Targeting System (ATS) to assess the risk of inbound international cargo shipments. In FY 2011, TSA and CBP commenced an voluntary pilot to collect data, refine targeting procedures, and establish appropriate communication systems in order to test pre-departure advanced information

collection, threshold targeting, and TSA response procedures at non-U.S. locations. Pilot activities are focused on a proof of concept for each of the key building blocks – data, targeting, and enhanced screening – building toward implementation of a comprehensive pre-departure targeting and physical screening regime. Advanced Cargo Automated System (ACAS) can provide a vehicle for targeting, but will not replace the TSA physical screening requirements of the 9/11 Act for passenger aircraft. TSA is exploring a risk-based approach to enable industry to achieve this mandate.

### **Air Cargo Screening Technologies: \$12.4 million**

Cargo screening faces unique challenges due to a wide variance in commodities, volume, throughput, and facility characteristics for each screening entity. No single technology is appropriate for every screening scenario. TSA has authorized a suite of technologies and associated screening protocols from which screening entities may choose on the basis of their unique requirements and commodities.

The below technologies are currently being used by industry and TSA to screen air cargo on passenger aircraft unless otherwise noted.<sup>2</sup>

- Explosives Trace Detection (ETD)
- Advanced Technology (AT) X-Ray (Small Aperture & Medium Aperture)
- X-Ray (Large Aperture)
- Explosives Detection Systems (EDS)
- Electronic Metal Detection (EMD)

TSA publishes authorized screening equipment on the TSA Air Cargo Screening Technology List on a secure website accessible by the regulated parties, which industry references when making their procurement decisions. The current TSA Air Cargo Screening Technology List contains 87 pieces of cargo screening equipment. TSA has qualified 13 large aperture X-Ray technologies for screening skid-level configurations. TSA continues to evaluate the operational efficacy of these technologies to accommodate the cargo screening volumes currently required to support the 100-percent screening mandate. TSA is also evaluating other technologies for air cargo screening including vapor detection systems and acoustic-based technologies. Outcomes of DHS and TSA field testing and evaluation and the Indirect Air Carrier (IAC) CCSP may result in modifications or additions to this list. TSA has also issued screening protocols for use of these technologies. The protocols detail screening methodologies for each technology type and provide guidance on which technologies can be used for specific commodity classes.

### **Air Cargo Inspectors: \$65.7 million**

#### **Domestic Cargo Inspections**

TSA Transportation Security Inspectors-Cargo (TSI-Cs) perform compliance inspections, including special emphasis inspections, focused inspections, air cargo strikes (weeklong compliance enforcement

---

<sup>2</sup> Certain screening equipment purchased by industry before February 2009, and not currently on the *TSA Air Cargo Screening Technology List*, has been approved by TSA on a case-by-case basis until designated expiration dates.

surges focused on IACs, air carriers, and CCSFs within a single metropolitan area), investigations and tests of air carriers and IACs. TSA TSI-Cs also perform educational outreach to assist air carriers and IACs in complying with air cargo security mandates. TSI-Cs are located at 121 airports with high cargo volumes in the United States.

Air Cargo Inspectors enforce statutory and regulatory requirements and provide guidance to industry on securing air cargo. Inspectors ensure that air carriers (passenger and all-cargo) and indirect air carriers meet their operational responsibility by implementing the security requirements issued by TSA. This includes maintaining a TSA-approved security program that describes the security policies, procedures, and systems that must be implemented in order to comply with TSA security requirements. These requirements include measures related to the acceptance, handling, and inspection of cargo; training of employees in security and cargo inspection procedures; testing employee proficiency in cargo inspection; and access to cargo areas and aircraft.

TSA provides compliance oversight of 225 domestic aircraft operators and foreign air carriers as well as 4,100 IACs. Each year, TSA inspectors carry out planned and random inspections targeting these foreign and domestic air carriers and IACs. In addition, inspectors conduct monthly cargo strikes (week-long compliance exercises in a single metropolitan area) at airports and IAC facilities. TSA also promotes the full compliance with security requirements through outreach programs and collaboration with industry.

TSA is utilizing testing of regulated entities to confirm that correct cargo-screening procedures are carried out.

The FY 2013 Compliance Work Plan (CWP) outlines goals for inspecting regulated entities based upon risk at the station level, in addition to the minimum entity inspection requirements. TSA calculates risk scores for airlines (which include both passenger and all-cargo), IACs, and CCSFs. Risk scores will be utilized in FY 2013 to focus Inspector time during all field activities, including Cargo Strikes, Special Emphasis Inspections (SEIs) and testing. At a high-level, TSI-Cs conduct inspections based on following risk schema:

- Previous inspection and test results;
- Previous investigation/non-compliance history;
- Operation volumes; and
- Intelligence and other special considerations.

#### International Cargo Inspections

In addition to domestic inspections, TSA has developed and begun implementation of a strategy for 100 percent screening for international inbound cargo. TSA developed a process for the NCSP recognition and will assess and declare that other nation's cargo security programs are security-comparable to ours. TSA piloted the NCSP process through re-assessment of four legacy recognized programs.

In FY 2013, TSA plans to annualize the 39 positions received in FY 2012 for Air Cargo Security Enhancements. The increase of 37 TSS Cargo inspectors and 2 TSS Cargo program staff will support security efforts to ensure compliance with screening requirements, perform risk assessments, and

conduct aviation security operations overseas. All TSS are cross trained to perform cargo inspections and general inspections for time and expense efficiencies depending where they are located globally.

**Canine Program (Air Cargo): \$27.4 million**

Canines provide a valuable tool to assist in the screening of air cargo. In the air cargo environment, TSA currently employs two types of canine teams to screen cargo destined for transport on passenger aircraft: teams led by state/local law enforcement officers (LEOs) and proprietary (federal) teams led by TSA cargo inspectors. TSA funds a total of 638 canine teams (518 local LEO-led canine teams and 120 authorized federal-led canine teams) that are allocated to 78 airport locations throughout the United States. The 497 local LEO-led canine teams spend approximately 25 percent of their time in the air cargo environment and associated facilities providing law enforcement presence and screening air cargo. The 120 TSA proprietary teams are primarily dedicated to screening air cargo at high-volume air cargo facilities to enhance air cargo security and support the 100-percent screening congressional mandate. Although screening by aircraft operators and the CCSP were the primary means to achieve 100-percent air cargo screening, these teams are an important addition to the program.

In FY 2013, the Air Cargo PPA will be reduced by \$1.4 million due to savings from enterprise-wide efficiencies and savings from the purchase of supplies and materials, as well as efficiencies in the operation and maintenance of equipment. The following table provides a further breakout of the Administrative Savings for this initiative:

**Management Efficiencies- (\$1.430 Million)**  
(dollars in thousands)

<b>Item</b>	<b>Sub-Total</b>	<b>Total</b>
Enterprise-Wide Efficiencies		(\$ 24)
Overtime	(\$ 24)	
Management Adjustments		(\$1,406)

<b>2013 Total Requested Budget Authority</b>	-	-	(1,789,176)
Total Change 2012 to 2013			

**CURRENT SERVICES PROGRAM DESCRIPTION:**

TSA proposes restructuring September 11th Security Fee (Passenger Fee) to achieve total collections including the ASCF and full fee increase of \$2.239 billion in 2013, which will be used to both increase offsets to the discretionary costs of aviation security and provide mandatory savings to be deposited in the general fund for the purposes of debt reduction. The revised FY 2012 Passenger Fee estimate and the fee proposal would increase offsets to the discretionary costs of aviation security by \$155 million over FY 2012, and assumes the restructured Passenger Fee will be implemented for the final three months of FY 2013.

The proposal would replace the current “per-enplanement” fee structure with a “per one-way trip” fee structure so that passengers pay the fee only one time when traveling to their destination. It also removes the current statutory fee limit and replaces it with a statutory fee minimum of \$5.00 in 2013, with annual incremental increases of 50 cents from 2014 to 2018, resulting in a fee of \$7.50 in 2018 and thereafter. The proposed fee would increase collections by an estimated \$25.5 billion over 10 years. Of this amount, \$7.5 billion would be applied to increase offsets to the discretionary costs of aviation security and the remaining \$18 billion would be treated as mandatory savings and deposited in the general fund for debt reduction. In 2023 and beyond, all additional fee revenue from the restructuring would be applied as discretionary offsets. The restructuring would allow TSA the financial flexibility to meet its increasing aviation security costs and better aligns the costs associated with providing passenger security operations to the direct beneficiaries of this unique security service.

Total Change 2012 to 2013	-	-	-

**CURRENT SERVICES PROGRAM DESCRIPTION:**

In FY 2002, the Air Carrier Fee was assessed on the basis of an air carrier's calendar year 2000 passenger and property screening costs. In its 2005 report on this fee, GAO determined that the air carriers should be paying annual fees of \$425 to \$471 million compared with the \$315 million they had been paying. TSA utilized GAO's methodology as the basis to determine total industry costs for passenger and property screening. Choosing the mid-point of this range resulted in an annual fee collection of \$448 million. In June 2010, the U.S. Court of Appeals required TSA to decrease the overall limit of the fee. TSA determined that the new overall limit is \$420 million.

**Description of Item**

The FY 2013 Request includes an \$87.8 million reduction to the EDS Procurement and Installation PPA.

**Justification**

As the Electronic Baggage Screening Program (EBSP) matures and TSA begins to focus on recapitalization efforts, the request redirects \$87.8 million from the EDS Procurement and Installation PPA in FY 2013 and dedicates these resources to other program areas within the agency in order to maintain aviation security readiness and other mission-critical investment programs.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

This reduction will not impact current levels of checked baggage screening or aviation security. TSA will have sufficient funds to maintain checked baggage screening as a result of the FY 2012 legislative change that allows the Aviation Security Capital Fund funding to be used for the procurement and installation of EDS equipment.

**Department of Homeland Security  
Transportation Security Administration  
Aviation Security:  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 2:** Screening Technology Maintenance Contract  
PPA: Screening Technology Maintenance  
Program Decrease: Positions 0, FTE 0, Dollars \$(17,600)

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)

<b>Total Request</b>	-	-	<b>322,555</b>	-	-	<b>320,365</b>	-	-	<b>309,000</b>

**Description of Item**

The FY 2013 Request includes a \$17.6 million reduction to the Screening Technology Maintenance PPA.

**Justification**

TSA proposes to redirect \$17.6 million from the Screening Technology Maintenance PPA in FY 2013 and dedicate these resources to other program areas within the Agency in order to maintain aviation security readiness and other mission-critical investment programs. With the procurement of new technologies, efficiencies were gained as a result of extensions of Transportation Security Equipment (TSE) maintenance warranties from 12 to 24 months. The FY 2013 budget request contains support for technologies planned to be procured and deployed in FY 2011 that have been delayed until FY 2012. Additionally, the procurement of CT-80 Reduced Size Explosives Detection Systems (RSEDS), which replaced older and more expensive technologies (primarily CTX-2500 and CTX-5500), also allowed a reduction in the maintenance requirement for the Electronic Baggage Screening Program. TSA intends to purchase 24 month warranties for Explosives Detection System equipment purchased in FY 2012, further reducing the FY 2013 maintenance requirement.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

The FY 2013 request level will adequately fund the maintenance of all deployed screening equipment. This proposed reduction will not impact the current levels of security and will allow TSA to more efficiently manage its screening technology maintenance.

**Department of Homeland Security  
Transportation Security Administration  
Aviation Security:

**Description of Item**

The FY 2013 Request reflects a \$31.0 million reduction to the Checkpoint Support PPA.

**Justification**

TSA proposes to redirect \$31.0 million from the Checkpoint Support PPA in FY 2013 and dedicate the resources to other program areas within the Agency in order to maintain aviation security readiness and other mission-critical investment programs. The FY 2013 current services level will fund the purchase and installation of equipment needed for passenger screening and carry-on baggage screening equipment.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

For FY 2013, TSA has analyzed and reprioritized technology purchases to enhance checkpoint passenger and baggage screening. At the requested level, TSA expects to be at or near Full Operational Capability (FOC) for most of the checkpoint screening technology after FY 2013 purchases. The funds included in the request are directed towards those technologies where FOC has not been reached.

**Description of Item**

The FY 2013 Request includes a \$12.6 million reduction to the Federal Flight Deck Officer and Crew Training PPA.

**Justification**

TSA’s request includes a reduction of \$12.6 million for the Federal Flight Deck Officer (FFDO) and Flight Crew Training program. As TSA focuses its aviation security activities on programs that mitigate the highest amount of risk at the lowest cost, TSA has prioritized funding in the same manner. Funds will be redirected from this voluntary program to other high priority, risk-based operational initiatives. The voluntary FFDO program was created as a “last defense” layer of security at a time when comprehensive aviation screening and other physical security measures were not fully developed or deployed on a system-wide basis. Since 2001, however, many enhancements to aviation security have been made, especially for domestic flights, on which FFDOs are predominantly deployed. Such enhancements include 100 percent screening of all passengers and their carryon items, the installation of reinforced and locking cockpit doors on aircraft that operate in US airspace, and increased passenger and flight crew awareness to address security risks. Combined, these improvements have greatly lowered the risk of unauthorized cockpit access and represent a comprehensive and redundant risk-mitigation strategy that begins well before passengers board the aircraft.

Savings will be generated through efficiencies that may include, but are not limited to, restructuring the FFDO training contract, focusing on recertification of pilots on domestic flights, and the possible consolidation of training facilities.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

The FY 2013 request level will adequately fund the Federal Flight Deck Officer and Flight Crew Training program. This proposed reduction will not impact the current levels of aviation security, as TSA will continue to prioritize and implement risk-based layers of security.

## V. Exhibits and Other Supporting Material

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
Transportation Security Administration  
Justification of Proposed Changes in Aviation Security  
Appropriation Language**

For necessary expenses of the Transportation Security Administration related to providing civil aviation security services pursuant to the Aviation and Transportation Security Act (Public Law 107-71; 115 Stat. 597; 49 U.S.C. 40101 note), [\$5,253,956,000]\$5,098,639,000, to remain available until September 30, [2013]2014, of which not to exceed \$8,500 shall be for official reception and representation expenses: *Provided*, That of the total amount made available under this heading, not to exceed [\$4,167,631,000]\$4,022,439,000 shall be for screening operations, of which [\$543,103,000]\$426,349,000 shall be available for explosives detection systems; [\$204,768,000]\$120,239,000 shall be for checkpoint support; and not to exceed [\$1,086,325,000]\$1,076,200,000 shall be for aviation security direction and enforcement: *Provided further*, That of the amount made available in the preceding proviso for explosives detection systems, [\$222,738,000]\$117,349,000 shall be available for the purchase and installation of these systems[, of which not less than 10 percent shall be available for the purchase and installation of certified explosives detection systems at medium- and small-sized airports]: *Provided further*, That any award to deploy explosives detection systems shall be based on risk, the airport's current reliance on other screening solutions, lobby congestion resulting in increased security concerns, high injury rates, airport readiness, and increased cost effectiveness: *Provided further*, That security service fees authorized under section 44940 of title 49, United States Code, shall be credited to this appropriation as offsetting collections and shall be available only for aviation security: *Provided further*, That the sum appropriated under this heading from the general fund shall be reduced on a dollar-for-dollar basis as such offsetting collections are received during fiscal year [2012]2013 so as to result in a final fiscal year appropriation from the general fund estimated at not more than [\$3,223,956,000]\$2,889,463,000: *Provided further*, That any security service fees collected in excess of the amount made available under this heading shall become available during fiscal year [2013]2014: *Provided further*, That notwithstanding section 44923 of title 49, United States Code, for fiscal year [2012]2013, any funds in the Aviation Security Capital Fund established by section 44923(h) of title 49, United States Code, may be used for the procurement and installation of explosives detection systems or for the issuance of other transaction agreements for the purpose of funding projects described in section 44923(a): *Provided further*, That [none of the funds made available in this Act may be used for any recruiting or hiring of personnel into the Transportation Security Administration that would cause the agency to exceed a staffing level of 46,000 full-time equivalent screeners: *Provided further*, That the preceding proviso shall not apply to personnel hired as part-time employees: *Provided further*, That not later than 90 days after the date of enactment of this Act, the Secretary of Homeland Security shall submit to the Committees on Appropriations of the Senate and the House of Representatives a detailed report on\_] [(1) the Department of Homeland Security efforts and resources being devoted to develop more advanced integrated passenger screening technologies for the most effective security of passengers and baggage at the lowest possible operating and acquisition costs;]

[(2) how the Transportation Security Administration is deploying its existing passenger and baggage screener workforce in the most cost effective manner; and]

[(3) labor savings from the deployment of improved technologies for passenger and baggage screening and how those savings are being used to offset security costs or reinvested to address security vulnerabilities:]

[*Provided further, That*] Members of the United States House of Representatives and United States Senate, including the leadership; the heads of Federal agencies and commissions, including the Secretary, Deputy Secretary, Under Secretaries, and Assistant Secretaries of the Department of Homeland Security; the United States Attorney General, Deputy Attorney General, Assistant Attorneys General, and the United States Attorneys; and senior members of the Executive Office of the President, including the Director of the Office of Management and Budget, shall not be exempt from Federal passenger and baggage screening.*(Department of Homeland Security Appropriations Act, 2012.)*

#### *TSA – ELECTRONIC BAGGAGE SCREENING PROGRAM (EBSP)*

##### 1. Project Description, Justification and Scope

The Transportation Security Administration's (TSA) Electronic Baggage Screening Program (EBSP) provides the technology to enable prevention of catastrophic loss from terrorist or criminal activity through deterrence, detection, mitigation, and prevention of explosives or other prohibited and dangerous items in checked baggage on commercial aircraft. EBSP is responsible for full life cycle management of screening equipment utilized for screening checked baggage for concealed explosives. The primary detection technologies, or transportation security equipment (TSE), used by EBSP are Explosives Detection Systems (EDS) and Explosives Trace Detection (ETD).

EBSP was established to meet the congressional mandate for 100% screening of aviation-checked baggage in the National Airspace System for explosives by electronic or other approved means. This mandate was established in the 2001 Aviation and Transportation Security Act (P.L. 107-71). By utilizing screening activities that minimize the risk of personal injury or death, or

damage or loss of property due to acts of terrorism or criminal activity directed at aviation transportation, the program directly supports TSA’s goals of protecting the transportation system from dangerous people and items that threaten its security, managing risks to critical transportation infrastructure, and strengthening the TSA’s operations and management. The EBSP program ensures freedom of movement for people and commerce. This benefit to the TSA mission is achieved through a risk-based prioritized requirements methodology, and through development, testing, procurement, deployment, and lifecycle management of checked baggage TSE screening technologies. Key objectives of the program include: increasing threat detection capability, improving screening efficiency, replacing the aging fleet of EDS and ETD units, utilizing competitive procurement contracts to obtain the best value for the government, and international harmonization of screening methodologies. The primary beneficiaries of the EBSP are the traveling public; the TSA Office of Security Operations, whose staff manages the daily operations of deployed TSE; commercial airlines; and airport authorities. EBSP is currently dependent on the Department of Homeland Security Science and Technology Directorate’s Transportation Security Laboratory for certification of the screening equipment and research and development of emerging screening technologies. The TSA Security Technology Integrated Program (STIP) is being executed to enable remote maintenance and monitoring of the deployed screening equipment, as well as enabling a dynamic risk-based security capability through remote upgrades and toggling of threat detection algorithms.

The EBSP also funds the Operation Integration (OI) Division, which analyzes integration of new technologies into existing systems to ensure operational effectiveness and suitability before full system production and deployment. The purpose of this work is to test, evaluate, and analyze pre-production or production representative systems under realistic conditions, including operation by those who will use the equipment in the field in a variety of environmental conditions. The division conducts:

- Operational test and evaluation as part of the acquisition process for items procured by TSA
- Pilots, demonstrations, and field experimentation in support of mission area analyses, concept of operations development and workforce characterization

## 2. Significant Changes

As the EBSP matures and TSA begins to focus on recapitalization efforts, the request redirects \$87.8 million from the EDS Procurement and Installation PPA in FY 2013 and dedicates these resources to other program areas within the agency in order to maintain aviation security readiness and other mission-critical investment programs. .

## 3. Project Schedule

	Fiscal Quarter and Year				Total Estimated Completion Cost (\$000)	Total Project Cost (\$000)

**5. Cost Estimate Detail and Changes  
(Dollars in Thousands)**

Description of Milestone	Initial Total Cost (\$mil)	Planned Total Cost (\$mil)	Actual Total Cost (\$mil)	Explanation of Difference Between Current and Previous Estimate
(FY02-FY07) Program initiation (MNS, ConOps draft); Deployed systems for facility mods, Strategic Program Plan, & NEXGEN. Updated Strategic Plan, LCCE, CBA, Deployment Schedule; Performed program/tech mgmt, system deployment, & O&M, per deployment plan. Maintained equipment	3,346,127	3,346,127	2,993,900	Airport scheduling delays slowed deployment of equipment.
(FY08) Perform program management, system deployment, O&M, tech management , and maintenance utilizing strategic plan	758,210	758,210	743,303	Airport scheduling delays slowed deployment of equipment.
(FY09) Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for Airport Optimal Solutions utilizing final strategic plan; and perform operations and maintenance utilizing strategic plan.	782,518	782,518	749,115	Airport scheduling delays slowed deployment of equipment and acquisition of EDS equipment delayed due to competitive award.
(FY10) Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for Airport Optimal Solutions utilizing final strategic plan; and perform operations and maintenance utilizing strategic plan.	1,253,373	1,253,373	1,110,684	Airport scheduling delays slowed deployment of equipment and acquisition of EDS equipment delayed due to competitive award.
(FY11) Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for Airport Optimal Solutions utilizing final strategic plan and for recapitalization of existing airport systems for sustained operations and compliance; and perform operations and maintenance utilizing strategic plan.	742,793	742,793	339,559	Airport scheduling delays slowed deployment of equipment and acquisition of EDS equipment delayed due to competitive award.
(FY12) Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for recapitalization and optimization of existing airport systems for sustained operations and compliance; and perform operations and maintenance	699,468	699,468	3,896	

utilizing strategic plan.				
(FY13) Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for recapitalization and optimization of existing airport systems for sustained operations and compliance; and perform operations and maintenance utilizing strategic plan.	575,313	575,313		

\*FY02 – FY13 excludes STIP and ASP

\*FY11 – FY13 excludes Surface and Cargo

## 6. Method of Performance

EBSP is currently in a “mixed” acquisition life cycle, focusing predominately on the produce/deploy/support phase of the acquisition process. Its spend plans are submitted to Congress annually.

Operational performance will be measured based on the following criteria:

- 100 percent electronic screening of checked baggage for explosives at all commercial airports nationwide
- Percent of checked baggage screened with EDS that maximize security, effectiveness, and efficiency
- Cost per bag screened
- Operational availability of baggage screening equipment

## 7. Related Annual Funding Requirements (Dollars in Thousands)

	FY 2013	
	Current Estimate	Previous Estimate
N/A (All operations and maintenance are included in program cost estimates.)	N/A	N/A
Total	N/A	N/A

## 8. Budget Allocation to Programs

Program	Allocated Budget (\$000)	
	FY 2012	FY 2013
EDS/ETD Purchase & Install	440,333	339,464
Screening Technology Maintenance [& Utilities]	259,135	235,849
Total	699,468	575,313

\*FY02 – FY13 excludes STIP and ASP

\*FY11 – FY13 excludes Surface and Cargo

## **9. Compliance with applicable Public Laws, Regulations, Standards and Executive Orders**

This program is mandated under the Aviation and Transportation Security Act (P.L. 107-71) which requires 100% screening of checked baggage by EDS or an equivalent standard.

### **Initiative #2**

#### ***TSA – PASSENGER SCREENING PROGRAM (PSP)***

##### **1. Project Description, Justification and Scope**

The Passenger Screening Program (PSP) serves as the Transportation Security Administration's (TSA) Program Management Office responsible for aviation checkpoint security equipment for federalized airports. PSP's mission is to provide technologies that assist Transportation Security Officers in denying entry to potential threats directed against the air transportation network. PSP's mission aligns to TSA's mission of protecting the Nation's transportation systems to ensure the freedom of movement for people and commerce and the DHS mission of Preventing Terrorism and Enhancing Security, by embodying two associated goals into program operations: Preventing Terrorist Attacks and Managing Risks to Critical Infrastructure. PSP protects the travelling public and adapts to evolving security conditions by identifying and evaluating risks to passenger screening checkpoints and mitigating threats to infrastructure including terminals, aircraft and checkpoints. PSP consists of three security technology portfolios: people screening technologies, carry-on screening technologies and layered security technologies. Each portfolio consists of subordinate security technology projects that focus on specific threat mitigation systems. PSP-managed technologies screen over two million passengers and their carry-on items for weapons, explosives and prohibited items at approximately 450 airports nationwide each day. Program objectives include increasing detection, limiting false alarms, enhancing efficiency, consolidating equipment footprint, and centralizing results monitoring to support checkpoint staffing reductions. To realize these goals, PSP is moving from independently-functioning technologies to optimized, integrated technologies that are easier to upgrade via software upgrades. The system-of-systems security architecture will enable TSA to address both known vulnerabilities and emerging threats in the most comprehensive manner possible. PSP balances its duties with considerations such as passenger privacy, dignity, safety, and health, while maintaining affordability, deployment, maintenance and other life cycle issues. Accomplishments include the replacement of legacy systems with Advanced Imaging Technology (AIT) units and Advanced Technology (AT) X-ray systems, expanded use of Explosives Trace Detectors (ETD) and the deployment of emerging technologies such as Advanced Technology-2 (AT-2) X-ray systems, Bottled Liquids Scanners (BLS), Chemical Analysis Devices (CAD), and AIT with Automated Target Recognition (ATR).

##### **2. Significant Changes**

TSA proposes to redirect \$31.0 million from the Checkpoint Support PPA in FY 2013 and dedicate the resources to other program areas within the Agency in order to maintain aviation security readiness and other mission-critical investment programs.

### 3. Project Schedule

Projects	Fiscal Quarter and Year		Estimated Completion Cost	Total Project Cost

### Screening Partnership Program Mission Statement

The Screening Partnership Program (SPP) allows an airport operator to submit an application to have screening carried out by a qualified private screening company. The contractor must perform under federal oversight and the contracted screeners must perform at the same or at a higher performance levels as federal TSOs.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>21.0 Travel</b>	<b>\$31</b>	<b>\$35</b>	<b>\$33</b>	<b>-\$2</b>

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2013 request reflects a \$2,000 decrease in travel in accordance with Enterprise-Wide efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.2 Other services</b>	<b>\$153,164</b>	<b>\$144,061</b>	<b>\$143,060</b>	<b>-\$1,001</b>

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. FY 2013 reflects a \$1.001M reduction associated with operational support and other management efficiencies.

**EDS Procurement and Installation Mission Statement**

EDS Procurement and Installation funds the purchase of electronic baggage screening equipment for deployment and the installation of electronic baggage screening equipment in the Nation's airports. The deployment of this equipment is a key component of TSA's ability to ensure the security of the air transportation system. Installation is an integral cost associated with the deployment of equipment that enhances the security of the air transportation system.

**Summary Justification and Explanation of Changes**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	13,747	14,654	14,868	214
11.3 Other than full-time permanent	294	38	39	1
11.6 Pay Diff (Sun/Night)	1	1	1	-

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change

12.1 Benefits	3,894	3,662	3,716	54
<b>Total, Salaries &amp; Benefits</b>	<b>18,089</b>	<b>18,500</b>	<b>18,771</b>	<b>271</b>

Salaries and Benefits includes personnel and compensation costs for 116 FTEs.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
21.0 Travel	\$729	\$729	\$660	-\$69

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2013 request reflects a \$69,000 decrease in travel in accordance with Enterprise-Wide efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
23.2 Other rent	\$545	\$586	\$1,586	\$1,000

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2013 request reflects \$1,586,000 for warehouse rent.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.1 Advisory and assistance services	\$441,965	\$148,172	\$95,899	-\$52,273

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2013 request includes a portion of installation efforts being funded from the Aviation Security Capital Fund (ASCF). The FY 2013 request includes a \$13,145,000 decrease related to Enterprise-Wide efficiencies and reflects lower equipment purchases at a lower base level of funds.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.2 Other services	\$20,256	\$18	0	-\$18

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2013 request includes an \$18,000 decrease related to Enterprise-Wide efficiencies. No funds are requested for this activity in FY 2013.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
31.0 Equipment	\$108,882	\$54,300	0	-\$54,300

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2013 request reflects a decrease in this activity as the Aviation Security Capital Fund will fund equipment purchases and installations in addition to facility modifications as stated in the FY 2012 enacted Appropriations Bill.

**Aviation Regulation and Other Enforcement Mission Statement**

The purpose of Aviation Regulation and Other Enforcement is to provide activities that ensure that TSA continues to build a strong security regulation and enforcement presence on-site at the nation's commercial airports. Funding requested under this decision unit supports airport regulation compliance through domestic and international inspections, K-9 units, international outreach programs to ensure alignment and consistency in security requirements of the United States and those of the other nations to ensure transportation system integrity; and reimbursements provided to State and local law enforcement for support provided at commercial airport checkpoints.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	100,927	136,867	167,068	30,201
11.3 Other than full-time permanent	134	135	135	-
11.5 Other personnel compensation	2,081	2,500	2,500	-
11.6 Pay Diff (Sun/Night)	3,615	3,750	3,750	-
11.7 Military personnel/Awards	2,129	1,340	1,510	170
11.8 Special Service Pay	1,518	1,500	1,500	-
12.1 Benefits	36,326	49,000	53,971	4,971
13.0 Unemployment Compensation	122	125	125	-
<b>Total, Salaries &amp; Benefits</b>	<b>146,852</b>	<b>195,217</b>	<b>230,559</b>	<b>35,342</b>

Salaries and Benefits includes costs for 1,662 FTE. The FY 2013 request annualization of prior year increases for VIPR, canines, and International air cargo security enhancement funding and a \$41,000 reduction associated with enterprise-wide efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>21.0 Travel</b>	<b>\$13,539</b>	<b>\$15,000</b>	<b>\$11,800</b>	<b>-\$3,200</b>

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2013 request reflects a \$372,000 decrease in travel in accordance with Enterprise-Wide efficiencies and offsetting increases resulting from annualization of prior year part year funding.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>23.1 GSA rent</b>	<b>\$320</b>	<b>\$525</b>	<b>\$600</b>	<b>\$75</b>

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services. The FY 2013 request increases related to annualizations of prior-year program increases.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>23.3 Communications, utilities, and misc. charges</b>	<b>\$1,175</b>	<b>\$1,350</b>	<b>\$1,400</b>	<b>\$50</b>

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2013 request increases related to annualizations of prior-year program increases.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.1 Advisory and assistance services</b>	<b>\$1,630</b>	<b>\$7,500</b>	<b>\$2,000</b>	<b>-\$5,500</b>

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2013 request includes adjustments to base, transfers, realignments and program changes.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.2 Other services	\$6,436	\$20,000	\$12,069	-\$7,931

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2013 request reflects a \$185,000 decrease in accordance with Enterprise-Wide efficiencies as well as adjustments to base, transfers, realignments and program increases.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.3 Purchases from Gov't accts.	\$16,287	\$21,992	\$16,000	-\$5,992

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2013 request includes adjustments to base, transfers, realignments and program increases.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.6 Medical care	\$41	\$45	\$50	\$5

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2013 request increases related to annualizations of prior-year program increases.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.7 Operation and maintenance of equipment	\$286	\$300	\$325	\$25

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2013 request increases related to annualizations of prior-year program increases.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
26.0 Supplies and materials	\$2,452	\$7,500	\$9,800	\$2,300

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2013 request increases related to annualizations of prior-year program increases.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
31.0 Equipment	\$6,168	\$10,000	\$7,500	-\$2,500

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2013 request includes decreases associated with management adjustments.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>41.0 Grants/Subsidies/Contributions</b>	<b>\$80,497</b>	<b>\$90,000</b>	<b>\$79,331</b>	<b>-\$10,669</b>

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. FY13 decrease is associated with a reduction of Law Enforcement Cooperative Agreements and other management adjustments based on FY11 Actuals.

**Airport Management and Support Mission Statement**

Airport Management and Support provides funding for each Federal Security Director and staff at each hub airport along with the headquarters personnel who direct the policy, analysis, and the administration of aviation screening and airport security. In addition, this PPA supports aviation functions at TSA's Transportation Security Operations Center. These offices and positions are critical to supporting the front-line operations of our TSOs.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	206,570	237,906	243,278	5,372
11.3 Other than full-time permanent	465	500	500	-
11.5 Other personnel compensation	1,312	1,500	1,500	-

**FFDO and Flight Crew Training Mission Statement**

TSA provides the Federal Flight Deck Officer (FFDO) and Flight Crew Training programs to deputize qualified airline pilots as federal law enforcement officers and to train flight crew members to defend the flight decks and cabins of aircrafts against acts of criminal violence or air piracy. This voluntary program provides training in firearms proficiency, self-defense tactics, authorities, and decision-making to defend the cockpit.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	2,853	3,835	3,854	19
11.3 Other than full-time permanent	-	12	12	-
11.5 Other personnel compensation	422	594	594	-
11.6 Pay Diff (Sun/Night)	3	-	-	-
12.1 Benefits	1,214	1,618	1,618	-
<b>Total, Salaries &amp; Benefits</b>	<b>4,492</b>	<b>6,059</b>	<b>6,078</b>	<b>19</b>

Salaries and Benefits includes costs for 42 FTEs. The FY 2013 request includes a pay COLA increase of \$23,000 as well as a decrease of \$4,000 for overtime cost efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>21.0 Travel</b>	<b>\$172</b>	<b>\$193</b>	<b>\$64</b>	<b>-\$129</b>

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2013 request reflects a decrease of \$9,000 for travel efficiencies as well as a program efficiency of \$120,000.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change

**Air Cargo Mission Statement**

The Air Cargo program operates through compliance activities, regulatory efforts, outreach initiatives, and technology implementation. TSA uses a threat-based risk management approach based on two threats: 1) introduction of an explosive device on a passenger aircraft, and 2) the hijacking of an all-cargo aircraft resulting in its use as a weapon of mass destruction.

## Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	58,369	61,352	63,579	2,227
11.5 Other personnel compensation	2,418	2,542	2,634	92

**Aviation Security Capital Fund: Mission Statement**

The Aviation Security Capital Fund was extended by the 9/11 Bill and is authorized through 2028. The Aviation Security Capital Fund supports the installation of optimal screening systems at airports and, with the enactment of the FY 2012 Appropriations Bill, funds equipment purchases and installation.

**Summary Justification and Explanation of Changes**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.1 Advisory and assistance services	\$59,477	\$103,700	\$66,100	-\$37,600

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. As provided in the FY 2012 Appropriations Bill, the Aviation Security Capital Fund can be used for equipment purchases and installations as well as facility modifications. Funding in Advisory and Assistance Services is used to fund equipment installation.

## **K. DHS Balanced Workforce Strategy**

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce – both contracted and federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into Tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2014 budget.

TRANSPORTATION SECURITY ADMINISTRATION requests \$0 and 16 FTE for the FY 2013 DHS Balanced Workforce Strategy.

## **Transportation Security Administration Surface Transportation Security**

### **I. Appropriation Overview**

#### **A. Mission Statement for Salaries and expenses:**

##### **Mission Statement**

The Transportation Security Administration (TSA) is mandated to protect the surface transportation system and to ensure the freedom of movement and the security of people and commerce. This mission is accomplished largely by a consortium of Federal, State, local, and private entities coordinated by TSA to optimize resources in a risk-based approach to security. In addition to sector and modal planning and coordination, TSA provides operational deterrence support through surface security inspectors, canine teams, and Visible Intermodal Prevention and Response (VIPR) teams. TSA also provides other protective resources such as: training, personnel funding; screening and detection programs; voluntary guidelines and best practices; regulations; security and process standards; vulnerability and risk assessment teams; and subject matter expertise to the Federal Emergency Management Agency (FEMA) for surface transportation security grant programs. TSA's surface transportation responsibilities also include coordination of the government and industry activities to identify and address unacceptable risk associated with all hazards affecting the Postal and Shipping Sector.

Various statutes and executive directives require that transportation risk reduction activities be determined and implemented collaboratively in accordance with strategic plans developed with security partners. These combined efforts play an essential role in DHS's mission to prevent terrorist acts within the United States, to reduce vulnerability to terrorism, to minimize the damage from potential attacks and disasters, and to improve system resilience after an incident. The surface domain includes:

- 1) Approximately 751 million passengers traveling on commercial buses each year and over 9 billion passenger trips on publicly operated mass transit per year.
- 2) Over 140,000 miles of railroad track (of which 120,000 miles are privately owned); 3.8 million miles of roads (46,717 miles of interstate highway and 114,700 miles of National Highway System roads); 582,000 highway bridges over 20 feet of span; 54 highway tunnels over 19,685 feet in length, and over 2.5 million miles of pipeline.
- 3) Nearly 800,000 shipments of hazardous materials transported every day (95 percent by truck).
- 4) The Marine Transportation System consisting of waterways, ports, and their connections, as well as commercial and recreational vessels, vehicles, and system users, such as importers and exporters. This system is geographically vast, with 95,000 miles of shoreline, 25,000 miles of rivers and canals, and is the primary transportation mode providing connectivity between the United States and global economies; 99 percent of overseas trade by volume enters or leaves the United States by ship.

The threat to surface transportation security has been growing over the past decade. Surface transportation remains an attractive target both globally (witness the bombings in Madrid in 2004; London in 2005; Mumbai, India in 2006; and Moscow in both 2004 and 2010) and within the United States. For example: in 2007 Russell Defreitas and three others planned to attack pipelines at the John F. Kennedy Airport; in 2008 there was a threat to New York City commuter rail; in 2009, Najibullah Zazi planned to bomb the New York City subway; in 2010, Faisal Shahzad left a car with gas, propane, fertilizer, and firecrackers at Times Square in New York City; and Farooque Ahmed was arrested in a sting operation in October 2010 for plotting against the Washington Metropolitan Area Transit Authority. To counter the dynamic, yet enduring nature of the threat to surface transportation, TSA, its government partners, and industry owners and operators have committed to improve the security and resilience of the transportation system.

TSA plays a pivotal role in strengthening Surface Transportation Security. The *Implementing Recommendations of the 9/11 Commission Act of 2007* (9/11 Act) requires TSA to take specific measures to strengthen specific modes of transportation by conducting modal security assessments, requiring modal security plan development, providing guidelines for modal security training, and conducting exercise activities to reinforce those security plans. Additionally, the Administration's 2010 Surface Transportation Priority Security Assessment designates TSA as the lead agency for implementing 17 of the report's 20 recommendations, and requires TSA to support the lead agency for two additional recommendations. The Surface Transportation Security budget request for FY 2013 reflects TSA's continuing efforts to improve surface transportation security pursuant to these requirements.

### **B. Budget Activities:**

This appropriation includes two major programs, Surface Transportation Security Staffing and Operations, and Surface Transportation Security Inspectors and Canines.

**Surface Transportation Security Staffing and Operations** - Provides funding for the coordination among all surface security stakeholders of processes and programs to: (1) identify and remediate unacceptable risks to critical infrastructure from all types of hazards; and (2) develop a regulatory framework and the administrative policy for national security strategies, plans, and programs that identify innovative solutions and best practices.

**Surface Transportation Security Inspectors and Canines** - Employs a cadre of inspectors and canine teams to assess compliance, national program delivery, and provide outreach on security assets in the surface transportation system. These resources interact daily within the transportation network to enhance security measures and are available for surge operations during times of heightened security. These inspectors and canine teams are an integral part of TSA's VIPR program.

### **C. Budget Request Summary:**

The Transportation Security Administration requests 807 positions, 775 FTE, and \$124,276,000 for FY 2013. The total adjustment-to-base is a decrease of \$10,472,000.

## II. Summary of FY 2013 Budget Estimates by Program/Project Activity (PPA)

**Department of Homeland Security**

### III. Current Services Program Description by PPA

**Department of Homeland Security  
Transportation Security Administration  
Surface Transportation Security:  
Staffing and Operations  
Program Performance Justification  
(Dollars in Thousands)**

**PPA: Staffing and operations**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	<b>171</b>	<b>150</b>	<b>40,023</b>
<b>2012 Enacted Budget Authority</b>	<b>158</b>	<b>153</b>	<b>38,514</b>
2013 Adjustments-to-Base	-	-	(1,803)
<b>2013 Current Services</b>	<b>158</b>	<b>153</b>	<b>36,711</b>
<b>2013 Total Requested Budget Authority</b>	<b>158</b>	<b>153</b>	<b>36,711</b>
Total Change 2012 to 2013	-	-	(1,803)

The Transportation Security Administration requests \$36.7 million for this activity. The adjustments-to-base includes: an increase of \$86,000 for pay inflation, a decrease of \$1.9 million for management efficiencies.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

TSA, in accordance with the Aviation and Transportation Security Act (ATSA), is responsible for assessing security threats, vulnerabilities, and consequences in all surface transportation modes. Further, TSA is charged with identifying needed security enhancements for surface transportation and related infrastructure, as well as developing security plans, and issuing and enforcing regulations to improve modal security. Homeland Security Presidential Directive (HSPD) 7 and Presidential Policy Directive (PPD) 8 expand TSA’s security responsibilities to include coordination of preparedness, response, and recovery activities for all hazards threatening the critical infrastructure and systems that comprise the Transportation Systems Sector.

The key strategic plans and requirements documents driving TSA’s security efforts are the Executive Order to Strengthen Surface Transportation, the Intelligence Reform and Terrorism Prevention Act (IRTPA) of 2004, the National Infrastructure Protection Plan, the 9/11 Commission Act of 2007, and the DHS Strategic Plan. The following activities are supported by Staffing and Operations:

## Staffing and Operations FY 2013 Request

(dollars in thousands)

	<b>FY 2012 Enacted</b>	<b>FY 2013 Request</b>
Multi-modal Activities (including Maritime & Postal & Shipping)	\$12.0	\$11.4
Mass Transit Activities (Including Passenger, Rail & Bus)	\$6.9	\$6.5
Freight Rail Activities	\$5.7	\$5.5
Pipeline Activities	\$4.8	\$4.6
Highway and Motor Carrier Activities	\$9.1	\$8.7
<b>Total</b>	<b>\$38.5</b>	<b>\$36.7</b>

### **Multi-modal Activities (including Maritime and Postal & Shipping): \$11.4 million**

National Transportation Strategies, Plans and Reports: TSA develops multiple strategies and plans for the protection of transportation assets, such as the Transportation Systems Sector-Specific Plan, strategic modal security plans as required by the IRTPA, and national strategies for public transportation, railroads, and a pipeline system recovery plan as required by the 9/11 Act. The legislation requires that strategies, plans and associated reports are developed in collaboration with Federal, State, local, tribal and territorial governments, owners and operators of transportation infrastructure, private sector stakeholders, and non-profit employee representative organizations. TSA strives to minimize the overlap in planning requirements and to provide a unified process for its stakeholders.

For example, by letter dated September 8, 2009, Congress gave TSA approval to combine the National Strategy for Transportation Security (NSTS) and the modal plans with the 2010 Transportation System Sector-Specific Plan. The 2010 Transportation System Sector-Specific Plan was published in June 2011 and combined the Transportation Systems Sector-Specific Plan, the NSTS, the National Strategy for Railroad Security, the National Strategy for Public Transportation Security, and the National Maritime Transportation Security Plan. Additionally, TSA coordinated the completion of the 2010 Postal & Shipping Sector Security Plan.

9/11 Regulations: In response to the 9/11 Act, TSA is issuing a regulation mandating that freight rail employers, passenger rail carriers, and over-the-road-bus (OTRB) operators develop comprehensive security plans and conduct vulnerability assessments. TSA is preparing multiple rulemakings to cover each of these modes of surface transportation. Following a risk-based approach, these rules will cover the same population of entities covered by the Security Training Programs for Surface Mode Employees Notice of Proposed Rulemaking (NPRM). TSA anticipates that the NPRMs for surface mode security plans and vulnerability assessments will be issued in FY 2013.

The 9/11 Act also requires employees across the surface transportation and aviation modes to complete Security Threat Assessments (STAs). The Transportation Threat Assessment and Credentialing office is preparing a rulemaking to consolidate, coordinate, and harmonize background checks for employees across these different modes of transportation. TSA will work with other agencies that conduct

background checks to avoid redundancies. TSA anticipates that the NPRM will be issued for the STA in FY 2012.

Surface Transportation Security Priority Assessment: TSA is responsible for implementing and managing 17 of the Surface Transportation Security Priority Assessment Report's 20 recommendations, and will also support the lead agency for an additional two recommendations. The implementation costs for many of these recommendations are reflected in other TSA program budget justifications (i.e., credentialing and security threat assessment, grants initiatives). However, TSA is required to establish a single data repository for all Federally-obtained security risk-related information on transportation systems and assets. This will require TSA to inventory, store, maintain, and make available surface transportation risk assessment information to transportation security industry partners. In FY 2010, TSA developed a database taxonomy that supports the storage and maintenance of all Federally-obtained transportation security risk-related information. In FY 2011, TSA began rolling out the Objectively Measured Risk Reduction (OMRR) database tool and incorporated it with the Mission Risk Knowledge Center (MRK-Center). The tool has been applied to Freight Rail, as a suite of tools, and to Mass Transit infrastructure. In FY 2012, TSA plans to apply the tool to other modes, including Highway and Motor Carriers and Pipelines and plans to expand upon the user interface, the volume of information, and the searchability of data in the MRK-Center.

Grant Oversight and Management: TSA provides subject matter expertise and programmatic support to the Grants Program Directorate at FEMA to determine funding priorities and allocation methodologies; issue guidance; and evaluate and approve grant applications for intercity bus, trucks, freight rail, mass transit, ferry, and passenger rail systems. Representatives from the TSA's Intermodal Security Support Division are members of the Executive Steering Committee, as well as the National Review Team for the Port Security Grant Program. Similarly, representatives from TSA's Mass Transit and Passenger Rail Security Division, Highway and Motor Carrier division, and Freight Rail division are members of the National Review Panel for the mass transit and passenger rail grants; intercity bus and trucking grants; and freight rail grants, respectively. The grants are awarded primarily based on risk.

Intermodal Security Training Exercise Program (I-STEP): TSA's I-STEP supports DHS FY 2009 – 2013 Integrated Planning Guidance and TSA Strategies and Goals to enhance the protection of all modes of transportation through objectively measured risk reduction. I-STEP exercises and training are important to building and sustaining security preparedness to protect American people, enhance national resilience, and identify capability gaps and needed resources. Further, TSA's I-STEP meets the requirements of the 9/11 Act by creating a security training and exercise program in the mass transit, freight rail, pipeline, maritime, and OTRB sectors. I-STEP provides programmatic support to modal General Managers that includes the development of training and security awareness material, strategic planning; transportation risk management analysis, stakeholder outreach and modal/multi-modal security program planning.

Transportation security exercises provide opportunities to demonstrate, evaluate, and improve the combined capability and interoperability of surface transportation system partners to perform missions and tasks to achieve successful outcomes and identify security best practices and lessons-learned. To enable stakeholders, I-STEP has also developed a comprehensive training matrix to serve as a resource for TSA security partners in government and industry. Additionally, TSA and the U.S. Coast Guard collaborated on multi-port, intermodal exercises on a regional level in the maritime sector. TSA is also

expanding exercise planning capacity by introducing an on-line exercise planning and information management system (*EXIS*) capable of supporting all modes in the transportation system. This system will specifically assist stakeholders in planning and conducting their own exercises and increasing preparedness in addition to those exercises conducted through I-STEP.

Through security training, TSA develops and disseminates enhanced security training, community awareness products, and operational guidance to enhance security and eliminate duplication of effort in multi-modal transportation operations including seaports. Multi-modal transportation systems are classic intermodal connection points where trucks, trains, pipeline, and mass transit ferry systems can intersect. For example, many ferry systems are a part of a larger city-wide mass transit system. TSA will coordinate and host a series of Explosive Security Seminars for security personnel and first responders in high-risk cities across the Nation. The seminars will present concepts on responding to threats and share regional best practices on an actual event of Improvised Explosive Device/Vehicle Borne Improvised Explosive Devices in intermodal environments.

Intermodal Visual Enhancement Workshop (I-VIEW): TSA will employ photographic and video images to record high-risk transportation infrastructure and systems. I-VIEW provides very detailed domain awareness of a facility or asset by creating a virtual reality of the transportation system by giving the user detailed views, information, and associated documents. I-VIEW will aid agencies with a prevention, response, investigatory capability or responsibility. I-VIEW will assist public and private transportation agencies in preventing, mitigating, responding to, and recovering from terrorist incidents. In FY 2010, TSA worked alongside DHS Infrastructure Protection on two transportation system initiatives to validate capabilities, purchase imagery capture and post-processing equipment, and to conduct initial training for staff. In FY 2011, the following TSA I-VIEW imagery captures have been completed: Boston's South Station Transit Station; Boston's South Station Bus Terminal; Boston's LNG terminal and maritime approaches; Staten Island Ferry; Port of Miami; Port Everglades; Miami International Airport and a forensic of Miami International's fuel farm; and, the Los Angeles International Airport. Post processing activities are still on-going and TSA will continue to capture/process imagery in FY 2012.

Mission Risk Knowledge Center (MRK-Center): MRK-Center is a tool which enables senior field and headquarters leaders to select countermeasures to prevent, deter, and respond to a security incident. It enables Office of Security Operations (OSO), Office of Intelligence (OI), Office of Law Enforcement (OLE), and Transportation Sector Network Management (TSNM) to share risk-related information across the agency, ensuring that all Offices make decisions based on consistent data. This portal serves as an integrated repository for this risk-related information, and includes a risk analysis database that will allow for the manipulation and analysis of the critical information.

Technology Pilots: Security Technology Pilots enhance the capability to deter, detect, and prevent explosives from being introduced as a weapon on port and multimodal transportation systems and their associated facilities and terminals. Security Technology Pilots build upon existing technology pilots that provide a platform and programmatic infrastructure for improving current security screening for high capacity transportation operations. Technology selected to be tested is pertinent to several TSA programs.

In FY 2011, TSA supported the continued development of the Fedtrak System. Congress directed TSA through Public Law 110-53, Section 1554 to develop a program that tracks motor-carrier

shipments of security-sensitive materials. DHS Office of Infrastructure Protection identified the need in the 2007 Sector Annual Report for the Transportation Sector to develop a system that would demonstrate a realistic and cost-effective architecture, infrastructure, and workable concept of operations.

TSA spent nearly \$11 million from 2003 to 2007 on the Hazmat Truck Security Pilot (HTSP) to demonstrate that a hazardous materials truck tracking center system could interface with government intelligence centers and first responders to monitor and manage the movements of trucks with Highway Security-Sensitive Materials (HSSM). TSA is leveraging the proven efforts of the HTSP and the North American Transportation Security Center (NATSC) to help TSA implement a Tier 1 HSSM truck tracking program consistent with Public Law 100-53.

TSA continues to support DHS' Science and Technology Directorate with the implementation of a prototype (Fedtrak). The prototype will study the practicality of the TSA Security Action Items (SAIs) related to shipment tracking and evaluate the smart truck telematics industry to culminate in a report to Congress.

Stakeholder Collaboration: TSA interfaces with government and private sector stakeholders in multiple modes concerning strategies, plans, reports, best practices, standards, regulations, protection programming and performance measurement. Collaboration activities also include formal information and intelligence sharing processes; training, exercise and outreach initiatives; and other outreach efforts on matters impacting the Transportation System Sector. For example, TSA provides security awareness information to operators as part of the HAZMAT Motor Carrier Security Action Item Training Program, to the school transportation industry as part of the School Transportation Security Awareness Program, and to the motor coach industry through Operation Security Transport. In addition, TSA holds an annual cybersecurity summit addressing cybersecurity in the transportation modes. Campaigns being conducted with mass transit and passenger rail include Transit Watch, First Observer, and "If You See Something, Say Something," a campaign being conducted cooperatively with DHS and Amtrak, which emphasizes the importance of vigilance, timely reporting of security concerns, and fostering public awareness and education.

Baseline Assessment for Security Enhancement (BASE) Program: TSA has implemented a continuous improvement process via comprehensive security assessments conducted by TSA Transportation Security Inspectors-Surface (TSIs-Surface) under the BASE program. Assessments evaluate security posture in 17 Security and Emergency Management Action Items foundational to an effective mass transit security program and 23 SAIs for the highway sector security program. The results influence security enhancement priorities and review of projects under the Transit Security Grant Program (TSGP) for mass transit and passenger rail agencies, as well as highway sector trucks and motor coaches. The most effective security practices cited in the BASE assessments are shared throughout the transit, rail and highway communities, which spurs networking among security professionals and expands implementation.

Beyond conducting assessments, TSIs-Surface serve as direct liaisons to mass transit, passenger rail and highway sector security officials. In this capacity, they facilitate security enhancement efforts, respond to reports of threats and suspicious incidents, and foster regional security collaboration.

Corporate Security Reviews (CSRs): TSA conducts CSRs in multiple modes of transportation on a continuous basis to evaluate standards and identify security gaps in reviewed systems. CSRs allow TSA and the system operators and owners to develop first-hand knowledge of security planning and execution at critical systems, establish communication between key security personnel, identify and share smart practices, and make recommendations for security improvements. During a CSR, teams of TSA modal experts evaluate and collect physical and operational preparedness information on critical assets and key point-of-contact lists, review emergency procedures and security plans, provide domain awareness training, and offer an opportunity to share security practices among security partners.

**Mass Transit Activities (Including, Passenger Rail, and Bus): \$6.5 million**

Stakeholder Collaboration: TSA Mass Transit officials coordinate with key stakeholders in a number of ways, such as the Regional Transit Security Working Groups. The purpose of these working groups is to identify regional priorities and resolve security needs. In FY 2011, TSA focused on capital projects for critical assets in the historically Tier 1 Transit Security Grant Program regions.

TSA also works closely with the Mass Transit and Passenger Rail Security Government Coordinating Council and Sector Coordinating Council, and with the Transit Policing and Security Peer Advisory Group (PAG). The PAG is a collection of 21 Transit Police and Security Chiefs representing various types of transit agencies across the Nation. TSA also partners with the Department of Transportation's Federal Transit Administration to conduct annual Safety and Security Roundtables where the agencies with daily weekday ridership of 60,000 or greater attend a three-day conference where best practices and ideas are shared.

TSA's Mass Transit program coordinates bomb squad responses to Transportation System training and exercises with transit systems around the country. The Mass Transit's training division works with the public transit industry, TSA's Explosive Ordinance Division, and local law enforcement agencies in providing training to local bomb squad units across the Nation. The eight-hour Bomb Squad Response Training Program is designed specifically for non-transit police bomb squads responsible for responding to improvised explosive device (IED) events involving mass transit and passenger subway trains, light rail vehicles, and buses. The training, which includes video, classroom instruction and field components, equips first-responders with the working knowledge of the various mass transit and passenger rail operating conditions and environment (e.g., subway tunnels, stations and aerial structures) in order to safely and expeditiously remediate an IED incident.

Infrastructure Protection: The TSA Mass Transit and Passenger Rail Security Division (MTPR), in coordination with other government partners (i.e., NPPD) and industry, have identified the Nation's most critical mass transit and passenger rail infrastructure, and are focused on identifying vulnerabilities and facilitating the mitigation of these vulnerabilities. Mass Transit and Passenger Rail critical infrastructure consists of transit and rail underwater tunnels, high volume, multi-modal transit and rail stations, bridges, and other identified structures. TSA is working closely with these stakeholders to guide them in developing remediation plans to harden this infrastructure. Plans are underway to conduct a Transit and Passenger Rail Infrastructure workshop in FY 2013 with stakeholders who own/operate this critical infrastructure. This workshop will bring together industry experts to share best practices and mitigation efforts on protecting this critical infrastructure.

Technology: TSA's MTPR Security Division, in coordination with its partners, maintains a robust research and development agenda and technology program. Working with security partners to identify additional research and development requirements, coupled with testing new and emerging technologies in the field, is critical to advancing new and emerging technologies throughout the Mass Transit community. Examples of these joint programs include: Resilient Tunnel and Mass Transit Operational Test Beds.

The Resilient Tunnel Project (RTP), developed in conjunction with objective three of the National Tunnel Security Initiative to utilize the Transportation Security Grant Program (TSGP) funds on highest risks, was designed to develop feasible, innovative, and cost effective solutions to limit water flow in case of a tunnel breach.

TSA is also currently conducting planning that will lead to the establishment of two Mass Transit Operational Test Beds in large, multi-faceted, multi-modal transit systems. These test beds will be the primary venues in which new technologies and associated processes and procedures will be evaluated.

### **Freight Rail Activities: \$5.5 million**

Infrastructure Criticality Tool: The TSA Freight Rail Security Division has refined and enhanced a critical infrastructure risk assessment tool. This tool is designed to measure the criticality and vulnerability of freight rail bridges in the United States and serves as the factual and analytical baseline to develop and propose security enhancements and mitigation strategies for critical railroad infrastructure.

Critical Infrastructure Assessments: In FY 2011, the Freight Rail Security Division utilized the Infrastructure Criticality Tool to assess 73 critical railroad infrastructures. Since the initiation of this program, a total of 143 critical railroad infrastructures have been assessed. An additional 118 critical railroad infrastructures locations are projected to be assessed by the end of FY 2012.

Toxic Inhalation Hazard (TIH) Transportation Risk Reduction: TSA, in cooperation with industry stakeholders, established the TIH risk reduction program to objectively measure the security risk associated with the rail transportation of TIH materials through High Threat Urban Areas (HTUA). The program's objective is to reduce the dwell time of rail cars carrying TIH materials, and implement positive security measures by rail carriers. An estimated risk reduction of 96 percent was achieved in FY 2011 when compared against the original baseline. The Freight Rail Security Grant Program (FRSGP) has made funding available for the installation of electronic tracking devices on rail cars transporting rail security-sensitive materials (RSSM). This technology provides TSA with domain awareness of RSSM shipments and optimizes the time spent on TIH risk surveys, as the data acquired from the tracking devices provides more detailed information on the location and movement of RSSM rail cars than was previously available. In FY 2010, all GPS grant awardees (five) had acquired and installed the GPS units on 44 percent of their TIH applicable railcars. The grant awardees were 86 percent complete at the end of Q4 FY 2011 and anticipate full completion in FY 2012 equating to 3,821 GPS enhanced TIH railcars.

Rail Transportation Security Compliance: On November 26, 2008, TSA issued a final rule on rail transportation security covering freight railroad carriers, shippers of RSSM, and receivers of RSSM located within an HTUA. The Rail Transportation Security Rule establishes procedures for the secure

transfer of custody between railroads and at points of origin and delivery in HTUAs. The rule also requires the appointment of Rail Security Coordinators, the reporting of location and shipping information of RSSM rail cars, and the reporting of significant security concerns to TSA. TSA's surface inspector workforce monitors compliance with the provisions of the regulation. The Freight Rail program office supports the inspection force with training and enforcement guidance.

Regulatory Development: During FY 2011, the Freight Rail Division coordinated the development of a Notice of Proposed Rulemaking (NPRM) that will require "high-risk" railroads to conduct vulnerability assessments of critical infrastructure and subsequently develop and implement security plans. TSA anticipates completion of the NPRM draft in FY 2012.

Railroad Self Assessment of Vulnerability (RSAV) tool: In accordance with Section 1512 of the 9/11 Act, TSA developed the RSAV as a mechanism that railroads can use to evaluate the criticality and vulnerability of an identified set of critical infrastructure assets. The RSAV will be made available to regulated parties concurrently with the issuance of the NPRM for their use as a means to comply with a proposed regulation requiring certain railroads to conduct vulnerability assessments and develop security plans.

Dispersion Modeling: To improve the understanding of large-scale toxic chemical releases from rail tank cars, in high population areas, TSA and the U.S. Army Edgewood Chemical and Biological Center (ECBC) with support from the DHS S&T Chemical Security Analysis Center (CSAC) conducted ten outdoor chemical release trials during Project Jack Rabbit. One and two-ton quantities of chlorine and anhydrous ammonia were released at a U.S. Army testing installation in the Utah desert. A wide range of instrumentation and video cameras collected vast amounts of data. TSA is providing support to the CSAC to evaluate the release data. In order to meet the 9/11 Act 1519(b) requirements to evaluate the impact of large TIH materials releases, additional release testing of large quantities of chemicals may be necessary. TSA collaborated with many of the Nation's dispersion modeling scientists and hazardous materials experts. Interested stakeholders include first responders, emergency managers, chemical and rail industry, the Department of Transportation, several organizations within the Department of Defense.

Tank Car Vulnerability: To better understand and quantify the vulnerability of rail tank cars carrying TIH materials, TSA in partnership with DHS S&T and the Federal Bureau of Investigation (FBI) funded the testing of the potential impact of weapons (bullet, Explosively Formed Projectile, IED, and VBIED) on the TIH material tank car. The testing was conducted by the Naval Surface Warfare Center Carderock Division at the U.S. Army Aberdeen Proving Ground. Occidental Chemical donated two TIH rail tank cars for this testing. This information will be used to develop vulnerability reduction methodologies that could be used in existing and new rail tank cars.

Ammonium Nitrate Testing: TSA has identified the security of high-density, fertilizer-grade ammonium nitrate (FGAN), transported in bulk, as a potential vulnerability in the freight rail network. To assess the risk posed by this potential threat, TSA led a multi-government agency and industry team in a 2010-2011 study of the potential for weaponizing rail hopper cars carrying bulk loads of ammonium nitrate. These experts evaluated existing studies, nationally and internationally, classified and unclassified, on the explosive risks associated with ammonium nitrate. Participating organizations include TSA, FBI, Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Coast Guard,

Department of Transportation, Technical Support Working Group, DHS, The Fertilizer Institute, and the Institute of Makers of Explosives.

### **Pipeline Activities: \$4.6 million**

Critical Facility Assessments: The *Implementing Recommendations of the 9/11 Commission Act of 2007* (9/11 Act) required TSA to conduct inspections of the critical facilities of the 100 most critical pipeline operators. 347 facilities were identified as meeting the criteria for designation as critical and requiring inspection. TSA's Critical Facility Inspection (CFI) Program was initiated in November 2008 with a focus on assessing location specific physical security measures. Following each inspection pipeline company personnel were provided an on-site debrief with security recommendations as well as a written report. Inspection of the final facility occurred in May 2011.

TSA intends to continue its assessment program for critical pipeline facilities. Modifications have been made to the review process to incorporate guidance contained in the revised Pipeline Security Guidelines. Under its Critical Facility Security Review (CFSR) Program, TSA will evaluate the physical security of 90 – 100 pipeline facilities annually.

Pipeline Corporate Security Reviews (CSRs): On an annual basis, TSA conducts 15 – 20 CSRs of the top 100 natural gas and hazardous liquid transmission pipelines and natural gas distribution systems within the United States. This allows the program to revisit a company within the top 100 systems approximately every three to four years to assess the current status of the company's security efforts and gauge progress from previous reviews.

Stakeholder Collaboration: The TSA Pipeline Security Division has established a highly effective working relationship with its industry and government partners through the Pipeline Sector and Government Coordinating Councils. TSA is also an active participant in the Energy Sector Oil and Natural Gas Coordinating Council. To provide pipeline industry personnel with additional insight into TSA's current activities and policies, the Pipeline Division conducts monthly stakeholder conference calls.

The Pipeline Security Division has developed three security related CD/DVD training programs for use by pipeline operators: *Pipeline Security Awareness*, *Pipelines: Countering IEDs*, and *Protecting Pipeline Infrastructure: The Law Enforcement Role*. Also, to enhance the preparedness of pipeline companies, TSA has conducted I-STEP exercises with operator security personnel.

In conjunction with its Canadian government counterpart, Natural Resources Canada, TSA hosts an International Pipeline Security Forum on an annual basis. The two-day forum enhances government and industry pipeline security domain awareness and provides opportunities for discussion of major pipeline security issues, both domestic and international.

### **Highway and Motor Carrier Activities: \$8.7 million**

Highway Infrastructure Assessments: TSA developed a comprehensive critical infrastructure (bridges and tunnels) vulnerability assessment program to identify and rank critical assets, identify vulnerabilities, and quantify costs for hardening structures and replacing each structure. TSA plans to

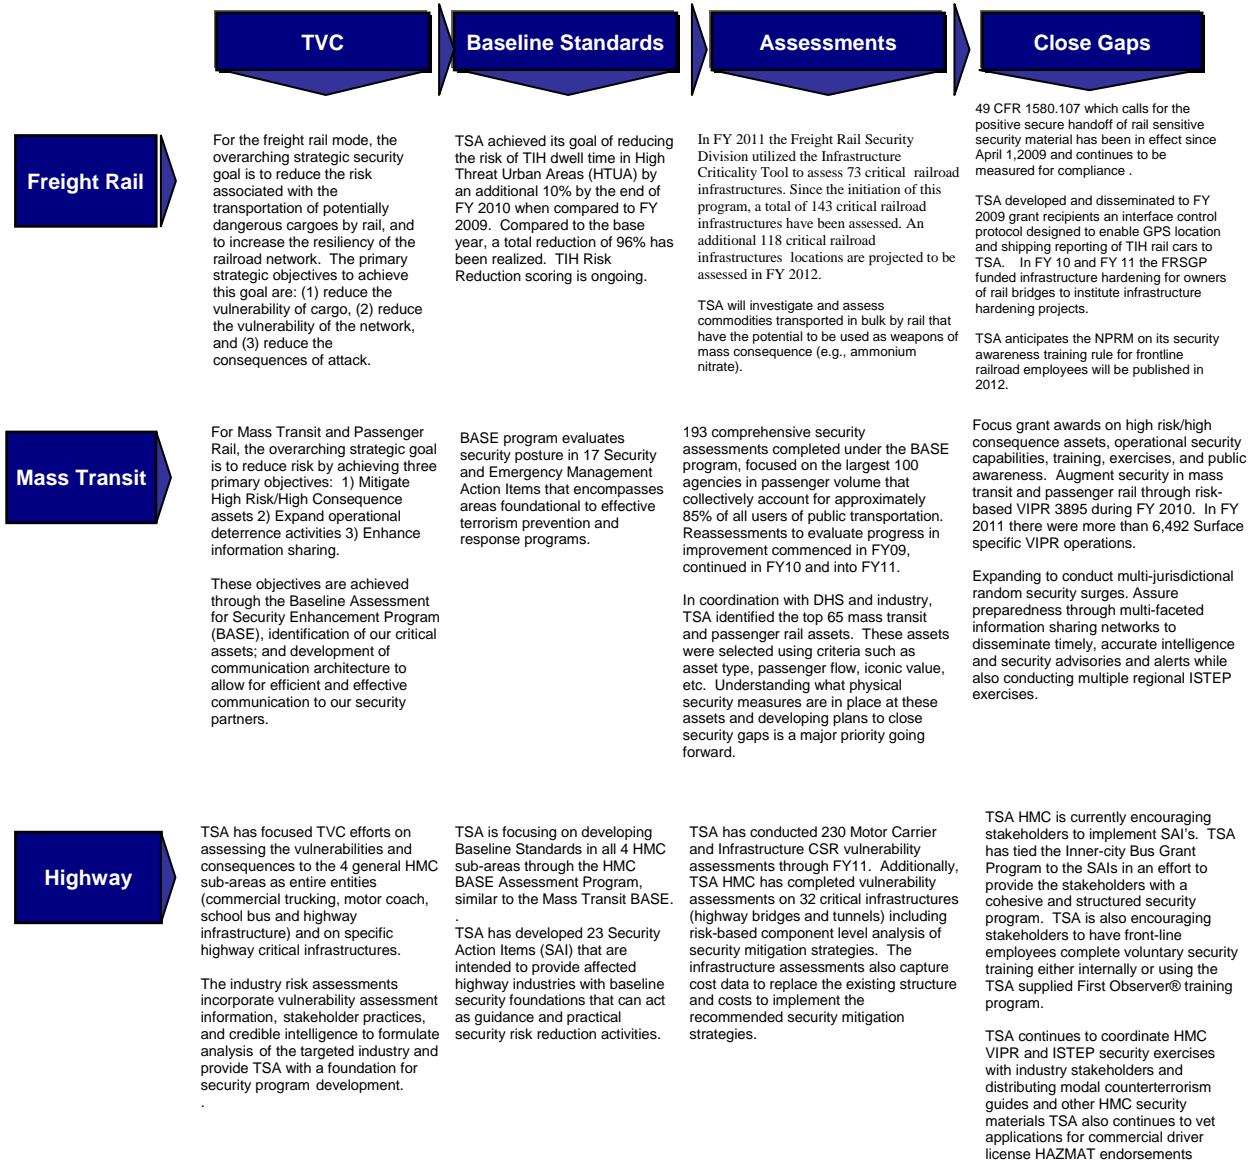

continue to conduct assessments (finite element modeling) on critical structures. In FY 2012, this program will continue to be expanded to incorporate outreach efforts utilizing U.S. Army Corps of Engineers (USACE) subject matter experts (SME) to participate in working groups and seminars that identify security related vulnerabilities at the design phases of an individual structure. These additional USACE SME personnel will augment TSA personnel and act in an advisory capacity to review structural plans provided by stakeholders to identify weaknesses in the structure that may result in emergency support or mitigation.

Highway Baseline Assessment for Security Enhancements (BASE) Assessment Program: The Highway BASE Assessment program is the next generation Highway CSR. This new program and process will replace the existing CSR program that Highway Motor Carrier (HMC) began in 2005. Highway BASE is a comprehensive assessment of highway and motor carrier assets. The BASE assessment is comprised of security and response assessment areas based on CSRs protocol items and the security action items that were developed by TSA and issued to the highway HAZMAT transportation industry in 2008. The program will target assets compiled by risk-based data from private and public sources.

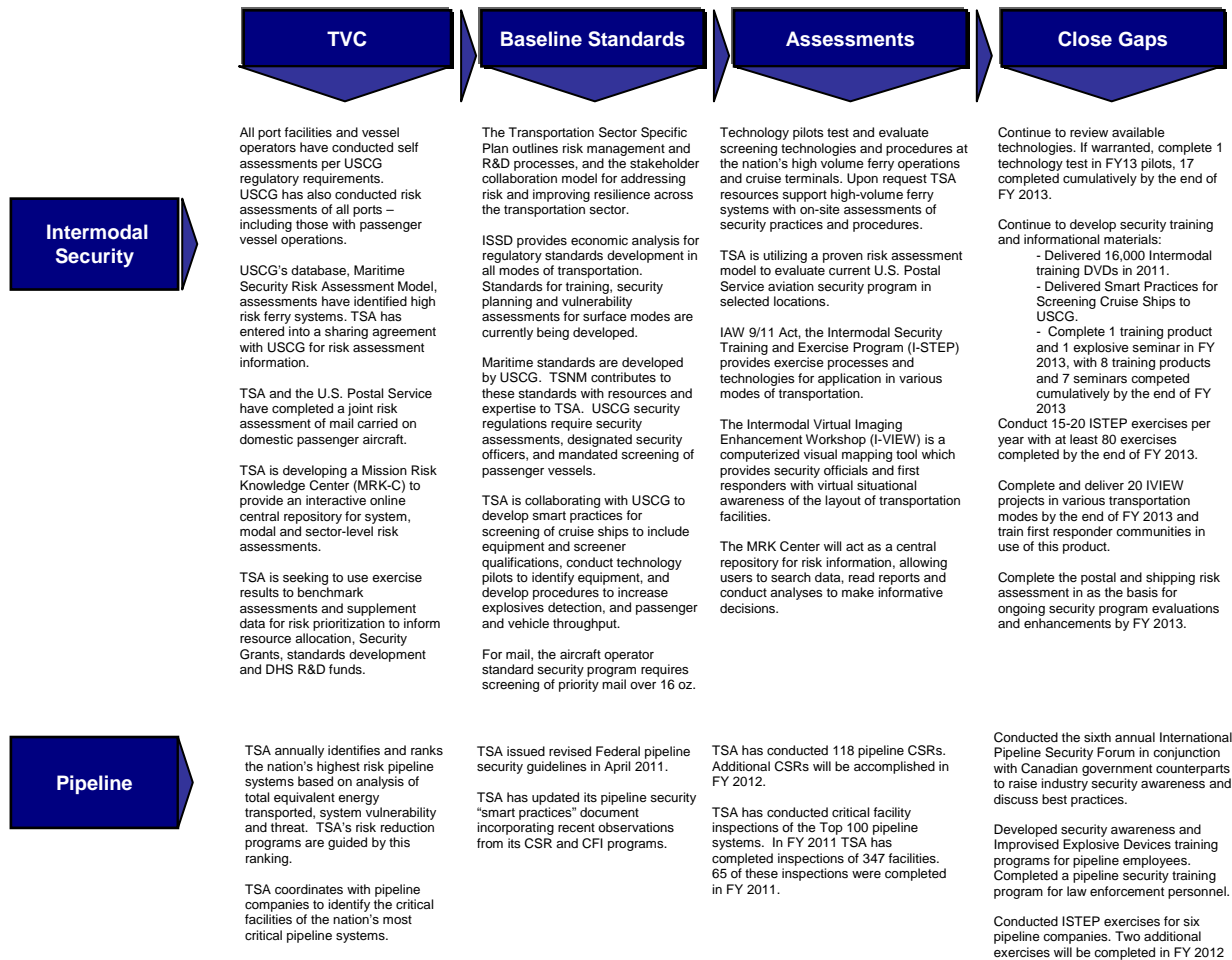

Stakeholder Collaboration: TSA coordinates closely with industry stakeholders through the Critical Infrastructure Partnership Advisory Council meetings that are held with each of the four highway modal industry groups of trucking, motor coach, school bus, and infrastructure. Additional areas of stakeholder collaboration include the development of modal training programs and the planning and execution of modally-focused security exercise programs through TSA's I-STEP program office.

The following surface transportation initiative matrix displays the mitigation activities that TSA has conducted to reduce the risk resulting from threats, vulnerabilities, and consequences specific to each transportation mode.

## SURFACE TRANSPORTATION INITIATIVE MATRIX

## SURFACE TRANSPORTATION INITIATIVE MATRIX

In FY 2013 the Staffing and Operations PPA will be reduced by \$1.9 million due to savings from the purchase of supplies and materials, as well as savings in administrative/professional support contracts. Over \$1 million will be saved through efficiencies across the DHS enterprise in areas such as TDY and conferences.

### Management Efficiencies: (\$1,889 million) (dollars in thousands)

<u>Item</u>	<u>Sub-Total</u>	<u>Total</u>
Enterprise-Wide Efficiencies		(\$1,304)
General TDY	(\$ 96)	
Conferences	(\$ 3)	
OFPP Directed Purchasing Savings	(\$ 1,205)	
Admin/Professional Support Contract Efficiencies		(\$127)
Other		(\$458)

**Department of Homeland Security

Surface Transportation Security:  
Surface Transportation Security Inspectors and Canines  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: Surface Transportation Security Inspectors and Canines**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	<b>649</b>	<b>507</b>	<b>69,085</b>
<b>2012 Enacted Budget Authority</b>	<b>649</b>	<b>622</b>	<b>96,234</b>
2013 Adjustments-to-Base	-	-	(8,669)
<b>2013 Current Services</b>	<b>649</b>	<b>622</b>	<b>87,565</b>
<b>2013 Total Requested Budget Authority</b>	<b>649</b>	<b>622</b>	<b>87,565</b>
Total Change 2012 to 2013	-	-	(8,669)

The Transportation Security Administration requests \$87.5 million for this activity. The adjustments-to-base includes: an increase of \$272,000 for pay inflation and a decrease of \$8.9 million for management efficiencies.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Surface Transportation Security Inspector and Canine PPA provides resources for the Surface Inspection and Oversight (SIPO) program; Surface Visible Intermodal Prevention and Response (VIPR) program; and the surface transportation security related part of the National Explosives Detection Canine Training Program (NEDCTP).

	<b>FY 2012 Enacted</b>	<b>FY 2013 Request</b>
Surface Inspection and Program Oversight (SIPO)	\$33.9	\$33.0
Visible Intermodal Prevention and Response (VIPR)	\$55.5	\$47.8
National Explosives Detection Canine Training Program	\$6.8	\$6.7
<b>Total</b>	<b>\$96.2</b>	<b>\$87.5</b>

**Surface Inspection and Program Oversight (SIPO): \$33.0 million:**

The SIPO is a unique and critically important Federal inspection program with responsibilities in United States surface transportation security. With emphasis on freight railroads, mass transit,

passenger rail, and highway motor carriers, the SIPO has set out to enhance security preparedness in an industry that is the largest transporter of passengers in the country.

The following chart provides historical and current information on the total number of Surface, Aviation, and Cargo Transportation Security Inspectors (TSIs) positions across TSA.

**TSA Full-Time Permanent Inspector Positions**

	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013
<b>Aviation Regulation Inspectors</b>	<b>815</b>	<b>815</b>	<b>915</b>	<b>958</b>	<b>958</b>
Aviation Regulation - Domestic Inspectors	657	657	657	657	657

Surface - VIPR Inspectors	75	154	154	154	154

1/ Includes a realignment of 23 FAMS canine handlers to Transportation Security Inspectors

2/ Includes 20 additional passenger screening canines.

Transportation Security Inspectors - Surface (TSI-Ss) are deployed through a risk-based approach and provide coverage of key passenger rail and mass transit rail facilities in their regions, as well as 61 High Threat Urban Areas (HTUAs), as defined by DHS. The location and number of inspectors is also determined by transit ridership, proximity to Toxic Inhalation Hazard (TIH) shipment locations (freight rail), critical infrastructure ratings, and HTUA ranking. TSI-S personnel provide stakeholder liaison functions, situational awareness of security conditions and, during surface transportation incidents, convey valuable first-hand information to Federal Security Directors (FSDs); security, policy, and intelligence offices; and TSA leadership. To ensure inspectors operate safely and appropriately in the surface transportation environment, training for TSIs-Surface is provided at a specialized Pueblo, CO facility. Training is key to ensuring that TSA has a technically proficient and agile workforce. All courses include both classroom instruction and on-site practical application exercises.

The legislation underlying 49 CFR parts 1520 and 1580, provides TSA's TSI-Ss with regulatory authority to ensure a secure chain of custody of security-sensitive material rail cars occurs between rail carriers and shippers/receivers at points of origin, delivery, and interchange. TSA's TSI-Ss observe the handling and placement of security-sensitive material rail cars and verify the paperwork at the covered facilities to ensure compliance, including reporting requirements for incidents, potential threats, and significant security concerns, and location tracking requirements. It also requires the designation of a Rail Security Coordinator by freight and passenger railroad carriers, rail transit systems, and certain hazardous materials facilities.

Responsibilities of the TSI-Ss include:

- Conducting threat and vulnerability inspections, reviews, and assessments that are used to determine the capability of a potentially targeted transportation system/asset to reduce the risk from a specified threat;
- Conducting Risk Reduction Survey assessments for railcars carrying TIH materials and shippers;
- Serving as panel members on the Transportation Security Grant Program (TSGP) to review project proposals, assess grant applications, and assist in developing a process for awarding grants;
- Responding to surface transportation security incidents (i.e., train derailments, possible improvised explosive devices, major truck accidents, etc.) to gather real-time, on-scene information which are provided to FSDs and TSA senior leadership;
- Staffing transit agency and freight rail operations centers in times of increased threat, heightened alert, or during a catastrophic event; and
- Planning, participating in, and dedicating personnel to TSA VIPR deployments.

The SIPO program conducts various types of threat and vulnerability inspections, reviews, and assessments, which include:

Freight Rail Corridor Assessments (FRCAs): TSA conducts FRCAs, which focus on assessing the vulnerabilities of high-population areas where TIH materials are moved by rail in significant quantities. The FRCAs provide site-specific mitigation strategies and lessons learned, and support the development of Security Action Items (SAIs). On-site assessments consist of a detailed examination of the railroad(s) operations and procedures within the HTUA and take approximately 4-6 weeks to complete, depending on the HTUA and complexity of the railroad operations within the corridor.

Station Criticality Assessments (SCA) also known as Station Profiles: TSI-Ss conduct SCAs, which are in-depth assessments of critical infrastructure facilities and transit stations. SCAs have gained importance with the terrorist attacks in the mass transit mode in Mumbai, Madrid, London, and Moscow. The assessments provide detailed information on a variety of station-related intelligence, such as the locations of exits, telephones, Closed Circuit Television (CCTV), electrical power, station managers, etc. The information has been extremely useful in VIPR planning, and is also relevant for first responders, intelligence planners and security personnel. The majority of stations across the Nation have been completed and are in the process of being continually updated as security enhancements are added to stations.

Baseline Assessment for Security Enhancement (BASE) Reviews: BASE reviews are comprehensive mass transit assessments that require a significant amount of time and stakeholder coordination to complete. They are voluntary on the part of the stakeholder, and therefore must be completed with consideration given to the stakeholder's availability and schedule. The Surface Transportation Security Inspection Program (STSIP) has continued the pursuit of conducting BASE reviews focusing on high-risk transit agencies that have a 60,000 average weekday ridership. TSI-S personnel conduct follow-up visits to BASE assessed transit agencies to address performance weaknesses identified by the results. The Performance Improvement Action Plan (PIAP) program is a tool utilized to monitor the efforts of transit agencies to improve security vulnerabilities discovered through BASE reviews. TSI-S personnel evaluate the transit agencies improvement efforts and prioritize lists of security

improvements necessary to make public transportation systems, facilities, and passengers more secure. TSI-S personnel work closely with transit agencies to offer additional tools and TSA programs to help bolster the low scoring sections found in the BASE.

Mass Transit System Criticality Tool (MTSCT): This is a tool designed to measure the criticality of transit assets in relation to a number of predetermined factors. TSI-S personnel work closely with transit agencies to identify key system assets and obtain asset consequence and vulnerabilities details.

Mass Transit System Risk Assessments (MTSRA): Assessments are scheduled at the program office level and coordinated through local TSI-S field offices, and require close supervision and program office oversight by subject matter experts. Risk Assessments are voluntary and require transit agency cooperation in completing. TSI-S and Surface Regional Security Inspector (RSI-S) personnel conduct these risk assessments. This tool was developed in response to the 9/11 Act, Section 1405.A.3.A (Security Assessments and Plans), and consists of ten identified assets within a mass transit system: passenger stations, tunnels, bridges, power stations, signals, track, facilities, yards, communication facilities, and vehicles. The tool includes a risk score based on threat (T), vulnerability (V), and consequence (C), with the vulnerability score broken up among 18 different asset categories, and over 1,500 vulnerability questions per category. Agency participants receive an executive summary report which outlines their T/V/C scores and will be used to meet the requirements of the upcoming Notice of Proposed Rule-Makings (NPRMs), as well as provide a prioritized list of security vulnerabilities to assist in decision-making.

In addition, with the issuance of the rail and mass transit regulation under 49 CFR 1580, TSI-Ss conduct compliance inspections throughout the freight rail and mass transit domain.

TSA, in conjunction with the private sector, developed a list of 24 Security Action Items (SAIs) and three Supplemental Security Action Items (SSAIs). These security guidelines identified best practices, which freight railroads and their employees should implement to reduce the risk associated with the transportation of TIH materials by rail. These assessments led to the development of a TIH Risk Reduction Project. Implemented in 2007, the project focuses on objectively measuring the risk reduction associated with the rail transportation of TIH materials by rail, through 46 HTUAs.

### **Visible Intermodal Prevention and Response (VIPR): \$47.8 million**

The objective of VIPR deployments in mass transit and passenger rail systems is to augment capabilities that detect and deter potential terrorist activity. To achieve this end, TSA utilizes periodic random deployments that are unpredictably executed in timing, location, and types of activities. VIPR operations teams consist of TSA personnel that may include Transportation Security Inspectors, Transportation Security Officers, Federal Air Marshals, Behavior Detection Officers, Transportation Security Specialists-Explosives, Explosives Detection Canine teams, and Federal, State and local law enforcement officers. Uniformed VIPR team members provide a visible and official security presence apparent to all who use or are observing the mass transit or passenger rail system. VIPR activities support the system's efforts to prevent an adversary from orienting on and breaching a pattern in security activities. The total number of VIPR deployments across transportation modes increased to approximately 170 to 190 per week in 2011.

**National Explosives Detection Canine Team Program (NEDCTP): \$6.7 million:**

TSA’s NEDCTP develops, trains, deploys, and certifies explosives detection canine teams to deter and detect the introduction of explosive devices into the transportation system. Each team is composed of a specially trained canine and a State or local law enforcement handler. The NEDCTP, in partnership with State and local law enforcement agencies, fulfills the need to provide effective, low-cost security measures within the mass transit/commuter rail, and maritime (ferry system) sector.

Through Other Transaction Agreements (OTAs), TSA provides funding for training, certification, and maintenance of the capable explosive detection canines, training for the handlers, and partial reimbursement of handlers’ salaries and other costs. Local law enforcement agencies deploy these canine teams and provide DHS with a mobile response platform for specific threats to the transportation systems.

<b>Explosives Detection Canine Team Assignments</b>	<b>FY 2012</b>	<b>FY 2013</b>
<b>AVIATION REGULATION &amp; ENFORCEMENT</b>		
<b>Aviation:</b> State & Local Law Enforcement-led teams <i>Funded 75% from Aviation Regulation &amp; Enforcement</i>	<b>497 teams @ 78 airports</b>	<b>497 teams @ 78 airports</b>

<b>Mass Transit/Maritime:</b> State & Local Law Enforcement-led teams	<b>117 teams @ 18 locations</b>	<b>117 teams @ 18 locations</b>
<b>TOTAL NUMBER OF CANINE TEAMS</b>	<b>920</b>	<b>920</b>

<sup>1</sup> Passenger Screening Canine (PSC) is now used versus “Vapor wake” which is a trademarked term associated with Auburn University.

In FY 2013 the Surface Transportation Security Inspectors and Canines PPA will be reduced by \$8.9 million due to savings from the purchase of supplies and materials, as well as savings in administrative/professional support contracts. Over \$1 million will be saved through efficiencies across the DHS enterprise in areas such as TDY and overtime.

### Staffing and Operations Mission Statement

Surface Transportation Security Staffing and Operations is charged with managing TSA's efforts to mitigate the risk and provides security direction to all non-aviation transportation systems. This responsibility covers rail, mass transit, highways, buses, trucking, ferries, and pipelines. The Surface Transportation Security Staffing and Operations office also works with industry, State and local governments, and other Federal agencies in developing standards and regulations to ensure the security of these vital transportation systems.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	16,415	16,786	16,849	63
11.3 Other than full-time permanent	74	-	-	-
11.5 Other personnel compensation	86	-	-	-
11.6 Pay Diff (Sun/Night)	34	-	-	-
11.7 Military personnel/Awards	238	-	-	-
12.1 Benefits	4,337	6,212	6,235	23
<b>Total, Salaries &amp; Benefits</b>	<b>21,184</b>	<b>22,998</b>	<b>23,084</b>	<b>86</b>

The FY 2013 request reflects Salaries and Benefits for 153 FTE.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>21.0 Travel</b>	<b>\$1,011</b>	<b>\$1,654</b>	<b>\$1,447</b>	<b>-\$207</b>

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2013 request reflects a reduction for Management Adjustments.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>23.3 Communications, utilities, and misc. charges</b>	<b>\$6</b>	<b>\$127</b>	<b>\$111</b>	<b>-\$16</b>

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. PDA and cell phone air time are the major items being charged to this object class. The FY 2013 request reflects Management Adjustments.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>24.0 Printing</b>	<b>\$7</b>	<b>\$31</b>	<b>\$27</b>	<b>-\$4</b>

Printing includes all costs for printing and reproduction obtained from private sector or other federal entities. The FY 2013 request reflects a reduction for Enterprise-Wide Efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.2 Other services</b>	<b>\$3,456</b>	<b>\$13,157</b>	<b>\$11,563</b>	<b>-\$1,594</b>

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The funds will be used to support security efforts in non-aviation modes including Pipelines, Maritime, Mass Transit, Rail, Highway and Motor Carrier and Postal and Shipping. The FY 2013 request reflects a reduction for Admin/Professional Support Contract Efficiencies and Management Adjustments.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.3 Purchases from Gov't accts.	\$4,737	\$142	\$124	-\$18

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The funds will be used to support partnership activities with other government agencies. The FY 2013 request reflects a reduction for Enterprise-Wide Efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
26.0 Supplies and materials	\$50	\$405	\$355	-\$50

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. This PPA will use these funds to acquire office supplies, education materials, training materials and any other supplies and materials. The FY 2013 request reflects a reduction for Enterprise-Wide Efficiencies.

<b>Total, Salaries &amp; Benefits</b>	<b>54,665</b>	<b>72,414</b>	<b>72,675</b>	<b>261</b>

The FY 2013 Salaries and Benefits request includes pay inflation of \$272,000 and a decrease of \$11,000 for overtime costs.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
21.0 Travel	\$4,632	\$1,500	\$1,036	-\$464

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. This funding will be used for local and extended travel to conduct a multitude of transit inspections program management. The FY 2013 request reflects a decrease of \$86,000 for travel costs and a decrease of \$378,000 for Management Adjustments.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
23.3 Communications, utilities, and misc. charges	\$212	\$450	\$274	-\$176

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. This funding will be used for communication equipment and service cost. The FY 2013 request reflects a decrease of \$176,000 for Management Adjustments.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.2 Other services	\$1,354	\$12,942	\$5,272	-\$7,670

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2013 request reflects a decrease of \$7,670,000 for Management Adjustments.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.3 Purchases from Gov't accts.	\$554	\$159	\$96	-\$63

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The funds will be used to support partnership activities with other government agencies. The FY 2013 request reflects a decrease of \$63,000 for Management Adjustments.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>26.0 Supplies and materials</b>	\$1,277	\$980	\$596	-\$384

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2013 request reflects a decrease of \$384,000 for Management Adjustments.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>31.0 Equipment</b>	\$1,795	\$232	\$141	-\$91

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2013 request reflects a decrease of \$91,000 for Management Adjustments.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>41.0 Grants/Subsidies/Contributions</b>	\$4,529	\$6,780	\$6,698	-\$82

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. The FY 2013 request reflects a decrease of \$82,000 Management Adjustments.

## **BUDGET REQUEST AND SUPPORTING INFORMATION**

### **Transportation Security Administration Transportation Threat Assessment & Credentialing**

#### **I. Appropriation Overview**

##### **A. Mission Statement for Transportation Threat Assessment & Credentialing:**

To reduce the probability of a successful terrorist or other criminal attack to the transportation system through application of threat assessment methodologies that are intended to identify known or suspected terrorist threats working or seeking access to the Nation's transportation system.

This appropriation supports compliance with:

- National Strategy for Homeland Security,
- USA PATRIOT ACT of 2001 (P.L. 107-56),
- Safe Explosives Act (P.L. 107-296),
- Aviation Transportation Security Act of 2001 (P.L. 107-71),
- Maritime Transportation Security Act of 2002 (P.L. 107-295),
- Security and Accountability For Every Port Act of 2006 (P.L. 109-347),
- Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (P.L. 109-59),
- Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176),
- Intelligence Reform and Terrorism Prevention Act of 2004 (P.L. 108-408), and
- 9/11 Commission Act of 2007 (P.L. 110-53).

The National Strategy for Homeland Security and these laws provide direction to the Federal Government to protect homeland security, placing special emphasis on deterrence, prevention, interdiction of threats, aggression, and unlawful acts directed toward the United States. The Homeland Security Presidential Directive-11 (HSPD-11), issued August 27, 2004, directed the Department of Homeland Security (DHS), in coordination with other Federal agencies, to “enhance terrorist-related threat assessment through comprehensive, coordinated procedures”.

The objective of HSPD-11 is to more effectively detect and interdict individuals known to engage in terrorist activities or those who are reasonably suspected to be doing so, or who have been engaged in terrorist activities. To that end, the broad range of existing government and private sector security measures and initiatives will be augmented by a comprehensive, coordinated and integrated threat assessment environment. Implementation of HSPD-11 must facilitate the efficient movement of people, cargo and conveyances and minimize any negative impacts on related activities. The Presidential Directive requires that these goals be achieved without compromising personal or institutional privacy and with due respect for other rights and freedoms quintessential to the American way of life.

TSA supports this directive by consolidating the management of all vetting and credentialing programs within the Office of Transportation Threat Assessment and Credentialing (TTAC). TTAC manages

several screening programs to include: Secure Flight, Aviation Workers, Flight Crew Vetting, DCA General Aviation, Indirect Air Carriers, Certified Cargo Shippers, Large Aircraft Operators, Transportation Worker Identification Credential (TWIC), Hazardous Materials Endorsement Threat Assessment Program (HTAP) and Alien Flight Student Program (AFSP).

All programs that comprise this appropriation are designed to enhance security for many components of the transportation sector (air, land, sea); and much of the risk-analysis being performed is scalable for use in other sectors of this dynamic network.

As transportation risks change, TSA's vetting programs evolve and transform to more efficiently and effectively screen individuals to mitigate risk and prevent terrorist actions on the transportation systems. On a weekly basis, TTAC pre-screens an average of 14 million air passengers, vets approximately 840,000 new records and adjudicates 9,000 regulated credential requests by reviewing and assessing intelligence, criminal, and immigration security threat assessment results. Additionally, TTAC perpetually vets over 14 million records per day and responds to over 1,000 redress requests a week.

## **B. Budget Activities:**

### Secure Flight

Under the Secure Flight Final Rule (**Federal Register**, Vol. 73, No. 209), the Secure Flight program assumes responsibility of airline passenger watch list matching from the airline industry into one program managed and operated by the Federal government. This consolidation meets the provisions outlined in the Intelligence Reform and Terrorism Prevention Act of 2004 (P.L. 108-458) and the recommendations of the 9/11 Commission. For the purpose of preventing terrorists from boarding an aircraft or accessing the sterile area of a U.S. airport, the Secure Flight program uses an automated process to match Secure Flight Passenger Data against records contained in portions of the Terrorist Screening Database (TSDB). Secure Flight began program implementation with the first domestic aircraft operator on January 27, 2009. On June 22, 2010, Secure Flight met its goal of conducting watch list matching for all domestic aircraft operator flights within, into and out of the United States, as well as international point-to-point flights between two foreign cities. On November 23, 2010, Secure Flight completed deployment to all covered foreign air carriers flying into and out of the United States. Secure Flight pre-screens more than 2 million passenger enplanements daily.

### Other Vetting

This activity incorporates personnel and operational costs of vetting operations that are not a part of any of the programs described above, as well as TTAC administrative costs and TSA's efforts to modernize its vetting infrastructure. Other Vetting initiatives include:

- Crew Vetting Program for crewmembers flying into, over, and out of the United States;
- Aviation Workers Program;
- Other Aviation Vetting Programs, including DCA Access Standard Security Program (DASSP), Private Charter Standard Security Program (PCSSP), 12/5 Standard Security Program (12/5), Maryland Three Program and Airspace Waivers;
- FAA/Airmen Certificate Vetting, and
- TTAC Infrastructure Modernization (TIM) will provide a single, uniform vetting system.

### Transportation Worker Identification Credential

The TWIC allows identity verification through the use of biometric technology and is capable of working as an integral part of access control systems deployed by the maritime transportation sector. The TWIC Final Rule was issued on January 25, 2007. The enrollment of workers, including longshoremen, truckers, port employees, and U.S. merchant mariners began in October 2007. As of December 2011, TSA had enrolled more than 2 million workers. Funds for the program come entirely from fee revenue.

The TWIC reader pilot, mandated by the SAFE Port Act of 2006, concluded on May 31, 2011. Upon completion of Departmental review, the Secretary will deliver the final reader pilot report to Congress. The pilot included several extensive laboratory reader tests including an evaluation of the ability of readers to withstand the harsh environment of many maritime facilities. Field tests were conducted at ports, individual facilities and vessel operations to assess reader function and to determine the impact on business and operations of using readers for biometric verification of identity using the TWIC. The U.S. Coast Guard, which will sponsor the anticipated TWIC reader rule, participated with TSA in the pilot.

### Hazardous Materials Endorsement Threat Assessment Program (HTAP)

The USA PATRIOT Act prohibits states from issuing a license to transport hazardous materials (hazmat) in commerce unless a determination has been made that the individual does not pose a security risk (49 U.S.C. § 5103a). The Act further requires that this risk assessment include checks of criminal history records, legal status, and relevant intelligence databases. TSA implemented the HTAP to meet this mandate and conducts a security threat assessment (STA) on anyone applying to obtain, renew or transfer a Hazardous Materials Endorsement (HME) on their state-issued Commercial Drivers License (CDL). The TSA security threat assessment includes a fingerprint-based Criminal History Records Check (CHRC), a legal status check, and checks for ties to terrorism. The program also fulfills statutory requirements under the Safe Explosives Act (P.L. 107-296) regarding transportation security issues of persons engaged in any aspect of the safe transportation of explosive materials. Operational since January 31, 2005, the program has enrolled more than 1.9 million drivers and is entirely funded by fee revenue.

### Other Vetting Fees

This category incorporates new and existing fees that were shifted from the Aviation Security and Transportation Security Support appropriations to the TTAC appropriation. These fee programs provide revenue to fund STAs and program/system functionality. These initiatives include:

- General Aviation at Ronald Reagan National Airport (previously in Aviation Security).
- Air Cargo (includes Indirect Air Cargo and Certified Cargo Screening Program, which were previously separate PPAs).
- Commercial Aviation and Airport Fee (previously Secure Identification Display Area and Sterile Area Workers), Federal Bureau of Investigation (FBI) CHRC only.
- Other Security Threat Assessments to include PCSSP; 12/5; Maryland Three Program (FBI CHRCs only); Large Aircraft Security Program (LASP); and Sensitive Security Information (SSI). LASP and SSI were previously separate PPAs.

### Alien Flight Student Program

Established under the Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176), AFSP reviews and assesses biographic and biometric information of non-U.S. citizens or any other individual (specified by the Secretary of Homeland Security) applying for training in the operation of any aircraft (having a maximum certificated takeoff weight of more than 12,500 pounds) at both domestic and international Federal Aviation Administration certified flight schools. These persons are subject to an STA consisting of a CHRC through the FBI, a TECS (DHS) check through U.S. Customs and Border Patrol (CBP) for immigration status, and a TSDB check. Since its transfer to TSA from the FBI in July 2004, this program was expanded to conduct background checks of non-U.S citizens seeking flight training in aircraft weighing under 12,500. The program has processed more than 316,000 training applications.

### C. Budget Request Summary:

For FY 2013, the Transportation Security Administration requests a total budget authority for the Transportation Threat and Credentialing mandatory and discretionary appropriations of 490 positions, 464 FTE and \$272,351,000. This request consists of 435 positions, 412 FTE, and \$192,631,000 in appropriated funding; and 49 positions, 46 FTE, and \$74,720,000 in discretionary fee collections. Also included in this appropriation are 6 positions, 6 FTE and \$5,000,000 in mandatory fee collections. The total adjustments-to-base include a decrease of 24 positions, 23 FTE and \$14,040,000 in appropriated funding; an increase of 2 FTP and \$38,400,000 in fee estimates; and \$1,000,000 increase in mandatory fee estimates.

Total Change 2012 to 2013	(24)	(23)	14,660

TSA requests \$107.1 million for this activity. The adjustments-to-base include an increase of \$10.1 million for pay increases and a realignment for funding Risk Based Screening (RBS), and a \$5.6 million decrease for transfers to the Office of Intelligence and program non-recurs, and \$2.6 million in management efficiencies from administrative/professional support, supplies, materials, operations, maintenance of equipment, and other expenses. TSA requests a program increase of \$12.7 million to expand the Large Aircraft & Private Charter Screening Program.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Secure Flight's mission is to strengthen the security of commercial air travel into, out of, within, and over the United States through the use of improved and expanded watch list matching using risk-based security measures. The program's goals are to:

- Prevent individuals on the No Fly List from boarding an aircraft;
- Identify individuals on the Selectee List for enhanced screening;
- Support TSA's RBS mission by identifying high-risk passengers for appropriate security measures/actions and identifying low-risk passengers for expedited screening;
- Minimize misidentification of individuals as potential threats to aviation security; and
- Protect passengers' personal information from unauthorized use and disclosure.

Secure Flight improved the watch list matching process to more accurately identify known and suspected terrorists. As a result, these individuals receive enhanced screening and/or are prohibited from boarding an aircraft. By more accurately identifying known and suspected terrorists, the program

reduces the number of misidentifications in the matching process. The DHS Traveler Redress Inquiry Program is integrated with Secure Flight, providing a more consistent redress process for passengers who believe that they have been misidentified as a threat. To avoid misidentification on future flights, misidentified passengers use their DHS Redress Number when making an airline reservation. Further, the Secure Flight program expedites law enforcement notification and allows advance planning of operational responses by conducting watch list matching as early as 72 hours prior to flight departure time. Over 99 percent of passengers are consistently cleared automatically and immediately by the Secure Flight system.

Covered aircraft operators must collect and transmit full Secure Flight Passenger Data (SFPD) for watch list matching, including the passengers' full name, date of birth, and gender as they appear on the government-issued identification they plan to use when traveling, and Redress Number (if available). The Secure Flight program matches passenger information to components of the Terrorist Screening Database (TSDB), including the No Fly and Selectee List, maintained by the Terrorist Screening Center (TSC). Secure Flight also includes a matching function for the Centers for Disease Control and Prevention's Do Not Board List, which contains a list of individuals who pose a significant health risk to other travelers.

On November 23, 2010, more than a month ahead of schedule, Secure Flight completed deployment to all covered domestic and foreign aircraft operators flying within, into, and out of the United States. A pilot program was completed in 2011 for watch list matching of passengers aboard over-flights, which are all flights transiting over U.S. airspace, but do not take-off or land in the United States. Full implementation for all covered foreign air carriers is scheduled for 2012.

Secure Flight is currently participating in the RBS pilot. RBS provides an intelligence-driven, risk-based approach to passenger screening. This approach has the potential to improve security and the passenger experience. Eligible passengers voluntarily provide additional information prior to traveling, which allows TSA to conduct more robust passenger pre-screening and better segment the passenger population according to risk. Advanced passenger information and pre-screening may allow physical screening to be expedited for many passengers. Secure Flight will conduct watch list matching and analyze passenger risk using the additional information provided. Passenger risk level will determine the level of physical security required at the airport. The pilot results are being used to assist in the full scale RBS operations. In FY 2012, Congress appropriated \$10 million to TSA to implement RBS during FY 2012. These funds are being recurred in FY 2013 with the expectation that investments in RBS-related programs will result in net savings to TSA programs that will be realized and applied as adjustments-to-base in future fiscal years (estimated FY 2014).

In FY 2013, TSA requests funding for Secure Flight to vet passengers prior to boarding large general aviation aircraft. The Intelligence Reform and Terrorism Prevention Act of 2004 (IRTPA) mandates that TSA make watch list matching available to twelve-five, private charter, and lesser aircraft operators flying into, out of, or within the United States. TSA is promulgating a rule for general aviation large aircraft that will include provisions for this watch list matching as well as general aviation operators over 30,000 pounds. Under the rule, general aviation operators 12,500 pounds or greater, which transport people or cargo for compensation/hire will submit passenger information to Secure Flight for watch list matching. Additionally, Secure Flight will conduct watch list matching for unknown passengers on general aviation operators over 30,000 pounds that do not transport people or

cargo for compensation/hire. Collectively, these additional populations represent approximately 2,000 general aviation operators. As a result, an estimated 11 million additional SFPD sets will be submitted by these operators per year. The FY 2013 funding request will provide the necessary resources to address the modifications to the Secure Flight system, processes and procedures to support vetting these populations.

In FY 2013, the Secure Flight PPA will be reduced by \$2.6 million due to savings from the purchase of supplies/materials, and operations and maintenance of equipment, as well savings in administrative/professional support contracts. Over \$1 million will be saved through efficiencies across the DHS Enterprise in areas such as TDY and overtime.

The following table provides a further breakout of the Administrative Savings for this initiative:

Management Efficiencies - (\$2.602 Million)  
(dollars in thousands)

<u>Item</u>	Sub-Total	Total
Enterprise-Wide Efficiencies		(\$ 1,081)
General TDY	(\$ 12)	
Overtime	(\$ 1)	
Conferences	(\$ 12)	
OFPP Directed Purchasing Savings	(\$ 1,056)	
Admin/Professional Support Contract Efficiencies		(\$ 111)
Other Management Adjustments		(\$ 1,410)

**Department of Homeland Security

<b>2013 Total Requested Budget Authority</b>	<b>127</b>	<b>121</b>	<b>85,557</b>
Total Change 2012 to 2013	-	-	14,017

TSA requests \$85.5 million for this activity. The adjustments-to-base include an increase of \$68,000 for Pay COLA, a decrease of \$10 million for a one-time realignment to Risk-Based Screening, and \$6.0 million for management efficiencies in administrative/professional support, supplies, materials, operations, maintenance of equipment, and other expenses. TSA requests a program increase of \$30 million for the TTAC Infrastructure Modernization program.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

This PPA will provide funding for the administrative and operational needs of the following activities:

	<b>FY 2012</b>	<b>FY 2013</b>
Aviation Workers	\$5.5	\$4.9
Crew Vetting Program	4.1	3.5
Other Aviation Vetting Programs	0.4	0.3
Admin and Operations	23.7	19.1
TTAC Infrastructure Modernization	27.8	57.7
<b>Total*</b>	<b>\$61.5</b>	<b>\$85.5</b>

\*For comparison purposes, the FY 2012 amount does not include the RBS funding of \$10 million, which is being realigned to Secure Flight in FY 2013.

The numerous small vetting programs included in the Other Vetting PPA are in operations and maintenance mode and will continue to vet the various populations each fiscal year.

Since inception of each of these programs, over 104 million names have been vetted:

Total Names Vetted Since Program Inception	
Program	Population Vet
12/5 Standard Security Program	44,322
Airspace waivers	608,192
Crew Vetting*	82,456,405
DCA Access Program	58,863
Maryland Three	2,029
Private Charter	1,237
Aviation Workers & SIDA Badges	6,786,357
Total	89,957,405

\*Air crews are vetted prior to each flight. Also please note the Crew Vetting Program (CVP) total has been adjusted (downward) based upon re-evaluations, which showed the CVP population figures from the initial fiscal years were not statistically reliable, and have therefore been removed from this total.

**Aviation Workers (AW) Program (including SIDA and other badge holders) (\$4.9M):** The AW Program includes those individuals who apply for, or are issued personnel identification media at U.S. federalized domestic airports. Prior to receiving any identification media, aviation workers must undergo a successful name-based Security Threat Assessment (STA), and if applicable, a fingerprint-based Federal Bureau of Investigations (FBI) Criminal History Records Check (CHRC). The Aviation Channeling Service Provider (ACSP) Request for Proposal was released in November 2010, which offers airport stakeholders a choice in selecting an aviation worker enrollment provider. Implementation of ACSP also provides TSA a system of record capability for these aviation related applicants. The program reviews approximately 450,000 aviation workers annually.

**Crew Vetting Program (CVP) (\$3.5M):** CVP screens flight crewmembers on flights into, out of or over the continental United States prior to an airport's release of an aircraft for takeoff. Flight crewmembers undergo a name-based STA to determine if they have a terrorist nexus and, if so, TSA would notify the air carrier that the individual cannot have access to United States airspace. The program reviews approximately 1.8 million flight crewmembers annually.

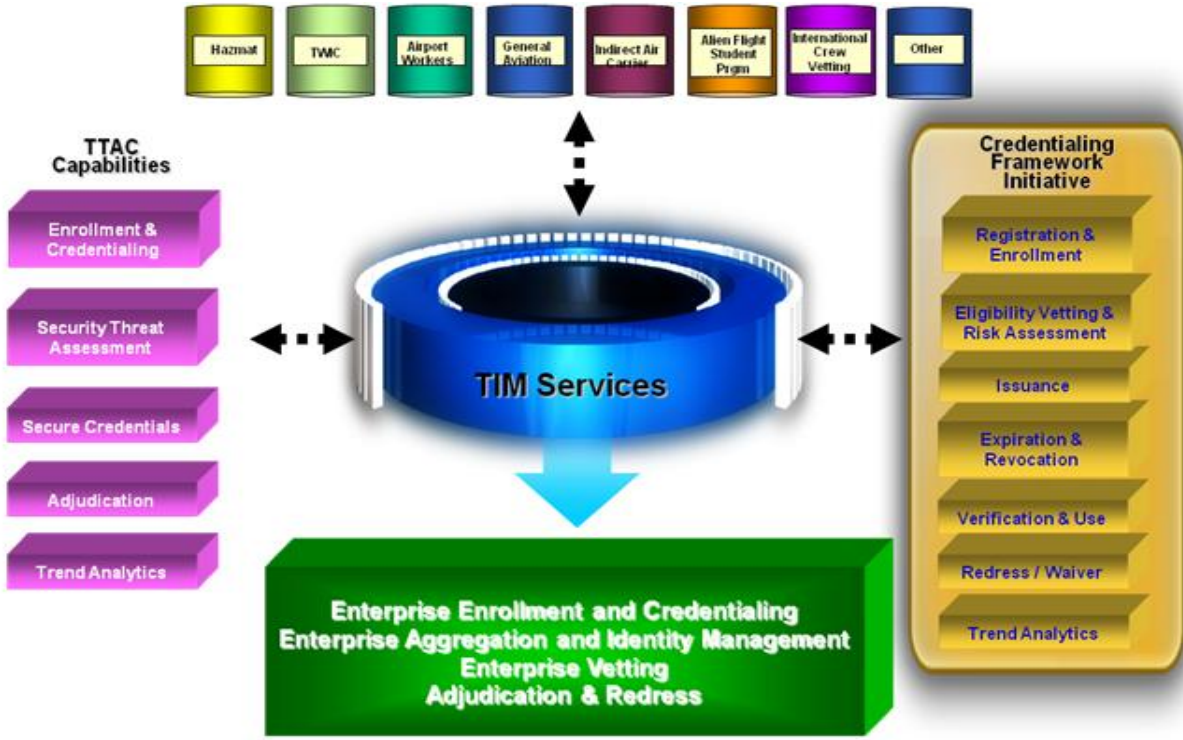

**Other Aviation Vetting Programs (\$0.3M):** Other Aviation Vetting Programs includes DCA Access Standard Security Program (DASSP); Private Charter Standard Security Program (PCSSP); 12/5; Maryland Three Airports Program, and Airspace Waivers Program. These programs all require a name-based STA. Some also require a fingerprint based CHRC. Since inception, TTAC has vetted approximately 631,000 records for the Other Aviation Vetting Programs.

**Administration and Operations (A&O) (\$19.1M):** This account includes the general administrative expenses for TTAC to include the common biometric identity initiative (formerly under the Aviation Credential Interoperability Solution sub-group). It also includes all payroll costs for administrative staff and the programs that fall under Other Vetting (the Infrastructure Modernization payroll costs are included within the TIM managing unit).

**TTAC Infrastructure Modernization (TIM) (\$57.7M):** The modernization initiative in concert with a universal fee, expected to be published in 2014, addresses and eliminates subsequent IT investments, redundant business practices and processes to achieve significant economies of scale and other benefits associated with a unifying business integration effort. The savings of moving from the current vetting infrastructure to TIM will offset the cost of the initial investment in less than 5 years after full operating capability (FOC). This does not take into account that once fully implemented, TIM will be primarily funded through user fees (up to 80%), which would increase the savings to the federal government, and offset the cost of the initial investment sooner. TIM will also allow TSA to collect additional fees by vetting populations the current systems cannot handle.

As the diagram below shows, once fully developed, TIM will:

- Combine functions and processes into a single, uniform, person centric approach with common security requirements, methods, and information; and
- Enable policy, business, systems and data integration and drive the development of person-centric information architecture in accordance with the DHS Credentialing Framework Initiative.

In turn, this will:

- Reduce the cost, risk, and time associated with implementing new business capabilities and new populations, while improving the robust nature of the architecture and on-going operations and maintenance services; and
- Eliminate redundant background checks (allowing interoperability) by working in tandem with TSA's Universal Rule initiative.

TIM will also provide the following new mission capabilities that will be available to support emerging vetting and credentialing population requirements:

- **Partner Portal Services**- a web portal for applicants to provide the required bio-graphic and bio-metric information in order to directly process enrollment requests and share status information;
- **3rd Party/External System Interface Management Services** – a system-to-system interface with the US-VISIT Automated Biometric Fingerprint Identification System (IDENT);
- **Integrated Customer Relationship Management Services** – enables improved security threat assessment workflow and more responsive customer service;
- **Enterprise Service Management** – supports the transformation of the new and legacy system components, reusing existing infrastructure elements to the extent possible, to establish enterprise level services. TTAC will standardize the system(s) across screening and credentialing programs into a single, holistic set of Service Oriented Architecture (SOA) based capabilities to meet current mission demands and to expand future mission needs; and
- **Enterprise Performance Reporting Management Service** – provides monitoring and performance management capability to support end-to-end applicant processing.

An Analysis of Alternatives (AoA) was completed in March 2011 to consider various approaches for building the system. TSA selected the most viable option and updated the life cycle cost estimates (LCCE) to reflect lower cost estimates and 10 years of cost beyond FOC, which is scheduled for 4th Quarter FY 2015; the previous LCCE only went two years beyond FOC. TIM is considered a significant DHS IT program with a forecast LCCE of \$633 million through 2025 to be funded through appropriations and fees. Approval was received by the DHS Acquisition Review Board to begin the TIM design and development contract, which is anticipated for award in February 2012 with the first Task Order to achieve Initial Operating Capability (IOC) within a 24 month period of performance (2nd quarter FY 2014). The Maritime population, served via the TWIC program, will migrate to TIM first. Additional populations will migrate to TIM within 24 months after IOC and the program will achieve FOC in the 4th Qtr FY 2015.

In concurrence with this modernization effort, TSA is working toward the implementation of a common universal fee structure that will capitalize on the capabilities of an improved vetting infrastructure. The new Universal Rule framework will establish comparable security threat assessment services for vetting activities with a common fee structure. This rulemaking effort requires the modernized capabilities of TIM to be 100 percent functional or the rule's effective date will be delayed. While the modernized platform could be utilized to process threat assessments for some regulated populations prior to the rule's effective date, those previously established vetting programs would have to continue utilizing the existing fee structures outlined in original rulemakings. Further, a

delay in completing TIM will result in a corresponding delay of security vetting for newly regulated populations, such as freight rail and mass transit populations.

The Universal Rule is anticipated to be published in the Federal Register in the first quarter FY 2014. It is anticipated that new fees will be collected for the maritime population at IOC. Program transition to the Universal Rule will begin incrementally at the beginning of FY 2014 and will continue through FY 2014. TSA will begin phasing in programs in the following order: 1) programs funded through appropriations, 2) programs funded through existing fees, and 3) programs that will require STAs on newly regulated populations. However, the capability to collect fees in support of all maritime, surface, and aviation populations would be at FOC. The fee will vary across populations depending on security threat assessment requirements.

TSA's vetting modernization is being coordinated with the Department's other ongoing information technology modernization efforts and will interact with numerous other systems such as: Treasury Enforcement Communication System, U.S. Citizens and Immigration's Systematic Alien Verification for Entitlements, U.S. VISIT's Automated Biometric Fingerprint Identification System, and the FBI's Criminal Justice Information System.

In FY 2013, the Other Vetting PPA will be reduced by \$6.0 million due to savings from the purchase of supplies and materials, operations and maintenance of equipment, as well as savings in administration/professional support contracts. Over \$4 million will be saved through efficiencies across the DHS enterprise in areas such as TDY, overtime, conferences and OFPP Purchasing savings.

The following table provides a further breakout of the Administrative Savings for this initiative:

Management Efficiencies - (\$6.051 Million)  
(dollars in thousands)

<u>Item</u>	Sub-Total	Total
Enterprise-Wide Efficiencies		(\$ 4,125)
General TDY	(\$ 13)	
Overtime	(\$ 1)	
Conferences	(\$ 3)	
OFPP Directed Purchasing Savings	(\$ 4,108)	
Admin/Professional Support Contract Efficiencies		(\$ 432)
Management Adjustments		(\$ 1,494)

**Department of Homeland Security

Transportation Threat Assessment & Credentialing:  
Transportation Worker Identification Credential (TWIC) - Fee  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: Transportation Worker Identification Credential (TWIC) – Fee**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	<b>21</b>	<b>23</b>	<b>30,748</b>
<b>2012 Enacted Budget Authority</b>	<b>21</b>	<b>21</b>	<b>8,300</b>
2013 Adjustments-to-Base	-	-	39,000
<b>2013 Current Services</b>	<b>21</b>	<b>21</b>	<b>47,300</b>
<b>2013 Total Requested Budget Authority</b>	<b>21</b>	<b>21</b>	<b>47,300</b>
Total Change 2012 to 2013	-	-	39,000

The Transportation Security Administration estimates fee collections of \$47.3 million for the TWIC Program. The adjustment-to-base increase of \$39 million is due to the high turnover rate in the maritime industry. Initially, fee estimates were based on an enrollment surge year followed by a decline in enrollments in subsequent years. This model has been revised to more accurately reflect employment within the maritime industry.

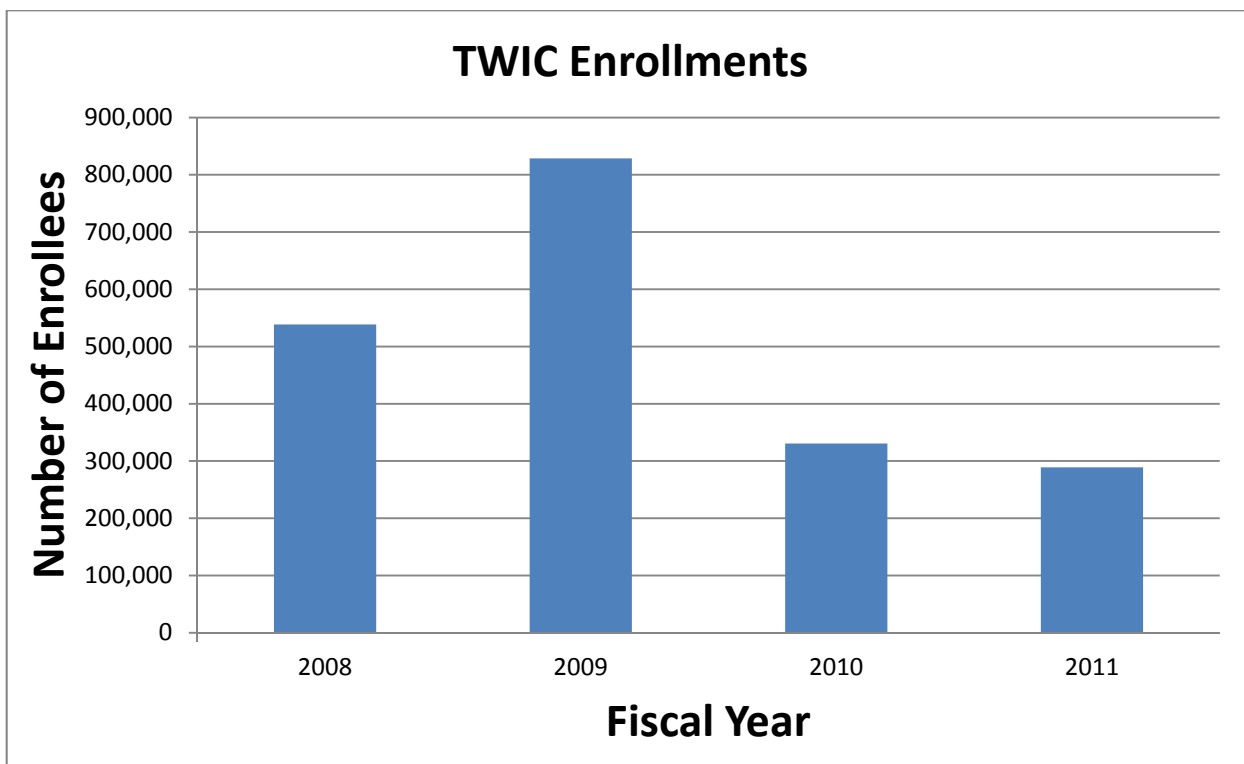

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The TWIC program enhances security by providing a tamper-resistant biometric credential to maritime workers requiring unescorted access to secure areas of port facilities and vessels regulated under the Maritime Transportation Security Act of 2002 (MTSA). The program provides a common, consistent biometric credential at over 2,900 facilities and on over 14,000 vessels. When fully implemented after the promulgation of the TWIC reader rule by the U.S. Coast Guard (USCG), the program will require biometric verification of identity by facility and vessel operators as required by the rule. Prior to issuing a TWIC the program ensures the identity of each TWIC holder has been verified; a satisfactory security background check has been completed on that identity; and each credential issued is positively linked to the rightful holder through the use of biometric technology.

TWIC’s personal identity verification standards and credential issuance closely align with those of Homeland Security Presidential Directive - 12 and its implementing standard, Federal Information Processing Standard 201-1. The program specifically follows biometric standards of the American National Standards Institute for its pattern-based fingerprint format operational biometric, and was the first to adopt common biometric standards in the Federal Government. TSA continues to work with the National Institute of Standards and Technology to ensure compliance with appropriate national standards and to develop technology specifications to support the overall program. In addition, TSA

and USCG continue to work closely with the maritime, smart card, and reader industries and the TWIC Stakeholder Communications Committee.

The TWIC Program has established applicant fees to sufficiently recover the cost of providing this security service. The standard TWIC Fee is \$132.50 per applicant. A reduced TWIC fee of \$105.25 has also been established for those applicants that previously completed a comparable security threat assessment (STA). The card replacement fee is \$60.00. Beginning in FY 2012, TWIC holders applying for a Hazardous Materials Endorsement (HME) may receive their endorsement at a reduced fee in states that have elected to offer HME-TWIC security threat assessment comparability. The credential is valid for five years and revenue generated from these security fees will only be used to support the TWIC program. The final rule includes the ability to provide a discount for Free and Secure Trade (FAST) card holders, documented merchant mariners, and truckers with HMEs. The chart below shows enrollment activity since the start of the TWIC program. The increase in applicants every five years is attributed to the five-year TWIC renewal cycle; however, that pattern should flatten as a result of the normal turnover of workers in the maritime industry. In FY 2011, TSA processed 288,778 TWIC applicants.

TWIC has enrolled over 2.0 million workers as of December 2011. The TWIC program will be transitioning from its existing enrollment contract, which only provides TWIC services, to a universal enrollment contract, which will eventually expand to include both TWIC and HME enrollment services. In FY 2012, TSA plans to increase enrollment centers by 50 percent.

In FY 2008, Congress provided \$8.1 million in two-year appropriated funding for TSA to implement an access control technology pilot to test biometric technologies within the TWIC program. Of the \$8.1 million appropriation, \$2 million was obligated to support the program's administrative efforts for the pilot and \$6.1 million was obligated for work and test equipment at facilities and vessels participating in the test. The pilot concluded on May 31, 2011 having conducted various laboratory tests of readers and field tests at ports, facilities and vessel operations in the following locations: New York/New Jersey; Annapolis, MD; New Orleans, LA; Vicksburg, MS; Brownsville, TX; and, Los Angeles and Long Beach, CA. The final report for Congress is currently under review.

Prior to promulgating the TWIC reader rule, to fully leverage the security benefit of the TWIC, the USCG has authorized the use of TWIC readers in place of the current requirement to visually inspect the card prior to allowing access to secure areas. Additionally, the USCG is currently verifying compliance with the TWIC requirements through electronic validation during vessel and facility compliance exams and/or security spot checks. Through the use of approximately 250 handheld readers for TWIC verification, the USCG is maximizing the use of the security features of the credential.

In FY 2013, the TIM program will begin building the framework to transition TWIC to the TTAC Modernization system.

**Department of Homeland Security

Total Change 2012 to 2013	-	-	-

The Transportation Security Administration estimates fee collection of \$12.0 million in the Hazardous Materials Endorsement Threat Assessment Program (HTAP).

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The HTAP was established to fulfill the statutory requirements of both the USA PATRIOT (P.L. 107-56) and Safe Explosives Acts (P.L. 107-296) to further protect against the threats to transportation posed by terrorists, dangerous criminals, and illegal aliens that may attempt to transport hazardous materials in commerce.

The program is funded through fee revenue that consists of three elements: 1) the cost for collecting and processing fingerprint and application information; 2) the fee the Federal Bureau of Investigation (FBI) charges to run the fingerprints against the criminal history records; and 3) a Transportation Security Administration (TSA) program fee to cover costs to administer the program, including conducting the Security Threat Assessments (STAs). Payment of the Federal fee is a requirement to undergo the TSA STA.

States must forward biographic and biometric (fingerprint) information to TSA in an approved and established format to facilitate the STA process. Currently, 12 states collect the required biographic information and biometric data through their individually established and maintained programs while 38 states and the District of Columbia have elected to utilize the TSA-contracted agent. Additionally, drivers registered in a state serviced by the TSA Agent may be fingerprinted in any other state serviced by the TSA Agent.

The HTAP has a robust redress process, including appeals, waivers, and Administrative Law Judge review. The program conducted threat assessments on 293,000 applicants during FY 2011, a

continued increase from the program's inception that confirms the vital role of improving the safety and protection of passengers and freight traveling on our Nation's highways. TTAC has processed over 1.9 million applications since January 2005.

The Transportation Security Administration (TSA) requests \$100,000 in fee collection authority to support General Aviation security threat assessment (STA) vetting and program management activities.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

This offsetting collection supports General Aviation flights into Ronald Reagan National Airport (DCA) as provided by the Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176). The DCA Access Standard Security Program (DASSP) conducts name-based STAs for all flight crewmembers and passengers including security coordinators and armed security officers on non-commercial aircraft (non-cargo) flying into or out of DCA from one of the 28 domestic gateway airports. TSA levies a \$15 fee for each person onboard the flight, a \$490 fee for training of armed security officers, and a \$296 fee per roundtrip is charged to flight operators for the screening personnel and equipment used to support such flights at DCA. This fee is used to cover costs for Transportation Security Network Management (TSNM), Federal Air Marshals, as well as the STA. TTAC vetted over 10,200 General Aviation - DCA passenger and crew in FY 2011 and has vetted over 47,100 General Aviation – DCA passengers and crew in the DCA Access Standard Security Program (DASSP) since inception in October 2005.

Transportation Security Administration (TSA) requests \$7.2 million in fee collection authority to support the Air Cargo (AC) program. In FY 2013, the AC program includes Indirect Air Cargo (IAC) and Certified Cargo Screening Program (CCSP). In prior years, IAC and CCSP were separate PPAs.

(dollars in thousands)

<b>Air Cargo Programs</b>	<b>FY 2012</b>			<b>FY 2013</b>		
	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
Indirect Air Cargo	3	2	1,400	0	0	0
Certified Cargo Screening Program	6	6	5,200	0	0	0

<b>Total</b>	<b>9</b>	<b>8</b>	<b>6,600</b>	<b>11</b>	<b>8</b>	<b>7,200</b>

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The AC program provides for fee collections supporting security threat assessments (STA) of air cargo workers in the air cargo supply chain, including individuals authorized to screen cargo at designated cargo screening facilities. In FY 2013, TSA will charge a \$41 per assessment fee to offset costs for conducting the STA and program management costs. The new fee structure is based on revised cost and population estimates analysis conducted in support of the Air Cargo Screening Final Rule, which

was published in August 2011. The final fee structure will be published during FY 2012. Currently, this program is funded through the Aviation Security Appropriation and there are no STA fees for applicants. Once the Air Cargo final fee is published, the program will be entirely funded through fees.

The total FY 2013 fee collections are estimated to be \$7.2 million, \$5 million through IAC screening and \$2.2 million from CCSP. In FY 2011, 91,483 new IAC applicants and 10,082 new CCSP applicants were processed. Since inception, TTAC has vetted over 443,959 IAC applicants and 33,314 CCSP applicants. The FY 2013 collection estimate is based on 174,962 applicants at a fee of \$41.

The Transportation Security Administration requests \$8.0 million in fee collection authority to support the Secure Identification Display Area (SIDA) and Aviation Workers (AW) airport employee checks through the Commercial Aviation and Airport Fee program.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Commercial Aviation and Airport Fee program, previously named the SIDA PPA, includes those individuals who apply for, or are issued, personnel identification media at U.S. domestic airports (e.g., airport facilities workers, retail employees, airline employees, taxi drivers, parking attendants, etc.). Prior to receiving any identification media, AW must undergo a successful name-based security threat assessment (STA). Depending on the access level granted to the airport worker, the individual may also be required to have a fingerprint based Federal Bureau of Investigation Criminal History Record Check (CHRC). This population will eventually be covered under the Universal Rule. Total current badged Aviation Worker population is currently 2.2 million with approximately 450,000 new applicants per year. The FY 2013 estimate is based on 463,700 new applicants at a fee of \$17.25 per applicant.

In FY 2012 the Aviation Channeling Services Provider services will be expanded to provide airports and aircraft operators a choice from among three TSA Designated Aviation Channelers (DACs). Additionally, the program will also process STAs for the general aviation population.

<b>Total</b>	<b>0</b>	<b>0</b>	<b>1,320</b>	<b>0</b>	<b>0</b>	<b>120</b>

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The OSTA fees fund the 12/5, Private Charter Standard Security Program (PCSSP), Maryland-Three (MD-3), Airspace Waivers (ASW), LASP and SSI.

The 12/5 program conducts STAs for flight crewmembers operating (e.g., cockpit crew, airline personnel authorized in the cockpit, cargo carrier employees) aircraft with a maximum certificated takeoff weight of 12,500 pounds or more. Annual population for the 12/5 program is approximately 2,500 applicants. Each program conducts security threat assessments (STAs) for regulated parties.

The PCSSP program is for private charter flight crewmembers operating aircraft with a maximum certificated takeoff weight of 45,000kg (100,309 pounds) or more, or a passenger-seating configuration of 61 or more, or whose passengers are enplaned from or deplaned into a sterile area. PCSSP does not include government charters.

The MD-3 program applies to pilots who operate aircraft and apply for privileges to fly to or from the three General Aviation airports in the Washington, D.C. restricted flight zones (Potomac Airport, Washington Executive/Hyde Field, and College Park Airport).

The ASW program, in conjunction with the Federal Aviation Administration, conducts STAs for domestic and international flight crew members and passengers for access to: certain operational areas of Ronald Reagan Washington National Airport, access to restricted Washington, D.C. flight restricted zones, major sporting events, Disney theme parks, flight training, and special events.

The LASP program will provide for the fee collections to fund STAs for the large aircraft security program. Vetting costs are currently supported by the Transportation Security Network Management General Aviation (GA) appropriation. Fee collection was originally anticipated in FY 2012, however, fee collection will begin after the Notice of Proposed Rulemaking (NPRM) is approved, and with the Universal Rule in FY 2014.

The original LASP NPRM included language to require all U.S. operators of aircraft over 12,500 maximum gross take-off weight (MTOW) to adopt and implement a TSA-approved security program. Subsequent to industry feedback and comments, TSA drafted a Supplemental Notice of Proposed Rulemaking (SNPRM) which is currently under review by Department of Homeland Security. The SNPRM modifies the MTOW threshold from 12,500 pounds to 30,000 pounds. Operators having an MTOW over 30,000 pounds will be required to adopt a TSA approved security program, the GA 30 Security Program, which will be similar to the current process for U.S. air carriers and commercial operators. The SNPRM also proposes that GA operators transporting persons or cargo for compensation/hire in an aircraft with an MTOW over 12,500 pounds adopt a 12/5 Security Program and a Private Charter/Compensation or Hire Security Program, as necessary, which will have specific requirements and checks for each population as determined by TSA. The LASP NPRM is currently under coordination between DHS and TSA, and is anticipated to be released in FY 2012 to begin collecting fees for LASP.

TSA is collecting the SSI fee to fund the STAs and the Federal Bureau of Investigation (FBI) Criminal History Record Checks (CHRC) for those individuals who require access to SSI. TSA conducted over 150,000 STAs for the OSTA population and 3,080 SSI vets in FY 2011. The FY 2013 estimate is based on 5,500 applicants with the FBI CHRC requirement at a fee of \$17.25.

**Department of Homeland Security  
Transportation Security Administration  
Transportation Threat Assessment & Credentialing:  
Alien Flight School - Fee  
Program Performance Justification  
(Dollars in Thousands)**

**PPA: Alien Flight School – Fee**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	<b>6</b>	<b>4</b>	<b>2,750</b>
<b>2012 Enacted Budget Authority</b>	<b>6</b>	<b>6</b>	<b>4,000</b>

Total Change 2012 to 2013	-	-	1,000

The Transportation Security Administration estimates \$5.0 million in fee collection for the Alien Flight Student Program (AFSP).

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Applying for flight training in the United States or abroad at Federal Aviation Administration (FAA) certified flight training locations. Applicants are subject to a security threat assessment (STA) in accordance with Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176). AFSP applicants identified as a “threat to aviation or national security under this program will be denied training.

The program reviews and assesses both biographic and biometric information to identify individuals who pose a security threat. Prior to the September 11, 2001 attacks, there were no systematic security checks performed on non-U.S. citizens applying for FAA certified flight training in the United States or abroad.

Section 612 of the Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176) transferred the function for screening AFSP applicants from the Attorney General to the Secretary of the Department of Homeland Security (and subsequently delegated to the TSA). The Act also gives the Secretary of Homeland Security the authority to establish a fee to offset costs of vetting AFSP applicants.

AFSP currently collects a fee of \$130 per basic applicant. This fee includes \$112.75 for extensive TSA international and domestic threat assessments, and \$17.25 for a Federal Bureau of Investigation (FBI) Criminal History Record Check (CHRC). On May 13, 2009, AFSP also began collecting a fee of \$70 per recurrent applicant. Fees collected for AFSP support the enrollment, vetting and adjudication of flight training applicants and program management support. AFSP applicants, who require training for a new skill set, will also be required to undergo a fingerprint based FBI CHRC. Operational since 2004, AFSP has processed more than 316,000 applications, including over 47,400 flight training fee applications in FY 2011. AFSP is entirely funded by fee revenue.

## IV. Program Justification Changes

**Department of Homeland Security  
Transportation Security Administration  
Transportation Threat Assessment & Credentialing:  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 1:** Expand Secure Flight/Large Aircraft and Charter Screening Program  
PPA: Secure Flight  
Program Increase: Positions 0, FTE 0, Dollars \$12,717

### Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	12,717
<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>12,717</b>

### Description of Item

The total cost of the Large Aircraft & Private Charter Passenger Screening Program request is \$12.7 million.

The 2004 Intelligence Reform and Terrorism Prevention Act (IRTPA) mandates that DHS make advanced passenger prescreening available to charter and lessors of aircraft greater than 12,500 pounds flying into, out of, or within the United States. TSA is promulgating the General Aviation Security Rule supporting these provisions of IRTPA as well as additional regulations for aircraft over 30,000 pounds. The rule is anticipated to be published by February 2013.

The additional Secure Flight watch list matching requirements necessitate increased IT systems capability. The requested funding will allow TSA to purchase the hardware and software necessary to meet the critical Secure Flight system requirements to handle the anticipated 11 million additional passengers per year who will be covered, adding a significant layer to TSA's aviation security operations. Expanding watch list matching to these new populations will mitigate the risk to aviation passenger safety, by enabling TSA to better identify individuals who may present a threat to passenger air travel.

General aviation aircraft over 12,500 pounds, which transport people or cargo for compensation/hire will be required to submit passenger data to Secure Flight for watch list matching. For general aviation

aircraft over 30,000 pounds that transport people or cargo not for compensation/hire, Secure Flight will be required to perform prescreening of passengers that are unknown to a Validated General Aviation Pilot (VGAP). For example, personal or corporate owned aircraft over 30,000 pounds that transport passengers will be subject to these requirements. Under the proposed rule, VGAP will be a voluntary program for general aviation pilots. These pilots will be subject to enhanced security review by TSA, which will allow the pilot to board passengers known to the pilot without watch list matching for those passengers. If the pilot is not a VGAP, Secure Flight will be required to watch list match all passengers.

### **Justification**

Vetting passengers on large general aviation aircraft against the No-fly and Selectee lists adds a significant layer of security to stop terrorists from exploiting the general aviation system.

This funding will also allow TSA to discontinue distributing the Watch List to the general aviation operators, greatly reducing the potential for unauthorized use and distribution.

### **Impact on Performance (Relationship of Increase to Strategic Goals)**

This funding is necessary to meet the IRTPA mandate, implement the General Aviation Security Rulemaking provisions and achieve 100% performance of vetting all air carrier passengers.

**Department of Homeland Security  
Transportation Security Administration  
Transportation Threat Assessment & Credentialing:  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 2:** TTAC Infrastructure Modernization (TIM)  
 PPA: Other Vetting/Screening Administration and Operations  
 Program Increase: Positions 0, FTE 0, Dollars \$30,000

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	27,700
Program Increase							-	-	30,000
<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>57,700</b>

**Description of Item**

The TIM Program requires a base restoration of \$30.0 million in FY 2013. In FY 2012 base funding for the TIM program was reduced as a result of necessary revisions to the TIM development and implementation schedule. With the award of the development contract expected in February 2012, the program will need the \$30.0 million reinstated to the program's base in order to complete the development and implementation of the TIM program. The modernization initiative in concert with a universal fee, expected to be published in 2014, addresses and eliminates subsequent IT investments, redundant business practices and processes to achieve significant economies of scale and other benefits associated with a unifying business integration effort.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

If funding is not received, the TIM program will be delayed, and TSA will have to continue to use the eight individual stove-pipe systems to process enrollment, vetting, adjudication and redress functions. Delaying the TIM program will also delay the use of the Universal Rule, which is being developed to establish comparable security threat assessment service for vetting activities with a common fee structure. The use of the rulemaking effort requires the TIM efforts to be 100 percent functional prior to implementation of the Universal Rule. As a result the savings that would be generated in the TTAC appropriated funding would be delayed, since programs, such as Aviation Workers, would not be able to begin charging user-fees until Universal Rule is established.

## **V. Exhibits and Other Supporting Material**

### **A. Justification of Proposed Legislative Language**

For necessary expenses for the development and implementation of screening programs of the Office of Transportation Threat Assessment and Credentialing, [\$163,954,000] *\$192,631,000*, to remain available until September 30, [2013] *2014*. ### Secure Flight Mission Statement

The mission of the Secure Flight Program is to significantly improve the Federal Government's ability to prevent terrorists from boarding aircraft, help move passengers through airport screening more quickly, and reduce the number of individuals selected for secondary screening, while fully protecting passengers' privacy and civil liberties.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	14,135	30,853	28,986	(1,867)
11.3 Other than full-time permanent	2	-	-	-
11.5 Other personnel compensation	512	525	500	(25)
11.6 Pay Diff (Sun/Night)	71	75	-	(75)
11.7 Military personnel/Awards	147	300	-	(300)
12.1 Benefits	3,980	7,946	7,800	(146)
<b>Total, Salaries &amp; Benefits</b>	<b>18,847</b>	<b>39,699</b>	<b>37,286</b>	<b>(2,413)</b>

The FY 2013 request provides for the personnel realignment to the Office of Intelligence PPA in the Support Appropriation.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>21.0 Travel</b>	<b>\$181</b>	<b>\$175</b>	<b>\$200</b>	<b>\$25</b>

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>23.2 Other rent</b>	<b>\$3,689</b>	<b>\$4,000</b>	<b>\$4,500</b>	<b>\$500</b>

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>23.3 Communications, utilities, and misc. charges</b>	<b>\$102</b>	<b>\$500</b>	<b>\$800</b>	<b>\$300</b>

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, and utility services. TSA is dependent upon communications lines and utilities to run the Secure Flight platform.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.1 Advisory and assistance services</b>	<b>\$29,502</b>	<b>\$29,500</b>	<b>\$28,086</b>	<b>-\$1,414</b>

Advisory and assistance services include services acquired by contract from non-Federal sources (that are private sector, foreign governments, State and local governments, tribes, etc) as well as from other units within the Federal Government. The FY 2013 request reflects the results of the balanced workforce strategy, Enterprise-Wide efficiencies and administrative/professional support efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.2 Other services	\$19	\$1,895	\$1,500	-\$395

Other services include contractual services with non-Federal sources that are not otherwise classified under object class 25. Contracting services will be the primary vehicle by which the Secure Flight program will be implemented and operated in regard to connectivity with air carriers and the processing of security checks. The FY 2013 request reflects the results of the balanced workforce strategy.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.4 O&M of facilities	\$1,223	\$3,500	\$4,000	\$500

Provides for the operation and maintenance of information technology systems used to support the Secure Flight program.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.7 Operation and maintenance of equipment	\$7	\$1,000	\$3,958	\$2,958

Provides for the operation and maintenance of equipment used to support the Secure Flight program. The FY 2013 request reflects Risk Based Screening and the implementation of the Large Aircraft & Private Charter Passenger Screening Program.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
26.0 Supplies and materials	\$75	\$200	\$225	\$25

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
31.0 Equipment	\$45,890	\$11,940	\$26,514	\$14,574

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. These costs include equipment that will be purchased for the Secure Flight program outside of contracts for rollout and sustainment of the program. The FY 2013 request reflects Risk Based Security and the implementation of the Large Aircraft & Private Charter Passenger Screening Program.

**Other Vetting Programs Mission Statement**

The mission of Other Vetting is to help support the identification of individuals deemed as potential terrorists or who pose a security threat to either aviation or national security.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	12,952	13,219	13,270	51
11.3 Other than full-time permanent	214	-	-	-
11.5 Other personnel compensation	63	665	670	5
11.6 Pay Diff (Sun/Night)	98	-	-	-
11.7 Military personnel/Awards	237	225	225	-
12.1 Benefits	3,481	3,948	3,959	11
<b>Total, Salaries &amp; Benefits</b>	<b>17,045</b>	<b>18,057</b>	<b>18,124</b>	<b>67</b>

The FY 2012 request reflects the Salary and Benefits for 121 FTE.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>21.0 Travel</b>	<b>\$191</b>	<b>\$235</b>	<b>\$241</b>	<b>\$6</b>

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2013 request includes travel needs for the Other Vetting Programs.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>22.0 Transportation of things</b>	<b>\$11</b>	<b>\$30</b>	<b>\$41</b>	<b>\$11</b>

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incidental to the transportation of things. The FY 2013 request reflects transportation needs for the Other Vetting Program.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.1 Advisory and assistance services</b>	<b>\$1,565</b>	<b>\$10,450</b>	<b>\$10,850</b>	<b>\$400</b>

Advisory and assistance services include services acquired by contract from non-Federal sources (that are private sector, foreign governments, State and local governments, tribes, etc) as well as from other units within the Federal Government. TSA uses these services to provide program management, technical and logistical support as well as evaluations.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.2 Other services</b>	<b>\$32,603</b>	<b>\$28,800</b>	<b>\$42,251</b>	<b>\$13,451</b>

Other services include contractual services with non-Federal sources that are not otherwise classified under object class 25. Contracting services are used extensively in systems operations. These contracts will support TIM, SIDA, 12/5 Charter Pilots, MD-3 Airports and the Temporary Flight Restriction programs. The increase more appropriately aligns the cost of other contractual services for the TIM infrastructure project.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>31.0 Equipment</b>	<b>\$14,067</b>	<b>\$12,448</b>	<b>\$12,530</b>	<b>\$82</b>

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2013 request reflects equipment needs.

11.5 Other personnel compensation	-	28	28	-
11.6 Pay Diff (Sun/Night)	17	-	-	-
11.7 Military personnel/Awards	23	-	-	-

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	2,437	2,207	2,207	-
12.1 Benefits	708	580	580	-
<b>Total, Salaries &amp; Benefits</b>	<b>3,196</b>	<b>2,815</b>	<b>2,815</b>	<b>-</b>

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>21.0 Travel</b>	<b>\$106</b>	<b>\$200</b>	<b>\$250</b>	<b>\$50</b>

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. Travel is necessary to conduct on-site reviews and meetings with maritime port operators and other TWIC program stakeholders. The increase is to more appropriately align the estimates with the actual cost of travel.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.1 Advisory and assistance services</b>	<b>\$1,783</b>	<b>\$700</b>	<b>\$11,434</b>	<b>\$10,734</b>

Advisory and assistance services include services acquired by contract from non-Federal sources (that are private sector, foreign governments, State and local governments, tribes, etc) as well as from other units within the Federal Government. TSA uses these types of contracts to assist in the development and implementation of the TWIC program. The increase is to more appropriately align the estimates with the actual cost of Advisory & Assistance Services, and is also a result of the FY 2012 Base Fee estimates being substantially lower than the revised fee estimates.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.2 Other services</b>	<b>\$7,565</b>	<b>\$1,753</b>	<b>\$9,000</b>	<b>\$7,247</b>

Other services include contractual services with non-Federal sources that are not otherwise classified under object class 25. Contracting services will include the adjudication of cases where individuals are denied a TWIC card. The request reflects the change in contractor staffing needed after the initial surge of enrollments; Government personnel will complete the majority of vetting and adjudication services. The increase is to more appropriately align the estimates with the actual cost of Other Services, and is also a result of the FY 2012 Base Fee estimates being substantially lower than the revised fee estimates.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.3 Purchases from Gov't accts.</b>	<b>\$5,209</b>	<b>0</b>	<b>\$7,900</b>	<b>\$7,900</b>

Includes contracts with federal agencies for background check services including the FBI for fingerprint based checks and/or name based checks for these vetting programs. The increase is to more appropriately align the estimates with the actual cost for government account purchases, and is also a result of the FY 2012 Base Fee estimates being substantially lower than the revised fee estimates.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.7 Operation and maintenance of equipment</b>	<b>\$11,345</b>	<b>\$1,500</b>	<b>\$14,000</b>	<b>\$12,500</b>

Supports the operation and maintenance of information technology systems used for the TWIC program. The FY 2013 request

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
--	-------------------------------	--	--	------------------------------

reflects a better alignment in O&M costs. The increase is to more appropriately align the estimates with the actual cost of Operation and Maintenance of Equipment, and is also a result of the FY 2012 Base Fee estimates being substantially lower than the revised fee estimates.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>26.0 Supplies and materials</b>	\$5	\$81	\$150	\$69

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>31.0 Equipment</b>	\$1,244	\$1,000	\$1,500	\$500

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. These costs include equipment that will be purchased for the TWIC program outside of contracts for implementation and sustainment of the program. The increase is to more appropriately align the estimates with the actual cost of equipment, and is also a result of the FY 2012 Base Fee estimates being substantially lower than the revised fee estimates.

**Alien Flight School - Fee Mission Statement**

The mission of the Alien Flight Student Program is to help identify individuals deemed as potential terrorists or who pose a security threat to either aviation or national security. This program reviews and assesses biographic and biometric information of non-U.S. citizens and other individuals who seek flight training at FAA certified flight schools located both inside and outside the United States.

**Summary Justification and Explanation of Changes**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	395	559	543	(16)
11.5 Other personnel compensation	-	35	35	-
11.6 Pay Diff (Sun/Night)	9	-	-	-
11.7 Military personnel/Awards	-	5	-	(5)
12.1 Benefits	110	155	176	21
<b>Total, Salaries &amp; Benefits</b>	<b>514</b>	<b>754</b>	<b>754</b>	<b>-</b>

The FY 2013 request includes Salary and Benefits for 6 FTE.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
21.0 Travel	\$1	\$5	\$6	\$1

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. Travel is necessary to conduct on-site reviews and meetings with state and local stakeholders in the Alien Flight Student Program.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.2 Other services	\$2,193	\$3,148	\$4,000	\$852

Other services include contractual services with non-Federal sources that are not otherwise classified under object class 25. Contracting services are used extensively in the systems operation and case adjudication of the Alien Flight Student program. The increase is a result of the additional Services required, since \$1M in additional collections is expected in FY 2013.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **Transportation Security Administration Transportation Security Support**

### **I. Appropriation Overview**

#### **A. Mission Statement for Transportation Security Support:**

The Transportation Security Administration (TSA) is an agency of more than 57,000 FTE, with approximately \$7.6 billion in budget authority, regulatory and law enforcement authorities, and a nationwide presence. The management and support of the organization is accomplished by a transportation security support staff in the Washington, D.C. metropolitan area and five Mission Support Centers (MSCs).

#### **B. Budget Activities:**

**Intelligence** - The Office of Intelligence and Analysis (OIA) receives, assesses, and distributes intelligence information to support TSA's mission of securing the transportation system. TSA-OIA also conducts strategic operational and tactical risk-based security planning.

**HQ Administration** – Headquarters (HQ) Administration provides all aspects of the support infrastructure required to sustain TSA's nation-wide operations. These activities include serving as the central point on policy development, performance management, facilities management, financial management, acquisition, civil rights protection, legal advice, internal conduct and audits, and providing a safe and healthy work environment for employees.

**Human Capital Services** - The Office of Human Capital Services (OHCS) includes all services that support the recruitment, assessment, servicing, and payroll of TSA's employees at headquarters, field offices, airports, and other locations. OHCS maintains oversight of all human resources contractual activities, and provides advice and counsel to senior managers on personnel issues.

**Information Technology** - Information Technology (IT) provides the IT infrastructure and services to maintain connectivity, provide productivity tools, and support headquarters and field corporate applications.

#### **C. Budget Request Summary:**

The Transportation Security Administration requests 1,992 positions, 1,861 FTE, and \$969,709,000 in appropriated funding for Transportation Security Support in FY 2013. The total adjustments-to-base include an increase of 122 FTP, 106 FTE, and a reduction of \$62,217,000.

### III. Current Services Program Description by PPA

**Department of Homeland Security  
Transportation Security Administration  
Transportation Security Support:  
Intelligence  
Program Performance Justification  
(Dollars in Thousands)**

**PPA: Intelligence**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	<b>221</b>	<b>160</b>	<b>34,918</b>
<b>2012 Enacted Budget Authority</b>	<b>232</b>	<b>223</b>	<b>42,992</b>
2013 Adjustments-to-Base	24	20	2,138
<b>2013 Current Services</b>	<b>256</b>	<b>243</b>	<b>45,130</b>
<b>2013 Total Requested Budget Authority</b>	<b>256</b>	<b>243</b>	<b>45,130</b>
Total Change 2012 to 2013	24	20	2,138

TSA requests \$45.1 million for Intelligence. The adjustments-to-base includes: an increase of 24 FTP/23 FTE and \$2.6 transfer from the Transportation Threat Assessment & Credentialing appropriation; an increase of \$124,000 for pay COLA, a decrease of 3 FTE for adjustments, and a decrease of \$537,000 for management efficiencies.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of Intelligence and Analysis (OIA) provides TSA with the capability to review, synthesize, and analyze transportation specific intelligence in addition to providing comprehensive and cogent analytic products. It is the only Federal intelligence entity focused solely on the transportation sector. OIA coordinates closely and shares information with the Department of Homeland Security Office of Intelligence & Analysis, the Intelligence Community (IC), the intelligence sections of law enforcement agencies, and the transportation industry. To facilitate collaboration and provide rapid analysis and notification of threats, the office assigns Field Intelligence Officers (FIOs) at key transportation nodes and places liaison officers at key IC and law enforcement agencies.

OIA is critical to TSA’s overall risk-based security strategy and the intelligence products generated provide the threat framework utilized to prioritize security resources. These products are regularly used by TSA senior leadership, the Federal Security Directors, the Federal Air Marshal Service, and the transportation industry to guide decisions. OIA operates and maintains 24/7 intelligence capabilities at TSA Headquarters and the TSA Freedom Center to disseminate warnings and notifications of credible and immediate threats. OIA also assists in coordinating domestic and

international civil aviation and other modal security intelligence activities with other government agencies.

To perform its mission, OIA provides and maintains Top Secret and Secret Collateral classified information technology infrastructures for interfacing via voice, video, and data with the IC, state and local law enforcement, field sites, and industry partners. One such system is the TSA Remote Access to Classified Enclaves (TRACE) solution which provides secure access to classified and unclassified threat information in a timely manner to multiple remote locations.

In FY 2013, the Intelligence PPA will be reduced by \$537,000 in management efficiencies achieved through the purchase of supplies and materials, and the operation and maintenance of equipment, as well as efficiencies across the DHS enterprise in areas such as overtime, TDY, and conferences.

Management Efficiencies: (\$537,000)

Total Change 2012 to 2013	27	22	(10,780)

TSA requests \$281.6 million for Headquarters Administration. The adjustments-to-base include: an increase of 41 FTP/40 FTE for DHS Balanced Workforce Strategy Follow-On; a decrease of 15 FTP/14 FTE and \$808,000 for transfers between the Transportation Security Support appropriation and the Transportation Security Aviation appropriation; an increase of 1 FTP/1 FTE and \$189,000 for realignments; an increase of \$620,000 for pay COLA; an increase of 7 FTE and \$50,000 for annualizations associated with FY 2012 program increases; a decrease of 12 FTE for adjustments; a decrease of \$2.7 million to annualize second year funding of support costs associated with staffing of initial 1,000 Advanced Imaging Technology equipment; and a decrease of \$8.2 million in management efficiencies.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The following table provides the components that make up this PPA.

(Dollars in millions)

	<b>FY 2012</b>	<b>FY 2013</b>
Personnel	\$148.0	\$148.7
Leadership	4.5	4.5
Internal Management & Controls	80.0	72.9
Workforce Support	17.0	17.0
Facilities Management & Physical Security	42.8	38.5
<b>Total</b>	<b>\$292.3</b>	<b>\$281.6</b>

Headquarters (HQ) Administration supports numerous functions required to provide leadership, management, and logistics support to TSA operations.

**Personnel:** \$148.7 million in personnel costs are included in this PPA for the Offices of the Assistant Secretary and Deputy Assistant Secretary, Professional Responsibility, Inspection, Chief Counsel, Finance and Administration (Chief Financial Officer (CFO) and Chief Administrative Officer (CAO)), Legislative Affairs, Acquisition, Special Counselor, Security, and Strategic Communications and Public Affairs.

**Leadership:** \$4.5 million in operating expenses are provided to develop the policy and management architecture to guide overall activities, ensure compliance with laws and regulations, and manage external relationships with Congress, the Administration, other oversight entities, and private sector partners. Executive leadership offices include the Office of the Administrator, Deputy Administrator, Legislative Affairs, and Strategic Communications and Public Affairs.

**Internal Management and Controls:** \$72.9 million in operating expenses support the day-to-day management of a \$7.6 billion budget and over 50,000 personnel. Offices overseeing internal management and controls include: Professional Responsibility, Inspection, Acquisition, CFO, CAO, Chief Counsel, and Security. The Department of Homeland Security Working Capital Fund is funded under the IM&C which funds DHS-wide and government-wide activities such as Internal Control Audit, Flexible Spending Plan, and Consolidated Subscription Services.

**Workforce Support:** \$17.0 million in operating expenses to ensure that the more than 57,000 TSA FTE have an excellent working climate and a safe and healthful environment while performing TSA's mission through the following programs: injury prevention, accident investigation and reporting, investigation of safety and health complaints, radiation safety, and health facilities. In addition, these programs ensure fair and lawful treatment of employees and the public such as, Traveler Redress, TSA Contact Center, civil rights, civil liberties, and disability rights outreach and enforcement programs. Offices that provide workforce support include: Special Counselor and CAO. The \$17 million also funds all of the contracts for CR&L O&TR --the majority of the civil rights investigations are done through a contract; it also funds the Redress program and the contract for the TSA's contact Center. In CAO, it funds the contracts for OSHE - injury prevention, accident investigation and reporting, illnesses tracking, OSHE complaints, and radiation safety. It also funds Health Services such as health units, and professional services for medical/health related policies and activities.

**Facilities Management and Physical Security:** \$38.5 million is needed for operating expenses managed by the CAO for facility and management support for HQ, the Freedom Center, the Franconia Warehouse, and the Mission Support Centers (MSCs). The Franconia Warehouse is used to stage TSA equipment prior to deployment, to store special purpose consumables, and to serve as temporary storage of property and equipment during construction projects. The MSCs are the central field service support mechanism for TSA across transportation modes.

## **PROGRAM OFFICES**

**Acquisition** – Executes contracts and other agreements for the supplies and services needed by TSA to accomplish its mission. This office provides subject matter expertise in the areas of acquisition, field

office acquisition guidance, grants management, requirements development, and program management. TSA will be continuing the focus on strengthening the capabilities of the acquisition workforce through training and development initiatives, information technology enhancements and acquisition management improvements consistent with the agency acquisition human capital plan.

**Chief Administrative Officer (CAO)** – Develops and implements administrative services programs, policies, and functions to include Occupational Safety Health and Environment (OSHE), Property Management, Field Real Estate Services, Building Management Services, and Information Management. These programs provide the following services:

- OSHE ensures TSA is in compliance with Federal regulations, DHS policy, and TSA policy and guidance in the areas of safety, health, and environmental services;
- Property Management provides accountability of all personal property owned by TSA, manages the fleet and transportation program, transit benefits, and HQ parking;
- Field Real Estate Services provides facilities services for field workspace locations by managing office and airport space allocations, lease acquisitions, design, construction and renovation of leased space, and furniture acquisition;
- Building Management Services provides building management and facilities support to TSA Headquarters; and
- Information Management Programs manage the release of official agency records, management directives, and official forms.

**Chief Counsel** – Delivers legal services to all mission areas, components, and staff, covering all substantive legal areas applicable to TSA. These include a comprehensive and inclusive array of services from legal and policy development, ethics, negotiating and drafting international agreements, drafting and reviewing legislation, Congressional testimony, and regulations and rulemaking.

**Chief Financial Officer (CFO)** – Manages resources to support TSA’s critical mission and ensures these resources are used efficiently by providing effective financial systems and robust internal funds controls. Provides planning guidance to align the TSA budget with DHS goals and objectives and provides performance guidance and assistance to ensure goals and objectives are executed.

**Inspection** – Conducts covert testing to assess systematic vulnerabilities across all modes of transportation; investigates allegations of employee misconduct within TSA, and conducts proactive compliance inspections of programs; provides financial and operational reviews to assess the integrity of programs; and conducts insider threats reviews.

**Security** – Oversees and administers the agency-wide physical, personnel, and internal security policies and procedures, thereby ensuring a safe and secure workplace for its employees, and effectively determining the employment suitability of all TSA personnel, including contractors.

**Special Counselor** - Includes Offices of Audit Liaison, Executive Secretariat, Freedom of Information Act (FOIA), Civil Rights and Liberties (OCRL), Office of Disability Policy and Outreach (ODPO); Ombudsman, Privacy, and Transportation Security Redress. These offices provide the following services:

- Audit Liaison is the TSA point of contact for audits performed by the Government Accountability Office and the DHS Office of the Inspector General;
- Executive Secretariat manages the preparation and coordination of correspondence with DHS, Congress, and the public, briefing materials for the Secretary and Deputy Secretary, and congressional Questions for the Record, and Reports to Congress. It also operates the TSA Contact Center which responds to traveler inquiries;
- FOIA responds to FOIA and Privacy Act requests from the public, Congress, and other government agencies;
- OCRL provides Equal Employment Opportunity services including education, traditional counseling, mediation, and formal complaint investigation as well as diversity management and training;
- ODPO serves as TSA's internal and external liaison on matters related to the screening of people with disabilities;
- Ombudsman provides neutral and confidential problem resolution services to employees and the public for issues involving TSA;
- The Privacy Office ensures that TSA complies with all privacy laws and regulations; and
- The Office of Transportation Security Redress provides a forum for individuals seeking redress to correct and update information that the Federal Government uses in conducting screening activities and acts as the lead agent for managing the DHS Transportation Redress Inquiry Program (TRIP).

**Strategic Communications and Public Affairs (OSCPA)** – Oversees the communications, media relations, public liaison, speechwriting, and all Web communication initiatives including the TSA Blog. Audiences include the public, the media, Congress, TSA employees, internal stakeholders, and foreign partners. The OSCPAs aims to increase public understanding of security procedures and agency policies and to prepare the public to navigate security.

**Office of Legislative Affairs (OLA)** - Conducts primary liaison activities with Congress. OLA develops and advances TSA's legislative agenda and priorities on Capitol Hill and prepares agency officials for appearances before Congress. In addition, OLA develops and implements a comprehensive, proactive legislative strategy to inform Congress of TSA's activities through briefings, meetings, tours, and responses to Congressional inquiries.

**Office of Professional Responsibility (OPR)** - Ensures fair and consistent disciplinary practice TSA-wide. This includes reviewing and adjudicating allegations of misconduct for senior level employees, tracking and oversight of misconduct cases, and adjudicating appeals of adverse actions issued against TSOs.

In FY 2013 the Headquarters Administration PPA will be reduced by \$8.2 million due to savings from the purchase of supplies and materials, and the operation and maintenance of equipment, as well as savings in administrative/professional support contracts. Nearly \$6 million will be saved through efficiencies across the DHS enterprise in areas such as management of the vehicle fleet, overtime, TDY, and conferences.

Management Efficiencies: (\$8.175 million)

Total Change 2012 to 2013	8	6	(23,571)

TSA requests \$225.8 million for Human Capital Services. The adjustments-to-base include: an increase of 8 FTP/8 FTE for DHS Balanced Workforce Strategy Follow-On; an increase of \$52,000 for transfers between the Transportation Security Support appropriation and the Transportation Security Aviation appropriation; an increase of \$76,000 for realignments; an increase of \$143,000 for pay COLA; a decrease of \$6 million for annualizations associated with FY 2012 program increases; a decrease of 2 FTE for adjustments; a decrease of \$10.5 million to annualize second year funding of support costs associated with staffing of initial 1,000 Advanced Imaging Technology equipment; a decrease of \$7.4 million in management efficiencies.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The following table provides the components that make up this PPA.

	(Dollars in Millions)	
	<b>FY 2012</b>	<b>FY 2013</b>
Personnel	\$36.0	\$36.0
HR Access -- Recruitment, Assessment, & Personnel Administration	163.1	143.9
Other HC Services	37.6	34.5
Leadership Training & Development	12.7	11.4
<b>Total</b>	<b>\$249.4</b>	<b>\$225.8</b>

The Office of Human Capital Services (OHCS) maintains oversight of all Human Resources (HR) contractual activities, develops policies, guidance, and programs that are used to identify and promote

the best and most efficient HR practices, thereby allowing TSA to establish and administer programs necessary to create and sustain a diverse and highly skilled workforce.

**Personnel:** \$36.0 million in personnel costs are included in this PPA to support all HR activities.

**HR Access:** The request includes \$143.9 million to provide HR Services to the workforce located in nearly 450 airports in all 50 States, the District of Columbia, and U.S. Territories. Services provided by HR Access include recruitment and hiring, personnel transactions, benefits processing, payroll processing, workforce planning, position management/position classification and help desk. It aligns with DHS's enterprise Architecture and leverages available e-systems. As a result, TSA benefits from improved human resource services to its employees through feedback and stakeholder communications, innovative approaches utilizing automated solutions and Federal best practice applications. The \$19.2 million reduction to HR Access includes a non-recur of \$10.5 million for the TSOs received in FY 2012.

**Other Human Capital Services:** \$34.5 million is requested for employee relations, collective bargaining, program management support of Human Capital systems, strategic Human Capital planning, reasonable accommodation, management of the Worker's Compensation program, Medical Evaluation Program, and mandatory programs. Mandatory programs include drug and alcohol testing and Unemployment Compensation.

Following the Federal Labor Relations Authority's (FLRA) decision that directed union representation for TSOs, TSA issued a Determination to allow election for union representation if conducted in a manner consistent with TSA's security mission. In June 2011, The American Federation of Government Employees (AFGE) was certified by the FLRA as the exclusive representative of the bargaining unit. Thus, TSA will transition to the collective bargaining environment and full implementation of TSA's Determination including establishment of a Unitary Resolution System by which grievances, workplace issues, conflicts, and disciplinary disagreements will be resolved through collective bargaining, or while bargaining with the union. Specifications on how these types of issues will be handled and how the system will be implemented are currently under development. The Workers' Compensation (WC) Program oversees the Workers' Compensation chargeback from the Department of Labor (DOL) and the Nurse Case Management Program. The program established the Periodic Roll Initiative (PRI) in April 2007. The initiative is a joint effort with the Nurse Case Management team in which all of the long term disability (Periodic Roll) cases are examined for opportunities to return employees to work when medically feasible. To ensure injured workers receive expedited medical care, TSA uses a diagnostic testing network to schedule and provide Magnetic Resonance Imaging (MRI) and Computed Tomography (CT) scans for employees with work-related injuries. MedLink's service expedites the scheduling of MRI and CT Scans at a reduced cost. This service schedules appointments with local radiology and diagnostic imaging centers at the earliest possible date, providing the employee's physician with an image and image study within 24 hours of testing. This enables the physician to provide accurate and timely diagnosis for quality care and medical treatment.

The Medical Evaluation Program ensures that TSOs are physically fit to continue to perform the mission critical duties of their position. This program requires TSOs to be medically evaluated, on a recurring basis. TSA is developing an implementation strategy and is developing and validating

medical qualification standards for incumbent TSOs that parallel the standards currently in place to screen applicants for TSO positions.

Other Human Capital Services also funds The DHS Working Capital Fund which provides funding for DHS-wide and government-wide activities related to operational and human resource management support functions.

**Leadership Training and Development Program:** \$11.4 million is requested for training and development of Headquarters and Field staff. OHCS works closely with TSA leadership to develop and administer programs to prepare for future leadership needs and fulfill the succession planning mandated by the Office of Personnel Management (OPM) and DHS. The program will identify the most critical current and future senior leadership requirements, prepare a pipeline of talented and motivated leaders at all levels, and identify the best external sources of recruitment when internal sources are insufficient to meet critical needs.

Succession Planning provides the opportunity for current leaders to make an investment in the development of future leaders and in the long-term success of TSA. The program was launched in three phases targeting different pools of applicants for critical positions: Senior Leadership Development Program (SLDP) 1, SLDP2, and Senior Executive Service Candidate Development Program (CDP). The CDP is a formal program operating under OPM and DHS rules to develop candidates who will seek certification from an OPM-sponsored Qualifications Review Board. Upon completion of the requirements and once certified, the employee will be eligible for non-competitive selection to executive positions.

The professional development program provides mission-related training that is either beneficial for an employee in his/her current position or for professional development that will increase the employee's ability to contribute to TSA's mission in another capacity. The Career Resident Program is a formal career development program designed to attract exceptional candidates with diverse backgrounds into targeted entry level positions.

In FY 2013 the Human Capital Services PPA will be reduced by \$7.4 million due to savings from the purchase of supplies and materials, and the operation and maintenance of equipment, as well as savings in administrative/professional support contracts. Over \$4 million will be saved through efficiencies across the DHS enterprise in areas such as overtime, TDY, and conferences.

<b>2013 Current Services</b>	<b>289</b>	<b>274</b>	<b>417,196</b>
<b>2013 Total Requested Budget Authority</b>	<b>289</b>	<b>274</b>	<b>417,196</b>
Total Change 2012 to 2013	63	58	(30,004)

TSA requests \$417.2 million for Information Technology. The adjustments-to-base include: an increase of 63 FTP/61 FTE for DHS Balanced Workforce Strategy Follow-On; an increase of \$23,000 for transfers between the Transportation Security Aviation appropriation and the Transportation Security Support appropriation; a decrease of \$265,000 for realignments; an increase of \$159,000 for pay COLA; a decrease of \$145,000 for annualizations associated with FY 2012 program increases; a decrease of 3 FTE for adjustments; a decrease of \$294,000 to annualize second year funding of support costs associated with staffing of initial 1,000 Advanced Imaging Technology equipment; a decrease of \$29.5 million in management efficiencies.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The following table provides the components of the PPA's Current Services.

(dollars in millions)

	<b>FY 2012</b>	<b>FY 2013</b>
Core Information Technology Program	\$349.3	\$296.2
Financial Management Systems/Working Capital Fund	\$64.0	\$78.5
IT Personnel	\$33.9	\$42.5
<b>Total</b>	<b>\$447.2</b>	<b>\$417.2</b>

**Core Information Technology (IT) Program:** A total of \$296.2 million supports the core IT and telecommunications infrastructure for all TSA enterprise-wide IT services that assist in accomplishing TSA’s mission. The core enterprise IT capability is supported through an IT infrastructure contract that provides TSA the flexibility to manage and adjust IT resources as necessary. TSA’s IT business model offers the prospect of long-term cost efficiencies and the implementation of state-of-the-art technologies without sacrificing the integrity or security of IT systems.

**Financial Management Systems/Working Capital Fund:** This activity funds \$78.5 million of interagency agreements with the U.S. Coast Guard for the use of their financial management system. It also funds reimbursements to DHS for the costs of the Working Capital Fund related to operational and information management support functions. The FY 2013 increase of \$14.5 million over FY 2012 is due to increases in the Working Capital Fund interagency agreements.

**IT Personnel:** This PPA includes \$42.5 million to support 289 FTP/274 FTE for IT support. These personnel consist of IT engineers, application developers, technical specialists, and associated support professionals. They provide the IT infrastructure and services to TSA Headquarters and field locations. The FY 2013 Budget request also reflects a Balanced Workforce/contract conversion of 63 FTP and 61 FTE.

In FY 2013 the Information Technology PPA will be reduced by \$29.5 million due to savings from the purchase of supplies and materials, and the operation and maintenance of equipment, as well as savings in administrative/professional support contracts. Over \$22 million will be saved through efficiencies across the DHS enterprise in areas such as overtime, TDY, and conferences.

### Intelligence Mission Statement

Provide Intelligence Analysis, Coordination, and Dissemination -- TSA will continue to provide current and strategic warning regarding threats to U.S. transportation modes and identify trends and changes in targeting. The TSA intelligence unit analyzes intelligence and disseminates information through liaison with intelligence community agencies.

## Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	17,082	22,978	24,987	2,009
11.3 Other than full-time permanent	21	86	94	8
11.5 Other personnel compensation	289	1,083	1,178	95
11.6 Pay Diff (Sun/Night)	96	-	-	-
11.7 Military personnel/Awards	312	-	-	-
12.1 Benefits	4,848	6,421	6,983	562
<b>Total, Salaries &amp; Benefits</b>	<b>22,648</b>	<b>30,568</b>	<b>33,242</b>	<b>2,674</b>

Salaries and Benefits are for 256 FTP/ 243 FTE. The FY 2013 request reflects a decrease in overtime in accordance with Enterprise-Wide efficiencies and an increase for the realignment of 24 FTP/23 FTE.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
21.0 Travel	\$619	\$801	\$761	-\$40

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2013 request reflects a decrease in travel in accordance with Enterprise-Wide efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.1 Advisory and assistance services	\$8,500	0	\$77	\$77

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal government. The FY 2013 request reflects a decrease in advisory and assistance services in accordance with Enterprise-Wide efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.2 Other services	\$2,885	\$10,924	\$10,384	-\$540

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Included in this category is contractual services for intelligence support. The FY 2013 request reflects a decrease in other services in accordance with Enterprise-Wide efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.3 Purchases from Gov't accts.	0	\$170	\$162	-\$8

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2013 request is for new staff. The FY 2013 request reflects a decrease in purchases from government accounts in accordance with Enterprise-Wide efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>26.0 Supplies and materials</b>	\$232	\$288	\$274	-\$14

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>31.0 Equipment</b>	0	\$233	\$222	-\$11

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

**Human Capital Services Mission Statement**

Human Capital Services include all the activities that support the Office of Human Capital Services (OHCS) including the recruitment, assessment, servicing, and payroll of TSA's Transportation Security Officers and other workforce at headquarters, field locations, and airports, and personnel policies, programs and systems.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	23,483	22,915	23,795	880
11.3 Other than full-time permanent	632	456	474	18
11.5 Other personnel compensation	3	761	790	29
11.6 Pay Diff (Sun/Night)	22	-	-	-
11.7 Military personnel/Awards	332	-	-	-
12.1 Benefits	6,460	5,933	6,160	227
13.0 Unemployment Compensation	9,903	6,685	6,942	257
<b>Total, Salaries &amp; Benefits</b>	<b>40,835</b>	<b>36,750</b>	<b>38,161</b>	<b>1,411</b>

Salaries and benefits are for 150 FTE. The FY 2013 request includes conversions of contracts to government FTEs and realignments. The FY 2013 request reflects a decrease in overtime in accordance with Enterprise-Wide efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
21.0 Travel	\$1,753	\$2,825	\$2,492	-\$333

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2013 request reflects a decrease in travel in accordance with Enterprise-Wide efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
22.0 Transportation of things	\$19	\$66	\$58	-\$8

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2013 request reflects administrative savings initiatives.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
23.2 Other rent	\$53	\$334	\$295	-\$39

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
23.3 Communications, utilities, and misc. charges	\$1	\$16	\$14	-\$2

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2013 request reflects a decrease in communication, utilities, and misc charges in accordance with Enterprise-Wide efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
24.0 Printing	\$76	\$66	\$58	-\$8

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2013 request reflects a decrease in printing in accordance with Enterprise-Wide efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.1 Advisory and assistance services	\$133,471	\$124,146	\$103,303	-\$20,843

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal government. The FY 2013 request reflects a decrease in advisory and assistance services in accordance with Enterprise-Wide efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.2 Other services	\$45,294	\$59,212	\$58,527	-\$685

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Included under this object class are contracts for security support, EEO support, and corporate training. The FY 2013 request reflects a decrease in other services in accordance with Enterprise-Wide efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.3 Purchases from Gov't accts.	\$14,749	\$25,479	\$22,475	-\$3,004

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2013 request reflects a decrease in purchases from government accounts in accordance with Enterprise-Wide efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.6 Medical care	\$5	\$14	\$12	-\$2

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
26.0 Supplies and materials	\$290	\$288	\$254	-\$34

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FY 2013 request reflects a decrease in supplies and materials in accordance with Enterprise-Wide efficiencies.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>31.0 Equipment</b>	\$91	\$204	\$180	-\$24

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

## **K. DHS Balanced Workforce Strategy**

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce – both contracted and federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into Tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2014 budget.

The Transportation Security Administration requests 109 FTE for the FY 2013 DHS Balanced Workforce Strategy.

<b>BUDGET REQUEST AND SUPPORTING INFORMATION</b>
--

**Transportation Security Administration  
Federal Air Marshal Service**

## **I. Appropriation Overview**

### **A. Mission Statement for Federal Air Marshal Service:**

The Federal Air Marshal Service (FAMS) promotes public confidence in our Nation's civil transportation systems through the effective risk-based strategic deployment of Federal Air Marshals (FAMs) in both air and land based mission-related assignments. The organization's primary focus is to detect, deter, and defeat terrorist or other criminal hostile acts targeting U.S. air carriers, airports, passengers, and crew.

### **B. Budget Activities:**

#### **Management and Administration (M&A)**

The FAMS's mission demands a host of critical planning, operational, and support programs to protect the public from the threat of a terrorist attack or other criminal activity. The FAMS' M&A programs encompass vital enforcement, information management, and infrastructure components necessary to support core operations. Examples include the FAMS's participation in Joint Terrorism Task Force (JTTF) activities, management and implementation of a sophisticated flight/mission scheduling and notification system, and performance of mission critical workforce management, command and control, information technology, logistics, and related services.

#### **Travel and Training (T&T)**

In order to maintain optimum readiness and to perform its primary operational functions, the FAMS requires extensive training and mission travel capabilities. FAMs must undergo continuous training to maintain and expand their expertise in the full-range of skills necessary to operate within the transportation domain, to include specialized tactics, enforcement, surveillance detection, marksmanship, and other skill sets. Furthermore, this PPA funds FAMS's mission travel, which is an integral component of the international and domestic flight coverage activities that are core to the FAMS mission.

### **C. Budget Request Summary:**

The Transportation Security Administration (TSA) requests \$929,610,000 million in FY 2013. This includes an adjustment-to-base decrease of \$12,482,000 and a program decrease of \$24,023,000.

## II. Summary of FY 2013 Budget Estimates by Program/Project Activity (PPA)

### III. Current Services Program Description by PPA

**Department of Homeland Security  
Transportation Security Administration  
Federal Air Marshals:  
Management and Administration  
Program Performance Justification  
(Dollars in Thousands)**

**PPA: Management and Administration**

	<u>Perm. Pos</u>	<u>FTE</u>	<u>Amount</u>
<b>2011 Actual Obligations</b>	-	-	<b>801,034</b>
<b>2012 Enacted Budget Authority</b>	-	-	<b>842,500</b>
2013 Adjustments-to-Base	-	-	(4,838)
<b>2013 Current Services</b>	-	-	<b>837,662</b>
2013 Program Change	-	-	(22,023)
<b>2013 Total Requested Budget Authority</b>	-	-	<b>815,639</b>
Total Change 2012 to 2013	-	-	(26,861)

The Transportation Security Administration requests \$815.6 million for this activity. The request includes an increase of \$2.7 million for pay COLA. The adjustments-to-base include a decrease of \$7.6 million for management efficiencies in administrative/professional support, logistics, personnel security, supplies, and other expenses. The request also reflects a program decrease of \$22.0 million.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Management & Administration (M&A) PPA funds the FAMS’s payroll costs and supports all operational and infrastructure requirements with the exception of training and travel expenses. The vast majority of this PPA funds the salaries for FAMS and the civilian workforce to provide the vital protective and law enforcement services necessary for both domestic and international air travel as well as other transportation related security activities.

The remaining balance of M&A’s funding supports the continuing development and maintenance of the Service’s infrastructure, internal business processes, and systems that enable FAMS to seamlessly perform the integrated set of functions that make up their mission. In addition to the activities detailed below, M&A provides funding for workforce management activities; information technology; leasing and maintenance of facilities in the Washington, D.C. area, Atlantic City, NJ, and 23 field and three Resident Agent in Charge offices across the country including a Baltimore Field Office; and program infrastructure and logistics support such as vehicles, communications, duty equipment, and physical security.

Key programs of the Management & Administration PPA include:

**Joint Terrorism Task Force (JTTF):** The FAMS is a full participant in the JTTF, a nation-wide counter-terrorism enforcement program managed by the Federal Bureau of Investigation (FBI). The JTTF targets terrorism-related criminal threats against the United States and its interests. Since 2002, the FAMS has been an active full-time partner in the JTTF. The FAMS's personnel are assigned to partner with other task force member agencies to provide support during investigations of aviation and other transportation-related threats. The working relationships between the FAMS and other task force participants enable real-time information sharing. Further, it enhances both short-term decision making during immediate critical threats and long-term strategic decision making during the evolution of ongoing threats, such as the 2010 printer cartridge bomb plot.

**Transportation Information Sharing System (TISS):** The TISS enables the collection, analysis, and dissemination of intelligence information observed by FAMs, TSA personnel, and state/local law enforcement in the transportation sector. FAMs routinely submit Suspicious Incident Reports when they observe activities that fall below a predetermined threshold of an actionable incident. The information is used to identify a nexus of terrorist or criminal-related activity, as well as trends, patterns, or associations that may reveal circumstances or subjects that are deemed to be of interest to Department of Homeland Security (DHS) Office of Intelligence and Analysis.

**Visible Intermodal Prevention and Response (VIPR):** Deployments are conducted in all modes of transportation to detect, deter, defeat, and disrupt potential terrorist activity. VIPR operations consist of teams of TSA personnel including FAMs, Transportation Security Inspectors, Transportation Security Officers, Behavior Detection Officers, Explosive Detection Canine Teams, Transportation Security Specialists - Explosives, and Federal, State and local law enforcement officers. The teams are tailored to each transportation mode, integrating the specific needs of each transportation partner at the venue level. In addition, these deployments incorporate elements of randomness and are unpredictable in frequency, location, and duration. VIPR operations are planned and implemented through a risk-based deployment methodology that utilizes existing national and local intelligence, data analysis, and security assessments. These resources are used to enhance TSA's overall ability to act as a visible deterrent across multiple transportation sectors, to screen passengers, and to identify suspicious behavior. This program is funded by approximately \$13 million in the M&A PPA, included in pay and general expenses.

The following table provides the major components of the M&A PPA, with resources shown in millions of dollars.

	FY 2012	FY 2013
Payroll, Compensation and Benefits	\$731.5	\$712.3
Information Technology	49.4	46.7
Operations Infrastructure	61.6	56.6
<b>Total</b>	<b>\$842.5</b>	<b>\$815.6</b>

**Payroll, Compensation and Benefits – \$712.3M:** This component, which amounts to approximately 88 percent of the total FAMS’s M&A budget, covers all pay, compensation and benefits, overtime, Law Enforcement Availability Pay, awards, and workers’ compensation payments for the Service’s FAM and civilian work force. The FAMS’s personnel are arrayed throughout the country and provide the manpower necessary to conduct the Service’s full range of operations.

**Information Technology (IT) – \$46.7M:** The FAMS’s IT capability is critical to providing the Service and individual FAMS with the vital automated tools, systems, and computer security technology necessary to ensure accomplishment of the FAMS mission.

The M&A PPA also provides funding for the FAMS’s Mission Scheduling and Notification System (MSNS), the core automated system used by the Service for planning, scheduling, and implementing FAMS’ flight coverage operations. The MSNS uses a risk-based process that selects from over 28,000 daily U.S. commercial airline flights to prioritize deployments of thousands of FAMS worldwide.

**Operations Infrastructure – \$56.6M:** Funding for the Operations Infrastructure component supports critical activities including, but not limited to: permanent change of station; facility build out, leases, utilities, and maintenance; vehicles; telecommunications; background investigations; and logistics management.

The following table provides a further breakout of the Administrative Savings for this initiative:

Administrative Savings – (\$7.581 Million)  
(dollars in thousands)

Item	Sub-Total	Total
Enterprise-Wide Efficiencies		(\$4,643)
Overtime	(\$ 1,095)	
Conferences	(\$ 248)	
DHS Strategic Sourcing Initiatives	(\$ 19)	
OFPP Directed Purchasing Savings	(\$ 3,281)	
Admin/Professional Support Contract Efficiencies		(\$ 345)
Management Adjustments		(\$ 2,593)

**Department of Homeland Security  
Transportation Security Administration  
Federal Air Marshals:  
Travel and Training  
Program Performance Justification  
(Dollars in Thousands)**

**PPA: Travel and Training**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	-	-	<b>125,006</b>
<b>2012 Enacted Budget Authority</b>	-	-	<b>123,615</b>
2013 Adjustments-to-Base	-	-	(7,644)
<b>2013 Current Services</b>	-	-	<b>115,971</b>
2013 Program Change	-	-	(2,000)
<b>2013 Total Requested Budget Authority</b>	-	-	<b>113,971</b>
Total Change 2012 to 2013	-	-	(9,644)

The Transportation Security Administration requests \$114.0 million for this activity. The adjustments-to-base include a decrease of \$7.7 million for management efficiencies in mission travel, training, and other expenses. The request also reflects a program decrease of \$2.0 million.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Travel and Training (T&T) PPA supports the FAMS’s core requirements for travel, travel-associated costs, and training. The following table provides the major component parts of the T&T PPA, with resources shown in millions of dollars.

	<b>FY 2012</b>	<b>FY 2013</b>
Travel	\$116.1	\$107.5
Training	7.5	6.5
<b>Total</b>	<b>\$123.6</b>	<b>\$114.0</b>

**Travel – \$107.5M:** This portion funds all travel necessary to perform domestic and international mission coverage, mission essential training, and other business-related travel in support of FAMS operational and programmatic goals. The FAMS schedules the coverage of high-risk flights according to a concept of operations that incorporates threat, vulnerability, and consequence. Each year, the FAMS continues to provide priority flight coverage operations in accordance with their Concept of Operations.

**Training – \$6.5M:** Through its training programs, the FAMS provides effective learning environments and opportunities for its employees by utilizing current and relevant curricula and training methodologies to enable and challenge FAMS to perform their duties and responsibilities in a highly effective and efficient manner.

Upon entry into the FAMS training program, FAM trainees undergo an intensive 16.5-week training program conducted at the Federal Law Enforcement Training Center (FLETC) in Artesia, NM and at the FAMS Training Center (FAMSTC) in Atlantic City, NJ. The training component provides for all associated training requirements to include FLETC-related expenses, role player contracts, hotel lodging contracts for Atlantic City-based classes, training supplies, firing range fees, training gear, equipment, and clothing. Once assigned to a field office, FAMS undergo recurrent, in-service training to maintain the necessary skill base and firearms certification levels on a quarterly basis. Currently, the FAMS has the highest firearms qualification score of any Federal agency (85 percent or 255/300).

Additional training offered by the FAMS includes a robust FAMS Field Office Recurrent Training Program which requires all mission status FAMS to complete 160 hours of recurrent training a year. The training is designed to maintain and enhance perishable tactical skills critical to the success of the FAMS’s mission. The FAMS’s Training Division (FAMSTD) is also responsible for providing instructor development courses for field based and newly assigned FAMSTD instructors. This is accomplished through a series of train-the-trainer courses offered at the FAMSTC that focus on supporting the FAMS mission. There is also a strong emphasis placed on training to support professional/technical development, leadership/management development, and career development for the entire FAMS workforce.

The following table provides a further breakout of the Administrative Savings for this initiative:

Administrative Savings - (\$7.644 Million)  
(dollars in thousands)

Item	Sub-Total	Total
Enterprise-Wide Efficiencies		(\$5,691)
General TDY	(\$5,691)	
Management Adjustments		(\$ 1,953)

## IV. Program Justification Changes

**Department of Homeland Security  
Transportation Security Administration  
Federal Air Marshals:  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 1:** FAMS Efficiency  
 PPA: Travel and Training  
 Management and Administration  
 Program Decrease: Positions 0, FTE 0, Dollars \$(24,023)

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Decrease – Management & Administration							-	-	(22,023)
Program Decrease – Travel and Training									(2,000)
<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>(24,023)</b>

**Description of Item**

FAMS primary focus is to detect, deter, and defeat terrorist or other criminal or hostile acts targeting U.S. air carriers, airports, passengers, and crew. The FY 2013 request proposes a program decrease of \$24.0 million -- \$22 million in the Management and Administration PPA and \$2 million in the Travel and Training PPA.

**Justification**

The reduction of \$24.0 million reflects ongoing efficiencies and program changes that leverage the Nation’s other transportation security systems. The requested funding level preserves the Federal Air Marshal Service’s capability to continue coverage of high priority flights

The Federal Air Marshal Service will implement this program decrease by reducing operational and infrastructure activities such as mission travel, training, logistics, personnel security, and supplies. FAMS will also reduce personnel costs through a hiring freeze and attrition.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

The Federal Air Marshal Service will implement this program decrease by absorbing reductions to operational and infrastructure activities such as mission travel, training, logistics, personnel security, supplies, and attrition. The requested funding level preserves the Federal Air Marshal Service's capability to continue coverage of high priority flights.

## **V. Exhibits and Other Supporting Material**

### **A. Justification of Proposed Legislative Language**

For necessary expenses of the Federal Air Marshals, [966,115,000] \$929,610,000. (*Department of Homeland Security Appropriations Act, 2012.*)

## B. FY 2012 to FY 2013 Budget Change

### Management and Administration Mission Statement

The Management and Administration (M&A) PPA funds the FAMS' staffing/payroll requirements, which include: salary/compensation, benefits, awards, overtime, etc. In addition, M&A funds critical administrative and operational requirements including the FAMS' mission scheduling system and information technology requirements, rent, wireless communications systems; recruitment/hiring and retention services (background investigations, security clearances, medical exams/physicals, drug tests); and a host of program support services and requirements (interagency agreements, vehicle leasing, shipment of goods, utilities/communications, janitorial services, supplies, duty equipment, printing, physical security, etc.)

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	367,780	397,792	388,571	(9,221)
11.3 Other than full-time permanent	319	13,808	13,393	(415)
11.5 Other personnel compensation	114,687	114,333	110,892	(3,441)
11.6 Pay Diff (Sun/Night)	2,349	-	-	-
11.8 Special Service Pay	-	687	666	(21)
12.1 Benefits	198,910	204,898	198,731	(6,167)
13.0 Unemployment Compensation	181	-	-	-
<b>Total, Salaries &amp; Benefits</b>	<b>684,226</b>	<b>731,518</b>	<b>712,253</b>	<b>(19,265)</b>

The FY 2013 Salaries and Benefits request includes a pay COLA adjustment of \$2,743,000 as well as a decrease of \$22,008,000.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
21.0 Travel	\$2,738	\$2,441	\$2,387	-\$54

Travel includes all costs associated with the lease/purchase, maintenance and fuel requirements for vehicles. The FY 2013 request includes a program decrease of \$54,000.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
22.0 Transportation of things	\$259	\$281	\$267	-\$14

Transportation of things includes all costs associated with the care of items in the process of being transported, as well as other services associated with the transportation of things. The FAMS uses this object class series for central billing and for the shipment of goods between Headquarters and Field Offices. The FY 2013 request includes a program decrease of \$14,000.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
23.1 GSA rent	\$2,674	\$3,656	\$3,388	-\$268

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services. The FY 2013 request includes a program decrease of \$268,000.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
23.2 Other rent	\$16,455	\$15,626	\$14,148	-\$1,478

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The majority of the FAMS' commercial office leases for Headquarters and field offices are included in this category. The FY 2013 request includes a program decrease of \$1,478,000.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
23.3 Communications, utilities, and misc. charges	\$12,163	\$15,303	\$13,917	-\$1,386

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FAMS uses this object class series for PDA and cell phone air time and general office utilities such as metered gas, electricity, water usage, etc. The FY 2013 request includes a program decrease of \$1,386,000.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.1 Advisory and assistance services	\$20,386	\$14,192	\$13,046	-\$1,146

Advisory and assistance services primarily include services acquired by contract from non-Federal sources (i.e., the private sector, foreign governments, State and local governments, tribes, etc.). The FY 2013 request includes a program decrease of \$1,146,000.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.2 Other services	\$14,714	\$24,291	\$25,513	\$1,222

Other services include contractual services with non-Federal and Federal sources that are not otherwise classified under Object Class 25.1. The FAMS uses this series for additional support for the Mission Scheduling and Notification System, support services for other elements (including contractors supporting contracting/procurement efforts) within the Service. The FY 2013 request includes an increase of \$1,222,000.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.3 Purchases from Gov't accts.	\$18,517	\$11,655	\$9,662	-\$1,993

Purchases from Government Accounts include costs for purchases from other Federal agencies or accounts that are not otherwise classified. For the FAMS, this includes IT Support for the entire FAMS, facility maintenance support from the FAA, office equipment maintenance and security clearances. The FY 2013 request includes a program decrease of \$1,993,000.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.4 O&M of facilities	\$12,875	\$3,208	\$2,964	-\$244

Operation and maintenance of facilities includes all payments for the operation and maintenance of facilities when done by contract with either the private sector or another Federal Government account. The FAMS uses this object class series for custodial services and facility build out/enhancements of current leases. The FY 2013 request includes a program decrease of \$244,000.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.6 Medical care	0	\$1,909	\$1,861	-\$48

The FY 2013 request includes a program decrease of \$48,000.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.7 Operation and maintenance of equipment</b>	\$2,942	\$5,838	\$5,200	-\$638

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal account. The FY 2013 request includes a program decrease of \$638,000.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>26.0 Supplies and materials</b>	\$3,510	\$2,931	\$2,755	-\$176

Supplies and materials are defined as commodities that are: (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FAMS uses this series for IT supplies and materials, office supplies and fuel. The FY 2013 request includes a program decrease of \$176,000.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>31.0 Equipment</b>	\$9,207	\$9,640	\$8,267	-\$1,373

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. Included in this total are costs for IT equipment and software, furniture and other office equipment. The FY 2013 request includes a program decrease of \$1,373,000.

**Travel and Training Mission Statement**

The Travel and Training (T&T) PPA is used to cover all travel and training requirements that support the FAMS program. The travel portion of the PPA supports the FAMS' requirements for mission travel (per diem and lodging) and associated costs, such as airport parking and automated travel account services. Mission travel resources are essential to the Federal Air Marshals' ability to perform scheduled flight coverage on both domestic and international operations and provide the FAMS the necessary mobility and flexibility to perform their enforcement and counterterrorism missions. T&T funds also support other FAMS travel required for non-mission and training purposes.

T&T also supports the FAMS' comprehensive training requirements to include TP I (Basic Law Enforcement Training) and TP II (FAMS specific training) for new Federal Air Marshals and all recurrent field training. This PPA provides funding for all associated training requirements, such as Federal Law Enforcement Training Center (FLETC) costs, training-related ammunition, TP II instructor contracts, hotel lodging contracts for Atlantic City classes, training supplies, firing range fees, professional and training gear, equipment and clothing. The T&T PPA also supports the required professional training for other professional development and career training as required.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
21.0 Travel	\$110,745	\$116,097	\$107,500	-\$8,597

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The bulk of these costs directly support Federal Air Marshal domestic and international mission travel, which is the primary mission of the Service. Also included in this object class are travel costs related to training, conference attendance, and site visits. The FY 2013 request includes a program decrease of \$8,597,000.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.2 Other services	\$5,249	\$2,438	\$1,391	-\$1,047

Other services include contractual services with non-Federal and Federal sources that are not otherwise classified under Object Class 25. The FAMS uses this object class series for FLETC training costs, hotel lodging contracts for TP II training and field recurring range fees for Federal Air Marshals' quarterly requalification. The FY 2013 request reflects a program decrease of \$1,047,000.

# U. S. Coast Guard

## Operating Expenses

### I. Appropriation Overview

#### **A. Mission Statement for Operating Expenses:**

The Operating Expenses (OE) appropriation funds the Coast Guard's role as the principal Federal agency providing maritime safety, security, and stewardship to the Nation.

#### **B. Budget Activities:**

The Operating Expenses (OE) appropriation funds the annualization of prior-year funding, economic adjustments, and operating and maintenance funding for new and existing Coast Guard programs, projects and activities (PPA). The OE request supports all 11 statutory Coast Guard missions in support of the Coast Guard's six DHS FYHSP Programs.

#### **C. Budget Request Summary:**

The Coast Guard requests 48,385 positions, 48,784 FTE, and \$6.8 billion for FY 2013. Total adjustments-to-base include a net increase of \$11.4 million, and a net decrease of 471 FTE.

The Coast Guard's OE request includes \$189.3 million in new funding that includes the annualization of prior year funding and FY 2012 military pay raise; and supports the pay increase for military (1.7 percent) and civilian (0.5 percent) personnel; military allowances; and the operation, maintenance, and crewing of systems, vessels, aircraft and shore facilities delivered via the Coast Guard's acquisition programs (e.g. shore facilities, Response Boat-Medium (RB-M), Interagency Operations Centers (IOC), Rescue 21 (R21), Fast Response Cutter (FRC), and HC-144A Maritime Patrol Aircraft (MPA)).

The FY 2013 budget makes necessary trade-offs to meet today's needs and challenges, while simultaneously preparing for new and exigent demands. Through a comprehensive internal review of doctrine, policy, operations and mission support structure, the Coast Guard has focused OE resources and forces where they are most needed. The OE adjustments-to-base include decreases of \$181.6 million to focus resources toward these higher priorities, including recapitalizing aged, obsolete assets. Decreases include the termination of one-time costs; annualization of prior year management efficiencies; vessel decommissionings, disestablishment of High-Tempo-High Maintenance (HTHM) patrol boat operations; fixed wing aircraft retirements; closing seasonal Air Facilities; enterprise-wide efficiencies and programmatic reductions.

Program increases include \$24.5 million for the move of Coast Guard Headquarters to the DHS Consolidated Headquarters campus at St. Elizabeths, with the eventual goal to consolidate DHS headquarters activities to this new location.

Base adjustment increases include:

- Annualization of FY 2012 Funding – \$54.2 million
- Annualization of FY 2012 Military Pay Raise – \$8.4 million
- FY 2013 Military and Civilian Pay Increase - \$30.0 million
- DoD Parity: Adjustments To Military Allowances and Health Care – \$49.0 million
- Operating and Maintenance funds for new assets, including follow-on costs related to Shore Facilities, RB-M, IOC, R21, and Surface and Air Asset Follow-on – \$47.6 million
- Base Reallocations—[\$8.8 million]

Base adjustment decreases include:

- Termination of One-Time FY 2012 Costs – (\$18.3 million)
- Prior Year Management Annualizations – (\$11.0 million)
- Disestablish HTHM Patrol Boat Operations – (\$33.5 million)
- Decommission High Endurance Cutters and Patrol Boats – (\$18.8 million)
- Retire Fixed Wing Aircraft – (\$5.5 million)
- Close Seasonal Air Facilities – (\$5.2 million)
- Enterprise-Wide Efficiencies – (\$56.3 million)
- Programmatic Reductions – (\$32.9 million)

Program changes include:

- Coast Guard Headquarters move to the DHS consolidated headquarters at St. Elizabeths – \$24.5 million

### III. Current Services Program Description by PPA

**Department of Homeland Security  
U. S. Coast Guard  
Operating Expenses  
Program Performance Justification**  
(Dollars in thousands)

PPA I: MILITARY PAY AND ALLOWANCES

	<b>Perm Pos</b>	<b>FTE<sup>1</sup></b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	<b>41,269</b>	<b>41,093</b>	<b>3,390,827</b>
<b>2012 Enacted Budget Authority</b>	<b>41,445</b>	<b>41,729</b>	<b>3,386,820</b>
2013 Adjustments-to-Base	(1,001)	(532)	28,775
<b>2013 Current Services</b>	<b>40,444</b>	<b>41,197</b>	<b>3,415,595</b>
2013 Program Change	0	0	0
<b>2013 Requested Budget Authority</b>	<b>40,444</b>	<b>41,197</b>	<b>3,415,595</b>
Total Change 2012-2013	(1,001)	(532)	28,775

The Coast Guard requests \$3.4 billion for this activity.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Requests funding for expenses related to compensation and benefits for active duty military personnel. This category includes pay, allowances, employer’s share of the Federal Insurance Contribution Act (FICA), Social Security credits, child care benefits for Coast Guard families, and other expenses associated with compensating military personnel. Costs related to compensation are calculated by using the Coast Guard’s Standard Personnel Cost (SPC) tables. These tables are updated annually and provide a detailed calculation for each billet, broken down by rank/rate, location—in the United States (INCONUS) or out of the country (OCONUS)—which includes Alaska and Hawaii), medical costs and permanent change of station (PCS) expenses. Calculations for medical cost estimates are the same for each billet. Calculations for PCS moves and base pay are based upon rank and location of billet. Pay estimates account for OMB-published pay inflation factors for the fiscal year in question.

Dedicated Coast Guard personnel, as members of one of the Nation’s five Armed Services and the only military organization within the Department of Homeland Security, conduct the missions that protect the public, the environment, and U.S. economic interests - in the Nation’s ports and waterways, along the coast, on international waters and far offshore. The unique, multi-mission character of the Coast Guard requires personnel to safeguard lives, protect the natural environment and key resources, facilitate safe and secure maritime trade, and protect the livelihoods of citizens who depend on use of the oceans and waterways. Coast Guard forces are flexible, rapidly deployable, and able to respond to crises with a full range of authorities and

<sup>1</sup> The Coast Guard manages the military workforce by end strength, not FTE. The military FTE represented in these numbers are monthly end strengths averaged over the year.

capabilities. Coast Guard forces capitalize upon their adaptable nature and multi-mission, versatile assets to prevent maritime incidents, protect the U.S. Maritime Domain, and assist in response and recovery from threats and hazards – both natural and manmade.

Active duty military personnel ensure the Service remains agile, adaptable, and ready to serve the Nation's domestic and international maritime interests across a range of dynamic operational environments. The Coast Guard was founded as a military, multi-mission, maritime service and continues to be ready, aware, and responsive across its statutory missions. As the Nation's maritime first responder, the Coast Guard must not only be effective in its daily operations, but also remain ready for emergent missions and contingencies; aware of maritime conditions and activities in order to detect, deter and defeat threats early; and, when called upon, be responsive with the right capabilities at the right time.

PPA II: CIVILIAN PAY AND BENEFITS

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	<b>7,778</b>	<b>6,978</b>	<b>723,908</b>
<b>2012 Enacted Budget Authority</b>	<b>7,996</b>	<b>7,526</b>	<b>780,552</b>
2013 Adjustments-to-Base	(55)	61	9,578
<b>2013 Current Services</b>	<b>7,941</b>	<b>7,587</b>	<b>790,130</b>
2013 Program Change	0	0	0
<b>2013 Requested Budget Authority</b>	<b>7,941</b>	<b>7,587</b>	<b>790,130</b>
Total Change 2012-2013	(55)	61	9,578

The Coast Guard requests \$790.1 million for this activity.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Requests funding for expenses related to compensation and entitlements for Federal civilian employees. The workforce is composed of General Schedule (GS) personnel, Administrative Law Judges (AL), Senior Executive Service (SES) personnel, personnel whose salaries are Administratively Determined (AD) (e.g., Coast Guard Academy civilian faculty members), Wage Grade (WG) positions employed in industrial operations, and “Non-Ceiling” (NC) employees (e.g., cooperative education students, student aides, summer interns, and Federal junior fellows). Costs related to compensation are calculated using the Coast Guard’s Standard Personnel Cost (SPC) tables. These annually updated tables provide a detailed calculation for each billet, broken down by pay grade and location—INCONUS or OCONUS (which includes Alaska and Hawaii). Calculations for base pay are based upon position, location of position, and OMB economic assumptions for the fiscal year in question.

Civilian personnel are an integral part of the Coast Guard and vital to execution of its statutory missions. The Coast Guard continues to complement its military workforce by recruiting diverse, well-educated, and dedicated civilians needed to meet current and future demands.

PPA III: TRAINING AND RECRUITING

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	...	...	<b>217,881</b>
<b>2012 Enacted Budget Authority</b>	...	...	<b>212,732</b>
2013 Adjustments-to-Base	...	...	29
<b>2013 Current Services</b>	...	...	<b>212,761</b>
2013 Program Change	...	...	0
<b>2013 Requested Budget Authority</b>	...	...	<b>212,761</b>
Total Change 2012-2013	...	...	29

The Coast Guard requests \$212.8 million for this activity.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The training and recruiting PPA provides funding for the Coast Guard’s professional training and education programs, as well as operation and maintenance of the seven major Coast Guard training centers and the Coast Guard Academy and Leadership Development Center.

Additionally, this request includes funding for tuition, travel, and per diem for formal training and education performed as temporary additional duty (TAD) by military service members and civilian personnel. It also ensures the training infrastructure is adequately resourced to provide Coast Guard personnel with the tools and competencies necessary for assigned missions. Specifically, this request funds additional instructors for Marine Safety training. Training is provided by the Coast Guard, commercial providers, DoD, and other agencies. This training and education are usually conducted by dedicated resident staffs in classrooms, but may also include exportable training, correspondence courses, and/or computer-based training.

From entry-level personnel through senior leadership, the Coast Guard focuses its training resources to engrain those competencies that will maximize operational proficiency.

PPA IV: OPERATING FUNDS AND UNIT LEVEL MAINTENANCE

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	...	...	<b>1,250,416</b>
<b>2012 Enacted Budget Authority</b>	...	...	<b>1,108,172</b>
2013 Adjustments-to-Base	...	...	(19,953)
<b>2013 Current Services</b>	...	...	<b>1,088,219</b>
2013 Program Change	...	...	4,200
<b>2013 Requested Budget Authority</b>	...	...	<b>1,092,419</b>
Total Change 2012-2013	...	...	(15,753)

The Coast Guard requests \$1.1 billion for this activity.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Requests funding for units, facilities, and activities that are under the direct operational and administrative control of the Coast Guard’s Headquarters and Atlantic Area or Pacific Area Commanders. These include Bases, Base Support Units (BSUs); National Security Cutters (WMSL), High and Medium Endurance Cutters (WHECs/WMECs); Sectors; Patrol Boats; Multi-mission Boat Stations; Air Stations; Communication Stations; Deployable Specialized Forces (DSF); support commands; and Area Offices as applicable for supplies, materials, and services that allow the Coast Guard to sustain an operations tempo with an immediate response capability for Coast Guard missions. This request funds organizational-level maintenance of cutters, boats, aircraft, electronics systems, mechanical systems, and electrical equipment; procurement of supplies and materials utilized for unit “housekeeping” and administration, spare parts, liquid fuel, and energy; and other materials consumed that contribute directly to mission effectiveness.

PPA V: CENTRALLY MANAGED ACCOUNTS

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	...	...	<b>342,807</b>
<b>2012 Enacted Budget Authority</b>	...	...	<b>336,161</b>
2013 Adjustments-to-Base	...	...	(6,283)
<b>2013 Current Services</b>	...	...	<b>329,878</b>
2013 Program Change	...	...	20,300
<b>2013 Requested Budget Authority</b>	...	...	<b>350,178</b>
Total Change 2012-2013	...	...	14,017

The Coast Guard requests \$350.2 million for this activity.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Requested funding represents centrally managed accounts that provide service to the entire Coast Guard. Significant centrally managed accounts include: the Federal Telephone System (FTS), Standard Workstation recapitalization, Coast Guard Data Network (CGOne), satellite and data communications, General Services Administration (GSA) rent, postal expenses, ammunition replenishment, and the DHS Working Capital Fund.

PPA VI: DEPOT LEVEL MAINTENANCE

	Perm Pos	FTE	Amount
<b>2011 Actual Obligations</b>	...	...	<b>981,619</b>
<b>2012 Enacted Budget Authority</b>	...	...	<b>930,817</b>
2013 Adjustments-to-Base	...	...	(722)
<b>2013 Current Services</b>	...	...	<b>930,095</b>
2013 Program Change	...	...	0
<b>2013 Requested Budget Authority</b>	...	...	<b>930,095</b>
Total Change 2012-2013	...	...	(722)

The Coast Guard requests \$930.1 million for this activity.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

This request provides service-wide funding for the Coast Guard’s depot level operating expense funded maintenance for the Service’s shore facilities, vessels, and aircraft. The Coast Guard maintains its aircraft, vessels, and shore infrastructure using a blend of organic maintenance and repair infrastructure and contracted depot level maintenance activities. A mature project planning and execution program exists within the Coast Guard to provide routine organizational-level and depot level maintenance. Where expertise or infrastructure does not exist organically within the Service, the Coast Guard uses contracted resources to provide the requisite maintenance support.

The Coast Guard’s maintenance planning process involves every level of the organization including: (1) field-level input provided in casualty, mishap, and annual engineering assessments and reports; (2) engineering/support provider input in the form of centrally managed maintenance data/trend analysis, observations of experienced technical/engineering personnel, and prioritization of issues/needs; and (3) Coast Guard Headquarters level involvement in the collation of Coast Guard-wide data/trend analysis, input from the Atlantic and Pacific Area Operational Commanders and their support providers, and development of corrective strategies.

Recognizing the need to sustain and invest resources for in-service assets, the Coast Guard has preserved the depot level maintenance portion of the current services base from reductions and offsets. This funding is vital to ongoing sustainment and support of in-service Coast Guard aircraft; Command, Control, Communications, Computers and Information Technology (C4IT) systems; shore facilities; and vessels:

**Aircraft.** Includes service-wide funding to support programmed depot level maintenance and repair of Coast Guard aircraft. This category includes: materials, services, and supplies necessary for depot level repair, maintenance, modification, and overhaul of aircraft and aircraft equipment, including associated avionics; transportation of aircraft and aeronautical materials and equipment; and procurement and overhaul of aircraft ground handling and support equipment. The request also includes funding for general expenses related to spare parts inventory and engineering design, alteration and modification services in support of Coast Guard aircraft.

This funding request also supports depot level aircraft repair. Coast Guard aircraft are continuously rotated out of operational service to allow for programmed depot maintenance (PDM) at the Aviation Logistics Center (ALC) in Elizabeth City, NC. All PDM is based upon established service standards intended to meet operational availability targets in the most cost effective means possible. The purpose of the aircraft PDM program is to (1) provide periodic inspection of areas of an aircraft which are not accessible without extensive disassembly, (2) perform heavy maintenance which is beyond the capability of operating units, and (3) incorporate configuration changes and modifications which are too extensive or infeasible to perform at the operating unit level.

**Electronics.** Includes funding for depot level maintenance and support of Coast Guard-owned electronic systems. This request includes funding required for the procurement, replacement, installation, major maintenance, and casualty response for electronic navigation, command and control (C2), and communications systems. This category also includes support for the Coast Guard's Command, Control, and Communications Engineering Center (C3CEN) and Telecommunication and Information Systems Command (TISCOM), through the Electronic Support Units and Field Support Divisions to affect system repairs and install upgraded electronics systems on all classes of Coast Guard vessels and boats, and shore facilities including Sectors and Vessel Traffic Services.

**Shore Infrastructure.** Includes service-wide funding for depot level facility maintenance to ensure the safety and integrity of the shore infrastructure, maximize facility economic life, and address facility degradation issues as early as possible to prevent large recapitalization expenses. This request includes funding for depot level maintenance repairs, code compliance, rebuilding, renovations, alterations, demolition activities and related minor improvements, as well as other services provided by the Coast Guard's Civil Engineering program. This category includes support of: Coast Guard-owned land, buildings (e.g., replacement of roofs and mechanical systems), and structures (e.g., repairs to waterfront piers/bulkheads/wharfs/ripraps, communications and navigation system towers, utility systems, emergency generators, fuel systems, roads and runways). It also includes support for fixed Aids to Navigation (AtoN) structures (ashore and afloat) and major non-consumable equipment used to support the Coast Guard's shore plant (e.g., emergency generators, fuel systems, and pressure vessels). Funding also supports depot level maintenance on the Coast Guard's Unaccompanied Personnel Housing (i.e., barracks), family housing, clinics, and morale/well-being and recreational facilities.

**Vessels.** Includes service-wide funding to support the depot level maintenance and repair of Coast Guard vessels. In particular, funding requested will support the procurement, installation, replacement and support of hull, mechanical, electrical, and electronic systems. The request also includes funding for general expenses related to inventory and engineering design, as well as alteration and modification services in support of Coast Guard vessels.

Coast Guard vessels are regularly scheduled for PDM based upon established class maintenance plans (CMP). In addition to ship repair work provided by the Coast Guard Yard in Curtis Bay, MD, the Coast Guard routinely uses ship repair facilities/contractors to complete depot level maintenance via competitive contracts. The Coast Guard manages vessel depot level maintenance funding using Standard Support Levels (SSLs) established for each vessel class of asset at the

time of asset acquisition and adjusts periodically for inflation. Actual expenditures vary from the SSL as the Coast Guard's maintenance managers allocate resources to address the most immediate fleet maintenance challenges. Each year the fleet ages, this becomes a greater challenge.

	Vessel Maintenance	9,015
		<b>54,207</b>

Annualizes funding and 260 FTE to provide full-year resources for new initiatives and programs funded in the prior year.

In consideration of the investment and addition of 55 billets made in FY 2011 above the President's Request, this Budget supports 142 positions associated with the FY 2012 Marine Safety and Marine Environmental Response enhancements. While the blend of Marine

Environmental Response and Marine Safety personnel is different from the original proposal outlined in the FY 2012 Congressional Justification, the proposed staffing in FY 2013 is expected to improve overall performance of the Marine Environmental Response and Marine Safety missions.

<b>FY 2012 Line Items</b>	<b>FTE (Mil)</b>	<b>FTE (Civ)</b>	<b>Recurring Amount (\$000)</b>

<b>PPA II: Civilian Personnel</b>		
	Civilian Pay and Allowances	2,947
		<b>29,989</b>

Provides three quarters of funding for the requested FY 2013 military (1.7 percent) and civilian (0.5 percent) pay raise.

**3. Military Allowances .....\$48,991**

<b>PPA Breakdown - Military Allowances</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel</b>		
	Military Pay and Allowances (Basic Allowance for Housing)	10,268
	Military Health Care	38,723
		<b>48,991</b>

Provides funding to maintain current services and ensure parity of military pay, allowances, and health care with DoD. This request includes additional funding for Basic Allowance for Housing (BAH) changes scheduled to take effect on January 1, 2013, and increased health care costs for military members, dependants, and eligible beneficiaries. Health care costs are forecasted using actuarial projections and include funding for Coast Guard clinics, TRICARE, pharmaceuticals, use of DoD military treatment facilities and Public Health Service physicians serving at Coast Guard medical facilities.

**C. Operating and Maintenance Funds for New Assets**

**1. Shore Facility Follow-On .....\$3,870**

<b>PPA Breakdown - Shore Facility Follow-On</b>		<b>Total (\$000)</b>
<b>PPA VI: Depot Level Maintenance</b>		
	Civil/Ocean Engineering and Shore Facility Maintenance	3,870
		<b>3,870</b>

Provides funding for the incremental costs associated with operation and maintenance of new or improved shore facilities scheduled for completion prior to FY 2013. This funding is required for annual operating costs for energy, utility services, and building and grounds maintenance for the structures and facilities as described in the following table:

<b>Shore Facility Asset/Location</b>	<b>Amount (\$000)</b>
Air Station Cape Cod, MA: MPA Aircraft Hangar	1,527
Station Eatons Neck, NY: Boathouse Maintenance Facility	140
Sector Field Office Galveston, TX: Rebuilt Buildings & Waterfront Facilities	1,023
Station Houston, TX: Multi-Mission Station Facilities	975
Sector Buffalo, NY: Buildings and Supporting Infrastructure	205
<b>Total</b>	<b>3,870</b>

**2. Response Boat - Medium (RB-M) Follow-On .....\$3,058**

<b>PPA Breakdown - Response Boat - Medium (RB-M) Follow-On</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (16 FTP, 8 FTE)</b>		
	Military Pay and Allowances	578
	Military Health Care	74
	Permanent Change of Station	230
<b>PPA II: Civilian Personnel (4 FTP, 2 FTE)</b>		
	Civilian Pay and Allowances	217
<b>PPA III: Training and Recruiting</b>		
	Training and Education	40
	Recruiting and Training Centers	16
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	1st District	10
	9th District	2
	13th District	2
	17th District	2
	Headquarters Directorates	1,183
	Headquarters Units	39
	Other Activities	2
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	89
<b>PPA VI: Depot Level Maintenance</b>		
	Electronics Maintenance	354
	Civil/Ocean Engineering and Shore Facility Maintenance	140
	Vessel Maintenance	80
		<b>3,058</b>

Provides follow-on funding for the operation, maintenance and support of 30 RB-M. The resources requested herein reflect the increased cost of operating and maintaining RB-M relative to operating and maintenance costs of the boats they are replacing, including fuel costs. The increased costs of the RB-Ms are driven primarily by the capability enhancements (e.g., speed, endurance, sensors, etc.) that are required to meet current mission demands. This request also provides funding and personnel for centralized asset logistics support for all RB-M delivered through FY 2013.

**3. WatchKeeper Follow-On.....\$2,261**

<b>PPA Breakdown - WatchKeeper Follow-On</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (2 FTP, 1 FTE)</b>		
	Military Pay and Allowances	59
	Military Health Care	9
	Permanent Change of Station	24
<b>PPA II: Civilian Personnel (1 FTP, 1 FTE)</b>		
	Civilian Pay and Allowances	50
<b>PPA III: Training and Recruiting</b>		
	Training and Education	77
	Recruiting and Training Centers	154
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	Atlantic Area	11
	Headquarters Directorates	300
	Headquarters Units	1,502
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	15
<b>PPA VI: Depot Level Maintenance</b>		
	Civil/Ocean Engineering and Shore Facility Maintenance	60
		<b>2,261</b>

Provides second year follow-on funding to operate and maintain the capabilities of Watchkeeper procured under the Interagency Operations Centers (IOC) acquisition project.

The Coast Guard continues to deploy WatchKeeper to facilitate daily decision making, situational awareness, operations monitoring, and joint planning. Critical support funded by this initiative includes WatchKeeper system management and support, WatchKeeper training simulator upgrades, and capacity to support increased student training. Additionally, the three requested personnel will be assigned as Command Center School instructors and will utilize WatchKeeper as the primary training tool for practical exercises contained within the curriculum.

**4. Rescue 21 (R21) Follow-On.....\$1,448**

<b>PPA Breakdown - Rescue 21 (R21) Follow-On</b>		<b>Total (\$000)</b>
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	Headquarters Directorates	19
	Headquarters Units	1,319
<b>PPA VI: Depot Level Maintenance</b>		
	Electronics Maintenance	64
	Civil/Ocean Engineering and Shore Facility Maintenance	46
		<b>1,448</b>

Provides follow-on funding to support R21, the Coast Guard's primary system that facilitates command, control, and communications in the U.S. coastal zone, and replaces the legacy National Distress Response System. R21 is a key enabler for effective emergency response in the maritime domain. Funding supports equipment Operations and Maintenance (O&M), disaster recovery system capability (backup equipment for use in the event of damage to permanently installed towers or other Rescue 21 equipment), and over-the-air re-keying capability, which improves system security.

The R21 system reached Initial Operating Capability (IOC) in December 2005. By the end of FY 2012, the prime contractor will have delivered the Rescue 21 system to 30 of 35 Coast Guard Sectors, providing approximately 41,871 miles of continuous coastline coverage along the Eastern Seaboard, Gulf Coast, West Coast, Great Lakes, Hawaii, Guam, and San Juan, Puerto Rico.

The FY 2013 request provides funding to support operation and maintenance of the R21 System in Sector Sault Ste. Marie and Sector Lake Michigan.

**5. Surface and Air Asset Follow-On.....\$37,001**

<b>PPA Breakdown - Surface and Air Asset Follow-On</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (186 FTP, 106 FTE)</b>		
	Military Pay and Allowances	7,064
	Military Health Care	1,000
	Permanent Change of Station	2,420
<b>PPA II: Civilian Personnel (38 FTP, 21 FTE)</b>		
	Civilian Pay and Allowances	2,235
<b>PPA III: Training and Recruiting</b>		
	Training and Education	4,440
	Recruiting and Training Centers	1,090
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	Atlantic Area	188
	Pacific Area	5
	1st District	2,403
	7th District	849
	8th District	105
	Headquarters Directorates	1,149
	Headquarters Units	172
	Other Activities	22
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	2,340
<b>PPA VI: Depot Level Maintenance</b>		
	Aircraft Maintenance	9,764
	Electronics Maintenance	373
	Civil/Ocean Engineering and Shore Facility Maintenance	8
	Vessel Maintenance	1,374
		<b>37,001</b>

Surface and air assets provide the Coast Guard with the foundational capability necessary to perform its statutory missions. Funding is requested to operate and maintain new assets that will transition from the acquisition program to the operations in FY 2013 or to prepare crews in advance of that transition.

**Fast Response Cutter (FRC) O&M for hulls 8 and 9 (\$3.294M):** Provides operation and maintenance funding for Key West, FL-based FRCs, hulls #8 and #9. The FRC is larger and more capable than the 110-foot patrol boat with advanced electronics and enhanced capabilities. This platform sustains the Coast Guard’s high speed, coastal capability for prosecuting immigrations laws, enforcing border security, preventing terrorism and ensuring resiliency to disasters. The FRC will also provide improved interoperability, C4ISR, common operating picture, and sensors to enhance surveillance and identification.

**Fast Response Cutter (FRC) Crews 9 and 10 (\$4.731M/67FTP/35FTE):** Provides personnel to operate and maintain Key West, FL-based FRC hulls #9 and #10. Advance arrival of the crews is critical to ensure appropriate training and readiness prior to delivery.

**FRC Follow-on Support (\$4.819M/65FTP/33FTE):** Provides personnel for shore-side support for FRCs homeported in Key West, FL. These billets will fully staff the Maintenance Augmentation Team (MAT) for the Key West homeport. In addition, FRC support personnel are provided for the Asset Program Office (APO) and Surface Forces Logistics Center (SFLC) that provide centralized support for the entire FRC fleet.

**Cutter Asset Training System (\$1.559M/11FTP/6FTE):** Provides personnel and funding necessary for Coast Guard Training System courses identified in the Master Training List for the National Security Cutter (NSC) and the Fast Response Cutter (FRC). The requested personnel and funding support training on ship-specific systems to ensure crew performance standards are achieved. These personnel and funding are required to operate and maintain training and simulation systems, develop curricula, and conduct human performance and training analysis. The resources will ensure the Coast Guard fulfills the training requirements for the crews and personnel that will operate and maintain newly acquired NSCs and FRCs.

**HC-144A Aircraft Follow-on (\$18.333M/68FTP/46FTE):** Provides funding for the operation and maintenance of Maritime Patrol Aircraft (HC-144A) #14 and #15, and funding for personnel to operate and support aircraft #15 and #16. In addition, this proposal provides funding for personnel at the HC-144A aircraft Sensor/C4ISR Operator Training Division and Coast Guard Aviation Training Center to ensure sensor doctrine, training and standardization requirements are met.

**Air Station Cape Cod Transition (\$3.515M/13FTP/7FTE):** In FY 2013, Coast Guard Air Station Cape Cod will transition from operating HU-25 aircraft to operating HC-144A aircraft, a change from a medium low-wing fanjet aircraft to a high-wing turboprop patrol and transport aircraft. This request provides personnel and funding necessary to complete a change in aircraft type allowance, and programmed utilization rates. Funding will provide additional cargo weighing and loading equipment, lavatory service vehicles, larger aircraft check-stands, propeller dollies and engine stands, and larger aircraft tow tractors.

**HC-130H Flight Simulator Training (\$.750M):** Provides follow-on funding to support aircraft simulator training for HC-130H pilots, flight engineers, and navigators. The Coast Guard's AC&I funded HC-130H conversion and sustainment project will change the configuration of these aircraft by upgrading avionics systems cockpit instruments. This flight simulation trainer will replicate the operation of the reconfigured aircraft, allowing flight crews to attain qualifications and maintain proficiency operating with the upgraded HC-130H flight systems.

**D. Base Re-Allocations (Non-Add)**

**1. Balanced Workforce Strategy Follow-On .....[\$3,485]**

<b>PPA Breakdown - Balanced Workforce Strategy Follow-on</b>		<b>Total (\$000)</b>
<b>PPA II: Civilian Personnel (33 FTP, 33 FTE)</b>		
	Civilian Pay and Allowances	3,405
<b>PPA III: Training and Recruiting</b>		
	Training and Education	25
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	Headquarters Units	(3,485)
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	55
		<b>0</b>

This line item accounts for the in-sourcing of 33 positions from a prior-year initiative that in-sourced the screening of security clearance applications.

**2. Military FTP and FTE Transfer to Civilian.....[\$5,331]**

<b>PPA Breakdown - Military FTP and FTE Transfer to Civilian</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (-50 FTP, -50 FTE)</b>		
	Military Pay and Allowances	(4,452)
	Military Health Care	(464)
	Permanent Change of Station	(327)
<b>PPA II: Civilian Personnel (50 FTP, 50 FTE)</b>		
	Civilian Pay and Allowances	5,289
<b>PPA III: Training and Recruiting</b>		
	Training and Education	(88)
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	Headquarters Directorates	42
		<b>0</b>

Transfers 50 military FTP/FTE to civilian FTP/FTE. These conversions are consistent with GAO recommendations to change military positions funded in PPA I (military Pay and Allowances) with inherently civilian job functions to civilian positions funded in PPA II (Civilian Pay and Benefits).

**3. Reclassification of Reimbursable FTE to Direct FTE .....[\$1,807]**

<b>PPA Breakdown - Reclassification of Reimbursable FTE to Direct FTE</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (1 FTP, 1 FTE)</b>		
	Military Pay and Allowances	[59]
	Military Health Care	[9]
	Permanent Change of Station	[5]
<b>PPA II: Civilian Personnel (12 FTP, 12 FTE)</b>		
	Civilian Pay and Allowances	[1,723]
<b>PPA III: Training and Recruiting</b>		
	Training and Education	[11]
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
		<b>[1,807]</b>

Reclassifies positions previously encompassed by a reimbursable agreement between the Coast Guard and Environmental Protection Agency to direct funded FTE.

**Decreases** **(\$181,568)**

**A. Termination of One Time Costs** ..... **(\$18,309)**

<b>PPA Breakdown - Termination of One-Time Costs</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel</b>		
	Permanent Change of Station	(5,347)
<b>PPA III: Training and Recruiting</b>		
	Training and Education	(1,916)
	Recruiting and Training Centers	(58)
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	Atlantic Area	(188)
	Pacific Area	(711)
	1st District	(51)
	7th District	(253)
	9th District	(53)
	11th District	(59)
	13th District	(34)
	14th District	(25)
	17th District	(34)
	Headquarters Directorates	(4,360)
	Headquarters Units	(144)
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	(1,110)
<b>PPA VI: Depot Level Maintenance</b>		
	Civil/Ocean Engineering and Shore Facility Maintenance	(3,966)
		<b>(18,309)</b>

This line item reflects FY 2013 savings associated with the termination of one-time costs for program start-up and exit transactions anticipated in FY 2012.

<b>FY 2012 Line Items</b>	<b>Non-Recurring Amount (\$000)</b>
Response Boat - Medium (RB-M) Maintenance Follow-On	(137)
Interagency Operations Centers (IOC) Follow-On	(328)
Nationwide Automatic Identification System (NAIS) Follow-On	(84)
Surface and Air Asset Follow-On	(5,781)
Three PC-179s	(1,324)
Decommission High Endurance Cutter (HEC)	(2,582)
Enhancing Marine Safety	(3,021)
Enhancing Marine Environmental Response	(3,193)
Child Care Initiative	(368)
Tactical Boat Crew Training	(1,491)
<b>Total</b>	<b>(18,309)</b>

**B. Prior Year Management Annualizations ..... (\$10,996)**

<b>PPA Breakdown - Prior Year Management Annualizations</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (-92 FTE)</b>		
	Military Pay and Allowances	(5,377)
	Military Health Care	(859)
	Permanent Change of Station	(1,471)
<b>PPA III: Training and Recruiting</b>		
	Training and Education	(155)
	Recruiting and Training Centers	(128)
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>

	Central Accounts	(294)
<b>PPA VI: Depot Level Maintenance</b>		
	Electronics Maintenance	(112)
	Vessel Maintenance	(825)
		<b>(10,996)</b>

This line item annualizes part-year reductions from various asset decommissionings in FY 2012.

<b>FY 2012 Line Items</b>	<b>FTE (Mil)</b>	<b>FTE (Civ)</b>	<b>Recurring Amount (\$000)</b>
Three PC-179s	0	0	(512)
Decommission High Endurance Cutter (HEC)	(92)	0	(10,484)
<b>Total</b>	<b>(92)</b>	<b>0</b>	<b>(10,996)</b>

**C. Asset Decommissionings**

**1. Patrol Boat High Tempo High Maintenance (HTHM) Operations .....(\$33,495)**

<b>PPA Breakdown - Patrol Boat High Tempo High Maintenance (HTHM) Operations</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (-200 FTP, -200 FTE)</b>		
	Military Pay and Allowances	(12,383)
	Military Health Care	(1,855)
	Permanent Change of Station	1,487
<b>PPA II: Civilian Personnel (-6 FTP, -6 FTE)</b>		
	Civilian Pay and Allowances	(701)
<b>PPA III: Training and Recruiting</b>		
	Training and Education	(391)
	Recruiting and Training Centers	(283)
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	Atlantic Area	(192)
	7th District	(2,337)
	Headquarters Directorates	(3,260)
	Headquarters Units	(19)
	Other Activities	(35)
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	(382)
<b>PPA VI: Depot Level Maintenance</b>		
	Electronics Maintenance	(570)
	Civil/Ocean Engineering and Shore Facility Maintenance	(2)
	Vessel Maintenance	(12,572)
		<b>(33,495)</b>

Disestablishes the High Tempo High Maintenance (HTHM) program for eight in-service 110-foot patrol boats. The HTHM program was a temporary bridging strategy that approximately doubled the normal programmed resource hours for these eight assets through use of multiple crews and a unique maintenance and operating construct until new, more capable FRCs are delivered. The eight 110-foot patrol boats will return to their pre-HTHM operational tempo.

**2. Three 110-Patrol Boats.....(\$1,977)**

<b>PPA Breakdown - Three 110-Patrol Boats</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (-70 FTP, -35 FTE)</b>		
	Military Pay and Allowances	(2,048)
	Military Health Care	(326)
	Permanent Change of Station	479
<b>PPA III: Training and Recruiting</b>		
	Training and Education	(69)
	Recruiting and Training Centers	(48)
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	1st District	(83)
	7th District	(146)
	Headquarters Directorates	(321)
	Headquarters Units	(33)
	Other Activities	(8)
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	(178)
<b>PPA VI: Depot Level Maintenance</b>		
	Electronics Maintenance	(24)
	Vessel Maintenance	828
		<b>(1,977)</b>

Decommission three 110' WPB patrol boats and associated shoreside support. These assets will be replaced with operational FRCs in the Seventh Coast Guard District. The Coast Guard will re-invest the savings from decommissioning three legacy patrol boats, crews and support personnel to support the operation and maintenance of the more capable FRCs. With eight FRCs scheduled for delivery through 2013, these decommissioning actions will begin the transition of the in-service WPB fleet to the new FRC fleet. The temporary loss of patrol boat hours will be mitigated as new, more capable FRCs are delivered.

**3. Two High Endurance Cutters (HEC) .....(\$16,832)**

<b>PPA Breakdown - Two High Endurance Cutters (HEC)</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (-389 FTP, -241 FTE)</b>		
	Military Pay and Allowances	(13,639)
	Military Health Care	(2,224)
	Permanent Change of Station	2,877
<b>PPA II: Civilian Personnel</b>		
	Civilian Pay and Allowances	1,723
<b>PPA III: Training and Recruiting</b>		
	Training and Education	(461)
	Recruiting and Training Centers	(351)
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	Atlantic Area	(638)
	Pacific Area	(983)
	7th District	(3)
	11th District	(4)
	Headquarters Directorates	(1,995)
	Headquarters Units	356
	Other Activities	(50)
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	(697)
<b>PPA VI: Depot Level Maintenance</b>		
	Electronics Maintenance	1,320
	Vessel Maintenance	(2,063)
		<b>(16,832)</b>

Decommissions two High Endurance Cutters (HEC) and associated shore-side support in FY 2013 (fourth and fifth HEC of the original 12 HEC fleet). With the average cutter age at 43 years, the HEC fleet has become increasingly difficult to maintain and sustain operationally. The fourth NSC is under production and scheduled for delivery in fourth quarter of FY 2014, and the fifth NSC is under contract and scheduled for delivery in FY 2016. The temporary loss of major cutter hours will be mitigated as new, more capable NSCs are delivered.

Decommissions two High Endurance Cutters (HEC) and associated shore-side support in FY 2013 (fourth and fifth HEC of the original 12 HEC fleet). With the average cutter age at 43 years, the HEC fleet has become increasingly difficult to maintain and sustain operationally. The fourth NSC is under production and scheduled for delivery in fourth quarter of FY 2014, and the fifth NSC is under contract and scheduled for delivery in FY 2016. The temporary loss of major cutter hours will be mitigated as new, more capable NSCs are delivered.

**4. Three HU-25 Aircraft.....(\$5,514)**

<b>PPA Breakdown - Three HU-25 Aircraft</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (-39 FTP, -20 FTE)</b>		
	Military Pay and Allowances	(1,501)
	Military Health Care	(181)
	Permanent Change of Station	349
<b>PPA III: Training and Recruiting</b>		
	Training and Education	(308)
	Recruiting and Training Centers	(25)
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	1st District	(1,545)
	Other Activities	(4)
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	(66)
<b>PPA VI: Depot Level Maintenance</b>		
	Aircraft Maintenance	(2,233)
		<b>(5,514)</b>

Retires the three remaining HU-25 aircraft assigned to Coast Guard Air Station (CGAS) Cape Cod to allow for complete transition to the new HC-144A aircraft. The Coast Guard retired the first of four HU-25s assigned to CGAS Cape Cod in FY 2011. In FY 2013, the Coast Guard will deliver and place in full-operational status three HC-144A aircraft at CGAS Cape Cod. These three aircraft will provide more flight hours per year than the four retired HU-25s provided annually. Delivery of a fourth HC-144A aircraft at CGAS Cape Cod is planned in FY 2015.

Following retirement of these three HU-25 aircraft assigned to CGAS Cape Cod, the Coast Guard will have three remaining HU-25s in-service and assigned to Air Station Corpus Christi, TX, that are planned to be retired by FY 2015.

**5. Seasonal Air Facilities .....(\$5,201)**

<b>PPA Breakdown - Seasonal Air Facilities</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (-68 FTP, -34 FTE)</b>		
	Military Pay and Allowances	(2,384)
	Military Health Care	(709)
	Permanent Change of Station	831
<b>PPA III: Training and Recruiting</b>		
	Training and Education	(265)
	Recruiting and Training Centers	(44)
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	5th District	(47)
	9th District	(683)
	Headquarters Directorates	(572)
	Other Activities	(7)
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	(86)
<b>PPA VI: Depot Level Maintenance</b>		
	Aircraft Maintenance	(1,235)
		<b>(5,201)</b>

Provides for more efficient mission execution by transitioning operating aircraft at Air Station Traverse City, MI from five H-65 to three H-60 rotary wing aircraft, in conjunction with closing two seasonal Air Facilities (AIRFACS) in Muskegon, MI and Waukegan, WI. The H-60 aircraft provide increased operational capability in the Great Lakes region over the currently assigned H-65 aircraft. The H-60 helicopter has nearly double the flight time endurance of the H-65, thereby enabling additional operational range for all missions in the Great Lakes region. Additionally, the H-60 has superior operating capabilities in cold-weather over H-65s. Specifically, the H-60 helicopter has the ability to fly in icing conditions, an atmospheric condition present in the Traverse City Area of Responsibility for up to five months of the year.

Two H-60 helicopters, which currently support Operation Bahamas Turks and Caicos (OPBAT), will be reallocated from Air Station Clearwater, FL. One H-60, which currently supports the Maritime Security Response Team, will be reallocated from Air Station Elizabeth City, NC.

In addition to current-year savings, this proposal will achieve nearly \$37 million in cost avoidance by enabling the Coast Guard to re-purpose two H-65 aircraft from Air Station Traverse City; replacing aircraft lost during operational mishaps and precluding the need to procure new aircraft. Of the remaining three H-65 aircraft removed from Air Station Traverse City, two will be used as maintenance/operational spares, and one will be sent to long-term storage.

**D. Enterprise-Wide Efficiencies .....(\$56,299)**

<b>PPA Breakdown - Enterprise-Wide Efficiencies</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (-18 FTP, -9 FTE)</b>		
	Military Pay and Allowances	(634)
	Military Health Care	(540)
	Permanent Change of Station	(13,773)
<b>PPA II: Civilian Personnel (-30 FTP, -15 FTE)</b>

Information Technology (IT)	0	0	(6,800)
<b>Total</b>	<b>(48)</b>	<b>(24)</b>	<b>(56,299)</b>

In FY 2013, the Coast Guard will drive efficiencies in targeted areas to sustain front-line operations, perform critical depot level maintenance activities on assets, continue fleet recapitalization, and fund higher priority Service requirements. Specifically, the Coast Guard will implement efficiencies in the following areas:

Directed Purchasing/Professional Services: Reduces the use of service contracts for enterprise-wide mission support and operational support activities. The Coast Guard will target the lowest priority activities to implement this reduction. Among the activities targeted for savings is development of external publications and documents.

Logistics Functions: Consolidates and centralizes administrative, personnel support, supply and logistics functions at Base Support Units throughout the Coast Guard for co-located, but organizationally distinct units and activities. The consolidation of these logistics functions enables similar functions (i.e. human resources and personnel record management, inventory and supply, facility operation and management, health care administration, shipping/receiving) to be performed by fewer personnel at locations where Coast Guard personnel and activities are collocated.

Strategic Sourcing: Optimizes the purchase of supplies and materials through more efficient use of supply chain operations, including centralized buying, bulk purchasing, and leveraging reduced pricing schedules from suppliers.

Civilian Overtime: Reduces civilian overtime across the entire Coast Guard for activities that are not directly related to the execution of front-line operations.

PCS Transfers: Reduces the number of Permanent Change of Station (PCS) moves through the implementation of new reassignment processes for military members. This initiative will increase tour-lengths for certain positions, and maximize, to the extent possible, consecutive assignments within the same geographic area to minimize transfer costs. The Coast Guard will carefully manage personnel transfers to prevent limits on a military member's ability to gain geographically diverse experiences or professional growth opportunities across a member's career.

Non-Operational Travel: Reduces non-operational travel related to professional development, off-site meetings, conferences, attending industry sponsored activities, external engagements, unit/site visits, and international engagements.

Vehicle Fleet: Extends the minimum replacement cycle of Coast Guard owned vehicles to at least eight years. This initiative will also reduce the number of GSA leased vehicles in the Coast Guard's vehicle fleet, and leverage smaller, less expensive vehicles where feasible to minimize costs. This initiative also garners savings by extending the in-service life of certain Coast Guard owned vehicles, including fire trucks and base/facility maintenance vehicles.

Information Technology (IT): Reduces support levels for the operation and maintenance of enterprise IT systems, including command, control, communications, and computers systems; and infrastructure. The Coast Guard will implement these reductions in a manner that mitigates impacts to system and network performance for Coast Guard assets.

**E. Programmatic Reductions.....(\$32,945)**

<b>PPA Breakdown - Programmatic Reductions</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (-335 FTP, -170 FTE)</b>

<b>Total</b>	<b>(479)</b>	<b>(264)</b>	<b>(32,945)</b>

In FY 2013, the Coast Guard will make targeted reductions in several base program areas. These base adjustments recognize changes in requirements for selected activities and redirect resources toward higher-priorities, including critical recapitalization projects and essential frontline operations.

Headquarters Staffing: Eliminates 222 positions at Coast Guard Headquarters through attrition and implementation of a civilian hiring freeze in the Washington, D.C. area; a small portion of these positions are currently vacant. This reduction to Coast Guard Headquarters preserves the Coast Guard's critical capabilities to conduct front-line operations; mission support; development and implementation of national policies and regulations; and the capacity to complete and respond to reports, audits, questions for the record, inquiries, and informal requests for information. The Coast Guard will centralize functions, eliminate, scale or shift workload at work centers, and leverage technology and IT systems to increase productivity and accomplish work more efficiently.

Organizational Performance Consultants: Reduces District capacity by 25 positions designated to provide the Coast Guard with strategic planning, professional leadership and management, and process improvement training. The Coast Guard will still maintain this core capability, centralized at the Headquarters level.

Airborne Use of Force Capacity: Reduces Airborne Use of Force (AUF) capability for Ports, Waterways, and Coastal Security (PWCS) missions at six aviation units and centralizes this high-end PWCS AUF capability on each coast. This initiative consolidates AUF PWCS capability at Elizabeth City, NC; and San Diego, CA with corresponding elimination of AUF programs at the following Air Stations: Air Station Cape Cod, MA; Air Station Clearwater, FL; Air Station Houston, TX; Air Station Kodiak, AK; Air Station Port Angeles, WA and Air Station San Francisco, CA. Based on lessons learned from use of the AUF capability to perform PWCS missions, the Coast Guard has determined from an overall risk perspective that the highest operational return on investment is to centralize this capability.

Non-Reimbursable Detached Duty Positions: Reduces 36 non-reimbursable Detached Duty-External (DDE) positions, targeting the lowest-priority of these external positions based on current mission priorities and an assessment of the most pressing needs.

Military Recruiting: Reduces the military workforce recruiting program by 77 positions based on near-term workforce accession projections. The Coast Guard will reallocate remaining recruiters across all regions throughout all traditional recruiting territories to prevent any negative impact to the Coast Guard's successful efforts to recruit a diverse workforce.

Selective Reenlistment Bonus: Reduces funding programmed for active duty military selective re-enlistment bonuses. The need for incentive pay targeting traditionally hard-to-fill specialties is projected to be limited in the near-term given the current employment outlook, reducing the need to utilize this workforce management tool in FY 2013.

Mobile Training: Eliminates 16 positions from the Mobile Training Team and reorganizes this program, which provides assistance and training to international partners in the areas of national defense, homeland security, and maritime prevention. The impact of this reduction will be partially mitigated by augmenting the Mobile Training Team remaining core personnel with Coast Guard personnel attached to other units on a temporary-duty basis to deploy and assist with training missions.

Vintage Vessel National Center of Expertise: Disestablishes the four-person Vintage Vessel National Center of Expertise (VVNCOE). The VVNCOE provides training and qualification programs for marine inspectors that perform deep draft vessel hull and machinery inspections for vintage vessels. The duties performed by these four positions will be assumed primarily by other Sector personnel within the Ninth Coast Guard District.

Coast Guard Intelligence: Eliminates 57 Intelligence-related positions, including administrative support and Coast Guard Criminal Investigative Service billets from across the Coast Guard. The Coast Guard Intelligence program has grown by 800 positions over the last 10 years. This initiative eliminates positions at Coast Guard Headquarters, Areas, Districts, and Maritime Intelligence Fusion Centers; Intelligence Coordination Center; Deployable Operations Group; Coast Guard Investigative Service; Cryptologic Group, and the El Paso Intelligence Center. This reduction seeks to minimize impacts to tactical-level operational units.

#### IV. Program Justification of Changes

**Department of Homeland Security  
U. S. Coast Guard  
Operating Expenses  
Justification of Program Changes  
(Dollars in thousands)**

**Program Changes** **\$24,500**

---

**A. DHS Headquarters Consolidation**.....**\$24,500**

<b>PPA Breakdown - DHS Headquarters Consolidation</b>		<b>Total (\$000)</b>
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	Headquarters Directorates	4,200
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	20,300
		<b>24,500</b>

**Description of Item**

Provides funding to support the Coast Guard’s relocation to the St. Elizabeths Campus in Washington, DC. The requested FY 2013 funding supports relocation of Coast Guard equipment, employees, and work functions to the DHS consolidated headquarters at St. Elizabeths. The new Coast Guard facilities at St. Elizabeths include office space, employee shared spaces, parking, and the Department Operations Center (Phase A), which will be tied into the National Operations Center during a subsequent phase of the DHS headquarters consolidation project.

**Justification**

The Coast Guard’s move from Buzzards Point to St. Elizabeths is part of Phase 1 of the DHS headquarters consolidation project, and supports development of a “one-DHS” culture and directly enhances DHS unity of effort and organizational efficiency.

**Impact on Performance**

The Department’s overarching plan to consolidate DHS components and activities at the Saint Elizabeths campus will enhance operational effectiveness and generate synergy between DHS entities.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security**  
**U. S. Coast Guard**  
**Justification of Proposed Changes in Operating Expenses**  
**Appropriation Language**

For necessary expenses for the operation and maintenance of the Coast Guard, not otherwise provided for; purchase or lease of not to exceed 25 passenger motor vehicles, which shall be for replacement only; purchase or lease of small boats for contingent and emergent requirements (at a unit cost of no more than \$700,000) and repairs and service-life replacements, not to exceed a total of \$31,000,000; purchase or lease of boats necessary for overseas deployments and activities; minor shore construction projects not exceeding \$1,000,000 in total cost [at any location] on any asset; payments pursuant to section 156 of Public Law 9709377 (42 U.S.C. 402 note; 96 Stat. 1920); and recreation and welfare; [\$7,051,054,000] \$6,791,178,000, of which [\$598,000,000] \$340,000,000 shall be for defense-related activities[, of which \$256,000,000 is designated by the Congress for Overseas Contingency Operations/Global War on Terrorism pursuant to section 251(b)(2)(A) of the Balanced Budget and Emergency Deficit Control Act of 1985]; of which \$24,500,000 shall be derived from the Oil Spill Liability Trust Fund to carry out the purposes of section 1012(a)(5) of the Oil Pollution Act of 1990 (33 U.S.C. 2712(a)(5)); and of which not to exceed \$17,000 shall be for official reception and representation expenses: *Provided*, That none of the funds made available by this Act shall be for expenses incurred for recreational vessels under section 12114 of title 46, United States Code, except to the extent fees are collected from owners of yachts and credited to this appropriation[: *Provided further*, That the Coast Guard shall comply with the requirements of section 527 of the National Defense Authorization Act for Fiscal Year 2004 (10 U.S.C. 4331 note) with respect to the Coast Guard Academy: *Provided further*, That of the funds provided under this heading, \$75,000,000 shall be withheld from obligation for Coast Guard Headquarters Directorates until a revised future-years capital investment plan for fiscal years 2013 through 2017, as specified under the heading Coast Guard "Acquisition, Construction, and Improvements" of this Act is submitted to the Committees on Appropriations of the Senate and the House of Representatives: *Provided further*, That funds made available under this heading for Overseas Contingency Operations/Global War on Terrorism may be allocated by program, project, and activity, notwithstanding section 503 of this Act].  
(*Consolidated Appropriations Act, 2012.*)

## PPA I Mission Statement

This PPA requests funding for expenses related to compensation for active duty military personnel. This category also includes pay, allowances, employer's share of FICA, Social Security credits and other expenses associated with compensating military personnel. Requested funding will compensate military personnel as they serve the Nation across all of the Coast Guard's eleven statutory missions in support of the Coast Guard's six FYHSP Programs.

### Summary Justification and Explanation of Changes

#### Salaries and Benefits

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 2,793,181	\$ 2,916,934	\$ 2,851,957	\$ (64,977)

Salaries and benefits provide funds for compensation directly related to duties performed for the Coast Guard by active duty military personnel. The FY 2013 request reflects funding for the proposed pay raise (1.7 percent), medical benefits, and other mandatory personnel entitlements. Personnel increases include personnel to operate new systems and assets, including the Fast Response Cutter (FRC), HC-144A, Response Boat-Medium (RB-M), and Interagency Operation Centers. Personnel reductions include the decommissioning of three 110' patrol boats, two High Endurance Cutters, disestablishment of HTHM patrol boat operations, retirement of three HU-25 aircraft, closure of two seasonal air facilities, and programmatic reductions.

#### Travel

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 88,328	\$ 81,021	\$ 75,496	\$ (5,525)

Requested funds cover the travel costs of Coast Guard military service members, while in an authorized travel status, either directly or by reimbursing the traveler. Funding also supports the shipment of military member's household goods in conjunction with Permanent Change of Station (PCS) moves. The FY 2013 request reflects decreases in funding allotted for PCS travel costs, including costs associated with decommissionings or delivery of new assets, or reductions that are part of enterprise-wide efficiencies.

#### Transportation of things

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 64,255	\$ 60,885	\$ 57,031	\$ (3,854)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding primarily supports the shipment of military member's household goods in conjunction with Permanent Change of Station (PCS) moves. The FY 2013 request includes funding for PCS travel costs, including PCS costs for the crews associated with delivery of new assets, including the Fast Response Cutter (FRC), HC-144A, and reductions that are part of enterprise-wide efficiencies.

**Other rent**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 5,633</b>	<b>\$ 1,253</b>	<b>\$ 234</b>	<b>\$ (1,019)</b>

Other rent includes all payments to a non-Federal source for rental space, land and structures. Funding supports lease renewals for facilities (e.g., office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). The FY 2013 request reflects decreases as part of program reductions.

**Other services**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 49,899</b>	<b>\$ 14,892</b>	<b>\$ 6,007</b>	<b>\$ (8,885)</b>

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The request reflects a reduction associated with the military to civilian position conversion.

**Purchases of goods & svcs. from gov't accounts**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 30,824</b>	<b>\$ 31,317</b>	<b>\$ 31,473</b>	<b>\$ 156</b>

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements. The FY 2013 request reflects decreases as part of programmatic reductions such as the Organizational performance Consultants.

**Medical care**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 301,670</b>	<b>\$ 320,512</b>	<b>\$ 348,307</b>	<b>\$ 27,795</b>

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. Specifically, funding supports medical care costs for military service members. The request includes actuary-forecasted cost increases associated with the existing workforce, and changes in FTE through FY 2013 adjustments to base.

**Supplies and materials**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 55,276</b>	<b>\$ 44,554</b>	<b>\$ 44,643</b>	<b>\$ 89</b>

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. There is no significant change in the FY 2013 request.

**Insurance claims and indemnity**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 1,761</b>	<b>\$ 447</b>	<b>\$ 447</b>	<b>\$ -</b>

The FY 2013 request has no change.

## PPA II Mission Statement

This PPA requests funding for expenses related to compensation and entitlements for Federal civilian employees. The workforce is composed of General Schedule (GS) personnel, Administrative Law Judges (AL), Senior Executive Service (SES) personnel, personnel whose salaries are Administratively Determined (AD) (e.g., Coast Guard Academy civilian faculty members), Wage Grade (WG) positions employed in industrial positions, and "Non-Ceiling" (NC) employees (e.g., cooperative education students, student aids, summer interns and Federal junior fellows) and civilian employees not otherwise covered by other PPAs.

### Summary Justification and Explanation of Changes

#### Salaries and Benefits

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 720,482	\$ 778,157	\$ 787,735	\$ 9,578

Salaries and benefits funds provide for compensation directly related to duties performed for the Coast Guard by Federal civilian employees. The FY 2013 request includes funding for a pay raise (0.5 percent) and civilian personnel increases associated with the addition of personnel to support new systems and assets including the FRC, the HC-144A and the cutter asset training system. This request also includes medical benefits, and other mandatory personnel entitlements.

#### Travel

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 347	\$ 300	\$ 300	\$ -

Requested funds cover the travel costs of Coast Guard civilian employees, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2013 request has no change.

#### Transportation of things

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 3,079	\$ 2,095	\$ 2,095	\$ -

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding primarily supports the shipment of civilian personnel's household goods in conjunction with the acceptance of a new position. The FY 2013 request has no change.

### PPA III Mission Statement

Requests funding for the Coast Guard's professional training and education programs, and operation and maintenance of the six Coast Guard Training Centers and the Coast Guard Academy. Provides funding for tuition, travel and per diem for formal training and education performed as Temporary Assigned Duty (TAD) for military and civilian personnel. "Formal training and education" is defined as structured, curriculum-based instruction and applied exercises for the attainment and retention of skills and knowledge required to accomplish specific job tasks. Requested funding will ensure a level of capabilities and competencies commensurate with the response posture the Coast Guard has displayed in recent years, such as operational responses Overseas Contingency Operations, Hurricanes Katrina and Irene, the earthquake in Haiti, Deepwater Horizon oil spill, 2011 Western Rivers floods, and other events requiring a rapid response capability.

### Summary Justification and Explanation of Changes

#### Travel

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 42,705	\$ 42,956	\$ 43,689	\$ 733

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. The travel request for FY 2013 includes funding derived from additional operational training requirements resulting from additional personnel to operate and maintain the Fast Response Cutters, Response Boats-Medium, and HC-144A aircraft.

#### Transportation of things

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 903	\$ 846	\$ 846	\$ -

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2013 request has no change.

#### Other rent

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 4,998	\$ 4,682	\$ 4,682	\$ -

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2013 request has no change.

#### Communication, utilities, and misc charges

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 9,369	\$ 9,267	\$ 8,725	\$ (542)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The decrease is an artifact of the display which includes OCO obligations for FY 2012, but not FY 2013.

**Printing and reproduction**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 909</b>	<b>\$ 688</b>	<b>\$ 688</b>	<b>\$ -</b>

Includes printing and reproduction costs. The FY 2013 request has no change.

**Advisory and assistance services**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 17,670</b>	<b>\$ 13,358</b>	<b>\$ 11,676</b>	<b>\$ (1,682)</b>

Advisory and assistance services include services acquired by contract from non-Federal sources (e.g., private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The FY 2013 request reflects the net result of annualization of prior year management efficiencies, decommissioning of three 110' patrol boats, two High Endurance Cutters, disestablishment of patrol-boat HTHM operations, enterprise-wide efficiencies, and surface and air asset follow-on costs.

**Other services**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 85,178</b>	<b>\$ 90,759</b>	<b>\$ 86,214</b>	<b>\$ (4,545)</b>

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. The FY 2013 request reflects the net result of annualization of prior year management efficiencies, decommissioning of three 110' patrol boats, two High Endurance Cutters, disestablishment of patrol-boat HTHM operations, retirement of three HU-25 aircraft, enterprise-wide efficiencies, and surface and air asset follow-on costs.

**Operation & maintenance of facilities**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 9,587</b>	<b>\$ 12,844</b>	<b>\$ 12,788</b>	<b>\$ (56)</b>

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g., hazardous materials disposal) associated with the operation of Coast Guard facilities. The FY 2013 request reflects the net result of operating costs associated with surface asset training systems and enterprise-wide efficiencies.

**Operation and maintenance of equipment**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ -	\$ 2,593	\$ 2,674	\$ 81

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g., cutters, boats, and aircraft, C4IRS) and supporting systems. The FY 2013 request reflects operation of surface asset training systems.

**Subsistence and support of persons**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ -	\$ -	\$ 17	\$ 17

The FY 2013 request reflects transitioning Air Station Cape Cod to the operation of HC-144A aircraft.

**Supplies and materials**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ 41,986	\$ 39,385	\$ 35,890	\$ (3,495)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational, training and shore support units. The FY 2013 request reflects the net result of annualization of prior year management efficiencies, decommissioning of three 110' patrol boats, two High Endurance Cutters, disestablishment of patrol-boat HTHM operations, retirement of three HU-25 aircraft, enterprise-wide efficiencies, and surface and air asset follow-on costs.

**Equipment**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ 4,576	\$ 4,567	\$ 4,872	\$ 305

This object class covers the purchase of capitalized and non-capitalized assets. For example, this object class enables the Coast Guard to purchase furniture for the cadets at the Coast Guard Academy. The FY 2013 request is for operating surface asset and IOC training systems.

## PPA IV Mission Statement

Requests funding to units, facilities and activities that are under the direct operational and administrative control of the Coast Guard's Atlantic Area and Pacific Area Commanders, operational units as well as headquarters units. These include High Endurance Cutters (WHECs), Medium Endurance Cutters (WMECs), Communications Stations, Sector Commands, Stations, Marine Safety and Security Teams (MSSTs), various support units, and Area offices as applicable. Request includes funding to sustain normal operating costs that include energy, parts, and supplies for routine maintenance of operational assets and shore facilities and administrative supplies.

### Summary Justification and Explanation of Changes

#### Travel

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 179,185	\$ 164,006	\$ 144,008	\$ (19,998)

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2013 request reflects the net change of annualization of prior year management efficiencies, enterprise-wide efficiencies, and surface and air asset follow-on costs. The decrease is partly an artifact of the display which includes OCO obligations for FY 2012, but not FY 2013.

#### Transportation of things

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 7,127	\$ 6,208	\$ 6,078	\$ (130)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2013 request reflects the net result of annualization of prior year management efficiencies, decommissioning of three 110' patrol boats, two High Endurance Cutters, disestablishment of patrol-boat HTHM operations, retirement of three HU-25 aircraft, enterprise-wide efficiencies, and surface and air asset follow-on costs.

#### Other rent

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 21,709	\$ 21,945	\$ 22,531	\$ 586

Other rent includes all payments to a non-Federal source for rental space, land and structures. Funding supports lease renewals for facilities (e.g., office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). The FY 2013 request reflects the annualization of FY 2012 funding, and surface and air asset follow-on costs.

#### Communication, utilities, and misc charges

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 80,027	\$ 76,985	\$ 69,769	\$ (7,216)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters, and aircraft, utility costs including shore facility utilities and cutter, boat and aircraft fuel requirements, and postal costs. The FY 2013 request reflects the net result of annualization of FY 2012 funding, decommissioning of three 110' patrol boats, two High Endurance Cutters, disestablishment of patrol-boat HTHM operations, retirement of three HU-25 aircraft, enterprise-wide efficiencies, and surface and air asset follow-on costs.

**Printing and reproduction**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 2,776</b>	<b>\$ 2,190</b>	<b>\$ 2,090</b>	<b>\$ (100)</b>

The FY 2013 request primarily reflects Service-wide reduction as part of the enterprise-wide efficiencies.

**Advisory and assistance services**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 70,523</b>	<b>\$ 39,334</b>	<b>\$ 18,757</b>	<b>\$ (20,577)</b>

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The FY 2013 request reflects reductions attributed to enterprise-wide efficiencies. The decrease is partly an artifact of the display which includes OCO obligations for FY 2012, but not FY 2013.

**Other services**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 287,721</b>	<b>\$ 294,791</b>	<b>\$ 278,645</b>	<b>\$ (16,146)</b>

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. The FY 2013 request reflects surface and air asset follow-on costs. The decrease is partly an artifact of the display which includes OCO obligations for FY 2012, but not FY 2013.

**Purchases of goods & svcs. from gov't accounts**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ -</b>	<b>\$ 4,730</b>	<b>\$ 4,960</b>	<b>\$ 230</b>

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements. The FY 2013 request reflects annualization of FY 2012 part-year funding and surface and air asset follow-on costs.

**Operation & maintenance of facilities**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 77,895</b>	<b>\$ 85,263</b>	<b>\$ 78,292</b>	<b>\$ (6,971)</b>

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g., hazardous materials disposal) associated with the operation of Coast Guard facilities. The FY 2013 request reflects the net change in enterprise-wide efficiencies and surface and air asset follow-on costs. The decrease is partly an artifact of the display which includes OCO obligations for FY 2012, but not FY 2013.

**Medical care**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 5,153</b>	<b>\$ 4,692</b>	<b>\$ 4,692</b>	<b>\$ -</b>

The FY 2013 request has no change.

**Operation and maintenance of equipment**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 10,629</b>	<b>\$ 24,028</b>	<b>\$ 23,816</b>	<b>\$ (212)</b>

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g., cutters, boats, and aircraft) and supporting systems. The FY 2013 request reflects the net result of annualization of FY 2012 funding, decommissioning of three 110' patrol boats, two High Endurance Cutters, disestablishment of patrol-boat HTHM operations, retirement of three HU-25 aircraft, enterprise-wide efficiencies, and surface and air asset follow-on costs.

**Subsistence and support of persons**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 32,447</b>	<b>\$ 32,342</b>	<b>\$ 29,879</b>	<b>\$ (2,463)</b>

The FY 2013 request has not changed. The decrease is an artifact of the display which includes OCO obligations for FY 2012, but not FY 2013.

**Supplies and materials**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 437,896</b>	<b>\$ 420,620</b>	<b>\$ 381,022</b>	<b>\$ (39,598)</b>

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The FY 2013 request reflects the net change in the annualization of FY 2012 initiatives, decommissioning of three 110' patrol boats, two High Endurance Cutters, disestablishment of patrol-boat HTHM operations, retirement of three HU-25 aircraft, and enterprise-wide efficiencies. The decrease is partly an artifact of the display which includes OCO obligations for FY 2012, but not FY 2013.

**Equipment**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 36,537</b>	<b>\$ 30,387</b>	<b>\$ 27,160</b>	<b>\$ (3,227)</b>

This object class covers the purchase of capitalized and non-capitalized assets. The FY 2013 request reflects the net change in surface and air asset follow-on funding, small boat program support, and the annualization of FY 2012 as part of DHS enterprise-wide efficiencies.

## PPA V Mission Statement

This request provides funding for accounts centrally managed at Coast Guard Headquarters such as: Federal Telephone System (FTS) accounts, Standard Workstation recapitalization, ammunition replenishment, recapitalization of buoys, GSA Rent, postal expenses and Mass Transit benefits. Request ensures critical support elements are provided to the workforce, allowing them to execute their roles in supporting Coast Guard operations. Lease of adequate office space, effective communications (computers, phones, etc) and operational gear (ammunition) are all part of those critical support requirements.

### Summary Justification and Explanation of Changes

#### GSA rent

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 90,837	\$ 91,664	\$ 93,664	\$ 2,000

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services. The FY 2013 increase reflects increased costs associated with the move to the DHS consolidated headquarters at St. Elizabeths.

#### Communication, utilities, and misc charges

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 63,151	\$ 71,400	\$ 78,360	\$ 6,960

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters, and aircraft, utility costs including shore facility utilities and cutter, boat and aircraft fuel requirements, and postal costs. The FY 2013 request reflects the net result of annualization of FY 2012 funding, decommissioning of three 110' patrol boats, two High Endurance Cutters, disestablishment of patrol-boat HTHM operations, retirement of three HU-25 aircraft, enterprise-wide efficiencies, surface and air asset follow-on, and increased costs associated with the move to the DHS consolidated headquarters at St. Elizabeths.

#### Advisory and assistance services

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 12,308	\$ 10,007	\$ 7,415	\$ (2,592)

Advisory and assistance services include services acquired by contract from non-Federal sources (e.g., the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The FY 2013 request reflects the net reduction as part of enterprise-wide efficiencies.

**Other services**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ 125,262	\$ 130,809	\$ 128,937	\$ (1,872)

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. The FY 2013 request reflects the net result of annualization of FY 2012 funding, decommissioning of three 110' patrol boats, two High Endurance Cutters, disestablishment of patrol-boat HTHM operations, retirement of three HU-25 aircraft, enterprise-wide efficiencies, surface and air asset follow-on and costs associated with the move to the DHS consolidated headquarters at St. Elizabeths.

**Purchases of goods & svcs. from gov't accounts**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ -	\$ -	\$ 332	\$ 332

Purchases from Government Accounts include costs for purchases from other Federal government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements (e.g., MIPR). The FY 2013 request reflects the net result of annualization of FY 2012 funding, decommissioning of three 110' patrol boats, two High Endurance Cutters, disestablishment of patrol-boat HTHM operations, retirement of three HU-25 aircraft, enterprise-wide efficiencies, and surface and air asset follow-on costs.

**Operation & maintenance of facilities**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ -	\$ 1,844	\$ 1,844	\$ -

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g., hazardous materials disposal) associated with the operation of Coast Guard facilities. The FY 2013 request has no change.

**Operation and maintenance of equipment**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ 12,512	\$ 8,343	\$ 8,065	\$ (278)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g., cutters, boats, and aircraft) and supporting systems. The FY 2013 request reflects the net result of annualization of FY 2012 funding, decommissioning of three 110' patrol boats, two High Endurance Cutters, disestablishment of patrol-boat HTHM operations, retirement of three HU-25 aircraft, enterprise-wide efficiencies, and surface and air asset follow-on costs.

**Supplies and materials**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 10,970</b>	<b>\$ 8,925</b>	<b>\$ 5,555</b>	<b>\$ (3,370)</b>

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The FY 2013 request reflects the net result of annualization of FY 2012 funding and the reduction attributed to enterprise-wide efficiencies.

**Equipment**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 27,767</b>	<b>\$ 27,857</b>	<b>\$ 26,006</b>	<b>\$ (1,851)</b>

This object class covers the purchase of capitalized and non-capitalized assets. The FY 2013 request reflects the net result of annualization of FY 2012 funding and the reduction attributed to enterprise-wide efficiencies.

## PPA VI Mission Statement

Request provides service-wide funding to support the major maintenance and repair of Coast Guard aircraft, electronics systems, shore facilities and vessels not appropriated in the Coast Guard Acquisition, Construction & Improvements (AC&I) appropriation. This includes materials, services and supplies necessary for depot-level repair of buildings, structures, ground, towers, runways, aids to navigation, aircraft, and aircraft equipment.

### Summary Justification and Explanation of Changes

#### Travel

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ 20,660	\$ 15,634	\$ 13,934	\$ (1,700)

The FY 2013 request reflects the net result of annualization of FY 2012 funding and the reduction attributed to enterprise-wide efficiencies.

#### Transportation of things

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ -	\$ -	\$ 200	\$ 200

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. There is no significant increase in FY 2013.

#### Communication, utilities, and misc charges

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ 4,280	\$ 4,254	\$ 3,876	\$ (378)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters and aircraft, utility costs, postal costs and cutter, boat and aircraft fuel requirements. The FY 2013 request reflects the net result of annualization of FY 2012 funding, decommissioning of multiple assets, enterprise-wide efficiencies, and surface and air asset follow-on costs.

#### Advisory and assistance services

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ 116,646	\$ 105,586	\$ 72,997	\$ (32,589)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The FY 2013 request reflects the net reductions as part of enterprise-wide efficiencies. The decrease is a result of the conversion of security clearance contractors to federal employees associated with the Balanced Workforce Strategy follow-on. The decrease is also partly an artifact of the display which includes OCO obligations for FY 2012, but not FY 2013.

**Other services**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ 386,545	\$ 338,072	\$ 339,531	\$ 1,459

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. The FY 2013 request annualization of FY 2012 funding, and surface and air asset follow-on.

**Purchases of goods & svcs. from gov't accounts**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ -	\$ 726	\$ 1,383	\$ 657

Purchases from Government Accounts include costs for purchases from other Federal government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements (e.g., MIPR). The FY 2013 request reflects the annualization of base funding.

**Operation & maintenance of facilities**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ 100,125	\$ 107,482	\$ 100,878	\$ (6,604)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g., hazardous materials disposal) associated with the operation of Coast Guard facilities. The FY 2013 request reflects the annualization of prior year management efficiencies, and the closure of two seasonal air facilities.

**Operation and maintenance of equipment**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ 102,172	\$ 184,096	\$ 170,932	\$ (13,164)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g., cutters, boats and aircraft) and supporting systems. The decrease is partly an artifact of the display which includes OCO obligations for FY 2012, but not FY 2013.

**Supplies and materials**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 186,508</b>	<b>\$ 177,417</b>	<b>\$ 156,824</b>	<b>\$ (20,593)</b>

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats and aircraft, supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The decrease is partly an artifact of the display which includes OCO obligations for FY 2012, but not FY 2013.

**Equipment**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 46,855</b>	<b>\$ 46,838</b>	<b>\$ 48,471</b>	<b>\$ 1,633</b>

This object class covers the purchase of capitalized and non-capitalized assets. The FY 2013 request is attributed to the annualization of FY 2012 funding.

**Land and structures**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 17,828</b>	<b>\$ 22,771</b>	<b>\$ 20,984</b>	<b>\$ (1,787)</b>

The FY 2013 reduction reflects enterprise-wide efficiencies.

## **K. DHS Balanced Workforce Strategy**

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce – both contracted and federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into Tiered ranking. The results of Tier 1 (i.e., highest priority) contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2014 budget.

The Coast Guard will not convert any Tier 1 contracts in FY 2013.

<sup>1</sup>The 33 Pos/FTE associated with the FY 2012 Balanced Workforce Strategy follow-on is for 33 additional contractor positions converted in FY 2012 and annotated in the BWS Technical Adjustment.

### **Annualization and Follow-On of FY 2012 DHS Balanced Workforce Strategy**

Consistent with the Department of Homeland Security's (DHS) Balanced Workforce Strategy (BWS) requirements, the Coast Guard continues to conduct a phased review of all of its professional services contracts to determine if any of the work performed must or should be performed by government employees. Using the Department's guidance, a BWS Tool review of the Coast Guard's security clearance adjudication support contract determined that the majority of the work performed by contractors leading to the granting or denial of security clearances for government and contractor employees is "Closely-Associated-to-Inherently Governmental Functions/Reserved for Government Performance." Based on the results of the DHS BWS Tool review, conversion of the work to government performance is recommended as continued use of contractors to perform this important function would be inappropriate. The FY 2012 technical adjustment accounts for civilian conversions associated with the insourcing of 33 positions to perform Coast Guard security clearance adjudications/determinations, and technical base adjustments to reallocate funding for professional service contracts to the appropriate PPA.

# Physicians' Comparability Allowance (PCA) Worksheet

US Coast Guard - 12 Sept 2011

Table 1

	PY 2011 (Actual)	CY 2012 (Estimates)	BY 2013* (Estimates)
1) Number of Physicians Receiving PCAs	3	3	3
2) Number of Physicians with One-Year PCA Agreements	0	0	0
3) Number of Physicians with Multi-Year PCA Agreements	3	3	3
4) Average Annual PCA Physician Pay (without PCA payment)	\$142,848	\$142,848	\$142,848
5) Average Annual PCA Payment	\$19,333	\$19,333	\$19,333
6) Number of Physicians Receiving PCAs by Category (non-add)	Category I Clinical Position	0	0
	Category II Research Position	0	0
	Category III Occupational Health	3	3
	Category IV-A Disability Evaluation	0	0
	Category IV-B Health and Medical Admin.	0	0

\*FY 2013 data will be approved during the FY 2014 Budget cycle.

- 7) If applicable, list and explain the necessity of any additional physician categories designated by your agency (for categories other than I through IV-B). Provide the number of PCA agreements per additional category for the PY, CY and BY.

N/A

- 8) Provide the maximum annual PCA amount paid to each category of physician in your agency and explain the reasoning for these amounts by category.

The average annual amount of PCA paid to the Physicians is \$19,333 on two-year service agreements. Two of the Physicians are paid a PCA of \$14,000 each; the third receives PCA for \$30,000 based on their respective experience/qualifications. Total amount paid is \$58,000 divided by (3) = average of \$19,333.

- 9) Explain the recruitment and retention problem(s) for each category of physician in your agency (this should demonstrate that a current need continues to persist).

*(Please include any staffing data to support your explanation, such as number and duration of unfilled positions and number of accessions and separations per fiscal year.)*  
 The 3 physicians receiving PCA are all Category III positions. The United States Coast Guard has experienced difficulty in recruiting and retaining Medical Officer positions as described in 5 CFR 595.104. It took 21 months of open continuous vacancy announcements to fill the 3 positions. All 3 are located in West Virginia. A long standing 4th position (Alameda, CA) was recently abolished after the incumbent retired. Although PCA was offered for the 3 West Virginia jobs, numerous declinations occurred based on low salary offers. Competition continues to be keen for Physicians in the area due to the proximity of VA medical hospitals and private medical facilities that are offering higher pay at market rates. Despite extensive recruitment efforts, the Coast Guard continues to have difficulty attracting new physicians. The 3 positions that were eventually filled were the only 3 eligible for PCA and to whom PCA was offered. Continued use of PCAs for these positions is essential to retain these Physicians and to ensure the Coast Guard meets our medical operational requirements.

- 10) Explain the degree to which recruitment and retention problems were alleviated in your agency through the use of PCAs in the prior fiscal year.

*(Please include any staffing data to support your explanation, such as number and duration of unfilled positions and number of accessions and separations per fiscal year.)*  
 The 2 positions filled in 2010 that were authorized PCA remain filled in Sept 2011 per their service agreements. The 3<sup>rd</sup> position hired in 2011 also remains filled. Simply stated, we had difficulty filling all these new positions even when PCA was offered. The continuing authorization of PCA for these positions is critical in retaining these employees.

- 11) Provide any additional information that may be useful in planning PCA staffing levels and amounts in your agency.

**U. S. Coast Guard**  
**Environmental Compliance and Restoration**

**I. Appropriation Overview**

**A. Mission Statement for Environmental Compliance and Restoration:**

The Environmental Compliance and Restoration (EC&R) appropriation provides funding for environmental cleanup, sustainment and restoration of current and formerly contaminated Coast Guard facilities, and engineering remedies on Coast Guard assets for the purpose of complying with environmental laws and preventing contamination and environmental damage. The EC&R funding request supports all of the Coast Guard's 11 statutory missions and six DHS FYHSP Programs.

EC&R funding ensures the Coast Guard maintains its responsibilities associated with environmental stewardship. The Coast Guard complies with the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Superfund Amendments and Reauthorization Act, Resource Conservation and Recovery Act (RCRA) and other applicable Federal or State laws to clean up contamination at current and former Coast Guard properties. Failure to meet restoration or compliance responsibilities could subject the U.S. Government to fines, penalties, or shutdown of operational assets by environmental regulators.

**B. Budget Activities:**

EC&R activities include site investigation and remediation activities at shore facilities and for Coast Guard property slated for divestiture or transfer.

**C. Budget Request Summary:**

The Coast Guard requests 25 positions, 24 FTE, and \$13.2 million in FY 2013 to provide for environmental remediation and restoration of Coast Guard facilities, including Base Support Unit Kodiak; Surface Forces Logistics Center/Coast Guard Yard, MD; Aviation Logistics Center Elizabeth City, NC; and for environmental assessments for decommissioned Long Range Aids to Navigation (LORAN) stations. Funding requested is planned to be allocated by EC&R activity as follows:

Site Investigations	\$1.031 million
Remediation Activities	\$6.242 million
Long Term Environmental Monitoring	\$0.945 million
LORAN –C Environmental Assessments	\$1.5 million
Salaries/Expenses	\$3.437 million

Depending on project complexity, and conditions identified during routine monitoring and detailed site surveys, project sites may undergo monitoring, remediation and restoration in a phased approach yielding a funding distribution across multiple years. The table below provides a detailed listing of each planned FY 2013 EC&R project based on information regarding prioritization of work, as of February 2012. The list may be adjusted as new information is developed. The list is updated routinely as projects are added, assessments are conducted, and project priority codes are updated.

Project Title	Location	Estimated Cost (\$K)
Research and Development on vessel National Uniform Discharge Systems	Not applicable; collaboration with DOD/USN	\$100
Investigations/Remediation to support National Aids to Navigation (AtoN) Battery Program	Various	\$200
Investigations/Remediation for LORAN-C Closures	Various	\$1,500
Investigations/Remediation for Real Property Divestiture	Various	\$250
Ongoing Remediation at Former Fuel Farm Discharge/Spill	Base Elizabeth City, NC	\$75
Ongoing Remediation at Electroplating Shop (B79) Release Site	Base Elizabeth City, NC	\$25
Ongoing Remediation at Building 75 Discharge/Spill Site	Base Elizabeth City, NC	\$50
Ongoing Remediation at Stripping Shop Building 77 Release Site	Base Elizabeth City, NC	\$50
Ongoing Remediation at North Beach Disposal Area	Base Elizabeth City, NC	\$75
Ongoing Remediation for Asbestos Removal	Air Station Traverse City, MI	\$20
Ongoing Remediation at Pesticide Release Solid Waste Management Unit (SWMU) 33 Site	Base Elizabeth City, NC	\$30
Ongoing Remediation at Landfill/Burn Area (SWMU) 15 Site	Base Elizabeth City, NC	\$30
Ongoing Remediation at Fuel Pipeline Discharge/Spill Site	Base Elizabeth City, NC	\$50
Ongoing Remediation at Seaplane Pipeline Release Site	Base Elizabeth City, NC	\$30
Ongoing Remediation at Gate 1 Discharge/Spill Site	Base Elizabeth City, NC	\$25

<b>Project Title</b>	<b>Location</b>	<b>Estimated Cost (\$K)</b>
Ongoing Remediation at Former Naval Dispensary and Barracks Release Site (FNDBRS) Discharge/Spill Site	Base Elizabeth City, NC	\$25
Investigation at Cocos Island LORAN-A Station: Soil/sediment sampling	Cocos Island, Guam	\$65
Ongoing Remediation at Former LORAN-A Station YAP	Yap, Federated States of Micronesia	\$140
Ongoing Remediation at Ilio Point for Supplemental Cleanup	Ilio Point, Island of Molokai, HI	\$125
Implementation & Long-term Monitoring at Industrial Supply Depot (ISD) Buoy Depot S. Weymouth Land Use Control	ISD Buoy Depot South Weymouth, MA	\$50

The Coast Guard requests \$13.2 million for this activity.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The purpose of the EC&R Appropriation is to carry out a program of environmental compliance and restoration at all current and former Coast Guard facilities. It involves the identification, investigation, and cleanup of contamination from hazardous substances and pollutants; and engineering fixes (i.e., physical changes) to Coast Guard systems, buildings, structures and assets in order to comply with environmental laws and prevent future environmental liabilities stemming from non-compliance.

<sup>1</sup>The Coast Guard manages the military workforce by end strength, not FTE. The military FTE represented in these numbers are monthly end strengths averaged over the year.

<sup>2</sup>The military pay and allowances averages include the costs associated with all pay and allowances paid to a particular paygrade, including: Basic Pay, Basic Allowance for Housing, Basic Allowance for Subsistence, Federal Insurance Contributions, Incentive/Special Pays, Clothing Allowances, Cost-of-Living Allowances and Selective Re-enlistment Bonus payments. The term "Officer" includes Chief Warrant Officers, Cadets and Officer Candidates.

### PPA Mission Statement

Environmental Compliance and Restoration (EC&R) will provide for (1) environmental cleanup and restoration of current and formerly contaminated Coast Guard facilities, and (2) engineering fixes on Coast Guard assets to comply with environmental laws and keep environmental damage from developing. Failure to meet restoration or compliance responsibilities could subject the Coast Guard to fines, penalties, or shutdown of operational assets by environmental regulators. In addition, Coast Guard EC&R funding supports site investigation and remediation activities at shore facilities slated for property divestiture or transfer actions.

**Summary Justification and Explanation of Changes**

**Salaries and Benefits**

	FY 2011		FY 2012		FY 2013		2012 - 2013
	Actual		Enacted		Requested		
	<u>Obligations</u>		<u>Budget Authority</u>		<u>Budget Authority</u>		<u>Change</u>
	\$ 3,141	\$	3,057	\$	3,069	\$	11

The FY 2013 request includes the proposed pay raise (1.7 percent for military and 0.5 for civilians), medical benefits, other mandatory personnel entitlements.

**Travel**

	FY 2011		FY 2012		FY 2013		2012 - 2013
	Actual		Enacted		Requested		
	<u>Obligations</u>		<u>Budget Authority</u>		<u>Budget Authority</u>		<u>Change</u>
	\$ 99	\$	163	\$	106	\$	(57)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2013 request reflects anticipated project travel needs.

**Transportation of things**

	FY 2011		FY 2012		FY 2013		2012 - 2013
	Actual		Enacted		Requested		
	<u>Obligations</u>		<u>Budget Authority</u>		<u>Budget Authority</u>		<u>Change</u>
	\$ 16	\$	26	\$	17	\$	(9)

Transportation of things, the care of such things while in process of being transported, and other services incident to the transportation of things.

**Advisory and Assistance**

	FY 2011		FY 2012		FY 2013		2012 - 2013
	Actual		Enacted		Requested		
	<u>Obligations</u>		<u>Budget Authority</u>		<u>Budget Authority</u>		<u>Change</u>
	\$ 124	\$	204	\$	132	\$	(72)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government.

**Other services**

	FY 2011		FY 2012		FY 2013		2012 - 2013
	Actual		Enacted		Requested		
	<u>Obligations</u>		<u>Budget Authority</u>		<u>Budget Authority</u>		<u>Change</u>
	\$ 9,164	\$	15,066	\$	9,785	\$	(5,281)

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. This request reflects consideration of prior-year unobligated balances.

**Operation & maintenance of facilities**

<b>FY 2011</b>	<b>FY 2012</b>	<b>FY 2013</b>	<b>2012 - 2013</b>
<b>Actual</b>	<b>Enacted</b>	<b>Requested</b>	
<b>Obligations</b>	<b>Budget Authority</b>	<b>Budget Authority</b>	<b>Change</b>
\$ 8	\$ 13	\$ 9	(4)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental service (e.g., hazardous materials disposal) associated with the operation of Coast Guard facilities. The FY 2013 request reflects the anticipated need for maintenance of facilities.

**Equipment**

<b>FY 2011</b>	<b>FY 2012</b>	<b>FY 2013</b>	<b>2012 - 2013</b>
<b>Actual</b>	<b>Enacted</b>	<b>Requested</b>	
<b>Obligations</b>	<b>Budget Authority</b>	<b>Budget Authority</b>	<b>Change</b>
\$ 41	\$ 67	\$ 44	(23)

This object class covers the purchase of capitalized (depreciated) assets and non-capitalized assets.

## **U. S. Coast Guard** **Reserve Training**

### **I. Appropriation Overview**

#### **A. Mission Statement for Reserve Training:**

As the principal Federal agency charged with maritime safety, security and environmental stewardship, the Coast Guard protects vital economic and security interests of the United States from internal and external maritime risks and threats. Our reserve forces request supports all 11 statutory missions. Moreover, the Coast Guard Reserve may be called upon to provide units and personnel to augment active Coast Guard forces during times of crisis, domestically or worldwide.

#### **B. Budget Activities:**

The Reserve Training appropriation directly supports training, operation and administration of the Coast Guard Reserve Program. Coast Guard Reserve Forces provide qualified and trained personnel for active duty in the event of conflict, national emergency, or natural and man-made disasters. Reservists maintain their readiness through mobilization exercises and duty alongside regular Coast Guard members during routine and emergency operations. Reservists will continue to serve as a cost-effective surge force to enhance the Nation's resilience to disasters, as they have done in support of the Deepwater Horizon oil spill response, 2010 Haiti earthquake response, and 2011 Western Rivers flood response, and 2011 Hurricane Irene.

#### **C. Budget Request Summary:**

The Coast Guard requests 535 positions, 535 FTE, and \$132.6 million in FY 2013. This request provides necessary resources for the training, operation, and administration of the Coast Guard Reserve Program, including training, equipping, and ensuring the readiness of the Coast Guard's 8,100 member Reserve workforce. The total adjustment-to-base is a decrease of \$1.7 million, which includes a \$1.0 million increase for pay and a \$2.8 million program support reduction.

Program Change	(1)	(1)	...
<b>2013 Requested Budget Authority</b>	<b>535</b>	<b>535</b>	<b>107,502</b>

The Coast Guard requests \$107.5 million for this activity.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

This request for Pay, Benefits and Allowances funds salaries, benefits, and other compensation for both military and civilian Full Time Support (FTS) staffs supporting members of the Coast Guard's Selected Reserve, as well as for reservists who participate in training activities. The Coast Guard Reserve is the Coast Guard's surge-capacity military workforce and provides a cost-effective and versatile surge capacity to respond to major contingencies, such as natural and man-made disasters, maritime homeland security, national security, and other events.

The Coast Guard Reserve is a cornerstone of service readiness and pivotal to the success of daily mission execution and contingency response. The Coast Guard Reserve was an invaluable contributor during the Coast Guard response to the 2011 Western Rivers floods. At the same time, activated Coast Guard Reserves continue to support the Department of Defense's (DoD) Overseas Contingency Operations in support of Operation Enduring Freedom. Coast Guard reservists provide an outstanding return on investment by augmenting the active duty with needed competencies and capacity through Inactive Duty Training and Active Duty Training periods. This request for funding ensures these Reservists are fully trained and ready to perform vital missions when called upon to do so.

This request for funding also sustains 535 FTS FTE, which represent both military and civilian members who develop policy and doctrine development and manage all recruiting, formal training, personnel, and resource/program oversight.

PPA II: OPERATIONS, MAINTENANCE AND ADMINISTRATION

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	...	...	<b>29,607</b>
<b>2012 Enacted Budget Authority</b>	...	...	<b>27,810</b>
2013 Adjustments-to-Base	...	...	(2,758)
<b>2013 Current Services</b>	...	...	<b>25,052</b>
2013 Program Change	...	...	...
<b>2013 Requested Budget Authority</b>	...	...	<b>25,052</b>

The Coast Guard requests \$25.1 million for this activity.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

This request for Operations, Maintenance and Administration funds services and facility operations to train reservists, and to administer the Reserve program.

By providing funding for enterprise-wide services used by reservists, the Reserve Training appropriation ensures equipment and facilities necessary to attract and maintain a high-caliber reserve force without eroding the resource base of the active duty military workforce. Coast Guard reservists train and serve in multiple mission areas as boarding officers, small boat coxswains, contingency planners, and marine inspectors. The Coast Guard Reserve is an extraordinary force multiplier upon which our nation can confidently rely on in times of exceptional need.

V. Exhibits and Other Supporting Materials

<sup>1</sup>The Coast Guard manages the military workforce by end strength, not Full Time Equivalent (FTE). The military FTE represented in these numbers are monthly end strengths averaged over the year. Public Health Service (PHS) officers were removed from this presentation to properly document the arrangement per OMB A-11 Section 85.7; Department of Health and Human Services (HHS) is the servicing account in the reimbursable FTE arrangement with the Coast Guard.

<sup>2</sup>The military pay and allowances averages include the costs associated with all pay and allowances paid to a particular pay grade, including: Basic Pay, Basic Allowance for Housing, Basic Allowance for Subsistence, Federal Insurance Contributions, Incentive/Special Pays, Clothing Allowances, Cost-of-Living Allowances and Selective Re-enlistment Bonus payments. The term "Officer" includes Chief Warrant Officers, Cadets and Officer Candidates.

### PPA Mission Statement

Requested funding supports operations, maintenance and administrative expenses associated with training the 8,100 Coast Guard Reservists that are currently part of the Selective Reserve.

**Summary Justification and Explanation of Changes**

**Travel**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
	\$ 10,427	\$ 9,794	\$ 8,723	\$ (1,071)

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler.

**Transportation of things**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
	\$ 1,188	\$ 1,116	\$ 1,005	\$ (111)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding FY 2013 reflects the anticipated need.

**Other rent**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
	\$ 65	\$ 61	\$ 55	\$ (6)

Payments to a non-federal source for rental of space, land, and structures.

**Communication, utilities, and misc charges**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
	\$ 90	\$ 85	\$ 76	\$ (9)

Communication, utilities, and misc charges are payment for information technology, utilities and miscellaneous changes.

**Other services**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
	\$ 7,577	\$ 7,117	\$ 6,512	\$ (605)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25.

**Subsistence and support of persons**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 to 2013 Change</b>
<b>\$ 1,518</b>	<b>\$ 1,426</b>	<b>\$ 1,284</b>	<b>\$ (142)</b>

Contractual services with the public or another Federal Government account for the board, lodging, and care of persons, including prisoners.

**Supplies and material**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 8,455</b>	<b>\$ 7,942</b>	<b>\$ 7,154</b>	<b>\$ (788)</b>

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use.

**Equipment**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 262</b>	<b>\$ 246</b>	<b>\$ 222</b>	<b>\$ (24)</b>

This object class covers the purchase of capitalized (depreciated) assets and non-capitalized assets.

**Insurance claims and indemnity**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 25</b>	<b>\$ 23</b>	<b>\$ 21</b>	<b>\$ (2)</b>

Benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act.

# U. S. Coast Guard

## Acquisition, Construction and Improvements

### I. Appropriation Overview

#### **A. Mission Statement for Acquisition, Construction and Improvements:**

Acquisition, Construction and Improvement (AC&I) provides for the acquisition, construction, rebuilding, and improvement of vessels, aircraft, shore facilities and military housing, aids to navigation (ATON) systems and facilities, and command, control, communications and computer systems and related equipment. Funds appropriated for AC&I are managed by Coast Guard acquisition project managers who oversee these projects and apply best practices, in accordance with the Coast Guard's Major Systems Acquisition Manual (MSAM) and applicable Department of Homeland Security (DHS) management directives, to optimize the return on recapitalization investments.

#### **B. Budget Activities:**

The AC&I appropriation funds the acquisition of new capital assets, construction of required facilities, and physical improvements to existing facilities and assets. The appropriation covers Coast Guard-owned and operated vessels, shore facilities and other items such as command, control, communications and computer equipment. Through processes documented in the MSAM, acquisition managers are required to follow a continuum of activities ranging from pre-acquisition concept development to deployment and sustainment. Activities and documentation produced throughout the acquisition lifecycle inform budget requests and budget-related project activities.

#### **C. Budget Request Summary:**

The Coast Guard requests \$1.2 billion in FY 2013 for the following sub-appropriations:

- Vessels - \$879.5 million<sup>1</sup>
- Aircraft - \$74.5 million
- Other - \$76.5 million
- Shore and ATON - \$69.4 million
- Personnel and Management - \$117.4 million

<sup>1</sup>Excludes cancellation of \$25 million appropriated under the Department of Homeland Security Appropriations Act, 2010 (Public Law 111-83) for NSC #4 post-delivery activity. Reappropriated funds will be used for the same purpose.

### III. Current Services Program Description by SUBAPPROPRIATION

**Department of Homeland Security  
U. S. Coast Guard  
Acquisition, Construction and Improvements  
Program Performance Justification**

(Dollars in thousands)

#### SUBAPPROPRIATION: VESSELS

	Perm Pos	FTE	Amount
<b>2011 Actual Obligations</b>	...	...	<b>\$1,841,942</b>
<b>2012 Enacted Budget Authority</b>	...	...	<b>642,000</b>

2013 Program Change	...	...	237,500
<b>2013 Requested Budget Authority*</b>	...	...	<b>879,500</b>

The Coast Guard request for FY 2013 is \$879.5 million.

\* Excludes proposed cancellation of funds.

#### SUBAPPROPRIATION DESCRIPTION:

##### **Primary operational resource supported: Surface Assets**

The vessel appropriation provides funding to recapitalize and/or improve the Coast Guard's fleet of aging boats and cutters. With many of the Coast Guard's cutters operating at or beyond their planned service life, these recapitalization and sustainment projects are critical to ensuring the continued mission effectiveness and readiness of the Coast Guard's surface fleet. FY 2013 funding initiates the Survey and Design of a new polar icebreaker, supports the Survey and Design of Vessels and Boats, National Security Cutter (NSC), Offshore Patrol Cutter (OPC), Fast Response Cutter (FRC), Cutter Boats, and Medium Endurance Cutter (MEC) Sustainment projects. The Coast Guard's fleet of boats and cutters supported within this program collectively perform all eleven statutory Coast Guard missions in the offshore, coastal and inland areas of responsibility (AOR).

While the Coast Guard is reactivating the icebreaker POLAR STAR in 2013, the anticipated remaining service life of this asset is estimated to be only seven to ten years. To sustain this capacity into the future, this appropriation funds the survey and design activities required to begin acquisition of a new Polar Icebreaker.

The Coast Guard's future fleet of NSCs, OPCs and FRCs will replace the current fleet of High and Medium Endurance Cutters and Island-Class Patrol Boats. These cutters will provide endurance, speed, sea-keeping, surveillance, and persistent presence in the offshore area of responsibility to perform the following Coast Guard missions: Drug and Migrant Interdiction, Living Marine Resources, Defense Readiness, Search and Rescue (SAR), Marine Environmental Protection, and Ports, Waterways, and Coastal Security. The NSCs and OPCs will be able to autonomously support

and deploy aircraft and cutter boats, and possess a highly effective suite of electronics communication and surveillance equipment. NSCs, which have been fielded, are also able to optimally conduct critical law enforcement and SAR missions in the most challenging operational environments (e.g., Bering Sea, Russian-U.S. Maritime Boundary Line, Eastern Pacific, etc.), and overseas DHS missions, including out-of-hemisphere deployments. Furthermore, NSCs have the capacity to perform contingency response operations in all environments, including contaminated areas in the wake of a chemical or biological attack. Cutter boats provide major cutters the capability to deliver boarding teams, stop non-compliant vessels, transfer personnel/cargo, and augment the operations outlined above. The FRC is optimized for similar Coast Guard missions as the NSC and OPC, but at a shorter range within the Coastal and near-Offshore domains, while relying exclusively upon shore-based aircraft as opposed to cutter-borne assets to perform airborne surveillance and tactical support.

In FY 2013, the Coast Guard begins survey and design work for the 175-foot Coastal Buoy Tender (WLM) Mission Effectiveness Project at the Coast Guard YARD. These cutters perform Aids to Navigation work along the coasts, as well as a number of other Coast Guard missions. For example, these versatile cutters contributed to spill recovery efforts associated with the BP Deepwater Horizon Oil Spill. The FY 2013 request also provides funding to complete the Medium Endurance Cutter Sustainment program at the Coast Guard YARD.

Based on a review of asset needs, in FY 2013, the Coast Guard will reduce the scope of the RB-M acquisition, leveraging FY 2012 funding to procure 40 RB-Ms over FY 2012-2013 and closeout the project at a total of 166 boats.

**SUBAPPROPRIATION: AIRCRAFT**

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	...	...	<b>\$146,868</b>
<b>2012 Enacted Budget Authority</b>	...	...	<b>353,400</b>
2013 Adjustments-to-Base	...	...	...
<b>2013 Current Services</b>	...	...	<b>353,400</b>
2013 Program Change	...	...	-278,900
<b>2013 Requested Budget Authority*</b>	...	...	<b>74,500</b>

The Coast Guard request for FY 2013 is \$74.5 million.

**SUBAPPROPRIATION DESCRIPTION:**

**Primary operational resource supported: Aviation Assets**

The aircraft appropriation provides funding for recapitalization and sustainment of the Coast Guard’s fleet of aging aircraft. It is comprised of new fixed-wing aircraft acquisitions, and rotary wing aircraft sustainment projects.

The Coast Guard’s fleet of fixed and rotary wing aircraft supported within this program collectively performs all 11 statutory Coast Guard missions in the Offshore, Coastal and Inland AORs. The land-based fixed-wing aircraft include the C-130, HU-25 and C-144A aircraft. The C-144A is replacing the HU-25 as the Coast Guard’s primary medium-range fixed-wing aircraft. The Coast Guard’s fleet of C-130Hs and C-130Js provide Long Range Surveillance (LRS) fixed-wing capability. Each of these fixed-wing aircraft enables the Coast Guard to conduct airborne

surveillance, detection, classification and identification of vessels and other aircraft. The LRS program continues efforts to extend the operating life and enhance the capability of the HC-130H fleet by replacing key component Center Wing Boxes (CWBs) and adding new capability (avionics-A1U), permanently defers the second avionics upgrade (A2U), and reduces the scope of the mission systems upgrade in favor of C-130J production. Consolidation of the C-130H and C-130J PPAs into one new LRS Project enables greater flexibility toward achieving an 11H/11J fleet configuration, which is expected to result in increased mission effectiveness and minimizes lifecycle cost. The eventual goal is to transition to an all C-130J fleet by the mid-2020s, when it will no longer be practical or affordable to keep the C-130H in service.

The Coast Guard's fleet of rotary wing aircraft includes the H-60 and H-65 helicopters. The H-60 is a medium-range helicopter, and the H-65 is a short-range helicopter. Both aircraft are deployed from land-based air stations and the H-65 is also deployed routinely aboard the Coast Guard's fleet of NSCs, WHECs, WAGBs, and WMECs. Both aircraft are used to execute the full range of Coast Guard programs including Law Enforcement, Maritime Security, Maritime Response, Defense Operations, and Maritime Transportation System Management. The projects within this program are intended to recapitalize and sustain these aircraft. The Coast Guard intends to leverage FY 2012 funding initially intended for the H-60 Radar Sensor System for sustainment segments now underway, including life-limiting component recapitalization and replacement of obsolete components. These revised plans will focus resources on sustaining existing capacity and capability. As with the conversion of excess Navy H-60 helicopters to replace lost Coast Guard aircraft, and the CBP-CG partnership with land-based UAS, the Coast Guard will continue to explore innovative ways to leverage DoD and other DHS agency partnerships to further recapitalization efforts.

**SUBAPPROPRIATION: OTHER**

	Perm Pos	FTE	Amount

**SUBAPPROPRIATION DESCRIPTION:**

**Primary operational resource supported: Command, Control, Communications, Computers and Information Technology (C4IT), Acquisition Management**

The requested funding procures hardware and software, including initial acquisition, development or construction or improvement of any system, software or equipment costing over \$1.0 million per usable segment or item, or \$10.0 million total project cost. In FY 2013, funding will support continued progress on build-out of Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR) systems, CG-Logistics Information Management System (CG-LIMS), and Nationwide Automatic Identification System (NAIS). This appropriation

also provides funding for Systems Engineering and Integration (SEI) and Program Oversight and Management (PO&M).

The Coast Guard leverages its C4ISR capability to effectively execute a broad mission set in an immensely challenging operating environment. Assets are able to receive, evaluate and act upon information obtained through the capability provided by the systems supported in this program. The C4ISR project provides standardized capability to major cutters and aircraft, facilitating interoperability and information sharing. NAIS provides the ability to identify and classify vessels operating within the coastal and inland AORs to support maritime domain awareness activities. The eventual full deployment of CG-LIMS will enable the Coast Guard to replace redundant and obsolete logistics and financial systems with one single integrated IT system capable of providing enhanced configuration management, supply support, and improved financial accountability. SEI and PO&M are critical to efficient oversight and execution of the Coast Guard's acquisition programs.

**SUBAPPROPRIATION: SHORE, MILITARY HOUSING AND AIDS TO NAVIGATION (ATON)**

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	...	...	<b>\$160,279</b>

2013 Program Change	...	...	(131,281)
<b>2013 Requested Budget Authority*</b>	...	...	<b>69,411</b>

The Coast Guard request for FY 2013 is \$69.4 million.

**SUBAPPROPRIATION DESCRIPTION:**

**Primary operational resource supported: Shore Units, Military Housing and Aids-to-Navigation (ATON)**

The AC&I shore facilities, military housing and ATON appropriation provides funding for the acquisition, construction, rebuilding, and improvement of the Coast Guard's shore facilities, military housing, ATON and related equipment. Shore facilities are critical to supporting all Coast Guard operations, providing support to the Service's myriad operational communities and accommodating the dynamic state of mission needs. Many of the Coast Guard's shore assets are located in harsh coastal environments, requiring a robust recapitalization program. This funding also provides infrastructure upgrades at new cutter homeports and air stations to ensure these facilities are fully ready prior to arrival of new assets. Advance preparation is especially critical in hurricane-prone ports and ports located outside the continental United States, where many of the new assets will be homeported within the next several years.

<b>2013 Requested Budget Authority*</b>	<b>880</b>	<b>842</b>	<b>117,398</b>

The Coast Guard request for FY 2013 is \$117.4 million.

**SUBAPPROPRIATION DESCRIPTION:**

**Primary operational resource supported: Personnel to support program management of all acquisitions.**

AC&I has a specific annual appropriation to fund “personnel compensation and benefits and related costs.” The primary activities include project management, financial management, support services, training, and workforce certification. The funding provides the appropriate level of government acquisition professionals to field a workforce with the competencies and capacity to manage acquisitions in accordance with CG and DHS policies, while meeting various requirements established in the Chief Financial Officer Act, Clinger-Cohen Act, DHS certification level requirements and OMB Circular A-76.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

#### Department of Homeland Security U. S. Coast Guard

#### Justification of Proposed Changes in Acquisition, Construction, and Improvements Appropriation Language

For necessary expenses of acquisition, construction, renovation, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto; and maintenance, rehabilitation, lease and operation of facilities and equipment; as authorized by law; [\$1,403,924,000]\$1,217,309,000, of which \$20,000,000 shall be derived from the Oil Spill Liability Trust Fund to carry out the purposes of section 1012(a)(5) of the Oil Pollution Act of 1990 (33 U.S.C. 2712(a)(5)); [of which \$20,000,000 shall remain available until September 30, 2016, for military family housing, of which not more than \$14,000,000 shall be derived from the Coast Guard Housing Fund, established pursuant to 14 U.S.C. 687;] of which [\$642,000,000]\$879,500,000 shall be available until September 30, [2016]2017, to acquire, effect major repairs to, renovate, or improve vessels, small boats, and related equipment; of which [\$289,900,000]\$74,500,000 shall be available until September 30, [2016]2017, to acquire, effect major repairs to, renovate, or improve aircraft or increase aviation capability; of which [\$161,140,000]\$76,500,000 shall be available until September 30, [2016]2017, for other acquisition programs; of which [\$180,692,000]\$69,411,000 shall be available until September 30, [2016]2017, for shore facilities and aids to navigation, including waterfront facilities at Navy installations used by the Coast Guard; of which [\$110,192,000]\$117,398,000 shall be available for personnel compensation and benefits and related costs: Provided, That of the unobligated balances made available under this heading for the Integrated Deepwater Systems program (surface ships) by Public Law 111-83, \$25,000,000 are hereby permanently cancelled[the funds provided by this Act shall be immediately available and allotted to contract for long lead time materials, components, and designs for the sixth National Security Cutter notwithstanding the availability of funds for production costs or post-production costs: Provided further, That the Secretary of Homeland Security shall submit to the Committees on Appropriations of the Senate and the House of Representatives, at the time that the President's budget is submitted each year under section 1105(a) of title 31, United States Code, a future-years capital investment plan for the Coast Guard that identifies for each requested capital asset\_] [(1) the proposed appropriations included in that budget;] [(2) the total estimated cost of completion, including and clearly delineating the costs of associated major acquisition systems infrastructure and transition to operations;] [(3) projected funding levels for each fiscal year for the next 5 fiscal years or until acquisition program baseline or project completion, whichever is earlier;] [(4) an estimated completion date at the projected funding levels; and] [(5) a current acquisition program baseline for each capital asset, as applicable, that\_] [(A) includes the total acquisition cost of each asset, subdivided by fiscal year and including a detailed description of the purpose of the proposed funding levels for each fiscal year, including for each fiscal year funds

requested for design, pre-acquisition activities, production, structural modifications, missionization, post-delivery, and transition to operations costs;] [(B) includes a detailed project schedule through completion, subdivided by fiscal year, that details\_] [(i) quantities planned for each fiscal year; and] [(ii) major acquisition and project events, including development of operational requirements, contracting actions, design reviews, production, delivery, test and evaluation, and transition to operations, including necessary training, shore infrastructure, and logistics;] [(C) notes and explains any deviations in cost, performance parameters, schedule, or estimated date of completion from the original acquisition program baseline and the most recent baseline approved by the Department of Homeland Security's Acquisition Review Board, if applicable;] [(D) aligns the acquisition of each asset to mission requirements by defining existing capabilities of comparable legacy assets, identifying known capability gaps between such existing capabilities and stated mission requirements, and explaining how the acquisition of each asset will address such known capability gaps;] [(E) defines life-cycle costs for each asset and the date of the estimate on which such costs are based, including all associated costs of major acquisitions systems infrastructure and transition to operations, delineated by purpose and fiscal year for the projected service life of the asset;] [(F) includes the earned value management system summary schedule performance index and cost performance index for each asset, if applicable; and] [(G) includes a phase-out and decommissioning schedule delineated by fiscal year for each existing legacy asset that each asset is intended to replace or recapitalize:] [Provided further, That the Secretary of Homeland Security shall ensure that amounts specified in the future-years capital investment plan are consistent, to the maximum extent practicable, with proposed appropriations necessary to support the programs, projects, and activities of the Coast Guard in the President's budget as submitted under section 1105(a) of title 31, United States Code, for that fiscal year: Provided further, That any inconsistencies between the capital investment plan and proposed appropriations shall be identified and justified: Provided further, That subsections (a) and (b) of section 6402 of Public Law 110-28 shall apply with respect to the amounts made available under this heading].(*Department of Homeland Security Appropriations Act, 2012.*)

**Explanation of Changes:**

Proposed language would extend the period of availability of funds previously appropriated in FY 2010 for post-delivery activities of the fourth National Security Cutter (NSC-4). Under the current production schedule for NSC-4, these funds are projected to expire prior to obligation.

**C. Summary of Requirements**

**FY 2013-2017 Five Year Capital Investment Plan (CIP)  
Acquisition, Construction & Improvements**

The Capital Investment Plan projects Coast Guard's acquisition priorities for the next five years assuming the limits of budgetary growth set by the Budget Control Act of 2011, P.L. 112-25. It does not reflect the impact of the Department of Defense's *Strategy, Sustaining Global Leadership: Priorities for 21st Century Defense*, which may affect operational planning at the Department of Homeland Security (DHS). DHS will continue to evaluate Departmental acquisition priorities in the context of Homeland Security and National Security policies, including Coast Guard's statutory missions defined under 14 U.S. Code § 1, 2, 89 and 141.

**U. S. Coast Guard**  
**Acquisition, Construction & Improvements**  
**FY 2013 Congressional Justification**  
(Dollars in Thousands)

**Survey and Design - Vessels and Boats** **\$2,500**

---

**Project Description, Justification and Scope**

This project builds upon a \$4 million congressionally approved transfer in FY 2011 for the survey and design of a Service Life Extension Project on the 140-foot Icebreaking Tug (WTGB) fleet and appropriation of \$6 million in FY 2012 for the survey and design of a Mission Effectiveness Project (MEP) on the 225-foot Sea Going Buoy Tender (WLB) fleet.

FY 2013 funding will initiate survey and design work for a Mission Effectiveness Project (MEP) on the fourteen-ship 175-foot Coastal Buoy Tender (WLM) fleet. The 175-foot WLM fleet was built from 1996-2000, with the oldest cutters approaching their mid-life. Similar to the strategy for MEP on the 110-foot Patrol Boats and Medium Endurance Cutters, the goal will be to run three SLEP and mid-life availability projects at the Coast Guard YARD in parallel with each other, the 140-foot WTGB, 225-foot WLB and 175-foot WLM. This will optimize YARD loading, minimizing costs, and allow maximum flexibility for operational planners, by minimizing the number of cutters that are removed from service from a single cutter class as they undergo SLEP/mid-life availabilities at the YARD. In order to perform these projects most efficiently, the Coast Guard must complete the requisite engineering and survey work prior to construction.

This request provides ongoing funding to support multi-year engineering survey and design efforts in support of the 175-foot WLM mid-life availability. As these vessels continue to age, project funding is required to conduct detailed condition surveys of the hull, along with engineering design work that will be used to plan the project. Examples of the work to be performed under this project include: detailed survey and assessment of the material condition of the current fleet on hull, mechanical and engineering systems and subsystems, study and analysis of engineering systems and components to evaluate suitability for use in sustainment projects, and the development of pre-acquisition documentation to enable projects to reach initial program approval in accordance with the Coast Guard's Major Systems Acquisition Manual.

Early planning, requirements development, and cost estimating in support of sustainment projects are critical to exercising good governance, planning, and acquisition oversight to make the best use of limited resources while minimizing impact to the operational fleet.

**Significant Changes**

No significant changes.

*U. S. Coast Guard - FY 2013 Congressional Justification*

**Survey and Design - Vessels and Boats**

**\$2,500**

**Compliance with Public Laws, Regulations, Standards & Executive Orders**

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

**U. S. Coast Guard**  
**Acquisition, Construction & Improvements**  
**FY 2013 Congressional Justification**  
(Dollars in Thousands)

**National Security Cutter (NSC)**

**\$683,000**

**Project Description, Justification and Scope**

This request provides \$658 million for Segment 2 of Long Lead Time Materials (LLTM), production and post-production activities to fully fund the sixth NSC. Additionally, \$25 million appropriated in FY 2010 for post-production activities for NSC #4, likely to expire, are cancelled and re-appropriated in 2013.

These Legend Class Cutters are replacing the legacy High Endurance Cutters (HEC), built between 1967 and 1972. HECs are currently operating beyond their economic service life and experiencing decreased operational availability and increased maintenance costs. The NSC provides enhanced capability, essential for performing long range missions in today's high-threat environment.

The NSC is capable of extended on-scene presence, operating in the harshest maritime environments, long transits and out-of-hemisphere deployments. It is equipped with modern communication, navigation and surveillance systems that allow the cutter and its deployed air and organic boat assets to operate worldwide and conduct a daily search of up to 56,000 square miles throughout the maritime domain. The NSC enables the Coast Guard to serve as a leader in maritime incident response, and is designed to operate in every ocean and all environments.

The NSC conducts patrols on the high seas and coastal approaches employing a robust command and control capability for the task unit commander or on-scene commander. It is capable of performing all maritime DHS missions including overseas operations with the U.S. Navy and partner nations. When engaged in these missions, the NSC is capable of detecting, classifying, and tracking surface Targets of Interest (TOI) in sizes ranging from makeshift rafts to large commercial vessels, and air TOIs as small as single-engine civil aircraft.

Leveraging updated technology that was not available 40 years ago, the NSC possesses improved capabilities over the legacy 378' High Endurance Cutter. The NSC also meets modern environmental requirements that were not in place the when the HECs were designed. It has a range of approximately 12,000 nautical miles (nm) and an underway endurance of 60 days. The cutter is capable of patrolling alone or with multiple U.S. Coast Guard vessels, U.S. Navy vessels, or vessels from other nations' navies or coast guards.

Once each NSC is completely outfitted it will have the capability to:

- Provide anti-terrorism/force protection;
- Carry and deploy aircraft and unmanned aerial vehicles (UAV);

*U. S. Coast Guard - FY 2013 Congressional Justification*

**National Security Cutter (NSC)**

**\$683,000**

- Carry and deploy multiple small boats (e.g., Cutter Boat Over the Horizon (CB-OTH) and Cutter Boat Long Range Interceptor (CB-LRI));
- Conduct boat and flight operations safely and efficiently in up to Sea State 5 (wave heights of 8-12 feet and wind 21- 25 knots);
- Support intelligence operations through greatly improved intelligence gathering and Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) capabilities, including use of a Sensitive Compartmented Information Facility (SCIF), all of which enhance the NSC’s self-defense capabilities and facilitate seamless operations with networked DHS, DoD, and national assets;
- Maintain presence and perform command and control operations in Chemical, Biological, or Radiological contaminated environments for up to 36 hours;
- Operate with U.S. Navy Battle Groups with a maximum sustained speed of 28 knots.

**U. S. Coast Guard**  
**Acquisition, Construction & Improvements**  
**FY 2013 Congressional Justification**  
(Dollars in Thousands)

**Offshore Patrol Cutter (OPC)**

**\$30,000**

**Project Description, Justification and Scope**

This funding will continue pre-acquisition design work for the Offshore Patrol Cutter (OPC) class, intended to replace the Coast Guard's fleet of Medium Endurance Cutters (MEC). The acquisition strategy for this program awards Preliminary & Contract Designs (P&CDs) to up to three competing contractors. From the P&CD efforts, one design will be chosen for Detailed Design development and ship construction. FY 2013 funding will facilitate P&CD evaluations, prepare the Request for Proposal (RFP) for the Detailed Design and Construction contract award, and provide support for the OPC Project Office technical and project staff, OPC Ship Design Team, Technical Authorities, C4ISR production, completing various trade-off studies and requirements validations, life-cycle cost estimating, logistics and training studies.

The OPC will primarily resolve current gaps in capabilities and capacity stemming from the aging 270' and 210' MECs that are experiencing decreased reliability and increased maintenance costs. Together, the OPCs and NSCs will recapitalize the Coast Guard's major cutter fleet. The OPC will possess the endurance, sea-keeping, and persistent presence to complete missions at the outer extent of the Exclusive Economic Zone (EEZ) and coastal approaches and will be designed to conduct assigned missions through a full-spectrum of climate and environmental conditions including the ability to launch and recover boats and aircraft in up to Sea State 5.

The OPC will be deployed as part of a layered security strategy that gives the Coast Guard and its law enforcement and military partners time to react to emerging maritime threats. Advanced communications capabilities will facilitate interoperability with DHS, State and local responders as well as DoD and international partners. Updated command and control systems that were not available 40 years ago when the current MECs were designed will aid in the detection, classification, and identification of targets of interest (TOIs), while the use of well-equipped deployed aircraft and small boats coupled with adequate cutter speed will provide the requisite capacity to intercept and prosecute TOIs.

**FY 2011 Key Events:**

- Released draft specification
- Received and evaluated Industry comments

**FY 2012 Planned Key Events:**

- Modified specifications and RFP
- Release of P&CD RFP

(Dollars in Thousands)

**Fast Response Cutter (FRC)**

**\$139,000**

**Project Description, Justification and Scope**

This request funds production of FRC hulls #19 – 20, associated contract line items, and project management costs. Hulls #17 - 20 will be procured in FY 2013 using FY 2012 and FY 2013 funds. Specifically, the Coast Guard will procure four FRCs in FY 2012 (two less than funded in the FY 2012 enacted) and carry forward \$95 million from FY 2012, combining these funds with the FY 2013 request to procure a total of four FRCs in FY 2013. This plan will allow the Coast Guard to procure FRCs under the current contract terms and conditions, maintaining the same steady production rate as the previous year. Continued acquisition of FRCs is critical to closing the existing patrol boat operational hour gap, and to replace the aging 110' patrol boat fleet.

The planned fleet of FRCs will conduct primarily the same missions as the 110' patrol boats being replaced. In addition, the FRC will have several increased capabilities enhancing overall mission execution. The FRC is designed for rapid response, with approximately a 28 knot speed capability, and will typically operate in the coastal zones. Examples of missions that FRCs will complete include SAR, Migrant Interdiction, Drug Interdiction and Ports Waterways and Coastal Security.

FRCs will provide enhanced capabilities over the 110's including improved C4ISR capability and interoperability; stern launch and recovery (up through sea state 4) of a 40 knot, Over-the-Horizon, 7m cutter boat; a remote operated, gyro stabilized MK38 Mod 2, 25mm main gun; improved sea keeping; and enhanced crew habitability.

Other capabilities include:

- The ability to conduct shipboard migrant interdiction evolutions, including detection, tracking, interdiction, embarkation and disembarkation, administrative processing, and retention onboard.
- The ability to patrol areas where suspected illegal migrant, drug, or fisheries activities may occur, and dispatch boarding teams to suspect vessels and subsequently escort them to their final disposition.
- The ability to search for, locate and recover distressed mariners; provide medical assistance or evacuation, and provide safe transport. It will also provide the ability to control damage to distressed vessels and other property, provide dewatering equipment and mechanical assistance, and tow stricken vessels.

**Prior Key Events:**

- Awarded design and construction of lead-hull (2008)
- Started production of lead-ship (2010)

**Fast Response Cutter (FRC)**

**\$139,000**

- Awarded contract option for FRCs 9-12 (2011)
- Launched hulls #1-2 (2011)
- Conducted Preliminary Acceptance Trials on lead-ship (2011)

**FY 2012 Planned Key Events:**

- Award contract option for FRCs 13-16
- Delivery of lead-ship and hulls #2-3
- Award contract option to obtain Reprourement Data License Package (RDLP)
- Conduct Initial Operational Test and Evaluation (IOT&E)

**FY 2013 Planned Key Events:**

- Deliver hulls #4-7
- Award contract option for FRC hulls #17-20

**U. S. Coast Guard**  
**Acquisition, Construction & Improvements**  
**FY 2013 Congressional Justification**  
(Dollars in Thousands)

**Cutter Boats**

**\$4,000**

**Project Description, Justification and Scope**

This request continues funding for production of multi-mission cutter small boats that will be fielded on the Coast Guard's newly acquired National Security Cutter. This request funds production of hull #4-5 Cutter Boat Long Range Interceptor II (CB-LRI-II), and hulls #8-9 Cutter Boats Over-the-Horizon IV (CB-OTH-IV), along with project and technical support.

The CB-LRI-II will be an 11-meter cutter boat carried by the NSC. The CB-LRI-II will provide enhanced capabilities compared to legacy cutter boats, such as higher speeds, extended range, better sea-keeping, and greatly improved communications and connectivity to the parent cutter. The CB-OTH-IV is a 7-meter cutter boat that also provides enhanced capabilities compared to legacy cutter boats. The CB-OTH-IV operates beyond sight of the parent cutter (over the horizon) to deploy boarding parties, pursue and interdict TOI, and perform SAR operations. The CB-OTH-IV is both stern launch/recovery, and side-davit launch/recovery, capable.

Both the CB-LRI-II and CB-OTH-IV support the parent cutter in its mission execution. These include SAR operations, migrant interdiction, law enforcement and other operations.

**FY 2011 Prior Key Events:**

- Awarded Production & Testing CB-OTH IV #1 (includes "Boat Off" competition hulls)
- Approved Acquisition Decision Event (ADE)-2 for the CB-LRI-II

**FY 2012 Planned Key Events:**

- Testing CB-OTH IV #1 (includes "Boat Off" competition hulls)
- Issue RFP CB-LRI-II / Delivery of 1<sup>st</sup> CB-LRI-II
- Construct CB-OTH IV #2-7

**FY 2013 Planned Key Events:**

- Construct LRI II #2-5
- Construct CB-OTH IV #8-9

U. S. Coast Guard - FY 2013 Congressional Justification

**Cutter Boats** **\$4,000**

**COST ESTIMATE OF WORK TO BE FUNDED FOR FISCAL YEAR 2013:**

ITEM	QUANTITY	TOTAL (\$K)
CB-OTH-IV #8-9	2	\$1,400
CB-LRI- II #4-5	2	\$2,600
	<b>Total</b>	<b>\$4,000</b>

**FUNDING HISTORY**

<i>FY</i>	<i>\$K</i>	<i>Major Activity Funded by Net Appropriation</i>
2002	\$945	Design SRP/Start construction of SRP hulls 1-2
2003	\$2,710	Construct SRP hulls 3-8 <sup>6</sup>
2004	\$1,408	SRP Mods and LRI Final Acceptance Trials Tech Support
2005	\$2,200	CB-LRI-I Development/Design/Construction Prep; SRP Mods, Repairs and Studies
2006	\$624	Construction of CB-LRI-I; BCA for Follow-On LRI Procurements
2007	\$1,069	SRP hull 9 <sup>7</sup> Proposal Prep Re-pricing, Acquisition Planning for LRI & SRP Program restarts
2008	\$2,430	Acquisition Planning for LRI & SRP Program restarts and Launch & Recovery Interface Studies
2009	\$2,400	Design, Engineering, and Spec. Development of CB-OTH-IV and CB-LRI-II; Construction CB-OTH-IV #1 (“Boat Off”)
2010	\$3,000	Construction CB-OTH-IV #2 and Design, Engineering, and Spec. Development of CB-LRI-II; plus Program Management, Testing, and Acquisition Logistics
2011	\$2,994	Construction CB-OTH- IV #3 & 4 and Design, Engineering, and production of CB-LRI-II #1; plus Program Management, Testing, and Acquisition Logistics
2012	\$5,000	Construction CB-OTH-IV #5-7 and CB-LRI-II #2-3; plus Program Management, Testing, and Acquisition Logistics
<b>Total</b>	<b>\$24,780</b>	<b>Funding received for FY 2002 through FY 2012</b>

Leading up to selection of the final CB-OTH-IV design, there is a “Boat Off” competition between competing boat manufacturers. In this acquisition strategy, the CG has awarded a contract for construction of one boat to four different manufacturers, with options for full production. The CG will then determine which design (of the boats built) best meets needs, and this design will be selected for full production. Funding for CB-OTH-IV hull #1 includes the cost of procuring the boats for this competition. CB-OTH-IV hull #2 and beyond will be produced by the manufacturer that wins the “Boat Off” competition.

<sup>6</sup> SRPs #1-8 were originally built for the 123’ Patrol Boats, but are now temporarily used aboard NSCs.

<sup>7</sup> SRP Hull #9 was never constructed and funding was applied to restart the program.

**Cutter Boats**

**\$4,000**

**CONTRACTOR:**

**U. S. Coast Guard**  
**Acquisition, Construction & Improvements**  
**FY 2013 Congressional Justification**  
(Dollars in Thousands)

**Medium Endurance Cutter Sustainment (MEP)**

**\$13,000**

**Project Description, Justification and Scope**

This request funds completion of the Mission Effectiveness Project (MEP) production on the last two (hulls 12-13) 270' WMECs. This work includes replacement of major equipment that is the primary source of degraded operational readiness, such as the main propulsion control and monitoring system, small boat davits, oily water separators, air conditioning, refrigeration, and evaporators. The majority of this work will be performed at the Coast Guard Yard in Curtis Bay, MD. Some work items will be completed via road show installations following the yard availability.

This funding request leverages carryover funding from prior years. Actual costs for 270' MEC MEP and 210' MEC MEP projects were less than original estimates for materials and labor. Thus, these savings reduce the required funding needed to fully fund the program in FY 2013.

The MEP project includes both the 210' and 270' WMECs. The last 210' WMEC MEP was essentially completed in FY 2010, leaving work on 270' WMECs as the focus for the remainder of this project.

The MEP project is a bridging strategy for the WMEC fleet until it is replaced by the OPC fleet. For the 270' cutter class, this project improves the overall operational readiness and mission effectiveness. Each 270' WMEC provides 185 days of mission performance; a loss of that capacity reduces operational hours and adversely effects mission performance. Additionally, the MEP improves the cutter's operating and cost performance by replacing systems that have the highest failure rates with more reliable equipment. Replacing obsolete equipment also yields greater standardization, capability, and reliability across the two cutter classes. Post-MEP, WMECs have an average equipment reliability rate (in terms of decreased number of major casualties) that is nearly double that of pre-MEP WMECs.

MECs have helicopter and small boat capabilities that support operations in the coastal and offshore areas of the Exclusive Economic Zone (EEZ).

*U. S. Coast Guard - FY 2013 Congressional Justification*

(Dollars in Thousands)

**Polar Icebreaker** **\$8,000**

**Project Description, Justification and Scope**

This funding will initiate survey and design activities for a new Coast Guard polar icebreaker, intended to provide continued U.S. Arctic icebreaking capability following the projected end of service life of the CGC POLAR STAR on or about 2022. This effort will build upon requirements analyses undertaken within the past three years, including the High-Latitude Mission Analysis Report, and the Polar Icebreaker Business Case Analysis.

In recognition of emerging operational risks in the Arctic regions, the Coast Guard is committed to developing and implementing an acquisition plan that will ensure seamless and expeditious availability of icebreaking capacity to meet its missions. Specifically, the Coast Guard will deliver a fully operational polar icebreaker within a decade.

This funding will be used to develop programmatic planning documents required under the USCG Major Systems Acquisition Manual, including an Analysis of Alternatives, a Life Cycle Cost Estimate, a Cost Benefit Analysis (CBA), modeling simulation and testing (as required) to build a modern polar icebreaker. These efforts will lead to development of a formal icebreaker acquisition project, with the award for construction anticipated within the next five years.

As conditions in the Arctic evolve, and maritime activity grows, the requirement for sustained surface presence, capable of operating in the ice-covered waters of the Polar regions remains critical. This project will maintain a National icebreaking capability through an efficient, timely and cost effective acquisition.

**Significant Changes**

These funds represent a new project for acquisition of a Polar Icebreaker.

**FY 2013 Congressional Justification**  
(Dollars in Thousands)

**Maritime Patrol Aircraft (MPA) HC-144**

**\$43,000**

**Project Description, Justification and Scope**

This request funds the 18<sup>th</sup> airframe of 36 HC-144A Maritime Patrol Aircraft (MPA). These funds will help address the Coast Guard's MPA flight hour gap by providing 1,200 additional MPA hours each year. The first eighteen HC-144A aircraft will be stationed at Mobile, AL; Elizabeth City, NC; Miami, FL; Cape Cod, MA; and Corpus Christi, TX.

The HC-144A Ocean Sentry is the Coast Guard's medium-range surveillance (MRS) and transport fixed air capability, complementing the long-range, heavy-lift four-engine HC-130 aircraft. It replaces and enhances the current capability provided by the HU-25 Falcon. The two-engine high-efficiency turboprop design allows extended surveillance, quick response capability, at a relatively low cost per flight hour. The HC-144A is a multi-mission platform that performs Search and Rescue; Law Enforcement; Homeland Security; Marine Environmental Protection; and International Ice Patrol missions, as well as assist with cargo and personnel transport. It can perform aerial delivery of Search and Rescue equipment, such as rafts, pumps, and flares, and can be used as an On-Scene Commander platform. The asset delivers maritime domain awareness essential to achieving mission success.

The modern cockpit design provides pilots with superior situational awareness, reduced workload, and increased safety, allowing them to better concentrate on mission execution. Systems operators can collect, compile, and transfer vital information in near-real time to operational commanders on ship or shore, hundreds of miles from the aircraft. Satellite radios provide clear and uninterrupted voice and data exchange. The Automatic Identification System (AIS) allows crews to rapidly identify and monitor vessels, adding a robust layer to border security. The multi-mode surface and air search radar (MMR) can detect differences in backscatter between clear water and oil-covered water due to the dampening effects of oil on small wind-generated waves, while the EO/ IR sensor can detect the small temperature variation between clear and oil-covered water. The Common Operating Picture (COP) provides the capability to navigate to previously-marked pollution areas and update them based on current C4ISR and visual indications. The HC-144A has a rear ramp to facilitate roll-on/roll-off provisions from the cargo bay. This quick-change feature allows ground crews to re-configure the aircraft between maritime patrol, medical evacuation, and passenger/freight transport. Its medium size and high-lift wing design allow take-off and landing on short, unpaved landing areas, further enhancing the Coast Guard's abilities to serve its broad array of missions.

**Prior Key Events:**

- MPA #1 – #3 Delivery (2007)
- Mission System Pallet (MSP) #1- #3 Delivery (2007)
- MPA #4 – #5 Delivery (2009)
- MPA Initial Operating Capability (IOC) (2009)
- MPA #6 – #8 Delivery (2009)

*U. S. Coast Guard - FY 2013 Congressional Justification*

**Acquisition, Construction & Improvements**  
**FY 2013 Congressional Justification**  
(Dollars in Thousands)

**HH-65 Conversion and Sustainment Project**

**\$31,500**

**Project Description, Justification and Scope**

The purpose of the project is to modernize the Coast Guard's current fleet of 100<sup>10</sup> H-65 helicopters, converting them to MH-65 Short Range Recovery (SRR) helicopters. The modernization effort includes a service life extension, where obsolete components are replaced

with modernized and more capable sub-systems, including a new integrated cockpit and C4ISR suite. The H-65 Conversion and Sustainment Project is comprised of six discrete segments. Each of the six discrete segments consists of upgrades and modernization of aging components and sub-systems while enhancing the system's capability. Discrete segments (DS) 1, 2, and 3 were fully funded through prior year funding. DS 4 (Obsolete Component Modernization) and DS 6 (Automatic Flight Control System (AFCS) / Avionics) were started with prior year funding and will be continued with funds requested in FY 2013.

The H-65 Dolphin is the Coast Guard's short-range recovery helicopter, which has been in operation since 1984. The H-65 Conversion and Sustainment Project delivers incremental modernization of this asset to extend its expected service life through 2027.

**Prior Year Key Events:**

- DS 1 Engine Upgrade Completed (2007)
- DS 3 Airborne Use of Force (AUF) Initial Operational Capability (2008)
- DS 2 National Capital Region Air Defense (NCRAD) Complete (2010)
- DS 6 Begins Obtain Phase (2010)
- Completed NCRAD Project Sustainment (2011)
- DS 4 Achieved Initial Operational Capability (2011)

**FY 2012 Planned Key Events:**

- Continue obsolete component upgrades (DS 4)
- Continue cockpit modernization upgrades (AFCS/Avionics) (DS 6)
- DS 3 Full Operational Capability and transition to sustainment

**FY 2013 Planned Key Events:**

- Continue obsolete component upgrades (DS 4)
- Continue cockpit modernization upgrades (AFCS/Avionics) (DS 6)

---

<sup>10</sup> The current fleet of H-65s includes 100 aircraft, accounting for the loss of 6505 and 6523.

**U. S. Coast Guard**  
**Acquisition, Construction & Improvements**  
**FY 2013 Congressional Justification**  
(Dollars in Thousands)

**Program Oversight and Management** **\$25,000**

**Project Description, Justification and Scope**

This request provides funding for Program Oversight and Management (PO&M). PO&M funding supports activities associated with the transition of the Coast Guard's assets from acquisition to operation, including delivery, provision of logistics, training and other services necessary to ensure seamless integration into the operational fleet.

The Coast Guard is responsible for ensuring the products delivered by contractors and suppliers meet performance specifications. PO&M funds provide the Coast Guard with the capability to protect the government's interests during the acquisition and ensure contractors and suppliers deliver required products and services and meet prescribed contract terms and conditions. The Coast Guard accomplishes this management through staff located at the Program Management Office and at other contractor/government sites. Personnel working on acquisition projects include a mix of military, civilian, and support contractors experienced in all phases of large, complex acquisition programs. The Coast Guard uses these personnel to help ensure prime contractors and other government agencies (OGAs) satisfactorily perform functions consistent with existing policies, processes, and approved project plans. These activities include managing:

- Major milestone events and reviews (e.g., preliminary design review, production Readiness Review, etc.) associated with each project as it progresses through concept & technology development, system development and demonstration, production and deployment, and the operations and support phases.
- Cross-program documentation and analysis.
- Use of unique talents and professional expertise for Technical Evaluation Teams (TETs); ship design teams; and development of mandatory Acquisition documentation.
- Performance monitoring through the use of a variety of tools such as:
  - Earned Value Management System (EVMS), which permits detailed monitoring of cost and schedule performance;
  - Periodic reports, which provide a quarterly review of program cost, schedule, and performance criteria;
  - Acquisition Performance Management System (APMS) which provides web-based reporting on all aspects of program performance on a near real-time basis, depending upon the particular metric. This includes the QARC, monthly performance reports to DHS and various other reports for Program Management such as obligation plans, expenditure report, funds status, etc.
  - Transition of new assets to operations and sustainment after completion of operational testing, with staff serving as a liaison between the prime contractor's production of an asset and its turnover to the operational user and the Coast Guard support community.

PO&M funding also supports risk management processes and communication to mitigate risks providing programs with the best opportunity of success. Risk management includes OT&E done with the U.S. Navy's Commander Operational Test and Evaluation Forces (COMPOPTEVFOR) for the execution of project operational testing. While Developmental Test and Evaluation (DT&E) is the responsibility of

**Program Oversight and Management**

**\$25,000**

the prime contractor, OT&E is performed by the Coast Guard, where acquired assets are tested to ensure they meet the user's requirements.

**FY 2013 Activities Supported by Program Oversight and Management (PO&M)**

<b>Procurement</b>	<b>Justification</b>
Program Manager	Computer support project management site visits, management support priorities and supplies.
Contract Operations	Contracting Officer (KO) contract specialist support for Major System Acquisition projects, Defense Contract Management Agency (DCMA)/ Defense Contract Audit Agency (DCAA) support services.
Acquisition Workforce Management	Program training, strategic & tactical human capital support, Sustainment/Acquisition-Composite Model (SACOM) support for staff levels, program management & acquisition support.
Acquisition Support	Program management, systems engineering, and acquisition management support.
Strategic Planning & Communication	Strategic planning support, as required by the CG and Department of Homeland Security (DHS), communication management support, external coordination support, required reports and responses.
Testing and Evaluation	Execution of Surface, Aviation, Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR), and Logistics development and testing programs.
Resource Management	Acquisition Program Management System (APMS) support and software upgrade support, (SAS) renewal, capitalization & audit remediation support, internal controls support, and Life Cycle Cost Estimating (LCCE) support.
Acquisition Programs	Naval Sea Systems Command (NAVSEA) programmatic support, Naval Surface Warfare Center (NSWC) / NAVSEA direct-site support, program management support, and site visits.
Acquisition Programs – Aviation	Program management support to include administrative, business finance, accounting, risk management, schedule analysis, costs analysis, and site visits.
Acquisition Programs – Surface	Program management support to include administrative, business finance, accounting, risk management, schedule analysis, costs analysis; logistics support; and site visits.
Acquisition Programs – C4ISR	Program management support for program status control reporting, emerging issue resolution, cross domain issues, technical expertise; Integrated Product Team (IPT) support; and Major System Acquisition project coordinator at Space and Naval Warfare Systems Command (SPAWAR); and site visits.
Acquisition Programs Logistics	Program management support for surface & air assets, technical documentation, and performance management, and

**Acquisition, Construction & Improvements**  
**FY 2013 Congressional Justification**  
(Dollars in Thousands)

**System Engineering and Integration (SEI)** **\$2,500**

---

**Project Description, Justification and Scope**

This request funds system engineering design and integration work across the Coast Guard's major recapitalization projects. This request affects every aspect of the Coast Guard enterprise—encompassing the integration of human capital management; information technology; capital investment planning for air and surface platforms; logistics; Command, Control, Computers, Communications Intelligence, Surveillance, and Reconnaissance (C4ISR); and most importantly - the fleet operator.

This funding request leverages carryover funding from prior years. The transition to government Lead Systems Integrator (LSI) has led to a reassessment of the specific activities funded with this appropriation and a prioritization of those activities. This included an assessment of the most appropriate mix of government (i.e., NAVSEA and NAVAIR) and commercial sources. In FY 2011, the obligation rate decreased while the assessment was underway, resulting in higher than expected carryover into FY 2012. The adjustment to the FY 2013 request reduces the carryover to efficiently execute SEI funds in FY 2013 and the outyears.

SEI is essential for interoperability at the unit, system, and organizational levels. Effective systems integration ensures systems operate in a manner that minimizes the cost of asset acquisition, operations and maintenance, and mitigates risk inherent to a complex acquisition program. SEI is also intended to maximize the ability of Coast Guard assets to operate in concert with each other, and with those of partner agencies (e.g., DoD, DHS agencies, and state and local responders).

The Coast Guard is fielding an integrated system of interoperable aviation, cutter, and shore assets. Without SEI, these assets and their sub-systems would be implemented inefficiently and ineffectively. For example, one aspect of SEI involves establishing a methodology for managing requirements decomposition. Rather than have each acquisition program create asset-specific processes, databases and decision criteria, SEI funds a common requirements database architecture that facilitates rapid searches for common requirements, systems, and interfaces between assets. In addition, SEI funds modeling and simulation of capabilities across all new asset acquisitions, integrating the model with the rest of the Coast Guard assets' capabilities. This provides better decisions from a holistic perspective to deliver required capabilities as efficiently as possible. SEI emphasizes an integrated view of the project, yielding recognition of corresponding upgrades needed across other platforms and programs.

SEI evaluations will be performed across systems, subsystems, and component levels to analyze products and capabilities for interoperability, integration, modularity, and system commonality. These efforts culminate in the ability to determine and document predicted total system performance for numerous configurations and scenarios. SEI has the responsibility for the overall technical configuration development processes. SEI also funds an integrated data environment that allows all stakeholders access to appropriate documents as each program, technical authority, and contractor works through engineering processes.

U. S. Coast Guard - FY 2013 Congressional Justification

**System Engineering and Integration (SEI)**

**\$2,500**

FUNDING HISTORY AND KEY EVENTS

**Compliance with Public Laws, Regulations, Standards & Executive Orders**

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

**U. S. Coast Guard**  
**Acquisition, Construction & Improvements**  
**FY 2013 Congressional Justification**  
(Dollars in Thousands)

**C4ISR**

**\$40,500**

**Project Description, Justification and Scope**

This request includes funding for the design and development of Command, Control, Computers, Communications, Intelligence, Surveillance, and Reconnaissance (C4ISR) integrated hardware and software systems on NSC (National Security Cutter), OPC (Offshore Patrol Cutter), Long Range Surveillance (LRS) aircraft, and Medium Range Surveillance (MRS) aircraft. These assets are using interoperable C4ISR system designs to optimize lifecycle costs and operational effectiveness. The C4ISR project also provides IA (Information Assurance) support for the FRC (Fast Response Cutter).

- *New Asset Certification Support.* New assets being built and delivered need C4ISR hardware and software support to attain Authority to Operate (ATO). Support includes: Information Assurance testing; software safety systems analysis and testing, weapons systems safety testing; TEMPEST testing; Certification & Accreditation; Operational Testing; and Diminishing Manufacturing Sources (DMS) resolution.
- *OPC C4ISR Development.* A tailored software and hardware baseline will address OPC-specific requirements. This design effort will allow for interoperability of the OPC with other new cutters and air assets, as well as between DoD and other DHS assets.
- *Use of Navy Developed Sensors and Systems.* Cost sharing and alignment with DoD weapons systems will decrease life-cycle costs of Coast Guard systems. Incorporating and leveraging DoD systems allow Coast Guard assets to deploy with the Navy and provide clearance to use its weapons. As DoD updates its systems, integration with the updates, systems will require corresponding design adjustments.
- *Labs.* Lab work is necessary for the Coast Guard to manage the NSC, LRS, MRS baselines for Information Assurance, Diminishing Manufacturing Sources (DMS), and necessary engineering changes as well as to develop the C4ISR suite for OPCs. The labs will facilitate the Coast Guard Systems Integrator (SI) role and provide proper oversight, integration, and testing with minimal disruption to operational units. Ultimately, the labs reduce lifecycle costs by controlling configuration management, decrease impacts to users by reducing or eliminating tests on operational platforms, and reduce schedule by providing a dedicated platform on which to work. Labs include:

*Lab Location.....Purpose of Lab*

- Lowell, MA .....Emissions security (TEMPEST) certification test facility
- Owego, NY .....Aircraft mission system suite C-130J development
- Moorestown, NJ.....Asset baseline integration and development and baseline acceptance lab
- Portsmouth, VA .....C4I software support and Legacy integration

- *Execution Management.* In FY 2011, the C4ISR project delivered a modular, non-proprietary, federated system for better Coast Guard Management to facilitate assumption of SI roles. As new assets are delivered and the C4ISR system installed, certification, accreditation and authority to operate (ATO) requirements will require increased oversight. As the Coast Guard continues to increase oversight and manage integration of multiple vendors, execution support is needed to continue to assist government personnel in overseeing software development, synthesizing requirements decomposition, information assurance, certification, accreditation, authority to operate responsibilities, and executing other program management functions.

**C4ISR**

**\$40,500**

- *Information Assurance.* This includes updates to ensure C4ISR systems comply with continuously evolving DHS and DOD standards regarding information assurance (IA).
- *Engineering Change Proposals/Updates.* These efforts provide updated software and hardware designs for assets currently in production. Design updates are needed due to external impacts such as interoperability architecture changes, diminished manufacturing sources, hardware changes, and interface changes.
- *Logistics Management.* As the federated C4ISR system is fielded on existing new assets, all training facilities/equipment, technical and operations manuals for both surface and aviation assets will require updating.
- *Aviation Electronics.* As new aviation assets are procured, the MSP and MSS C4ISR baselines will diverge as materials experience DMS, inhibiting the Coast Guard's ability to efficiently missionize and sustain the assets. Of concern is the current Video and Mission Processor (VAMP) installed on the C-130Js and C-144s, CMA 4000 Flight and Display Management System, and the common software build. Commonality will reduce the life cycle costs of the C4ISR system.

**FY 2011 Key Events:**

- Delivery of federated C4ISR design
- Integration of C4ISR design with DOD tactical systems
- Provided Space, Weight, And Power estimates for notional OPC C4ISR design
- Critical system updates to address safety, IA, and diminishing manufacturing source issues
- Integration with sensor-align weapon systems with DOD programs to facilitate cost sharing

**FY 2012 Planned Key Events:**

- Award Engineering and lab contracts
- Engineering and logistics support for Segment 2 C4ISR suite Technology Demonstrator on an NSC
- Complete specifications for OPC C4ISR suite
- Complete deployment plan and operational testing for newly acquired NSCs
- Support new asset acquisitions' IA and ATO certifications, including provision of changes necessary to maintain
- Field satellite communication systems on legacy cutters and study/mitigate electromagnetic interference (EMI) caused by these systems

**FY 2013 Planned Key Events:**

- Participate in OPC source selection
- Perform OPC C4ISR capabilities development
- Complete prototype evaluation of Segment 2 on an NSC
- Address Aviation Electronics DMS issues

**C4ISR****\$40,500**

## FUNDING HISTORY

<i><b>FY</b></i>	<i><b>\$K</b></i>	<i><b>Major Activity Funded by Appropriation</b></i>
FY 2002	\$125,480	NSC/MPA/MSP Seg1,2 - Shore Facilities/Cutter Seg5
FY 2003	\$ 22,032	NSC/MPA/MSP Seg1,2 - Shore Facilities/Cutter Seg5
FY 2004	\$101,134	NSC/MPA/MSP Seg1,2 - Shore Facilities/Cutter Seg5
FY 2005	\$ 53,600	NSC/MPA/MSP Seg1,2 - Shore Facilities/Cutter Seg5
FY 2006	\$ 47,520	NSC/MPA/MSP Seg1,2 - Shore Facilities/Cutter Seg5
FY 2007	\$ 50,000	NSC/MPA/MSP Seg1,2 - Shore Facilities/Cutter Seg5
FY 2008	\$ 89,630	NSC/MPA/MSP Seg1,2 - Shore Facilities/Cutter Seg5
FY 2009	\$ 88,100	NSC/MPA/MSP Seg1,2 - Cutter Seg5
FY 2010	\$ 35,000	NSC/MPA/MSP Seg1,2
FY 2011	\$ 30,439	NSC/MPA/MSP Seg1,2
FY 2012	\$ 38,500	NSC/OPC/MPA/MSP Seg1,2
<i><b>Subtotals</b></i>	<i><b>\$681,435</b></i>	<i><b>Funding received for FY 2002 through FY 2012</b></i>

\* **Segment 1** developed a closed and complex C4ISR baseline for NSCs, HC-144As, and HC-130Js. Developed through the Integrated Coast Guard Systems (ICGS) contractor, this system is proprietary and does not allow the Coast Guard the ability to manage additional development outside of the prime contractor, nor does it provide an affordable means for software sustainment. Segment 1 is fully fielded.

\* **Segment 2** began the transition of the proprietary system developed in Segment 1 towards an open architecture owned and controlled by the Coast Guard. It separated the Segment 1 design into modular, scalable functional components with clear interfaces allowing the Coast Guard to manage changes and sustain the system separate from the prime contractor. Segment 2 establishes a common baseline across the NSC, C-144, and C-130J assets and integrated the Special Compartmented Information Facility (SCIF) into the NSC.

\* **Segment 5** (Upgrades to existing assets):

*In-Service Cutters*

- Medium Endurance Cutter (MEC) – 210s, 270s
- High Endurance Cutter (HEC) – 378s

*Shore Facilities*

- CAMS (Communications Area Master Stations)
- Training Center Petaluma
- COMMSTAs (Communication Stations)
- Command Centers

**Significant Changes**

Fielding Segment 2 C4ISR suite has been expedited to prototype the Segment 2 design on an NSC in early FY 2013, requiring aviation electronics DMS issues, such as the Video and Mission Processor (VAMP) Redesign to be extended until FY 2013.

**U. S. Coast Guard**  
**Acquisition, Construction & Improvements**  
**FY 2013 Congressional Justification**  
(Dollars in Thousands)

**CG Logistics Information Management System (CG-LIMS)** **\$2,500**

**Project Description, Justification and Scope**

This request supports the development and delivery of the Coast Guard Logistics Information Management System (CG-LIMS). This funding will continue CG-LIMS configuration and phased deployment to Coast Guard operational assets and support facilities. Specifically, the funding will support Initial Operating Capability of the Configuration and Maintenance Management module of CG-LIMS.

CG-LIMS will directly support the Coast Guard Modernization goal of a single, unified logistics system that improves mission readiness, operational effectiveness and decision making by enabling decision support at the enterprise and tactical level. CG-LIMS will use the Mission Support Business Model and the four cornerstones of that model: Configuration Management; Total Asset Visibility; Bi-Level Maintenance; and a single point of accountability through Product Line Managers.

CG-LIMS will be the authoritative source for the configuration of all Coast Guard assets. It will enable product line management by providing total asset visibility throughout the enterprise. It will be the tool through which all maintenance is managed and by which the enterprise supply chain is driven. All technical information relating to Coast Guard assets, including technical publications and manuals, drawings, maintenance procedure cards, and maintained raw data will be organized and managed in the system. The components of configuration, maintenance, supply, and technical information will be tightly integrated and configured to allow efficient execution of a standardized business process. As mission support is executed throughout the Coast Guard, CG-LIMS will interface with finance, procurement, and human resources so that enterprise business needs are met in a standardized manner. CG-LIMS will also reach out to systems beyond the Coast Guard to execute integrated logistics with other government agencies and vendors.

CG-LIMS is planned for phased implementation by segments. Segment 1 will start with configuration and maintenance management functionality for the HC-144A Maritime Patrol Aircraft (MPA) aviation product line; once deployed to that product line, Initial Operating Capability (IOC) will be declared. Immediately following IOC, Segment 1 will be deployed to other asset product lines. CG-LIMS will continue to be implemented by segments across the enterprise.

**U. S. Coast Guard**  
**Acquisition, Construction & Improvements**  
**FY 2013 Congressional Justification**  
(Dollars in Thousands)

**Nationwide Automatic Identification System (NAIS)**

**\$6,000**

**Project Description, Justification and Scope**

The FY 2013 request will be used to continue recapitalizing the existing interim NAIS system in 58 ports and 11 coastal areas by replacing it with the permanent solution design and technology via the core system upgrade. Below on the left is an example of an interim site in Tranquillon Mountain, CA that is anchored by cinder blocks. When recapitalized with the permanent solution, the NAIS equipment will be installed to co-locate with Rescue 21 (R21) infrastructure, such as the tower pictured below in San Onofre, CA.

*Tranquillon Mountain, California*  
(Interim capability)

*R21 tower in San Onofre, California*  
(Permanent co-located infrastructure)

NAIS is a data collection, processing, and distribution system being implemented in response to the requirements of the Maritime Transportation Security Act and consistent with the International Maritime Organization (IMO) standards to enhance maritime domain awareness (MDA). The project provides the necessary capability to ensure the effective exchange of information between AIS-equipped vessels, aircraft, aids to navigation, and shore stations within all major U.S. ports, waterways, and coastal zones. The data collected by NAIS will be shared with other pertinent stakeholders and decision makers in support of maritime security at critical ports. NAIS supports a layered defense and requirements for Advanced Notice of Arrival by correlating AIS data with target vessel reporting and other maritime awareness data to focus resources on higher interest vessels.

NAIS DEPLOYMENT: *Conditional Acceptance schedule*

- The chart below itemizes, in priority order, the 58 ports that have the “Interim Capability” located in 33 Sectors. (Sectors “without” are: Southeastern New England and Juneau.) The 11 coastal areas are encompassed by the same geographic regions as the 58 ports and Sectors listed in the chart below.

U. S. Coast Guard - FY 2013 Congressional Justification

**Nationwide Automatic Identification System (NAIS)**

**\$6,000**

- LEFT COLUMNS ... indicate the *Number of ports per District, by Sector*
- RIGHT COLUMNS ... list the *Planned Accomplishments by Fiscal Year* per the four key activities that precede “Conditional Acceptance” of a port, which are:

Survey.....Conduct/complete the site survey to determine configured hardware placement  
 H/w .....(Hardware) – meaning “purchase configured hardware” for the ports by Sector  
 Install.....Deploy the port’s configured hardware for the permanent transceive system  
 Test .....Complete port testing of core system and installed configured hardware  
 Accept.....Permanent system is activated and placed into operational use by the port

Number of Ports per CG District & by Sector										Priority Order of the 58 Ports		Planned Accomplishments by Fiscal Year

\* **First 8 ports** (3 sectors: Hampton Roads, Delaware Bay, Mobile): Initial Operating Capability of the Permanent System that is recapitalizing the interim capability in the 58 ports.

**FY 2011 Key Events:**

- Completed site surveys of R21 sites within five sectors (Houston-Galveston, Corpus Christi, Long Island Sound, New York and Baltimore) to co-locate NAIS equipment with R21 infrastructure to provide NAIS coverage for ports within these sectors.

**FY 2012 Planned Key Events:**

- Establish Initial Operating Capability of the Permanent System subsequent to test events of the transceive capability within the first three Sectors (Mobile, Hampton Roads and Delaware Bay (Philadelphia, PA)).
- Equipment deployments to Sectors New Orleans and Houston Galveston that will upgrade another ten of the 58 ports with the Permanent System.
- Complete site surveys of R21 sites within six Sectors (San Francisco, LA/LB, San Diego, Miami, Key West, and Puget Sound) to co-locate NAIS equipment with R21 infrastructure to provide NAIS coverage for ports within these sectors.
- Equipment acquisition, including procurement of NAIS base station equipment, antennas, networking equipment, annual software licensing, and other shelter and site equipment for three Sectors (Corpus Christi, Long Island Sound and New York)
- Continue one-for-one replacement of interim prototype capability originally deployed in 58 ports, with Permanent System design and technology.

*U. S. Coast Guard - FY 2013 Congressional Justification*

**Nationwide Automatic Identification System (NAIS) **\$6,000****

**FY 2013 Planned Key Events:**

- Equipment deployments to three Sectors (Corpus Christi, Long Island Sound and New York) that will recapitalize another four of the 58 ports with the Permanent System.
- Complete site surveys of R21 sites within six Sectors (Columbia River, Charleston, North Carolina, Jacksonville, St. Petersburg, and Boston) to co-locate NAIS equipment with R21 infrastructure to provide NAIS coverage for ports within these Sectors.
- Equipment acquisition, including procurement of NAIS base station equipment, antennas, networking equipment, annual software licensing, and other shelter and site equipment for seven Sectors (Baltimore, San Francisco, LA/LB and San Diego, Miami, Key West and Puget Sound)

CONTRACTORS

**Northrop Grumman Space and Mission Systems, Inc. (Herndon, VA)** – Prime Contractor for the design and installations of the Permanent System in the first three Sectors.

**Compliance with Public Laws, Regulations, Standards & Executive Orders**

Adhering to the National Environmental Policy Act (NEPA), the NAIS project has completed a Programmatic Environmental Impact Statement (PEIS), dated October 6, 2006. The proposed action analyzed in the PEIS is the broad scope of implementation of the NAIS project. As supported by the analysis in the PEIS, the NAIS Project Manager decided to implement the project using the preferred alternative: a combination of coverage mechanisms, including a combination of collocated and newly built shore-based Radio Frequency (RF) sites for short-range AIS coverage. Implementation of the proposed NAIS project through the Preferred Alternative ensures that the Coast Guard satisfies the purpose and need for NAIS. The Preferred Alternative implementation approach offers siting flexibility that will help mitigate or minimize the potential for environmental impacts as well as allow the Coast Guard to maximize the use of existing assets to meet coverage requirements. This decision is documented in a Record of Decision issued on October 27, 2006.

The PEIS provides a general level of analysis of alternatives and environmental impacts and serves as a top-tier environmental analysis of the general project of installing a nationwide AIS-based vessel detection, identification, tracking, and communication system. As a continuation of the environmental planning process, the Coast Guard is conducting site-specific environmental analysis coincident with the project implementation as specific sites are identified. All sites selected and recapitalized with the NAIS

Acquisition, Construction & Improvements  
FY 2013 Congressional Justification  
(Dollars in Thousands)**

**Air Station Barber's Point Rinse Rack** **\$5,000**

**Project Description, Justification and Scope**

This request fully funds construction of an aircraft rinse rack facility to properly and effectively rinse C-130 aircraft at Air Station Barbers Point, HI (ASBP), the only CG air station that lacks a hangar to house C-130s. Due to the close proximity to the ocean surf, aircraft stationed at ASBP are exposed to a corrosive marine environment requiring additional parts and maintenance to keep aircraft operational. The inability to hangar aircraft in this corrosive environment increases maintenance costs and reduces operational availability. The C-130s at ASBP experience the highest programmed depot maintenance and support costs compared to all other CG air stations with C-130s. Corrosion of aircraft at ASBP result in more frequent maintenance and corrosion inspections, which not only increases costs, but reduces total Fully Mission Capable time. The rinse rack will reduce the amount of corrosion to the aircraft by rinsing off salt and other corrosive elements, ensuring the platform meets its intended service life.

FY 2013 Congressional Justification  
(Dollars in Thousands)**

**Cold Bay Hangar**

**\$5,000**

**Project Description, Justification and Scope**

The request fully funds renovation of the existing hangar facility and the detailed design and construction of a hangar addition to accommodate two helicopters and crew with utilities, maintenance space, messing and berthing for a minimum of 14 personnel. Forward Operating Location (FOL) Cold Bay provides seasonal Search and Rescue (SAR) coverage for fisheries in the Bering Sea and Aleutians Islands and ensures two rotary wing aircraft, either HH-65 or HH-60J, are located close to seasonal Aleutian Islands/Bering Sea fishing grounds resulting in reduced SAR response time by approximately six hours when compared to dispatching a helicopter from Air Station Kodiak. The six hour reduction in SAR response time is critical when executing life-saving rescues in this remote, inhospitable area of Alaska, where a matter of hours makes a marked difference in the ability to save lives.

FOL Cold Bay began operating in 1990 from an existing leased hangar. The lack of adequate facilities, infrastructure and resources to support forward deployed rotary wing aircraft operations at Cold Bay will impact Coast Guard SAR in the region. The loss of the Cold Bay FOL will result in the delay of CG resources to emergencies when responding from the Saint Paul FOL, 276 miles away, or Air Station Kodiak, 371 miles away.

Construction will occur through a Design-Build process whereby both design and construction is awarded under a single contract.

Acquisition, Construction & Improvements  
FY 2013 Congressional Justification  
(Dollars in Thousands)**

**Sitkinak, AK Refueling Site Recapitalization \$1,100**

**Project Description, Justification and Scope**

The request fully funds replacement of the existing fuel tanks and fueling systems with military grade systems housed in prefabricated, weather tight shelters with integral spill containment at Sitkinak, AK. The existing fueling equipment, tanks, and the shelter are failing and the fueling equipment does not meet required military standards for physical security and environmental safety measures. There is no fuel spill containment protection on site which poses a significant environmental risk at this remote location. The existing shelter does not properly protect equipment and crew members from the harsh elements on this island with nearly constant 30-40 knots winds and storm wind conditions exceeding 150mph. A complete recapitalization of the existing fuel system, containment, and shelter is required to meet operations in the extreme Alaska environment.

This fuel stop is necessary for rotary wing aircraft, both the HH-65 and HH-60J, to reach their forward operating location at Cold Bay, AK. Without the fueling point at Sitkinak, the HH-65 must make two intermediate stops, flying at the limits of their range. Not being able to reach Cold Bay Forward Operating Location (FOL) would increase Search and Rescue response time from the Saint Paul FOL 276 miles away, or Kodiak 371 miles away.

**U. S. Coast Guard**  
**Acquisition, Construction & Improvements**  
**FY 2013 Congressional Justification**  
(Dollars in Thousands)

**Station New York Boat Ramp**

**\$1,900**

**Project Description, Justification and Scope**

The request fully funds construction of a boat ramp for launching small boats at Station New York, NY, for both the Station and Maritime Safety and Security Team (MSST) New York. The Coast Guard units stationed in Staten Island are critical to the security of New York Harbor and are mandated to respond quickly to any emergency.

Station New York currently does not have a boat ramp or boat hoist to launch and retrieve small boats, crucial to ensuring the Coast Guard is able to meet Search and Rescue and Ports and Waterways Coastal Security (PWCS) response times. Station New York and MSST New York both currently use off-site ramps to launch and retrieve small boats in the execution of assigned missions. The off-site ramps are a time-consuming transit from the Station and require transporting twenty-five foot boats on trailers through Staten Island's narrow and congested streets and do not offer 24-hr accessibility. In addition, maintenance procedures require frequent removal of boats, and thus it is impractical to keep them in the water all the time when in a heightened readiness status.

The lack of a readily accessible boat ramp negatively impacts the unit's mission execution and the delay of launching small boats could adversely impact the PWCS and Search and Rescue mission.

**Acquisition, Construction & Improvements**  
**FY 2013 Congressional Justification**  
(Dollars in Thousands)

**Shore Infrastructure Survey and Design** **\$1,000**

**Project Description, Justification and Scope**

The Coast Guard's FY 2013 Survey and Design (S&D) budget request includes survey and design funding essential to future year Acquisition, Construction and Improvement (AC&I) shore projects.

Funding will support planning and engineering studies, master plans, project development and design, appraisals, real property requirements and other architectural/engineering efforts. Completing proper planning and design helps to ensure AC&I projects are properly assessed, planned and prioritized prior to seeking project appropriations. The projects supported by this request contribute to the long-range plans and support of operational units. Specifically, this funding is requested to complete initial S&D for facilities/purposes including the following:

- Sector Columbia River Area Housing/UPH
- CG Station Vallejo
- CG Station Morro Bay

**Acquisition, Construction & Improvements**  
**FY 2013 Congressional Justification**  
(Dollars in Thousands)

**Shore AC&I Waterways ATON Infrastructure** **\$1,000**

**Project Description, Justification and Scope**

This request provides funding to establish, maintain and improve transportation safety on Federal waterways through construction and improvements to buoys and structures which assist in navigation. Waterways infrastructure projects require an annual base funding level to respond to requirements from expanded U.S. Army Corps of Engineers (ACOE) activity and aging/damaged aids to navigation (AtoN).

This request will fund projects that are critical to safe and efficient maritime transportation. Projected projects include construction of buoys and structures in the following locations: Pleasant River, ME; Port Canaveral and Port Manatee, FL; Mobile, AL; Gulfport, MS; Port Charles, LA; Anaheim Bay and Mission Bay, CA; Puget Sound, WA; and Sumner Strait, AK.

---

**Project Description, Justification and Scope**

This request supports shore facility infrastructure modifications, upgrades, and new construction associated with homeporting new or modified cutters, boats, and aircraft. The project also supports infrastructure modifications, upgrades, and new construction to provide logistics support for new or modified cutters, boats, and aircraft. The work accomplished in this acquisition project in FY 2011 and prior years was formerly executed under “Deepwater Logistics.”

**Facility and Infrastructure Upgrades** – Funding in FY 2013 makes progress toward completing the following facility upgrades and infrastructure improvements:

- **Pier, support facility and shore power modifications to support three FRC homeports, which will accommodate a total of six FRCs.** The funding will support the design and construction of homeport facility additions, improvements, and renovations, at three locations: South Portland, ME; Atlantic Beach, NC; and Cape May, NJ. The funding provides improvements such as electrical upgrades, dredging to accommodate deeper drafts of the new cutters, structural improvements to the piers to accommodate larger loads, and shore facilities for storage, maintenance, and other in-port activities associated with the arrival of the new FRCs. These three locations are essential to the overall operational force laydown, and need to be modified in order to accommodate the new FRCs. This funding request provides for facilities to meet asset delivery schedules and minimum facilities requirements based on the FRCs dimensions, shore-tie requirements, operational needs, crewing status, and maintenance schedules. The funding request for the FRC homeport in Cape May, NJ is accelerated in order to align with a Major Shore AC&I project at the same location. This will minimize disruption to ongoing operations, and capitalize on synergies in contracting, design, and construction efforts between the two projects, and lower overall costs in that location, compared to doing these projects separately.
- **New facility for MPA aircraft-specific maintenance training and Mission System Pallet (MSP) maintenance training at Aviation Technical Training Center (ATTC) in Elizabeth City, NC.** This funding will provide training facilities for in-house training of aviation maintenance personnel on both the actual MPA airframe and associated systems. This building is essential to training for USCG personnel on MSPs for the MPA. No ground facilities currently exist to conduct this training. The proper maintenance of the MSPs is crucial to the operational effectiveness and availability of the multi-mission MPA. The MSP is a portable suite of electronic equipment that enables the aircrew to compile data from the aircraft’s multiple integrated sensors to transmit and receive classified and unclassified information from other assets including other aircraft, surface vessels and shore facilities. This procurement is separate from the purchase of the MPA training aides that this building will house.
- **New hangar for MPA depot-level maintenance at the Aviation Logistics Center (ALC) in Elizabeth City, NC.** This project provides a new three-bay hangar to perform depot-level maintenance on the new HC-144A MPA. ALC will have a steadily increasing depot-level maintenance workload as more MPAs are delivered to the USCG. These aircraft have a different

**Major Acquisition Systems Infrastructure**

**\$49,411**

facilities footprint compared to the aircraft they are replacing. This project will allow for the efficient and effective execution of MPA programmed depot-level maintenance at ALC.

- **Facility infrastructure modifications to support MPAs at the Aviation Logistics Center (ALC) in Elizabeth City, NC.** This project modifies a current maintenance work-space at ALC into a Mission System Integration Laboratory and secure-space for maintenance and storage of classified materials and equipment. These are new maintenance requirements based upon the acquisition of the MPA. The project also funds the reestablishment of the existing tubing shop that will be displaced by the project.
- **Provide engineering studies and analyses for future-year facilities projects covered under this acquisition program.** This funding will help to establish a 5-year window of planning documents in order to properly budget for homeport decisions in association with future asset deliveries. This will also help to more effectively integrate homeporting decisions for different classes of cutters and aircraft over the long-term planning horizon.
- **Shore infrastructure modifications to support RB-Ms.** This funding is for necessary upgrades associated with delivery of new RB-Ms to various USCG small boat stations across the country. The improvements are generally related to length of the current docks, improvements to floating docks, improvements and upgrades to electrical shore ties, and structural modifications to accommodate the larger, more complex systems on the RB-Ms.

**COST ESTIMATE OF WORK TO BE FUNDED THIS FISCAL YEAR 2013:**

ITEM	QUANTITY	TOTAL (\$K)
Facilities	Job	<u>\$49,411</u>
	<b>Total</b>	<b>\$49,411</b>

The list below provides an outline of facility upgrades completed under Deepwater Logistics:

**Facilities Upgrades**

- Design for Hangar, Off-Cycle Crew Support Unit (OCCSU) Building & Pier Upgrades
- Aviation Training Center (ATC) Mobile Hangar Construction (Phase I)
- Environmental Assessment for Alameda, CA
- Communications Area Master Station Atlantic (CAMSLANT) Facility Expansion Design
- Training Center Petaluma Building Rehabilitation and Expansion (Phase I)
- Pacific Area/District 11 Command Center Facility Upgrades
- CAMSLANT Facility Expansion Construction
- Pier/shore tie upgrades at Alameda, CA
- ATC Mobile Hangar Construction (Phase 2)
- Various facility upgrades for C4ISR equipment installs
- Completion of Phase 1 Bldg 500 Rehabilitation at TRACEN Petaluma
- Design of OCCSU Building at Alameda, CA
- Upgrade of NSC shore ties at Alameda, CA
- Upgrade of NSC pier facilities at Alameda, CA

*U. S. Coast Guard - FY 2013 Congressional Justification*

**Major Acquisition Systems Infrastructure \$49,411**

Construct MPA Simulator Building ATC Mobile, AL  
 Upgrade/dredging of NSC waterfront at Alameda, CA  
 Stand-up of Deepwater Facility at TISCOM  
 Stand-up of Deepwater Facility at C2CEN  
 Upgrade of Naval Engineering Support Unit NSC maintenance facilities at Alameda, CA  
 Deepwater Systems Integration Project Office Move to Jemal Building, Washington, DC  
 FRC Miami Homeport Preparations – Phase 1  
 Engineering and Environmental Assessments of Deepwater Homeports & Aviation Sites

**CONTRACTORS:**

All Major Acquisition Systems Infrastructure projects are executed by the Coast Guard with technical oversight provided by the Shore Infrastructure Logistics Center, the Facilities Design and Construction Center, and Civil Engineering Units located around the United States. Each project is contracted to a construction contractor for execution.

**Significant Changes**

No significant changes.

**Acquisition, Construction & Improvements**  
**FY 2013 Congressional Justification**  
(Dollars in Thousands)

**Minor AC&I Shore Construction Projects** **\$5,000**

**Project Description, Justification and Scope**

This request provides funds to complete minor AC&I shore facility construction projects. These projects are typically less complex and require less advance planning than major shore projects. Funds will be used to complete minor projects that have costs estimates which exceed the construction authority provided in the Operating Expense appropriation. For example, this may include:

- Emergency repair projects which have cost estimates that are greater than 50% of the plant replacement value;
- Minor facility improvements, which cost more than one million dollars, that are needed to adapt to changing/increased missions.

**Significant Changes**

No significant changes.

(Dollars in Thousands)

**AC&I Core**

**\$600**

**Project Description, Justification and Scope**

This funding is necessary to cover costs associated with project shared service and training activities for major acquisition projects. The primary initiatives include Acquisition Project Office shared services support, contractor support services, records storage and training. The funding allows the Coast Guard to maintain an effective acquisition process by providing AC&I resources that are not project-specific. Resources are needed to maintain core competencies and capabilities necessary to execute assigned workload while meeting various requirements established in the Chief Financial Officer Act, Clinger-Cohen Act and OMB Circular A-76.

**Compliance with Public Laws, Regulations, Standards & Executive Orders**

This funding request lists requirements that are in accordance with Appropriations laws and the Chief Financial Officer Act.

**U. S. Coast Guard**  
**Acquisition, Construction & Improvements**  
**FY 2013 Congressional Justification**  
(Dollars in Thousands)

**Direct Personnel Costs** **\$116,798**

**Project Description, Justification and Scope**

This request funds the salaries, compensation and support costs (including annual pay raise and COLA) for personnel who manage, execute and administer multi-year funded projects within the Acquisition, Construction and Improvements (AC&I) Program. These personnel will support projects requested in this budget submission, as well as prior year funded AC&I projects, by performing planning, design, engineering, contracting, project management, quality assurance and logistics support activities. This ensures the products and services acquired through the AC&I program are completed on time, on budget and in compliance with performance requirements.

The requested funding level will support a total of 842 FTE (an increase of 57 FTE from the FY 2012 Enacted level). These personnel will support projects requested in this budget submission, as well as prior year funded AC&I projects, by performing planning, design, engineering, contracting, project management, quality assurance and logistics support activities. This ensures the products and services acquired through the AC&I program are completed on time, within budget, and in compliance with performance requirements.

**Significant Changes**

The \$7 million increase from the FY 2012 enacted level reflects an increase of 57 FTE for the AC&I personnel account. This additional funding better aligns FTE to FTP by increasing the FTE to 842 while simultaneously reducing FTP to 880 to address misalignment of FTE and FTP identified during FY2011. The increased FTE accounts for the anticipated vacancy rate associated with the Coast Guard’s Direct Hiring Authority for billets funded from this account. The previous FTE and FTP allocations did not account for the vacancy rate associated with the Coast Guard’s Direct Hiring Authority provided in the *2010 Coast Guard Authorization Act*.

## Summary Justification and Explanation of Changes

### Travel

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 14,819	\$ 7,412	\$ 9,631	\$ 2,219

Travel includes all costs of transportation of persons, subsistence of travelers and incidental travel expenses in accordance with Federal travel regulations. Specifically, funds transport of personnel in support of training, project management and oversight of the Survey and Design, National Security Cutter, Offshore Patrol Cutter, Fast Response Cutter, Cutter Boats and Arctic Vessel. Funding in FY 2013 reflects the anticipated need.

### Advisory and assistance services

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 103,736	\$ 51,881	\$ 67,417	\$ 15,536

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) and other agencies within the Federal Government. Funding in FY 2013 reflects the anticipated need.

### Other services

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 118,555	\$ 59,293	\$ 77,048	\$ 17,755

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of GPRA and other performance measurement initiatives. Funding in FY 2013 reflects the anticipated need.

### Supplies and materials

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 74,097	\$ 37,058	\$ 48,155	\$ 11,097

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters and boats, supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. Funding in FY 2013 reflects the anticipated need.

**Equipment**

<b>FY 2011</b>	<b>FY 2012</b>	<b>FY 2013</b>	<b>2012 - 2013</b>
<b>Actual</b>	<b>Enacted</b>	<b>Requested</b>	
<b>Obligations</b>	<b>Budget Authority</b>	<b>Budget Authority</b>	<b>Change</b>
\$ 1,037,359	\$ 518,812	\$ 674,167	\$ 155,355

This object class covers the purchase of capitalized and non-capitalized assets. Funding in FY 2013 reflects the anticipated need.

**Land and structures**

<b>FY 2011</b>	<b>FY 2012</b>	<b>FY 2013</b>	<b>2012 - 2013</b>

## Summary Justification and Explanation of Changes

### Travel

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 821	\$ 1,478	\$ 771	\$ (707)

Travel includes all costs of transportation of persons, subsistence of travelers and incidental travel expenses in accordance with Federal travel regulations. Specifically, funds transport of personnel in support of training, project management and oversight of the Maritime Patrol Aircraft and Long Range Surveillance Aircraft (C-130H/J) projects. Funding in FY 2013 reflects the anticipated need.

### Transportation of things

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 140	\$ 251	\$ 131	\$ (120)

Transportation of things includes all costs of the care of such things while in process of being transported and other services incident to the transportation of things. Specifically, funding provides for shipment of goods, equipment, supplies and materials to support completion of AC&I projects. Funding in FY 2013 reflects the anticipated need.

### Other rent

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 129	\$ 233	\$ 121	\$ (112)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. Funding supports lease renewals for facilities (e.g., office space, hangar facilities, equipment storage and maintenance facilities, etc.). Funding in FY 2013 reflects the anticipated need.

### Communication, utilities, and misc charges

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 48	\$ 87	\$ 46	\$ (41)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for facility utilities, fuel requirements, and postal costs. Funding in FY 2013 reflects the anticipated need.

### Advisory and assistance services

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 10,776	\$ 19,397	\$ 10,123	\$ (9,274)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) and other agencies within the Federal Government. Funding in FY 2013 reflects the anticipated need.

**Other services**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$	12,233	\$ 22,020	\$ 11,492	\$ (10,528)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of GPRA and other performance measurement initiatives. Funding in FY 2013 reflects the anticipated need.

**Research and development**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$	85	\$ 153	\$ 80	\$ (73)

Contracts for the conduct of basic and applied research and development. Funding in FY 2013 reflects the anticipated need.

**Supplies and materials**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$	7,602	\$ 13,684	\$ 7,142	\$ (6,542)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. Funding in FY 2013 reflects the anticipated need.

**Equipment**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$	102,317	\$ 184,181	\$ 96,124	\$ (88,057)

This object class covers the purchase of capitalized and non-capitalized assets. Funding in FY 2013 reflects the anticipated need.

**Land and structures**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$	12,717	\$ 22,890	\$ 11,948	\$ (10,942)

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. Funding in FY 2013 reflects the anticipated need.

## Summary Justification and Explanation of Changes

### Travel

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 1,103	\$ 917	\$ 598	\$ (319)

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. Funding in FY 2013 reflects the anticipated need.

### Transportation of things

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 188	\$ 156	\$ 102	\$ (54)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding in FY 2013 reflects the anticipated need.

### Other rent

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 174	\$ 144	\$ 94	\$ (50)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. Funding supports lease renewals for facilities (e.g. office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). Funding in FY 2013 reflects the anticipated need.

### Communication, utilities, and misc charges

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 65	\$ 54	\$ 35	\$ (19)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Funding in FY 2013 reflects the anticipated need.

### Printing and reproduction

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ -	\$ -	\$ -	\$ -

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. Funding includes charges associated with publication of Coast Guard training manuals, operational instructions, reports and other Coast Guard directives. Funding in FY 2013 reflects the anticipated need.

**Advisory and assistance services**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
	\$ 14,483	\$ 12,033	\$ 7,855	\$ (4,178)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) and other agencies within the Federal Government. Funding in FY 2013 reflects the anticipated need.

**Other services**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
	\$ 16,442	\$ 13,660	\$ 8,917	\$ (4,743)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of GPRA and other performance measurement initiatives. Funding in FY 2013 reflects the anticipated need.

**Research and development**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
	\$ 114	\$ 95	\$ 62	\$ (33)

Contracts for the conduct of basic and applied research and development. Funding in FY 2013 reflects the anticipated need.

**Supplies and materials**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
	\$ 10,218	\$ 8,489	\$ 5,542	\$ (2,947)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. Funding in FY 2013 reflects the anticipated need.

**Equipment**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
	\$ 137,523	\$ 114,260	\$ 74,586	\$ (39,674)

This object class covers the purchase of capitalized and non-capitalized assets. Funding in FY 2013 reflects the anticipated need.

**Land and structures**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
	\$ 17,093	\$ 14,203	\$ 9,271	\$ (4,932)

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. Funding in FY 2013 reflects the anticipated need.

## Summary Justification and Explanation of Changes

### Travel

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 896	\$ 972	\$ 532	\$ (440)

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. Funding in FY 2013 reflects the anticipated need.

### Transportation of things

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 152	\$ 165	\$ 90	\$ (75)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Specifically, funding supports the shipment of military member's household goods in conjunction with Permanent Change of Station (PCS) moves.

### Other rent

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 141	\$ 153	\$ 84	\$ (69)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. Funding supports lease renewals for facilities (e.g. office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.).

### Communication, utilities, and misc charges

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 53	\$ 57	\$ 31	\$ (26)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters, and aircraft, utility costs including shore facility utilities and cutter, boat and aircraft fuel requirements, and postal costs.

### Advisory and assistance services

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 11,760	\$ 12,752	\$ 6,987	\$ (5,765)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) and other agencies within the Federal Government. Funding in FY 2013 reflects the anticipated need.

**Other services**

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 13,350	\$ 14,476	\$ 7,931	\$ (6,545)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of GPRA and other performance measurement initiatives. Funding in FY 2013 reflects the anticipated need.

**Research and development**

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 93	\$ 101	\$ 55	\$ (46)

Contracts for the conduct of basic and applied research and development. Funding in FY 2013 reflects the anticipated need.

**Supplies and materials**

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 8,296	\$ 8,996	\$ 4,929	\$ (4,067)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. Funding in FY 2013 reflects the anticipated need.

**Equipment**

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 111,660	\$ 121,081	\$ 66,339	\$ (54,742)

This object class covers the purchase of capitalized and non-capitalized assets. Funding in FY 2013 reflects the anticipated need.

**Land and structures**

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 13,878	\$ 15,050	\$ 8,247	\$ (6,803)

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. Funding in FY 2013 reflects the anticipated need.

## Summary Justification and Explanation of Changes

### Salaries and Benefits

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 98,458	\$ 102,032	\$ 107,922	\$ 5,890

Currently, all salaries, benefits, and support for the military and civilian personnel who administer AC&I contracts are funded by the AC&I appropriation, whereas 97 percent of the Coast Guard's personnel is funded from the OE appropriation. AC&I has a specific annual appropriation to fund "personnel compensation and benefits and government program management related costs." Annual AC&I personnel compensation appropriation, rather than the multi-year project funds, must be used to fund all AC&I related personnel costs. Funding includes the proposed pay raise (1.7 percent for military and .5 percent for civilians), medical benefits, other mandatory personnel entitlements.

### Travel

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 93	\$ 46	\$ 53	\$ 7

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. Funding in FY 2013 reflects the anticipated need.

### Transportation of things

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 16	\$ 8	\$ 9	\$ 1

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Specifically, funding supports the shipment of military member's household goods in conjunction with Permanent Change of Station (PCS) moves. Funding in FY 2013 reflects the anticipated need.

### Other rent

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 15	\$ 7	\$ 8	\$ 1

Other rent includes all payments to a non-Federal source for rental space, land, and structures. Funding supports lease renewals for facilities (e.g. office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). Funding in FY 2013 reflects the anticipated need.

### Advisory and assistance services

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 1,220	\$ 599	\$ 695	\$ 96

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) and other agencies within the Federal Government. Funding in FY 2013 reflects the anticipated need.

**Other services**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ 1,385	\$ 680	\$ 789	\$ 109

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of GPRA and other performance measurement initiatives. Funding in FY 2013 reflects the anticipated need.

**Supplies and materials**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ 861	\$ 422	\$ 490	\$ 68

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. Funding in FY 2013 reflects the anticipated need.

**Equipment**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ 11,585	\$ 5,684	\$ 6,604	\$ 920

This object class covers the purchase of capitalized and non-capitalized assets. Funding in FY 2013 reflects the anticipated need.

**Land and structures**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ 1,440	\$ 706	\$ 820	\$ 114

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. Funding in FY 2013 reflects the anticipated need.

**U. S. Coast Guard**  
**Alteration of Bridges**

**I. Appropriation Overview**

**A. Mission Statement for Alteration of Bridges:**

Alteration of unreasonably obstructive bridges supports navigational safety and freedom of mobility to facilitate commerce, emergency response and U.S. Government operations by providing sufficient clearances for the type of vessels that transit beneath bridges. Alterations also deter waterway and highway/railway closures due to accidents.

**B. Budget Activities:**

Funding for Alteration of Bridges supports the Coast Guard's Aids to Navigation mission.

**C. Budget Request Summary:**

The Coast Guard is not requesting funding for Alteration of Bridges in FY 2013.

### III. Current Services Program Description by PPA

**Department of Homeland Security**  
**U. S. Coast Guard**  
**Alteration of Bridges**  
Program Performance Justification  
(Dollars in Thousands)

#### PPA I: ALTERATION OF BRIDGES

	<b>Perm</b>		
	<b>Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual</b>	...	...	...
<b>2012 Enacted</b>	...	...	...
2013 Adjustments-to-Base			...
<b>2013 Current Services</b>	...	...	...
2013 Program Change	...	...	...
<b>2013 Request</b>	...	...	...

The Coast Guard does not request funding for this activity in FY 2013.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The Alteration of Bridges program funds the Federal Government's share of the costs for altering or removing bridges determined to be unreasonable obstructions to navigation. Under the Truman-Hobbs Act of 1940 (33 U.S.C. 511-523), the Federal Government shares, with the bridge owner, the cost of altering railroad and publicly-owned highway bridges declared by the Coast Guard to be unreasonable obstructions to navigation. Under the Federal-Aid to Highways Program, unreasonably obstructive highway bridges may be eligible for funding.

**U. S. Coast Guard**  
**Research, Development, Test and Evaluation**

**I. Appropriation Overview**

**A. Mission Statement for Research, Development, Test and Evaluation:**

Research, Development, Test and Evaluation (RDT&E) funding allows the Coast Guard to sustain critical mission capabilities through applied research and partnerships with the Department of Homeland Security (DHS), the Department of Defense (DoD), as well as other Federal and private research organizations. The purpose of the Research and Development Program (R&D) is to help identify and examine existing or impending problems in the Coast Guard's operational, regulatory, and support programs and make improvements through solutions based on scientific and technological advances. The RDT&E funding supports risk-reduction expertise and services in the pre-acquisition process of major and non-major acquisition projects.

**B. Budget Activities:**

The RDT&E appropriation sustains program infrastructure and core capabilities, knowledge, skills, experience, and facilities to allow the Coast Guard to maintain a balanced portfolio of projects that supports short, medium, and long range requirements across all missions. Other activities include formulation and oversight of cooperative agreements with relevant professionals in the public and private sectors, such as University Affiliated Research Centers (UARC) and Federally Funded Research & Development Centers (FFRDC). These agreements promote collaboration and leverage expertise and the development of techniques, methods, hardware, and systems that directly contribute to increasing productivity and effectiveness of the Coast Guard's missions.

**C. Budget Request Summary:**

The Coast Guard requests \$19.7 million in FY 2013. RDT&E funding requested in FY 2013 will be used to develop technologies and systems that improve operational presence and response, as well as perform technology assessments to inform the early stages of the acquisition process. With FY 2013 funding, the Coast Guard RDT&E Program will develop a Center for Coast Guard Modeling and Simulation (M&S) by continuing to update and certify critical modeling and simulation tools and develop both engagement and campaign-level M&S capability; as well as conduct research and development in the following areas: command centers and intelligence; prevention and mitigation of oil spills; prevention of aquatic invasive species introduction; sensor optimization, automation, and visualization for aviation, surface, and shore assets; and exploration of key technologies for surface-fleet assets, including energy/green technologies; and exploration of concepts and technologies supporting Coast Guard operations in the Arctic regions.

In addition, funding supports program operations and maintenance costs (e.g., salaries, facility rent, utilities) at the Coast Guard Research and Development Center and the R&D Program's continued collaboration and participation with the research community. Healthy partnerships with other government, academic, and private research entities enable the Coast Guard to leverage research and development resources and foster synergies in scientific fields pertinent to Coast Guard missions.

Prioritized FY 2013 Planned Accomplishments

<b>Priority</b>	<b>FY13 PLANNED ACCOMPLISHMENTS</b>	<b>FY13 Planned Allocation (\$M)</b>	<b>Salary Portion (\$M)</b>
1	Support and Operations	10.63	6.18
2	Arctic Operations	1.22	0.98
3	Pre-Acquisition Exploration for the Surface Fleet	1.01	0.61
4	BWT Systems	0.80	0.53
5	Oil in Ice	1.22	0.85
6	Oil Spill Detection and Response	1.28	0.89
7	Modeling & Simulation	1.50	1.06
8	Sensor Optimization, Automation, and Visualization	0.58	0.33

<b>2012 to 2013 Total Change</b>			<b>(8,051)</b>

The Coast Guard requests \$19.7 million for this activity.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The RDT&E Appropriation funds foundational work for decision-makers of future acquisition, operations, regulatory, and support initiatives before long-term commitments are made through the Acquisition, Construction & Improvements or Operating Expenses appropriations. Knowledge and experience are gained through mission validation, gap analysis, modeling and simulation, requirements validation, operational analysis, market research, alternatives analysis, technology maturity assessments, cost estimation, prototyping, operational assessments, testing, and evaluation.

Funding requirements for the RDT&E Program are grouped into two categories: Coast Guard Mission Research and Operations & Maintenance (e.g., salaries, facility rent, utilities, etc.).

<sup>1</sup>The Coast Guard manages the military workforce by end strength, not Full Time Equivalent (FTE). The military FTE represented in these numbers are monthly end strengths averaged over the year.

<sup>2</sup>The military pay and allowances averages include the costs associated with all pay and allowances paid to a particular pay grade, including: Basic Pay, Basic Allowance for Housing, Basic Allowance for Subsistence, Federal Insurance Contributions, Incentive/Special Pays, Clothing Allowances, Cost-of-Living Allowances and Selective Re-enlistment Bonus payments. The term "Officer" includes Chief Warrant Officers, Cadets and Officer Candidates.

### PPA Mission Statement

The Coast Guard RDT&E Appropriation serves as a strategic investment in real-world exploration to quickly gain knowledge and experience enhancing the sound early decisions that have a significant effect on a system's overall value and risk profiles. The RDT&E Appropriation funds foundational work for decision-makers of future acquisition, operations, regulatory, and support initiatives before long-term commitments are made through the AC&I or OE appropriations. Knowledge and experience are gained through mission validation, gap analysis, modeling and simulation, requirements validation, operational analysis, market research, alternatives analysis, technology maturity assessments, cost estimation, prototyping, operational assessments, testing, and evaluation.

## Summary Justification and Explanation of Changes

### Salaries and Benefits

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 11,445	\$ 12,167	\$ 12,233	\$ 66

The FY 2013 request includes funding for the proposed pay raise (1.7 percent for military and 0.5 percent for civilian), medical benefits, other mandatory personnel entitlements.

### Travel

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 510	\$ 2,100	\$ 541	\$ (1,559)

The decrease reflects reduced travel costs of Coast Guard military service members, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2013 request also reflects the reduced need for R&D project related travel.

### Lease of Vehicles

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 11	\$ 35	\$ 9	\$ (26)

The decrease in FY 2013 is the anticipated reduction for government vehicles leases.

### Transportation of things

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 84	\$ 268	\$ 169	\$ (99)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2013 request reflects the reduction for transportation of things related to R&D research projects.

**Other Rent**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ 43	\$ 137	\$ 35	\$ (102)

Payments to a non-Federal source for rental space, land, and structures. The FY 2013 request reflects the reduction for payments to non-Federal sources.

**Communication, utilities, and misc charges**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ 117	\$ 374	\$ 96	\$ (278)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2013 decrease reflects the anticipated reduction for R&D related projects.

**Advisory and Assistance**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ 3,020	\$ 9,860	\$ 2,441	\$ (7,419)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The funding request in FY 2013 reflects decreases in project funding for technology demonstrations, testing and evaluations and their progress.

**Other services**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ 567	\$ 2,014	\$ 290	\$ (1,724)

Other services include contractual services with non-federal sources that are not otherwise classified under Object Class 25. The FY 2013 request adequately supports R&D projects.

**Research and development**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ 3,539	\$ 9,500	\$ 2,564	\$ (6,936)

This request reflects consideration of prior-year unobligated balances.

**Supplies and materials**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ 1,005	\$ 4,613	\$ 1,189	\$ (3,424)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. The FY 2013 request reflects a reduction of \$3,424 for the decreased need for R&D projects.

**Equipment**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ 194	\$ 178	\$ 160	\$ (18)

This object class covers the purchase of R&D materials for technology demonstrations, testing and evaluations and their progress. The FY 2013 request reflects a reduction of \$460 for the decreased need for R&D projects.

**Insurance claims and indemnity**

<b>FY 2011 Obligations</b>	<b>FY 2012 Budget Authority</b>	<b>FY 2013 Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ 1	\$ 3	\$ 1	\$ (2)

This object class covers benefit payment from the social insurance and Federal retirement trust funds and payment for losses and claims including those under the Equal Access to Justice Act.

**U. S. Coast Guard**  
**Medicare-Eligible Retiree Health Care Fund Contribution**

**I. Appropriation Overview**

**A. Mission Statement for the Health Care Fund Contribution:**

The Medicare-Eligible Retiree Health Care Fund Contribution (MERHCF) funds accrual of the Coast Guard's military Medicare-eligible health benefit contribution to the Department of Defense (DoD) Medicare-Eligible Retiree Health Care Fund. Contributions are for future Medicare-eligible retirees currently serving on active duty in the Coast Guard, as well as retiree dependents and their potential survivors. The authority for the Coast Guard to make this payment on an annual basis was provided in P.L. 108-375, the 2005 Defense Appropriations Act. While this expenditure requires no annual action by Congress, it is scored as discretionary spending.

**B. Budget Activities:**

There are no budget activities directly related to providing this benefit to active duty personnel and their dependents.

**C. Budget Request Summary:**

The Coast Guard estimates that \$170.0 million will be paid to the DoD Medicare-Eligible Retiree Health Care Fund in FY 2013 to support the benefits outlined above. The annual budget estimate for Medicare-Eligible Retiree Health Care Fund Contribution is calculated by multiplying the projected end strength (FTE) by DoD actuary projected cost rates. The total adjustment to the base is a decrease of \$92.0 million, due to a reduced projected end strength in FY 2013, projected savings associated with the National Defense Authorization Act for Fiscal Year 2012, and savings associated with two FY 2013 budget proposals to increase pharmacy co-pays and implement enrollment fees for the TRICARE-For-Life program.

**II. Summary of FY 2013 Budget Estimates by Program/Project Activity (PPA)**

**Department of Homeland Security  
U. S. Coast Guard  
Medicare-Eligible Retiree Health Care Fund Contribution**  
Summary of FY 2013 Budget Estimates by Program/Project Activity  
(Dollars in Thousands)

Program/Project Activity	FY 2011 Actual Obligations		FY 2012 Enacted Budget Authority		FY 2013 Requested Budget Authority		Increase (+) or Decrease (-) For FY 2013			
	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	Total Changes	Program Changes	Adjustments-to-base	
I Medicare-Eligible Retiree Health Care Fund Contribution	-	\$ 265,321	-	\$ 261,871	-	\$ 169,977	-	\$ (91,894)	-	\$ (91,894)
<b>Subtotal, Enacted Appropriations and Budget Estimates</b>	-	\$ 265,321	-	\$ 261,871	-	\$ 169,977	-	\$ (91,894)	-	\$ (91,894)
<b>Less: Adjustments for Other Funding Sources:</b>										
<b>Net, Enacted Appropriations &amp; Budget Estimates</b>	-	\$ 265,321	-	\$ 261,871	-	\$ 169,977	-	\$ (91,894)	-	\$ (91,894)

### III. Current Services Program Description by PPA

**Department of Homeland Security**  
**U. S. Coast Guard**  
**Medicare-Eligible Retiree Health Care Fund Contribution**  
**Program Performance Justification**  
(Dollars in Thousands)

PPA: MEDICARE-ELIGIBLE RETIREE HEALTH CARE FUND CONTRIBUTION

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	...	...	<b>\$265,321</b>
<b>2012 Enacted Budget Authority</b>	...	...	<b>261,871</b>
2013 Adjustments-to-Base			(91,894)
<b>2013 Current Services</b>	...	...	<b>169,977</b>
2013 Program Change	...	...	...
<b>2013 Requested Budget Authority</b>	...	...	<b>169,997</b>

The Coast Guard requests \$170.0 million for this activity.

- Decrease of \$92.0 million. Of this amount, \$58.9 million reduction is the result of lower actuarial projections and changes in FTE over FY 2012 levels and the remaining \$33.0 million is attributed to FY 2013 budget proposals by the Department of Defense that reduces the per capita MERHCF rate for full time and part time military personnel.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The Medicare-Eligible Retiree Health Care Fund Contribution will fund accrual of the Coast Guard's military Medicare-eligible health benefit contribution to the Department of Defense Medicare-Eligible Retiree Health Care Fund. Contributions are for future Medicare-eligible retirees, retiree dependents, and survivors in the Coast Guard.

<b>Total Requirements</b>		<b>\$ 265,321</b>	<b>\$ 261,871</b>	<b>\$ 169,977</b>	<b>(91,894)</b>

**PPA Mission Statement**

The Medicare-Eligible Retiree Health Care Fund Contribution will fund accrual of the military Medicare-eligible health benefit contribution to the Department of Defense Medicare-Eligible Retiree Health Care Fund. Contributions are for future Medicare-eligible retirees, retiree dependents, and survivors in the Coast Guard.

## Summary Justification and Explanation of Changes

### Salaries and Benefits

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
<b>\$ 265,321</b>	<b>\$ 261,871</b>	<b>\$ 169,977</b>	<b>\$ (91,894)</b>

This decrease is the result of lower actuarial projections and changes in FTE over FY 2012 levels. A decrease of \$33.0 million is attributed to FY 2013 budget proposals by the Department of Defense that reduces the per capita MERHCF rate for full time and part time military personnel.

**U. S. Coast Guard**  
**Retired Pay**

**I. Appropriation Overview**

**A. Mission Statement for Retired Pay:**

The Retired Pay (RP) appropriation provides payments as identified under the Retired Serviceman's Family Protection and Survivor Benefits Plans, and other retired personnel entitlements identified under National Defense Authorization Acts. This includes payment for medical care of retired personnel and their dependents.

**B. Budget Activities:**

There are no budget activities directly related to providing this benefit to retired military personnel and their dependents.

**C. Budget Request Summary:**

The Coast Guard requests \$1.4 billion in FY 2013 to support the benefits outlined above. The Coast Guard also requests that any FY 2013 funding remain available until expended. The Retired Pay appropriation is scored as a mandatory appropriation.

<b>Total, Retired Pay</b>		<b>\$ 1,321,000</b>	<b>\$ 1,440,157</b>	<b>\$ 1,441,000</b>	<b>\$ 843</b>

### PPA Mission Statement

Retired Pay will provide payments as identified under the Retired Serviceman's Family Protection and Survivor Benefits Plans, payments for career status bonuses, concurrent receipts and combat related special compensation identified under the National Defense Authorization Act.

## Summary Justification and Explanation of Changes

### Salaries and Benefits

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012-2013 Change
\$ 1,167,000	\$ 1,267,000	\$ 1,224,000	\$ (43,000)

Accounts for cost-of-living adjustments for all retirement and most survivor annuities, benefits authorized by the National Defense Authorization Act. Decrease of \$43,000,000 is reflective of actuarial cost projects and obligation of prior-year unobligated balances.

### Medical care

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012-2013 Change
\$ 154,000	\$ 173,157	\$ 217,000	\$ 43,843

Increase of \$43,843,000 accounts for the projections for retiree medical benefits costs. Once a member becomes eligible for Medicare, the Medicare-Eligible Retiree Health Care Fund is responsible for these benefits.

**U. S. Coast Guard**  
**Boat Safety**

**I. Appropriation Overview**

**A. Mission Statement for Boating Safety:**

The Boating Safety (BS) program is designed, through preventive means, to minimize loss of life, personal injury, property damage and environmental impact associated with the use of recreational boats. The program directly supports the Coast Guard's Maritime Prevention Program by promoting safe and enjoyable use of public U.S. waterways.

**B. Budget Activities:**

Boating Safety activities include: overseeing manufacturer compliance with Coast Guard regulations; grantmaking to states and national non-profit boating safety organizations; conducting surveys to measure recreational boating activity; continuing the "Boat Responsibly" national outreach and awareness initiative; promulgating safety regulations; and measuring life jacket wear rates, including the effectiveness of voluntary and mandatory efforts to increase life jacket usage.

**C. Budget Request Summary:**

In its role as the designated National Recreational Boating Safety (RBS) Program Coordinator, the Coast Guard is charged with managing dedicated user fee funding to support the National Recreational Boating Safety Program provided from the Sport Fish Restoration and Boating Trust Fund. Under the provisions of the Sportfishing and Recreational Boating Safety Act of 2005 (Subtitle A, Title X, P.L. 109-59), the Coast Guard receives a percentage distribution of total trust fund receipts from the preceding fiscal year (i.e., FY 2013 funding will be a percentage of FY 2012 trust fund receipts). These amounts are available until expended, but are limited in purpose and amount in accordance with existing statutes.

The FY 2013 budget reflects the anticipated level of funding that would be available from the trust fund for boating safety. This is based on current estimates of FY 2012 trust fund receipts from the Office of Tax Analysis at the Department of the Treasury (adjusted to reflect amendments of current law enacted in P.L. 109-59). The estimated total distribution from the trust fund for boating safety in FY 2013 is \$116.2 million. Of that amount, \$5.0 million is available for use by the Coast Guard to coordinate and execute new and enhanced National RBS Program activities. The balance is authorized for the State RBS Federal Financial Assistance Program established by 46 U.S.C. 13101, et seq., minus not more than five percent for national boating safety activities of national non-profit public service organizations, and not more than two percent for Coast Guard expenses to administer State RBS programs.

2013 Program Change			3,017
<b>2013 Requested Budget Authority</b>	<b>10</b>	<b>10</b>	<b>116,221</b>

The Coast Guard requests \$116.2 million for this activity.

- Increase of \$3.0 million is a result of the Boat Safety program's portion of the receipt projections from the Sport Fish Restoration and Boat Safety Trust Fund.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

This account provides grants for the development and implementation of a coordinated national recreational boating safety program. Boating safety statistics reflect the success in meeting the program's objectives. Pursuant to the Safe, Accountable, Flexible, Efficient Transportation Equity Act-A Legacy for Users (SAFETEA-LU, P.L. 109-59), the Boat Safety program receives 18.5 percent of the funds collected in the Sport Fish Restoration and Boating Safety Trust Fund.

### PPA Mission Statement

The Boating Safety (BS) program is designed, through preventive means, to minimize loss of life, personal injury, property damage and environmental impact associated with the use of recreational boats. The program directly supports the Coast Guard's Marine Safety mission by promoting safe and enjoyable use of public U.S. waterways. In its role as the designated National Recreational Boating Safety (RBS) Program Coordinator, the Coast Guard is charged with managing dedicated user fee funding to support the National RBS Program provided from the Sport Fish Restoration and Boating Trust Fund (formerly Aquatic Resources Trust Fund). Under the provisions of the Sportfishing and Recreational Boating Safety Act of 2005 (Subtitle A, Title X, P.L. 109-59), the Coast Guard receives a percentage distribution of total trust fund receipts from the preceding fiscal year (i.e., FY 2013 funding will be a percentage of FY 2012 trust fund receipts).

## Summary Justification and Explanation of Changes

### Salaries and Benefits

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 1,251	\$ 1,350	\$ 1,351	\$ 1

The FY 2013 request includes funding for a 0.5% pay increase for civilians.

### Travel

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 270	\$ 79	\$ 85	\$ 6

Transportation funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2013 request reflects the anticipated need for Coast Guard personnel traveling for the RBS program activities.

### Transportation of Things

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 6	\$ 6	\$ 5	\$ (1)

Transportation of things includes all costs of the care of such things while in the process of being transported and other services incident to the transportation of things. The FY 2013 request reflects the anticipated need for transportation of things for the RBS program activities.

### Printing and reproduction

FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012 - 2013 Change
\$ 100	\$ 99	\$ 86	\$ (13)

The FY 2013 request reflects the anticipated need for printing and reproduction of the RBS program activities.

**Advisory and assistance services**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ 6,100	\$ 5,500	\$ 1,192	\$ (4,308)

The FY 2013 request reflects the anticipated need for advisory and assistance services, including services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government.

**Other Services**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ 4,200	\$ 3,500	\$ 2,500	\$ (1,000)

Other services include reported contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Decreased funding in FY 2013 reflects changes in the revenues from trust fund receipts. Non-Federal services for boating safety activities will be increased across all States.

**Grants, Subsidies and Contributions**

<b>FY 2011 Actual Obligations</b>	<b>FY 2012 Enacted Budget Authority</b>	<b>FY 2013 Requested Budget Authority</b>	<b>2012 - 2013 Change</b>
\$ 122,504	\$ 122,000	\$ 111,000	\$ (11,000)

Under the provisions of the Sportfishing and Recreational Boating Safety Act of 2005 (Subtitle A, Title X, P.L. 109-59), the Coast Guard receives a percentage distribution of total trust fund receipts.

**U. S. Coast Guard**  
**Maritime Oil Spill Program**

**I. Appropriation Overview**

**A. Mission Statement for Maritime Oil Spill Program:**

The Maritime Oil Spill Program operates under the authority of Title I of the Oil Pollution Act of 1990 (OPA), as amended, which provides for the use of the Oil Spill Liability Trust Fund (OSLTF) to pay for Federal response to oil spills and claims for uncompensated removal costs and damages resulting from such spills. In Section Seven of Executive Order 12777, the President delegated management responsibility for these uses of the OSLTF to the Secretary of the Department in which the Coast Guard is operating. Upon re-delegation by the Secretary, the Commandant of the Coast Guard delegated responsibility to the National Pollution Funds Center (NPFC), which oversees the OSLTF.

**B. Budget Activities:**

The Maritime Oil Spill Program directly supports the Coast Guard's Marine Environmental Protection mission and Maritime Response Program, which accomplish the following objectives:

- Provides funding for Federal removal actions in response to a discharge or a substantial threat of discharge of oil to navigable waters of the United States.
- Compensates claimants for OPA removal costs or damages.
- Provides funding to natural resource trustees for Natural Resource Damage Assessments (NRDA).
- Administers the OSLTF.

**C. Budget Request Summary:**

The Coast Guard estimates that expenditures from this account will total \$100.5 million in FY 2013, a decrease of \$500,000 below the FY 2012 Enacted level due to less funding made available for the Oil Spill Recovery Institute (OSRI) due to lower interest rates. These estimated expenditures consist of a \$50.0 million expenditure transfer for immediate Federal oil spill response, an estimated \$500,000 payment to the Prince William Sound Oil Spill Recovery Institute, and \$50.0 million to compensate claimants for uncompensated OPA removal costs and damages including natural resources damages.

**II. Summary of FY 2013 Budget Estimates by Program/Project Activity (PPA)**

**Department of Homeland Security  
U. S. Coast Guard  
Maritime Oil Spill Program**

Summary of FY 2013 Budget Estimates by Program/Project Activity  
(Dollars in Thousands)

<b>Subtotal, Enacted Appropriations and Budget Estimates</b>	-	\$ 259,465	-	\$ 101,000	-	\$ 100,500	-	\$ (500)	-	\$ -	-	\$ (500)
<b>Less Adjustments for Other Funding Sources:</b>												
<b>Net, Enacted Appropriations &amp; Budget Estimates</b>	-	\$ 259,465	-	\$ 101,000	-	\$ 100,500	-	\$ (500)	-	\$ -	-	\$ (500)

### III. Current Services Program Description by PPA

**Department of Homeland Security  
U. S. Coast Guard  
Maritime Oil Spill Program  
Program Performance Justification  
(Dollars in Thousands)**

#### PPA I: MARITIME OIL SPILL PROGRAM

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	...	...	<b>\$259,465</b>
<b>2012 Enacted Budget Authority</b>	...	...	<b>101,000</b>
2013 Adjustments-to-Base			(500)
<b>2013 Current Services</b>	...	...	<b>100,500</b>
2013 Program Change	...	...	...
<b>2013 Requested Budget Authority</b>	...	...	<b>100,500</b>

The Coast Guard requests \$100.5 million for this activity.

- Decrease of \$500,000 is a result of less funding made available for the Oil Spill Response Institute (OSRI) due to lower interest rates.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

Title I of OPA, as amended, provides for the use of the OSLTF to pay for Federal response to oil spills and claims for uncompensated removal costs and damages resulting from such spills. In Section Seven of Executive Order 12777, the President delegated management responsibility for these uses of the OSLTF to the Secretary of the Department in which the Coast Guard is operating. Upon re-delegation by the Secretary, the Commandant of the Coast Guard delegated responsibility to the NPFC, which oversees the OSLTF.

OPA section 5006(b) directs the NPFC to make annual payments to the Prince William Sound Oil Spill Recovery Institute for the interest on a portion of the OSLTF balance.

**PPA Mission Statement**

The Maritime Oil Spill Program fund will provide a source of funds for removal costs and damages resulting from oil spills, or the substantial threat of a spill, into navigable waters of the U.S. In accordance with the provisions of the Oil Pollution Act of 1990, the President may make available up to \$50.0 million annually from the Fund for oil spill removal activities. The Fund also pays all eligible claims for removal costs and damages resulting from oil spills.

## Summary Justification and Explanation of Changes

### Other services

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	2012-2013 Change
	\$ 259,465	\$ 101,000	\$ 100,500	\$ (500)

The FY 2013 Maritime Oil Spill Program request represents a decrease of \$500,000 as a result of less funding made available for the Oil Spill Response Institute (OSRI). OSRI funding from the Oil Spill Liability Trust Fund (OSLTF) is based on interest produced from a discrete portion of the Fund. The reduction to funding made available is a function of lower interest rates.

**U. S. Coast Guard**  
**Miscellaneous Funds**

**I. General Gift Fund Overview**

**A. Mission Statement for General Gift Fund**

The Coast Guard General Gift Fund is authorized under 10 U.S.C. § 2601 provisions for such funds within the Department of Defense and the Coast Guard. The General Gift Fund is a vehicle that authorizes the Commandant of the Coast Guard to accept gifts and donations for the benefit of activities such as museums, chapels, and other organizations under the jurisdiction of the Coast Guard. The Coast Guard is also authorized to accept gifts to be used for the benefit of service members who are wounded, injured or taken ill while in the line of duty, as well as for those members' dependents and survivors.

**B. Budget Activities:**

The General Gift Fund indirectly supports Coast Guard activities.

**C. Budget Bequest Summary:**

The Coast Guard estimates \$80,000 in bequests from various sources to the General Gift Fund in FY 2013.

**Miscellaneous Funds**

**II. Yard Fund Overview**

**A. Mission Statement for Yard Fund**

Coast Guard Yard contributes to all 11 statutory Coast Guard missions and six DHS FYHSP Programs through completion of mission-essential logistics and engineering support (e.g., cutter drydocking). The Yard Fund is a revolving account supported by the Coast Guard's Operating Expenses and Acquisition, Construction & Improvements appropriations to pay for FTE and materials required for Coast Guard projects and work orders completed by the Coast Guard Yard, located in Curtis Bay, MD.

**B. Budget Activities:**

Yard Fund activities include logistics and engineering support for Coast Guard vessels. These activities indirectly support Coast Guard missions.

**C. Budget Request Summary:**

Not Applicable

**U. S. Coast Guard**  
**Miscellaneous Funds**

**II. Supply Fund Overview**

**A. Mission Statement for Supply Fund**

The Supply Fund, in accordance with 14 U.S.C. § 650, finances the procurement of uniform clothing, commissary provisions, general stores, technical material, and fuel for vessels over 180 feet in length. The fund is normally financed by reimbursements from the sale of goods.

**B. Budget Activities:**

Supply Fund activities include funding the procurement of uniforms, commissioning provisions, stores, materials, and fuel. These activities indirectly support Coast Guard missions.

**C. Budget Request Summary:**

<sup>1</sup>The Coast Guard manages the military workforce by end strength, not FTE. The military FTE represented in these numbers are monthly end strengths averaged over the year.

<sup>2</sup>The military pay and allowances averages include the costs associated with all pay and allowances paid to a particular paygrade, including: Basic Pay, Basic Allowance for Housing, Basic Allowance for Subsistence, Federal Insurance Contributions, Incentive/Special Pays, Clothing Allowances, Cost-of-Living Allowances and Selective Re-enlistment Bonus payments. The term "Officer" includes Chief Warrant Officers, Cadets, and Officer Candidates.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **United States Secret Service Salaries and Expenses**

### **I. Appropriation Overview**

#### **A. Mission Statement for Operating Expenses:**

The mission of the United States Secret Service (Secret Service) is to safeguard the nation's financial infrastructure and payment systems to preserve the integrity of the economy. The Secret Service also provides for the physical safety of the President, Vice President, their families, and other individuals, to include visiting heads of state and government, as designated by 18 U.S.C. § 3056 and secures facilities under Secret Service protection, designated sites, and National Special Security Events from all threats.

#### **B. Budget Activities:**

The Secret Service's Operating Expenses appropriation provides for the annualization of prior-year funding, fiscal adjustments, and budget activity related to Secret Service programs, projects and activities (PPA).

#### **C. Budget Request Summary:**

The Secret Service requests 7,061 positions, 7,061 FTE, and \$1,544,113,000 for FY 2013. The request includes a total of \$28,900,000 in program increase as well as a program decrease of \$7,518,000 and (8) FTEs. This level of funding is required for and includes the following program changes:

- National Special Security Events - \$3,500,000
- Cyber Security Presidential Protection Measures - \$13,300,000
- Integrated Command and Control Systems - \$12,100,000
- The request also includes a program decrease of (\$7,518,000) and (8) FTE for grant funding and forensic support for investigations involving missing and exploited children.

Adjustments to the base increases include the following:

- 2013 pay increase - \$4,058,000
- 3<sup>rd</sup> year funding for positions hired for the IIT program - \$114,000
- 2<sup>nd</sup> year funding for positions hired for the OMS program - \$2,686,000 (35 FTE)
- 2<sup>nd</sup> year funding for acquisition workforce positions hired - \$284,000 (1 FTE)
- Presidential Primary Limousine Program - \$900,000
- White House mail screening - \$1,377,000

Adjustments to the base decreases include the following:

- International Field Office Administration, Operations & Training - (\$2,000,000) (2 FTE)
- Operational Mission Support – (\$5,886,000)
- National Special Security Events – (\$18,307,000)
- Presidential candidate nominee protection – (\$41,194,000)
- FTE reduction to Headquarters, management and administration (20 FTE)

Additional adjustments to the base decreases for the following DHS-wide efficiencies include:

- Vehicle fleet replacement on 8 year cycle - (\$2,779,000)
- Office of Federal Procurement Policy directed purchasing savings - (\$3,488,000)
- DHS Strategic Sourcing Initiatives - (\$3,431,000)
- Permanent change of station travel - (\$4,332,000)
- General temporary duty travel - (\$14,666,000)
- Vehicle fleet inventory - (\$963,000)
- Overtime - (\$5,510,000)
- IT Infrastructure - (\$2,400,000)
- Headquarters administrative efficiency across DHS - (\$145,000)

An additional adjustment to the base decrease is to transfer funds from the Headquarters, Management, and Administration PPA to the Acquisition, Construction, Improvements, and Related Expenses account:

- Information Integration and Technology Transformation, formally known as Information Integration and Transformation (IIT) – (\$42,824,000)

## II. Summary of FY 2013 Budget Estimates by Program/Project Activity (PPA)

Total Change 2012 to 2013	(95)	(60)	5,183

The United States Secret Service requests 3,722 positions, 3,722 FTE and \$837.6 million in FY 2013 for the Protection of persons and facilities PPA.

- Increase of \$2.3 million for 2013 pay raise
- Increase of \$900 thousand for the primary limousine program
- Increase \$2.7 million to annualize second year Operational Mission Support positions (35 FTE)
- Increase of \$13.3 million for Cyber Security Presidential Protection Measures
- Increase of \$12.1 million for Integrated Command and Control Systems
- Decrease of \$20.2 million for DHS-wide offsets
- Decrease of \$5.9 million to non-recur Operational Mission Support non-pay costs

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Secret Service provides for the physical safety of the President, Vice President, their families, and other individuals as designated by 18 U.S.C. § 3056 and secures facilities under Secret Service protection from all threats. This program is comprised of three distinct activity areas: (1) Protection of persons, (2) Protection of facilities, and (3) Protection of events.

**Protection of Persons**

After the assassination of President William McKinley in 1901, the Secret Service was directed by Congress to protect the President of the United States. This duty remains the primary protective responsibility of the Secret Service. Currently, the Secret Service is authorized by law to protect:

- The President, the Vice President (or other officer next in order of succession to the Office of President), the President-elect, and the Vice President-elect.
- The President's and Vice President's immediate family.
- Former Presidents, their spouses, and minor children under the age of 16.
- Foreign heads of state/government and their spouses visiting the U.S.
- Distinguished foreign visitors to the U.S., official representatives of the U.S. performing special missions abroad, and other individuals authorized protection by the President.
- Major Presidential and Vice Presidential candidates, and within 120 days of the general Presidential election, the spouses of such candidates.
- Events designated as National Special Security Events (NSSE) by the Department of Homeland Security (DHS) Secretary.

To protect permanent protectees, such as the President and Vice President, the Secret Service has permanent personnel assigned to conduct full-time protection. To ensure protectees receive the optimal level of protection, Secret Service personnel conduct extensive site advances to mitigate threats and vulnerabilities. From FY 2006 to FY 2010, Secret Service personnel participated in 7,236 protective travel stops for the President and Vice President, an average of 1,447 stops<sup>1</sup> per year.

By law, the President and Vice President cannot decline Secret Service protection. In 1997, Congress passed legislation limiting protection of former presidents to ten years after leaving office (P.L. 103-329), making President William J. Clinton the last President who will receive lifetime Secret Service protection.

Currently, the Secret Service staffs five permanent protective details to provide security for former First Lady Nancy Reagan, former President Carter and Rosalyn Carter, former President George H. Bush and Barbara Bush, former President William J. Clinton and Secretary Hillary Clinton, and former President George W. Bush and Laura Bush.<sup>2</sup> In support of travel by former Presidents and First Ladies, from FY 2006 to FY 2010, Secret Service personnel participated in 8,182 domestic and international travel stops, an average of 1,636 stops per year.

The Dignitary Protective Division (DPD) of the Secret Service provides the planning, organization and supervision of temporary protective security details for Presidential and Vice Presidential candidates/nominees, visiting foreign heads of state/heads of government and their accompanying spouses, specified domestic government officials, and others as directed by the President. These protective details are, in large part, staffed with personnel on temporary assignment from Secret Service field or headquarters offices. From FY 2006 to FY 2010, Secret Service personnel completed 10,747 foreign dignitary protective stops, an average of 2,149 per year. Furthermore, during the same period, 3,888 domestic/international travel stops were conducted by designated government officials who received Secret Service protection, an average of 777 travels stops per year.

---

<sup>1</sup> The Secret Service defines a "stop" as a city or other definable subdivision visited by a protectee.

<sup>2</sup> The Secret Service currently shares protection of former First Lady, Secretary Hillary Clinton, with the Department of State. Additionally, protection of the former First Lady Betty Ford was discontinued following her death on July 8<sup>th</sup>, 2011.

The Secret Service further complements the protection of persons through programs which mitigate specialized threats or vulnerabilities. Under the oversight of the Office of Protective Operations (OPO), the Special Operations Division (SOD) is responsible for developing, implementing, coordinating, and managing specialized protective programs within the Secret Service. SOD provides appropriate tactical and other protective support to all Secret Service protective details, and works closely with field offices, and other law enforcement entities to establish a secure environment for designated protectees. These tactical programs include Counter Assault Teams (CAT), Emergency Response Teams (ERT), and Counter Sniper (CS) teams that were developed to address attacks from single shooters to full-scale armed assaults on protectees. Also, SOD supervises the Explosive Detections Canine Program, magnetometer screening, and the Hazardous Agent Mitigation Medical Emergency Response (HAMMER) Team, a team dedicated to respond to hazardous, toxic, chemical, biological, radiological, or oxygen deficient environments to locate, extract, decontaminate, and provide life-saving medical interventions for Secret Service protectees.

To further support the overall security of protectees and sites, the Secret Service Airspace Security Program develops, coordinates, and implements airspace security plans for venues visited by the President and Vice President or other designated protectees. Additionally, the Secret Service has the responsibility for developing an airspace security plan at NSSEs and other major events when required. This program is enhanced through appropriate coordination and liaison with the Federal Aviation Administration (FAA), the Department of Defense (DOD), the Department of Homeland Security (DHS), and within the DHS and Transportation Security Administration (TSA).

## **Protection of Facilities**

As authorized by 18 U.S.C. 3056A, the Secret Service is responsible for protecting permanent and temporary facilities around Washington, D.C. and the nation. These facilities include, but are not limited to: the White House Complex (WHC); the Vice President's Residence (VPR); foreign embassies or consulates; and the residences of former presidents. The fundamental component enabling the protection of Washington, D.C.-based facilities is the Secret Service Uniformed Division (UD).

In 1922, the UD began as the White House Police and was originally created as a separate and distinct organization (P.L. 67-300). The White House Police came under the direct supervision of the Secret Service in 1930. The mandate of the White House Police, incorporated in Title 3 of the U.S. Code, involved duties in connection with the protection of the WHC, as well as the President and his immediate family. Today, UD's legal authorities are primarily contained in 18 U.S.C. § 3056A.

The members of the UD assigned to the WHC process thousands of staff members, other workers/contractors, members of the press, and individuals with appointments into the WHC on a daily basis. Officers provide protection to the WHC through the effective use of fixed posts, foot and bicycle patrols, police cruisers and specialized units (i.e., Counter Sniper, Counter Surveillance, Explosive Detection Canine, and the Emergency Response Team). In addition to the WHC, in 1974, as designated by P.L. 93-552, the UD assumed similar protective responsibilities at the VPR located at the U.S. Naval Observatory, Washington, D.C.

Since 1970, as authorized by P.L. 91-217, UD officers assigned to the Foreign Missions Branch have been responsible for providing external protection and serving as a liaison to 580 foreign embassies and/or diplomatic missions in Washington, D.C.

The Uniform Division provides magnetometer and portable x-ray support coverage at designated sites for the President, Vice President and selected dignitaries. Following the assassination attempt on President Ronald Reagan in May 1981, magnetometers have been regularly used by the Secret Service. Officers are responsible for the deterrence and detection of all weapons at any site that may be deemed a threat. This is accomplished through the use of walk-through metal detectors, handheld metal detectors, portable x-ray machines, physical searches of hand carried items, and explosive detection canines. In addition, officers are responsible for general observation and site security. From FY 2006 to FY 2010, UD magnetometers screened 12,977,459 guests in support of Secret Service protective sites, an average of 2,595,492 guests per year.

In order to provide a technically secure environment for the President, Vice President, and other protectees, wherever they may reside or travel, the Secret Service makes use of technology-based assets available through the Technical Security Division (TSD). TSD plans, designs, develops, implements, installs, and maintains technical security detection systems to include intrusion, camera surveillance, and radiation and fire systems for Secret Service protected sites. Further, they administer a comprehensive program of countermeasures against explosives, chemical, biological, and radiological hazards.

The Secret Service's Operational Mission Support (OMS) program funds advanced protective countermeasure projects and support for associated personnel critical to addressing known and evolving threats. It is critical that the Secret Service continually refresh and update/upgrade responding to a myriad of threats in order to ensure a safe environment for the President. Funding is requested for equipment, training, and personnel needed to address current and potential threats directed at the President and the White House complex. OMS began with reprogrammed funds in FY 2010 and first received appropriated funds in FY 2012. FY 2013 requested funding will continue this critical multi-year initiative.

## **Protection of Events**

The Secret Service plans, directs, and executes security operations at designated major events in order to prevent and counter terrorist and criminal attacks directed towards the event and its participants, including Secret Service protectees. Past major events have included annual meetings of international organizations such as the United Nations General Assembly, International Monetary Fund and World Bank meetings, and global summits. Additionally, Dignitary Protective Division (DPD) provides Federal, State, and local law enforcement agencies with guidance and training for the execution of security plans at special events occurring throughout the United States.

The above requested amount provides funding for operational security which directly supports the 2010 DHS Quadrennial Homeland Security Review QHSR, Goal 1.3.2, Protect critical infrastructure, and Goal 1.3.4, Protecting government leaders, facilities, and special events. The funding specifically permits the Secret Service to provide or acquire the security measures needed to protect designated campaign sites, candidates and their families.

Further, funding this activity supports the Secret Service's strategic performance measure of:

- *Percent of total U.S. Secret Service protection activities that are incident – free for protection of national leaders, foreign dignitaries, designated protectees and others during travel or at protected facilities.*

Funding for this program will enable the Secret Service to accomplish the aforementioned performance goals.

**Department of Homeland Security**  
**U.S. Secret Service**  
**Operating Expenses**  
**Protection**  
**National Special Security Event Fund**  
**Program Performance Justification**  
(Dollars in Thousands)

**PPA: National Special Security Event Fund**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	-	-	<b>5,846</b>
<b>2012 Enacted Budget Authority</b>	-	-	<b>19,307</b>
2013 Adjustments-to-Base	-	-	(18,307)
<b>2013 Current Services</b>	-	-	<b>1,000</b>
2013 Program Change	-	-	3,500
<b>2013 Total Requested Budget Authority</b>	-	-	<b>4,500</b>
Total Change 2012 to 2013	-	-	(14,807)

The United States Secret Service requests 0 positions, 0 FTE and \$4.5 million in FY 2013 for the National Special Security Event (NSSE) Fund PPA.

- Increase of \$3.5 million for NSSEs
- Decrease of \$7.3 million for the APEC Summit (non-recur)
- Decrease of \$5.3 million for the NATO Summit (non-recur)
- Decrease of \$5.7 million for the G-8 Summit (non-recur)

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Under the authorities granted by Presidential Decision Directive 62 (1998), the Homeland Security Act (2002), Homeland Security Presidential Directives 5, 7 (2003) and 15 (2007), 18 U.S.C. § 3056 (amended 2005), and National Security Presidential Directive 46 (2007), the Secret Service is the lead agency for planning, coordinating, and implementing security operations at designated NSSEs.

A request for NSSE designation originates from the governor of the state hosting the event or, in the case of Washington, D.C., its mayor. Subsequently, a NSSE Working Group comprised of the Secret Service, Federal Bureau of Investigations (FBI), Federal Emergency Management Agency (FEMA) and DHS considers specific security-related factors and provides a recommendation to the Secretary of Homeland Security for final approval.

Since 1998, as an integral component of the homeland security mission, the Secret Service has implemented 38 security plans for NSSEs. Past NSSEs have included high-profile events such as:

Super Bowl XXXVI (New Orleans, 2002), the XIX Winter Olympic Games (Salt Lake City 2002), various global summits (i.e. G-8, G-20, NATO, etc.), state funerals, Democratic and Republican National Conventions, and presidential inaugurations and associated events. The goal of the Secret Service and its partner agencies is to develop and implement a comprehensive operational security plan that provides a safe and secure environment for Secret Service protectees, other dignitaries, event participants, and the general public, while safeguarding people's lawful freedoms of speech, assembly, and petition of the government. To accomplish an integrated security operation for NSSEs, Secret Service personnel collaborate with Federal, State, county, and local counterparts. A central component of this collaboration is the establishment of an executive steering committee and up to as many as 24 subcommittees.

From September 1998 to January 2011, the Secret Service has planned and implemented comprehensive operational security plans for 24 of 38 total NSSEs that were unrelated to a presidential campaign. This translates into an average of 1.7 non-campaign NSSEs per year. Secret Service costs associated with these events varied from \$320,000 (Former President Gerald Ford State Funeral) to \$34.26 million (XIX Winter Olympic Games)<sup>3</sup>, averaging \$5.4 million per event, and the duration of these events varied from 1 to 17 days, at an average length of 4.3 days.

---

<sup>3</sup> These costs are not adjusted for inflation and do not account for ten (10) State of the Union Address NSSEs as these events are limited in duration and exclusively utilize Washington, D.C. based personnel and resources.

<b>2013 Total Requested Budget Authority</b>	<b>535</b>	<b>535</b>	<b>68,373</b>
Total Change 2012 to 2013	-	-	248

The United States Secret Service requests 535 positions, 535 FTE and \$68.4 million in FY 2013 for the Protective intelligence activities PPA.

- Increase of \$248 thousand for 2013 pay raise

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Under the statutory authorities described in 18 U.S.C. § 3056, the Secret Service maintains a robust protective intelligence program to ensure the safety of Secret Service protectees and protected sites. The Secret Service’s protective intelligence program is conducted in direct collaboration with all U.S. government intelligence agencies and state and local law enforcement at every level.

The Secret Service devotes 535 headquarters and field office personnel FTE to execute the protective intelligence mission. These personnel are responsible for conducting, guiding, and providing oversight for all protective intelligence investigations and advances. The Protective Intelligence and Assessment Division (PID) specifically designates special agents and intelligence research specialists to analyze, evaluate, disseminate, and manage information about individuals, groups, and activities that pose potential risks to Secret Service interests. PID personnel provide threat assessments, briefings, and other information pertinent to protective intelligence activities. Responsibilities also include analyzing and disseminating information pertaining to threat assessment and the prevention of targeted violence through the National Threat Assessment Center (NTAC).

To support protective intelligence operations of the Secret Service, PID engages in the following activities:

- Maintains a 24-hour Operations Center to process, evaluate, and refer for investigation threat information relating to protective interests received from all sources.
- Provides leadership, direction and support regarding protective intelligence matters to the 142 domestic and 24 international offices of the Secret Service.
- Conducts and coordinates domestic and foreign protective intelligence assessments in support of the President, Vice President, and other designated protectees.
- Publishes risk assessments regarding the potential exposure to danger for individuals, venues, and infrastructure protected by the Secret Service.
- Reviews and analyzes classified cables/information received from the Intelligence Community affecting Secret Service protected interests.
- Maintains extensive liaison with the law enforcement and intelligence communities in order to share protective intelligence information, and when necessary, operational assistance in resolving threats, to include the oversight and coordination of the Secret Service participation in 58 FBI Joint Terrorism Task Forces.
- Provides training to internal and external partners on the latest techniques and practices used by terrorist organizations through its Critical Protective Analysis Group.
- Reviews threatening and inappropriate electronic communications to research and develop investigative leads via the Internet Threat Unit.
- Establishes and operates Protective Intelligence Coordinating Centers for designated National Special Security Events and the United Nations General Assembly.
- Presents briefings on “Terrorist Trends and Tactics,” and “Preventing Assassination, a behavior-based approach based on the Exceptional Case Study Project” to Secret Service personnel and external representatives of the intelligence community, foreign governments, federal, state, local, and tribal law enforcement agencies, and corporate security.
- Conducts research and education on the phenomenon of targeted violence.

In support of these activities, from 2006 to 2010, Secret Service personnel assigned to headquarters and various field offices provided protective intelligence functions for 33,237 domestic and international travel stops (an average of over 6,647 per year). During this same time frame, PID prepared 4,356 threat assessments and opened 19,307 protective intelligence investigations (an average of 3,861 per year).

The requested amount funds protective intelligence activities in a strategic context which specifically addresses the missions and goals set forth by the 2010 DHS QHSR in Mission 1: Preventing Terrorism and Enhancing Security, Goal 1.3.2, Protect Critical Infrastructure, and Goal 1.3.4, Protect government leaders, facilities, and special events.

Further, funding this activity supports the Secret Service strategic and operational performance measures of:

- *Percent of total U.S. Secret Service protection activities that are incident – free for protection of national leaders, foreign dignitaries, designated protectees and others during travel or at protected facilities.*
- *Percent of National Security Events that were successfully completed.*
- *Number of protective intelligence cases completed regarding threats to protectees.*

Funding for this program will enable the Secret Service to accomplish the aforementioned performance goals.

**Department of Homeland Security**  
**U.S. Secret Service**  
**Operating Expenses**

The United States Secret Service requests 170 positions, 170 FTE and \$58.0 million in FY 2013 for the Presidential candidate nominee protection PPA.

- Decrease of \$12.9 million to shift existing base labor resources to the Domestic field operations PPA (95 FTE)
- Decrease of \$1.4 million to shift existing base labor resources to the ECSAP/ECTF PPA (10 FTE)
- Decrease of \$41.2 million to non-recur costs for the 2012 Presidential Campaign

**CURRENT SERVICES PROGRAM DESCRIPTION:**

As a result of presidential candidate Robert F. Kennedy’s assassination in 1968, Congress expanded the Secret Service’s authorities as established in 18 U.S.C § 3056 to include the protection of major Presidential candidates, Vice Presidential candidates, and nominees (P.L. 90-331). Additionally, within 120 days of the general Presidential election spouses of eligible candidates are authorized to receive protection.

By statute, the Secretary of Homeland Security (DHS) determines who qualifies as a major Presidential or Vice Presidential candidate in consultation with a Congressional Advisory Committee comprised of the Speaker of the House of Representatives, the minority leader of the House of Representatives, the majority and minority leaders of the Senate, and one additional member selected by the other members of the committee. Secret Service protective details are formally activated once a candidate: 1) meets the requirements for major candidate status, 2) requests protection, and 3) receives authorization from the DHS Secretary.

Historically, as the general election approaches, the Secret Service experiences a marked increase in protection stops related to presidential candidate activities. In support of the active campaign cycle, Secret Service field office personnel are a critical and integral source of manpower utilized to advance the travel stops and staff the designated protective details. For instance, during the 2008 Presidential Campaign, the Secret Service provided candidate protection for three major Presidential candidates (Senators Obama, Clinton, and McCain), two Vice Presidential candidates, four candidate spouses, and eight children. Further, Secret Service personnel conducted security advances for 3,184 candidate travel stops, including 980 travel stops specific to FY 2009 dated from October 1, 2008 to January 20, 2009.

**Department of Homeland Security**  
**U.S. Secret Service**  
**Operating Expenses**  
**Protection**  
**White House mail screening**  
**Program Performance Justification**  
(Dollars in Thousands)

**PPA: White House mail screening**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	-	-	<b>9,883</b>
<b>2012 Enacted Budget Authority</b>	<b>7</b>	<b>7</b>	<b>18,472</b>
2013 Adjustments-to-Base	-	-	1,383
<b>2013 Current Services</b>	<b>7</b>	<b>7</b>	<b>19,855</b>
<b>2013 Total Requested Budget Authority</b>	<b>7</b>	<b>7</b>	<b>19,855</b>
Total Change 2012 to 2013	-	-	1,383

The United States Secret Service requests 7 positions, 7 FTE and \$19.9 million in FY 2013 for the White House mail screening PPA.

- Increase of \$6 thousand for the 2013 pay raise
- Increase of \$1.377 million to support White House mail screening activities

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Since 2002, the Secret Service has provided management and oversight of the mail screening security program responsible for examining all incoming mail, parcels, and gifts destined for the White House Complex. The goal of this security enhancement program is for the detection of select chemical, biological, radiological, nuclear and explosive (CBRNE) hazards to occur at a remote location in order to contain, mitigate, and investigate any vulnerability posed by these threats. This program originally functioned at a repurposed military warehouse located in Edgewood, Maryland. In 2010, the Secret Service assumed permanent and sole responsibility of its own mail screening facility in Washington, D.C.

The Secret Service's White House Mail Screening Facility receives all delivered mail and other items from the Executive Office of the President (EOP) for screening. Upon receipt, security personnel and technical specialists utilize strict protocols to sample the mail for contamination and monitor the environment for potentially hazardous substances. Any items determined to contain possible contaminants are subjected to analysis at an on-site laboratory, quarantined at the facility pending substance identification, and subjected to any appropriate mitigation procedures. Once screened items are identified as posing no security risks, they are released back to EOP for administrative processing

and distribution. From FY 2008 to FY 2010, this Secret Service program screened over 6.78 million pieces of mail and other items for CBRNE hazards.

The above requested amount provides operational funding for the White House mail screening program. This program is aligned with the missions and goals set forth by the 2010 DHS QHSR in Mission 1: Preventing Terrorism and Enhancing Security, Goal 1.3.2, Protect Critical Infrastructure and Goal 1.3.4, Protect government leaders, facilities and special events.

Further, funding this activity supports the Secret Service strategic performance measures of:

- *Percent of total U.S. Secret Service protection activities that are incident – free for protection of national leaders, foreign dignitaries, designated protectees and others during travel or at protected facilities.*

Funding for this program will enable the Secret Service to accomplish the aforementioned performance goals.

**Department of Homeland Security**  
**U.S. Secret Service**  
**Operating Expenses**  
**Domestic field operations**  
**Program Performance Justification**  
(Dollars in Thousands)

Total Change 2012 to 2013	69	69	14,562

The United States Secret Service requests 1,526 positions, 1,526 FTE and \$238.6 million in FY 2013 for the Domestic field operations PPA.

- Increase of \$837 thousand for 2013 pay raise
- Increase of \$12.877 million (95 FTE) to shift existing base labor resources from the Presidential candidate nominee protection PPA
- Increase of \$848 thousand (12 FTE) to shift resources from NCMEC PPA

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Since 1865, the Secret Service’s investigative responsibilities provided under 18 U.S.C. § 3056 has been modified to adapt to the evolving threats to our financial institutions. Specifically, over the last two decades, the Secret Service has been authorized to investigate emerging crimes in the areas of access device fraud (18 U.S.C. § 1029), identity theft (18 U.S.C. § 1028), computer fraud (18 U.S.C. § 1030), and bank fraud (18 U.S.C. § 1344).

The Secret Service currently operates 142 domestic offices to principally carry out the investigative mission. These offices remain committed to the historical mission of combating counterfeiting by working closely with state and local law enforcement agencies as a means of continuing to aggressively pursue counterfeiters. With investigative jurisdiction over a number of financial crimes, Secret Service field offices work diligently to reduce the amount of financial losses affecting the U.S. economy. A primary goal remains a reduction in the proportion of counterfeit currency relative to the amount of genuine U.S. currency in circulation. Personnel assigned to domestic offices currently staff 29 Electronic Crimes Task Forces (ECTF) and 38 Financial Crimes Task Forces (FCTF) designed to combine the resources of academia, the private sector, and all levels of law enforcement to combat

threats against our financial payment systems and critical infrastructure. As a result, to support these task forces, domestic office special agents are trained to conduct computer forensic examinations through the Secret Service's Electronic Crimes Special Agent Program (ECSAP).

From FY 2006 to FY 2010, in the area of criminal investigations, Secret Service field offices reported a yearly average of 7,140 arrests. Investigative efforts yielded an estimated average of \$4.79 billion in potential loss prevented, of which \$1.67 billion involved cyber related crimes. Further, during this time, seizures of criminal assets totaled on average \$69 million per year.

In response to passage of the Fraud Enforcement Recovery Act of 2009, the Secret Service's FY 2010 investigative efforts into mortgage fraud led to 322 arrests, \$234 million in loss averted and \$135 million in actual loss identified.

Beyond investigative efforts, Secret Service field personnel are also a critical source of manpower required to accomplish the protective mission. Given the time sensitive nature of threat investigations, as well as the uncertainty of protective travel demands, the Secret Service has strategically located a network of domestic and international offices. Field personnel are able to conduct protective advances, travel to support protectee visits, and provide protection to visiting foreign heads of state/government. Field personnel are also responsible for investigating threats and matters of unusual interests directed towards the President, Vice President and other officials protected by the Secret Service. When investigating threats against any protectees, the Secret Service frequently works with federal, state and local law enforcement partners. The Secret Service has personnel assigned to each FBI Joint Terrorism Task Force (JTTF), including the National JTTF. This information sharing is critical to the success of these investigations.

From FY 2006 to FY 2010, Secret Service domestic field office personnel supported an average of 6,041 domestic travel stops and 83 international travel stops as well as completed an average of 2,149 foreign dignitary protective stops which involved an average of 199 heads of state/government, and 94 spouses.

The above requested amount provides funding for Secret Service domestic field operations in a strategic context specifically aligned with the missions and goals set forth by the 2010 DHS QHSR Mission 1: Preventing Terrorism and Enhancing Security, Goal 1.3.4, Protecting Government Leaders, Facilities, and Special Events; Mission 4: Safeguarding and Securing Cyber Space, Goal 4.1.3, Prevent Cyber Crime and Other Malicious Uses of Cyber Space; and Mission 6: Maturing and Strengthening the Homeland Security Enterprise.

Further, funding this activity supports the Secret Service strategic performance measures of:

- *Financial crimes loss prevented through criminal investigation (in billions).*
- *Financial crimes loss prevented by the Secret Service Electronic Crimes Task Forces (in millions).*
- *Percent of currency identified as counterfeit.*
- *Percent of total U.S. Secret Service protection activities that are incident – free for protection of national leaders, foreign dignitaries, designated protectees and others during travel or at protected facilities.*

Funding for this program will enable the Secret Service to accomplish the aforementioned performance goals.

**Department of Homeland Security**  
**U.S. Secret Service**  
**Operating Expenses**  
**International field office administration and operations**  
**Program Performance Justification**  
(Dollars in Thousands)

**PPA: International field office administration and operations**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2011 Actual Obligations</b>	<b>65</b>	<b>65</b>	<b>30,897</b>
<b>2012 Enacted Budget Authority</b>	<b>77</b>	<b>76</b>	<b>32,971</b>

<b>2013 Current Services</b>	<b>74</b>	<b>74</b>	<b>31,016</b>
<b>2013 Total Requested Budget Authority</b>	<b>74</b>	<b>74</b>	<b>31,016</b>
Total Change 2012 to 2013	(3)	(2)	(1,955)

The United States Secret Service requests 74 positions, 74 FTE and \$31.0 million in FY 2013 for the International field office administration and operations PPA.

- Increase of \$45 thousand for 2013 pay raise
- Decrease of \$2.0 million to non-recur funding for the for international field office administration and operations (2) FTE

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Secret Service’s first international office was established in Paris in 1963 in an effort to combat the proliferation of counterfeit U.S. currency produced overseas. Today, the Secret Service must operate outside the borders of the United States to forge effective partnerships combating transnational crime and eliminating threats directed towards our nation’s leaders. The Secret Service maintains 24 overseas offices in 19 countries in support of its mission to safeguard our nation’s financial infrastructure and protect the President, Vice President, and other designated officials traveling abroad.

Through its international presence, the Secret Service continues to enhance national security by protecting financial infrastructure through multi-lateral investigations that enhance the safety of cyberspace. For example, personnel assigned in Europe participate in three Cyber Crime Working Groups (the Baltics, Netherlands, and Ukraine) and two Electronic Crimes Task Forces/ECTF (London and Rome). These groups serve as partners in the international law enforcement community to exchange criminal intelligence about those targeting U.S. individuals, private entities, or financial

infrastructure for harm. In an effort to strengthen foreign membership to the ECTFs, the Secret Service partnered with law enforcement representatives from Belgium, Germany, France, Spain, Norway, Moldova, and Russia to identify areas of mutual investigative interests to combat cyber crime targeting the interconnected financial systems. These international Secret Service activities have ensured that criminal organizations engaged in high-consequence or wide-scale cyber crime are aggressively investigated and disrupted, and their leaders arrested, indicted, and prosecuted. Recently, in Peru, where organized criminal groups manufacture large quantities of counterfeit U.S. currency, the Secret Service has established a partnership in 2009 with the national police via the Peruvian Counterfeit Task Force (PCTF). From 2009 to 2011, the work done by the PCTF has yielded 58 arrests, six major counterfeit plant suppressions, and the seizure of over \$33 million in counterfeit U.S. currency. The Secret Service's PCTF model is based on the success of a similar model developed in Colombia, where since 2001, vetted anti-counterfeiting forces in Colombia have seized over \$262 million in counterfeit U.S. currency, suppressed over 113 counterfeit printing plants, and made over 665 arrests. This action has resulted in a 70% reduction in the amount of Colombian-produced counterfeit U.S. currency being passed in the United States.

In FY 2010, Secret Service international offices assisted their counterparts in securing the arrest of 813 criminal suspects implicated in currency counterfeiting, financial crimes and cyber cases. They seized \$241 million in counterfeit U.S. currency before it could be introduced into worldwide circulation, and aided in financial crime investigations that identified \$147 million in potential losses.

In support of the Secret Service protective mission, international offices conducted 515 protective security advances to numerous countries visited by Secret Service protectees (a 42% increase from FY 2009).

Lastly, the Secret Service continually examines the location and placement of international offices to ensure agency assets are efficiently placed to address emerging criminal trends or protection mission requirements. For example, in FY 2011 the Secret Service established a Resident Office in Beijing, China to address emerging financial crimes that threaten the economic stability of the United States, and to better facilitate protectee travel to that region. In FY 2012, the Secret Service will establish a full-time presence in Lima, Peru to investigate the significant increase in the worldwide passing activity of counterfeit United States currency originating in that region. To partially offset the out year expenses associated with these two offices, the Secret Service has begun the process of closing its Resident Office in Toronto, Canada.

The above requested amount provides funding for Secret Service international field operations in a strategic context specifically aligned with the missions and goals set forth by the 2010 DHS QHSR Mission 1: Preventing Terrorism and Enhancing Security, Goal 1.3.4, Protecting Government Leaders, Facilities, and Special Events; Mission 4: Safeguarding and Securing Cyber Space, Goal 4.1.3, Prevent Cyber Crime and Other Malicious Uses of Cyber Space; and Mission 6: Maturing and Strengthening the Homeland Security Enterprise.

Further, funding this activity supports the Secret Service strategic performance measures of:

- *Financial crimes loss prevented through criminal investigation (in billions).*
- *Financial crimes loss prevented by the Secret Service Electronic Crimes Task Forces (in millions).*
- *Percent of currency identified as counterfeit.*

- *Percent of total U.S. Secret Service protection activities that are incident – free for protection of national leaders, foreign dignitaries, designated protectees and others during travel or at protected facilities.*

Funding for this program will enable the Secret Service to accomplish the aforementioned performance goals.

<b>2013 Total Requested Budget Authority</b>	<b>293</b>	<b>293</b>	<b>54,655</b>
Total Change 2012 to 2013	3	3	1,604

The United States Secret Service requests 293 positions, 293 FTE and \$54.7 million in FY 2013 for the electronic crimes special agent program and electronic crimes task forces PPA.

- Increase of \$173 thousand for 2013 pay raise
- Increase of \$1.431 million (10 FTE) to shift existing base labor resources from the Presidential candidate nominee protection PPA
- Decrease of (7) FTE for White House Mail

**CURRENT SERVICES PROGRAM DESCRIPTION:**

With more than 146 years of investigative expertise in financial crimes, the Secret Service has continued to evolve in order to protect the U.S. financial system. The Secret Service has a pivotal role in securing the nation’s critical infrastructures, specifically, in the areas of telecommunications, banking, and finance. With the passage of the 2001 USA PATRIOT Act (P.L. 107-56), the Secret Service was mandated to establish a nationwide network of Electronic Crimes Task Forces (ECTF) to “prevent, detect, and investigate various forms of electronic crimes, including potential terrorist attacks against critical infrastructure and financial payment systems.” Today, the Secret Service maintains a robust program to fight cyber crime and other forms of illegal computer activity that threaten our nation’s financial payment systems.

The Secret Service currently operates 31 ECTFs around the world. The structure of these ECTFs is designed to combine the resources of academia, the private sector, and all levels of law enforcement in order to combat computer-based threats. Through this task force approach, the Secret Service and its partners are able to share information and identify weaknesses that maximize the group’s ability to combat criminal cyber activity and focus heavily on investigations of network intrusions, hacking attacks, phishing schemes, skimming, access device fraud, carding portals, wire fraud, use of malicious

software, and other computer related offenses. Membership in Secret Service ECTFs currently include: 366 academic partners, over 2,495 international, federal, state, and local law enforcement partners, and over 4,093 private sector partners. The Secret Service special agents assigned to ECTFs are uniquely trained in the area of computer forensics and network intrusion investigations. Each ECTF member must complete advanced training geared to enhance the ECTF model.

The Electronic Crimes Special Agent Program (ECSAP) was established to provide special agents with basic and advanced computer forensics training in order to conduct investigative examinations on electronic evidence obtained from computers, personal data assistants, and other forms of electronic media. Specifically, the program, currently comprised of over 1,400 special agents, is divided into three levels of training:

- **Level I – Basic Investigation of Computers and Electronic Crimes (BICEP):** Training designed to provide special agents with a basic understanding of computers and several aspects of electronic crimes investigations.
- **Level II – Network Intrusion Responder (ECSAP-NI):** Training designed to provide special agents with specialized skills and equipment that allow them to respond and investigate network intrusions. ECSAP-NI agents are able to identify critical artifacts that allow for effective investigation of identity theft, malicious hacking, unauthorized access, and various other related electronic crimes.
- **Level III – Computer Forensics (ECSAP-CF):** Training designed to provide special agents with specialized skills and equipment that allow them to investigate and forensically obtain digital evidence. Forensically-obtained digital evidence can then be utilized in the prosecution of various electronic crime cases as well as criminally-focused intelligence cases.

Through ECSAP, the Secret Service is able to maintain a base of subject matter experts within the area of cyber crime. As a result, the Secret Service is continually recognized by public and private entities as one of the most authoritative and effective U.S. government agencies in combating cyber crime.

In an effort to provide a national standard of training for variety of electronic crimes investigations, a partnership between the Secret Service, DHS's National Protection and Programs Directorate (NPPD), the State of Alabama and the Alabama District Attorney's Association was formalized through the National Computer Forensic Institute (NCFI) located in Hoover, AL. This program offers State and local law enforcement officers, prosecutors, and judges training in conducting computer forensics examinations. Investigators are also trained to respond to network intrusion incidents and conduct electronic crimes investigations.

Based upon the emerging use of mobile devices to communicate, the Secret Service developed a partnership with the University of Tulsa, OK. As a result of this partnership, the Secret Service established Cell Phone Forensics Facility, which ranks among the best in the world for its capabilities, conducts training, examinations, and research in the field of mobile device forensics, such as skimmers, cell phones, and GPS units. Since 2008, over 5,000 mobile device examinations have been conducted.

Both ECTF and ECSAP provide the expertise and toolsets necessary to combat the ever-increasing number, scope, and sophistication of criminal organizations and other malicious actors engaged in high-consequence or wide-scale cyber crime.

The above requested amount provides funding for Secret Service ECSAP and ECTFs in a strategic context specifically aligned with the missions and goals set forth by the 2010 DHS QHSR Mission 1: Preventing Terrorism and Enhancing Security, Goal 1.3.4, Protecting Government Leaders, Facilities, and Special Events; Mission 4: Safeguarding and Securing Cyber Space, Goal 4.1.3, Prevent Cyber Crime and Other Malicious Uses of Cyber Space.

Further, funding this activity supports the Secret Service strategic performance measures of:

- *Financial crimes loss prevented by the Secret Service Electronic Crimes Task Forces (in millions).*
- *Financial crimes loss prevented through criminal investigation (in billions).*
- *Percent of currency identified as counterfeit.*
- *Percent of total U.S. Secret Service protection activities that are incident – free for protection of national leaders, foreign dignitaries, designated protectees and others during travel or at protected facilities.*

Funding for this program will enable the Secret Service to accomplish the aforementioned performance goals.

**Department of Homeland Security  
U.S. Secret Service

<b>2013 Total Requested Budget Authority</b>	<b>-</b>	<b>-</b>	<b>-</b>
Total Change 2012 to 2013	(20)	(20)	(8,366)

The United States Secret Service requests 0 positions, 0 FTE and \$0 million in FY 2013 for the Forensic support and grants to NCMEC PPA.

- Decrease of \$8.4 million to reduce the forensic support and grants to missing and exploited children

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Under the provisions of the Violent Crime Control Act of 1994, the Secret Service was directed to provide forensic support through a Task Force to the National Center for Missing and Exploited Children (NCMEC). Subsequently, the PROTECT Act of 2003 amended 18 U.S.C. § 3056 to authorize the Secret Service “to provide forensic and investigative assistance in support of any investigation involving missing or exploited children.” The historical recipient of grant funding related to missing and exploited children has been NCMEC.

The Secret Service currently provides investigative assistance and liaison to NCMEC headquarters staff by facilitating services available through the Secret Service Forensic Services Division (FSD). FSD capabilities include: polygraph examinations, handwriting examinations, voiceprint comparisons, audio and video enhancements, age progressions, and fingerprint identification.

The majority of cases in which the Secret Service provides assistance involve child pornography or online enticement of a child for sexual purposes. Since 1997, in relation to missing and exploited

children, the Secret Service annually opens an average of 177 investigative cases, conducts 87 polygraph examinations, and completes 168 electronic (media and/or computer) examinations.

Total FY 2012 funding level allowed the Secret Service to provide state-of-the-art forensics support, and \$6 million in grant funds, for investigations/activities involving missing and exploited children.

The funding request for forensic support and grant to missing and exploited children is being eliminated in FY 2013 redirect critical resources to USSS priority mission programs. Grant funding support for NCMEC will be consolidated and will continue within the Department of Justice's Office of Justice Programs (OJP). The Secret Service proposes to transfer \$0.9 million in funding to the Domestic Field Office PPA to continue future forensic and investigative support for priority missing and exploited children cases within the Forensic Services Division.

Total Change 2012 to 2013	120	121	(16,919)

The United States Secret Service requests 451 positions, 451 FTE and \$174.7 million in FY 2013 for the Headquarters, management and administration PPA.

- Increase of \$335 thousand for 2013 pay raise
- Increase of \$284 thousand to annualize second year acquisition workforce
- Decrease of \$17.538 million in DHS-wide offsets

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Integral to the support and execution of the Secret Service’s dual mission, the Headquarters, Management and Administration program develops and administers Secret Service-wide policies, plans, and procedures in acquisition, budget, accounting, financial systems, statements, and relocation and travel services. It exercises accountability over the collection and disposition of the Secret Service's financial resources. Specifically, components of this program examine and process documents for payment of contracts, purchase orders, invoices and recurring expenses. The program also provides management and program analysis support and oversight to all operational and administrative programs involving efforts relating to organizational structuring, workflow efficiencies, staffing allocations, statistics, policy development, management of Federal records, internal controls, and strategic planning. The Secret Service will be continuing the focus on strengthening the capabilities of the acquisition workforce through training and development initiatives, information technology enhancements and acquisition management improvements consistent with the agency acquisition human capital plan. Additionally, through the review and assessment of business and

operational offices, programs, and practices, the program ensures that Secret Service offices and programs comply with Secret Service policies and Federal regulations and operate efficiently and effectively. The primary components of this program are: (1) Administrative Operations, (2) Financial Management, and (3) Program Management. Also, this program, under the leadership of the Chief Information Officer, is responsible for the development, coordination, implementation, and oversight of enterprise solutions including new IT technologies or investments.

### **Administrative Operations** (Facility and Property Management)

The Administrative Operations Division (AOD) plans, develops, and administers policies and procedures related to facility and property management, as well as performs associated activities for a variety of real and personal property management areas to support Secret Service Headquarters, 142 domestic and 24 international offices. As the single Secret Service acquisition agent between General Service Administration (GSA), as well as the Department of State, AOD manages the acquisition, construction and renovation of owned or leased real property. Further, AOD manages the administration of issued personal property for approximately 7,000 employees, vehicle fleet management, mail distribution, and supply administration. Focused on civic and fiscal responsibility, AOD in concert with the Safety Health and Environmental Program Division also develops and executes policies for environmental management, energy conservation, and other related programs.

The program also organized and coordinated facilities and property management for the 2011 State of the Union Address and the 66<sup>th</sup> session of the United Nations General Assembly (UNGA) in New York, NY, which included the planning, preparation, establishment, and deactivation of permanent and temporary protective sites.

### **Financial Management** (Finance, Procurement, and Travel)

The Financial Management program develops specific business systems to facilitate core financial accounting and reporting, as well as procurement, travel, and relocation management. This programmatic responsibility includes the production of meaningful reports and analysis that enables the Secret Service to make better financial decisions. Furthermore, activity by the Financial Management program fosters the interface between administrative systems, and supports system users through training, communications, and technical services.

The Secret Service works diligently to accurately translate agency needs into dollars/resources and manage the timely and accurate documentation, payment, and reporting for acquired goods and services. In FY 2010, this program managed over 2,500 contract actions with an obligated value at \$259 million.

To maximize the Secret Service's purchasing power and operational efficiency as they relate to travel, the Logistics Resource Center (LRC) was created by the Office of Administration. The LRC provides a clearinghouse for all protective, investigative, and training related travel by working cross-functionally amongst all business units to identify the most advantageous mode of transportation whether it is by government vehicle, train, airplane, or military charter. Since 2008, it is estimated that the LRC has avoided over \$200 million in commercial travel costs.

## **Program Management (Management and Organization)**

The Program Management activity supports accomplishment of Secret Service core missions through informed analysis, consultation, and decision support. Through its various products and services, the program assists the Secret Service in meeting its evolving responsibilities, improves its performance and ensures accountability to stakeholders, policy development, and provides recommendations and solutions to address management challenges.

Using performance data and statistical systems, this activity analyzes and reports on data from six (6) databases to inform organizational change and inform decision making. It establishes, develops, implements, and manages the strategic planning process for the Secret Service and coordinates Secret Service participation in all Department of Homeland Security (DHS) and government-wide management improvement and evaluation programs, such as: the DHS planning and performance measurement processes, including the DHS Issue Teams, DHS Strategic Community Forum, DHS Performance Team Working Group and associated activities.

## **Chief Information Officer**

During FY 2011, the Secret Service established and appointed a Chief Information Officer (CIO) to develop, coordinate, oversee, and integrate the agency's IT activities and investments. The CIO's charge is to ensure the IT infrastructure and communications systems are commensurate with the agency's mission. In FY 2013, if approved, the Secret Service plans to upgrade its IT infrastructure and database architecture so that it is able to fully support evolving technological advancements (i.e., internet protocol, IPv6) through its various Information Integration and Transformation (IIT) initiatives. The Secret Service also plans to continue the migration of systems and applications to the two DHS Enterprise Data Centers. This effort will enable alternatives to share common DHS infrastructure.

Information Integration and Technology Transformation, formerly known as Information Integration and Transformation (IIT), includes IT modernization and related investments. Many of these projects will proceed through a requirements/cost/alternatives assessment phase, design phase, initial implementation (beta-testing) phase and, finally, full deployment. Non-pay Information Integration and Technology Transformation funding is being transferred to Acquisition, Construction, and Improvements (ACI).

The above requested amount provides funding for Secret Service headquarters operations in a strategic context specifically aligned with the missions and goals set forth by the 2010 DHS QHSR Mission 1: Preventing Terrorism and Enhancing Security, Goal 1.3.4, Protecting Government Leaders, Facilities, and Special Events; Mission 4: Safeguarding and Securing Cyber Space, Goal 4.1.3, Prevent Cyber Crime and Other Malicious Uses of Cyber Space; and Mission 6: Maturing and Strengthening the Homeland Security Enterprise.

Further, funding this activity supports the Secret Service strategic performance measures of:

- *Financial crimes loss prevented through criminal investigation (in billions).*

- *Financial crimes loss prevented by the Secret Service Electronic Crimes Task Forces (in millions).*
- *Percent of currency identified as counterfeit.*
- *Percent of total U.S. Secret Service protection activities that are incident – free for protection of national leaders, foreign dignitaries, designated protectees and others during travel or at protected facilities.*

Funding for this program will enable the Secret Service to accomplish the aforementioned performance goals.

The United States Secret Service requests 273 positions, 273 FTE and \$55.7 million in FY 2013 for the Protection of persons and facilities PPA.

- Increase of \$151 thousand for 2013 pay raise

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Since 1971, the James J. Rowley Training Center (RTC) has served as the primary training academy for the Secret Service. RTC is an accredited academic institution, meeting the standards established by the Federal Law Enforcement Training Accreditation (FLETA) Board. Further, its Instructional Development Program, Special Agent Basic Training Course and Uniformed Division Officer Basic Training Course are also fully accredited by FLETA. Both the academy and these programs continue to meet reaccreditation standards.

The 493-acre facility is comprised of over 30 buildings featuring multiple classrooms, firearms ranges, physical fitness facilities, tactical villages, and a protective operations driving pad. This infrastructure provides a high-quality and dynamic training environment to new recruits and current employees. Additionally, RTC facilities are utilized to provide federal, state, and local law enforcement partners with collaborative training related to the Secret Service missions.

The core curriculum provided by RTC instructors is principally designed for newly hired special agents, Uniformed Division officers, special officers and physical security specialists. These courses include training in investigative and protective methodologies, cyber crimes, firearms marksmanship,

control tactics, emergency vehicle operation, emergency medicine and physical fitness, financial crimes detection, physical/site/event protection and water survival training. As Secret Service employees progress through their career, RTC provides specialized/advanced training in order to continue to meet the emerging needs of the agency as it relates to the protective and investigative missions. This “in-service” curriculum consists of, but is not limited to, comprehensive training in specialized operational and protective tactics or intelligence, financial crime, cyber-based investigations, and employee and managerial development.

RTC provides recurring Presidential and Vice Presidential protective detail training to ensure operational readiness of special agents and officers assigned. The specialized training includes protective methods to mitigate emerging tactics and trends used by adversaries, and simulated protective detail operations.

From FY 2008 to FY 2010, RTC personnel conducted 24 Special Agent Training Courses (totaling 607 Special Agent trainees), 28 Uniformed Division Training Courses (totaling 510 Officer trainees), and 1,212 specialized skills courses (totaling 37,420 personnel). Further, since 2005, RTC has provided 107 briefings to international law enforcement counterparts as a means of enhancing and improving partnerships.

The above requested amount provides funding for RTC. This funding specifically permits the Secret Service to provide essential operations and training curricula. This program is aligned with the missions and goals set forth by the 2010 DHS QHSR Mission 1: Preventing Terrorism and Enhancing Security, Goal 1.3.2, Protect Critical Infrastructure and Goal 1.3.4, Protecting Government Leaders, Facilities, and Special Events; Mission 4: Safeguarding and Securing Cyber Space, Goal 4.1.3, Prevent Cyber Crime and Other Malicious Uses of Cyber Space; and Mission 6: Maturing and Strengthening the Homeland Security Enterprise, Goal 6.3.1, Prevent the Exploitation of Persons.

Further, funding this activity supports the Secret Service strategic performance measures of:

- *Percent of total U.S. Secret Service protection activities that are incident – free for protection of national leaders, foreign dignitaries, designated protectees and others during travel or at protected facilities.*
- *Percent of National Security Events that were successfully completed.*
- *Financial crimes loss prevented through criminal investigation (in billions).*
- *Financial crimes loss prevented by the Secret Service Electronic Crimes Task Forces (in millions).*
- *Percent of currency identified as counterfeit.*

Funding for this program will enable the Secret Service to accomplish the aforementioned performance goals.

<b>2013 Total Requested Budget Authority</b>	<b>10</b>	<b>10</b>	<b>1,137</b>
Total Change 2012 to 2013	-	-	(42,706)

The United States Secret Service requests 10 positions, 10 FTE and \$1.1 million in FY 2013 for the Information Integration and Technology Transformation PPA.

- Increase of \$4 thousand for 2013 pay raise
- Increase of \$114 thousand for 3<sup>rd</sup> year Information Integration and Technology Transformation positions
- Non-pay transfer of \$42.824 million to the Acquisition, Construction, and Improvements account

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Secret Service relies heavily on Information Technology (IT) infrastructure and communications systems to achieve its protective and investigative missions. Secret Service generated a classified Mission Needs Statement (MNS) for Information Integration and Transformation (IIT) that identified existing deficiencies and disparities in the Secret Service IT infrastructure, database architecture, cyber security, communications, cross domain application multi-level security, access control, investigative technologies, information assurance, and resource management capabilities. Requested funding will enable the Secret Service's IT networks, data systems, applications, and system security to fully support the evolving technological advancements linked to present operational requirements. The dated infrastructure lacks the ability to support newer technologies (e.g., internet protocol, IPv6), share common DHS enterprise services, or migrate to approved data centers. This modernization will be implemented by means of an extensive re-architecting of the current infrastructure and the careful selection and integration of interoperable capabilities to support critical mission needs. The

Information Integration and Technology Transformation program consists of Enabling, Communications, and Control Capabilities, as well as cross-cutting Mission Support Capabilities. This funding is for positions required to support Information Integration and Technology Transformation.

This program aligns with the missions and goals set forth by the 2010 DHS QHSR in Mission 1: Preventing Terrorism and Enhancing Security, Goal 1.3.2, Protect Critical Infrastructure and Goal 1.3.4, Protect government leaders, facilities and special events and Mission 4: Safeguarding and Securing Cyberspace, Goal 4.1.3 Prevent Cybercrime and Malicious use of Cyberspace.

## IV. Program Justification Changes

**Department of Homeland Security  
U.S. Secret Service  
Operating Expenses  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 1:** National Special Security Events  
PPA: National Special Security Event Fund  
Program Increase: Positions 0, FTE 0, Dollars \$3,500

### Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	1,000
Program Increase							-	-	3,500
<b>Total Request</b>	-	-	<b>5,846</b>	-	-	<b>19,307</b>	-	-	<b>4,500</b>

### Description of Item

This request provides funding to cover expenses related to the planning and implementation of comprehensive operational security plans for National Special Security Events (NSSE). These costs assume purchases and expenses for: communications and utilities, transportation of things/equipment, travel and transportation of persons, other personnel compensation, rental costs, and other services and equipment. Some of these expenses translate to NSSE activities, such as the build-out of the Multi-Agency Communications Center (MACC), credentialing, coordinating center, and dedicated video assets.

### Justification

Designation of a NSSE may not necessarily correspond within the traditional timelines or boundaries of the federal budget process. With the exception of the annual State of the Union Address and quadrennial presidential inaugurations/nominating conventions, the Secret Service is unable to fully plan for, in any given year, what special events will receive NSSE designation. Furthermore, the costs related to the transportation of vital assets needed at NSSEs may be increased due to event's geographical location, the availability of critical commercial infrastructures, as well as the fact that the Secret Service is unable use U.S. military resources as provided by the Presidential Assistance Act (P.L. 94-524).

NSSEs represent some of the most complex and logistically complicated protective operations undertaken by the Secret Service. Each requires federal support and coordination with numerous law enforcement and public safety jurisdictions. For instance, during the two-day 2010 Nuclear Security Summit in Washington, D.C., the Secret Service provided protective details and security measures for the President, Vice President, and 37 heads of state, issued 23,000 security credentials, and screened by magnetometers approximately 28,500 venue attendees.

Due to limited time available for planning of an NSSE after its designation, the Secret Service has required reprogramming requests to acquire funding. For example, in FY 2009, a reprogramming of \$4.81 million was necessary to cover the costs associated with the two-day G-20 Summit in Pittsburgh, PA, and in FY 2010, a reprogramming of \$4.18 million was necessary to cover costs associated with the two-day Nuclear Security Summit in Washington, D.C. Additionally, in FY 2011, a reprogramming of \$6.05 million was necessary to cover the planning and start-up costs associated with the Asia-Pacific Economic Cooperation in Honolulu, HI. With the requested increased funding level, the Secret Service will be able to utilize the appropriated NSSE funds in order to cover planning and implementation estimated costs associated with designated events that occur without significant delay.

### **Impact on Performance (Relationship of Increase to Strategic Goals)**

NSSE resources directly support the DHS strategic goal to protect people, places, and critical infrastructure, including events of symbolic importance to American citizens. Protection includes all activities related to identifying threats, mitigating vulnerabilities and creating secure environments wherever these specially designated events take place.

Further, funding this activity supports the Secret Service strategic performance measures of:

- *Percent of National Security Events that were successfully completed.*
- *Percent of total U.S. Secret Service protection activities that are incident – free for protection of national leaders, foreign dignitaries, designated protectees and others during travel or at protected facilities.*

An increase in the NSSE PPA funding (based on anticipated yearly averages), will reduce the possibility of the Secret Service having to seek a reprogramming of funds, which often impact the activities of other mission critical programs.

**Department of Homeland Security**  
**U.S. Secret Service**  
**Operating Expenses**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 2:** Cyber Security Presidential Protection Measures  
PPA: Protection of persons and facilities  
Program Increase: Positions 0, FTE 0, Dollars \$13,300

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	13,300
<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>13,300</b>

**Description of Item**

This request provides funding for Cyber Security Presidential Protection Measures, which would enable the Secret Service to utilize its cybercrime investigative skills in its protective mission. Specifically, funding will allow the Secret Service to leverage its investigative expertise and capabilities to potentially mitigate and investigate the increasing number of network-based threats directed towards our protectees. This program also directly supports the Comprehensive National Cybersecurity Initiative, which calls for the assessment and mitigation of cybersecurity threats and the protection of critical systems governing energy delivery, information technology, and other process control systems,.

**Justification**

The following programs are part of the Protection Related Cyber Security activities necessary to meet existing and emerging threats:

- **Transition Costs for Cyber-detection and Intrusion Prevention Technologies: \$1,010,604**  
Several years ago, the Service initiated a program to analyze and monitor Internet or network system threats directed towards venues at National Special Security Events (NSSEs) as well as venues visited by the President and Vice President. The initiative has been very successful and is continuing to evolve. Requested funding would allow the Secret Service to leverage the capabilities of National Protection and Programs Directorate’s (NPPD) cyber-detection and

intrusion prevention technology and cover costs associated with adapting this technology for Secret Service use. Note, “Kaleidoscope” refers to the U.S. Secret Service application and leverage of existing NPPD technologies and capabilities.

Deploying these capabilities would provide a better threat picture than what currently exists by increasing situational awareness of the cyber threats directed toward the President or other Secret Service protectees. Deployment of this technology would also enhance the threat picture available to NPPD as it would provide them access to data from private networks as opposed to just the .gov domain. In order for the Secret Service to do this, NPPD’s cyber-detection and intrusion prevention technology requires modification to increase mobility and speed of deployment. This funding request would allow the Service to work with NPPD to develop the mobile capabilities for this technology.

- **Monitor, Decode and Tag Data: \$886,500**

Once a threat is identified through KALEIDOSCOPE technology, the Internet Protocol (IP) traffic would be monitored and IP intercepts would be used to reconstruct the network data. Investigators would review and analyze the data to determine the intentions of the attacker. The requested funding would allow the Secret Service to expand the amount of data it receives and analyzes.

- **Clustered Computer Analysis Platform (CCAP): \$2,078,843**

To increase the speed of the forensic analysis, a necessity in protective movements, the Secret Service requires a Clustered Computer Analysis Platform (CCAP). The Service would use the requested funding to establish six CCAP nodes throughout its Electronic Crimes Task Forces (ECTFs) which would allow multiple digital forensic examiners physically located across the country to analyze the data simultaneously.

- **Mobile Wireless Tracking: \$2,813,751**

To locate threat actors quickly, the Secret Service uses mobile wireless tracking technology to locate individuals of interest through their cellular telephones and mobile broadband devices. Man portable versions of this technology could be deployed to support the monitoring of the area immediately surrounding a protectee to alert the protective detail when a known threat enters a designated perimeter. This capability is different than the current capabilities the Secret Service has which are mobile (vehicular) but not man portable. In densely populated areas, this technology would serve as a force multiplier because it would allow agents to follow a signal into buildings and floors. In addition to known threats, mobile wireless tracking technology could be used to survey and compare the digital environment each time a protectee changes location. Cross referencing from one location to the next would provide the Secret Service the added capability of identifying previously unknown threats based upon repetitive patterns of movement.

The emergence of new technologies, including 4G Long Term Evolution (LTE), pose a serious threat to the ability of the Secret Service to continue leveraging mobile wireless tracking technology in support of the mission. As the pervasive technology deployed by mobile service providers begins to transition, it is essential to upgrade tracking equipment to maintain compatibility. The requested funding provides the equipment needed to provide the man portable capabilities for existing Wireless Tracking Teams.

- **Threat Management: \$1,773,000**

This funding request would mitigate current problems posed by multiple, disparate databases by consolidating several different databases the Secret Service uses under both its protective and investigative function.

- **Electronic Crimes Special Agent Program (ECSAP) – Network Intrusion Training: \$3,638,196**

To leverage the capabilities identified above, Secret Service personnel would require additional ECSAP Network Intrusion Responder (ECSAP-NI) (Level II) training. This specialized training and equipment provides special agents the ability to respond to and investigate network intrusions. The Level II- trained agents would be able to identify critical artifacts to allow effective investigation of data breaches, malicious hacking, unauthorized access, and various other related electronic crimes. These same agents would be used in furtherance of the Critical Systems Protection Mission. The requested funding provides training for 128 special agents.

- **Cyber Intelligence Section (CIS) Protection Activities: \$655,820**

The Secret Service’s Cyber Intelligence Section (CIS) has developed the capability to aggregate and report information obtained from various sources to support Secret Service protective intelligence investigations. CIS monitors developing trends in cyber-based protective threats to enhance the Service’s ability to prevent and mitigate attacks against our protectees. As cyber-based threats against our protectees have greatly increased, the Service requires an enhanced intelligence capability in this area. The requested funding would provide these capabilities within our intelligence operations by leveraging specialized contractor support.

- **Computer Emergency Response Team-Software Engineering Institute Liaison Program (CLP): \$443,250**

As will be detailed in a following section, the Secret Service has maintained a long-term relationship with the Computer Emergency Response Team at Carnegie-Mellon. The requested funds would support the Service’s access to a Virtual Training Environment (VTE), which is a web-based application that provides distance learning in an anytime, anywhere setting. Program content consists of a wide variety of technology-focused courses, presentations, demonstrations, tutorials, and hands-on ‘virtual’ labs. Access to this system would provide the Service with a cost efficient way of providing training to protective intelligence personnel in the field regarding emerging trends and tactics of cyber-based threats.

In addition, the funding would provide the Secret Service with access to CERT Software Engineering Institute’s (SEI) Read the Web Project, which uses machine learning to seek out unstructured data associated with sets of words or phrases and derive structured relationships from all publicly available data on the Internet. Access to this technology will allow the Secret Service to identify if multiple threats are coming from the same threat actor. With such knowledge, the Service will be better positioned to efficiently deploy its protective intelligence investigative resources so that multiple investigations are not being conducted on the same threat actor.

### **Impact on Performance (Relationship of Increase to Strategic Goals)**

Fully funding the “Cyber Security Presidential Counter Measures” initiative allows the Secret Service to investigate the high percentage increase in the number of internet based threats that our protectees receive and to conduct critical system protection advances on venues visited by our protectees. This funding allows staff to develop and maintain expertise in protection and investigative capabilities through training and equipment that is constantly evolving. Ultimately, funding this initiative allows for the deployment of additional tools/capabilities that will provide a better threat picture than what currently exists by increasing situational awareness of the cyber threats directed toward the President or other Secret Service protectees.

This program directly supports QHSR Mission Objective 1.3.4 “protect government leaders, facilities, and special events” and QHSR Mission Area 4 “safeguarding and securing cyberspace.” Funding allows the Secret Service to obtain training and technology needed to mitigate internet based threats to our protectees. Operational decisions would be made and actions would then be executed to mitigate the threat and to ensure the safety of The President and other protectees. Specifically, this initiative supports the strategic performance measure: *Percent of total U.S. Secret Service protection activities that are incident-free for protection of national leaders, foreign dignitaries, designated protectees and others during travel or at protected facilities.* Fully funding this program will ensure the success of the protective mission by allowing the Secret Service to fully analyze and mitigate incoming internet threats directed toward the President or other Secret Service protectees.

**Department of Homeland Security**  
**U.S. Secret Service**  
**Operating Expenses**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 3:** Integrated Command and Control Systems  
PPA: Protection of persons and facilities  
Program Increase: Positions 0, FTE 0, Dollars \$12,100

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	12,100
<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>12,100</b>

**Description of Item**

This request provides funding to modernize the Secret Service’s communications and information sharing capabilities critical to supporting its protective and investigative missions while enabling interoperability with operational partners that complies with federal standards. The Integrated Command and Control Systems (ICCS) program will provide new and enhanced capabilities for sharing classified and law enforcement sensitive information critical to informed decision making during protective and investigative activities. The ICCS program provides new digital equipment and systems to leverage modern communication technologies using Internet Protocol (IP) network environments. The ICCS program will transition the Secret Service from technologically obsolete analog communications systems to modern digital IP enabled systems. This transition provides the Secret Service with increased communications speed and reliability by reducing its dependence on external commercial analog infrastructures and circuits. The Secret Service would be able to leverage automated processes to record and store operational mission communications. With the initial funding, the ICCS program will replace “stand-alone” systems that support wireless MESH technologies, radio IP solutions and command and control video enhancements (including secure video) with modern IP communications technologies that enable the integration and interoperability of radio, video and wireless technologies into a common operating platform.

**Justification**

The success of the Secret Service mission relies not only on the advanced planning and reaction of its personnel faced with an emergent threat, but on an entire command and control structure that provides additional critical resources and support elements. The ICCS program is intended to significantly

improve the timeliness and reliability of information provided to the command and control entities of the Secret Service, while reducing its susceptibility of illicit compromise. The ICCS program supports a service wide communication transition to Internet Protocol (IP) encrypted voice, radio, video, wireless and classified systems. This transition provides the Secret Service with increased reliability and reduces reliance on external telecommunications infrastructure through the use of the modernized network. The new ICCS systems will meet federal encryption standards set forth by the National Security Agency (NSA) and National Institute of Standards and Technology (NIST) and will enable interoperability and collaboration capabilities identified by the Department of Homeland Security (DHS) and other federal requirements.

The goals of the ICCS program are realized through the use of the following state-of-the-art communication technologies:

- **Wide Area Voice Environment (WVE)/Radio over Internet Protocol (RoIP): \$6,000,000**  
Wide Area Voice Environment (WVE)/Radio over Internet Protocol (RoIP) upgrades will allow real-time monitoring of protective and investigative operations anywhere in the world to be accessed via the Secret Service network, to include field offices and protective details. WVE provides secure IP radio console systems with digital audio, voice recording, instant voice replay, real time activity logs, and access to multiple channel monitoring. WVE enables operational efficiencies through the elimination of commercial services supporting dated analog voice circuits and facilitation of conversion to RoIP that enables the use of existing network encrypted circuits. RoIP will provide a new capability to provide tactical radio communications from protective details; protective intelligence teams and investigative operations back to command and control centers increasing overall awareness of the actual voice communications between agents and officers throughout the world. Currently, the Secret Service radio communications are only available to localized operations and not accessible to other command and control operation centers that require awareness of these operations, including the Washington, D.C. based Joint Operations Center.
- **Wireless Mesh Technology (WMT) : \$4,800,000**  
Wireless Mesh Technology (WMT) will provide wireless and encrypted broadband communications of voice and data. WMT allows for the wireless transmission of live video camera feeds, information from a wide range of alarms and sensors, audio communication via phone or radio, and personnel tracking. Utilization of WMT allows for potential cost avoidance by eliminating the current need to run extensive physical cabling to accomplish the same tasks. Deployment of WMT is expected to result in operational efficiencies through the reduction of commercial services and supplies necessary to support protective operations. An example of this savings can be found by looking at the United Nations General Assembly (UNGA) which requires the installation of approximately eight miles of cabling every year to support temporary communication for Secret Service personnel. WMT will allow the Secret Service to rapidly deploy a portable government owned secure, modern framework for protective operations. WMT provides faster access to real-time situational awareness that increases Secret Service capabilities to respond and thwart threats to a protective site or operation.

- **Command and Control Video Enhancements (CCVE): \$1,300,000**

Command and Control Video Enhancements (CCVE) enables mobile video conferencing over the new Secret Service network. CCVE provides encrypted (FIPS 140-2) video teleconferencing capabilities between operational personnel and supervisors at protective divisions and field offices. Specifically, CCVE enables the Secret Service to deploy encrypted real-time videoconferencing for Classified and Sensitive but Unclassified (SBU) collaboration. The CCVE will enhance information sharing and situational awareness during mission critical operations. The CCVE provides a vital tool to ensure security information relating to protective operations is rapidly communicated, acknowledged, and updated to ensure key situational awareness information is shared with operational personnel. Threats to protectees and protective sites can be communicated with much more detail and granularity to include video, pictures, audio, alarms and sensor readings, increasing the overall awareness to aid in the comprehensive analysis of the actual risk.

The Secret Service currently establishes a Command Post at temporary Presidential venues to pass and receive information using telephone and radio communications. The Command Post is the “command and control” communications link between the protective details and operational personnel on-site. While the White House Communications Agency (WHCA) provides secure communications for the Presidential and Vice Presidential protective details, their focused support does not provide for all the diverse mission requirements of the Secret Service to include: former Presidents, visiting heads of state, Presidential candidate nominees, other U.S. Government officials authorized to receive protection, investigative surveillances, sensitive criminal investigations, protective intelligence investigations, NSSE’s, and special protective operations that require real-time command and control capability.

### **Impact on Performance (Relationship of Increase to Strategic Goals)**

Funding these activities will allow the Secret Service to bring the agency up-to-date with evolutionary technological advances in tactical communications that meet Federal standards and provide interoperability and collaboration capabilities with our operational partners that have already modernized.

This request will allow the Secret Service to share real-time secure information with operational personnel in order to enhance operational effectiveness. It is imperative that the Secret Service utilize the most secure and reliable command and control framework possible to support its critical protective mission. This ICCS funding request represents a critical effort to enhance our command and control capabilities while achieving operational and fiscal efficiencies through the replacement of obsolete communications technologies and the implementation of robust technologies.

By funding ICCS, the Secret Service will be able to continue to modernize its tactical communication system. The Secret Service has a mobile communications infrastructure that urgently needs upgrading in order to support current protective mission requirements. Specifically, this would address the integration of disparate voice, radio, data, wireless, video and classified systems into a common operating platform.

The IP technologies within the ICCS program will reduce costs associated with commercial communications services. The transition from analog circuits to RoIP enabled technologies is projected to reduce Secret Service's dependence on temporary rental of commercial telephone circuits, and associated costs, by at least 50%. The WMT capability will enhance communications security while reducing the cost of labor and cabling services needed to support National Special Security Events (NSSEs), such as the UNGA, by 15%.

This program directly supports the 2010 DHS QHSR Mission 1: Preventing Terrorism and Enhancing Security, Goal 1.3.4, Protecting government leaders, facilities, and special events. The funding specifically permits the Secret Service to provide or acquire necessary technology for its protective mission.

Further, funding this activity supports the Secret Service strategic performance measures of:

- *Percent of total U.S. Secret Service protection activities that are incident – free for protection of national leaders, foreign dignitaries, designated protectees and others during travel or at protected facilities.*
- *Percent of National Security Events that were successfully completed.*

By funding this program, the Secret Service will have the resources necessary to accomplish the aforementioned performance goals..

**Department of Homeland Security**  
**U.S. Secret Service**  
**Operating Expenses**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 1:** Reduce forensic support for missing and exploited children  
PPA: Forensic support and grants to NCMEC  
Program Decrease: Positions (8), FTE (8), Dollars \$(7,518)

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							8	8	7,518
Program Decrease							(8)	(8)	(7,518)
<b>Total Request</b>	<b>20</b>	<b>20</b>	<b>8,103</b>	<b>20</b>	<b>20</b>	<b>8,366</b>	<b>-</b>	<b>-</b>	<b>-</b>

**Description of Item**

A direct funding request, to include grant funds, specific to the Secret Services' activities in relation to the forensic support for missing and exploited children PPA is being reduced in order to direct resources to programs in immediate support of the Secret Service missions while maintaining forensic services support to investigations involving missing and exploited children.

**Justification**

In an effort to meet overall budgetary constraints and to direct limited resources to principle priorities of the Secret Service, funding for this PPA has been eliminated.

The Secret Service will continue to provide forensic services support including polygraph examinations, latent finger print examinations, handwriting analysis comparisons, and video enhancements, based upon resource availability to Federal, State and local law enforcement agencies conducting investigations involving missing and exploited children. However, in an effort to meet overall budgetary constraints and to direct limited resources to core priorities of the Secret Service, the Budget does not continue Secret Service funding for the \$6 million grant to the National Center for Missing and Exploited Children. Instead, NCMEC grant funding will be consolidated and continued within the Department of Justice's Office of Justice Programs (OJP). The remaining \$1.5 million reduction will be realized by achieving efficiencies within the overall Forensic Services Division (FSD) budget.

**Impact on Performance (Relationship of Decrease to Strategic Goals)**

The Secret Service will continue to provide forensic and investigative support to priority Federal, State, and local investigations involving missing and exploited children. NCMEC grant funding will be continued in DOJ/OJP but is not proposed in the DHS submission.

**Rowley training center Mission Statement**

Rowley Training Center - Strengthen the agency's ability to develop and retain a highly specialized and dedicated workforce to fulfill mission-critical requirements. Rowley Training Center resources support the DHS strategic goal to protect critical infrastructure by ensuring the USSS workforce is continuously prepared to meet the challenges of the investigative and protective missions. The requested amount will ensure that the Service's most important resource - its employees - have the knowledge and skills and abilities to execute the investigative and protective missions. In a strategic context of threat, the Service must ensure that its workforce planning and development practices outpace the threat environment.

**Headquarters, management and administration Mission Statement**

Headquarters, Management and Administration - Support and sustain operational success through progressive planning and performance in the areas of science and technology, organizational effectiveness, professional responsibility, stewardship of resources, and communication. Headquarters, management and administration resources support the DHS strategic goal to protect critical infrastructure by enhancing the Service's administrative, professional, and technical infrastructure as well as the management systems and processes. In a strategic context of heightened threat, the Service must ensure that its business processes promote and strengthen the investigative and protective missions.

**Electronic crimes special agent program and electronic crimes task forces Mission Statement**

Electronic Crimes Special Agent Program (ECSAP) - Develop and deploy personnel trained specifically to detect network intrusions and conduct examinations on all types of electronic evidence, including computers, personal data assistants, telecommunications devices, electronic organizers, scanners, and other electronic equipment, to investigate complex electronic crimes and develop strong cases for prosecution. Electronic Crimes Task Forces (ECTFs) - Form and expand partnerships to reinforce strategic alliances among law enforcement, academia and private industry to prevent, detect, investigate and mitigate the effects of electronic crimes on our nation's financial infrastructure. ECSAP and ECTF resources directly support the DHS strategic goal to protect critical infrastructure, which includes reducing losses resulting from electronic crimes perpetrated against our nation's financial infrastructure. The ECSAP and ECTFs combat those who seek to defraud U.S. financial institutions, private industry or individuals through electronic or digital means. The requested amount funds the ECSAP and ECTF entities in a strategic context that includes advances in photographic and printing device technologies and the worldwide spread of the internet and other consumer-friendly technologies. These developments both facilitate electronic commerce and increase the scope and complexity of financial crimes. As criminal exploitation of available technologies and practices increases, the ECSAP and ECTF ensure the Service remains on the cutting edge of electronic crime investigations, and that it maintains liaisons with critical partners and stakeholders.

**International field office administration and operations Mission Statement**

International Field Office Administration and Operations - Provide a comprehensive, internationally-coordinated response to threats to the integrity of U.S. currency and other transnational financial crimes. International field office administration and operations resources directly support the DHS strategic goal to protect critical infrastructure, which includes protecting our nation's currency and financial systems from threats originating abroad. The requested amount funds field offices in a strategic context that includes advances in photographic and printing device technologies and the worldwide spread of the internet, other consumer-friendly technologies and dollarization (when a developing country replaces its national currency with the U.S. dollar). These developments both facilitate electronic commerce and increase the scope and complexity of financial crimes. As criminal exploitation of available technologies and practices increases, field resources must continue to demonstrate agility in combating criminal efforts.

**Summary Justification and Explanation of Changes**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change

**Domestic field operations Mission Statement**

Domestic Field Operations - Investigate violations of laws relating to counterfeiting of obligations and securities of the United States; investigate financial crimes that include, but are not limited to, financial institution fraud, identity theft, access device fraud, and money laundering. Domestic field office resources directly support the DHS strategic goal to protect critical infrastructure, which includes protecting our nation's currency and financial systems within our borders. The requested amount funds field offices nationwide in a strategic context that includes advances in photographic and printing device technologies and the spread of the internet and other consumer-friendly technologies. These developments both facilitate electronic commerce and increase the scope and complexity of financial crimes. As criminal exploitation of available technologies increases, field resources must continue to demonstrate agility in combating criminal efforts.

**Summary Justification and Explanation of Changes**

	FY 2011 Actual	FY 2012 Enacted	FY 2013 Requested	FY 2012 to FY 2013

	Obligations	Budget Authority	Budget Authority	Change
11.1 Total FTE & personnel compensation	117,338	93,973	102,142	8,169
11.3 Other than full-time permanent	752	261	394	133
11.5 Other personnel compensation	32,343	27,318	29,392	2,074
12.1 Benefits	69,001	48,281	52,329	4,048
<b>Total, Salaries &amp; Benefits</b>	<b>219,434</b>	<b>169,833</b>	<b>184,257</b>	<b>14,424</b>

Salaries and benefits include funding to cover costs for domestic field operations (1,526 FTE).

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>22.0 Transportation of things</b>	<b>\$401</b>	<b>0</b>	<b>\$2</b>	<b>\$2</b>

Transportation of things includes all costs of the care of such things while in the process of being transported, and other services incident to the transportation of things.

**Protective intelligence activities Mission Statement**

Protective Intelligence Activities - Ensure protective intelligence processes, policies and systems provide quality information and services to securely and efficiently support the protective mission by investigating subjects (individuals or groups) and activities that pose threats to protectees and protected events. Protective intelligence activities resources directly support the DHS strategic goal to protect critical infrastructure, which includes proactively leveraging advances in the behavioral and technological sciences in order to minimize the risk of harm to persons, property and events under Secret Service protection. The requested amount funds these activities in a strategic environment characterized by terrorists' sustained motivation to attack these targets, and by the increasing complexity and technological sophistication of the threat environment.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change

**Presidential candidate nominee protection Mission Statement**

Presidential Candidate Nominee Protection - Ensure the safety and security of Presidential and Vice Presidential candidates, nominees and spouses. Protection resources directly support the DHS strategic goal to protect critical infrastructure, which includes candidates seeking our nation's highest offices. The Service ensures protectees' physical protection at all times. Protection includes all activities related to identifying threats, mitigating vulnerabilities and creating secure environments wherever protectees work, reside and travel. The requested amount addresses strategic challenges which include terrorists' sustained motivation to attack U.S. interests (including its leaders), and the increasing technological sophistication of the threat environment.

**Summary Justification and Explanation of Changes**

**National Special Security Event Fund Mission Statement**

National Special Security Events - Effectively lead and manage the planning, coordination and implementation of operational security plans at designated NSSEs. Ensure the physical protection of the President, the public, and other Secret Service protectees who participate in NSSEs. NSSE resources directly support the DHS strategic goal to protect critical infrastructure, which includes events of symbolic importance to American citizens. Protection includes all activities related to identifying threats, mitigating vulnerabilities and creating secure environments wherever these specially designated events take place. The requested amount ensures NSSE security measures continue to evolve at an appropriate pace to meet the challenges of an increasingly complex threat environment.

**Protection of persons and facilities Mission Statement**

Protection of Persons and Facilities - Ensure the safety and security of national leaders, visiting heads of state and government and other designated protectees. Safeguard the White House Complex, the Vice President's residence, foreign missions in the Washington, DC area and other high profile sites. Protection resources directly support the DHS strategic goal to protect critical infrastructure, which includes our nation's leaders, other high profile persons and designated sites. The Service ensures protectees' physical protection at all times. Protection includes all activities related to identifying threats, mitigating vulnerabilities and creating secure environments wherever protectees work, reside and travel. The requested amount addresses strategic challenges which include terrorists' sustained motivation to attack U.S. interests (including its leaders), and the increasing complexity and technological sophistication of the threat environment.

**Summary Justification and Explanation of Changes**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	355,790	393,372	411,049	17,677
11.3 Other than full-time permanent	1,822	2,145	2,153	8
11.5 Other personnel compensation	97,942	107,867	89,213	(18,654)
12.1 Benefits	175,027	171,180	172,617	1,437
<b>Total, Salaries &amp; Benefits</b>	<b>630,581</b>	<b>674,564</b>	<b>675,032</b>	<b>468</b>

Salaries and benefits include funding to cover costs to provide protection of persons and facilities (3,722 FTE).

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>21.0 Travel</b>	<b>\$63,317</b>	<b>\$61,755</b>	<b>\$47,949</b>	<b>-\$13,806</b>

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with federal travel regulations.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>22.0 Transportation of things</b>	<b>\$1,352</b>	<b>\$1,680</b>	<b>\$1,696</b>	<b>\$16</b>

Transportation of things includes all costs of the care of such things while in the process of being transported, and other services incident to the transportation of things.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>23.1 GSA rent</b>	<b>\$23,089</b>	<b>\$31,151</b>	<b>\$31,154</b>	<b>\$3</b>

GSA rent includes all payments to the General Services Administration (GSA) for rental of space and rent-related services.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>23.2 Other rent</b>	<b>\$61</b>	<b>\$25</b>	<b>\$178</b>	<b>\$153</b>

Other rent includes all payments to a non-Federal source for rental of space, land, and structures.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>23.3 Communications, utilities, and misc. charges</b>	<b>\$15,372</b>	<b>\$14,211</b>	<b>\$14,305</b>	<b>\$94</b>

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>24.0 Printing</b>	<b>0</b>	<b>\$126</b>	<b>\$99</b>	<b>-\$27</b>

Printing includes all costs for printing and reproduction obtained from the private sector or from other federal entities.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.2 Other services</b>	\$29,021	\$22,748	\$37,928	\$15,180

Other services include contractual services from federal and non-federal sources.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>26.0 Supplies and materials</b>	\$13,267	\$6,343	\$6,083	-\$260

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>31.0 Equipment</b>	\$29,894	\$15,791	\$19,153	\$3,362

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **United States Secret Service Acquisition, Construction, and Improvements**

### **I. Appropriation Overview**

#### **A. Mission Statement for Acquisition, Construction, and Improvements:**

The Acquisition, Construction, and Improvements (ACI) account ensures funding related to the support and deferred maintenance of the James J. Rowley Training Center (JJRTC) and for Information Integration and Technology Transformation project execution.

The JJRTC is the primary training center for the United States Secret Service. The overall support and maintenance provided through ACI funding is critical to the agency's missions – protection and criminal investigations. ACI funding provides critical support for JJRTC infrastructure, life cycle maintenance of structures and systems; as well as sustainment of existing facilities and program support assets. The JJRTC is utilized by special agents, uniformed officers, and support personnel.

Information Integration and Technology Transformation, formerly known as Information Integration and Transformation (IIT), includes IT modernization and related investments. Many of these projects will proceed through a requirements/cost/alternatives assessment phase, design phase, initial implementation (beta-testing) phase and, finally, full deployment.

#### **B. Budget Activities:**

##### James J. Rowley Training Center (JJRTC)

The protection and criminal investigation training required to meet the needs of the Service's dual mission is provided at the James J. Rowley Training Center.

##### Information Integration and Technology Transformation (IITT)

The Secret Service relies heavily on Information Technology (IT) infrastructure and communications systems to achieve its protective and investigative missions. Secret Service generated a classified Mission Needs Statement (MNS) for Information Integration and Technology Transformation (IITT) that identified existing deficiencies and disparities in the Secret Service IT infrastructure, database architecture, cyber security, communications, cross domain application multi-level security, access control, investigative technologies, information assurance, and resource management capabilities.

#### **C. Budget Request Summary:**

The United States Secret Service requests \$56,750,000 (0 FTE) for FY 2013. This level of funding is required for and includes the following:

- Adjustments to the base include non-recurring one-time funding of \$950,000 provided in FY2012 for deferred maintenance at the James J. Rowley Training Center and a transfer in of \$42,824,000 for Information Integration and Technology Transformation (IITT) from the Headquarters, management and administration PPA (Salaries and Expenses) for non-personnel costs associated with the project.
- A program increase of \$9,496,000 for Information Integration and Technology Transformation (IITT) required to redesign and deploy a new USSS database infrastructure, upgrade USSS IT and communication systems, and improve Secret Service cyber security.

<b>2013 Total Request</b>	-	-	<b>52,320</b>
Total Change 2012 to 2013	-	-	52,320

The United States Secret Service requests \$52.320 million and 0 FTE for this activity.

- Transfer of \$42.824 million from Headquarters, management and administration PPA (Salaries and Expenses)
- Program increase of \$9.496 million for Information Integration and Technology Transformation

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Secret Service relies heavily on Information Technology (IT) infrastructure and communications systems to achieve its protective and investigative missions. Secret Service generated a classified Mission Needs Statement (MNS) for Information Integration and Technology Transformation (IITT) that identified existing deficiencies and disparities in the Secret Service IT infrastructure, database architecture, cyber security, communications, cross domain application multi-level security, access control, investigative technologies, information assurance, and resource management capabilities. Requested funding will enable the Secret Service’s IT networks, data systems, applications, and system security to fully support the evolving technological advancements linked to present operational requirements. The dated infrastructure lacks the ability to support newer technologies (e.g., internet protocol, IPv6), share common DHS enterprise services, or migrate to approved data centers. This modernization will be implemented by means of an extensive re-architecting of the current

infrastructure and the careful selection and integration of interoperable capabilities to support critical mission needs. The IITT program consists of enabling, communications, and control capabilities, as well as cross-cutting mission support capabilities.

Funding for this program in FY2013 will allow the Secret Service to commence Phase II (Design and Development) of the new operating environment, which involves a significant re-architecting of the existing dated infrastructure. It will also reduce the use of premium contract services to compensate for maintaining older computing infrastructure systems and legacy applications in on order to meet mission requirements.

Funding for this activity supports the Secret Service strategic performance measures of:

- *Percent of total U.S. Secret Service protection activities that are incident – free for protection of national leaders, foreign dignitaries, designated protectees and others during travel or at protected facilities.*
- *Percent of National Security Events that were successfully completed.*

Funding for this program will enable the Secret Service to accomplish the aforementioned performance goals.

## IV. Program Justification Changes

**Department of Homeland Security

Current Services Level							-	-	42,824
Program Increase							-	-	9,496
<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>52,320</b>

### **Description of Item**

The Secret Service relies heavily on Information Technology (IT) infrastructure and communications systems to achieve its protective and investigative missions. Secret Service generated a classified Mission Needs Statement (MNS) for Information Integration and Technology Transformation (IITT) that identified existing deficiencies and disparities in the Secret Service IT infrastructure, database architecture, cyber security, communications, cross domain application multi-level security, access control, investigative technologies, information assurance, and resource management capabilities. Requested funding will enable the Secret Service's IT networks, data systems, applications, and system security to fully support the evolving technological advancements linked to present operational requirements. The dated infrastructure lacks the ability to support newer technologies, share common DHS enterprise services, or migrate to approved data centers. This modernization will be implemented by means of an extensive re-architecting of the current infrastructure and the careful selection and integration of interoperable capabilities to support critical mission needs.

### **Justification**

The requested FY 2013 funding will allow the Secret Service to reach Initial Operating Capability (IOC) for IT Modernization, Cyber Security, and deployment of critical mission applications by the end of the fiscal year. The funding will enable the Secret Service to operate in a modern computer environment with enhanced cyber security protections and modern software and technologies.

Specifically, funding is necessary for the acquisition of additional Storage Area Network (SAN) discs and servers. The Secret Service has 30 legacy applications that are written in the dated computer language “COBOL” that must be re-factored into a modern computer language “.net” to support data sharing. The SAN equipment is critical to testing the reliability and integrity of data translation during re-factoring activities. This hardware allows mission support applications in development to reach production status.

The modern network will reduce IT sustainment costs associated with supporting dated mainframe technologies and legacy software applications. Sustainment of the existing Secret Service network environment is approximately \$3 million per year, which will be eliminated at Full Operating Capacity (FOC).

### **Impact on Performance**

Funding for this program will allow the Secret Service to commence Phase II (Design and Development) of the new operating environment, which involves a significant re-architecting of the existing dated infrastructure. It will also reduce the use of premium contract services to compensate for maintaining older computing infrastructure systems and legacy applications in on order to meet mission requirements.

Funding for this activity supports the Secret Service missions to protect National leaders, foreign dignitaries, designated protectees and others during travel or at protected facilities as well as National Security Events. By funding this program, the Secret Service will have the resources necessary to accomplish the aforementioned performance goals.

Fully funding this initiative would avoid delays in adding new SAN discs and servers. Mission support applications currently in planning will reach production status with this critical hardware. Specifically, these hardware replacements support existing business line applications, including the Enterprise Financial Systems. In addition, this funding provides NSSE infrastructure support necessary to meet mission requirements for credentialing, infrastructure delivery, and IT support activities.

## **V. Exhibits and Other Supporting Material**

### **A. Justification of Proposed Legislative Language**

**Department of Homeland Security  
United States Secret Service  
Justification of Proposed Changes in  
Acquisition, Construction, and Improvements  
Appropriation Language**

For necessary expenses for acquisition, construction, [repair, alteration,] and improvement of [facilities]physical and technological infrastructure, [\$5,380,000]\$56,750,000, of which \$4,430,000, to remain available until September 30, [2016]2017, shall be for acquisition, construction, improvement, and maintenance of facilities, and of which \$52,320,000, to remain available until September 30, 2015, shall be for information integration and technology transformation project execution. (Department of Homeland Security Appropriations Act, 2012.)

### James J. Rowley Training Center Mission Statement

The protection and criminal investigation training required to meet the needs of the Service's dual mission is provided at the James J. Rowley Training Center.

### Summary Justification and Explanation of Changes

	FY 2011 Actuals	FY 2012 Enacted	FY 2013 Request	FY 2012 to FY 2013 Change
25.2 Other services	\$6,432	\$3,983	\$3,383	-\$600

Other services include contractual services with non-Federal sources.

	FY 2011 Actuals	FY 2012 Enacted	FY 2013 Request	FY 2012 to FY 2013 Change
32.0 Land & structures	\$491	\$1,324	\$974	-\$350

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease.

**Information Integration & Technology Transformation Mission Statement**

The Secret Service relies heavily on Information Technology (IT) infrastructure and communications systems to achieve its protective and investigative missions. Secret Service generated a classified Mission Needs Statement (MNS) for Information Integration and Transformation (IIT) that identified existing deficiencies and disparities in the Secret Service IT infrastructure, database architecture, cyber security, communications, cross domain application multi-level security, access control, investigative technologies, information assurance, and resource management capabilities. Requested funding will enable the Secret Service IT networks, data systems, applications, and system security to fully meet basic operational requirements.

**Summary Justification and Explanation of Changes**

	FY 2011 Actuals	FY 2012 Enacted	FY 2013 Request	FY 2012 to FY 2013 Change
<b>23.3 Communications, utilities, and misc. charges</b>	<b>0</b>	<b>0</b>	<b>\$20</b>	<b>\$20</b>

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

	FY 2011 Actuals	FY 2012 Enacted	FY 2013 Request	FY 2012 to FY 2013 Change
<b>25.2 Other services</b>	<b>0</b>	<b>0</b>	<b>\$35,963</b>	<b>\$35,963</b>

Other services include contractual services from federal and non-federal sources.

	FY 2011 Actuals	FY 2012 Enacted	FY 2013 Request	FY 2012 to FY 2013 Change
<b>31.0 Equipment</b>	<b>0</b>	<b>0</b>	<b>\$16,337</b>	<b>\$16,337</b>

	FY 2011 Actuals	FY 2012 Enacted	FY 2013 Request	FY 2012 to FY 2013 Change
--	--------------------	--------------------	--------------------	------------------------------

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

### iii. Status of Congressionally Requested Studies, Reports, and Evaluations

#### Department of Homeland Security National Protection and Programs Directorate

<b>Fiscal Year</b>	<b>Due Date(s)</b>	<b>Reference/Citation</b>	<b>Requirement</b>	<b>Status</b>
2011	5/30/2011	P.L. 112-10	Provided, That the FY11 Expenditure Plan - US-VISIT required in Public Law 111-83 shall be updated for fiscal year 2011 budget authority and submitted to the Committees on Appropriations of the Senate and House of Representatives within 45 days after the date of enactment of this division, notwithstanding the specified with holding of funds and associated approval requirements.	In Progress
2011	10/4/2010	P.L. 109-295	With regards to the Emergency Communications Preparedness Center - Strategic Assessment, for 2010, (1) prepare and submit to Congress, on an annual basis, a strategic assessment regarding the coordination efforts of Federal departments and agencies to advance—(A) the ability of emergency response providers and relevant government officials to continue to communicate in the event of natural disasters, acts of terrorism, and other man-made disasters; and (B) interoperable emergency communications; (2) consider, in preparing the strategic assessment under paragraph (2), the goals stated in the National Emergency Communications Plan under section 1802;	Transmitted to DHS OLA January 2011.
2011	1/26/2011; 4/26/2011; 7/26/2011; 10/26/2011	P.L. 111-83; S. Rpt. 111-31	Provide quarterly progress reports on the agency's efforts to coordinate chemical security across departments, particularly in regard to ensuring the ability to conduct prompt and comprehensive Federal safety investigations of chemical accidents.	In Progress
2012	1/15/2012; 4/15/2012; 7/15/2012; 10/15/2012	Senate Report 112-74	Quarterly FY12 - Coordination of Chemical Security Efforts: The Deputy Secretary is directed to continue quarterly reporting to the Committee on these matters. The reports shall include an update on: the development of a more comprehensive picture of security issues at the Nation's chemical facilities; whether regulatory gaps exist that may pose an unacceptable security risk; and the identification and elimination of redundancies between current regulatory regimes. In addition, the quarterly updates shall include information on the Department's continuing efforts to determine whether and how to require MTSA-covered facilities that possess CFATS chemicals of interest to complete and submit CFATS Top-Screens. Finally, the report shall provide updates regarding the efforts with other Federal entities, such as the Federal Bureau of Investigation and the Transportation Security Administration, including specific milestones and agreements that will be reached to further coordinate chemical security efforts.	In Progress

<b>Fiscal Year</b>	<b>Due Date(s)</b>	<b>Reference/Citation</b>	<b>Requirement</b>	<b>Status</b>
2012	3/22/2012	P.L. 112-74	FY12 Expenditure Plan National Cyber Security : The Under Secretary for the National Protection and Programs Directorate shall submit a plan for expenditure for the National Cyber Security Division and the Office of Infrastructure Protection, to the Committees on Appropriations of the Senate and House of Representatives, not later than 90 days after enactment of this Act.	In Progress
2012	2/15/2012	P.L. 112-74	Information Sharing: With respect to sector cooperation, the Under Secretary for NPPD is to provide a report regarding the results of a review to streamline the processes for coordination and information sharing with industry partners.	In Progress
2012	2/6/2012	P.L. 112-74	Strategic Human Capital Plan: Statutory language is included requiring expenditure plans for the Office of Infrastructure Protection and the National Cyber Security Division. The plans shall include a description by PPA and line item with the associated costs subdivided by quarter. The plan shall provide sufficient detail on the items and services procured and the outcomes of those services or items.  Provided, That the Under Secretary for the National Protection and Programs Directorate shall submit a plan for expenditure for the National Cyber Security Division and the Office of Infrastructure Protection, to the Committees on Appropriations of the Senate and the House of Representatives, not later than 90 days after the date of enactment of this Act.	In Progress

Fiscal Year	Due Date(s)	Reference/Citation	Requirement	Status
2012	1/15/2012; 3/30/2012; 6/15/2012	P.L. 112-74	<p>Semiannual FY12 - Coordination of Chemical Security Efforts: The Deputy Secretary is directed to continue quarterly reporting to the Committee on these matters. The reports shall include an update on: the development of a more comprehensive picture of security issues at the Nation's chemical facilities; whether regulatory gaps exist that may pose an unacceptable security risk; and the identification and elimination of redundancies between current regulatory regimes. In addition, the quarterly updates shall include information on the Department's continuing efforts to determine whether and how to require MTSA-covered facilities that possess CFATS chemicals of interest to complete and submit CFATS Top-Screens. Finally, the report shall provide updates regarding the efforts with other Federal entities, such as the Federal Bureau of Investigation and the Transportation Security Administration, including specific milestones and agreements that will be reached to further coordinate chemical security efforts.</p> <p>(Statement of Managers) The Deputy Secretary is directed to submit reports on chemical security efforts to the Committees on Appropriations as directed in the Senate report. However, the reports shall be submitted on a semi-annual basis instead of quarterly with the first report due no later than March 30, 2012.</p>	In Progress
2012	3/23/2012	P.L. 112-74 p. 172, Conf Report 112-331 p. 946, House Report 112-91 p. 153	FY12 Expenditure Plan - Office of Infrastructure Protection: The Undersecretary for NPPD shall submit a plan for expenditure for the Office of Infrastructure Protection	In Progress
2012	3/23/2012	Conf Report 112-331 p. 985, Senate Report 112-74 p. 107	RMA transfer notification & plans: RMA transfer of up to \$4,241,000 to the DHS Office of Policy. The Committees must receive the notification for such a transfer no later than 90 days after the date of enactment of this Act. Further, no later than the date upon which the notification is submitted, the Secretary shall provide to the Committees a plan identifying and justifying the specific risk modeling, analysis, and strategic planning functions of value and use to the Department and its individual components. ## **BUDGET REQUEST AND SUPPORTING INFORMATION**

### **National Protection & Programs Directorate Management and Administration**

## **I. Appropriation Overview**

### **A. Mission Statement for Salaries and Expenses:**

The Department of Homeland Security (DHS) National Protection and Programs Directorate (NPPD) Management and Administration (M&A) appropriation provides Directorate leadership and management, coordination of Directorate activities with DHS Headquarters and Components, and program oversight and mission support services. NPPD M&A leads and coordinates Directorate activities to reduce the risk to the Nation's critical physical and cyber infrastructure.

### **Budget Activities:**

Major program activities include Directorate Administration.

### **Directorate Administration**

Directorate Administration provides management and oversight of NPPD programs. It consists of: Office of the Under Secretary, which includes the Office of the Chief Administrative Officer; Office of Human Resources Management; Budget, Finance, and Acquisitions; Information Management and Disclosure; Office of Compliance and Security; Office of Communications and Public Affairs; Office of Information Technology; Office of Privacy.; Pursuant to the FY 2012 Appropriations Bill the Office of the Assistant Secretary for Cybersecurity and Communications and Office of the Assistant Secretary for Infrastructure Protection have been moved from the Information Security and Infrastructure Protection appropriation to Management and Administration. This includes the full range of business support services to ensure that programs operate effectively, as well as oversight responsibility to direct program policy and strategy, prioritize and determine resource allocation across programs, and oversee effective program execution.

### **Budget Request Summary:**

NPPD requests 248 FTP/248FTE, and \$50.321 million for FY 2013.

### **Program Changes**

N/A

Total Change 2012 to 2013	44	45	3,867

The National Protection and Programs Directorate (NPPD) requests \$50.321 million and 248 positions/ 248 FTE for Directorate Administration. The request includes:

- Increase of \$0.101 million for the FY 2013 pay increase
- Increase of \$0.042 million in GSA rent inflation
- Decrease of \$0.039 million as a partial offset to pay inflation
- Decrease of \$0.500 million in management efficiencies
- Decrease of \$0.394 million due to contract efficiency

**CURRENT SERVICES PROGRAM DESCRIPTION**

***Office of the Under Secretary (OUS)***

The Office of the Under Secretary provides Directorate leadership and management and coordinates activities throughout the Directorate. OUS continuously reviews program activities and performance, and works to ensure that they are executed effectively and efficiently. OUS also provides a range of mission support services.

In FY 2013, NPPD will continue its transition to an operational Component. As part of this process, NPPD will centralize lines of business and streamline management functions, thus improving business support to programs and improving oversight.

This transition is critical to NPPD’s mission success. While cyber and infrastructure requirements are increasing, OUS’ funding has remained stagnant. Personnel-related costs comprise the vast majority of the FY 2013 Budget, as shown below.

<b>Directorate Administration</b>	<b>FY 2013</b>
Salaries and Benefits	\$ 35,967
Working Capital Fund	\$ 7,072
Contractual Support to Programs	\$ 7,282
<b>Total Funding (\$000)</b>	<b>\$ 50,321</b>

OUS consists of several offices and functions:

***Cyber + Strategy (C+S)***

C+S leads NPPD’s policy and strategic planning efforts by providing critical analytical support and strategic direction to NPPD programs and advises Leadership on cybersecurity matters. C+S efforts consist of the following activities and elements:

- *Cybersecurity Strategy Team* - Develops the overarching cybersecurity strategy for the Directorate. The team will hold a series of engagements with the Critical Infrastructure Partnership Advisory Council partners to include the Cross-Sector Cybersecurity Working Group, Government Coordinating Council, Sector Coordinating Council, and Partnership for Critical Infrastructure Security.
- *NPPD Strategy and Planning* – Develops the NPPD strategic plan, which includes performance objectives, measures, and milestones to drive program strategy to maximize risk reduction in priority mission areas across the Directorate. The Strategy and Planning Team plays an integral part of the overarching strategic planning for NPPD and Cyber + Strategy as the central coordinator for many current priorities including NPPD workforce planning, core staffing analysis, and planning of the operationalization transition.
- *The National Cybersecurity Awareness Campaign* - The National Cybersecurity Awareness Campaign is an Administration initiative led by DHS. The Stop.Think.Connect.™ Campaign is an ongoing cybersecurity awareness campaign to help Americans understand the risks that come with being online. The Campaign is part of an unprecedented effort among Federal and State governments, industry, and nonprofit organizations. Through these partnerships, Stop.Think.Connect.™ is reaching thousands of Americans, providing tips on how to protect themselves, their families, and the Nation.
- *Integrated Analysis Task Force (IATF)* – The NPPD IATF is a collaborative planning effort designed to (1) draw on expertise from all five NPPD subcomponents to improve NPPD-wide analytic and modeling capabilities. The task force will help NPPD subcomponents to better empower their private and public sector partners to make informed risk management investments and to help them “build” resilience into their critical infrastructure systems over time. Successful integration and standup of the IATF enhances NPPD’s analytic capabilities

and leadership not only within DHS but also across the Federal Government and with its State, local, tribal, and private sector partners.

### ***Office of Budget, Finance, and Acquisitions (BFA)***

BFA supports the NPPD mission by conducting financial management and oversight, by developing and enforcing fiscal services. BFA consists of the following activities and elements:

- *Requirements and Capabilities Planning* – Reviews program capabilities and requirements against NPPD leadership objectives to ensure the Directorate is pursuing the most critical capabilities to achieve its mission, and developing those capabilities in the most effective and efficient manner. This function drives resource allocation in a strategic manner across the Directorate.
- *Budget Formulation* - Assists programs in the development of resource requests, develops program funding levels based on NPPD Leadership direction (the output of Requirements and Capabilities Planning) and cost analysis, and builds and justifies funding requests to resource mission needs.
- *Budget Execution* – Responsible for the workflow and funds control process to ensure that resources are available when needed, do not exceed authorized levels, and are used in accordance with law and congressional intent.
- *Performance Management* – Constitutes the Component Performance Improvement Officer function, and includes managing internal and external performance management requirements, and the collection, analysis, monitoring, and reporting of performance data.
- *Financial Operations* - Responsible for the overall accounting operations of NPPD and ensuring that the Directorate meets financial execution and accounting requirements in support of DHS's centralized financial management program. Functions include commitment/obligations input and tracking, travel and purchase card processing, status of funds monitoring, and payroll reconciliation.
- *Financial Systems Reporting* - Responsible for the preparation and submission of financial reports to DHS and to the Immigration and Customs Enforcement (ICE) Chief Financial Officer (CFO). Works closely with the ICE CFO to monitor and reconcile Treasury Information Executive Repository reports and to provide analysis to validate accuracy of data. Responsible for the development and monitoring of NPPD internal control programs.
- *Internal Controls* - Responsible for developing and implementing NPPD's internal controls program. Working in conjunction with the DHS financial management staff, the internal controls office manages the annual audit of financial statements, coordinates testing and corrective actions to improve improper payments, and coordinates the review of internal controls as required by OMB Circular A-123.
- *Acquisition Management and Oversight* - Reviews and monitors NPPD's acquisition programs, ensures compliance with Federal and DHS acquisition regulations, and ensures effective and efficient acquisition of material solutions. The Director of BFA serves as the Component Acquisition Executive.
- *Procurement Operations* - Reviews and tracks NPPD contracts and other purchases and establishes and manages procurement procedures across NPPD. This office also represents NPPD procurement activities and interests to the DHS Office of the Chief Procurement Officer.
- *Regulatory and Economic Analysis* - Ensures NPPD guidance and regulatory actions consider alternatives and impacts. Ensures regulatory analyses are completed following the

requirements of statute, executive order, and the Office of Management and Budget (OMB) policy. Provides leadership with economic impact analysis related to NPPD programs and activities.

### ***Office of the Chief Administrative Officer (OCAO)***

OCAO provides operational services for facilities maintenance and leasing, personal property management, fleet management, environmental planning and execution, logistics management, and management for various NPPD wide administrative functions. OCAO consists of the following activities and elements:

- *Facilities* - Responsible for facilities; property, environmental, and logistics support; facility space planning; rent; procurement; and oversight of facilities support services.
- *Assets and Property* - Records Directorate property, manages the fleet of GSA-owned vehicles, and documents property records and disposal.
- *Administrative Support* – Provides services ranging from mail management to transit benefit management to flu shot distribution for the Directorate.

### ***Office of Human Resources Management (OHRM)***

OHRM is responsible for leading the office that classifies positions, recruits, determines pay and compensation, and hires and on-boards new personnel. In addition, the office provides guidance to and processes actions for all NPPD managers and employees in the areas of performance management, awards, payroll, and benefits, as well as in employee and labor relations. OHRM also includes:

- *Professional Development and Training* – Assesses, designs, develops, implements, and evaluates training designed to address needed workforce skills, competencies, and certifications, so that NPPD employees are provided with training and professional development/educational programs that enhance and support their positions.
- *Employee and Labor Relations* - Leads, assists, and represents management in its efforts to address employee conduct, performance, and labor-management relations matters in a manner that promotes the development and retention of a high-performing workforce.

### ***Office of the Chief Information Officer (OCIO)***

OCIO drives NPPD information technology (IT) strategic planning by ensuring that systems and processes are integrated and consistent with the DHS Chief Information Office requirements and overarching Departmental goals and objectives. In addition, OCIO evaluates new technology and advises NPPD leadership as to how IT solutions might offer opportunities and options to support the successful implementation of policy decisions and organizational goals and objectives. OCIO approves, oversees, and monitors IT investment requests for NPPD subcomponent programs. OCIO provides governance and oversight over DHS enterprise architecture processes and objectives, and IT security policies. Finally, OCIO and staff serve as the NPPD representatives on various Departmental planning, oversight, leadership, and council committees sponsored by the DHS Chief Information Office.

### ***Office of Compliance and Security (OCS)***

OCS provides a safe and secure work environment and promotes organizational excellence, integrity, and accountability to stakeholders.

- *Compliance Investigations* - Investigates and coordinates with component management on administrative inquiries of allegations of employee misconduct allegations designated to NPPD for action by the DHS Office of Inspector General (OIG). Manages NPPD case intake for alleged misconduct and coordinates action with DHS OIG. Engages closely with OIG, NPPD Employee and Labor Relations (E&LR), Office of General Counsel (OGC), and component management, as required.
- *Security Programs* - Responsible for Physical Security (in coordination with the Federal Protective Service (FPS)), Information Security, Education and Awareness, Special Security Programs, i.e., Sensitive Compartmented Information Facility (SCIF), Single Sign-On (SSOs), and Electronic Countermeasures.
- *Personnel Security* - Provides personnel security support to NPPD and the large number of contractors supported by FPS. Functions include National Security Information security clearances (to include SCI), suitability determinations, Homeland Security Presidential Directive (HSPD)-12 checks and credentialing, adjudications, appeals, and due process.
- *Program Review and Evaluation* - Plans, coordinates, and provides headquarters-level oversight of program evaluations to measure operations against best practices and objective criteria to determine if the programs and operations are effective and efficient, achieve the desired results, and/or operate in accordance with laws and regulations. Also manages the NPPD Self-Inspection Program.
- *Counterintelligence and Internal Security*: Detect, deter and neutralize external and insider threats to NPPD programs and activities through assessments and education of NPPD employees, contractors and foreign nationals.

### ***Office of Communications and Public Affairs***

The Office of Communications and Public Affairs is the nexus for all NPPD communications, outreach, and awareness. The Office of Communications and Public Affairs is comprised of three branches: Internal Communications, External Communications, and Strategic Communications.

The Office of Communications and Public Affairs plays a lead role in developing and approving all correspondence and messaging intended for external or internal outreach or distribution. The Office of Communications and Public Affairs develops communications strategies and action plans to promote Directorate programs and activities, including the development and posting of content for all NPPD pages on the intranet site (DHSOnline.gov) and on the Department's external website (DHS.gov).

### ***Office of Information Management and Disclosure***

The Office of Information Management and Disclosure is responsible for managing and improving external communications for NPPD. Information Management and Disclosure is comprised of the Executive Secretariat, Freedom of Information Act (FOIA), Records Management, and Audit Liaison functions.

- *Executive Secretariat* - Serves as the central processing point for formal documents and taskers sent to/from NPPD.
- *FOIA* - Works in concert with the Departmental FOIA/Privacy Office, which serves as the steward of Section 222, the responsibilities of the Chief Privacy Officer, of the Homeland Security Act, the Privacy Act of 1974, the FOIA, the E-Government Act of 2002, and the numerous laws, Executive Orders, court decisions, and Departmental policies that protect the collection, use, and disclosure of Departmental and personal information.
- *Records Management* - Provides leadership and direction for the NPPD records management program. Develops an overall records management strategy producing the policy, procedures, and guidance necessary to implement that program, develops policies and guidance on the application of technology to records management, and coordinates the program within and outside of NPPD overall.
- *Audit Liaison* - Serves as a liaison among external Departmental offices, the Government Accountability Office (GAO), OIG, and NPPD offices for all audit activities undertaken by either GAO or OIG. Activities include work with NPPD components and GAO or OIG to facilitate entrance/exit conferences, fieldwork, release of draft and final reports, and recommendation follow-up.

### ***Office of Privacy***

The Office of Privacy is responsible for developing internal policies to protect personal privacy, promoting awareness of and compliance with privacy requirements, and ensuring that NPPD technology systems have appropriate privacy protections in place.

### ***Office of the Assistant Secretary for CS&C***

The Office of the Assistant Secretary for CS&C manages cyber and communications policy initiatives and mission activities collaborations occurring across the United States Government. This staffing serves as a critical link to external stakeholders, OMB, and Congress. The requested salaries and support allow centralized resource allocation and outreach efforts with intergovernmental, international, private sector, and other stakeholders, in addition to providing staffing and oversight of the following functional areas: Strategic Planning and Policy, Mission Integration, External Affairs, Human Capital, Budget and Finance, Acquisitions and Procurement, Continuity of Government, and Facility Planning. With OUS and Assistant Secretary funds appropriated together in the M&A account beginning in FY2012, NPPD will be coordinating – and combining where possible – these functions to more efficiently manage and oversee NPPD programs.

### *Office of the Assistant Secretary for Infrastructure Protection*

The Office of the Assistant Secretary for Infrastructure Protection represents a centralized locus for Infrastructure Protection (IP) mission support, including IP document and information management, human resources, budgeting, acquisition/procurement, security, facilities, planning, performance management, resource execution, policy, and legislative affairs. OASIP provides oversight while coordinating with external organizations—both national and international—to address the implications of the critical infrastructure global risk environment, in order to develop and implement specific strategic guidance and policies for U.S. and international critical infrastructure protection and resilience.

OASIP establishes and oversees management controls and a comprehensive governance structure to improve the planning, execution, and reporting activities performed within IP to manage major initiatives, drive mission accomplishments, and allocate resources that are consistent with approved organizational goals. OASIP has established feedback loops—such as the Critical Infrastructure Risk Management Enhancement Initiative—that adjust IP efforts and resources to where they are needed most.

With OUS and Assistant Secretary funds appropriated together in the M&A appropriation beginning in FY2012, NPPD will be coordinating – and combining where possible – these functions to more efficiently manage and oversee NPPD programs.

### Risk Management & Analysis Mission Statement

Risk Management and Analysis (RMA) matures and strengthens the Homeland Security Enterprise by leading the Department's efforts to establish a common framework addressing the overall management and analysis of homeland security risk. RMA also leads and executes the Risk Assessment Process for Informed Decisionmaking, a strategic, all-hazard risk assessment. In addition, RMA provides tools, training, technical assistance, and accountability frameworks to enhance the risk management capabilities throughout the Department and its stakeholders.

**Directorate Administration Mission Statement**

The National Protection and Programs Directorate (NPPD) Directorate Administration includes the Office of the Under Secretary, which consists of: Office of the Chief Acquisitions Officer; Human Capital; Budget, Finance, and Acquisitions; Information Management and Disclosure; Office of Compliance and Security Communications; Office of Public Affairs; Office of Information Technology; the Office of Privacy; the Office of the Assistant Secretary for CS&C; and the Office of the Assistant Secretary for IP.

**Summary Justification and Explanation of Changes**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	12,649	23,386	26,613	3,227
11.3 Other than full-time permanent	756	1,159	1,343	184
11.5 Other personnel compensation	390	244	271	27
12.1 Benefits	3,702	6,805	7,740	935
<b>Total, Salaries &amp; Benefits</b>	<b>17,497</b>	<b>31,594</b>	<b>35,967</b>	<b>4,373</b>

FY 2013 includes \$35,967 for salaries and benefits for 248 FTE, which represents an increase of \$4,373 from FY 2012 Enacted due to the Balanced Workforce initiative, FY 2013 Pay Inflation, and the IPIS transfer to centralize business support.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>21.0 Travel</b>	<b>\$209</b>	<b>\$202</b>	<b>\$190</b>	<b>-\$12</b>

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. FY 2013 reflects a \$12 decrease from FY 2012.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>23.1 GSA rent</b>	<b>\$1,948</b>	<b>\$1,977</b>	<b>\$2,019</b>	<b>\$42</b>

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. FY 2013 reflects a \$42 increase over the FY 2012 Enacted.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.1 Advisory and assistance services</b>	<b>\$9,683</b>	<b>\$3,850</b>	<b>\$2,206</b>	<b>-\$1,644</b>

Advisory and assistance services includes services acquired by contract from non-Federal sources as well as from other units within the Federal Government. FY 2013 represents a \$1,644 decrease due to the Balanced Workforce initiative from FY 2012.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.2 Other services</b>	<b>\$223</b>	<b>\$1,877</b>	<b>\$2,054</b>	<b>\$177</b>

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. FY 2013 represents an increase of \$177 from FY 2012.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.3 Purchases from Gov't accts.</b>	<b>\$4,300</b>	<b>\$5,992</b>	<b>\$6,923</b>	<b>\$931</b>

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. FY 2013 represents an increase of \$931 over FY 2012.

\*RMA funding will be transferred to the DHS Office of Policy in FY 2012.

## **K. DHS Balanced Workforce Strategy**

In order to establish a high performing workforce comprised of a strong internal core of Federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience, and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment, the Department will realign contractor and/or Federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with Federal employees to better realize the full potential of our total workforce – both contracted and Federal. A strong internal core of Federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for Federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2014 budget.

Management and Administration requests \$0.0 and 40 FTE for the FY 2013 DHS Balanced Workforce Strategy.

### **DHS Balanced Workforce Strategy**

- \$4,374,867 is needed to hire Federal employees in Directorate Administration.
- Contracts will be reduced by \$4,374,867 in Directorate Administration.
- Contractor functions will be reduced and positions will be converted in accordance with the Department's Balanced Workforce Initiative with a particular focus on contractors who are performing "nearly government inherent" responsibilities. Contractor reductions will be absorbed by the existing Government Employees and new FTE converted positions.

## **BUDGET REQUEST AND SUPPORTING INFORMATION**

### **National Protection & Programs Directorate Infrastructure Protection and Information Security**

## **I. Appropriation Overview**

### **A. Mission Statement for Infrastructure Protection and Information Security:**

Infrastructure Protection and Information Security (IPIS) seeks to understand and manage risk from natural disasters, terrorist attacks, or other disasters to the Nation's critical infrastructure and key resources (CIKR).

Infrastructure Protection (IP) programs accomplish the IPIS mission by assisting security partners with identifying and mitigating vulnerabilities; increasing preparedness for facilities, systems, and surrounding communities; and assessing the impact of risk mitigation efforts.

IPIS also seeks to create a safe and secure cyber environment and promote cybersecurity knowledge and innovation by: enabling Federal departments and agencies to address cybersecurity challenges; partnering with the private sector, military, and intelligence communities to mitigate vulnerabilities and threats to information technology assets; and facilitating collaboration and partnerships on cyber issues with public and private sector partners.

Finally, IPIS is responsible for maintaining effective telecommunications for Government users in national emergencies and for establishing policies and promoting solutions for interoperable communications at the Federal, State, and local levels.

### **B. Budget Activities:**

#### **Infrastructure Protection**

*Identification Analysis and Planning* – In FY 2013, NPPD requests \$56.909 million for the Identification Analysis and Planning program, including 89 full-time positions (FTP)/85 full-time equivalents (FTE). This represents a decrease of \$13.609 million from the FY 2012 Enacted level of \$70.518 million. The funding includes projects and activities that support the identification, prioritization, and protection of the Nation's CIKR, as well as the assessment of CIKR vulnerabilities, consequences, and risks. These activities provide a comprehensive inventory of the Nation's CIKR assets. The program collects vulnerability assessments and consequence information required to produce comprehensive asset and system risk assessments. These CIKR protection assessments enable the analysis of interdependencies and cascading effects. The program provides strategic coordination, capabilities analysis, and information sharing to public and private stakeholders, including local law enforcement agencies, to combat the improvised explosive device threat to the Homeland.

*Sector Management and Governance* – In FY 2013, NPPD requests \$67.132 million for the Sector Management and Governance program, including 194 FTP/167 FTE. This represents a decrease of \$7.087 million from the FY 2012 Enacted level of \$74.219 million. The funding includes projects and activities that increase the ability of all levels of government and private sector partners to assess risks, coordinate programs and processes, and execute risk mitigation programs and activities. They support public awareness efforts, facilitate the sharing of CIKR protection-related best practices and lessons learned, and enable infrastructure protection planning, readiness, and incident management. Sector Management and Governance is responsible for executing the National Infrastructure Protection Plan (NIPP) and coordinating the efforts of the 18 sectors to implement and execute their sector-specific plans.

*Regional Field Operations* – In FY 2013, NPPD requests \$56.497 million for the Regional Field Operations Programs, including 153 FTP/140 FTE. This represents a decrease of \$.870 million from the FY 2012 Enacted level of \$57.367 million. Funding for program areas includes voluntary projects and activities that enable security partners to: identify and mitigate vulnerabilities; implement protective measures and report on risk mitigation activities; and increase preparedness and resilience for facilities, systems, and surrounding communities. These activities foster information sharing and coordination between individual sector governance structures and facilitate the development of critical infrastructure partner governance and coordination structures.

*Infrastructure Security Compliance* – In FY 2013, NPPD requests \$74.544 million for the Infrastructure Security Compliance Programs, including 253 FTP/242 FTE. This represents a decrease of \$18.804 million from the FY 2012 Enacted level of \$93.348 million. Infrastructure Security Compliance is responsible for regulatory activities that coordinate and manage of the Department’s regulatory authority over high-risk chemical facilities and ammonium nitrate.

### **Cybersecurity and Communications**

*National Cyber Security Division (NCSD)* – NCSD works collaboratively with public, private, and international entities to secure cyberspace and America’s cyber assets. NCSD is comprised of the following PPAs:

*Cybersecurity Coordination* – In FY 2013, NPPD requests \$3.995 million for Cybersecurity Coordination programs, including 14 FTP/14 FTE. This represents a decrease of \$0.505 million from the FY 2012 Enacted level of \$4.500 million. The Cybersecurity Coordination program integrates information from the six Federal cybersecurity centers to provide a fused view of cyber activity across the intelligence, defense, civil, and law enforcement/counterintelligence domains. The program supports operational activities to facilitate integration and activities at the Federal centers, an information system for online collaboration, and information technology (IT) support and enterprise capability for the centers. Cybersecurity Coordination also supports an increased number of private sector partners present in the National Cybersecurity and Communications Integration Center (NCCIC) environment.

*United States Computer Emergency Readiness Team (US-CERT Operations)* – In FY 2013, NPPD requests \$93.002 million for US-CERT Operations programs, including 188 FTP/177 FTE. This represents an increase of \$13.886 million and 23 FTP/27 FTE above the FY 2012 Enacted level of \$79.116 million. As the operational arm of NCSA, US-CERT leads and coordinates efforts to improve the Nation’s cybersecurity posture, to promote cyber information sharing, and to manage cyber risks to the Nation. As part of that mission, US-CERT analyzes and mitigates cyber threats and vulnerabilities; disseminates cyber threat warning information; coordinates with partners and customers to achieve shared cyber situational awareness of the Nation’s cyber critical infrastructure; provides response and recovery support for national assets; and advises on national-level cybersecurity policy and guidance. US-CERT encompasses the activities that provide immediate customer support and incident response, including 24-hour support in the NCCIC.

*Federal Network Security* – In FY 2013, NPPD requests \$236.014 million for Federal Network Security programs, including 69 FTP/69 FTE. This represents an increase of \$201.014 million and 16 FTP/27 FTE above the FY 2012 Enacted level of \$35.000 million. Of these resources, \$202.046 million will be used for improving the cyber security posture of Federal civilian cyber networks. Federal Network Security manages activities designed to enable Departments and agencies to secure their systems and networks. It provides a single, accountable focal point for achieving cyber infrastructure security and compliance throughout the Federal enterprise.

*Network Security Deployment* – In FY 2013, NPPD requests \$345.046 million for Network Security Deployment programs, including 91 FTP/82 FTE. This represents an increase of \$116.046 million and 18 FTP/10 FTE above the FY 2012 Enacted level of \$229.000 million. Network Security Deployment manages the National Cybersecurity Protection System (NCPS), operationally known as EINSTEIN. NCPS is an integrated intrusion detection, analytics, information sharing, and intrusion prevention system that utilizes hardware, software, and other components to support DHS responsibilities within the Comprehensive National Cybersecurity Initiative (CNCI) mission.

*Global Cybersecurity Management* – In FY 2013, NPPD requests \$21.957 million for Global Cybersecurity Management programs, including 23 FTP/23 FTE. This represents a decrease of \$2.035 million below and an increase of 0 FTP/4 FTE above the FY 2012 Enacted level of \$23.992 million. Global Cyber Security Management provides and facilitates access to training and education for cybersecurity professionals. This includes developing a common approach for Federal cyber education and development and ensuring that education and training keeps pace with technological changes. Global Cybersecurity Management also supports academic centers to invigorate the pipeline of talented cybersecurity professionals available for current and future employment. Finally, the program works to manage risks from the global information and communications technology supply chain through awareness, policies, and standards and practices.

*Critical Infrastructure Cyber Protection & Awareness* – In FY 2013, NPPD requests \$62.763 million for Critical Infrastructure Cyber Protection and Awareness programs, including 39 FTP/38 FTE. This represents an increase of \$2.763 million and 2 FTP/10 FTE above the FY 2012 Enacted level of \$60.000 million. Critical Infrastructure Cyber Protection and Awareness collaborates with the public and private sectors to assess and mitigate risk to the Nation’s cyber critical infrastructure and key resources and promotes cybersecurity awareness among and within the general public and key communities, maintains relationships with governmental cybersecurity professionals to share information about cybersecurity initiatives, and develops partnerships to promote collaboration on cybersecurity issues.

*Business Operations* – In FY 2013, NPPD requests \$6.227 million for Business Operations programs, including 33 FTP/33 FTE. This represents a decrease of \$5.341 million from the FY 2012 Enacted level of \$11.568 million. Business Operations ensures that NCS has access to the appropriate resources to fulfill its mission. The program does so by resource and financial management, human capital activities, facilities management, performance management, policy development and implementation, information and personnel security, and strategic planning. The Business Operations program works to ensure these activities are integrated to sustain overall cybersecurity strategies, mission operational support, and short/long-term planning.

*Office of Emergency Communications (OEC)* – In FY 2013, NPPD requests \$38.689 million for OEC, including 65 FTP/65 FTE. This represents a decrease of \$4.806 million to the FY 2012 Enacted level of \$43.495 million. OEC drives the development of emergency communications capabilities (operability, interoperability, and continuous communications) at all levels of government and across all public safety disciplines. To do so, OEC identifies and assesses interoperable emergency communications capabilities and drives Federal grants to meet emergency responder requirements and needs. OEC also engages with State, local, and tribal stakeholders to deliver targeted technical assistance and gather stakeholder input on policies, guidance, and initiatives. Additionally, OEC drives Federal emergency communications efficiencies through strategic planning, aligning grants, developing common investment and infrastructure planning approaches, representing Federal users on national-level policy and standards issues, and coordinates between domestic and international stakeholders along the borders.

*National Communications System (NCS)* —NCS assists the Executive Branch and partners in the exercise of the telecommunications functions and responsibilities and the coordination of the planning for and provision of national security and emergency preparedness communications for the Federal Government in all circumstances. NCS is comprised of the following PPAs:

*Priority Telecommunications Service (PTS)* – In FY 2013, NPPD requests \$53.286 million for PTS program, including 50 FTP/50 FTE. This represents a decrease of \$2.788 million from the FY 2012 Enacted of \$56.074 million. The PTS PPA leverages the Nation’s public telephone networks, including cellular systems, to enable voice communications for response and recovery coordination efforts and ensuring that

essential government functions and operations are maintained during a disaster. PTS accomplishes this by maintaining services that provide National Security/Emergency Preparedness voice telecommunications for the government and its industry organizations during times when networks are congested or degraded. These services are the Government Emergency Telecommunications Service, the Wireless Priority Service, and the Special Routing Arrangement Service.

*Next Generation Network (NGN)* – In FY 2013, NPPD requests \$20.000 million for the NGN Priority Service (PS) program, including 2 FTP/2 FTE. This represents a decrease of \$5.253 million from FY 2012 Enacted. NGN will leverage Internet Protocol infrastructures to provide government and its industry organizations with National Security/Emergency Preparedness telecommunications during an emergency. It will supplement PTS services as commercial telecommunications carriers transition from circuit-switched infrastructures to Internet Protocol infrastructures. The NGN-PS Program Office works with major carriers as they make the transition to deploy features enabling National Security/Emergency Preparedness priority service. Over the long term, the NGN-PS will deliver priority voice, video, and data communication services.

*Programs to Study and Enhance Telecommunications (PSET)* – In FY 2013, NPPD requests \$19.594 million for PSET, including 33 FTP/33 FTE. This represents a \$6.153 million increase over the FY 2012 Enacted of \$13.441 million. PSET conducts technical studies and analyses for identifying and improving approaches to assist Federal entities in fulfilling National Security/Emergency Preparedness telecommunications objectives. PSET models and analyzes priority communications capabilities, assists the State Department in recommending national and international telecommunications standards for networks supporting National Security/Emergency Preparedness goals, and maintains and supports the implementation of policy to address minimum communication capabilities requirements for departments and agencies to continue operations during emergency or crisis situations.

*Critical Infrastructure Protection Program* – In FY 2013, NPPD requests \$10.978 million for the Critical Infrastructure Protection Program, including 40 FTP/40 FTE. This represents a decrease of \$0.374 million from the FY 2012 Enacted. The Critical Infrastructure Protection Program supports operations to assist in the initiation, coordination, restoration, and reconstitution of National Security/Emergency Preparedness telecommunications. This includes the operation, maintenance, and supporting activities of the National Coordinating Center for Telecommunications, a joint industry-government body to coordinate the response to National Security/Emergency Preparedness telecommunications incidents. Additionally, the program conducts analyses of telecommunications capabilities in the aftermath of a disaster, training, and exercises to prepare to respond to disasters and other crises, and a regulatory, administrative, and operational system to authorize and provide priority treatment of National Security/Emergency Preparedness services after a disaster.

**C. Budget Request Summary:**

NPPD requests 1,336 FTP/1,260 FTE and \$1,166.633 million for FY 2013.

**Program Changes**

- **Cybersecurity Capability Improvement Program .....\$202.0M (0 FTE)**  
This program change provides \$202.0 million for this new initiative, which is designed to further reduce risk in the Federal cyber domain. It will address vulnerabilities in civilian Federal network cybersecurity, and support continuous monitoring at Federal agencies, improve the common operating picture of threats to the civilian Federal cyber network, and ensure that threats are resolved more quickly. This initiative will be overseen by NCSD’s Federal Network Security branch. The initiative will directly support Federal civilian departments and agencies in developing capabilities that will improve their cybersecurity posture in accordance with the Federal Information Security Management Act (FISMA), enable improved continuous monitoring at departments and agencies, and support other critical cybersecurity capabilities to thwart advanced, persistent cyber threats.
  
- **US-CERT Operations .....\$15.3M (12 FTE)**  
This program change provides an increase of \$15.3 million and 23 FTP/12 FTE to support US-CERT Operations in its effort to keep pace with NCPS Block 3.0. US-CERT will increase its analytic capability, allowing it to keep pace with the evolving cybersecurity threat environment and the implementation of NCPS Block 3.0. Additionally, US-CERT would begin to staff DHS’s site at Corry Station in Pensacola, Florida, in order to meet critical continuity of operations (COOP) objectives, facilitate continued monitoring of the Federal networks, provide expanded capability to do malware analysis, and support cross-sector information sharing in the event of a major disaster impacting US-CERT’s operations based in the Washington, D.C., area.
  
- **Network Security Deployment .....\$116.9M (9 FTE)**  
This program change provides an increase of \$116.9 million and 18 FTP/9FTE to support Network Security Deployment’s sustainment and expansion of intrusion prevention capabilities and development of information sharing capabilities. NCPS Block 3.0 will draw on commercial technology and specialized government technology to conduct intrusion prevention and threat-based decision making on network traffic entering or leaving Federal civilian networks. Network Security Deployment also will begin development of NCPS Block 2.2, which will augment the visualization of department and agency threat information and provides an advanced mechanism for information sharing and collaboration, tiered to support multiple user communities.
  
- **Multi-State Information Sharing and Analysis Center .....\$4.9M (0 FTE)**  
This program change provides an increase of \$4.9 million to support the Multi-State Information Sharing and Analysis Center (MS-ISAC). MS-ISAC provides the opportunity to analyze information and correlation across its State, local, tribal, and territorial (SLTT) members, which then can be efficiently aggregated and shared with

US-CERT, NCCIC, and their public and private sector partners without requiring Federal personnel resources. MS-ISAC will use a consolidation of services for 25 States, including hosting a 24x7x365 cybersecurity operations center, developing and rapidly distributing cybersecurity advisories and bulletins, and directly responding to and assisting MS-ISAC members with response to cyber incidents.

- **Critical Infrastructure Warning and Information Network.....\$6.7M (3 FTE)**  
 This program change provides an increase of \$6.7 million and 3 FTP/3 FTE to support the Critical Infrastructure Warning and Information Network (CWIN). CWIN is a contingency network with dedicated circuits and “thin” workstations, connecting DHS with key organizations responsible for restoring the packet-switched network (PSN) and the Internet if they are disrupted by a cyber attack. CWIN provides protected voice and data between DHS and infrastructure partners to enable secure communication during significant incidents when the PSN and Internet are disrupted. CWIN is the only system that can provide out-of-band connectivity for DHS and its stakeholders.
- **Cybersecurity Facilities .....(\$5.5M) (0 FTE)**  
 This program change reduces Cybersecurity Facilities by \$5.5 million and 0 FTP/0 FTE. This will postpone facility plans that address real estate requirements, security, and critical infrastructure issues. This was reduced in order to provide additional funding for higher priority cybersecurity programs.
- **Next Generation Networks.....(\$5.3M) (0 FTE)**  
 This program change reflects a \$5.3 million reduction to Next Generation Networks Priority Services. This program funds the planning and acquisition of technology to replace Priority Telecommunications Services voice services from circuit-based technology to internet protocol (IP)-based technology. The reduction will have a limited impact on the transition from circuit-based to IP-based technology. This program was reduced in order to provide additional funding for higher priority cybersecurity programs.
- **Incident Planning and Exercises (IPE).....\$7.8M (0 FTE)**  
 This program change eliminates IPE as a discrete project in order to provide additional funding for higher priority efforts and transfers the Federal staff to other IP projects where the activities performed under IPE will continue to operate.
- **Defer Investment in Critical Infrastructure Technology and Analysis (CITA) Tools.....(\$2.6M) (0 FTE)**  
 This program change represents a reduction in non-personnel mission support funds to ensure the highest priority capabilities are fully funded to achieve core missions. The CITA project’s development of a services-based architecture to facilitate interoperability and information sharing will be delayed without compromising the project’s primary mission.

- **Sector Specific Agency (SSA) Management.....(\$2.0M) (0 FTE)**  
This program change will be applied to work with the Chemical, Commercial Facilities, Critical Manufacturing, Dams, Nuclear, and Emergency Services sectors, and the Interagency Security Committee. Training will shift to more inexpensive media.

## II. Summary of FY 2013 Budget Estimates by Program/Project/Activity (PPA)

Total Change 2012 to 2013	-	-	(18,804)

NPPD requests \$74.544 million and 253 FTP/242 FTE for the Infrastructure Security Compliance Project. The request includes:

- Decrease of \$1.716 million for realignment to centralize IP business support functions
- Increase of \$0.124 million for the 2013 pay increase
- Decrease of \$0.047 to partially offset 2013 pay increase
- Decrease of \$0.280 million for DHS Strategic Sourcing Initiative Savings
- Decrease of \$0.144 for the reduction of DHS PCS moves
- Decrease of \$0.899 million for transfers to consolidate evaluation activities
- Decrease of \$15.842 million for reduction based on historical carryover

The Infrastructure Security Compliance Project develops regulations, monitors regulatory compliance, conducts inspections, and performs outreach and communications activities. The two primary initiatives are the development and implementation of the Chemical Facility Anti-Terrorism Standards (CFATS) program and the development and implementation of the Ammonium Nitrate (AN) Security Program.

The Infrastructure Security Compliance Project regulates security at high-risk chemical facilities, requiring them to complete Security Vulnerability Assessments and develop and implement Site Security Plans that meet risk-based performance standards established by the Department. The Project also has the authority to regulate the sale and transfer of AN in order to prevent its misappropriation or use in a terrorist attack. The Project helps to ensure that high-risk facilities are appropriately addressing their security risks and that risks are not shifted between individual facilities, among surrounding communities, between regions, or to non-facility assets.

In addition, the Infrastructure Security Compliance Project has helped to make the Nation safer by influencing chemical facilities to reduce holdings of chemicals of interest that are affecting their risk level. Specifically, since the inception of this project, 1,674 facilities preliminarily determined to be high-risk have removed all chemicals of interest from their sites while an additional 743 facilities have reduced their onsite quantities of chemicals of interest to a low enough level that they are no longer considered high risk.

The Infrastructure Security Compliance Project was established in response to the DHS Appropriations Act of 2007 (Public Law 109-295), which gave DHS authority to regulate and prioritize security at those chemical facilities nationwide that present a high level of risk. The statutory requirements that the project implements are contained in the Chemical Facility Anti-Terrorism Standards (6 C.F.R. Part 27). Additional requirements are being added to the Project in response to Section 563 of the 2008 Consolidated Appropriations Act, Subtitle J – Secure Handling of Ammonium Nitrate (“Section 563”). Section 563 amends the Homeland Security Act of 2002 and provides DHS with the authority to “regulate the sale and transfer of ammonium nitrate by an ammonium nitrate facility ... to prevent the misappropriation or use of ammonium nitrate in an act of terrorism.” The Project also has the authority to regulate the sale and transfer of AN in order to prevent its misappropriation or use in a terrorist attack.

**Department of Homeland Security

Total Change 2012 to 2013	(12)	(12)	(869)

NPPD requests \$56.498 million and 153 FTP/140 FTE for Regional Field Operations. The request includes:

- Increase of \$0.171 million and 2 FTP/2 FTE for realignment to centralize IP business support functions
- Increase of \$2.970 million and 17 FTP/17 FTE for realignment to consolidate exercise, training, and evaluation activities
- Increase of \$3.146 million and 3 FTP/3 FTE for realignment to consolidate geospatial analyst activities into the Protective Security Advisor (PSA) Project
- Increase of \$0.079 million for 2013 pay increase
- Decrease of \$0.030 million to partially offset 2013 pay increase
- Decrease of \$0.920 million for reductions based on historical carryover

***Partnerships and Information Sharing***

The CIKR Partnerships Project enhances critical infrastructure protection and resilience by building and sustaining a comprehensive network of stakeholder engagement structures and processes, through which critical infrastructure stakeholders coordinate and communicate within their communities and across sectors and geographic jurisdictions. The project provides effective legal- and policy-compliant structure and procedures for engagement within and among critical infrastructure public-private partnerships and a unifying information-sharing environment for the stakeholder community, from the national level to the local level.

***National Infrastructure Coordinating Center (NICC)***

The NICC Project consolidates, from a national perspective, significant primary and cascading impacts caused by critical infrastructure degradation resulting from an incident. The NICC Project also provides the structures necessary to maintain effective steady-state monitoring and incident management planning for conditions and events that threaten the Nation’s critical infrastructure assets and systems. As one of the elements of the National Operations Center, the NICC provides situational awareness and monitoring of incidents affecting critical infrastructure nationwide. This steady-state monitoring, alerting, and response planning enables a rapid transition to incident management in a crisis.

The operational elements of the NICC Project include the 24/7 Watch and Warning Unit and a briefing staff; operational functions of the project include ensuring readiness of the IP Critical Infrastructure Crisis Action Team (CI CAT). The NICC also supports a scalable incident management capability through routine training and exercises of the CI CAT. When activated, the CI CAT coordinates all incident response activities across IP and provides situational awareness and decision support to DHS leadership, critical infrastructure stakeholders, and emergency response officials. As an active participant in the Nationwide Suspicious Activity Reporting (SAR) Initiative, the NICC routinely receives SAR involving the Nation’s critical infrastructure that may have a potential nexus to terrorism and shares it with DHS, FBI, and other stakeholders as appropriate.

***Protective Security Advisors***

The PSA Project provides comprehensive critical infrastructure protection capacity. PSAs deploy strategically across the United States to provide State and local communities with IP risk-reduction efforts and support response to all hazardous incidents, providing expertise on reconstituting critical

infrastructure and surge capabilities to more effectively support threat-driven actions. They serve as the Department's onsite critical infrastructure and vulnerability assessment specialists, while giving a local perspective to—and supporting the development of—the national risk picture by identifying, assessing, monitoring, and minimizing the risk to critical infrastructure at the State, local, and regional levels.

PSAs conduct Enhanced Critical Infrastructure Protection security surveys at critical infrastructure facilities to assess overall security postures and track the implementation of new or improved protective measures. They inform and educate facility owners and operators on the criticality of the facilities and related threats from terrorism, while forging strong relationships among Level 1 and Level 2 facility owners and operators; DHS; and Federal, State, and local law enforcement. They provide infrastructure security and resiliency expertise to government officials and their private sector counterparts who are responsible for security at mass gatherings, National Special Security Events, and high-level special events.

### ***Critical Infrastructure Technology and Architecture (CITA)***

IP's mission requires the use of information technology (IT) to collect, store, protect, and manage data concerning the Nation's critical infrastructure. The CITA Project's purpose is to consolidate IP's IT development, testing, and maintenance activities to provide cost efficiencies by establishing a framework to manage the large repository of collected infrastructure data. This repository will be the Infrastructure Data Warehouse.

This project benefits the IP mission by ensuring interoperability and improved access to IP IT applications, thereby minimizing development costs and providing improved data quality. To date, accomplishments include an assessment of the current IP IT systems inventory, establishment of an IP service-oriented architecture, and establishment of a Joint Technology Lab located at the Department of Defense-sponsored Multi-Agency Collaboration Environment in order to facilitate the design, development, and testing of IP technical solutions. Primary beneficiaries include both governmental and private sector entities that have a critical infrastructure protection mission.

### ***National Infrastructure Protection Plan (NIPP) Management***

The NIPP Management Project enhances critical infrastructure protection and resilience by providing essential guidance and facilitating coordination support for Sector-Specific Agencies' implementation of the NIPP and the Sector-Specific Plans. The NIPP Management Project oversees NIPP implementation processes by reporting progress and measuring effectiveness across the Sector-Specific Agencies, State and local partners, and private sector critical infrastructure owners and operators, as well as across IP programs and activities. The project also provides for cross-sector preparedness, public education, and academic engagement to support NIPP implementation.

The NIPP Management Project actively engages critical infrastructure partners in making risk-informed decisions and achieving protection and resilience outcomes in accordance with the NIPP. Through the Critical Infrastructure Risk Management Enhancement Initiative (CIRMEI), the project has developed—and continues to refine—clear outcomes and metrics that inform resource allocation for the National Coordinator, the 18 critical sectors, and SLTT entities. In this way, the CIRMEI drives an enhanced process for measuring progress and assessing the state of critical infrastructure protection and resilience efforts across the country through improved reporting and action-oriented planning to inform programmatic and resource-allocation decisions.

The National Critical Infrastructure Annual Report (NAR) presents the progress of Federal and SLTT governments and the 18 sectors against these outcome metrics, and the Critical Infrastructure Risk Management Plan (CIRMP) describes planned approaches for improving critical infrastructure protection and resilience in areas where progress has been insufficient, as reported in the NAR.

### ***Sector-Specific Agency (SSA) Management***

The SSA Management Project executes the SSA mission to lead the unified public-private sector effort to coordinate, develop, and implement comprehensive security and resilience strategies for six critical infrastructure sectors (Chemical; Commercial Facilities; Critical Manufacturing; Dams; Emergency Services; and Nuclear Reactors, Materials, and Waste). In addition, the SSA Management Project, in its capacity as the Interagency Security Committee (ISC) Program Management Office, has

responsibility for executing the ISC mandate, which is to issue and monitor the implementation of standards to enhance the security of nonmilitary buildings and facilities in the United States occupied by Federal employees and other personnel.

SSA Management executes this capability through strong partnerships with the private sector, academia, and all levels of government, as well as effective planning and activity integration, education and training, information sharing and communication, exercises, and assessment and mitigation.

## ***Bombing Prevention***

The Bombing Prevention (BP) project enhances the ability of State and local responders, local law enforcement, the private sector, and the public to detect, deter, and prevent bombing attacks, and to combat the threat of terrorist use of explosives. This is done by providing guidance and training to improve capabilities that will prevent bombing attacks targeting critical infrastructure. BP is the lead agent for Homeland Security Presidential Directive (HSPD)-19, the HSPD-19 *Implementation Plan*, and the National Strategy for Combating Terrorist Use of Explosives in the United States.

BP coordinates national and intergovernmental bombing prevention efforts by expanding partnerships and services to State and local law enforcement, first responders, partners in the Federal Government, international law enforcement/first responders, the private sector, and the public,

Initiatives include:

- Multi-Jurisdiction Improvised Explosive Device Security Planning in high-risk jurisdictions
- National capabilities analysis of bomb squads, dive teams, SWAT, and canine teams; these analyses also support the Regional Resiliency Assessment Program
- Bombing prevention and risk mitigation training
- Information sharing such as the Bomb-making Materials Awareness Program and the Technical Resource for Incident Prevention (TRIPwire). TRIPwire is the DHS online information-sharing network for bomb squads and law enforcement and other emergency personnel, to enhance their awareness of terrorist IED tactics, techniques, and procedures.

## ***Infrastructure Sector Analysis (ISA)***

The ISA Project enables better risk management through providing standardized risk assessment methodologies for use by CIKR owners and operators, and SLTT jurisdictions with improved management of the risk landscape. The project provides owners, operators, SLTT partners, and DHS decision-makers with risk integration and analysis, risk modeling, and analyses of hazard, vulnerability, consequence, dependency, and interdependency.

ISA, including the National Infrastructure Simulation and Analysis Center, applies a risk management framework to systemically compare and contrast probabilities of events occurring and to forecast potential risks to provide the Critical Infrastructure protection community with certainty and clarity to understand the complex trade-offs that must be made to implement risk management and mitigation strategies. ISA supports this through working relationships with the DHS Office of Intelligence and Analysis, the broader Intelligence Community, and other Federal and SLTT security partners.

The ISA Project also allows for the development of Infrastructure of Concern (IOC) lists in support of all-hazards incident management. The IOC lists are tailored to the location and potential critical infrastructure impacts (e.g., physical, economic) specific to a particular incident; they help prioritize Federal, State, and local response and recovery activities as they relate to critical infrastructure.

## *Vulnerability Assessments (VA)*

The VA Project conducts specialized field assessments to identify vulnerabilities of nationally significant critical infrastructure. These vulnerability assessments provide the foundation for IP's risk-based implementation of protective programs designed to prevent, deter, and mitigate the risk of a terrorist attack while enabling timely, efficient response and restoration in an all-hazards post-event situation. The VA Project, in cooperation with the Nuclear Regulatory Commission, also analyzes potential vulnerabilities of proposed sites for new commercial nuclear reactors, as required under Section 637 of the Energy Policy Act of 2005.

The VA Project conducts specialized field assessments to identify vulnerabilities of Level 1 and Level 2 CIKRs. Current efforts include:

- A site assistance visit is a site-specific, voluntary, non-regulatory, and detailed assessment conducted on critical infrastructure assets and systems to enhance protection by identifying vulnerabilities and resiliency gaps and providing options for consideration to mitigate these gaps and vulnerabilities.
- Buffer Zone Plans are strategic documents developed by local jurisdictions, with support from IP, that identify significant assets at designated critical infrastructure sites that may be targeted by terrorists for attack and specific threats and vulnerabilities associated with the site and its significant assets.
- The Regional Resiliency Assessment Program evaluates critical infrastructure on a regional level to examine vulnerabilities, threats, and potential consequences from an all-hazards perspective to identify dependencies, interdependencies, cascading effects, resiliency characteristics, and gaps. The Regional Resiliency Assessment Program aims to provide a comprehensive analysis of a region's CIKR prevention and protection capabilities.

Business Operations supports NCSD leadership by establishing policies and direction to sustain overall cybersecurity strategy and planning through effective integration of resource and financial management, human capital, facilities, performance management, policy development and implementation, information and personnel security, and strategic planning. Business Operations also

oversees the implementation of national cybersecurity policies and ensures that appropriate resources are available to support its mission and specialized information technology systems.

Business Operations is comprised of two areas:

- Business Operations, which provides oversight to financial management, human capital, information and personnel security, performance management, policy development, and strategic planning capabilities. Financial management provides accounting and reporting activities and oversees the management of appropriated funding and expenditures, and prepares budgetary reports required by OMB and Congress. Human Capital manages staffing plans and processes, develops and institutes training and mentoring programs for current employees, provides personal development incentives to improve employee morale, and refines and supplements the existing workforce training programs. Human Capital also manages full-scale accelerated, promotional cybersecurity fellowship and internship programs. Information and Personnel Security establishes IT architecture enhancements, integrates system modifications to provide redundant capabilities, and provides collective resources necessary to support contingency of operations planning and sustainment. Performance Management manages process improvements to reduce response timelines for internal business processes and external informational inquiries. Policy Development and Implementation manages information and system security controls, oversight, and accreditation programs and processes. Strategic Planning supports standard budgeting and acquisition collaboration tools and operating policies and procedures to streamline budgeting and execution activities and strategies throughout the Division.
- Facilities, which coordinates the development of comprehensive facility plans that address real estate requirements, security, and critical infrastructure issues. Facilities also manages real estate, IT, and supporting resources.

Critical Infrastructure Cyber Protection and Awareness collaborates with the public and private sectors to assess and mitigate risk to the Nation's cyber CIKR and promotes cybersecurity awareness among and within the general public and key communities, maintains relationships with governmental cybersecurity professionals to share information about cybersecurity initiatives, and develops partnerships to promote collaboration on cybersecurity issues.

Critical Infrastructure Cyber Protection and Awareness is comprised of five areas:

- Critical Infrastructure Protection-Cyber Security, which strengthens the Nation's preparedness through public and private partnerships that work to improve the security of the IT Sector, serving as the designated Sector-Specific Agency.
- Control Systems Security, which focuses on reducing the cyber risk to industrial control systems integrated into the Nation's CIKR. Through its Industrial Control Systems Cyber Emergency Response Team (ICS-CERT) and Industrial Control Systems Joint Working Group (ICSJWG), the Control Systems Security Program works with both the public and private sector to provide guidance on efforts aimed at reducing the likelihood of success and severity of impact of a cyber attack against the Nation's critical infrastructure industrial control systems. The Control Systems Security Program coordinates with public and private partners to increase capabilities within critical infrastructure and key resources stakeholders for assessing and mitigating vulnerabilities, disseminating products containing actionable intelligence, training staff and personnel on control systems security, and implementing defense and remediation practices within operational environments.
- Cyber Exercises, which plans, coordinates, and conducts cyber-focused exercises that prepare and enhance incident operational capabilities for DHS, Federal, State, local, regional, international, and private sector partners.
- Cyber Security Evaluation, which conducts voluntary cyber security assessments across all 18 CIKR sectors. It provides CIKR sector participants with a portfolio of assessment tools, techniques, and analytics, ranging from those that can be self-applied to those that require expert facilitation or mentoring outreach, and provides CIKR participants and other policy stakeholders with regionally-placed liaison support, through its Cyber Security Advisor initiative.
- Outreach and Awareness, which coordinates domestic and international engagement and outreach by promoting cybersecurity awareness among and within the general public and key stakeholder communities. It maintains relationships with Federal, State, local, and tribal governments, private industry stakeholders, and international cybersecurity professionals to share information about cybersecurity initiatives, and develops partnerships to promote collaboration and awareness on cybersecurity issues. Outreach and Awareness also engages in building international partnerships and conducting outreach to advance information sharing and collaboration, cooperation, and planning to achieve cybersecurity goals.

The Cybersecurity Coordination program integrates information from the six Federal cybersecurity centers to provide a fused view of cyber activity across the intelligence, defense, civil, and law enforcement/counterintelligence domains. The program supports operational activities to facilitate integration and activities at the Federal centers, an information system for online collaboration, and IT support and enterprise capability for the centers. Cybersecurity Coordination also supports an increased number of private sector partners present in the NCCIC environment.

Federal Network Security manages activities designed to enable departments and agencies to secure their systems and networks. It provides a single, accountable focal point for achieving cyber infrastructure security and compliance throughout the Federal enterprise. Federal Network Security is comprised of the following five areas:

- Cybersecurity Assurance, which assesses the state of operational readiness and cybersecurity risk of unclassified Federal networks and systems and provides departments and agencies with information and services to mitigate their cyber risks. This activity also measures Federal agency compliance with information security laws and policies and provides policymakers with an enterprise view of the Federal government’s cybersecurity posture.
- Network and Infrastructure Security, which leads the CNCI Trusted Internet Connections (TIC) Initiative with OMB. It optimizes network security capabilities into a common solution for the Federal information enterprise and facilitates the reduction and consolidation of external connections, including Internet points of presence, through approved access points.
- Cybersecurity Performance Management, which provides operational support for Federal Executive Civilian Branch departments and agencies in their compliance with the Federal Information Security Management Act (FISMA) and guidance outlined in OMB M-10-15 and M-10-28. In addition to providing operational support, the Program works with cybersecurity partners to improve the quality of security measures under FISMA and advance the overall security posture of the Federal civilian enterprise. Cybersecurity Performance Management also assesses network security best practices and recommends changes to Federal IT policy or architecture. This activity is a forward-looking entity that directly supports the long-term strategic prevention of attacks against Federal Government networks through the management of common challenges faced by all agencies.
- Requirements and Acquisitions Support, which supports the strategic prevention of attacks against Federal executive branch civilian networks by facilitating information exchange and effectively supporting government-wide cybersecurity initiatives. It assists in requirements development and acquisition support for investments in security solutions, technologies, and processes.

Global Cybersecurity Management develops and promulgates sound practices for software developers, IT security professionals, and other CIKR stakeholders. It also addresses the need to build a skilled cyber workforce for today and tomorrow and provides a set of comprehensive

resources that can be used to appropriately manage supply chain risk across the lifecycle of networks, systems, and components.

Global Cybersecurity Management is comprised of four areas:

- Cybersecurity Education and Workforce Development, which works to develop a skilled workforce and facilitate the availability of qualified cybersecurity professionals to support the Nation’s cybersecurity needs through education and workforce development programs. It also assists in the implementation of the National Initiative for Cybersecurity Education Strategy, leading and coordinating efforts to improve the Nation’s cybersecurity education posture to ensure a robust, competent cybersecurity workforce.
- Research and Standards Integration, which promotes the development of standards and frameworks that align with national interests to enhance cybersecurity postures of networks, software, and other cyber domains, and effectively shares information about development and use of cybersecurity standards throughout DHS.
- Software Assurance, which seeks to improve the security of software through the collaborative advancement of standards-based technologies, tools, processes, and practices in both the public and private sectors.
- Supply Chain Risk Management, which promotes the resiliency of the Information and Communications Technology non-national security systems supply chain. To execute this mission, this activity works to expand the acquisition and technical community’s awareness of supply chain risks, develop tools that mitigate risk, develop new acquisition and technical policies and practices, partner with industry to develop standards and practices, and provide alerts to stakeholders of supply chain threats.

Network Security Deployment is responsible for the development, acquisition, deployment, operations, and maintenance of NCPS, operationally known as EINSTEIN. NCPS is an integrated system of intrusion detection, analytics, intrusion prevention, and information sharing

capabilities that are used to defend Federal civilian departments' and agencies' IT infrastructure from cyber threats. It consists of the hardware, software, supporting processes, training, and services that are being developed and acquired to support Network Security Deployment's mission requirements as delineated in CNCI.

Network Security Deployment is comprised of six areas:

- Core Infrastructure, which is made up of the IT systems and facilities that enable the delivery of NCPS capabilities. The NCPS core infrastructure includes all classifications levels of the mission operating environment that US-CERT Operations analysts use to access the information generated from NCPS operational systems, communications infrastructure that links NCPS facilities, and the NCPS core data center and facility costs.
- Intrusion Detection capabilities, which includes the elements of the intrusion detection system known as EINSTEIN 2 (Block 2.0). Block 2.0 enables the identification of potential malicious activity and traffic entering or exiting Federal networks using a signature-based intrusion detection technology. This capability allows US-CERT Operations analysts to acquire a better understanding of the network environment and increased ability to address network weaknesses and vulnerabilities.
- Analytics, which provides capabilities that support advanced analysis of NCPS traffic data. Analytics includes the Block 2.1 project that provides a Security Information and Event Management (SIEM) solution for the NCPS. The SIEM solution simplifies cyber analysis by aggregating similar events (thus reducing duplication), correlating related events (that might otherwise go unnoticed), and providing visualization capabilities (making it easier to see relationships). The Analytics capability also includes packet capture tools, a malware analysis lab, flow visualization tools, incident management and response tools, and high input/output databases that allow for the analysis of large data sets.
- Information Sharing and Collaboration, which develops capabilities to enhance NCPS's ability to securely share information across multiple stakeholders. Information Sharing and Collaboration includes the Block 2.2 project that will provide a secure environment for sharing cybersecurity information with a wide range of security operations and information sharing centers across Federal, State, local, tribal, private, and international boundaries. The objective of the information sharing capability is to prevent cybersecurity incidents from occurring through improved sharing of threat information, reduce the time to respond to incidents through improved coordination and collaboration capabilities, and improve efficiencies through the use of more automated information sharing and through the exposure of analysis capabilities. Additional activities under Information Sharing and Collaboration provide US-CERT Operations analysts with a common operating picture of the threat landscape of Federal Executive Branch civilian networks as generated from department and agency data sets, allowing for advanced visualization, analysis, and workflow capabilities.

- Intrusion Prevention, which represents the intrusion prevention system known as EINSTEIN 3 (Block 3.0). EINSTEIN 3 represents the next evolution of protection for Federal civilian departments and agencies by providing active network defense capabilities and the ability to prevent and limit malicious activities from penetrating Federal networks and systems. This intrusion prevention system will draw on commercial technology and specialized government technology to conduct intrusion prevention and threat-based decision making on network traffic entering or leaving Federal civilian networks. These technologies include intrusion prevention sensors and traffic aggregation points, referred to as Nests. This capability also includes the communications infrastructure that links the intrusion prevention system with the rest of the NCPS.
- Program Planning and Operations, which provides NSD with program management and program office operations support services that are common across all NCPS capability areas. These services include contracts oversight, financial management, life-cycle cost estimating, strategic and technical planning and assessment functions, and NSD Front Office support services. These activities ensure that all of the NCPS’s capabilities are coordinated and delivered effectively and efficiently and continue to evolve to meet ever-changing cyber threats.

US-CERT Operations is the operational arm of the National Cyber Security Division (NCSD). Its primary functions include analyzing and reducing cyber threats and vulnerabilities, disseminating cyber threat warning information to public and private sector partners, coordinating with government and industry partners to achieve shared cyber situational

awareness of the Nation's cyber critical infrastructure, providing response and recovery support for national assets, and advising senior leadership on national-level cybersecurity policy and guidance.

US-CERT Operations improves national efforts to address threats and incidents affecting the Nation's critical information technology assets and cyber infrastructure and serves as a key component of the National Cyber Incident Response Plan (NCIRP). US-CERT Operations leads cross-sector efforts to improve the Nation's cybersecurity posture, coordinates cyber information sharing, and manages cyber risks to the Nation while protecting constitutional liberties. US-CERT Operations' mission space includes Federal civilian agencies; DOD; the intelligence community; State, local and tribal governments; private sector partners; critical infrastructure owners and operators; and international partners, as well as the general public.

US-CERT Operations activities provide immediate customer support and incident response, including 24x7x365 support to the NCCIC, which has connectivity to all major Federal cyber operations centers, industry, international, and communications partners. Its analysts examine raw and summarized data from a wide variety of information sources to make determinations about potential attacks detected by NCPS. US-CERT Operations also maintains a 24x7 Operations Center that provides situational awareness and risk mitigation information and support for Federal Government customers and the general public.

US-CERT Operations is comprised of the following three areas:

- Operations, which identifies, triages, and analyzes cyber activity to rapidly develop and disseminate mitigation and risk management strategies. It also ensures that DHS is represented during operational planning and during the planning and implementation of technology development programs. Operations is divided into Incident Management, Detection and Analysis, and Digital Analytics.
- Coordination and Integration, which builds and manages trusted relationships to share information and coordinate with constituents to facilitate shared situational awareness and better protect assets against cyber threats. Coordination and Integration is divided into Coordination and Communications.
- Technology and Readiness Planning, which develops plans, processes, and technology requirements to advance US-CERT Operations towards its strategic vision and ensure that US-CERT matures in a coordinated and strategic fashion in response to a dynamic, operational environment. It also manages and coordinates organizational resources that are critical to the increasing responsibilities of US-CERT Operations' mission.

Priority Telecommunications Services (PTS) ensures the availability of national security and emergency preparedness (NS/EP) communications during efforts to prevent, respond to, and recover from threatened and actual terrorist attacks, major disasters, and other emergencies, even when conventional communications services are congested or degraded. PTS significantly enhances call completion capabilities for national leadership, other national security and emergency preparedness users, and first responders through the capabilities provided by the following three PTS activities:

*Government Emergency Telecommunications Service (GETS).* A nationwide landline telephone telecommunications service enabling priority communications for the President; Federal, State, and local governments; and authorized industry organizations by providing priority voice calling via the existing public switched telephone network. GETS supports NS/EP telecommunications requirements, including Continuity of Operations (COOP), for responding to and recovering from natural and man-made disasters for over 275,000 users.

*Wireless Priority Service (WPS).* A nationwide cellular service providing end-to-end priority calls via selected commercial national and regional wireless carriers, which includes GETS interoperability to enhance the probability of call completion. WPS coverage is maintained in the Nation's five nationwide wireless carriers (Verizon Wireless, AT&T, Sprint, Nextel, and T-Mobile) as well as a number of regional carriers. These carriers provide coverage to 97 percent of the United States population.

*Special Routing Arrangement Service (SRAS).* The SRAS provides selected users with the highest level of nontraceable priority calls during times of severe public network congestion or when disruption may result from acts of war.

*The Government Industry Planning & Management (GIP&M) Branch* within PTS executes the following priorities:

- Manages the President's National Security Telecommunications Advisory Committee (NSTAC) under Executive Order 12382
- Manages the Committee of Principals under Executive Order 12472
- Manages the Communications Sector under HSPD-7
- Manages the Network Security Information Exchanges
- Serves as the Public Affairs Coordinator for the NCS, including external affairs, website management, and FOIA compliance

The GIP&M Branch manages relationships with key government and industry representatives across the Communications Sector and other critical infrastructure sectors to assure information-sharing among stakeholders and planning for all hazards response to disruptions of communications infrastructure and services. GIP&M coordinates sector partners to reduce risk by managing activities that include producing studies, moderating forums, and providing administrative support to presidential advisory committees. GIP&M also supports sector partners, including government and industry, to jointly identify and implement solutions to sector vulnerabilities.

- The National Communications System’s Next Generation Network (NGN) Priority Services program was established to address the ramifications of continuously evolving technology in the communications industry.

Traditional national security and emergency preparedness telecommunications services are designed around the legacy circuit-switched infrastructure of the public switched telephone network. Public networks are now merging with packet-switched infrastructures and converging into an NGN. As this evolution continues, national security and emergency preparedness telecommunications services will

be guided by commercial standards and technologies based on packet-switching Internet Protocol (IP)-based networks. Wireless public networks have also become increasingly vital during national security and emergency preparedness events.

The NGN Priority Services program will allow NCS to phase out the current circuit-based priority features and functions of the PTS program and transition to Internet Protocol/packet-based networks. This will enable NCS to leverage highly survivable commercially-owned public switched network assets in order to provide a robust and diverse nationwide communications capability and support response and recovery coordination efforts and programs such as COOP and Continuity of Government (COG) to ensure that essential government functions and operations are carried out.

The Programs to Study and Enhance Telecommunications (PSET) PPA supports the development of studies, standards, and assessments of communications infrastructures. It includes the following activities:

*The Modeling, Analysis, and Technical Assessment (MATA)* team’s mission is to predict and mitigate the effect of communications failures on the national leadership’s ability to communicate during times of crisis. MATA provides specialized modeling and analyses of current and future protocols, algorithms, network designs, and capabilities that will impact priority service communications in legacy and Next Generation Networks. The modeling team’s analysis tools are used throughout NCS. The tools provide critical infrastructure and key resource risk assessments for the communications sector in the event of a man-made or natural disaster or assist in restoration and recovery efforts. MATA provides technical assistance to DHS Office of Policy for the Committee on Foreign Investment in the United States and Team Telecom in support of the Federal Communications Commission (FCC).

*The National Security and Emergency Preparedness Standards* team works with national and international industry standards organizations to ensure that evolving communications standards address the technical requirements of national security and emergency preparedness communications. The team performs responsibilities under Presidential Executive Order 12472, which directs the NCS to consider the development of evolving industry consensus standards with respect to national security and emergency preparedness communications. The team adheres to the policy put forth in OMB Circular A-119 that “...directs agencies to use voluntary consensus standards in lieu of government-unique standards except where inconsistent with law or otherwise impractical.”

Critical Infrastructure Protection (CIP) ensures the continued availability of NS/EP telecommunications services under all circumstances, including crisis or emergency, attack, recovery, and reconstitution. CIP performs analyses on the communication infrastructure; ensures continuity planning and operational support are in place; conducts Title Globe continuity communications testing

and certification training for communications emergency response personnel; and produces operational procedures, policies, and support tools. CIP is comprised of the following activities:

*National Coordinating Center (NCC) Operations* is a joint industry-government body providing a mechanism to respond to NS/EP telecommunications incidents. The NCC provides 24x7 real-time situational awareness during the initiation, coordination, restoration, and reconstitution of NS/EP telecommunications services or facilities under all conditions, crises, or emergencies. The NCC is the primary mechanism within the National Communications System for executing Emergency Support Function (ESF) #2 (Communications) under NRF during an incident. The NCC Watch is co-located with US-CERT. The NCC also administers the SHARed RESources (SHARES) high-frequency radio program, which is a network of approximately 1,500 high-frequency radio stations forming a nationwide emergency message-handling network.

*Operations, Plans, and Policy* provides telecommunication analyses during both emergency preparation and actual disaster response operations, and also is responsible for assessing the national continuity communications system.

*Training and Exercises* ensures the NCS has a cadre of more than 100 emergency response personnel prepared to respond across the spectrum of crises and emergencies. In response to the recommendations of the *Hurricane Katrina After Action Report*, the NCS is enhancing its readiness for emergency response operations with an increased tempo of training and exercises for multiagency personnel with ESF #2 collateral duties.

*National Security Information Exchanges (NSIE)* supports two bodies. The Government Network Security Information Exchange represents Federal departments and agencies that have research, standards, regulatory, law enforcement, or intelligence functions related to the public network, or Departments and agencies that are major telecommunications users. The President's NSTAC NSIE provides a trusted environment in which industry and Government representatives exchange information on threats to and vulnerabilities of the public network.

*The Telecommunications Service Priority (TSP)* activity was established by an FCC Report and Order 88-341 in 1988. TSP is the regulatory, administrative, and operational system authorizing and providing for priority treatment of NS/EP telecommunications services. The TSP program provides NS/EP users with priority restoration and provisioning of telecommunications services vital to maintaining readiness or response to an incident. As a result of hurricanes, floods, earthquakes, and other natural or man-made incidents, telecommunications service vendors may become overwhelmed with requests for new telecommunications services and requirements to restore existing telecommunications services. The TSP activity provides service vendors with an FCC mandate for prioritizing service requests by identifying those services critical to national security and emergency preparedness.

The Office of Emergency Communications (OEC) is responsible for supporting and promoting continuing communications for emergency responders and government officials in the event of natural

disasters, acts of terrorism, or other man-made disasters, and working to ensure, accelerate, and attain interoperable and operable emergency communications nationwide. OEC serves as the coordination point for interoperable communications policies and holds key responsibilities, such as its leadership role in the development and implementation of the National Emergency Communications Plan (NECP). OEC was established pursuant to Title XVIII of the Homeland Security Act of 2002, as amended, and mandated under the Post-Katrina Emergency Management Reform Act of 2006 to support the communications ability of emergency response providers and relevant government officials in the event of natural disasters, acts of terrorism, and other man-made disasters and foster the development of interoperable emergency communications capabilities by State, regional, local, and tribal governments and public safety agencies.

Emergency communications encompasses operability, interoperability, and the continuity of communications across a full range of current and future voice, data, and video information exchange capabilities. OEC is committed to ensuring that emergency response personnel at all levels of government and across all disciplines can communicate as needed, on demand, and as authorized. To achieve this vision, OEC developed six key strategic goals to improve emergency communications and support the goals of DHS:

*Goal 1:* Foster coordination between Federal, State, local, tribal, and private sector Emergency Communications stakeholders.

*Goal 2:* Improve emergency communications capabilities through targeted interaction with Federal, State, local, and tribal agencies.

*Goal 3:* Target Federal grants to the most critical emergency communications needs of States and localities in alignment with the National Emergency Communications Plan.

*Goal 4:* Develop policies and plans guiding, promoting, and enhancing efforts to improve emergency communications nationwide.

*Goal 5:* Develop innovative methods to address emergency communications gaps.

*Goal 6:* Create a unified OEC headquarters and regional staff committed to ensuring programmatic success.

The four divisions that report to the OEC Director and carry out OEC's mission and programmatic responsibilities are as follows:

*Policy, Planning, and Analysis* identifies and assesses interoperable emergency communications capabilities and drives Federal grants to meet emergency responders' requirements and needs.

*Multi-Jurisdictional Communications Services (MCS)* establishes and administers OEC's efforts to advance State, local, tribal, and multi-jurisdictional interoperable emergency communications capabilities. Through the Interoperable Communications Technical Assistance Program, OEC develops and delivers training, tools, and onsite assistance to State, tribal, and local agencies in order to advance the implementation of the National Emergency Communications Plan and public safety interoperable emergency communications capabilities. Through the SAFECOM program and the National Council of Statewide Interoperability Coordinators, OEC develops tools, best practices, and methodologies used by emergency response agencies to enhance their interoperability efforts.

*Federal Communications Services* engages with Federal departments/agencies to improve emergency communications capabilities, including policy development, investment planning, and direct assistance.

*Regional Coordination Program* strengthens emergency communications capabilities across Federal, State, local, and tribal governments at the regional level through trusted relationships, collaboration, and knowledge sharing.

Business Operations also oversees the implementation of national cybersecurity policies and ensures appropriate resources are available to support its mission and specialized information technology systems.

## IV. Program Justification Changes

Program Increase							-	-	202,046
<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>202,046</b>

**Description of Item**

This program change will enable the National Cyber Security Division’s Federal Network Security (FNS) branch and Federal agencies to significantly improve the Federal cybersecurity posture. This funding will support continuous monitoring at high-priority Federal agencies, improving the common operating picture of threats to the civilian Federal cyber network, and ensuring that vulnerabilities are resolved more quickly. FNS manages activities designed to enable Departments and Agencies to secure their systems and networks. It provides a single, accountable focal point for achieving cyber infrastructure security and compliance throughout the Federal enterprise. It also provides an efficient means of prioritizing cybersecurity improvements across the Federal civilian sector.

The funding will directly support Federal Executive Branch civilian Departments and Agencies in implementing capabilities that will improve their cybersecurity posture in accordance with the Federal Information Security Management Act (FISMA), enable improved continuous monitoring at Departments and Agencies, and support other critical and high priority cybersecurity capabilities to thwart advanced persistent threats in a dynamic threat environment. As the EINSTEIN program deploys initial intrusion prevention operating capability, it is equally important for Departments and Agencies to know what is happening on their own networks and to ensure that information is provided to DHS to enable a robust defense of Federal civilian networks from continuously evolving cyber threats.

## **Justification**

In OMB Memorandum 10-28, DHS is designated as the “primary responsibility within the Executive Branch for the operational aspects of Federal agency cybersecurity with respect to the Federal information systems that fall within the Federal Information Security Management Act (FISMA).” Securing civilian agencies’ systems is an Administration priority, as set forth by the following: presidential directives, President’s Management Council agenda, and OMB memoranda (Performance Management Agenda, FISMA reform, M-08-05, M-08-16, and the empowerment of CIOs.)

While there has been progress<sup>1</sup> in maturing Department and Agency cybersecurity posture over the past two years, one of the most common barriers to more rapid implementation cited by Federal Department and Agency chief information officers (CIO) and chief information security officers (CISO) is the ability to deploy sufficient resources to address the persistent and dynamic cyber threat.

This funding will help speed the maturity of continuous monitoring capabilities at Federal Executive Branch civilian agencies. In doing so, it will also improve the common operating picture of risks across Federal Executive Branch civilian cyber networks and ensure that vulnerabilities are mitigated more quickly.

Additional funding will allow Federal Executive Branch civilian Departments and Agencies to implement high-priority<sup>2</sup> cybersecurity defensive capabilities. Combined with deployment of the EINSTEIN program, these resources will ensure that cyber attacks can be resolved more quickly and similar attacks will be less successful in the future.

A major attribute of cybersecurity posture is the ability of Departments and Agencies to monitor the status of their own networks and deliver data feeds to DHS, which then can provide situational awareness across the Federal enterprise. DHS will use data feeds from continuous monitoring capabilities established inside Departments’ and Agencies’ networks in order to assess their compliance with FISMA and the overall vulnerability of the Federal enterprise. DHS will provide funding to Departments and Agencies to procure and deploy continuous monitoring capabilities that will produce automated data feeds for agency use in mitigating vulnerabilities. The proposed legislative language in the President’s Budget provides clear authority to enable these transfers, and includes a provision requiring proactive reporting to Congress before these transfers take place.

FNS will allocate funding to the highest priority cybersecurity vulnerabilities. FNS will use its assessment of cybersecurity risk as informed by quarterly FISMA reporting and onsite assessments during FY 2011 and FY 2012 and US-CERT threat information to inform the allocation of resources. With this funding, FNS will identify the agencies with the most significant vulnerabilities, and target the provision of capabilities at those most at risk. DHS will work with the Departments and Agencies to leverage the funding for maximum benefit. In most cases, funding will be provided to procure, deploy, configure, and manage the necessary security capabilities. Departments and Agencies then will be required to deliver agency cybersecurity operational reports to DHS as part of the FISMA compliance program. However, in some cases, especially where pooling of requirements provides more benefit to Departments and Agencies – i.e., bulk software license purchases – DHS may conduct

---

<sup>1</sup> Based on measurements by FISMA and DHS-led assessments.

<sup>2</sup> Based on threats to the Federal government as observed by NCSD’s US-CERT.

strategic sourcing efforts to centrally procure tools and/or services on behalf of the Departments and Agencies. Federal Network Security anticipates that it would begin executing these resources 3-4 months after an appropriation is received.

### **Impact on Performance (Relationship of Increase to Strategic Goals)**

The additional funding will speed Executive branch compliance with FISMA, particularly continuous monitoring, improve the common operating picture for cyber threats, and strengthen Federal civilian Executive branch agencies cyber defenses to align with operating capabilities deployed under EINSTEIN. Specifically, this funding will address the following:

**Continuous Monitoring:** Continuous Monitoring provides the Departments and Agencies with real-time awareness of the state of their computers and networks. A well-designed and well-managed continuous monitoring program can effectively create a dynamic process that provides essential, near real-time security status-related information in order to take appropriate risk mitigation actions and make cost-effective, risk-based decisions regarding the operation of an agency's information systems. A continuous monitoring program allows an organization to track the security state of an information system on an ongoing basis and maintain the security authorization for the system over time. A continuous monitoring system allows an agency to understand the security state its information systems, which is essential in highly dynamic environments of operation with changing threats, vulnerabilities, technologies, and mission/business processes.

- The continued cooperation between DHS and other Agencies also correlates to the GPRA Modernization Act, which requires a move from the production of static, printed agency performance plans and reports to more dynamic, accessible, and useful online performance information. Moving from thousands of pages of printed documents to a more central, consolidated program list will make it easier for Congress and the public to understand what DHS and other Federal agencies do and how they are performing from a cybersecurity perspective. Automated data feeds fit perfectly into this model and allow for increased cost and timesaving measures.
- The formalization of DHS's current role in managing cybersecurity for the Federal Government's civilian computers and networks fully integrates performance improvement officers with FNS leadership and technical experts. This is critical for effective risk management and mitigation, while mapping future requirements for a more secure cyber environment across the Federal Government.

**TIC Capabilities and Deployment:** Full development and deployment of internet gateway monitoring capabilities, such as EINSTEIN, email gateway inspection, web proxy traffic, intrusion detection, and firewall blocking. These activities support TIC architecture, improve agencies' defensive posture, and provide them with the ability to monitor their gateway traffic and deliver data feeds to DHS for additional analysis.

- In accordance with OMB Memorandum M-08-05, all agencies should have identified external connections. Appendix A of the "TIC Reference Architecture" clarifies the definition of external connection. This information was used to establish the starting baseline for the TIC Initiative. All agencies should maintain up-to-date inventories of their external connections,

including service provider, cost, location, capacity, and traffic volumes throughout the TIC Initiative (DHS.gov).

- Continual and dynamic Plans of Actions and Milestones are also necessary to provide solutions to existing issues and outline preparations for next-generation capabilities. This includes steps toward the operational maturity of TIC Access Providers and supporting continual quality assurance with: document controls, inventories of required information, and compliance with OMB Memorandum M-08-16.
- Email filtering, sandboxing, and authentication have been specifically identified to mitigate against spear-phishing and other advanced threats. Email threats are one of the main vectors by which our adversaries compromise our systems. Therefore, ensuring a standardized level of security to external network connections, including the Internet, helps meet the goals as set forth in the TIC Initiative (OMB Memorandum M-08-05).

**Description of Item**

The National Cybersecurity Protection System (NCPS), operationally known as EINSTEIN, is an integrated system of intrusion detection, analytics, intrusion prevention, and information sharing capabilities that is used to defend the Federal civilian Government’s information technology (IT) infrastructure from cyber threats. NCPS consists of the hardware, software, supporting processes, training, and services that are being developed and acquired to support the Department’s mission requirements under the Comprehensive National Cybersecurity Initiative (CNCI).

Network Security Deployment (NSD) is structured into six program activities. Intrusion Detection includes the elements of the intrusion detection system known as EINSTEIN 2 (Block 2.0). Analytics provides capabilities that support advanced analysis of NCPS traffic data and includes the Block 2.1 project that provides a Security Information and Event Management solution for NCPS. Information Sharing provides collaboration capabilities that will enhance NCPS’s ability to share information securely across multiple stakeholders and includes the Block 2.2 project that will augment the visualization of Department and Agency threat information and an advanced mechanism for information sharing and collaboration, tiered to support multiple user communities. Intrusion Prevention includes elements of the intrusion prevention system known as EINSTEIN 3 (Block 3.0). EINSTEIN 3 represents the next evolution of protection for Federal civilian Departments and Agencies by providing active network defense capabilities and the ability to prevent and limit malicious activities from penetrating Federal networks and systems. Core Infrastructure consists of the IT systems, communications infrastructure, and facilities that enable delivery of NCPS capabilities. NCPS’s core infrastructure includes all classification levels of the mission operating environment (MOE) used by US-CERT Operations analysts to access the information generated from NCPS operational systems, communications infrastructure that links NCPS facilities; and facilities used to

operate the NCPS. Program Planning and Operations provides NCPS's operations support services that are common across all NCPS capability areas. These services include contracts oversight, financial management, life cycle cost estimating, strategic and technical planning and assessment functions, and NSD Front Office support services. These activities ensure that all of NCPS's capabilities are coordinated and delivered effectively and efficiently and continue to evolve to meet ever-changing cyber threats.

This program change includes \$103.718 million to support the sustainment and expansion of intrusion prevention capabilities under NCPS Block 3.0 and \$13.161 million to develop information sharing capabilities under NCPS Block 2.2.

### **Justification**

NSD's intrusion prevention system represents the next evolution of protection for Federal civilian Departments and Agencies as it provides active network defense capabilities and the ability to prevent and limit malicious activities from penetrating Federal networks and systems. It will draw on commercial technology and specialized government technology to conduct intrusion prevention and threat-based decision making on network traffic entering or leaving Federal civilian networks. These technologies include intrusion prevention sensors and traffic aggregation points, referred to as Nests. NSD also will expand the NCPS communications infrastructure and operating environment to address the increased operational requirements of EINSTEIN 3.

In FY 2013, NSD will begin migrating from a Government-Off-the-Shelf (GOTS) solution to a Managed Security Service (MSS) approach for delivering intrusion prevention services. Under the MSS approach, each Internet service provider (ISP) will provide its own intrusion prevention services that will conform to certain security, assurance, and communication requirements provided by DHS. DHS will fund the ISPs to develop the two defined countermeasures, and later to develop the remainder of the planned countermeasures.

At Full Operating Capability (FOC), NCPS's intrusion prevention capabilities will be capable of providing coverage to more than 95 percent of major Federal civilian Departments and Agencies' Internet traffic. DHS estimates that FOC will require deployment of 19 intrusion prevention sensors at 14 Nest traffic aggregation locations at the ISPs. Full deployment of NCPS's intrusion prevention capabilities ensures maximum protection of Federal civilian Department and Agency networks against emerging cyber threats. This enhancement anticipates a planned FOC of intrusion prevention capabilities by the end of FY 2018. A DHS analysis has determined that, in the long term, an MSS approach is a more effective and efficient use of taxpayer dollars. The analysis is classified and can be provided under separate cover.

The enhancement to NCPS Block 3.0 includes maintenance of five GOTS sensors and traffic aggregation Nests (four of which will be funded through current services), which NSD plans to deploy between FY 2012 and FY 2013 (\$20.191 million), and the continued development of the classified instances of the MOE (\$2.646 million). It also includes the design and development of an MSS solution for the delivery of intrusion prevention capabilities including the development of three MSS traffic aggregation Nests (\$67.088 million). Furthermore, it includes an additional 14 FTP/7 FTE

(\$1.055 million) and increases to common program costs associated with the expanded capability (\$12.737 million).

Within current services funding, NSD will maintain the additional four GOTS sensors and traffic aggregation Nests, which the program plans to deploy between FY 2012 and FY 2013.

NSD also will fund the information sharing and collaboration capabilities under NCPS Block 2.2 to establish a common infrastructure framework that integrates a range of cyber mission information sharing applications, not only improving DHS's ability to respond to and mitigate cyber threats, but also its ability to share information across multiple stakeholders securely.

These capabilities will augment the visualization of Department and Agency threat information and provide an advanced mechanism for information sharing and collaboration, tiered to support multiple user communities. The information sharing capabilities that will be developed under Block 2.2 will establish a flexible infrastructure at multiple classification levels, allowing for the rapid exchange of cyber threat and cyber incident information among DHS cybersecurity analysts and their Federal and international cybersecurity partners. This infrastructure will consist of robust identity management, portal management, content management, real-time collaboration, visualization, discovery, data messaging, security guard, and content staging services. It also will facilitate the sharing of a wide range of data services, including commercial data feeds, internally generated analytic products, analytics tools, threat indicators and warnings, and real-time incident and continuous monitoring data.

Additionally, NCPS Block 2.2 will provide US-CERT Operations analysts with a common operating picture of the threat landscape of Federal Executive Branch civilian networks as generated from Department and Agency data sets, allowing for advanced visualization, analysis, and workflow capabilities. DHS also will provide an unclassified CyberScope application and a National Information Exchange Model Cyber Domain.

The enhancement requests \$13.161 million to develop these capabilities, including an additional 4 FTP/2 FTE.

### **Impact on Performance (Relationship of Increase to Strategic Goals)**

With additional funding, NSD will maintain the five Nests and intrusion prevention sensors deployed between FY 2012 and FY 2013. NSD also will develop and utilize an MSS solution for intrusion prevention services delivered by ISPs that will provide a more flexible and efficient solution for delivering intrusion prevention capabilities. By moving toward an MSS solution, DHS will be able to leverage industry innovation, which will result in a greatly improved set of capabilities that can be quickly deployed to address emerging threats, and that can be leveraged to protect broader customer bases beyond the Federal Government to include other potential stakeholders. The additional funding also will permit US-CERT Operations to improve the ability of its cybersecurity analysts to collaborate and develop a collective situational awareness of current and potential cyber threats as the implementation of the flexible and robust information sharing environment needed will be timely. US-CERT Operations' current information sharing capabilities are rudimentary and lack transparency to prevent and/or limit malicious activities from penetrating the Federal network environment. Delaying the implementation of this capability would handicap the ability of DHS to respond to and mitigate

cyber threats—ultimately perpetuating the number of incidents and the amount of time it takes to mitigate incidents.

**Department of Homeland Security  
National Protection & Programs Directorate  
Infrastructure Protection and Information Security  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 3:** US-CERT Operations to Keep Pace with NCPS Capabilities  
PPA: US-CERT Operations  
Program Increase: Positions 23, FTE 12, Dollars \$15,335

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							165	165	77,621
Program Increase							23	12	15,335
<b>Total Request</b>	-	-	-	<b>165</b>	<b>150</b>	<b>79,116</b>	<b>188</b>	<b>177</b>	<b>92,956</b>

**Description of Item**

US-CERT Operations leads and coordinates efforts to improve the Nation’s cybersecurity posture, promote cyber information sharing, and manage the cyber risks posed to the Nation. As part of that mission, US-CERT Operations analyzes and reduces cyber threats and vulnerabilities; disseminates cyber threat warning information; coordinates with partners and customers to achieve shared cyber situational awareness of the Nation’s cyber critical infrastructure; provides response and recovery support for National assets; and advises on national-level cybersecurity policy and guidance. This request would allow US-CERT Operations to increase its analytic staff and support.

**Justification**

US-CERT Operations will increase its analytic capability, allowing it to fully utilize NCPS Block 3.0 and NCPS Block 2.2. Additionally, US-CERT would begin to staff DHS’s site at Corry Station in Pensacola, Florida.

The increasing volume and sophistication of cyber exploits increases the need for secure implementation of technology, coordinated incident response, and rapid recovery of critical functions. Moreover, with the implementation of NCPS Block 3.0, the volume of intrusion and malware information will increase significantly, and US-CERT’s analytic capacity must increase commensurately to ensure that new threats are identified and that signatures are added to NCPS. The increased analytic capability will help generate, implement, and monitor an array of countermeasures used by Block 3.0.

In 2013, US-CERT will begin staffing DHS’s site at Corry Station in Pensacola, Florida. This site will use a configuration that largely mirrors the capabilities of the main facility in the DC Metro area. The Corry Station facility is designed as a fully functional US-CERT facility with all network connectivity

and resources that are available at the Glebe Road facility. The facility will be an operational 24x7 site, co-located on a DOD installation in a DOD structure that currently conducts cybersecurity analyst training, with unclassified and classified space.

The facility is specifically designed to accommodate US-CERT analytical staff, malware lab capabilities, software and hardware testing labs, video conferencing ability, 24x7 help desk support, security operations center and network operations center support personnel. These capabilities and personnel will be co-located with the National Cybersecurity and Communications Integration Center (NCCIC) and NSD 24x7 network administration support personnel, and the National Coordinating Center radio room and space.

Building DHS staff at Corry Station will meet critical continuity of operations objectives, facilitate continued monitoring of the Federal networks, provide expanded capability to analyze malware, and support cross-sector information sharing in the event of a major disaster affecting US-CERT's operations based in the Washington, D.C. area.

### **Impact on Performance**

As US-CERT's protection and response responsibilities continue to grow, it must address the increasingly complex requirements necessary to build and enable the capabilities to respond, mitigate, and prevent malicious cyber activities. US-CERT's situational awareness across the cyber landscape must increase to adapt to the increasing new threats and vulnerabilities. With its current capabilities, US-CERT monitors a small proportion of the network traffic within the Federal Executive Branch and has limited visibility on the cyber health of the critical infrastructure. NCPS's enhancements and the integration of those technological enhancements into a coherent and integrated cybersecurity operation are vital to handling the increasingly large volume of network traffic US-CERT will be required to monitor and analyze.

Currently, US-CERT is not sufficiently staffed to process all this critical network traffic or to expand its incident response and technical support requirements. US-CERT's increased analytic capability will allow its analysts to process up to 31 percent more security data and incident alerts than at present, enhance training and professional development of its analytic workforce and expand its technical mentoring program, and increase the Federal presence on US-CERT's 24x7 operations floor by 23 FTP. The increase also would allow US-CERT to provide support for partners and information sharing, including MS-ISAC, and for the support of additional data and volume sources from CyberScope and the National Cyber Security Service pilot (DIB - Defense Industrial Base pilot).

**Department of Homeland Security  
National Protection & Programs Directorate  
Infrastructure Protection and Information Security  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 4:** Support to the Multi-State Information Sharing and Analysis Center  
PPA: Critical Infrastructure Cyber Protection and Awareness  
Program Increase: Positions 0, FTE 0, Dollars \$4,891

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	1,607
Program Increase							-	-	4,891
<b>Total Request</b>	-	-	<b>2,480</b>	-	-	<b>1,607</b>	-	-	<b>6,498</b>

**Description of Item**

MS-ISAC is a collaborative State, local, territorial, and tribal (SLTT) government-focused cybersecurity organization that significantly enhances SLTT governments' ability to prevent, protect against, respond to, and recover from cyber attacks and compromises.

**Justification**

MS-ISAC provides a centralized forum for information sharing between the Federal Government and SLTT governments through a number of crucial services. MS-ISAC provides the opportunity to analyze information and correlation across its SLTT members, which then can be aggregated efficiently and shared with US-CERT, NCCIC, and their public and private sector partners without requiring Federal personnel resources. It will use a consolidation of services for 25 States, including hosting a 24x7x365 cybersecurity operations center, developing and rapidly distributing cybersecurity advisories and bulletins, and directly responding to and assisting MS-ISAC members with response to cyber incidents.

**Impact on Performance**

Additional funding for MS-ISAC will increase MSS to the planned additional five States. Additionally, it will ensure that the data, tools, and monitoring used for SLTT government networks are conducted similarly to what is deployed for Federal networks. US-CERT and the NCCIC will directly benefit from the centralized SLTT government information sharing mechanism.

**Department of Homeland Security  
National Protection & Programs Directorate

**Description of Item**

The Cybersecurity Evaluation Program conducts voluntary cyber security assessments across all 18 critical infrastructure and key resources sectors. It provides critical infrastructure and key resources sector participants with a portfolio of assessment tools, techniques, and analytics, ranging from those that can be self-applied to those that require expert facilitation or mentoring outreach and furthermore provides critical infrastructure and key resources participants and other policy stakeholders with regionally-placed liaison support, through its Cyber Security Advisor initiative.

Additional funding will allow for an additional 2 FTP/1 FTE for the Cybersecurity Evaluation Program’s Cyber Security Advisor (CSA) activity.

**Justification**

The CSA program represents a hands-on approach toward resilience of cyber CIKR throughout the Nation. The CSA program creates immediate and sustained assistance to State, local, and private sector efforts, bolstering the cybersecurity preparedness, risk mitigation, and incident response capabilities.

**Impact on Performance**

With the additional personnel, the Cybersecurity Evaluation Program will provide expanded and enhanced services to its CIKR partners through the CSA program, allowing DHS to continue to meet its requirements for the Nationwide Cyber Security Review (NCSR).

**Department of Homeland Security  
National Protection & Programs Directorate  
Infrastructure Protection and Information Security  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 6:** Critical Infrastructure Warning Information Network (CWIN)  
PPA: Programs to Study & Enhance Telecommunications  
Program Increase: Positions 3, FTE 3, Dollars \$6,650

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							3	3	6,650
<b>Total Request</b>	-	-	-	-	-	-	<b>3</b>	<b>3</b>	<b>6,650</b>

**Description of Item**

The Critical Infrastructure Warning and Information Network (CWIN) is a contingency network with dedicated circuits and “thin” workstations, connecting DHS with key organizations responsible for restoring the packet-switched network (PSN) and the Internet if they are disrupted by a cyber attack. CWIN supports these priorities by providing protected voice and data between DHS and infrastructure partners to enable secure communication during significant incidents when the PSN and Internet are disrupted. CWIN provides voice and data connectivity via VoIP phones and data using thin client architecture for enhanced security. CWIN supports 160 client installations in Federal Departments and Agencies, all 50 States and the District of Columbia, and selected private sector owners and operators. CWIN is the only system that can provide out-of-band connectivity for DHS and its stakeholders.

**Justification**

CWIN remains a critical contingency capability for several DHS operations centers, including US-CERT and the National Infrastructure Coordination Center. Cyber Storm III found that a cyber attack could result in communications nodes and software patches no longer being trustworthy. This exercise confirmed the need for Government to have a mechanism to communicate trusted, reliable information to its critical infrastructure partners. CWIN provides a resilient means of communications between DHS, other government agencies, and critical private sector entities, particularly in the telecommunications, information technology, and electric sectors. This capability would enable the rapid restoration of normal communications if the Internet and PSN were disrupted by a cyber attack.

**Impact on Performance**

CWIN provides 24x7x365 voice and data paths to 160 client installations in Federal Departments and Agencies, all 50 States and the District of Columbia, and selected private sector owners and operators.

This capability would allow DHS to communicate with other government agencies and critical private sector entities after a disruption to the Internet and PSN, facilitating the restoration of critical services to the Nation.

**Department of Homeland Security  
National Protection & Programs Directorate  
Infrastructure Protection and Information Security  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 1:** Reduction to Cybersecurity Education National Initiative  
PPA: Global Cybersecurity Management  
Program Decrease: Positions 0, FTE 0, Dollars \$(2,010)

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							8	8	14,878
Program Decrease							-	-	(2,010)
<b>Total Request</b>	-	-	-	<b>8</b>	<b>8</b>	<b>14,876</b>	<b>8</b>	<b>8</b>	<b>12,868</b>

**Description of Item**

Cybersecurity Education assists in the implementation of the National Initiative for Cybersecurity Education (NICE) by leading and coordinating efforts to improve the Nation’s cybersecurity education posture to ensure a robust, competent cybersecurity workforce. It also focuses on relationship building among public and private cybersecurity institutions with regard to education and workforce development, including the development, implementation, and promotion of nationwide standards to ensure consistent competency levels.

Cybersecurity Education will reduce support to three of NICE’s efforts: the National Institute for Cybersecurity Studies (NICS); the Cybersecurity Training and Career Roadmap; and the Individual Competency & Tracking System.

NICS is a web-based application designed to make cybersecurity education and training more accessible and enhance cybersecurity awareness, formal education and training, and career pursuit. The Cybersecurity Training and Career Roadmap tracks cyber-specific knowledge, skills, and abilities to relevant education and training opportunities. The Individual Competency and Tracking System will define the Federal Government’s cybersecurity workforce through personnel inventories.

This program change makes resources available for other cybersecurity priorities.

**Justification**

Funding made available by this reduction will serve to support higher-priority cybersecurity efforts, including EINSTEIN 3 and US-CERT.

## **Impact on Performance**

This program reduction will defer the full assessment of the national cybersecurity workforce by two years. The initial features of the NICS portal, including the ability to disseminate the specialty area framework that describes to the national audience, will not be available until FY 2015. Funding made available by this reduction will serve to support higher-priority cybersecurity efforts.

**Department of Homeland Security

	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							107	86	24,177
Program Decrease							-	-	(2,000)
<b>Total Request</b>	<b>69</b>	<b>54</b>	<b>19,812</b>	<b>76</b>	<b>55</b>	<b>22,732</b>	<b>107</b>	<b>86</b>	<b>22,177</b>

**Description of Item**

This project change represents a \$2.0 million reduction to the overall Sector Specific Agency Management Project to ensure the highest priority capabilities are fully funded.

**Justification**

This reduction will be taken from a lower priority initiative that comprise work with the Chemical, Commercial Facilities, Critical Manufacturing, Dams, Nuclear, and Emergency Services sectors, and the Interagency Security Committee. For example, training will shift from in-person training to less expensive distance-learning vehicles where appropriate, more partner meetings will be held via videoconferencing and lower priority initiatives will be cancelled

**Impact on Performance**

Funding made available through this reduction will serve to increase performance in other Departmental priorities. Lower priority initiatives will be cancelled and efficiencies will be realized through the use of distance learning vehicles for training and the use of videoconferencing for partner meetings.

**Department of Homeland Security  
National Protection & Programs Directorate  
Infrastructure Protection and Information Security  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 3:** Incident Planning and Exercises  
PPA: Infrastructure Analysis and Planning  
Program Decrease: Positions 0, FTE 0, Dollars \$(7,814)

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	7,814
Program Decrease							-	-	(7,814)
<b>Total Request</b>	<b>18</b>	<b>18</b>	<b>12,612</b>	<b>16</b>	<b>16</b>	<b>10,006</b>	-	-	-

**Description of Item**

No funding is requested for the Incident Planning project or contract spending in FY 2013 in order to fund higher priority efforts. The personnel in billets associated with the Incident Planning and Exercises (IPE) project will be transferred to other Infrastructure Protection (IP) programs.

**Justification**

The budget eliminates the IPE program as a discrete project in order to provide additional funding for priority efforts and transfers the Federal staff to other IP projects where the activities performed under IPE will continue to operate. The reduction will eliminate contract support for this effort, but the IP operations will not be affected by this change.

This reduction is expected to have a limited impact on IP and its stakeholders. Federal FTEs and salary and benefit dollars will be transferred to other IP projects where the activities performed under IPE will continue to operate.

**Department of Homeland Security  
National Protection & Programs Directorate  
Infrastructure Protection and Information Security  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 4:** Protective Security Advisors Project  
PPA: Regional Field Operations  
Program Decrease: Positions 0, FTE 0, Dollars \$(346)

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							153	140	56,498
Program Decrease							-	-	(346)
<b>Total Request</b>	<b>157</b>	<b>137</b>	<b>64,211</b>	<b>165</b>	<b>152</b>	<b>57,367</b>	<b>153</b>	<b>140</b>	<b>56,152</b>

**Description of Item**

The Protective Security Advisor (PSA) Project provides comprehensive critical infrastructure protection capacity. PSAs deploy strategically across the United States to provide State and local communities with IP risk-reduction efforts and support response to all hazardous incidents, providing expertise on reconstituting critical infrastructure and surge capabilities to more effectively support threat-driven actions. They serve as the Department’s onsite critical infrastructure and vulnerability assessment specialists, while giving a local perspective to—and supporting the development of—the national risk picture by identifying, assessing, monitoring, and minimizing the risk to critical infrastructure at the State, local, and regional levels.

PSAs conduct Enhanced Critical Infrastructure Protection security surveys at critical infrastructure facilities to assess overall security postures and track the implementation of new or improved protective measures. They inform and educate facility owners and operators on the criticality of the facilities and related threats from terrorism, while forging strong relationships among Level 1 and Level 2 facility owners and operators; DHS; and Federal, State, and local law enforcement. They provide infrastructure security and resiliency expertise to government officials and their private sector counterparts who are responsible for security at mass gatherings, National Special Security Events, and high-level special events.

**Justification**

This reduction will be applied to lower priority geospatial analyst contract support. The program will reduce the number of geospatial analyst contractors by two. The workload of these two contractors will be absorbed by the remaining Federal staff and contract support in order to fund higher priority capabilities.

## **Impact on Performance**

Funding made available through this reduction will serve to increase performance in key Departmental priorities. The PSA project will still meet the most critical (Level 1 and Level 2) owners' and operators' requirements to receive recurring and ad hoc GIS materials, compile various types of geospatial information into map and data products, and analyze geospatial data from accumulated sources to respond to diverse questions in support of NSSEs and other events, incidents, and vulnerability reduction/resilience.

**Department of Homeland Security  
National Protection & Programs Directorate  
Infrastructure Protection and Information Security  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 5:** Defer Investment in Critical Infrastructure Technology and Analysis Tools  
PPA: Sector Management and Governance  
Program Decrease: Positions 0, FTE 0, Dollars \$(2,573)

Funding Profile

	FY 2011 Actual Obligations			FY 2012 Enacted Budget Authority			FY 2013 Requested Budget Authority		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							194	167	67,132
Program Decrease							-	-	(2,573)
<b>Total Request</b>	<b>204</b>	<b>174</b>	<b>82,214</b>	<b>170</b>	<b>143</b>	<b>74,219</b>	<b>194</b>	<b>167</b>	<b>64,559</b>

**Description of Item**

This program change represents a \$2.573 million reduction in non-personnel mission support funds to ensure the highest priority capabilities are fully funded to achieve core missions. The Critical Infrastructure Technology and Architecture (CITA) project’s development of a services-based architecture to facilitate interoperability and information sharing would be delayed without compromising the project’s primary mission. Additionally, in-person training for CI protection planning, Automated Critical Asset Management System (ACAMS) system use, and PCII understanding and awareness would be reduced or shifted to a distance education vehicle without a substantial impact on the quality of the training.

**Justification**

This reduction will be taken from a lower priority initiative that comprises development of IT architecture and in-person training. The impact will move development to future budget years.

**Impact on Performance (Relationship of Decrease to Strategic Goals)**

The reduction in development and training costs would enable CITA to deliver products and services to internal and external partners without a substantial impact on training or system development. Development efforts for capability enhancements would be reduced, and the focus would shift to sustainment or O&M of ACAMS IT systems. In-person training for CI protection planning, ACAMS system use, and PCII understanding and awareness would shift to distance learning vehicles.

**Department of Homeland Security  
National Protection & Programs Directorate

<b>Total Request</b>	-	-	-	<b>14</b>	<b>14</b>	<b>4,500</b>	<b>14</b>	<b>14</b>	<b>3,996</b>

**Description of Item**

The Cybersecurity Coordination program integrates information from the six Federal cybersecurity centers to provide a fused view of cyber activity across the intelligence, defense, civil, and law enforcement/counterintelligence domains. The program supports operational activities to facilitate integration and activities at the Federal centers, an information system for online collaboration, and information technology support and enterprise capability for the centers. Cybersecurity Coordination also supports an increased number of private sector partners present in the NCCIC environment.

Cybersecurity Coordination will continue to strive to maximize support and information sharing with its partners.

**Justification**

Funding made available by this decrease will serve to support key cybersecurity priorities in FY 2013.

**Impact on Performance**

This minor reduction will have a minimal effect on performance due to other information sharing and coordination methods.

**Department of Homeland Security  
National Protection & Programs Directorate  
Infrastructure Protection and Information Security  
Justification of Program Changes**  
(Dollars in Thousands)

<b>Total Request</b>	-	-	<b>20,986</b>	<b>2</b>	<b>1</b>	<b>25,253</b>	<b>2</b>	<b>2</b>	<b>20,000</b>

**Description of Item**

The Next Generation Networks (NGN) Priority Services program’s goal is to ensure National Security/Emergency Preparedness (NS/EP) telecommunications during an emergency as commercial telecommunications carriers modernize their networks. NS/EP communications currently are provided through Priority Telecommunications Service (PTS) services. However, commercial telecommunications networks are modernizing from the circuit-switched infrastructure upon which PTS services are based. The Next Generation Networks program is working with major commercial telecommunications carriers as they make the transition to Internet Protocol (IP)-based infrastructures to deploy features enabling (NS/EP) priority service. The NGN Priority Services program will ultimately deliver priority voice, video, and data communication services.

In FY 2013, the NGN Priority Services program will continue implementation of NS/EP priority voice service capabilities for the core in AT&T, Verizon Business, and Sprint networks as the carriers upgrade to IP-based infrastructures. In addition, the program will conduct planning that will support providing priority voice services for wireless users.

**Justification**

The reduction in funds will help the Department support high priority cybersecurity initiatives

**Impact on Performance**

The implementation of NGN Priority Services capability for the core networks will be delayed by one year due to information security contracts being rephrased to accommodate the decreased funding levels.

## V. Exhibits and Other Supporting Material

### A. Justification of Proposed Legislative Language

**For necessary expenses for infrastructure protection and information security programs and activities, as authorized by title II of the Homeland Security Act of 2002 (6 U.S.C. 121 et seq.), [\$888,243,000] \$1,166,633,000, of which [\$200,000,000 shall remain available until September 30, 2013: Provided, That the Under Secretary for the National Protection and Programs Directorate shall submit a plan for expenditure for the National Cyber Security Division and the Office of Infrastructure Protection, to the Committees on Appropriations of the Senate and the House of Representatives, not later than 90 days after the date of enactment of this Act] \$402,000,000, to remain available until September 30, 2014, shall be available for Network Security Deployment and strengthening cybersecurity of federal executive branch civilian agencies: Provided, That, notwithstanding section 503 of this Act or section 1532 of title 31, United States Code, funds made available for the purpose of strengthening cybersecurity of federal executive branch civilian agencies may be transferred within the Department or to other Federal agencies for the same purpose as determined by the Secretary: Provided further, That no transfer described in the previous proviso shall occur until 15 days after the Committees on Appropriations of the Senate and the House of Representatives are notified of such transfer. (Department of Homeland Security Appropriations Act, 2012.)**

The proposed legislative language is necessary to most effectively improve the cybersecurity of Federal executive branch civilian agencies. This language is necessary to make these transfers because section 503 of this Act and section 1532 of title 31, United States Code, restricts the circumstances under which agencies may transfer funds between appropriation accounts. This language will ensure that Congress receives notification of transfers made for the purposes of cybersecurity improvements while giving the Department the flexibility to identify agencies with the highest need and transfer funds in an expedient manner.

The funding that will be available to transfer will be used to speed the maturity of continuous monitoring capabilities and allow Federal agencies to implement high-priority cybersecurity defensive capabilities, using a common assessment of cybersecurity risk to prioritize improvements and thus most effectively improve the Federal cybersecurity posture. Where appropriate, DHS will use strategic sourcing initiatives to leverage the buying power of the Federal Government to address these issues. However, Departments and Agencies are at varying stages in securing their own networks from cyber threats and tailored approaches for each agency may be required. The funding will directly support Federal Executive Branch civilian Departments and Agencies in implementing capabilities that will improve their cybersecurity posture in accordance with the Federal Information Security Management Act (FISMA).

In Office of Management and Budget (OMB) Memorandum 10-28, DHS is designated as the “primary responsibility within the Executive Branch for the operational aspects of Federal agency cybersecurity with respect to the Federal information systems that fall within the Federal Information Security Management Act (FISMA).”

## B. FY 2012 to FY 2013 Budget Change

### Office of Emergency Communications Mission Statement

OEC supports and promotes the ability of emergency response providers and Federal officials to continue to communicate in the event of natural disasters, acts of terrorism, or other man-made disasters, and to ensure, accelerate, and attain interoperable emergency communications nationwide.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	5,634	6,920	7,261	341
11.3 Other than full-time permanent	-	138	145	7
11.5 Other personnel compensation	132	231	242	11
12.1 Benefits	1,625	1,937	2,033	96
<b>Total, Salaries &amp; Benefits</b>	<b>7,391</b>	<b>9,226</b>	<b>9,681</b>	<b>455</b>

FY 2013 represents an increase of \$455,000 for salaries and benefits from FY 2012 to cover pay inflation of \$35,000 and salaries and benefits of \$420,000 for Balanced Workforce conversions of three FTE.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>21.0 Travel</b>	<b>\$997</b>	<b>\$1,437</b>	<b>\$1,329</b>	<b>-\$108</b>

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. FY 2013 represents a decrease of \$108,000 from FY 2012 due to DHS general TDY reductions.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>23.1 GSA rent</b>	<b>0</b>	<b>\$1,265</b>	<b>\$1,282</b>	<b>\$17</b>

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent-related services. FY 2013 represents an increase of \$17,000 to cover additional space requirements and GSA rent inflation.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>23.2 Other rent</b>	<b>\$74</b>	<b>0</b>	<b>\$24</b>	<b>\$24</b>

Other rent includes all payments to a non-Federal source for rental space, land, and structures. FY 2013 represents an increase of \$24,000 from FY 2012.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.1 Advisory and assistance services</b>	<b>\$18,299</b>	<b>\$19,222</b>	<b>\$14,028</b>	<b>-\$5,194</b>

Advisory and assistance services include services acquired by contract from non-Federal sources as well as from other units within the Federal Government. FY 2013 represents a decrease of \$5,194,000 from FY 2012 due to Balanced Workforce conversions and reductions directed by OFPP.

**Programs to Study & Enhance Telecommunications Mission Statement**

Programs to Study and Enhance Telecommunications develops models and conducts technical analyses of public communications infrastructures and equipment, and identifies vulnerabilities in new communications technologies due to the Telecommunication Electromagnetic Disruptive Effects. It also works with the international communications industry standards organizations to ensure that evolving commercial standards address the technical requirements of national security and emergency communications.

**Summary Justification and Explanation of Changes**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	2,756	2,795	3,341	546
11.3 Other than full-time permanent	-	56	67	11
11.5 Other personnel compensation	63	93	111	18
12.1 Benefits	718	783	936	153
<b>Total, Salaries &amp; Benefits</b>	<b>3,537</b>	<b>3,727</b>	<b>4,455</b>	<b>728</b>

FY 2013 represents an increase of \$728,000 for salaries and benefits from FY 2012 to cover pay inflation of \$14,000 and salaries and benefits of \$714,000 for two Balanced Workforce conversion and three new FTEs for CWIN.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
23.3 Communications, utilities, and misc. charges	0	0	\$223	\$223

Communications, utilities, and miscellaneous charges include all payments for rental or lease of IT equipment and services, postal services and rentals, and utility services. FY 2013 includes an increase of \$223,000 to maintain and operate the CWIN system.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.1 Advisory and assistance services	\$10,362	\$8,653	\$7,861	-\$792

Advisory and assistance services include services acquired by contract from non-Federal sources as well as from other units within the Federal Government. FY 2013 represents a decrease of \$792,000 from FY 2012. This decrease reflects reduced contract costs due to Balanced Workforce conversions and OFPP directed purchasing savings.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.3 Purchases from Gov't accts.	\$1,445	\$894	\$3,642	\$2,748

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. FY 2013 represents an increase of \$2,748,000 over FY 2012 to maintain and operate the CWIN system.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.7 Operation and maintenance of equipment	0	0	\$3,246	\$3,246

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. FY 2013 represents an increase of \$3,246,000 over FY 2012 to maintain and operate the CWIN system.

**Priority Telecommunications Services Mission Statement**

Priority Telecommunications Service is specially designed telecommunications services to support the national security and emergency preparedness user community during natural or man-made disasters when conventional communications services are ineffective. In addition to enhancing critical infrastructure protection, these telecommunication services are used to coordinate response and recovery efforts and, in severe conditions, to assist with continuity activities.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	6,471	3,940	5,005	1,065
11.3 Other than full-time permanent	82	79	100	21
11.5 Other personnel compensation	179	131	166	35
12.1 Benefits	1,625	1,103	1,401	298
<b>Total, Salaries &amp; Benefits</b>	<b>8,357</b>	<b>5,253</b>	<b>6,672</b>	<b>1,419</b>

FY 2013 represents an increase of \$1,419,000 for salaries and benefits from FY 2012 to cover pay inflation of \$19,000 and salaries and benefits of \$1,400,000 for two Balanced Workforce conversions and eight additional contractor conversions.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>21.0 Travel</b>	<b>\$109</b>	<b>\$186</b>	<b>\$158</b>	<b>-\$28</b>

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. FY 2013 represents a \$28,000 decrease from FY 2012.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>23.1 GSA rent</b>	<b>\$25</b>	<b>\$1,676</b>	<b>\$1,666</b>	<b>-\$10</b>

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent-related services. FY 2013 represents a decrease of \$10,000 from FY 2012.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>23.2 Other rent</b>	<b>\$9</b>	<b>\$34</b>	<b>\$90</b>	<b>\$56</b>

Other rent includes all payments to a non-Federal source for rental space, land, and structures. FY 2013 represents an increase of \$56,000 over FY 2012 due to inflation and changing space requirements.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>23.3 Communications, utilities, and misc. charges</b>	<b>\$56</b>	<b>\$9,984</b>	<b>\$9,518</b>	<b>-\$466</b>

Communications, utilities, and miscellaneous charges include all payments for rental or lease of IT equipment and services, postal services and rentals, and utility services. FY 2013 represents a \$466,000 decrease from FY 2012.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
<b>25.1 Advisory and assistance services</b>	<b>\$26,972</b>	<b>\$19,071</b>	<b>\$15,452</b>	<b>-\$3,619</b>

Advisory and assistance services include services acquired by contract from non-Federal sources as well as from other units within the Federal Government. FY 2013 represents a \$3,619,000 decrease in costs from FY 2012.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.3 Purchases from Gov't accts.	\$21,401	\$3,566	\$3,426	-\$140

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. FY 2013 represents a \$140,000 decrease from FY 2012.

**US-CERT Operations Mission Statement**

US-CERT Operations is the operational arm of the National Cyber Security Division (NCSD). Its primary functions include analyzing and reducing cyber threats and vulnerabilities, disseminating cyber threat warning information to public and private sector partners, coordinating with government and industry partners to achieve shared cyber situational awareness of the Nation's cyber critical infrastructure, providing response and recovery support for national assets, and advising senior leadership on national-level cybersecurity policy and guidance.

**Summary Justification and Explanation of Changes**

Object Classes	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	-	15,042	16,449	1,407
11.3 Other than full-time permanent	-	301	329	28

**Global Cybersecurity Management Mission Statement**

Global Cyber Security Management develops and promulgates sound practices for software developers, IT security professionals, and other CIKR stakeholders. It also addresses the need to build a skilled cyber workforce for today and tomorrow and provides a set of comprehensive resources that can be used to appropriately manage supply chain risk across the lifecycle of networks, systems, and components.

**Cybersecurity Coordination Mission Statement**

The Cybersecurity Coordination program integrates information from the six Federal cybersecurity centers to provide a fused view of cyber activity across the intelligence, defense, civil, and law enforcement/counterintelligence domains. The program supports operational activities to facilitate integration and activities at the Federal centers, an information system for online collaboration, and IT support and enterprise capability for the centers. Cybersecurity Coordination also supports an increased number of private sector partners present in the NCCIC environment.

**Infrastructure Analysis and Planning Mission Statement**

Infrastructure Analysis and Planning includes projects and activities that support the identification, prioritization, and protection of the Nation's CIKR, as well as the assessment of CIKR vulnerabilities, consequences, and risks. The program collects vulnerability assessments and consequence information required to produce comprehensive asset and system risk assessments. These CIKR protection assessments enable the analysis of interdependencies and cascading effects. The program provides strategic coordination, capabilities analysis, and information sharing to public and private stakeholders, including local law enforcement agencies, to combat the improvised explosive device threat to the Homeland.

**Summary Justification and Explanation of Changes**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	8,175	8,714	8,374	(340)
11.3 Other than full-time permanent	6	174	167	(7)
11.5 Other personnel compensation	392	290	278	(12)
12.1 Benefits	2,387	2,440	2,337	(103)
<b>Total, Salaries &amp; Benefits</b>	<b>10,960</b>	<b>11,618</b>	<b>11,156</b>	<b>(462)</b>

FY 2013 includes \$11,156,000 for salaries and benefits for 85 FTE, which represents a decrease of \$462,000 from FY 2012.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
21.0 Travel	\$558	\$600	0	-\$600

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. FY 2013 reflects a \$600,000 decrease from the FY 2012.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.1 Advisory and assistance services	\$17,305	\$22,000	\$17,106	-\$4,894

Advisory and assistance services include services acquired by contract from non-Federal sources as well as from other units within the Federal Government. FY 2013 represents a \$4,894,000 decrease from FY 2012 due to the Balanced Workforce initiative.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.3 Purchases from Gov't accts.	\$46,321	\$34,875	\$27,222	-\$7,653

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. FY 2013 represents a decrease of \$7,653,000 from FY 2012.

**Sector Management and Governance Mission Statement**

The funding includes projects and activities that increase the ability of all levels of government and private sector partners to assess risks, coordinate programs and processes, and execute risk mitigation programs and activities. They support public awareness efforts, facilitate the sharing of CIKR protection-related best practices and lessons learned, and enable infrastructure protection planning, readiness, and incident management.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	17,625	14,228	16,721	2,493
11.3 Other than full-time permanent	353	285	334	49
11.5 Other personnel compensation	588	474	556	82
12.1 Benefits	4,935	3,984	4,670	686
<b>Total, Salaries &amp; Benefits</b>	<b>23,501</b>	<b>18,971</b>	<b>22,281</b>	<b>3,310</b>

FY 2013 includes \$22,280,000 for salaries and benefits for 167 FTE, which represents an increase of \$3,310,000 from FY 2012 due to the Balanced Workforce initiative, FY 2013 Pay Inflation, and the IPIS transfer to centralize business support.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
23.1 GSA rent	\$5,490	\$5,645	\$5,854	\$209

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. FY 2013 reflects a \$209,000 increase over FY 2012.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.1 Advisory and assistance services	\$27,882	\$18,000	\$11,018	-\$6,982

Advisory and assistance services includes services acquired by contract from non-Federal sources as well as from other units within the Federal Government. FY 2013 represents a \$6,982,000 decrease due to the Balanced Workforce initiative.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.3 Purchases from Gov't accts.	\$22,611	\$27,426	\$23,802	-\$3,624

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. FY 2013 represents a decrease of \$3,624,000 from FY 2012.

**Regional Field Operations Mission Statement**

Funding for program areas includes voluntary projects and activities that enable security partners to identify and mitigate vulnerabilities; implement protective measures and report on risk mitigation activities; and increase preparedness and resilience for facilities, systems, and surrounding communities. These activities foster information sharing and coordination between individual sector governance structures and facilitate the development of critical infrastructure partner governance and coordination structures.

### Summary Justification and Explanation of Changes

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	16,146	15,716	14,563	(1,153)
11.3 Other than full-time permanent	323	314	290	(24)
11.5 Other personnel compensation	538	524	484	(40)

**Infrastructure Security Compliance Mission Statement**

The Infrastructure Security Compliance Project develops regulations, monitors regulatory compliance, conducts inspections, and performs outreach and communications activities. The two primary initiatives are the development and implementation of the Chemical Facility Anti-Terrorism Standards program and the development and implementation of the Ammonium Nitrate Security Program.

**Summary Justification and Explanation of Changes**

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
11.1 Total FTE & personnel compensation	25,071	24,724	24,800	76
11.3 Other than full-time permanent	501	494	494	-
11.5 Other personnel compensation	836	824	824	-
12.1 Benefits	7,020	6,923	6,923	-
<b>Total, Salaries &amp; Benefits</b>	<b>33,428</b>	<b>32,965</b>	<b>33,041</b>	<b>76</b>

FY 2013 includes \$33,041,000 for salaries and benefits for 242 FTE, which represents an increase of \$76,000 from FY 2012 due to pay inflation.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
21.0 Travel	\$1,779	\$1,700	\$801	-\$899

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. FY 2013 reflects an \$899,000 decrease from FY 2012.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.1 Advisory and assistance services	\$23,825	\$7,800	\$3,376	-\$4,424

Advisory and assistance services include services acquired by contract from non-Federal sources as well as from other units within the Federal Government. FY 2013 represents a \$4,424,000 decrease from FY 2012.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.3 Purchases from Gov't accts.	\$32,765	\$46,800	\$33,900	-\$12,900

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. FY 2013 represents a decrease of \$12,900,000 from FY 2012.

	FY 2011 Actual Obligations	FY 2012 Enacted Budget Authority	FY 2013 Requested Budget Authority	FY 2012 to FY 2013 Change
25.7 Operation and maintenance of equipment	\$3,793	\$3,745	\$3,088	-\$657

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. FY 2013 represents a \$657,000 decrease from FY 2012.

## **K. DHS Balanced Workforce Strategy**

In order to establish a high-performing workforce comprised of a strong internal core of Federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience, and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment, the Department will realign contractor and/or Federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with Federal employees to better realize the full potential of our total workforce – both contracted and Federal. A strong internal core of Federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for Federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2014 budget.

NPPD requests \$4.668 million in IPIS salaries and benefits dollars and an offset of \$5.016 million in program/contract dollars for 35 FTP/35 FTE as part of the FY 2013 DHS Balanced Workforce Strategy.

### **FY 2013 DHS Balanced Workforce Strategy**

- Amount of salaries and benefits funding needed to hire Federal employees:
  - o \$4.668 million for 35 FTP/35 FTE.
  
- Amount of program/contract funding that will be terminated:
  - o \$5.016 million program/contract cost. There is a projected \$0.348 million cost savings by hiring Federal employees and converting contractors to FTPs/FTEs.
  
- Implementation timeline:
  - o NPPD's FY 2013 Balanced Workforce Strategy will be implemented in FY 2013.
  
  - o Contractor functions will be reduced and positions will be converted in accordance with the Department's Balanced Workforce Initiative with a particular focus on contractors who are performing "nearly government inherent" responsibilities. Contractor reductions will be absorbed by the existing Federal Government employees and new FTE converted positions.

### **Annualization of FY 2012 Base DHS Balanced Workforce Strategy**

- No annualizations will be funded using existing salaries and benefits resources.

##### **A. Mission Statement for Salaries and Expenses:**

The Fiscal Year (FY) 2013 President's Budget proposes the transfer of the United States Visitor and Immigrant Status Indicator Technology (US-VISIT) program to Customs and Border Protection (CBP) and Immigration and Customs Enforcement (ICE). Please see the associated sections of the FY 2013 Congressional Justification (CJ) within CBP and ICE's Salaries and Expenses CJs for the specific details of the transfer. Additionally, an initial transition plan laying out the proposed transfer and merging of US-VISIT accompanies the CBP CJ.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **National Protection & Programs Directorate Federal Protective Service**

### **I. Appropriation Overview**

#### **A. Mission Statement:**

The Federal Protective Service (FPS) is responsible for the protection of the 1.4 million daily tenants and visitors in the facilities, on the grounds, and on property owned, occupied, or secured by the Federal Government, pursuant to the Secretary's authority in accordance with 40 U.S.C. 1315.

FPS executes this mission by providing law enforcement services; security management services, which includes operations and oversight of approximately 14,000 contract Protective Security Officers (PSOs), and security countermeasure services for approximately 9,000 General Services Administration (GSA)-owned,-leased, or -operated facilities located in 11 regions across the country. These services provide a comprehensive risk-based approach to facility protection that allows FPS to prioritize its operations to prevent, detect, assess, respond to, and disrupt criminal and other incidents that endanger the Federal community.

FPS ensures protective and security measures are in accordance with the standards and criteria established by the Interagency Security Committee. This requires business and mission support activities to field a trained force of officers, procure equipment and services for the Federal community, and ensure the collection of basic security, building-specific security, and reimbursable agency-specific security revenues. Additionally, execution of the FPS mission requires significant collaboration with Federal, State, and local law enforcement; intelligence and security communities; and other stakeholder partnerships.

FPS mission requirements comprise three categories; i.e., statutory, supporting, and implied, which provide a conceptual framework for looking at FPS activities.

- Statutory mission requirements are mission essential tasks that FPS is required to perform by law. The Department's statutory mission is to protect Federal facilities and occupants. These requirements include facility security assessments (FSA); countermeasure planning and implementation; emergency response through K-9, HAZMAT, or other necessary enforcement personnel; countermeasure design; criminal investigations; and intelligence and information sharing.
- Supporting mission requirements are tasks that are not required by law but are vital to the accomplishment of the statutory requirements and are essential in carrying out the organization's overall core mission. Supporting requirements include compliance monitoring through post and certification inspections and countermeasure testing and oversight, PSO and in-service law enforcement training, occupant emergency plan development and exercises,

special details/deployments, suitability determinations and adjudication, and mission and business support.
