

relief that is provided reduces the regulatory requirements that apply to registered CPOs and CTAs. The proposed amendments to Rule 4.7 would expand this relief by bringing within the QEP and QEC definitions persons not included in the existing rules. Thus, the proposed amendments, if adopted, would further reduce the regulatory burdens on registered CPOs and CTAs.

SUPPLEMENTARY INFORMATION:

Title: Regulations and Forms Pertaining to the Financial Integrity of the Marketplace (OMB Control No. 3038-0024). This is a request for extension of a currently approved information collection.

Abstract: The commodity futures markets play a vital role in the furthering of global commerce by providing commercial users and speculators with a price discovery mechanism for the commodities traded on such markets and by providing commercial users of the markets with a mechanism for hedging their goods and services against price risks. The Commodity Futures Trading Commission is the independent federal regulatory agency charged with providing various forms of customer protection so that users of the markets can be assured of the financial integrity of the markets and the intermediaries that they employ in their trading activities. Among the financial safeguards the Commission has imposed on commodity brokerages, technically futures commission merchants (FCMs) and introducing brokers (IBs), are minimum capital standards and, for FCMs, a requirement that they segregate and separately account for the funds they receive from their commodity customers. In order to monitor compliance with such financial standards, the Commission has required FCMs and IBs to file financial reports with the Commission and with the self-regulatory organizations (SROs) of

which they are members. (See Commission Rule 1.10, 17 CFR 1.10.)
