DEFENSE HUMAN RESOURCES ACTIVITY
Procurement, Defense-Wide
P-1 Line Item Number 36
Fiscal Year (FY) 2009 Budget Estimates

<u>Dollars in Millions</u>	
FY 2010 Estimate	10.599
FY 2009 Estimate	19.214
FY 2008 Estimate	6.966
FY 2007 Estimate	7.883

Purpose and Scope

The Department of Defense Human Resources Activity (DHRA) is a consolidated Field Activity under the direction and control of the Under Secretary of Defense (Personnel and Readiness) (USD (P&R)) established for the collection and interaction of manpower and personnel data to support Department-wide tracking, analysis, research, studies, and a wide variety of reporting requirements. DHRA provides functional information management, civilian personnel policy support, and civilian personnel administrative services to DoD Components and activities.

The scope of operations is necessarily broad and encompasses all aspects of data collection and utilization of Defense manpower and personnel data records to support DoD-wide analysis, studies, research, and reporting requirements. DHRA is the responsible organization within DoD for the interchange of automated manpower data with other government agencies.

DHRA manages and operates a number of major DoD programs, including the Defense Civilian Personnel Data System (DCPDS). DCPDS is the Department's enterprise civilian human resources information system. It ensures a coherent, standardized, and cost-effective system for the entire Department. DCPDS is built using a commercial off-the-shelf product customized for Federal and Defense requirements. The system is web-enabled and provides flexibility to respond to changes in the Department's civilian human resources (HR) operational requirements.

The Real-Time Automated Personnel Identification System (RAPIDS) program is the Department's enterprise solution for issuing the Uniformed Services Identification and Privilege Cards to all service members, both the Active and Reserve, civilian employees, retired members, eligible family members, and selected contractors. This system is fielded in over 1,200 locations around the world, including not only fixed-sites, but also mobilized Guard and Reserve activities and aboard Navy ships.

RAPIDS provides the means to collect family member information so that eligible family members are appropriately categorized and entered into the Defense Enrollment Eligibility Reporting System (DEERS) and are issued ID cards that correctly reflect their entitlements and privileges. In addition, RAPIDS is the application that issues the Common Access Card (CAC). This means that RAPIDS is not only the infrastructure which provides ID cards and collects family member information, but that RAPIDS is also the Local Registration Authority (LRA) for the issuance of the digital credential necessary to implement the Public Key Infrastructure (PKI) for the Department. The CAC is the DoD solution for interoperable Federal credentials required under Homeland Security Presidential Directive (HSPD-12).

DEFENSE HUMAN RESOURCES ACTIVITY
Procurement, Defense-Wide
P-1 Line Item Number 36
Fiscal Year (FY) 2009 Budget Estimates

Purpose and Scope (Cont'd)

It is necessary to procure and maintain current mission essential items such as computers and telecommunications equipment to effect a high degree of capability in the administration of civilian and military personnel program operations throughout the Department. This includes organizational infrastructure and sustainment of a modern information system.

Justification of Funds

The FY 2009 and FY 2010 requests also support information systems, infrastructure and communications requirements for the Defense Civilian Personnel Data System (DCPDS), and Civilian Personnel Management Service (CPMS) operations. Equipment will support the DoD civilian human resources (HR) community by providing more timely access to information for HR specialists and managers. Current economic analyses have validated the original estimate of \$200 million annual savings after servicing ratio targets are attained. These reductions in costs have already been programmed into DoD Components' budgets along with corresponding personnel reductions. System purchases include equipment such as database servers, network servers, computing infrastructure, system software, and associated peripherals. CPMS operations use procurement funding for major hardware and software purchases in support of the DoD enterprise HR system.

Enhancements in process for DCPDS include integrating employee self-service functionality and incorporating other HR automated system solutions, such as the recent implementation of a corporate data warehousing capability. Funds to begin consolidation of the DCPDS technical architecture to a single site beginning in FY 2009 will support the initial acquisition of hardware and additional infrastructure for a consolidated DCPDS environment, as well as a test environment to support an integrated HR/Payroll prototype. In collaboration with the Program Executive Office (PEO) National Security personnel System (NSPS), CPMS will continue to enhance, test, and deploy the system changes needed for successful NSPS implementation.

The proposed FY 2009 and FY 2010 investment in Automated Data Processing (ADP) equipment supports the RAPIDS program. This includes the acquisition, installation, and maintenance of the DMDC infrastructure, as well as replacing outdated and maintenance-intensive equipment in order to continue to ensure full functionality and security of the system and to implement HSPD-12.

<p>DCPDS is the Department's enterprise civilian human resources (HR) data system; the largest automated HR system in the world. The regionalization of civilian HR services, combined with systems modernization, has reduced resources dedicated to the civilian HR services infrastructure. This has allowed DoD to achieve an improved HR servicing ratio (the number of personnelists per employee served) from 1:66 at program inception to a current ratio of 1:81. Current economic analyses have validated the original estimate of approximately \$200M annual savings based on the combination of full deployment of DCPDS and attainment of the target servicing ratio. These cost reductions are attributable to reduced personnel and facilities costs and the elimination of 10 legacy systems. Benefits from regionalization and modernization are reflected throughout the budgets of DHRA, the Military Departments, Defense Agencies and field activities.</p> <p>Programs for the civilian workforce include minimizing involuntary separations, assisting laid-off workers, maintaining workforce balance, and reducing the costs of DoD's workers and unemployment compensation. DHRA supports the development, issuance and maintenance of uniform DoD-wide civilian personnel policy; provides program guidance and technical interpretation for both appropriated and nonappropriated funded civilian personnel programs (USC Titles 5, 10 and 32); manages DoD's Civilian Assistance and Re-Employment (CARE) program including the Priority Placement Program (PPP); investigates and mediates discrimination complaints; conducts grievance investigations; and oversees the regional restructuring of civilian HR operations and the operation of the enterprise civilian HR information system, DCPDS. These programs are supported by an aggressive data automation program, to include acquiring a communications capability, computing equipment, and an automation software link to standardize these divergent functions. A portion of these funds continue that process.</p>
