

INDIAN LABOR FORCE REPORT

1999

U.S. Department of the Interior

Bureau of Indian Affairs Office of Tribal Services

1999

Labor Market Information

On

On the Indian Labor Force

A National Report

Purpose of the Report

Public Law 102-477, the Indian Employment, Training, and Related Services Demonstration Act of 1992, directs the Bureau of Indian Affairs to publish a report on the population eligible for services that the Secretary provides to Indian people. This report provides the 1999 estimates of tribal service populations and labor market information for the nation's 556 tribes, as determined by representatives of each tribe and as certified as accurate by their tribal leader or designate.

Summary

As documented in this Labor Force Report:

- For 1999, the 556 federally recognized tribes¹ had an aggregated total enrollment of 1,698,483 members. This total represents a three percent increase over the 1,654,433 total that was reported in the previous labor force report of 1997.
- Unemployment, as a percent of the available labor force, increased by 1 percent in 1999 to 43 percent from 42 percent, as reported in 1997.²
- Among the 556 tribes in 1999, the poverty level among employed tribal members increased by three percent to 33 percent of the overall employed total as compared to the 1997 level of 30 percent.³
- The national total for the Indian service population of 1,397,931 represents a three percent decrease of 44,816 members from the 1997 total of 1,442,747 that was documented in 1997 report. This reduction may be attributed in part to a trend of outward, off reservation migration found among the membership of an increasing number of tribes.

¹ In addition to the 556 federally recognized tribes, this Report includes several corporate and "at-large" Alaska tribal entities that were formed as a result of the Alaska Native Claims Settlement Act of 1971.

² For 1999, tribes determined their available labor work force and unemployment percentage by including tribal members whose age was within the range of 16 through 64. For 1997 and earlier reports, the range was 16 through 64 and over 65. By using the 1999 criteria, the 1997 adjusted unemployment percentage was 42% as compared to 43% for the 1999 Report.

³ Health and Human Services' (HHS) 1999 Poverty Guidelines were used to determine tribal poverty estimates.

Coverage

Each tribe⁴ designated a tribal labor force coordinator who used a standardized survey reporting form to collect data and provide estimates on their enrolled members and members from other tribes who lived “on-or-near” the reservation and who were eligible to use the tribe’s BIA funded services. The aggregated total of those eligible to use the services constituted the tribe’s Indian “Service Population.” Excluded from each tribe’s “Service Population” total and other report totals were members who were in 1999, for example, serving in the Armed Forces or attending postsecondary institutions.⁵

General Definitions (from 25 CFR § 20.1)

Indian. *Indian* means any person who is a member of an Indian tribe.⁶

Resident Indian. *Resident Indian* means Indians living on Federal reservations or nearby who are considered part of the tribe’s service population. (Definition extrapolated from 25 CFR § 20.1.)

Indian Tribes. *Indian Tribes* are tribes, bands, nations, rancherias, pueblos, colonies, communities, and Alaska Native groups recognized as eligible for funding and services from the Bureau of Indian Affairs and included in the current list of tribal entities, pursuant to Section 104 of the Act of November 2, 1994 (Pub. L. 103—454; 108 Stat. 4791, 4792).

Near Reservation. *Near Reservation* means those areas or communities adjacent or contiguous to reservation, which are designated by the Commissioner upon recommendation of the local Bureau Superintendent. The recommendation shall be based upon consultation with the tribal governing body of those reservations on the basis of such general criteria. The criteria are:

1. Number of Indian people native to the reservation residing in the area,
2. A written designation by the tribal governing body that members of their tribe and family members who are Indian residing in the area, are socially, culturally, and economically affiliated with the tribe and reservation,
3. Geographic proximity of the area to the reservation, and
4. Administrative feasibility of providing an adequate level of services.⁷

Headings/Terms Used in Tables

Tribal Enrollment. *Tribal Enrollment* means the total number of tribal enrollees who are certified as being tribal members by their tribe’s leader or designate. Pursuant to tribal constitutions, tribal enrollees may live on the reservation or anywhere outside the reservation – for example, in distant towns/cities or in foreign countries.

⁴ In the Region /Tribal section of this report, the Navajo Nation is listed by BIA Agency. Also in the same section, Alaska Native entities are listed individually or grouped by consortium.

⁵ Members were excluded from their tribe’s “service population” if the member had relocated for purposes of direct employment or was incarcerated or confined long-term to a treatment facility.

⁶ Some tribes have constitutions that allow their members to have a blood quantum less than one-fourth.

⁷ For the purposes of this report, “On Reservation” is defined as those Indian who live within the present reservation boundaries and who are eligible for BIA funded services. For Alaska the term “near” reservation includes the entire state, since Alaska Native tribes are typically isolated from each other and are not formed as reservations.

Total Service Population. The *Service Population* total, as shown in the tables of this report, was the tribe's estimate of all American Indians and Alaska Natives, members and non-members, who were living "on-or-near" the tribe's reservation during the 1999 calendar year and who were eligible to use BIA funded services. The aggregated sum of "Age Under 16," "Age 16-64," and "Age 65 & Over" sub-totals of a given tribe equals the tribes "Total Service Population" total. Typically, Indians included in a tribe's Service Population live within a reasonable distance of the reservation from where they can access the tribe's services. Such Indians typically do not live in distant cities, towns or foreign countries.

Not Available for Work. This total estimated the number of individuals who were over the age of 16 and who were included in a tribe's service population, but because of personal circumstances were not able to assume or sustain gainful employment.

Available for Work. This total represented a tribe's 1999 "Total Work Force." The "Available for Work" total is the sum of "Age 16-64" sub-totals minus service population individuals who were "Not Available for Work."

Number Employed. The "Number Employed" total was determined by aggregating a tribe's estimated subtotals of their service population individuals who were either employed by public, private or tribal entities.

Number Not Employed. Subtracting the "Number Employed" from a tribe's service population who were "Available for Work," provided the 1999 total of a tribe's work force that was not employed.

Unemployed as a % of the Labor Force. This percentage was determined by dividing the "Number Not Employed" by the "Total Work Force" (also called "Available for Work" total).

Employed, but Below Poverty Guidelines. Each tribe, using HHS's Poverty Guidelines (applicable for 1999), estimated the number of their employed work force who were below the poverty guideline – for example, for a family unit of two the poverty threshold of combined earned income was \$10,850 and for four the threshold was \$13,650. Additionally, the tables show the percentage of employed below the "Poverty Guidelines." This percentage was derived by dividing the tribe's estimated total "Employed, but below the Poverty Guidelines" by the tribe's "Total" employed.

Table Format

Tribal labor market data is organized in this report into two sections by:

1. National and State Totals and
2. Regional and Tribal Totals.

For tribes with reservation boundaries and service populations are in more than one state, the tribe's labor market totals are proportionately distributed, by tribal population, for each state. Also note that an asterisk "*" following a tribe's name in the "Tribal/Area" section indicates that the reported totals were from the 1997 Report.

Additional Information: Any questions regarding a specific tribe's labor market information can be directed to the tribe's Bureau of Indian Affairs' (BIA) Agency or Area Office. A current BIA Region and Agency directory is available at www.doi.gov/bia/areas/tleader.pdf on the Internet. This report can be found on the Department of the Interior (DOI) web site.

Notes on Self-Governance tribes have been provided by the Office of Self-Governance, Department of the Interior.

Absentee Shawnee Tribe of Oklahoma: Service population totals estimated by the Department of the Interior. It is the Department's position that 1) the Tribe's service population estimate provided by the Tribe is not consistent with the Collier decision and that 2) the Tribe's total resident Indian population is limited to Absentee Shawnee allotted and tribal trust lands. The Absentee Shawnee Tribe strongly disagrees with this interpretation and the estimates.

Cherokee Nation of Oklahoma: Some duplication of data may exist with data submitted by the United Keetowah Band and the Delaware Tribe of Indians.

Citizen Potawatomi Nation: The Tribe's estimates are consistent with the Department's position that the Tribe's total Indian service population is limited to Absentee Shawnee allotted and tribal trust lands.

Muskogee (Creek) Nation: Some duplication of data may exist with data from Alabama-Quassarte Tribal Town, Kialegee Tribal Town, and Thlopthlocco Tribal Town
