

LOCAL ESTIMATES OF RESIDENT INDIAN POPULATION AND LABOR FORCE STATUS
JANUARY 1987

INTRODUCTION

Definitions & Coverage:

For the purposes of this compilation the following definitions (CFR 25 par. 20.1) apply: "Indian" means any person who is a member, or a one-fourth degree or more blood quantum descendant of a member of any Indian tribe. "Indian tribe" means any Indian tribe, band, nation, rancheria, pueblo, colony, or community, including any Alaska Native village or regional/village corporation as defined in, or established pursuant to, the Alaska Native Claims Settlement Act (ANCSA) (85 Stat. 688) which is federally recognized as eligible by the U.S. Government for the special programs and services provided by the Secretary to Indians because of their status as Indians.

The term "resident Indian" means Indians living on Federal reservations or nearby who are considered part of the service population of the Bureau of Indian Affairs. "Nearby" as defined in CFR 25 par. 20.1(r) means those areas or communities adjacent or contiguous to reservations which are designated by the operation head of the Bureau upon recommendation of the local Agency Superintendent, which recommendation shall be based upon consultation with the tribal governing body of those reservations, as locales appropriate for the extension of financial assistance and/or services, on the basis of such general criteria as:

- (1) number of Indian people native to the reservation residing in the area;
- (2) a written designation of the tribal governing body that members of their tribe and family members who are Indian residing in the area, are socially, culturally, and economically affiliated with their tribe and reservation;
- (3) geographical proximity of the area to the reservation; and
- (4) administrative feasibility of providing an adequate level of services to the area.

Special regulations govern eligibility in Alaska and Oklahoma, as defined in CFR 25 par. 20.20. Briefly these conditions indicate that (1) the applicant must be an Indian, except that in the States of Alaska and Oklahoma a one-fourth degree or more Indian or Native blood quantum degree will be an additional eligibility requirement; and (2) the applicant must reside on or near reservation as defined in CFR 25 par. 20.1(r). In Alaska the data shown include all Alaska Natives i.e. Aleuts, Eskimos, and Indians. In Oklahoma the areas covered encompass all former reservations. Therefore, since in both states very few Indians live on actual reservations, the term "nearby" refers for all practical purposes to all of Alaska and Oklahoma, and the Bureau's responsibility extends in effect to the total Indian population of those States.

All statistics compiled here refer to the population of a geographic area; they do not refer to tribal membership. Such figures are maintained by the individual tribes according to their specific rules of members and include members wherever they may be living.

The total of approximately 861,500 Indians covered in these tables represents slightly more than half of the Indian population of the United States, which in the 1980 updated U.S. census number 1.534 million, including Aleuts and Eskimos. The excluded part comprises of Indians who are not members of any Federally recognized tribe, or members of such tribes who live off reservation.

Estimated Figures:

The local Agency offices of the Bureau of Indian Affairs estimate the data using whatever information may be available for the reservation or tribal entity. Accuracy varies from place to place. It can be good at small, isolated locations where everyone's activity is common knowledge. On the other hand, the labor force status can be difficult to estimate particularly for Alaska, Oklahoma, and the Navajo reservation where numerous Indians are scattered over enormous geographic areas. Household surveys of residency and labor force status are conducted but rarely because local area data are usually very expensive to collect, and they are often subject to considerable sampling and nonsampling errors. Even though the figures are estimates, they are all reported as received from the local offices, since the many small numbers which add into subtotal and totals would disappear if rounded.

Labor Force Status:

Considered in this category are all those 16 years old and over with a total of 574,440 representing about 67% of the total service population. This category is divided into three main groups for the purposes of this report -- unable to work, employed, and able to work but not employed.

- (1) Unable to work (columns 5 and 6) totals 172,169, or almost a third of those 16 years old and over. It includes persons who are prevented from working by attending school, who have to care for children or are disable, retired, or too old. Students make up about 46% of this group. Individual reservations or tribes may differ however in the proportion estimated to fall into this category.
- (2) Employed (column 7) totals 207,748 or 36% of those 16 years old and over, and includes full-time and part-time employees. Almost two-thirds of the employed earn \$7,000 or more (column 8)--the \$7,000 figure being based on the annual income of a worker earning minimum wage. In other words, one-third of the employed are earning less than the minimum wage for a full-time job. It could be argued that employment, excluding marginal jobs, provides a better picture of the economic health of a reservation than the total employment. As one possible index of this condition column 9 shows the number of employed Indians earning \$7,000 or more as a percent of the population 16 to 65 years old. The resulting 26% represents a 3% increase from the previous reporting period.

(3) Not employed but able to work (column 10) totals 194,523 or 34% of those 16 years old and over, and includes persons actually seeking work and those not seeking work. This distinction underlies two concepts of work force:

(a) The "potential work force" consisting of all those 16 years old and over who are able to work, whether employed or not (columns 7 and 10 respectively). Of this potential work force 45% are not employed (column 11); and (b) those not seeking work or discouraged workers who are omitted from the standard Bureau of Labor Statistics definition of labor force and unemployed. By this definition the labor force consists of columns 7 and 12, and the unemployment rate is 38% (column 13).

Table Format:

The report includes three statistical tables. The basic data are compiled in Table 3. They are arranged by BIA Area Offices and within Area by Agency or equivalent unit of organization below the Area level, the Reservation or tribal entity, and State. Where the data extend into more than one State the total is shown separately and the parts allocable to each State are identified in parentheses.

Table 1 and 2 are summary tables. Table 1 shows the totals for each State. Table 2 shows the totals for each of the areas into which the BIA is administratively divided, and within each area by state.

Additional Comments:

In compiling this estimate, a conscious effort was made to present as accurately as possible the resident Indian population on reservations and nearby that represents the Bureau's service population. It should be noted, however, that there are two basic problems with statistics on Indian reservations. The situation differs from that in an urbanized area. First, it is difficult to estimate intent in relation to "seeking work" in the absence of household surveys, which are seldom available because of the prohibitive cost. Second, in the isolated rural areas typical of reservations, people do not actively seek work when the whole community knows that there are no jobs available, so that if jobs were available, the unemployment rate would be somewhere between the two measures given here (38% and 48%). These rates while extremely high by any standard show a slight improvement from the last reporting period.

There is a change in the presentation format of data in Table 3 involving the Juneau Area. The breakdown by Native Associations listed under each Agency is now deemed obsolete and has been discontinued. In prior issues of this publication these associations were considered as nonprofit arms of the Regional profit corporations representing distinct geographic boundaries, and did not take into account the continuous residency of the membership because of the nomadic character of the Native population and its frequent movements to job locations, school locations, wildlife resource locales, etc. This is why the past population counts were based on tentative projections and even the enumeration of people for the census were

considerably undercounted. In this compilation the data are shown by Agency only but are based on actual counts conducted by the Native Organizations, villages or entities, which all together number 197, and are recognized as eligible to receive services from the Bureau. To be more specific the 197 number includes 196 villages and communities as well as 1 reserve -- the Annette Island Reserve -- which is at the present time under the administration of the Portland Area.

Also, several new tribal entities appear for the first time in this compilation. In the Eastern Area the recently recognized tribes include the Mashantucket Pequot Tribe of Rhode Island, and the Poarch Band of Creek Indians of Alabama. In Portland Area the newly reported entities include the Confederated Tribes of Coos, Lower Umpqua and Siuslaw Indians of Oregon, the Confederated Tribes of the Grand Ronde Community of Oregon, and the Northwestern Band of Shoshone Indians of Utah (Washakie).

In Sacramento Area 127 rancherias were restored to trust status by a recent court order of the U.S. District Court for the Northern District of California. These rancherias are marked by asterisks in Table 3 under the Sacramento Area.

Any questions pertaining to this report should be directed to the Office of Financial Management, Bureau of Indian Affairs, Washington D.C.

NOTES:

There are 197 native entities (communities and villages) within the state of Alaska recognized and eligible to receive services from the U.S. Bureau of Indian Affairs. The specific areas included under each of the five agencies in the Juneau Area Office jurisdiction are indicated in the following footnotes:

- a/ The Anchorage Agency has jurisdiction over the southcentral part of Alaska; the domicile of All-Alaska Natives (mostly Aleuts, Chugah Eskimos and Athabascan Indians) within the geographic boundaries of six Regional Corporation Areas created by the Alaska Native Claims Settlement Act (ANCSA): Ahtha, Aleut, Bristol Bay, Chugiach, Cook Inlet, and Kodiak.
- b/ The Bethel Agency has jurisdiction over the Kuskokwim-Yukon Delta Area of Southwestern Alaska; the domicile of All-Alaska Natives (mostly Yupik Eskimos) within the geographic boundaries of the Calista Regional Corporation created by ANCSA.
- c/ The Fairbanks Agency has jurisdiction over the Interior and Northern Regions of the State; the domicile of all Alaska Natives (mostly Athabascan Indians and Inupiat Eskimos) within the geographic boundaries of the Doyon and Arctic Slope Regions created by ANCSA.
- d/ The Nome Agency has jurisdiction over the Northwestern portion of the State; the domicile of All-Alaska Natives (mostly Yupik, Inupiat, and Siberian Eskimos) within the geographic boundaries of the NANA and Bearing Straits Regions created by ANCSA.
- e/ The Southeast Agency has jurisdiction over the Southeastern (panhandle) portion of the State; the domicile of All-Alaska Natives (mostly Tlingit, Haida, and Tsimpsons) within the geographic boundary of the Sealaska Region created by ANCSA.
