

Central Plateau, Outer Zone

The outer zone of the Central Plateau is about 65 square miles.

Recovery Act funding will be used in this area to support shrinking the active footprint of cleanup to as little as 10 square miles in the center of the site. Work will consist mainly of demolishing facilities and remediating waste sites.

EM *Environmental Management*

safety ❖ performance ❖ cleanup ❖ closure

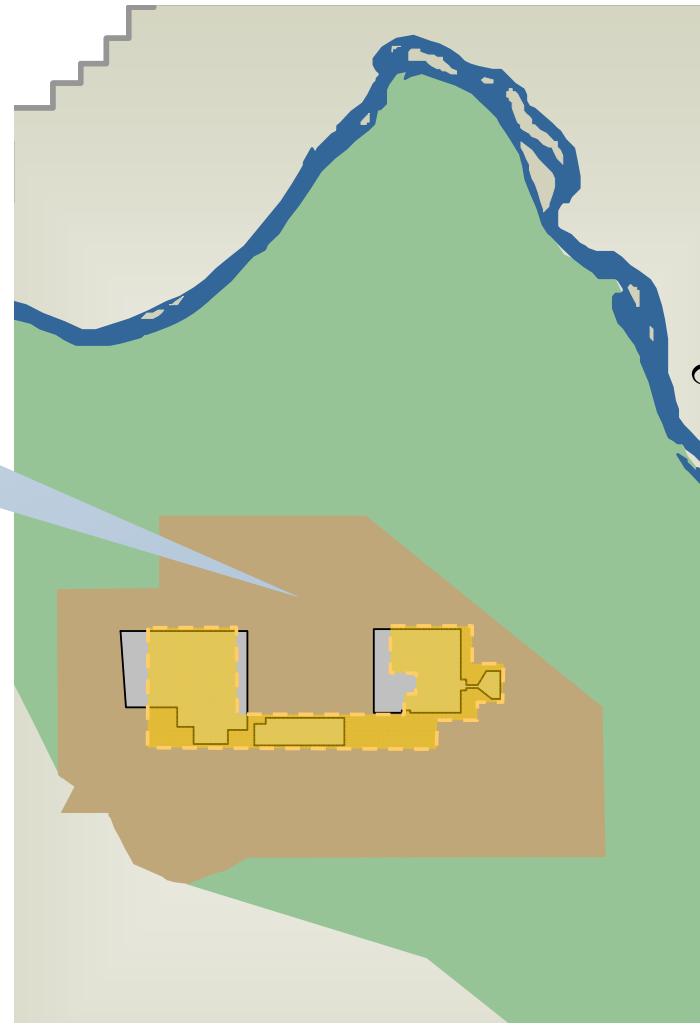

Central Plateau, Outer Zone (~65 sq. mi.)

- 200 North Area
 - Demolish spent fuel transfer storage facilities (212 N/P/R)
 - Remediate waste sites
 - Dispose of locomotive and rail cars

Apportioned ARRA Funding for Central Plateau D&D and Soil Remediation -- \$423M

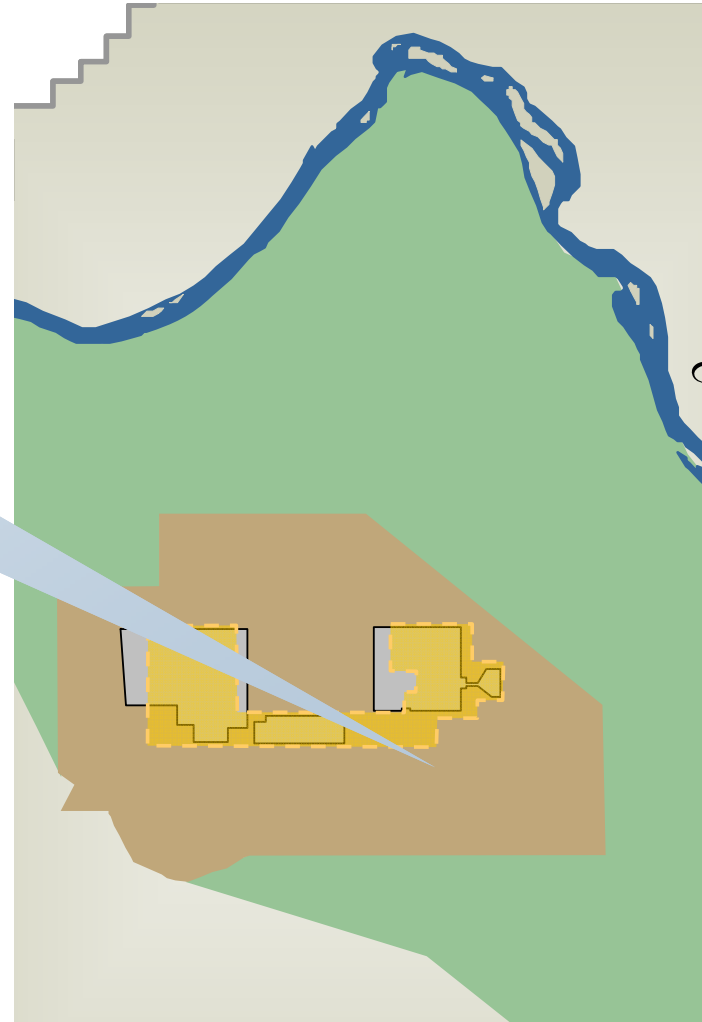

EM Environmental Management

safety ❖ performance ❖ cleanup ❖ closure

Central Plateau, Outer Zone (~65 sq. mi.)

- **Initiate cleanup of B/C Control Area**
(contaminated area surrounding the B/C Cribs)
- **Remediate up to 20 waste sites**
- **Decommission wells**
(funded by groundwater allocation)
- ***Continue development of regulatory decision documents***
(e.g., Records of Decision, Dangerous Waste Closure Plan)

Apportioned ARRA Funding for Central Plateau D&D and Soil Remediation -- \$423M

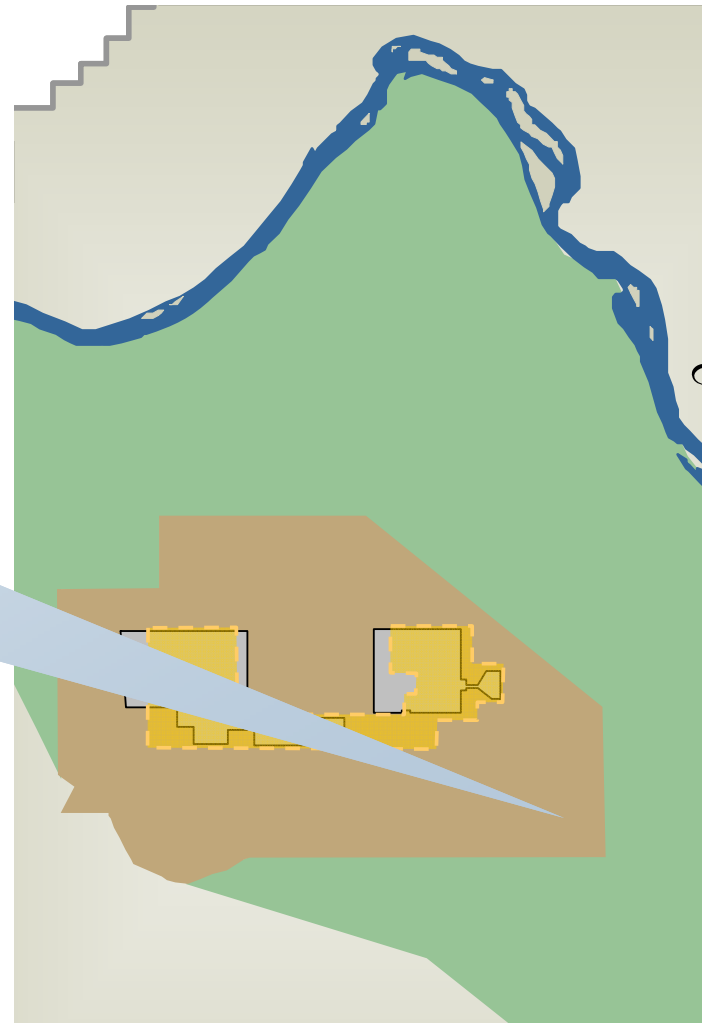

EM Environmental Management

safety ❖ performance ❖ cleanup ❖ closure

Central Plateau, Outer Zone (~65 sq. mi.)

- Complete closure plans/design and initiate remediation of Non-Radioactive Dangerous Waste Landfill (NRDWL) and Solid Waste Landfill (SWL)
- NRDWL was used for non-radioactive, hazardous waste (e.g. batteries, old fluorescent lights)
- SWL was used for non-hazardous solid waste (e.g., office refuse)

Apportioned ARRA Funding for Central Plateau D&D and Soil Remediation -- \$423M
