

SAIC is a FORTUNE 500® scientific, engineering, and technology applications company that uses its deep domain knowledge to solve problems of vital importance to the nation and the world, in national security, energy and the environment, critical infrastructure, and health.

Missile Defense

SAIC has supported the development of worldwide missile defense capabilities since the award of our first large prime contract in 1971 for BMDSCOM, which provided IV&V of the SAFEGUARD antiballistic missile system. Since the Fletcher Panel on SDI in 1983, SAIC has provided BMDS architectural analyses, systems engineering, infrastructure, deployment, wargaming and exercises as well as tests and evaluations for MDA, combatant commands, DoD uniformed services, and NATO. Our long-term involvement in missile defense programs provides our employees a broad perspective on missile defense issues that translates into beneficial solutions and insights to meet MDA challenges. SAIC is committed to working with small businesses in support of our customer's mission. Accordingly we are seeking small businesses with skills and past performance in the following areas:

Potential Opportunities

- MiDAESS: all groups
- BMDS performance analysis
- System Engineering services
- T&E Engineering Services
- Threat Modeling and Analysis
- Security Services
- IT Services
- C2BMC Services

Over the last five years, SAIC has awarded the majority of its subcontracts to small businesses approaching approximately \$2 billion dollars annually in subcontract awards to SBs. We believe small businesses, including small disadvantaged, women-owned, veteran-owned, HUBZone companies and historically black colleges and universities as well as minority institutions bring good capabilities and technical know-how to assist SAIC and better serve our customers.
