Prescription Lens Carrier, compatible with Wiley X Talon spectacle and Spear Goggle	Package of 25	CHX25	6540-01-585-7160

The Wiley-X Spear protective goggle consists of an injection molded rubber frame (one size) with interchangeable polycarbonate lenses. The frame comes with a removable foam gasket which allows the user to choose between a foam or rubber face seal. Foam covered venting around the periphery provides ventilation while keeping sand/dust out. All lenses have been treated with a hard-coat on the exterior surface to reduce scratching and an anti-fog coating on the interior surface to reduce fogging. The anti-reflective sleeve reduces glint when the goggle is not in use. The Wiley-X Spear Goggle weighs 4.8 ounces. The Wiley-X Spear provides ballistic-fragmentation protection, and meets ANSI Z87.1-2003 optical and safety requirements. The lens material blocks 99.9% of all UVA and UVB light. An optional prescription lens carrier is available for those who require corrective lenses.

WARNING: Use of prescription lens configurations not listed on the Authorized Protective Eyewear List (APEL) for a specific APEL spectacle or goggle may result in serious injury. We strongly recommend that Soldiers use Army optometry clinics to obtain prescription (Rx) correction for APEL products approved for this purpose. Rx correction is available through garrison and deployed optometry clinics at no cost to the Soldier. All APEL approved Rx configurations have been subjected to ballistic fragmentation testing for safety. Offers by vendors for unapproved Rx products via vendor website and/or through conferences should be avoided, as these items may not be safe or operationally suitable for use in a field environment.
