

TACOM Life Cycle Management Command

Red River Army Depot (RRAD)

Who We Are

Supporting the joint combatant commander with products and services improved through lean manufacturing, other process improvement tools, and relevant technologies. Red River Army Depot (RRAD) is an ISO 9001:2008, ISO 14001:2004, and OHSAS 18001:2007 registered industrial complex providing responsive and innovative solutions for the Department of Defense (DoD) in repair, overhaul, recapitalization, remanufacture, certification, and conversion of combat systems and tactical vehicles. Designated as the Center of Industrial and Technical Excellence for the Bradley Fighting Vehicle System, Tactical Wheeled Vehicles, and rubber products, RRAD is a strategic national asset providing support at operational speed and is an essential element of the joint forces. The most recent addition to RRAD's mission is depot level reset and repair of the Mine Resistant Ambush Protected vehicle.

What We Do

The depot's vast industrial complex has the capacity and capability to completely overhaul/remanufacture a wide range of combat systems and tactical vehicles. The multi-function capability fully supports the ongoing joint transformation.

- The mission flexibility and responsiveness of the workforce, equipment and facilities provides the depot a competitive edge within the defense industry. Additionally, personnel supporting the combat and tactical vehicle missions possess a wide-range of core skills that are essential to supporting the war fighter. As evidenced in recent operations, RRAD quickly shifted efforts to meet changing combatant commander requirements both on the industrial complex and by deploying teams world-wide to improve near term readiness and provide for the long term sustainment of our combat and tactical fleets.
- RRAD has the only capability within the DoD for remanufacture of road wheel and track. Currently, the depot is the only qualified source of supply for the M1 road wheel.
- Public-Private partnerships support an Army in transformation. RRAD proactively seeks industrial partners and has successfully negotiated over 200 teaming and partnering arrangements. These relationships leverage the strengths of both parties and ultimately do result in a better quality and lower priced product for the war fighter.
- RRAD technical resources include the capability to design, fabricate, and manufacture a wide variety of items, to include designation as the fabrication source of the HMMWV Egress-Assistance Trainer and the MRAP Egress Trainer.
- RRAD serves as the primary DoD source for HMMWV Recapitalization with the processes and capacity in place to consistently support 32 vehicles per day on one shift.

(October 2010)

Our Bottom Line:

We touch every service, every day – TACOM LCMC
