

2009 RESULTS- ENERGY STAR FOR NEW CONSTRUCTION ASSISTED BY THE HOME PROGRAM

HUD has worked with EPA to promote the use of ENERGY STAR standards in construction of houses. Here are the results of that production by the HOME Program for Fiscal Year 2009.

Summary

In brief, the results are: 4,652 new HOME units met ENERGY STAR qualifications. This comes to almost 30 percent of the total of 16,005 new Homes built under HOME.

High Performers:

The highest percentage was 93% in Rhode Island. Note that California reported the largest total 3,543 with 44% meeting ENERGY STAR.

Low Performers

Several with high numbers of HOME units reported very few meeting ENERGY STAR standards: Arkansas (152-1); Florida 1,003-48; Iowa (116-10); Indiana (361-14); Michigan (304-24) Minnesota (55-5); Missouri (253-24); Mississippi (198-15); Ohio (650-41); Oregon (216-11); Tennessee (180-15); Texas (790-43); Washington (273-11); Wisconsin (97-9)

Non-Performers

At the bottom of the list, ten reported zero: Arkansas, Connecticut, Delaware, Idaho, Maryland, Montana, North and South Dakota, West Virginia and American Samoa. The first three of these reported more than 100 units constructed with assistance from HOME.
