We have switched on the AVANTs and still cannot get the unit to work. It is possibly the GATEWAY PC. Please switch out AVANT 37041 and its GATEWAY PC with AVANT 37043 and its computer. Gateway to be installed in 2B105B. Avant 37041 should go out for repair as it has problems staying connected and has been reading 'low'.

The injector malfunctioned and after four(4) tries, I was able to get the injector to work to perform IV contrasted studies. At the end of each injection though, it would display on the injector face plate Injection Paused. Please come assess and correct anything that needs to be corrected. Thanks, Penny

We have switched on the AVANTs and still cannot get the unit to work. It is possibly the GATEWAY PC. Please switch out AVANT 37041 and its GATEWAY PC with AVANT 37043 and its computer. Gateway to be installed in 2B105B. Avant 37041 should go out for repair as it has problems staying connected and has been reading 'low'.
