NTIS Technical Reports Newsletter

Purpose: To bring you a sampling of the latest documents added to the NTIS Database and to help you gain a greater understanding of the wealth of scitech information available from the National Technical Information Service.

Director: Ellen Herbst

Deputy Director: Bruce Borzino

Associate Director for Product Management &

Acquisition: Don Hagen

Manager, Cataloging/Indexing Division: Sue Feindt

Manager, Product & Program Management: Wayne Strickland

Contributing Program Manager: Christie Langone

Technical Information Specialist: Anne Harrison

Editor and Design Direction: Linda Davis

This Newsletter is published twelve times a year, and delivered via e-mail on or about the 15th of each month. You may subscribe or unsubscribe by writing to ntrnews@ntis.gov. We can only unsubscribe you if you receive your copy from ntrnews@ntis.gov. Copies are also redistributed through listservs and by other subscribers.

The ntrnews subscribers list is not shared with any other entities for any purpose.

Your comments are always welcome. Write us at ntrnews@ntis.gov.

Permission to redistribute this newsletter is granted.

NTRL

U.S. Department of Commerce

The National Technical Reports
Library (NTRL) enhances
accessibility to the NTIS technical
reports collection. It provides access
to:

- Bibliographic records of more
than 2,000,000 technical reports
- Downloadable full text of
550,000 of these reports in PDF
format

Subscription rates are based on
institutional FTE levels.

The NTRL operates on a system
interface that allows users to
do queries on the large NTIS
bibliographic database. The
intent is to broadly expand and
improve access to over 2.5 million
bibliographic records (pre-1960
to present) and 500k full-text
documents in PDF Format that are
directly linked to that bibliographic
database.

**For more information, go to

Subject Category Codes/ Classification

NTIS classifies citations into 39 subject categories. Each of these subject categories is divided into subcategories. This method provides sorting categories for both hard and soft sciences. All subject categories consist of three character codes: two numerics and one alpha character. The numeric codes represent entire categories, the alpha codes are used to designate subcategories within these broad categories. The number of NTIS subcategories posted to an information product average from one to five, although there are some reports with more.

PB2009110175

Immigration and Customs Enforcement's Tracking and Transfers of Detainees.

Department of Homeland Security.

2009, 33p

The Nation's Source for Scientific Information

The National Technical Information Service (NTIS), is the nation's largest and most comprehensive source of government-funded scientific, technical, engineering and business-related information.

For more than 60 years, we have served as an innovative resource to Federal agencies, businesses and universities looking for high-caliber information. Our mission is straightforward: to support the nation's economic growth by providing access to information that stimulates innovation and discovery.

While you can find information on virtually any subject on the web, there's no guarantee that the information is accurate — or that it has been published by a legitimate source. NTIS undergoes a rigorous process to ensure that all the information we offer is authentic and credible. This integrity, along with the breadth and depth of our collection, is why NTIS is regarded as the nation's preeminent source of government information.
