To Parties Interested in BPA's Renewable Rate Credit Program

Thank you for your comments on the renewable option of the conservation rate credit program.

We have reviewed all of the comments and provided responses to those comments in the enclosed document. Several changes have been made to the renewable option of the conservation rate credit program and have now been added to the draft Post-2006 Conservation Implementation Guidelines, which will be available soon online at <http://www.bpa.gov/energy/n/post2006conservation/>.

Please note that these Guidelines are still a working draft, which will not be finalized until October 2006. In addition, these guidelines will be reviewed annually and changes to the renewable option may be considered as part of this review process.

The Renewables Focus Group will continue to meet this fall and begin discussion on how best to use the renewable facilitation budget.

If you have any questions on the upcoming on the renewable rate credit option or the upcoming work of the Renewable Focus Group, please feel free to contact me at (503) 230-5701.

Sincerely,

/s/ Debra Malin
