

**Defense Health Program  
Fiscal Year (FY) 2008/2009 Budget Estimates  
Exhibit P-40, Budget Item Justification, Procurement Program**

BUDGET ITEM JUSTIFICATION SHEET						DATE: February 2007		
APPROPRIATION / BUDGET ACTIVITY : 97*0130			P-1 ITEM NOMENCLATURE: Replacement/Modernization					
	FY 2006	FY 2007 <sup>1</sup>	FY 2008	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013
	Actuals	Estimate	Estimate	Estimate	Estimate	Estimate	Estimate	Estimate
Quantity								
Cost (\$ in millions)	375.944	381.116	346.999	290.631	283.340	332.244	345.516	350.667
<p><b>REMARKS</b> <span style="float: right;"><sup>1</sup>Reflects FY 2007 President's Budget Request which is equal to the Continuing Resolution.</span></p> <p>The replacement/modernization program element of the DHP's procurement budget funds the acquisition of commercially available equipment, as well as all deployment, implementation and initial training activities for all Tri-Service, standard information systems required to support health care delivery (including dental care), health care training, and other health care activities and programs in 64 hospitals and 1,082 clinics (FY09, including medical, dental, and veterinary clinics) worldwide. It provides the procurement and installation of investment equipment for replacement of worn-out, obsolete, or uneconomically repairable equipment and for the acquisition of new technologies.</p> <p>The most significant investments will be in the radiographic, surgical, and information systems functional areas. The driving factors are rapid technological advancements in these areas and the need for DoD's health care delivery system to maintain the standards of care set by the civilian health care sector. The most significant procurement investment in information systems relates to the deployment, implementation and initial training activities and supporting infrastructure cost for systems such as: AHLTA, which integrates patient data from different times, providers and sites of care and will contain a Service member's life-long medical record of all illnesses and injuries, care and inoculations received and exposure to different hazards; the Patient Accounting System which will improve data quality, regulatory compliance, and medical claims revenue within the Military Health System; Defense Medical Human Resources System - internet which will standardize and optimize the management of human resource assets across the MHS; and infrastructure and hardware such as End User Devices, LAN upgrades and blade servers supporting Tri-Service IM/IT programs.</p> <p>Financing an adequate equipment acquisition budget is critical in retaining the Department's medical workload in-house and controlling escalating purchased healthcare O&amp;M costs in the private sector. The items supported by this budget are the result of an extensive investment equipment justification process and are necessary to provide properly trained medical department personnel and high quality, cost effective health care services for the eligible beneficiary population.</p>
