## Important note

---

The Bureau of Justice Statistics (BJS) discontinued its annual Survey of Criminal and Civil Justice Expenditure and Employment (CJEE) for budgetary reasons following the collection of 1979 data. That survey provided comparable trend data from 1971 to 1979. Beginning with 1980, BJS adopted a different methodology to compile and present annual public expenditure and employment data in less detail and at reduced cost. This is done by "extracting" criminal justice data from the Census Bureau's annual government finance and employment surveys; hence, the BJS reports presenting these data are called the Extracts series. This report presents 1984, 1985, and 1986 data from that methodology and 1980-86 trend data. Special surveys collected 1985 and 1988 CJEE data that are comparable to data for 1971-79.

Users of the 1971-79, 1985, and 1988 (forthcoming) CJEE volumes will notice that the current methodology produces considerably less detailed information than is available from those special CJEE surveys. Another significant difference, which is not as noticeable, relates to the comparability of the data in this report with data collected in those CJEE surveys. While great care was taken to adjust the source data to maximize comparability with the CJEE data, irreducible differences remain.

In making trend comparisons, users should limit their analysis to one of the two sources:

- long-term trends for 1971-79, 1985, and 1988 from the CJEE series
- recent year-to-year trends from the 1980-86 Extracts reports.

See the Survey methodology for more information.

# Preface

This publication is the 20th in a series of reports that present public expenditure and employment data on civil and criminal justice activities in the United States. Over the past two decades there have been significant changes in the methodology used to produce justice expenditure and employment data. Generally, 1971-79, 1985, and 1988 data from the BJS Survey of Criminal and Civil Justice Expenditure and Employment (CJEE) are comparable, but the data for 1980-86 that are contained in this report were collected using a different methodology and are not completely comparable to the CJEE data.

This publication covers three reporting periods: Expenditure data are for the fiscal years 1984, 1985, and 1986, and employment data are for the months of October 1984, 1985, and 1986.<sup>1</sup>

<sup>1</sup>Fiscal year ending dates vary among governments; see the Survey methodology for details.

# Data sections and tables

## Section I. Trends: Selected years, 1980-86

### Justice expenditure and percent change, by type of government, fiscal years 1982-86

- A. total direct and intergovernmental 11
- B. total direct 12

### Justice employment and payroll and percent change, by type of government, October 1982-86

- C. total employees 12
- D. October payroll 13

### Justice expenditure, employment, and payroll and percent change

- E. total direct and intergovernmental expenditure, by activity and type of government, fiscal years 1980-86 14
- F. total employees, by activity and type of government, October 1980-86 16
- G. October payroll, by activity and type of government, 1980-86 18
- H. sworn police full-time equivalent employees and percent of all police employees, by type of government, October 1980-86 20

### Justice expenditure of State governments, percent change, and percent distribution, fiscal years 1980-86

- I. direct corrections expenditure for institutions and other, by character and object 21

### Per population justice expenditure and employment and percent change, by activity

- J. per capita total justice expenditure, fiscal years 1980-86 22
- K. total justice employment per 10,000 population, October 1980-86 22

## Section II. 1986 tables

### Federal, State, and local Percent distribution, by level of government and activity

- 1. expenditure, fiscal year 1986 23
- 2. employment and payrolls, October 1986 23

### State and local

#### Percent distribution of expenditure, by level of government, activity, and State, fiscal year 1986

- 3. direct expenditure 24
- 4. total expenditure (direct and intergovernmental) 28

#### Percent distribution of employment and payrolls, by level of government and activity, by State, October 1986

- 5. employment 36
- 6. payrolls 44
- 7. sworn and nonsworn police employment and payrolls 48

#### Summary measures, by activity and State, fiscal year 1986 and October 1986

- 8. per capita expenditure and employment per 10,000 population 52

### State governments

#### Expenditure and employment, by State

- 9. total expenditure, by activity and by character and object, fiscal year 1986 54
- 10. direct expenditure for correctional institutions and all other corrections activities, by character and object, fiscal year 1986 56
- 11. employment, payrolls, and average monthly earnings, by activity, October 1986 58

### 68 large county governments

#### By activity and county

- 12. expenditure, by character and object, fiscal year 1986 60
- 13. employment and payrolls, October 1986 62
- 14. sworn and nonsworn police employment and payrolls, October 1986 64

### 49 large city governments

#### By activity and city

- 15. expenditure, by character and object, fiscal year 1986 66
- 16. employment and payrolls, October 1986 68
- 17. sworn and nonsworn police employment and payrolls, October 1986 70

### Supplemental data

- 18. personal income and expenditure and employment for all government functions for State governments, by State 71
- 19. expenditure and employment for all government functions for 68 large county governments, by county 72
- 20. expenditure and employment for all government functions for 49 large city governments, by city 73

## Section III. 1985 tables

### Federal, State, and local Percent distribution, by level of government and activity

- 1. expenditure, fiscal year 1985 75
- 2. employment and payrolls, October 1985 75

### State and local

#### Percent distribution of expenditure, by level of government, activity, and State, fiscal year 1985

- 3. direct expenditure 76
- 4. total expenditure (direct and intergovernmental) 80

#### Percent distribution of employment and payrolls, by level of government and activity, by State, October 1985

- 5. employment 88
- 6. payrolls 96
- 7. sworn and nonsworn police employment and payrolls 100

#### Summary measures, by activity and State, fiscal year 1985 and October 1985

- 8. per capita expenditure and employment per 10,000 population 104

# Introduction

## Organization of this report

The text describes in detail the survey methodology, data sources and limitations, and significant differences between the 1971-79, 1985, and 1988 BJS Survey of Criminal and Civil Justice Expenditure and Employment (CJEE) and the Justice Expenditure and Employment Extracts series (Extracts).

Following the text are the data tables, which are organized into four major parts:

- Section I (tables A-K) presents 1980-86 trend data.
- Section II (tables 1-20) presents 1986 expenditure and employment data.
- Section III (tables 1-20) presents data for 1985.
- Section IV (tables 1-20) presents data for 1984.

Within sections II-IV, tables are arranged to show—

- national estimates, by level of government and type of justice activity
- State and local estimates, by level of government, type of justice activity, and State
- individual government functional detail for State governments, 68 large counties, and 49 large cities.

Within each of these sections, the expenditure tables are presented first, followed by employment and payroll tables.

Sections II-IV conclude with tables presenting "supplemental" information for the individual State and local governments displayed in earlier tables. The data presented there include—

- total and per capita State personal income
- three categories of government expenditure—total expenditure (direct and intergovernmental), direct expenditure only, and total general expenditure
- two categories of full-time equivalent employment (all functions and general functions only).

Finally, the Appendix contains definitions of terms and concepts used in this report.

## Obtaining additional justice expenditure and employment data

The inside front cover of this report lists other BJS publications and describes how to obtain them. Data are also available on magnetic data tape through the National Archive of Criminal Justice Data, Inter-university Consortium for Political and Social Research, P.O. Box 1248, Ann Arbor, MI 48106; 313-763-5010.

## Important definitions

Although detailed definitions of the terms and concepts used in this report are presented in the Appendix, four concepts that recur frequently are worth noting.

The first, total expenditure, comprises direct and intergovernmental expenditure of a government or type of government. In the expenditure tables, certain totals were adjusted to exclude duplicative intergovernmental expenditure amounts. For example, money paid by a State government to a county government within that State is reported by the State government as an intergovernmental expenditure and by the county government as a direct expenditure when the money is spent (for salaries, wages, equipment, and so forth). Therefore, to arrive at a combined State-local government total that does not duplicate these transactions, intergovernmental expenditure amounts are deducted from the State-local total because those amounts also are reflected in the direct expenditure of the recipient government. The same treatment is used for intergovernmental payments between counties and municipalities within the same State when computing local totals. Thus, the only intergovernmental amounts included in "local, total" figures are those paid to the State government. Totals reported for "all governments" also are adjusted to exclude duplicative intergovernmental expenditure involving the Federal Government.

The second concept is full-time equivalent employment. This is a statistical measure that estimates the total workforce accounting for the less than full-time employment of part-time employees. Prior to 1986 the formula for computing full-time equivalent employment was payroll based; specifically, it was calculated by dividing the total payroll amount (full-time plus part-time) by the full-time payroll amount and then multiplying the resultant quotient by the number of full-time employees. Beginning in 1986, it is computed by dividing the part-time hours paid by the standard number of hours for full-time employees in the particular government and then adding the resultant quotient to the number of full-time employees. In both formulas the calculation is performed separately at the individual function level for each respondent government. Consequently, summaries by State, type of government, and function are aggregates of individual calculations. Users should consult the Survey methodology for additional information before making comparisons of data from the two formulas.

Total general expenditure includes data for general purpose governments (Federal, State, county, city, town, and township governments) and limited purpose governments (independent school districts and special districts). Justice expenditure and employment data are not collected for school district and special district governments by design so that the level of justice activity among general purpose governments, main providers of such services, can be measured or compared separately. However, tables that present justice expenditure and employment as a percentage of all government functions include special districts and school districts in the base to allow comparisons across States that make varying use of such governments for nonjustice activities, especially education.

## Introduction

---

Note that these percentages are not comparable to those presented in reports for 1971-79 because the 1971-79 reports used different denominators.

Finally, the judicial and legal services category in this report combines court functions, prosecution and legal services functions, and public defense activities, which are displayed separately in the CJEE reports for 1971-79, 1985, and 1988 (forthcoming). These judicial categories include data for both criminal and civil justice activities because available source documents for many governments do not segregate these activities for courts or agencies handling both criminal and civil activities.

### **Independent cities and consolidated city-county governments**

In the individual city tables, certain cities displayed either are independent, being wholly outside any county area, or operate entirely or in part as a consolidated city-county government. These governments are classified as municipalities by the Census Bureau and are included as municipalities in the tables presenting data by level of government. In general, these cities are more similar to large counties than to other large cities in the scope of their justice responsibilities; that is, in addition to police protection, which is the primary justice function of most municipalities, these cities also operate extensive judicial and correctional systems and may have significant public defense expenditures.

There were 65 such local governments in the United States in 1983. In the CJEE reports, data were presented for all but a few in Virginia that did not fall into the sample or did not respond to the survey. The reduced survey coverage discussed below for the Extracts reports allows the presentation of data for the 14 with a 1980 population of 300,000 or more.

Tables 15-17 and 20 in sections II-IV display data for the independent cities of Washington, D.C. (which also has State-type responsibilities), Baltimore, Md., and St. Louis, Mo., and for the consolidated city-county governments of San Francisco, Calif.; Denver, Colo.; Jacksonville, Fla.; Honolulu, Hawaii; Indianapolis, Ind.; Baton Rouge and New Orleans, La.; Boston, Mass.; New York City, N.Y.; Philadelphia, Pa.; and Nashville-Davidson, Tenn.

### **Meaning of symbols**

The following symbols are used in the tables:

- Less than 0.05%

# Survey methodology: Sources and limitations of the data

## General

Survey coverage and collection methods are described in detail below, and the definitions applied in the collection of data are presented in the Appendix. Data in this report are essentially comparable to data previously published for 1980-83 except for the addition of a combined "judicial and legal services" category in 1982 for which data were unavailable in 1980-81. Significant differences in the methodology used to collect data for those years versus the methodology used to collect data for 1971-79, 1985, and 1988 through CJEE make comparing data across those periods problematic. It is important to note that long-term trend comparisons between the data in this Extracts report and data in the CJEE reports are complicated by changes in methodology in the Justice Expenditure and Employment series. These changes are described in this section.

The CJEE surveys determined "variable passthrough" data for State and local governments. These data were developed to comply with the Omnibus Crime Control and Safe Streets Act of 1968, as amended, which required that block grants made by the Law Enforcement Assistance Administration (LEAA) to each State be allocated between the State and local governments on the basis of the ratio of State-to-local law enforcement expenditure from their own revenue sources. The Justice System Improvement Act of 1979 changed the distribution formula and based the new one on expenditure from general purpose revenue sources. The Justice Assistance Act of 1984 returned to the variable passthrough formula. Justice expenditure data cannot be produced on either basis from this limited compilation for 1984-86.

## Changes over time

In late 1980 the annual Survey of Criminal and Civil Justice Expenditure and Employment (CJEE) was canceled for budgetary reasons. That survey was the source of detailed, comprehensive statistics

on the justice activities of the Federal, State, and local governments. Each annual survey resulted in a preliminary report, an annual publication providing national and State-local estimates as well as individual government data, a volume displaying trends since 1971, and additional data accessible on magnetic tape.

Its cancellation left a gap in national criminal justice statistics, which this Extracts series is designed to fill, albeit on a limited basis.

Instead of presenting data based on a separate survey, this report contains justice expenditure and employment data from the Census Bureau's 1984-86 sample surveys of governmental finances and employment.

Those Census Bureau surveys have traditionally provided limited data on the justice activities of police protection (from 1902) and corrections (from 1954), with slightly more data being collected for the State and largest local governments. Beginning with 1982 these surveys collected "judicial and legal services" data as a separate category, allowing estimation of total justice expenditure and employment from those sources. (See "Differences in detail" below regarding the "judicial and legal services" and "other" categories.)

Beginning with 1980, BJS "extracted" justice data from the ongoing Census Bureau surveys and published them in the Justice Expenditure and Employment Extracts series.

Adopting an alternate statistical source necessarily results in differences, which can be classified into five broad groups:

- differences in coverage
- differences in detail
- differences in definitions
- differences in sample design
- differences in survey procedures.

These differences are described below.

## Differences in coverage

For the Extracts series, only limited data have been available on the justice activities of the Federal Government—major totals for police protection, judicial and legal services, and corrections. In contrast, the CJEE surveys cover all six justice activities (police protection, courts, prosecution and legal services, public defense, corrections, and other justice). From 1971 to 1979, Federal data were collected through a mail canvass that allowed the inclusion of some agencies' data not available separately through the source documents used here. It also allowed a more accurate proration of data among the activities for agencies with multiple functions. The 1985 and 1988 CJEE surveys used the same methodology as the Extracts series to collect Federal data.

For State governments, Extracts data are not available on the activities of universities, including campus police (\$142 million in expenditure and 13,000 employees in 1978)<sup>2</sup> and university-based medical examiners and legal aid clinics. No justice data are reported on the Commonwealth of Puerto Rico, last published in the 1978 CJEE report.

## Differences in detail

The CJEE surveys collect data separately for courts, prosecution and legal services, and public defense, which are combined in a single category of "judicial and legal services" in the Extracts series. The CJEE surveys further separate court data into varying numbers of subfunctional categories depending on the type and size of the government. No court subfunctional data are shown in this report.

<sup>2</sup>1979 data for campus police and special police forces were collected but not published separately in the appendixes of the 1979 report because of budgetary constraints.

**Survey methodology:  
Sources and limitations  
of the data**

The CJEE subfunctions of courts are—

- State governments—
  - Appellate courts
  - Courts of last resort
  - Intermediate appellate courts
  - Courts of general jurisdiction
  - Courts of limited jurisdiction
  - Miscellaneous

- Large county governments—
  - Courts of general jurisdiction
  - Courts of limited jurisdiction
  - Miscellaneous.

The CJEE program also presents more subfunctional detail for corrections. For the Extracts reports the only subfunctional detail is for State government correctional expenditure for institutions versus all other corrections (parole, probation, and so forth).

The CJEE corrections subfunctions are—

- State governments—
  - Institutions for:
    - Men
    - Women
    - Juveniles
    - Other/combined
  - Corrections administration
  - Probation and parole
  - Miscellaneous

- Large county governments—
  - Institutions for:
    - Juveniles
    - Other/combined
  - Probation and parole
  - Miscellaneous

- Large city governments—
  - Institutions
    - Probation and parole
    - Miscellaneous.

The CJEE program includes a residual "other" category not available in the Extracts series. This category includes expenditure and employment data that are not elsewhere classified, that cut across more than one category, or that were not allo-

cable to separate categories, such as operating State criminal justice planning agencies and crime commis-

sions. Much of the data included in this category reflected block grants from the now defunct Law

**Definitional differences affecting comparability between Extracts (regular program) and CJEE data**

(Note: In some instances the differences are not strictly definitional in nature, but they are included here for practical reasons.)

As a service to users, the effect of each definitional difference is indicated with a plus sign (+), a minus sign (-), or an asterisk (\*). The sign indicates the general direction toward which the difference tends to push the data in this report; (+) means the difference generally makes the Extracts data here higher than in the CJEE survey, (-) means that it makes the data lower, and (\*) indicates that either effect is likely or not applicable. For example, exclusion of special police forces in the regular police protection category receives a minus sign (-) because it results in the data being lower compared to the CJEE definition.

**Police protection**

(+) The regular Census Bureau programs include unsworn school crossing guards, parking meter-readers, and animal wardens, if employed by a police agency, which CJEE excluded unless they possessed general arrest powers. However, the expenditure and full-time equivalent employment for these are probably not substantial. (-) The regular surveys generally do not include as "police" those special police forces that are organizationally part of a non-justice agency, although the counties and cities on the finance survey mail panel were instructed to include them: These were picked up in the CJEE survey if they possessed general arrest powers. The effect of this difference would vary

according to the government involved, being on the whole greater for State governments than for localities. (The regular survey forms were revised in 1984 to include these police forces.)

(+) The regular programs include motor vehicle inspection and driver-licensing activities of police agencies, which were excluded from CJEE. The effect of this difference would depend on each government's (primarily each State's) division of responsibility for these activities.

(+) The police protection definition in the regular surveys includes "traffic control and traffic safety including related traffic engineering activities (but not highway planning and engineering)," which were outside the scope of CJEE. The impact of including these activities would vary among governments.

(+) In the regular employment mail survey, respondents are instructed to include constables, which the CJEE survey may have classified as judicial employees in some States.

(+) The judicial employees of sheriffs' offices (bailiffs and so forth) were frequently reported under police protection in the regular employment survey because the data are gathered entirely by mail survey and the general questionnaire did not explicitly state to report them elsewhere. (Beginning in 1983 the special supplement form sent to sheriffs' offices in certain States did ask for a more detailed breakdown.) The CJEE reported them under the judicial category.

**Judicial and legal services**

(-) The regular finance program generally would not include the judicial activities of local sheriffs' offices under the judicial category unless the financial records used broke out this activity.

Enforcement Assistance Administration (LEAA). In 1979 this category accounted for 1.7% of total justice

expenditure and less than 1% of employment and payroll. In the Extracts series, activities included

in the CJEE "other" category are classified under one of the three major categories wherever possible.

(This applies mostly to the smaller mail panel units.) In CJEE, much effort was made to allocate the activities of sheriffs' offices among the police protection, corrections, and judicial categories.

(+) Although not strictly a difference in definitions, the regular programs' judicial data may include probation (especially juvenile) when it is an unrecognizable part of the courts in source documents used to compile the data. (Again, this applies predominantly to the mail panel.)

(+) The regular programs' definition of judicial includes "register of wills and similar probate functions," which may have been partly or entirely excluded by the CJEE program in some States depending on whether it was a court activity (included) or an administrative activity (excluded).

#### Corrections

(-) The regular programs do not include State hospitals for the criminally insane unless operated by a correctional agency. In CJEE these were covered even if part of a mental health agency.

(\*) The regular finance survey includes all the costs of prison industries other than those goods and services purchased by a government. The CJEE survey included only the supervision costs.

(-) The scope of correctional facilities covered in the regular programs is not as broad as CJEE. The CJEE survey included every public institution identified by the biennial census of juvenile detention and correctional facilities. This census lists a facility if it had at least one juvenile who was a committed or detained delinquent or status offender, with the balance of its population consisting of dependent, neglected, abused, emotionally disturbed, or mentally retarded juveniles. In the regular programs, some of these facilities are classified as welfare institutions.

(-) Until fiscal 1982 the mail survey forms for municipal and town finances of places less than 300,000 population did not list probation and parole under the instructions for reporting corrections expenditure. This activity comprised 14% of all municipal corrections outlays in fiscal 1979 and probably even less a proportion of the expenditure of smaller places.

#### Finance categories

(\*) The regular finance survey's functional data include employer contributions for all employee benefits except those to self-administered retirement systems, which are, in effect, interfund transfers. (State and local governments contributed \$15 billion to all such retirement plans in fiscal 1983.) In the CJEE series, payments for such fringe benefits as employer contributions to retirement plans and for health, hospital, disability, and life insurance plans were excluded.\*\* This difference probably affects the data for State governments less than local ones because States administer employee retirement systems accounting for over 85% of the total membership in such plans (which often include local employees). Thus, in both the CJEE and regular finance surveys the data for most States exclude the single largest employee benefit. On the other hand, more members of police pension funds belong to locally administered systems than to State systems.

\*\*The reason for excluding them related to one of the major uses of the CJEE data—to allocate justice assistance grants among governments—and to the treatment of employee benefit payments by certain governmental financial-reporting systems. Employer contributions for fringe benefits are often reported for the entire government; amounts attributable to particular agencies or activities cannot be segregated. Thus, to ensure that no government(s) would be at a disadvantage for being unable to allocate employee benefits by function, these amounts were excluded from every government's criminal justice expenditure.

(\*) In the CJEE survey, payments by States, counties, and municipalities to school districts, special districts, and the Federal Government were treated as direct expenditure rather than intergovernmental expenditure. Complicating this difference is that in the regular finance program unusual or rare financial transactions are sometimes treated as "impossible codes." For instance, payments to the Federal Government for boarding State prisoners fall under an impossible code category and would be classified as a miscellaneous intergovernmental expenditure, not corrections. The number of such transactions in the justice field, however, is probably quite small and was investigated during the special review procedures, described elsewhere in this report. For purposes of this report, payments to the Federal Government for justice activities are included with direct current expenditures of that activity (mainly corrections).

(\*) Compilation of the entire finances of a government is sometimes at odds with a study focusing on specific functions. For example, a "global" compilation necessarily deducts interagency reimbursements from an expenditure to avoid duplication. To illustrate, expenses of a county counsel may be shown in fiscal reports as being the net of reimbursements from other agencies for whom the agency provides legal advice. This is also a common occurrence with State correctional agencies (and not limited to prison industries). For the State governments and large cities and counties shown individually in this report, a special effort was made to add back in these interagency reimbursements. (See "Data collection" below.)

## Survey methodology: Sources and limitations of the data

The CJEE survey publications display expenditure categories more detailed than those in the Extracts reports:

- Capital outlays are subdivided into equipment, construction, and the purchase of land and existing structures. These breakdowns are not shown in the present report except for construction outlays for correctional activities of the State and large local governments.
- Intergovernmental expenditures were divided into payments to State governments and to local governments, which are combined in this publication.

### Differences in definitions

Some of the most significant differences between the CJEE and Extracts series involve the definitions used. In reviewing these differences, the purpose of each source must be considered. The functional approach of the CJEE survey centered on a narrow range of just a portion of the activities of this country's governments. In contrast, the Census Bureau's governmental statistics program (which produces the Extracts data) is designed to produce general purpose, "global" statistics on the finances (including revenue, expenditure, indebtedness, and cash and security holdings) and employment of all governments, classified along broad functional lines. Indeed, as described later, this global approach is sometimes at odds with a functional scope, such as the CJEE's.

Before listing the differences in functional categories, certain general statements can be made. First, the regular Census Bureau programs often classify the entire expenditure and employment of a criminal justice agency or activity according to its major purpose, when some of the expenditures and employment may be partially excluded in CJEE. For instance, the regular surveys may classify all of a highway patrol as police protection, from which CJEE excludes expenditures and employment related to driver licensing.

Second, and conversely, the regular programs generally do not require that the minor portion of a noncriminal justice agency allocated to a justice activity in CJEE be separately identified, such as park rangers of a parks department or a law library connected to a larger facility.

Third, in the CJEE surveys certain activities are classified for justice purposes only when performed by a justice agency, such as child support enforcement. Classification in the regular programs may be more variable.

As seen in the "Definitional differences" box, the differences between the regular programs and the CJEE surveys result in a net effect on the data in this report, with some differences forcing the data in one direction being offset by those moving the data in the opposite direction. The final effect depends on such factors as—

- the organizational structure of a government (for example, whether court clerical operations are handled by the court itself or a county clerk's office)
- the assignment of responsibility for nonjustice activities (for example, whether or not driver licensing is assigned to a police or motor vehicle department)
- State and local laws (for example, whether regular or special police have authority to make arrests on park property)
- the detail available in financial records (for example, whether court probation expenditures are listed separately)
- the fiscal structure of a State (for example, whether local employees belong to a State- or locally administered retirement system).

As described under "Data collection" below, some of the differences were narrowed during the intensive review of the State and large local government data for this report. Also, the regular surveys since 1980 have reduced the differences further (for example, by revising instructions on survey forms).

### Differences in sample design

Unlike CJEE, the sample used to produce the 1984-86 estimates of justice expenditure and employment in this report was not designed specifically to provide data on any particular function(s).

The regular survey sample<sup>3</sup> is drawn from the 1982 Census of Governments and includes—

- county governments having 50,000 or more inhabitants
- all municipalities (and townships in New England and the Middle Atlantic States) having 25,000 or more inhabitants
- all school districts with 5,000 or more enrollment
- local governments (counties, municipalities, townships, special districts, and school districts) whose relative importance in their State, based on annual expenditure or indebtedness according to the 1977 Census of Governments, was above a specified level
- a random sample of the remaining local governments (including special districts and school districts).

The random selection of the remaining units was made from a compilation of all local governments within selected large Metropolitan Statistical Areas (MSA's), other major counties, and the balance of the State, further grouped by type and size of government. The sample was chosen using probabilities that were based on the ratio of each government's fiscal 1977 expenditure or indebtedness to the State total for noncertainty units.

The CJEE survey samples differ in that they include all county governments, all municipalities (and townships in New England and the Middle Atlantic States) having a population of 10,000 or more, and a random sample of the remaining cities and townships according to the relative size of their police protection ex-

<sup>3</sup>The regular surveys include special districts and school districts, but the surveys do not collect justice data from these districts because they generally perform no or very limited justice functions.

penditure. Approximately 12,000 local governments comprise the CJEE samples, while the regular sample has about 20,000, of which 9,500 are counties, cities, and townships. (More information on the survey samples is provided below under "Data limitations.")

#### Differences in survey procedures

No field visits to State and local governments were made specifically for this report. In the CJEE surveys, specially trained field representatives visit every State government, the largest counties, and the largest municipalities to compile justice data from the governments' own records.

No separate mail canvass forms were used for this report. The CJEE surveys have their own questionnaires.

The regular surveys expend less effort to allocate data than the CJEE. The CJEE often relies on prorating the expenditure and employment of agencies or activities among justice sectors (for example, sheriffs' offices) or between in-scope and out-of-scope activities (for example, special police forces of nonjustice agencies). In cases where the regular surveys do allocate data, the allocation factors may not be identical to those used in CJEE. The regular surveys focus more on the governmental function than on the agency involved. For instance, expenditure may be classified by function (for example, general control) rather than agency (for example, district attorney, formerly classified as a general control activity). This made some data unavailable for this report.

In the CJEE surveys, trained Census Bureau field representatives are instructed to make a special effort to collect data on criminal justice expenditure and employment funded by the Comprehensive Employment and Training Act (CETA). They also were trained to allocate that portion of general government services (for example, building maintenance, computer services, and communications) attributable to justice activities. In the Census Bureau's regular finance and employment surveys, these items are more likely to be aggregated into miscellaneous categories.

Minor amounts for purchasing equipment were not always separated from current operations expenditure in the finance survey.

The Census Bureau's public employment survey is conducted mainly by mail canvass, including State and large local governments whose finances were compiled by Bureau staff in both the finance and CJEE surveys. (Some State governments provide special employment tabulations for their agencies from which the necessary data are extracted by Census Bureau staff.)

Compared to individual compilation, the mail canvass approach poses several problems:

- It limits the amount of instructions that can be provided.
- Respondents are less likely to separate police protection employment between sworn and nonsworn personnel.
- Juvenile detention facilities are less likely to be recorded under the corrections activity, while court-operated probation may be left under the judicial and legal activity.

Some of these problems have been abated since the 1980-81 regular surveys by changes in the survey instruments or review procedures. (For other mail canvass limitations and the steps taken to deal with them, see "Data collection" below.)

#### Conclusion

This section described the differences between the CJEE surveys and the regular Census Bureau programs from which data for this report were extracted. To reduce the extent of these differences and make the data conform as closely as possible to CJEE, special steps were taken, which are described below under "Data collection" and include additional review, data adjustment, and reclassification of activities. Because of these adjustments, the data in this report differ from those published by the Census Bureau in its regular finance and employment reports. For future compilations the Census Bureau plans to continue modifying its survey procedures where feasible.

#### The survey period

The expenditure and employment data in this report cover the following periods:

- The employment data are for October of the year indicated.
- The Federal Government expenditure data are for fiscal 1984 (October 1, 1983, to September 30, 1984), fiscal 1985 (October 1, 1984, to September 30, 1985), and fiscal 1986 (October 1, 1985, to September 30, 1986).
- The State expenditure data cover the fiscal years ending June 30 of the year indicated for all States except four whose fiscal years ended as follows: New York, March 31 (including independent school districts); Texas, August 31 (including independent school districts); and Alabama and Michigan, September 30.
- For local governments the fiscal years reported are those ending between July 1 and June 30. Most municipalities and counties end their fiscal years on December 31 or June 30. The fiscal years reported for Washington, D.C., ended on September 30 of the year indicated.
- Some agencies operate on a different fiscal year basis from the rest of the parent government. In such instances, figures included are for the agency's fiscal year that ended within the parent government's regular fiscal year.

## Survey methodology: Sources and limitations of the data

### Data collection

This report is based on a special compilation of data and sources available from the Census Bureau's regular surveys of public finances and employment. The recurrent series of annual publications on governmental finances (series GF) and public employment (series GE) provide data on expenditure and employment, by function, of the Federal, State, and local governments (counties, cities, townships, school districts, and special districts). The data collection procedures of these surveys for the expenditure and employment data are described below.

Once the data are collected, intensive computer editing of the data at various stages of processing minimizes errors that may be introduced during processing in the regular programs. The data extracted from those programs for this report received additional examination. The local government expenditure and employment estimates were reviewed, potential problems investigated, and data revised, where necessary. Data for each of the States and large counties and cities displayed individually were scrutinized and compared to prior years' data. After compilation for the general finance survey, a special reviewer examined in detail the expenditure data for these large governments and investigated special data compilation problems and adjusted data as needed. A separate computer edit was then performed. Where possible, both expenditure and employment data were adjusted to correct errors, reclassify activities, and narrow differences with the CJEE surveys. Specific procedures included referring to alternate sources of data, estimating missing data, and refining data through proration (for example, sheriffs' offices).

### Expenditure data

Federal Government expenditure data for 1984 were obtained from "actual" fiscal 1984 data presented in The Budget of the United States Government for the Fiscal Year 1986. Federal Government expenditure data for 1985 were obtained from "actual" fiscal 1985 data presented in The Budget of the United States Government for the Fiscal Year 1987. Federal Government expenditure data for 1986 were obtained from "actual" fiscal 1986 data presented in The Budget of the United States Government for the Fiscal Year 1988. Certain adjustments were made in Federal data to arrive at Census Bureau "expenditure" amounts.

Census Bureau representatives compiled State expenditure statistics as well as those for large counties and cities from official reports and records, with the advice of State and local officers and employees. The figures were classified according to standard Census Bureau categories for reporting large government expenditures and were reviewed intensively. The remaining data were provided either by local officials in response to a mail survey using detailed questionnaires tailored to the type of government involved or as a result of central data collection arrangements with State governments. Through these efforts, only a minor percentage of the general government sample (nearly all quite small governments) remained incomplete. For nonrespondent governmental units and agencies, prior-year data were used. (None of the individually published governments show prior-year expenditure data because they are either office or field compiled.)

### Employment data

Federal Government civilian employment data were obtained from records maintained by the U.S. Office of Personnel Management. These records did not provide the information necessary to compute full-time equivalent employment.

Mail instruments tailored to the various types of governments and agencies surveyed supplied the statistics for State and local governments. State government data were based on a complete canvass of all State departments, agencies, and institutions, some of which were obtained from central respondents of certain States. Questionnaires for local governments were generally sent to a local central reporting office, supplemented by special mailings to dependent agencies. Usable replies were received from about 85%-90% of the local mail panel depending upon the year. For nonrespondent governmental units and agencies, prior-year data were used. (Individually published local governments are footnoted where prior-year data are used. Because they are canvassed on an agency basis, State government data may consist partly of prior-year amounts.)

For the mail portion of the surveys, figures reported by government officials are generally accepted as being substantially correct. In some cases, varying interpretations of the instructions or deficiencies in governmental employment and fiscal records may make it difficult for officials to render complete and accurate reports for their governments. These difficulties are dealt with by—

- careful definition of terms and detailed instructions in difficult cases
- supplemental correspondence and telephone followup to officials
- intensive examination of data collected, that is, verification of internal consistency and comparison with previous reports and other sources of data.

Prior to 1986, full-time equivalent employment (FTE) was computed using a payroll-based formula:

$$\text{FTE} = \frac{\text{total full- and part-time pay}}{\text{full-time pay}} \times \text{full-time employees}$$

Beginning with 1986, full-time equivalent employment is computed using a formula based on hours worked:

$$\text{FTE} = \frac{\text{part-time hours paid}}{\text{standard number of hours for full-time employees}} \times \text{full-time employees}$$

The formula was changed because the payroll-based formula necessarily assumed that there is little or no difference between average wage rates for full-time and part-time workers; however, this is seldom the case. Part-time pay scales are generally below those for full-time workers, thus resulting in an understatement of full-time equivalent employment. A preliminary estimate is that the understatement falls between 2.8% and 3.8% at the national level. The payroll-based methodology may also produce a "trend bias" if the rate of change in part-time employment is different from that in full-time employment. Users should keep in mind the expected understatement of FTE in years prior to 1986 when making trend comparisons.

#### Data limitations

Data limitation issues are also addressed elsewhere in the Survey methodology where appropriate. Generally, data limitations reflect the fact that the surveys from which this report was extracted are not designed specifically to obtain data on justice functions.

The survey sample for the local government justice expenditure and employment estimates in this report also was not designed specifically to produce data on these activities. (The sample design is described elsewhere in the Survey methodology.) Thus, the sampling variability, or "standard error," for the justice activities is apt to be larger than for the major categories in the Census Bureau's regular surveys and for the same functions in the CJEE series.

The "standard error" is a measurement of variation among the estimates from all possible samples, of which this is one, having the same size and selected using the same sampling design. Estimates derived from the different samples would vary from each other (and also from a complete census using the same data collection procedures). The standard error, therefore, measures the precision with which an estimate from one of these samples approximates the average result of all the possible samples.

Estimates of the standard errors for the sample-based aggregates in this report were previously calculated for local government fiscal 1979 police protection direct current expenditure and for October 1979 local police total full-time equivalent employment from the regular programs. For the expenditure aggregates, the standard errors were found to be 1% or less for 25 States, between 1% and 2% for 17 States, and between 2% and 5% for 8 States. For the employment aggregates, these were found to be 1% or less for 19 States, between 1% and 2% for 18 States, and between 2% and 5% for 13 States. Sampling errors of the 1983 data are expected to be of the same order of magnitude because the same panel and survey procedures were used in both the 1979 and 1983 surveys.

In reviewing the sample-based estimates in this report, bear in mind that the sampling variability for smaller components, such as type of local government detail, is likely to be greater than the standard errors listed above. Conversely, because State government figures are not subject to sampling variation, the State-local aggregates shown for individual States are more reliable (on a relative standard error basis) than the local government estimates they include. Because the national estimates of local government expenditure and employment are based on summations of individual State data, they are more reliable than the State-area data.

The data also are subject to possible inaccuracies in classification, response, and processing. Every effort was made to keep such errors to a minimum through care in examining, editing, and tabulating the data submitted by government officials. Followup procedures were used extensively to clarify inadequate and inconsistent survey returns.

Readers should generally be cautious in comparing governments because differences among State and local governments in functional responsibilities, governmental structure, degree of urbanization, and population density can affect the comparability of expenditure and employment data. For example, some State governments directly administer certain activities that elsewhere are undertaken by local governments, with or without fiscal aid, and the same variation in the division of responsibilities exists for counties and cities.

**Survey methodology:  
Sources and limitations  
of the data**

---

**Data differing from  
other publications**

The figures presented in this report differ in some cases from those previously published in the Census Bureau's annual finance and employment reports because of the more intensive review procedures used for this special compilation, the refinement of data involved, and the definitional differences discussed in this report.

The data in this report for 1985 also differ from those previously published by BJS in its CJEE series. The previously published BJS data for 1985 should be used in trend analyses with other CJEE data for 1971-79 and 1988. The 1985 data in this Extracts report should be used in trend analyses with the 1984-86 data here and with the 1980-83 data published in the Extracts series.

# Trends: Selected years, 1980-86

**Table A. Total justice expenditure.**

Note: Detail may not add to total because of rounding. Duplicative transactions between levels of governments are excluded from the total for all governments, the State and local total, and the local total. Such intergovernmental expenditure consists of payments from one government to another and eventually will show up as a direct expenditure of a recipient government.  
...Not available.

<sup>a</sup>The 1980 and 1981 Extracts report displays data for Federal judicial activities, but these exclude prosecution and legal services as well as public defense and are not comparable with data for 1982-86; hence, they are not displayed here.

<sup>b</sup>1980 and 1981 State government totals include a residual "other" category not displayed separately here, but included in the total.

Intergovernmental expenditure .....	( <sup>3</sup> )	64 000	924 013	48 500	(X)	(X)	(X)

<sup>1</sup>Local government data are estimates subject to sampling variability; see text for details.

<sup>2</sup>Federal Government data are for the fiscal period beginning October 1, 1985 and ending September 30, 1986.

<sup>3</sup>The total line for each sector, and for the total justice system, excludes duplicative intergovernmental expenditure amounts. This was done to avoid the artificial inflation that would result if an intergovernmental expenditure of a government were tabulated and then counted again when the recipient government(s) expended that amount. The intergovernmental expenditure lines are not totaled for the same reason. See text for details.

<sup>1</sup>Local government data are estimates subject to sampling variability; see text for details.

<sup>2</sup>Estimated population of States as of July 1 is derived from the Bureau of the Census, press release (CB87-205), released December 30, 1987.

<sup>3</sup>Includes outlays of States and all types of local governments including independent school districts and special districts, which are not displayed separately. The "Local, total" lines, which include these districts, will not equal the sum of the "Counties" and "Municipalities" lines.

<sup>4</sup>Justice system expenditure of independent school districts and special districts (primarily for special police forces) are not available; see text for details.

<sup>5</sup>Except for the individually published cities shown in table 15 California municipal expenditure data for judicial and legal activities are for fiscal year 1985.

<sup>1</sup>Local government data are estimates subject to sampling variability; see text for details.

<sup>2</sup>For each State and the United States summary, the expenditure figures shown on the "Local, total" lines and the combined State-local total lines (opposite each State's name) exclude duplicative intergovernmental transactions. Thus, the "Local, total" lines include intergovernmental payments only to the State government and the combined State-local total lines exclude all intergovernmental payments. See text for details.

<sup>3</sup>Direct current data for total justice system and corrections include a \$7,933,000. payment to the Federal Government.

<sup>4</sup>Except for the individually published cities shown in table 15 California municipal expenditure data for judicial and legal activities are for fiscal year 1985.

<sup>1</sup>Local government data are estimates subject to sampling variability; see text for details.

<sup>2</sup>Includes employment of States and all types of local governments including independent school districts and special districts, which are not displayed separately. The "Local, total" lines, which include these districts, will not equal the sum of the "Counties" and "Municipalities" lines.

<sup>3</sup>Justice system employment of independent school districts and special districts (primarily for special police forces) are not available; see text for details.

Note: October payroll data may not add due to rounding.

<sup>1</sup>Local government data are estimates subject to sampling variability; see text for details.

<sup>2</sup>Includes payrolls of States and all types of local governments including independent school districts and special districts, which are not displayed separately. The "Local, total" lines, which include these districts, will not equal the sum of the "Counties" and "Municipalities" lines.

<sup>3</sup>Justice system payrolls of independent school districts and special districts (primarily for special police forces) are not available; see text for details.

Intergovernmental expenditure .....	( <sup>3</sup> )	72 000	811 532	45 426	(X)	(X)	(X)

<sup>1</sup>Local government data are estimates subject to sampling variability; see text for details.

<sup>2</sup>Federal Government data are for the fiscal period beginning October 1, 1984 and ending September 30, 1985.

<sup>3</sup>The total line for each sector, and for the total justice system, excludes duplicative intergovernmental expenditure amounts. This was done to avoid the artificial inflation that would result if an intergovernmental expenditure of a government were tabulated and then counted again when the recipient government(s) expended that amount. The intergovernmental expenditure lines are not totaled for the same reason. See text for details.

<sup>1</sup>Local government data are estimates subject to sampling variability; see text for details.

<sup>2</sup>Estimated population of States as of July 1 is from the Bureau of the Census, press release (CB87-02), released December 31, 1986.

<sup>3</sup>Includes outlays of States and all types of local governments including independent school districts and special districts, which are not displayed separately. The "Local, total" lines, which include these districts, will not equal the sum of the "Counties" and "Municipalities" lines.

<sup>4</sup>Justice system expenditure of independent school districts and special districts (primarily for special police forces) are not available; see text for details.

<sup>1</sup>Local government data are estimates subject to sampling variability; see text for details.

<sup>2</sup>For each State and the United States summary, the expenditure figures shown on the "Local, total" lines and the combined State-local total lines (opposite each State's name) exclude duplicative intergovernmental transactions. Thus, the "Local, total" lines include intergovernmental payments only to the State government and the combined State-local total lines exclude all intergovernmental payments. See text for details.

<sup>3</sup>Direct current data for total justice system and corrections include a \$2,081,000. payment to the Federal Government.

<sup>1</sup>Local government data are estimates subject to sampling variability; see text for details.

<sup>2</sup>Includes employment of States and all types of local governments including independent school districts and special districts, which are not displayed separately. The "Local, total" lines, which include these districts, will not equal the sum of the "Counties" and "Municipalities" lines.

<sup>3</sup>Justice system employment of independent school districts and special districts (primarily for special police forces) are not available; see text for details.

Note: October payroll data may not add due to rounding.

<sup>1</sup>Local government data are estimates subject to sampling variability; see text for details.

<sup>2</sup>Includes payrolls of States and all types of local governments including independent school districts and special districts, which are not displayed separately. The "Local, total" lines, which include these districts, will not equal the sum of the "Counties" and "Municipalities" lines.

<sup>3</sup>Justice system payrolls of independent school districts and special districts (primarily for special police forces) are not available; see text for details.

**Table 27. Police protection sworn and nonsworn employment and payrolls and percent distribution of full-time equivalent employment by State and type of government, October 1985—Con.**

[Payroll amounts in thousands of dollars. For meaning of symbols, see text]

Intergovernmental expenditure .....	( <sup>3</sup> )	40 000	590 458	42 239	(X)	(X)	(X)

<sup>1</sup>Local government data are estimates subject to sampling variability; see text for details.

<sup>2</sup>Federal Government data are for the fiscal period beginning October 1, 1983 and ending September 30, 1984.

<sup>3</sup>The total line for each sector, and for the total justice system, excludes duplicative intergovernmental expenditure amounts. This was done to avoid the artificial inflation that would result if an intergovernmental expenditure of a government were tabulated and then counted again when the recipient government(s) expended that amount. The intergovernmental expenditure lines are not totaled for the same reason. See text for details.

**Table 42. Percent distribution of employment and payrolls for the justice system by level of government, October 1984**

<sup>1</sup>Local government data are estimates subject to sampling variability; see text for details.

<sup>2</sup>Estimated population of States as of July 1 is derived from Bureau of the Census, Current Population Reports, Series P-25, No. 998, December 1986.

<sup>3</sup>Includes outlays of States and all types of local governments including independent school districts and special districts, which are not displayed separately. The "Local, total" lines, which include these districts, will not equal the sum of the "Counties" and "Municipalities" lines.

<sup>4</sup>Justice system expenditure of independent school districts and special districts (primarily for special police forces) are not available; see text for details.

**Table 44. Justice system expenditure by character, State and type of government, fiscal**

<sup>1</sup>Local government data are estimates subject to sampling variability; see text for details.

<sup>2</sup>For each State and the United States summary, the expenditure figures shown on the "Local, total" lines and the combined State-local total lines (opposite each State's name) exclude duplicative intergovernmental transactions. Thus, the "Local, total" lines include intergovernmental payments only to the State government and the combined State-local total lines exclude all intergovernmental payments. See text for details.

<sup>3</sup>Direct current data for total justice system and corrections include a \$2,381,000. payment to the Federal Government.

<sup>1</sup>Local government data are estimates subject to sampling variability; see text for details.

<sup>2</sup>Includes employment of States and all types of local governments including independent school districts and special districts, which are not displayed separately. The "Local, total" lines, which include these districts, will not equal the sum of the "Counties" and "Municipalities" lines.

<sup>3</sup>Justice system employment of independent school districts and special districts (primarily for special police forces) are not available; see text for details.

Note: October payroll data may not add due to rounding.

<sup>1</sup>Local government data are estimates subject to sampling variability; see text for details.

<sup>2</sup>Includes payrolls of States and all types of local governments including independent school districts and special districts, which are not displayed separately. The "Local, total" lines, which include these districts, will not equal the sum of the "Counties" and "Municipalities" lines.

<sup>3</sup>Justice system payrolls of independent school districts and special districts (primarily for special police forces) are not available; see text for details.

## Appendix

# Definitions of terms and concepts

The following is a glossary of terms and concepts used in this report and comments regarding their limitations. These definitions are based largely on those used in the Census Bureau's governmental finances and employment statistics program.

These terms are grouped into four categories:

- governmental units and types of governments
- governmental expenditure
- governmental employment
- governmental functions.

### Governmental units and types of governments

A **government** is an organized entity whose governmental character is evidenced by popular election of the officials or their appointment by public officials, a high degree of public accountability, and the power to raise revenue to provide authorized services. In addition, a governmental unit must have sufficient discretion in the management of its own affairs to distinguish it from the administrative structure of any other governmental unit.<sup>1</sup>

**Federal Government.** The term Federal, as used in this report, encompasses all activities of the U.S. Government other than employment of the Armed Forces. District of Columbia data are excluded from this category and included with data for municipalities.

**State governments.** This category refers to the governments of the 50 States that constitute the United States.

**Local governments.** The Bureau of the Census classifies local governments into five major types:

- county
- municipality
- township
- independent school district
- special district.

<sup>1</sup>For detailed information concerning the identification and classification of governments, see volume 1, Governmental Organization, of the 1987 Census of Governments (GC87(1)-1).

**Counties.** Organized county governments are found throughout the Nation except in Connecticut, the District of Columbia, Rhode Island, and limited portions of a few other States. These governments are legally designated as "boroughs" in Alaska and "parishes" in Louisiana. Excluded from county government statistics and included with municipalities or townships are certain local governments that combine area and governmental characteristics of both counties and municipalities or townships. (See "Independent cities and consolidated city-county governments" in the Introduction.)

**Municipalities and townships.** As used in this report, "municipalities" includes two of the Census Bureau's separate classes of local governments—"municipalities" and "townships." A municipality is a political subdivision within which a municipal corporation has been established to provide general local government services for a specific population concentration in a defined area. A municipality may be legally termed a city, village, borough (except in Alaska), or town (except in the New England States, Minnesota, New York, and Wisconsin). Included in this category are certain cities that are completely or substantially consolidated with their county governments, operate outside the geographic limits of any county, or for other reasons have no organized county government operations within their boundaries. (See "Independent cities and consolidated city-county governments" in the Introduction.)

**Townships**, as distinguished from municipalities, are created to serve inhabitants of areas defined without regard to population concentration. This classification is applied to local governments in 20 States, including government units officially designated as "towns" in the 6 New England States, New York, and Wisconsin; some "plantations" in Maine; and some "locations" in New Hampshire. In Minnesota the terms "town" and "township" are used interchangeably. In this report, data for townships are included under "municipalities."

**Independent school districts.** These governments are organized local entities providing public elementary, secondary, and/or higher education, which, under State law, have sufficient administration and fiscal autonomy to qualify as separate governments. Excluded are dependent public school systems of county, municipal, township, or State governments. Justice data are not collected for these districts because these governments generally perform no justice functions. However, data for these governments are included in the denominator when justice expenditure is presented as a percentage of all government expenditure to allow comparisons across States and governments that make varying use of these districts. (See the Survey methodology.)

**Special districts.** These are organized local entities (other than counties, municipalities, townships, and school districts) authorized by State law to provide a limited number of designated functions and with sufficient autonomy to qualify as separate governments. They are known by a variety of names, including districts, authorities, boards, and commissions. Justice data are not collected for these districts because these governments generally perform few justice functions and then only as an adjunct to their primary purpose (for example, policing airports or parks). However, data for these governments are included in the denominator when justice expenditure is presented as a percentage of all government expenditure to allow comparisons across States and governments that make varying use of these districts. (See the Survey methodology.)

**Governmental expenditure**

**Expenditure** is all amounts of money paid out (net of recoveries and any correcting transactions) other than for retirement of debt (including interest), investment in securities, extensions of loans, or agency transactions. It includes only external cash payments and excludes any intragovernmental transfers and noncash transactions, such as the provision of meals or housing of employees. It also includes any payments financed from borrowing, fund balances, intergovernmental revenue, and other current revenue. In several instances, two or more governments share the expense of maintaining a court or a justice agency. In these cases, the allowable direct expenditure amount is reported for each government under the appropriate category.

When a government pays pensions directly to retired employees from appropriated funds, such payments are included as expenditure of the government concerned. However, State and local government contributions to retirement systems they operate are not included in expenditure data because many governments make lump-sum contributions to plans covering all government employees and cannot report separately for justice employees. Neither in governments' basic accounting records (from which criminal justice expenditure figures are drawn) nor in the records of their general-coverage employee benefit systems is there usually any breakdown of amounts contributed in terms of the various agencies or functions involved. Nor has an adequate procedure for calculating the proportion of such contributions allocable to justice employees been developed because of the wide variation in the coverage of various plans, employee status requirements, benefit rates, and so forth.

For those governments whose records reflect contributions of justice employees separately, separate data were obtained. However, these data are subject to the same variation referred to above, and neither the amount nor the quality of the data reported would permit any attempt to estimate total contributions for all similar governments in a given State. Given the problems involved, no estimation procedure seems feasible. Such data as were reported separately were therefore excluded from total criminal justice expenditures.

Expenditure is divided into major categories by character and object as follows:

**Direct expenditure** is all expenditure except that classified as intergovernmental and is further divided into two categories:

- **direct current**, which includes salaries, wages, fees, commissions, and the purchase of supplies, materials, and contractual services
- **capital outlay**, which includes expenditure for the three object categories of construction, equipment, and the purchase of land and existing structures.

Data for the three **capital outlay** object categories are presented separately in this report for State construction of correctional institutions; the "other" category in those tables includes equipment and the purchase of land and existing structures.

**Construction:** Production of fixed works and structures as well as additions, replacements, and major alterations thereto undertaken either on a contract basis by private contractors or through force-account construction by the employees of the government. Included are the planning and designing of specific projects; grading, landscaping, and other site improvements; and the provision of equipment and facilities that are integral parts of the structure.

**Equipment:** Purchase and installation of apparatus, furnishings, office equipment, motor vehicles, and the like having an expected life of more than 5 years. This includes both additional equipment and replacements. Rentals for equipment, including rental payments that may be credited to the purchase price if purchase options are exercised, are classified as direct current expenditure. Equipment and facilities that are integral parts of constructed structures are classified under "construction."

**Purchase of land and existing structures:** Purchase of these assets as such, purchase of rights-of-way, and title search and similar activities associated with purchase transactions.

Expenditure for interest on general debt, assistance and subsidies, and insurance benefits are not applied to specific functions because they are not ordinarily available on a functional basis from government financial reports. In instances where bonded or mortgaged general indebtedness is identified for specific purposes, the interest payments are aggregated with other interest expenditures, which makes reliable and consistent breakouts of such data over a long period of time impossible.

**Intergovernmental expenditure** comprises payments from one government to another, including grants-in-aid, shared revenues, fiscal assistance, and amounts for services performed by one government for another on a reimbursable or cost-sharing basis (for example, payments by one government to another for boarding prisoners). It excludes amounts paid to other governments for purchase of commodities, property, or utility services; any tax imposed and paid as such; and employer contributions for social insurance (for example, contributions to the Federal Government for old-age, survivors', disability, and health insurance as well as local government payments to State-operated retirement systems on behalf of their employees).

**Total expenditure** is direct and inter-governmental expenditure of a government or type of government for justice activities. In the expenditure tables, certain totals have been adjusted to exclude duplicative inter-governmental expenditure amounts. For example, money paid by a State government to a county government within that State is reported by the State government as an intergovernmental expenditure and by the county government as a direct expenditure when the money is spent (for salaries, wages, equipment, and so forth). Therefore, to arrive at a combined State-local government total that does not duplicate these transactions, intergovernmental expenditure amounts are deducted from the State-local total because those amounts also are reflected in the direct expenditure of the recipient government. The same treatment is used for intergovernmental payments between counties and municipalities within the same State when computing local totals. Totals reported for "all governments" also are adjusted to exclude duplicative intergovernmental expenditure involving the Federal Government.

The columns labeled "total expenditure" in tables 4, 11, and 16 and those labeled "total direct expenditure" in tables 5, 12, and 17 present data for all government functions, including justice and nonjustice activities. The comparable tables for the 1971-79 reports limited these columns to "general expenditure," which excluded utility system expenditure, liquor store expenditure, and insurance trust expenditure. The change to the all-inclusive "total expenditure" category was made in 1982 to allow comparison of justice expenditure with all government spending. Comparable data for all years can be found in annual Census Bureau Governmental Finances reports, Series GF, No. 5.

## Governmental employment

**Employment and employees**, as used in this report, refer to all persons gainfully employed by and performing services for a government. Employees include all persons paid for personal services performed, including persons paid from federally funded programs, paid elected officials, persons in a paid-leave status, and persons paid on a "per meeting," annual, semiannual, or quarterly basis. Unpaid officials, pensioners, persons whose work is performed on a fee basis, and contractors and their employees are excluded from the count of employees.

Under this definition are two classes:

**Full-time employees** are those persons whose hours of work represent full-time employment in their employer government during the pay period including October 12 of the year specified in the table.<sup>2</sup> Generally, it includes full-time temporary or seasonal workers employed during that pay period.

**Part-time employees** are those persons who work less than the standard number of hours for full-time work in their employer government during the pay period including October 12 of the year specified in the table and persons who are paid by more than one government.

**Full-time equivalent employment** is a statistical measure that estimates the total workforce accounting for the less than full-time employment of part-time employees. Prior to 1986 the formula for computing full-time equivalent employment was payroll based; specifically, it was calculated by dividing the total payroll amount (full-time plus part-time)

by the full-time payroll amount and then multiplying the resultant quotient by the number of full-time employees. Beginning in 1986, it is computed by dividing the part-time hours paid by the standard number of hours for full-time employees in the particular government and then adding the resultant quotient to the number of full-time employees. In both formulas the calculation is performed separately at the individual function level for each respondent government. Consequently, summaries by State, type of government, and function are aggregates of individual calculations. Users should consult the Survey methodology for additional information before making comparisons of data from the two formulas.

**October payrolls** shown in this report represent gross payrolls for the 1-month period of October and comprise the gross payroll before deductions. It includes all salaries, wages, fees, or commissions paid to employees during the pay period including October 12 of the year cited in the table. Payroll amounts reported for a period other than 1 month were converted to represent an amount for the month of October.

**Average monthly salaries** are for full-time employees only and are calculated by dividing full-time employee payrolls by the number of full-time employees for October of the year indicated in the table.

<sup>2</sup>October is used because public employment is relatively stable in that month and free from seasonal employment fluctuations.

**Governmental functions**

**General government functions** include all activities other than those classified as public utilities (water supply, electric power, gas supply, and transit systems), liquor stores (dispensaries operated by 17 State governments and by local governments of 5 States), and insurance trust systems (no employment data are associated with insurance trusts).

**Police protection** is the function of enforcing the law, preserving order and traffic safety, and apprehending those who violate the law, whether these activities are performed by a police department, a sheriff's department, or a special police force maintained by an agency whose prime responsibility is outside the justice system but that has a police force to perform these activities in its specialized area (geographic or functional).

This category includes—

- regular police services
- police patrols and communications
- crime prevention activities
- temporary lockups and "holding tanks"
- traffic safety and engineering (but not highway planning and engineering)
- vehicular inspection
- buildings used exclusively for police purposes
- the maintenance of buildings used for police purposes
- medical examiners and coroners
- law enforcement activities of sheriffs' offices
- specialized police forces (including public and private contract forces) such as airport police, toll and nontoll highway police, toll and nontoll bridge and tunnel police, housing police, maritime police, park police, transit and other utility system police, college and university campus police, and alcoholic beverage control agents.

Excluded are vehicular inspection and licensing, traffic safety and engineering, fish and game wardens, fire marshals, and the like. Private security police are outside the scope of the survey.

The special police forces included in the data are only those that are part of a general purpose government. Security forces, building guards, school crossing guards, and meter maids without general arrest powers were excluded. Those special police forces that are part of independent school districts or special districts are not included in the data, inasmuch as these districts are not general purpose governments.

Police protection employment data are further divided between—

- sworn employees, which represent persons with the powers of arrest
- nonsworn employees, which are all others.

In most States, sheriffs' departments are multifunctional agencies providing police protection, judicial, and/or correctional services. In order to allocate expenditure and employment data to the proper activity, the data for sheriffs' departments are prorated.

Short-term custody and detention are considered part of the police protection function. Data for lockups or "tanks" holding prisoners less than 48 hours are included under "police protection." Data for institutions with authority to hold prisoners 48 hours or more are included in the corrections category.

**Judicial and legal services** covers all civil and criminal activities associated with courts, including prosecution and public defense. It includes the following court functions covered as a separate category in CJEE:

- civil and criminal functions of courts at all levels of legal jurisdiction—appellate (last resort and intermediate), general jurisdiction, and limited jurisdiction
- activities associated with courts, such as law libraries, grand juries, petit juries, and medical and social services activities (except probation, where separately identifiable)
- court reporters, judicial councils, bailiffs, and "register of wills and similar probate functions"
- court ("civil") activities of sheriffs' offices in some jurisdictions. (See the "Definitional differences" box in the Survey methodology.)

Also included under "judicial and legal services" are all civil and criminal justice activities of prosecution and legal services agencies. It includes the following prosecution and legal services functions covered as a separate category in CJEE:

- attorneys general, district attorneys, State's attorneys, and their variously named equivalents
- corporation counsels, solicitors, and legal departments with various names including those providing legal advice to the chief executives and subordinate departmental officers, representation of the government in lawsuits, and the prosecution of accused violators of criminal law
- various investigative agencies having full arrest powers and attached to offices of attorneys general, district attorneys, and their variously named equivalents.

---

These activities are included whether performed by one office or several because in some jurisdictions a single officer provides all legal services, whereas in others a prosecutor's office handles only criminal matters and a separate attorney's office performs all civil legal services.

Also included under "judicial and legal services" are the civil and criminal justice activities of public defenders, other agencies that provide legal counsel and representation in either criminal or civil proceedings, and other government programs that pay the fees of court-appointed counsel. It includes the following public defense activities covered as a separate category in CJEE:

- court-paid fees to individually retained counsel
- fees paid by the court to court-appointed counsel
- government contributions to private legal aid societies and bar-association-sponsored programs
- activities of an established public defender office or program.

This category excludes—

- monetary judgments and claims or other payments as a government as a defendant in judicial or administrative proceedings
- legal units of noncriminal justice agencies, whose functions may be performed by a legal services department in other jurisdictions (such as a county counsel).

**Corrections** is that function of government involving the confinement and rehabilitation of adults and juveniles convicted of offenses against the law and the confinement of persons suspected of a crime and awaiting adjudication. (Data for lockups or "tanks" holding prisoners less than 48 hours are included under "police protection.")

Corrections direct expenditure for State governments is further divided into two subcategories:

- correctional institutions
- other corrections.

Correctional institutions are any facilities for the confinement and correction of convicted adults or juveniles adjudicated delinquent or in need of supervision and for the detention of those adults and juveniles accused of a crime and awaiting trial or hearing. Correctional institutions include—

- prisons and penitentiaries
- reformatories
- jails
- houses of correction
- other variously named correctional institutions, such as correctional farms, workhouses, industrial schools, and training schools
- institutions and facilities exclusively for the confinement of the criminally insane
- institutions and facilities for the examination, evaluation, classification, and assignment of inmates
- facilities for the confinement, treatment, and rehabilitation of drug addicts and alcoholics, if the institution is administered by a correctional agency.

When an institution maintains a prison industry or agricultural program, data on the cost of production or the value of prison labor used by agencies of the same government, if identifiable, are excluded (and classified as expenditure for the function using the product or services). Expenditure for the manufacture, production, sale, and distribution of goods produced for sale or use outside the government is included under this category. It excludes the cost of maintaining prisoners in institutions of other governments.

Other corrections consists of all noninstitutional correctional activities, including—

- parole boards and programs
- pardon boards
- nonresidential resettlement or halfway houses for those not in need of institutionalization
- probation activities and programs, even if administered by a court (but see the "Definitional differences" box in the Survey methodology)
- correctional administration not directly connectable to institutions
- payments to another government for boarding prisoners
- miscellaneous items that cannot be directly related to institutional care.

# Now you can receive BJS press releases and other current data from the NCJRS Electronic Bulletin Board!

---

The Electronic Bulletin Board provides quick and easy access to new information—use your personal computer and modem, set at 8-N-1 (rates 300 to 2400 baud), and call 301-738-8895, 24 hours a day.

Once online, you will be able to review current news and announcements from BJS and its Justice Statistics Clearinghouse, including new publication listings and conference calendars.

For more information about the Bulletin Board, call 1-800-732-3277.

## **BJS menu options**

- 1. BJS press releases**
- 2. Latest BJS findings**
- 3. Justice Statistics Clearinghouse information**
- 4. BJS conference activity**
- 5. News from the Drugs & Crime Data Center & Clearinghouse**
- 6. National Archive of Criminal Justice Data**
- 7. News from State Statistical Analysis Centers**

## Bureau of Justice Statistics reports

(Revised July 1991)

Call toll-free 800-732-3277 (local 301-251-5500) to order BJS reports, to be added to one of the BJS mailing lists, or to speak to a reference specialist in statistics at the Justice Statistics Clearinghouse, National Criminal Justice Reference Service, Box 6000, Rockville, MD 20850.

BJS maintains the following mailing lists:

- Law enforcement reports (new)
- Drugs and crime data (new)
- Justice spending & employment
- White-collar crime
- National Crime Survey (annual)
- Corrections (annual)
- Courts (annual)
- Privacy and security of criminal history information and information policy
- Federal statistics (annual)
- BJS bulletins and special reports (approximately twice a month)
- Sourcebook of Criminal Justice Statistics (annual)

Single copies of reports are free; use NCJ number to order. Postage and handling are charged for bulk orders of single reports. For single copies of multiple titles, up to 10 titles are free; 11-40 titles \$10; more than 40, \$20; libraries call for special rates.

Public-use tapes of BJS data sets and other criminal justice data are available from the National Archive of Criminal Justice Data (formerly CJAIN), P.O. Box 1248, Ann Arbor, MI 48106 (toll-free 1-800-999-0960).

## National Crime Survey

The Nation's two crime measures: Uniform Crime Reports and the National Crime Survey, NCJ-122705, 4/90

Criminal victimization in the U.S.:

- 1973-88 trends, NCJ-129392, 7/91
- 1989 (final), NCJ-129391, 6/91
- 1988 (final), NCJ-122024, 10/90
- 1987 (final report), NCJ-115524, 6/89

BJS special reports

- Handgun crime victims, NCJ-123559, 7/90
- Black victims, NCJ-122562, 4/90
- Hispanic victims, NCJ-120507, 1/90
- The redesigned National Crime Survey: Selected new data, NCJ-114746, 1/89
- Motor vehicle theft, NCJ-109978, 3/88
- Elderly victims, NCJ-107676, 11/87
- Violent crime trends, NCJ-107217, 11/87
- Robbery victims, NCJ-104638, 4/87
- Violent crime by strangers and non-strangers, NCJ-103702, 1/87
- Preventing domestic violence against women, NCJ-102037, 8/86
- Crime prevention measures, NCJ-100438, 3/86
- The use of weapons in committing crimes, NCJ-99643, 1/86
- Reporting crimes to the police, NCJ-99432, 12/85
- The economic cost of crime to victims, NCJ-93450, 4/84

BJS bulletins:

Female victims of violent crime, NCJ-127187, 1/91

Redesign of the National Crime Survey, NCJ-111457, 3/89

The seasonality of crime victimization, NCJ-111033, 6/88

Crime and older Americans information package, NCJ-104569, \$10, 5/87

Victimization and fear of crime: World perspectives, NCJ-93872, 1/85, \$9.15

The National Crime Survey: Working papers, vol. I: Current and historical perspectives, NCJ-75374, 8/82

vol. II: Methodology studies, NCJ-90307

## Corrections

BJS bulletins and special reports:

- Prisoners in 1990, NCJ-129198, 5/91
- Women in prison, NCJ-127991, 4/91
- Capital punishment 1989, NCJ-124545, 10/90
- Violent State prison inmates and their victims, NCJ-124133, 7/90
- Prisoners in 1989, NCJ-122716, 5/90
- Prison rule violators, NCJ-120344, 12/89
- Capital punishment 1988, NCJ-118313, 7/89
- Recidivism of prisoners released in 1983, NCJ-116281, 4/89
- Drug use and crime: State prison inmate survey, 1986, NCJ-111940, 7/88
- Time served in prison and on parole 1984, NCJ-108544, 12/87
- Profile of State prison inmates, 1986, NCJ-109926, 1/88
- Imprisonment in four countries, NCJ-103967, 2/87
- Population density in State prisons, NCJ-103204, 12/86
- State and Federal prisoners, 1925-85, NCJ-102494, 11/86
- Prison admissions and releases, 1983, NCJ-100582, 3/86
- The prevalence of imprisonment, NCJ-93657, 7/85

Race of prisoners admitted to State and Federal institutions, 1926-86, NCJ-125618, 6/91

National corrections reporting program, 1985, NCJ-123522, 12/90

Prisoners at midyear 1990 (press release), 10/90

Correctional populations in the U.S.:

- 1988, NCJ-124280, 3/91
  - 1987, NCJ-118762, 12/89
  - 1986, NCJ-111611, 2/89
- Historical statistics on prisoners in State and Federal institutions, yearend 1925-86, NCJ-111098, 6/88
- 1984 census of State adult correctional facilities, NCJ-105585, 7/87

Census of jails and survey of jail inmates:

- BJS bulletins and special reports: Drug use and jail inmates, NCJ-130389, 7/91
- Jail inmates 1990, NCJ-129756, 6/91
- Profile of jail inmates 1989, NCJ-129097, 4/91
- Jail inmates, 1989, NCJ-123264, 6/90
- Population density in local jails, 1988, NCJ-122299, 3/90
- Census of local jails, 1988 (BJS bulletin), NCJ-121101, 2/90
- Jail inmates, 1987, NCJ-114319, 12/88
- Drunk driving, NCJ-109945, 2/88
- Jail inmates, 1986, NCJ-107123, 10/87
- Census of local jails 1988, vol. I, Summary, NCJ-127992, 4/91
- Census of local jails, 1983: Data for individual jails, vols. I-IV, Northeast, Midwest, South, West, NCJ-112796-9; vol. V, Selected findings, methodology, summary tables, NCJ-112795, 11/88

## Parole and probation

BJS bulletins

- Probation and parole: 1989, NCJ-125833, 11/90
- 1988, NCJ-119970, 11/89

BJS special reports

- Recidivism of young parolees, NCJ-104916, 5/87

## Children in custody

- Census of public and private juvenile detention, correctional, and shelter facilities, 1975-85, NCJ-114065, 6/89
- Survey of youth in custody, 1987 (special report), NCJ-113365, 9/88

## Law enforcement management

BJS bulletins and special reports:

- Police departments in large cities, 1987, NCJ-119220, 8/89
- Profile of state and local law enforcement agencies, NCJ-113949, 3/89

## Expenditure and employment

BJS bulletins:

- Justice expenditure and employment: 1988, NCJ-123132, 7/90
- Anti-drug abuse formula grants: Justice variable pass-through data, 1988 (BJS Technical Report), NCJ-120070, 3/90
- Justice expenditure and employment: 1988 (full report), NCJ-125619, 7/91
- 1985 (full report), NCJ-106356, 8/89
- Extracts, 1984, 1985, 1986, NCJ-124139, 7/91

## Courts

BJS bulletins:

- Pretrial release of felony defendants, 1988, NCJ-127202, 2/91
- Felony sentences in State courts, 1988, NCJ-126923, 12/90
- Criminal defense for the poor, 1986, NCJ-112919, 9/88

## See order form on last page

- Please put me on the mailing list for—**
- Law enforcement reports**—national data on State and local police and sheriffs' departments: operations, equipment, personnel, salaries, spending policies, programs
- Federal statistics**—data describing Federal case processing, from investigation through prosecution, adjudication, and corrections
- Drugs and crime data**—sentencing and time served by drug offenders, drug use at time of crime by jail inmates and State prisoners, and other quality data on drugs, crime, and law enforcement
- BJS bulletins and special reports**—timely reports of the most current justice data
- White-collar crime**—data on the processing of Federal white-collar crime cases
- Privacy and security of criminal history information and information policy**—new legislation; maintaining and releasing intelligence and investigative records; data quality issues
- Justice expenditure and employment reports**—annual spending and staffing by Federal/State/local governments and by function (police, courts, etc.)
- Prosecution and adjudication in State courts**—case processing from prosecution through court disposition, State felony laws, felony sentencing, criminal defense
- Corrections reports**—results of sample surveys and censuses of jails, prisons, parole, probation, and other corrections data
- National Crime Survey reports**—the only regular national survey of crime victims
- Sourcebook of Criminal Justice Statistics** (annual)—broad-based data from 150+ sources (400+ tables, 10+ figures, subject index, annotated bibliography, addresses of sources)
- Send me a form to sign up for **NIJ Reports** (free 6 times a year), which abstracts both private and government criminal justice publications and lists upcoming conferences and training sessions in the field.

To be added to any BJS mailing list, please copy or cut out this page, fill in, fold, stamp, and mail to the Justice Statistics Clearinghouse/NCJRS.

You will receive an annual renewal card. If you do not return it, we must drop you from the mailing list.

To order copies of recent BJS reports, check here  and circle items you want to receive on other side of this sheet.

- Finance
  - Money laundering
  - Profits

#### The fight against drugs

- Enforcement
  - Border interdiction
  - Investigation
  - Seizure & forfeiture
  - Prosecution
- Consumption reduction
  - Prevention
  - Education
  - Treatment

#### Consequences of drug use

- Abuse
  - Addiction
  - Overdose
  - Death
- Crime
  - While on drugs
  - For drug money
  - Trafficking

#### Impact on justice system

#### Social disruption

The Drugs & Crime Data Center & Clearinghouse is funded by the Bureau of Justice Assistance and directed by the Bureau of Justice Statistics of the U.S. Department of Justice.

### Major heroin smuggling routes into the United States

DEA Quarterly Intelligence Trends

### One free phone call can give you access to a growing data base on drugs & crime

The new Data Center & Clearinghouse for Drugs & Crime is managed by the Bureau of Justice Statistics. To serve you, the center will —

- Respond to your requests for drugs and crime data.
- Let you know about new drugs and crime data reports.
- Send you reports on drugs and crime.
- Conduct special bibliographic searches for you on specific drugs and crime topics.
- Refer you to data on epidemiology, prevention, and treatment of substance abuse at the National Clearinghouse for Alcohol and Drug Information of the Alcohol, Drug Abuse, and Mental Health Administration.
- Publish special reports on subjects such as assets forfeiture and seizure, economic costs of drug-related crime, drugs and violence, drug laws of the 50 States, drug abuse and corrections, and innovative law enforcement reactions to drugs and crime.
- Prepare a comprehensive, concise report that will bring together a rich array of data to trace and quantify the full flow of illicit drugs from cultivation to consequences.
