the BUSINESS SITUATION

THE pace of production picked up modestly in the third quarter, according to the "flash" estimates. Real GNP increased at an annual rate of 3 percent, up from 2 percent in the second quarter (table 1).¹

In contrast to the recent pattern, the increase in U.S. production appears to have roughly matched the increase in U.S. demand. Over the four quarters ending in the second quarter of 1985, U.S. demand—as measured by real gross domestic purchases—had outpaced U.S. production by more than 1 percentage point. The difference reflects both a decline in foreign sales of U.S. production (exports) and an increase in sales in the United States of foreign production (imports). In the third quarter, exports again declined, but imports declined as well.

It appears likely that little, if any, inventory accumulation occurred in the third quarter. Thus, as in the second quarter, a slowing in the rate

1. Quarterly estimates in the national income and product accounts are expressed at seasonally adjusted annual rates, and quarterly changes in them are differences between these rates. Quarter-to-quarter percent changes are annualized. Real, or constant-dollar, estimates are expressed in 1972 dollars.

The procedures used to prepare the "flash" estimates—that is, estimates prepared 15 days before the end of the quarter—are the same as those used to prepare the estimates released after the end of the quarter. However, the source data that are available for the "flash" estimates are limited to only 1 or 2 months of the quarter and are preliminary in some cases. BEA makes projections of the missing source data. The major source data that are available are: For *personal consumption expenditures* (PCE), July and August retail sales, unit sales of new autos through the first 10 days of September, and sales of new trucks for July and August; for *nonresidential fixed investment*, the same data for autos and trucks as for PCE, July construction put in place, July manufacturers' shipments of equipment, and business investment plans for the quarter; for *residential investment*, July construction put in place, and July housing starts; for *change in business inventories*, July book values for manufacturing and trade, and unit auto inventories for July and August; for *net exports of goods and services*, July merchandise trade; for *government purchases of goods and services*, Federal unified budget outlays for July, State and local construction put in place for July, and State and local employment for July and August; and for *GNP prices*, the Consumer Price Index for July, and the Producer Price Index for July.

The estimates for the second quarter are revised; see table 2.

Table 1.—GNP and GNP Prices
[Levels at seasonally adjusted annual rates; percent changes at annual rates]

• Flash.

1. The use of the GNP implicit price deflator as a measure of price change should be avoided; see page 6 of the May 1985 SURVEY OF CURRENT BUSINESS.

of accumulation contributed negatively to the changes in real GNP and in real gross domestic purchases. Among final sales other than net exports, personal consumption expenditures again registered a sizable increase. Both fixed investment and government purchases—reflecting the pat-

tern of particularly volatile subcomponents—registered changes markedly different from those in the second quarter. Fixed investment was flat after a substantial increase, and government purchases were up sharply after a moderate increase.

Inflation slowed modestly. The GNP fixed-weighted price index increased 3 percent, down from 4 percent in the second quarter; prices of gross domestic purchases followed a similar pattern. Energy prices accounted for most of the slowing; after a substantial increase in the second quarter, they changed little in the third.

Third-quarter developments in the components of real GNP and in personal income are sketched below on the basis of data available as of mid-September.

- Personal consumption expenditures registered a sizable increase, although less than the 5 percent registered in the second quarter. The increase was less evenly spread in the third quarter than in the second. An increase in durables, larger than the second quarter's 7 percent, was accounted for by motor vehicles, as sales of both autos and trucks increased

Looking Ahead . . .

- **NIPA Revisions.** An advance overview of the upcoming comprehensive revision of the NIPA's will appear in the October SURVEY. This overview will describe the statistical revisions, the definitional and classification revisions, and changes in the table formats; it will not present any of the revised estimates, which are scheduled for release in December.

- **Metropolitan Area Projections.** An article summarizing projected trends in income, employment, and population for metropolitan areas to the year 2000 will appear in a fall issue of the SURVEY. The detailed projections on which the article will be based will be available in October in volume 2 of 1985 BEA Regional Projections.

- **Input-Output Estimates.** Two sets of estimates—new structures and equipment by using industry, and employment and employee compensation—consistent with the 1977 input-output table will appear in a fall issue of the SURVEY. (BEA's 1977 input-output table was presented in the May 1984 SURVEY.)

sharply; furniture and household equipment edged down after a long climb. Nondurables changed little after a 4½-percent increase, reflecting the pattern of food as well as clothing and shoes. Services increased at about the second quarter's 4 percent.

- Nonresidential fixed investment slipped after a 14½-percent increase. Both structures and producers' durable equipment (PDE) contributed to the swing. In PDE, most of the swing was accounted for by computers, which are quite volatile from quarter to quarter. Purchases of computers accounted for much of a large increase in PDE in the second quarter and more than accounted for a decline in the third. The effect of computers on PDE was partly offset by motor vehicles; largely reflecting autos, purchases of motor vehicles declined in the second quarter and increased in the third. In structures, the swing was concentrated in commercial structures other than office buildings and in industrial structures; most categories changed little in the third quarter.

- Residential investment increased somewhat more than the 6½ percent registered in the second quarter. The third-quarter increase was largely in the components other than new construction that together make up about one-third of residential investment. Each of these components—additions and alterations, commissions on the sale of residences, and mobile homes—increased in the third quarter. The recovery in residential investment from the recent low in the fourth quarter of 1984 also has been largely in these components. Over this period, single-family construction, which was flat in the third quarter, has increased moderately. Multifamily construction, which was up in the third quarter, has declined over this period.

- Little, if any, appears to have been added to business inventories in the third quarter, after moderate accumulation—about \$8½ billion (1972 dollars)—in the second. Thus, the contribution of inventories to the change in GNP was negative, although a little less so than in the second quarter. On the basis of fragmentary information, it appears that farm inventories continued to accumulate, although somewhat less than the \$3½ billion in the second quarter. Accumulation in recent quarters has put

farm stocks at levels that are taxing the capacity of storage facilities. Non-farm inventories appear to have been reduced after accumulation of \$5 billion in the second quarter. Auto inventories more than accounted for the reduction. After a substantial increase in the first quarter, auto inventories have been run down to levels below that considered desirable by the industry. Overall, it is likely that the ratio of business inventories to total final sales moved toward the low end of the 3.01–3.09 range within which it has fluctuated during the last 2 years.

- Net exports appear to have increased slightly, as exports declined less than imports. As in the second quarter, the changes were largely accounted for by merchandise trade. In exports, agricultural products registered another sharp decline in the face of ample worldwide supplies; nonagricultural exports increased somewhat after a second-quarter decline. In imports, petroleum was flat after a large second-quarter increase that may have reflected some purchases that had been deferred in the first quarter when petroleum prices were declining. Nonpetroleum imports again edged down.

- Government purchases increased substantially after a 3½-percent increase in the second quarter. In Federal purchases, both defense and non-defense increased. The recent volatility in nondefense purchases is traceable to transactions of the Commodity Credit Corporation (CCC). The third-quarter increase in nondefense purchases, and also the second-quarter decline and the first-quarter increase, were accounted for by these transactions. Crop prices have been falling, and, as they fell below support levels, farmers have taken the option of placing substantial amounts of wheat, corn, and some other crops with the CCC. In State and local purchases, third- and second-quarter increases were in construction, largely highways.

- Personal income, as it has in every quarter since the beginning of 1984, increased less than in the preceding quarter: it increased \$27 billion, compared with \$31 billion in the second quarter. One source of the slowing in recent quarters, and by far the largest source in the third quarter, was farm proprietors' income. Farm income declined \$3 billion on average in the first and second quar-

ters and plummeted \$10½ billion in the third. Increases in subsidies had propped up farm income in the first and second quarters, but, in the third quarter, subsidies declined \$8½ billion. In addition, declines in crop and livestock prices in the third quarter more than offset increases in production.

Wage and salary disbursements increased roughly \$3½ billion less than the second quarter's \$28 billion. Manufacturing increased after no change, but all other major groups—other commodity-producing, distributive, services, and government and government enterprises—increased less than in the second quarter. Transfer payments increased roughly \$5 billion more than the second quarter's \$½ billion. A major factor in the step-up was an increase, after a decline, in retroactive Social Security payments. Personal interest income registered another small decline, reflecting the declining rate of interest paid on personal assets. Other components of personal income registered changes that were similar to those in the second quarter.

The change in, but not the level of, personal taxes and nontax payments in the third quarter reflected the impact of the timing of refunds on 1984 Federal personal income taxes. Refund payments are netted against tax payments in calculating personal taxes, and, because refunds were shifted from the first quarter to the second, personal taxes were unusually large in the first quarter and unusually small in the second. The impact on the change in taxes was a plus \$27½ billion in the first quarter, a minus \$55 billion in the second, and a plus \$27½ billion in the third. Excluding these impacts, personal taxes increased about \$14½ billion in the second quarter and—reflecting the smaller increase in the tax base and about \$3 billion in legislated reductions—roughly \$9½ billion in the third.

Disposable personal income—that is, personal income less personal taxes—declined roughly \$10 billion in the third quarter, in contrast to a \$71½ billion increase in the second. Excluding the effect of the tax refunds, the third-quarter increase in disposable personal income was roughly the same as the second quarter's 2½ percent. However, these increases only about matched those in

prices; again excluding the effect of the tax refunds, real disposable income declined $\frac{1}{2}$ percent in the second quarter and was about flat in the third.

Although the increase in personal outlays was several billion dollars less than the \$51 billion in the second quarter, personal saving declined sharply, reflecting the huge swing in disposable personal income. The personal saving rate, which had moved up in the second quarter to 5 percent, dropped below $3\frac{1}{2}$ percent in the third. Although the pattern of change in the saving rate was probably affected by the tax refunds, the third-quarter level probably was not.

Second-quarter corporate profits

Revised second-quarter estimates show that profits from current production—profits with inventory valuation adjustment (IVA) and capital consumption adjustment (CCAdj)—increased \$6 billion, to \$298 $\frac{1}{2}$ billion, following a $\frac{1}{2}$ billion increase in the first quarter. The revised estimate is \$1 billion higher than the estimate issued a month ago. Profits from the rest of the world were revised up \$2 billion; domestic profits of nonfinancial corporations were revised down $\frac{1}{2}$ billion.

Domestic profits of financial corporations increased $5\frac{1}{2}$ billion, to \$34 billion, following a \$1 billion increase. Domestic profits of nonfinancial corporations declined $1\frac{1}{2}$ billion, to \$242 billion, following no change. Profits from the rest of the world increased \$2 billion, to \$23 billion, also following no change. Profits from the rest of the world reflected increases in earnings on direct investment in Western Europe and Canada, which more than offset decreases in Latin America and Australia.

Profits before tax (PBT) differ from profits from current production by the IVA and CCAdj. In the second quarter, both adjustments increased: the IVA by $1\frac{1}{2}$ billion, to $2\frac{1}{2}$ billion, and the CCAdj by \$6 billion, to

Table 2.—Revisions in Selected Component Series of the NIPA's, Second Quarter of 1985

GNP chain price index				3.9	3.8

1. Not at annual rates.

NOTE.—For the second quarter of 1985, the following revised or additional major source data became available: for *personal consumption expenditures*, revised retail sales for June, consumer share of new car purchases for June, and consumption of electricity for June; for *nonresidential fixed investment*, revised manufacturers' shipments of equipment for June, revised construction put in place for June, and business share of new car purchases for June; for *residential investment*, revised construction put in place for June; for *change in business inventories*, revised book values for manufacturing and trade for June; for *net exports of goods and services*, revised merchandise trade and revised service receipts for the quarter; for *government purchases of goods and services*, revised construction put in place for June; for *wages and salaries*, revised employment, average hourly earnings, and average weekly hours for June; for *net interest*, financial assets held by households for the quarter, and revised net interest received from abroad for the quarter; for *corporate profits*, revised domestic book profits for the quarter, and revised profits from the rest of the world for the quarter; and for *GNP prices*, revised residential housing prices for the quarter.

\$75 billion. PBT declined $1\frac{1}{2}$ billion, to \$221 billion, following a $6\frac{1}{2}$ billion decline.

Profits with IVA but without CCAdj—the variant of profits available by industry—increased $\frac{1}{2}$ billion, to \$223 $\frac{1}{2}$ billion, following a \$4 billion decline. Increases of \$5 billion in domestic profits of financial corporations and of \$2 billion in profits from the rest of the world slightly more than offset declines in domestic profits of nonfinancial corporations. Overall, the domestic profits picture is essentially the same as that described in the August "Business Situation." Among financial corporations, profits of savings and loan associa-

tions increased sharply, because their costs of raising funds have gone down with interest rates. Among nonfinancial corporations, profits of manufacturers—particularly of motor vehicles and petroleum products—and profits of transportation and public utilities were down, but trade profits increased.

Second-quarter NIPA revisions

The 75-day revisions of the national income and product accounts estimates for the second quarter of 1985 are shown in table 2.

National Income and Product Accounts Tables

New estimates in this issue: Second quarter 1985, revised.

The abbreviations used in the tables are:

CCAdj	Capital consumption adjustment
IVA	Inventory valuation adjustment
NIPA's	National income and product accounts
p	Preliminary
r	Revised

The NIPA estimates for 1929-76 are in *The National Income and Product Accounts of the United States, 1929-76: Statistical Tables* (Stock No. 003-010-00101-1, price \$10.00). Estimates for 1977-79 and corrections for earlier years are in the July 1982 SURVEY; estimates for 1980 and corrections for earlier years are in the July 1983 SURVEY; estimates for 1981-83 and corrections for earlier years are in the July 1984 SURVEY. Summary NIPA Series, 1952-83, are in the August 1984 SURVEY. These publications are available from the Superintendent of Documents and Commerce Department District Offices; see addresses inside front cover.

The full set of NIPA estimates shown regularly in this part of the SURVEY are now available on diskette for \$240 per year (12 updates). For more information, write to the Bureau of Economic Analysis (BE-54), U.S. Department of Commerce, Washington, DC 20230.

Table 7.3:
1. Gross domestic purchases equals GNP less exports plus imports; final sales to domestic purchasers equals final sales less exports plus imports.

Table 7.7:
1. Equals the deflator for gross domestic product of nonfinancial corporate business with the decimal point shifted two places to the left.

Table 7.8:
1. Consists of final sales and change in business inventories of new autos produced in the United States.

2. Consists of personal consumption expenditures, producers' durable equipment, and government purchases.

Table 7.9:

1. Includes new trucks only.

Note.—The implicit price deflator for GNP is a weighted average of the detailed price indexes used in the deflation of GNP. In each period, the weights are based on the composition of constant-dollar output in that period. In other words, the price index for each item (1972=100) is weighted by the ratio of the quantity of the item valued in 1972 prices to the total output in 1972 prices. Changes in the implicit price deflator reflect both changes in prices and changes in the composition of output. The chain price index uses as weights the composition of output in the prior period, and therefore reflects only the change in prices between the two periods. However, comparisons of percent changes in the chain index also reflect changes in the composition of output. The fixed-weighted price index uses as weights the composition of output in 1972. Accordingly, comparisons over any time span reflect only changes in prices.

1. Equals current-dollar net exports of goods and services deflated by the implicit price deflator for imports of goods and services.

2. Equals the ratio of the implicit price deflator for exports of goods and services to the implicit price deflator for imports of goods and services.

Federal Budget Developments

ON August 30, the administration released revised estimates of the fiscal year 1986 budget as part of its mid-session review. This release was less than 1 month after Congress adopted the first concurrent resolution on the budget—a step in the budget process that had been delayed by controversy over the kind of spending cuts to be taken to reduce the deficit and that, even as adopted, was considered by many analysts to be based on unrealistic assumptions about the economy and the ability to achieve the negotiated spending cuts. (See the August 1985 SURVEY OF CURRENT BUSINESS for a discussion of the resolution.) In the revised estimates, the administration incorporated only the part of the spending cuts contained in the resolution that were for national defense, maintained the deeper cuts for nondefense spending—rejected by Congress in the resolution—contained in the April budget update, and made modest modifications to the economic assumptions.

With this combination of spending cuts, the administration was able to show a larger reduction in the deficit in later years than was estimated either in the April budget update or in the resolution. Although the administration's revised estimates of the deficit for fiscal years 1985 and 1986 are very close to those in April, the revised deficits are substantially lower beginning in 1987. In 1987, the deficit would be \$139.3 billion, compared with \$160.8 billion in April; in 1988, \$99.8 billion, compared with \$108.9 billion; and in 1990, \$17.7 billion, compared with \$84.9 billion. These reductions in the deficit since April are more than accounted for by the cuts in national defense spending contained in the resolution. Compared with the resolution, the administration's revised deficit of \$177.8 billion in 1986 is about \$6 billion higher. In 1987 and 1988, however, the administration's revised estimates are about \$15 billion and \$13 billion lower than in the resolution. (There were no estimates for 1989 and 1990 in the resolution.)

The mid-session review

The new estimates of unified budget receipts and outlays for fiscal years 1985 and 1986 reflect revised economic assumptions, reestimates of tax collections and agency spending based on more recent experience, legislation enacted by Congress, and policy changes by the administration since the April budget update.

The major legislative action was the passage in early August of a supplemental appropriation bill for fiscal year 1985. The major policy changes are the withdrawal of a proposed 5-percent cut in Federal civilian pay and acceptance of the lower national defense spending in the resolution. As

mentioned, the revised estimates do not incorporate the resolution's non-defense spending totals, but the administration stated that these totals may be modified as individual authorization and appropriation bills are enacted. The revised receipt estimates do not include the administration's tax reform proposal. According to the administration, that proposal would not change the revenue totals very much, although the allocation among receipt categories would change.

On the basis of the revised economic assumptions, real GNP is expected to increase considerably less in calendar year 1985 than expected in April (table 1). From the fourth quarter of

1. Consumer Price Index for urban earners and clerical workers.

2. Percent of labor force, including armed forces residing in the United States.

3. Insured unemployment under the State regular unemployment insurance program, excluding recipients of extended benefits, as percentage of covered employment under that program.

4. Average rate on new issues within a year. The estimates assume, by convention, that interest rates vary with the rate of inflation. They do not represent a forecast of interest rates.

Source: "Mid-Session Review of the 1986 Budget."

1984 to the fourth quarter of 1985, real GNP is estimated to increase 3.0 percent, about 1 percentage point less than estimated in April. The lower growth is the result of a weaker-than-expected first half of 1985. Real GNP is expected to increase 4.5–5.5 percent through the rest of 1985 and to increase 4.0 percent through 1986. Consumer prices rise 3.8 percent in 1985, the same as assumed in April. The unemployment rate is also unchanged, and interest rates on 91-day Treasury bills are lower than assumed earlier.

Revised unified budget estimates.—For fiscal year 1985, a \$211.3 billion deficit is estimated, compared with \$213.3 billion in April (table 2). Receipts are \$4.6 billion lower; a downward revision of \$4.9 billion due to revised economic assumptions and policy changes is partly offset by a \$0.4 billion upward revision due to reestimates. Among receipts, downward revisions in corporation income taxes (\$7.6 billion) and in excise taxes (\$1.3 billion) are partly offset by upward revisions in individual income taxes (\$2.3 billion), in social insurance taxes and contributions (\$1.2 billion), and in all other receipts (\$1.0 billion).

Outlays in 1985 are \$6.6 billion lower; downward revisions of \$6.8 billion and \$0.8 billion due to reestimates and revised economic assumptions were partly offset by a \$1.1 billion upward revision due to policy changes. On a program-by-program basis, the revision is the net of \$14.6 billion of downward revisions and \$8.2 billion of upward revisions. The largest downward revision—\$5.2 billion—is for national defense, largely the result of a reestimate. Other major downward revisions are for foreign military assistance (\$1.3 billion), Social Security benefits (\$1.1 billion), and for the Export-Import Bank (\$1.0 billion). One-half of the upward revisions is due to reestimates of spending for agriculture programs—\$2.4 billion for the Farmers Home Administration and \$1.8 billion for the Commodity Credit Corporation (CCC). The former stems primarily from the Agricultural Credit Insurance Fund as a result of reduced loan repayments and the refinancing of many loans at lower interest rates. The latter stems from unexpectedly high crop production this year, which has resulted in lower farm prices and higher CCC spending. The other major upward revision is for foreign economic assist-

Sources: "Mid-Session Review of the 1986 Budget" and the Bureau of Economic Analysis.

ance (\$1.0 billion); the 1985 supplemental appropriations bill increased aid to Egypt, Israel, and Jordan.

For fiscal year 1986, a deficit of \$177.8 billion is estimated, compared with \$177.4 billion in April. Receipts are \$14.4 billion lower due to revised economic assumptions. All categories of receipts—except estate and gift taxes and customs duties, which are unchanged—are revised down. The largest revisions are for corporation income taxes (\$8.2 billion) and individual income taxes (\$2.2 billion).

Outlays in 1986 are \$14.0 billion lower; downward revisions of \$14.7 billion and \$2.9 billion due to policy changes and revised economic assumptions are partly offset by a \$3.6 billion upward revision due to reestimates. On a program-by-program basis, the revision is the net of \$26.1 billion of downward revisions and \$12.0 billion of upward revisions. The largest downward revision—\$18.6 billion—is for national defense; it more than accounts for the policy changes mentioned above. The other large downward revision—\$3.1 billion—is for net interest, due to lower interest rates in the revised economic assumptions. The largest upward revisions are for the CCC (\$2.9 billion) and for foreign economic assistance, both for

the same reasons cited for 1985. The other large upward revision—\$1.0 billion—is for foreign military assistance to offset the lower rate of spending in 1985.

Revised NIPA estimates.—BEA has prepared estimates of the Federal sector on the national income and product account (NIPA) basis consistent with the revised unified budget estimates (table 2, and table 3 for the quarterly pattern). On this basis, fiscal year 1985 receipts are \$3.9 billion lower, expenditures are \$0.8 billion higher, and the deficit is \$4.6 billion higher than estimated in April. (Details of the April estimates are discussed in the April 1985 SURVEY.)

The revision in receipts is more than accounted for by corporate profits tax accruals; a downward revision of \$6.6 billion is due to lower corporate profits in the revised economic assumptions. The other downward revision—\$1.1 billion—is in contributions for social insurance, due to small revisions in several programs. Partly offsetting these downward revisions are upward revisions in personal tax and nontax receipts (\$3.5 billion) and in indirect business tax and nontax receipts (\$0.4 billion). The former is partly due to higher wages and salaries in the revised economic

assumptions, and the latter is due to higher nuclear waste disposal fees.

The revision in expenditures is the net result of \$4.8 billion of upward revisions and \$4.0 billion of downward revisions. The largest upward revision—\$2.8 billion—is in nondefense purchases of goods and services, reflecting higher purchases of agricultural commodities by the CCC. The other large upward revisions are in subsidies less current surplus of government enterprises (\$1.0 billion) and in transfer payments to foreigners (\$0.9 billion). The revision in subsidies less current surplus reflects higher housing subsidies and a higher Postal Service deficit. The revision in foreign transfers reflects higher spending for economic assistance. The largest downward revision—\$3.1 billion—is in national defense purchases of goods and services, due to lower-than-anticipated spending since April. The other downward revisions are in grants-in-aid to State and local governments (\$0.7 billion) and in transfer payments to persons (\$0.2 billion). The revision in grants-in-aid is concentrated in grants for education; the revision in personal transfers is the net result of a \$1.0 billion downward revision in Social Security benefits and small upward revisions in several other programs.

For fiscal year 1986, receipts are \$16.8 billion lower, expenditures are \$12.1 billion lower, and the deficit is

\$4.7 billion higher. All categories of receipts are revised down. The largest revision—\$11.1 billion in corporate profits tax accruals—is due to lower corporate profits. Personal tax and nontax receipts are revised down \$3.2 billion, reflecting lower declarations and net final settlements. Indirect business tax and nontax accruals are revised down \$1.7 billion, reflecting lower windfall profit taxes and other excise taxes, such as for gasoline. Contributions for social insurance are revised down \$0.8 billion, reflecting lower Social Security contributions.

Table 4.—Relation of Federal Government Receipts in the National Income and Product Accounts to the Unified Budget

	[Billions of dollars]

Other			
Miscellaneous			
Equals: Federal Government receipts, NIPA's	687.6	758.1	808.6

The revision in expenditures is the net result of \$21.3 billion of downward revisions and \$9.2 billion of upward revisions. The largest downward revision—\$17.1 billion for national defense purchases of goods and services—is due to the policy decision to accept the lower national defense spending contained in the budget resolution. Net interest paid is revised down \$3.8 billion, reflecting the lower interest rates in the revised economic assumptions. Transfer payments to persons are revised down \$0.4 billion, reflecting lower medicare transfers. The largest upward revision—\$4.9 billion in nondefense purchases of goods and services—reflects higher spending by the CCC and withdrawal of the 5-percent civilian pay cut. Transfer payments to foreigners are revised up \$2.1 billion due to the Congressional action on foreign economic assistance programs. Subsidies less the current surplus of government enterprises are revised up \$1.6 billion, largely reflecting higher housing subsidies and a higher CCC deficit. Grants-in-aid to State and local governments are revised up \$0.6 billion, reflecting higher grants for education.

Table 4 shows the relation between unified budget and NIPA receipts, and table 5 shows the relation between unified budget and NIPA expenditures.

Plant and Equipment Expenditures, of the Four Quarters of 1985

BUSINESS plans to spend \$384.0 billion for new plant and equipment (P&E) in 1985, 8.3 percent more than in 1984, according to the BEA survey conducted in July and August (tables 1 and 2, and chart 1).¹ Spending was \$354.4 billion in 1984, 16.3 percent more than in 1983.

The latest estimate of planned spending for 1985 is \$2.1 billion lower than that reported in the survey conducted in April and May. A 1.6-percent downward revision in manufacturing industries more than offset a 0.2-percent upward revision in non-manufacturing industries. The previous survey showed planned spending of \$386.1 billion for 1985, 9.2 percent more than 1984 spending.²

Real spending—capital spending adjusted to remove price changes—is estimated to increase 5.8 percent in 1985. Real spending increased 15.3 percent in 1984, following a decline of 0.8 percent in 1983 (tables 2 and 3). Estimates of real spending are computed from survey data on current-

1. The survey covers expenditures both for new facilities and for expansion or replacement of existing facilities that are chargeable to fixed asset accounts and for which depreciation or amortization accounts are ordinarily maintained. The survey excludes expenditures for land and mineral rights; maintenance and repair; used plant and equipment, including that purchased or acquired through mergers or acquisitions; assets located in foreign countries; residential structures; and a few other items.

The estimates presented are universe totals of P&E expenditures in the United States based on sample data compiled from reports on a company basis, not from separate reports for plants or establishments. A company's capital expenditures are assigned to a single industry in accordance with the industry classification of the company's principal product or service.

P&E expenditures differ from nonresidential fixed investment, which is a component of GNP, in type of detail, data sources, coverage, and timing. For further information, see pages 24–25 of the February 1985 SURVEY OF CURRENT BUSINESS.

2. Spending plans have been adjusted for systematic reporting biases. Quarterly estimates were adjusted for each industry, for each quarter of the year, based on the median of the ratios of planned to actual spending for that quarter in the preceding 8 years. Before adjustment, planned spending for 1985 was \$384.43 billion for "all industries," \$157.93 billion for manufacturing, and \$226.50 billion for nonmanufacturing. The net effect of the adjustments was to lower manufacturing \$4.48 billion and to raise nonmanufacturing \$4.03 billion.

¹ Revised.

² Plans reported by business in October and November 1984.

³ Plans reported by business in January through March 1985.

⁴ Plans reported by business in April and May 1985.

⁵ Surveyed quarterly.

⁶ Includes industries not shown separately.

dollar spending and from estimated capital goods price deflators developed by BEA.³ The capital goods price deflator for "all industries" increased 0.9 percent in 1984 and is projected by BEA to increase 2.4 percent in 1985.

Current-dollar spending in the second quarter of 1985 increased 4.5 percent, to an annual rate of \$387.8 billion, following a 0.8-percent increase in the first; second-quarter spending was 0.7 percent higher than anticipated in the previous survey.

3. Specifically, the current-dollar figures reported by survey respondents are adjusted using implicit price deflators derived from unpublished detailed estimates in the national income and product accounts of current- and constant-dollar nonresidential fixed investment (adjusted to a P&E basis). To estimate planned real spending, the implicit price deflator for each industry is projected using its growth rate over the latest four quarters for which it is available.

Plans reported in the latest survey indicate a 0.4-percent increase in the third quarter and a 0.5-percent decline in the fourth.

Real spending increased 4.4 percent in the second quarter of 1985, following a 0.4-percent decline in the first. Estimates indicate declines of 0.4 percent in the third quarter and 0.8 percent in the fourth.

The estimates for 1982–84 in this article reflect revised seasonal-adjustment factors; estimates for earlier years were not affected. Revised annual estimates for 1984 were calculated from quarterly estimates unadjusted for seasonal variations. The previously reported annual estimates for 1984 were calculated from seasonally adjusted quarterly estimates derived using projected seasonal-adjustment factors.

1. Revised annual estimates for 1984 are calculated from quarterly estimates unadjusted for seasonal variations. The previously reported annual estimates for 1984 were calculated from seasonally adjusted quarterly estimates derived using projected seasonal-adjustment factors.

2. Estimates are based on planned capital expenditures reported by business in July and August 1985. The planned expenditures are adjusted for systematic biases in reporting. The adjustment procedures are described in the February 1985 SURVEY OF CURRENT BUSINESS. Before bias adjustment, current-dollar plans for 1985 were \$384.43 billion for "all industries," \$157.93 billion for manufacturing, and \$226.50 billion for nonmanufacturing industries surveyed quarterly.

3. Quarterly estimates for 1982-84 reflect seasonal-adjustment factors that have been revised to incorporate data for recent periods and to ensure that the sum of the seasonally adjusted quarters equals the annual estimate for each year.

4. Surveyed quarterly.

5. Includes industries not shown separately.

6. Consists of lumber, furniture, instruments, and miscellaneous.

7. Consists of tobacco, apparel, printing-publishing, and leather.

8. Includes construction.

9. The latest estimates for the industries surveyed annually were published in the April 1985 SURVEY. The current-dollar plans for 1985 were \$433.06 billion for total nonfarm business, \$279.43 billion for total nonmanufacturing, and \$48.66 billion for nonmanufacturing industries surveyed annually.

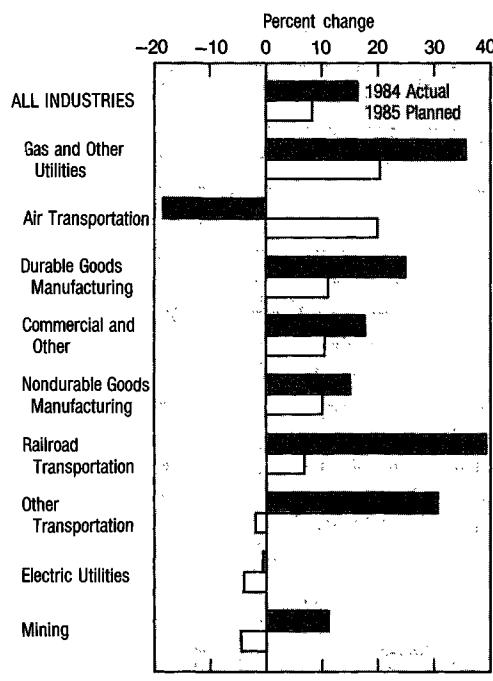

10. "All industries" plus the part of nonmanufacturing that is surveyed annually.

11. Consists of real estate; professional services; membership organizations and social services; and forestry, fisheries, and agricultural services.

12. Procedures for preparing constant-dollar estimates are described in the February 1985 SURVEY. To estimate real spending plans, BEA adjusts the survey results for assumed price changes. Estimates for the first quarter of 1985 have been revised to reflect new price deflators based on revisions in the national income and product accounts data.

13. The latest estimates for the industries surveyed annually were published in the April 1985 SURVEY. The constant-dollar plans for 1985 were \$206.93 billion for total nonfarm business, \$136.24 billion for total nonmanufacturing, and \$26.46 billion for nonmanufacturing industries surveyed annually.

CHART 1
New Plant and Equipment Expenditures

U.S. Department of Commerce, Bureau of Economic Analysis

85-9-1

Although actual spending in the second quarter of 1985 was above plans, planned spending for the year was revised downward slightly. Indicators of the investment outlook were mixed in the second quarter. Factors favorable to investment included increases in both corporate cash flow and real final sales of GNP, as well as the continued decline in interest rates. Factors less favorable included declines in net new capital appropriations, new orders for nondefense capital goods, corporate profits, and the manufacturing capacity utilization rate.

Manufacturing Programs

In manufacturing, current-dollar spending increased 6.0 percent in the second quarter of 1985, to an annual rate of \$154.3 billion, following a 0.9-percent decline in the first. Durable goods industries increased 5.9 percent in the second quarter; nondurables, 6.1 percent. Manufacturers plan a 2.3-percent increase in the third quarter and a 1.2-percent decline in the fourth.

For the year 1985, manufacturers plan to spend \$153.4 billion, 10.5 per-

^a Revised.^b Calculated from constant-dollar estimates based on current-dollar spending plans reported in October and November 1984.^c Calculated from constant-dollar estimates based on current-dollar spending plans reported in January through March 1985.^d Calculated from constant-dollar estimates based on current-dollar spending plans reported in April and May 1985.^e Calculated from constant-dollar estimates based on current-dollar spending plans reported in July and August 1985.^f Surveyed quarterly.

cent more than in 1984; in the previous survey, a planned increase of 12.7 percent was reported. Manufacturers' spending increased 19.5 percent in 1984, following a decline of 3.7 percent in 1983.

Durable goods industries plan an 11.1-percent increase in 1985. The largest increase is in motor vehicles, 29.0 percent; both domestic and foreign manufacturers have announced plans to open new U.S. plants and to expand and modernize existing plants. Large increases are also planned in "other durables," 15.6 percent; blast furnaces-steel works, 10.4 percent; and electrical machinery, 10.2 percent. A decline of 6.2 percent is planned in nonferrous metals.

Nondurable goods industries plan a 10.0-percent increase in 1985. The largest increases are in rubber, 17.1 percent; food-beverage, 14.6 percent; paper, 13.8 percent; and "other nondurables," 13.6 percent. A decline of 2.5 percent is planned in textiles and may be related to the completion of major expansion programs in 1984, as well as to intense foreign competition.

Real spending by manufacturers is estimated to increase 7.9 percent in 1985—8.1 percent in durables and 7.8 percent in nondurables. In 1984, durables increased 23.0 percent; nondurables, 16.4 percent.

Nonmanufacturing Programs

In nonmanufacturing, current-dollar spending increased 3.5 percent in the second quarter of 1985, to an

annual rate of \$233.5 billion, following a 1.9-percent increase in the first. Nonmanufacturing industries plan a 0.8-percent decline in the third quarter and a 0.1-percent decline in the fourth.

For the year 1985, nonmanufacturing industries plan to spend \$230.5 billion, 6.9 percent more than in 1984; in the previous survey, a planned increase of 7.0 percent was reported. Nonmanufacturing industries' spending increased 14.3 percent in 1984, following a decline of 0.7 percent in 1983.

In 1985, the largest increases are planned in gas utilities, 20.2 percent, and air transportation, 19.9 percent. Increases of 10.4 percent and 6.7 percent are planned in "commercial and other" and railroads, respectively. Declines are planned in mining, 4.7 percent; electric utilities, 4.1 percent; and "other transportation," 1.9 percent. In "other transportation," most of the weakness is in trucking, which experienced declining traffic volume and lower profits through the first two quarters of 1985.

Real spending by nonmanufacturing industries is estimated to increase 4.4 percent in 1985; it increased 12.7 percent in 1984. Estimated increases in "commercial and other," 6.6 percent, and transportation, 2.8 percent, more than offset estimated declines in mining, 6.3 percent, and public utilities, 0.2 percent.

Capital Expenditures by Majority-Owned Foreign Affiliates of U.S. Companies, 1985 and 1986

MAJORITY-OWNED foreign affiliates of U.S. companies plan to increase capital expenditures 2 percent, to \$40.9 billion, in 1986, following a planned 15-percent increase in 1985 (table 1 and chart 2).¹ The strong 1985 increase is from a relatively low base, and, even if the increases planned for both years are realized, spending in 1986 will be below the levels of 1980-82.

The sharp increase in spending expected in 1985 probably reflects lower interest rates and the moderate economic recovery abroad; however, based on recent experience, the 1985 spending estimate may be revised downward in later surveys. The much smaller increase planned for 1986 may partly reflect conservative estimates by investors. Factors that would tend to boost 1986 spending are expectations that the business recovery abroad may continue and that there will be a further decline in the foreign currency value of the dollar; those that would depress spending are excess capacity in some industries, and affiliates' loss of market share,

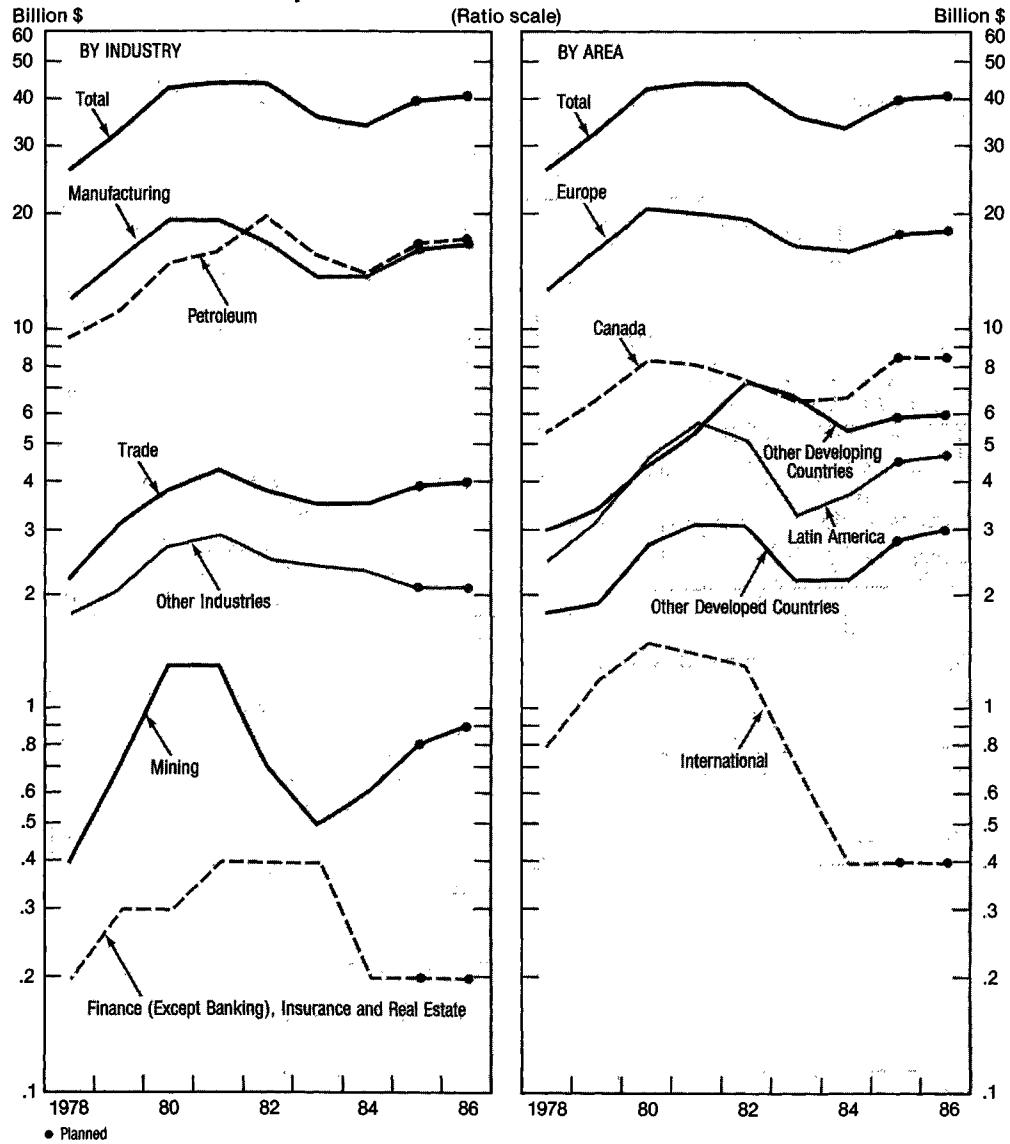

particularly in Europe, because of heightened competition from companies in the Far East, particularly in Japan.

Actual spending for 1984 and spending now planned for 1985 are

well below previously planned levels. The latest estimates for both years are based on the survey conducted in June; the previous estimates are based on the survey taken 6 months earlier. In terms of year-to-year

CHART 2

Capital Expenditures by Majority-Owned Foreign Affiliates of U.S. Companies

NOTE.—Ellen M. Herr assisted in preparing the estimates. Smith W. Allnutt III designed the computer programs for data retrieval and analysis.

1. Capital expenditure estimates are for majority-owned nonbank foreign affiliates of nonbank U.S. parents. (An affiliate is majority owned when the combined ownership of all U.S. parents exceeds 50 percent.) For affiliates other than those engaged in natural resource exploration and development, capital expenditures include all expenditures that are charged to capital accounts and that are made to acquire, add to, or improve property, plant, and equipment. For affiliates engaged in natural resource exploration and development, capital expenditures include the full amount of exploration and development expenditures, whether capitalized or expensed. Capital expenditures are on a gross basis; sales and other dispositions of fixed assets are not netted against them. They are reported to BEA in current dollars; they are not adjusted for price changes in host countries or for changes in the value of foreign currencies, because the necessary data are unavailable.

NOTE.—Estimates are for nonbank foreign affiliates of nonbank U.S. parents.

^a Less than 0.5 percent (\pm).¹ Based on the BEA survey taken in June 1985.² Based on the BEA survey taken in December 1984.³ European Communities (9) comprises Belgium, Denmark, France, Germany, Ireland, Italy, Luxembourg, Netherlands, and the United Kingdom.⁴ European Communities (10) comprises European Communities (9) and Greece.⁵ OPEC comprises Algeria, Ecuador, Gabon, Indonesia, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, Venezuela, and the United Arab Emirates.

NOTE.—Estimates are for majority-owned nonbank foreign affiliates of nonbank U.S. parents.

changes, the earlier plans for 1984 showed a 4-percent increase, whereas the latest estimates show a 4-percent decline (table 2). In contrast, for 1985, the percentage increase is now larger than previously planned, because the downward revision in the level of spending for 1984 was proportionally larger than that for 1985.

By area, affiliates in developed countries plan a 3-percent spending increase in 1986, to \$29.8 billion, compared with a 15-percent increase in 1985. In developing countries, affiliates also plan to increase spending 3 percent, to \$10.7 billion, after a 15-percent increase. Affiliates in "international"—those that have operations spanning more than one country and that are engaged in petroleum shipping, other water transportation, or operating oil and gas drilling equipment that is moved from country to country during the year—plan to cut spending 17 percent, to \$0.4 billion, in 1986, after a 21-percent increase.

Petroleum

Petroleum affiliates plan to increase spending 3 percent, to \$17.2 billion, after an 18-percent increase in 1985 (tables 3–5). However, largely due to the oil glut and weak prices in recent years, spending in 1986 is expected to be well below the 1982 level. In developed countries, affiliates plan to increase spending 5 percent, to \$11.4 billion, after an 18-percent increase. In both years, Canadian affiliates account for much of the higher spending; their expenditures are expected to increase 12 percent in 1986, to \$3.9 billion, after a planned 33-percent increase. The increases reflect that country's decontrol of oil prices and lower tax rates.

Elsewhere in developed countries, British affiliates plan to increase expenditures 10 percent, to \$4.0 billion, following a 17-percent increase. The increases, which are for development of offshore oilfields, reflect, in part,

the increased costs associated with developing smaller or deeper fields, as production from many larger or shallower fields is expected to peak. In contrast to the increases in spending planned by affiliates in Canada and the United Kingdom, affiliates in the

n.a. Not applicable.

1. Results of the June 1983, December 1983, June 1984, and December 1984 surveys were published in the September 1983, March 1984, September 1984, and March 1985 issues of the SURVEY OF CURRENT BUSINESS, respectively. Results of the June 1985 survey are presented in this article.

Netherlands plan to reduce spending 37 percent, to \$0.5 billion, in 1986, after a 56-percent increase; the bulge in expenditures in 1985 was primarily for refinery expansion.

In developing countries, affiliates plan a 1-percent increase, to \$5.4 billion, following a 17-percent increase. In both years, the increases are largely accounted for by Indonesian affiliates engaged in offshore gasfield and oilfield development.

Affiliates in "international" plan a small dollar (but sizable percentage) increase in spending in 1985 and a small dollar (but sizeable percentage) decrease in 1986. Reflecting an excess supply of mobile offshore drilling rigs and tankers, spending is expected to continue at depressed levels.

Manufacturing

Manufacturing affiliates plan to increase spending 1 percent, to \$16.5 billion, in 1986, after a 16-percent increase in 1985. In 1985, affiliates in every industry except primary and fabricated metals plan increases; in 1986, only affiliates in chemicals and nonelectrical machinery plan increases.

In developed countries, affiliates plan to increase spending 2 percent,

to \$13.2 billion, following a 15-percent increase in 1985. The 1986 increase reflects small increases in spending by affiliates in several European countries, largely offset by a decline in spending by affiliates in Canada.

In Europe, the largest increase in 1986 is planned by German affiliates. They expect to increase spending 6 percent, to \$2.4 billion, following a similar increase in 1985; affiliates in nonelectrical machinery, mostly computer manufacturers, account for virtually all of the increase. In Canada, affiliates plan to reduce expenditures 9 percent, to \$3.2 billion, following a 30-percent increase. The largest decline in spending in 1986 is by an affiliate in primary and fabricated metals; it reflects the expected completion in 1985 of a capacity expansion project. The sharp increase in Canadian affiliates' 1985 spending is concentrated in transportation equipment, and is largely for expansion and modernization of vehicle manufacturing and assembly facilities.

In developing countries, affiliates plan a 1-percent increase, to \$3.2 billion, in 1986, after a 20-percent increase in 1985. The largest dollar increase in 1986 is planned in Brazil; the largest in 1985 is planned in Mexico. The increases reflect general

economic improvement in both countries.

Other industries

Affiliates in all other industries combined plan to increase spending 3 percent in 1986, to \$7.3 billion, after a 7-percent increase. Affiliates in mining account for most of next year's increase; their expenditures are expected to increase 19 percent, to \$0.9 billion, after a 24-percent increase. Next year's planned increase is largely by a copper mining affiliate in Chile; in contrast, this year's increase is largely by a bauxite mining affiliate in Australia that is building a refinery.

Trade affiliates plan to increase spending 1 percent, to \$4.0 billion, after a 12-percent increase in 1985. The 1986 increase results from small, nearly offsetting changes in spending in many areas, and may reflect investor concerns about the extent of the recovery abroad. Affiliates in finance (except banking), insurance, and real estate plan to maintain spending at \$0.2 billion in both years. Partly offsetting the increases in mining and trade are small reductions in spending in both years by affiliates in "other industries"—agriculture, construction, public utilities, and other services.

NOTE.—Estimates are for majority-owned nonbank foreign affiliates of nonbank U.S. parents.

U.S. International Transactions, Second Quarter 1985

THE U.S. current-account deficit increased to \$31.8 billion in the second quarter from \$29.5 billion in the first. An increase in the merchandise trade deficit to a record \$33.0 billion was partly offset by an increase in net service receipts. The latter was more than accounted for by larger receipts of income on U.S. direct investment abroad, which were boosted by exchange-rate related capital gains after large losses in the first quarter. Unilateral transfers increased, reflecting higher payments to international organizations' programs.

Among capital flows, U.S. direct investment abroad shifted to net outflows, largely reflecting higher reinvested earnings. Net U.S. purchases of foreign securities slowed; a decrease in stock purchases was only partly offset by larger bond purchases. Claims on foreigners reported by U.S. banks fell substantially; although claims on banks' own foreign offices increased, claims on other (unaffiliated) foreigners decreased, partly due to continued soft demand for U.S. bank credit abroad.

Foreign direct investment in the United States increased, mostly reflecting two large loans by European companies to their U.S. affiliates. Net foreign purchases of U.S. securities remained strong, but were down from their record first-quarter level; net purchases of U.S. Treasury securities increased. Foreign official assets in the United States increased in contrast to a large decrease in the first quarter.

The statistical discrepancy (errors and omissions in reported transactions) was an inflow of \$8.9 billion.

U.S. dollar in exchange markets

The dollar depreciated 5 percent in the second quarter on a trade-weighted quarterly average basis against the currencies of 10 industrial countries (chart 3, table C). At the beginning of the quarter, the dollar continued to decline substantially against most major currencies, due to falling interest rates and concerns about the lack of strength in the U.S. economy. In mid-April, the dollar firmed, partly due to increased demand for dollars

for commercial and investment purposes, and subsequently changed little or depreciated only slightly.

The dollar depreciated 12 percent against the British pound. Short-term interest rates that were over 450 basis points higher than U.S. rates and rates in other major financial centers contributed to heavy inflows into sterling-denominated assets, as may have the pickup in economic activity following the end of the coal strike. The dollar depreciated 5 to 6 percent against the major European Monetary System (EMS) currencies, except the Italian lira, against which it depreciated 3 percent. Although interest rates in EMS countries did not decline as rapidly as in the United States, appreciation of these currencies was limited by only moderate economic expansion in Europe and the greater attractiveness of sterling assets.

The dollar depreciated 3 percent against the Japanese yen, which was supported by the expanding Japanese economy and by a large current-account surplus. The dollar appreciated

CHART 3

Merchandise trade

Indexes of Foreign Currency Price of the U.S. Dollar (1977=100)

1. Australia, Austria, Belgium-Luxembourg, Canada, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and United Kingdom.
Data: U.S. Department of the Treasury. End-of-month rates. Index rebased by BEA.

2. Belgium, Canada, France, Germany, Italy, Japan, Netherlands, Sweden, Switzerland, and United Kingdom.
Data: Federal Reserve Board. Monthly average rates. Index rebased by BEA.

U.S. Department of Commerce, Bureau of Economic Analysis

85-9-3

1 percent against the Canadian dollar.

Near the end of the quarter, Mexican authorities permitted foreign exchange trading houses operated by Mexican banks to carry out certain large transactions on the open market, resulting in a de facto devaluation of the peso. This step effec-

tively created a third peso-dollar exchange rate about equal to the rate on unofficial peso transactions available from currency traders in the United States along the Mexican border. The new "superfree" exchange rate was 27 percent lower than the previously existing "free" rate and 37 percent lower than the "controlled" rate.

The merchandise trade deficit increased \$3.5 billion to a record \$33.0 billion in the second quarter. Exports decreased \$2.5 billion to \$53.2 billion, the lowest quarterly level since the fourth quarter of 1983. Volume decreased 5 percent. The decrease was due to declining demand for agricultural products, the continued impact of the high exchange value of the dollar, and only moderate economic expansion abroad. Imports increased \$1.0 billion to \$86.2 billion, reflecting a pickup in petroleum imports; nonpetroleum imports decreased slightly. Volume was unchanged.

Agricultural exports decreased sharply for the second consecutive quarter; they were down \$1.3 billion, or 15 percent, to \$7.1 billion. Volume decreased 14 percent. Feedgrains, soybeans and other oil seeds, cotton, and tobacco fell; wheat remained at its lowest level since 1978. Exports decreased to all major areas except Latin America.

Nonagricultural exports decreased \$1.2 billion, or 3 percent, to \$46.1 billion, all in volume. Exports have been flat since the third quarter of 1984. Chart 4 shows the slowdown in industrial production among several major trading partners and regions beginning in late 1984 and the corresponding slowdown in U.S. nonagricultural exports.

Exports of nonagricultural industrial supplies and materials decreased \$1.0 billion to \$13.0 billion. Coal, fuel oil, and fertilizers fell sharply; smaller decreases occurred in precious metals and paper. Capital goods decreased \$1.1 billion to \$18.8 billion. Electrical equipment, computers, and

aircraft all decreased after first-quarter surges. Automotive products increased \$0.3 billion to \$6.2 billion; an increase in parts was partly offset by lower deliveries of complete cars to Canada. Consumer goods decreased \$0.2 billion to \$3.2 billion.

Petroleum imports increased \$1.9 billion, or 17 percent, to \$13.2 billion; the average number of barrels imported per day increased to 5.36 million from 4.61 million. The increase reflected a partial rebound from a sharp fall in the first quarter, when falling prices may have led importers to defer some purchases. In contrast to declines in the three previous quarters, the average price per barrel rose slightly—up 11 cents—to \$26.97. Domestic petroleum stocks rose moderately after a substantial drop in the first quarter.

Nonpetroleum imports decreased \$0.9 billion, or 1 percent, to \$73.1 billion, all in volume. All major commodity categories except automotive products decreased, probably due to the slower growth of the domestic economy. The dollar's second-quarter depreciation probably had little or no effect on imports, because exchange rate changes affect trade flows only with a time lag.

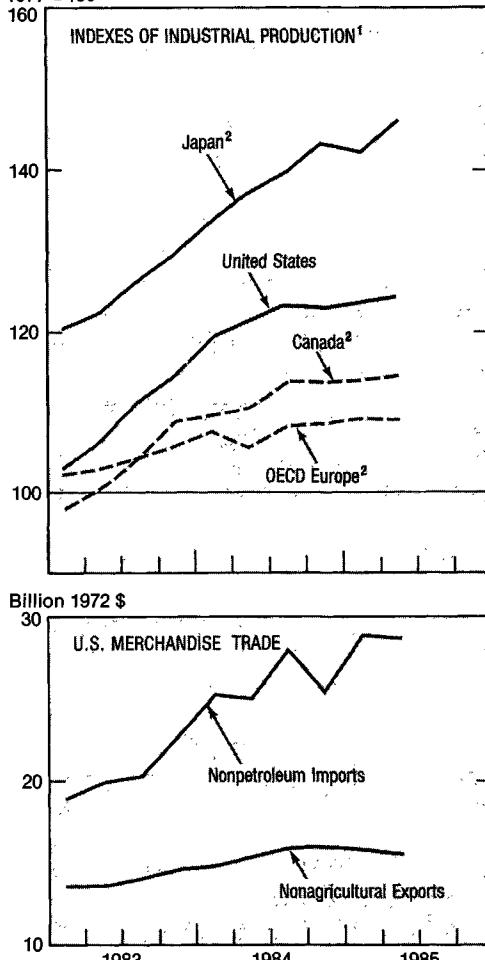

Foods, feeds, and beverages decreased \$0.4 billion to \$5.4 billion. Nonpetroleum industrial supplies and materials decreased \$0.7 billion to \$14.7 billion; decreases in nonmonetary gold and in iron and steel were partly offset by increases in coal and nuclear fuels, lumber, and tobacco. Capital goods decreased \$0.5 billion to \$16.1 billion; large decreases in electrical machinery and in business machinery and computers were partly offset by increases in aircraft and

parts, primarily from Western Europe. Consumer goods decreased \$0.3 billion to \$16.7 billion; the largest decreases were in electrical appliances and numismatic coins.

CHART 4

Industrial Production and Merchandise Trade

1977 = 100

1. Data: United States, Federal Reserve Board; Other countries, Organization for Economic Cooperation and Development. Indexes rebased by BEA.

2. For second quarter 1985, estimated from incomplete monthly data.

U.S. Department of Commerce, Bureau of Economic Analysis 85-9-4

Automotive products, up \$1.0 billion to a record \$16.3 billion, continued to increase strongly. Strong domestic auto sales have resulted in a near doubling of imports during the past 3 years. Imports from areas other than Canada accounted for the increase; complete cars from Japan were especially strong. Restrictions on exports of Japanese cars to the United States were eased starting in the second quarter.

By area, the increase in the merchandise trade deficit was accounted for by the rise in the deficit with industrialized countries. The deficit with industrial countries increased \$3.6 billion to \$22.1 billion. The deficit with Western Europe increased \$2.3 billion to \$6.4 billion, as U.S. exports fell sharply and imports rose. A similar pattern held for Japan, where the deficit increased \$1.2 billion to \$11.9 billion. The deficit with Canada was unchanged at \$3.9 billion, as both exports and imports increased. An \$0.8 billion increase in the deficit with members of OPEC to \$2.7 billion reflected a decline in nonagricultural exports and increased petroleum imports. This increase about offset a decrease in the deficit with other countries to \$8.3 billion. Imports from Latin America and from newly industrialized countries in Asia dropped more than agricultural exports.

Service transactions

Net service receipts increased \$2.2 billion to \$4.5 billion in the second quarter. Higher receipts of income on direct investment more than accounted for the increase.

Receipts of income on U.S. direct investment abroad increased \$3.7 billion to \$8.4 billion. The depreciation

of the dollar contributed to a \$3.3 billion shift to capital gains of \$0.8 billion. Over the past 2 years, fluctuations in capital gains and losses, caused primarily by changes in the exchange value of the dollar, have been a major source of fluctuations in direct investment income and in net service receipts. Operating earnings (that is, earnings before capital gains and losses, shown in table 5 as line 4 less line 3) increased \$0.5 billion to \$8.8 billion; increases in Western Europe and Canada more than offset decreases in Latin America and Australia. Interest payments increased \$0.1 billion to \$1.1 billion, largely reflecting payments to Netherlands Antilles finance affiliates. Payments of income on foreign direct investment in the United States were unchanged at \$2.4 billion.

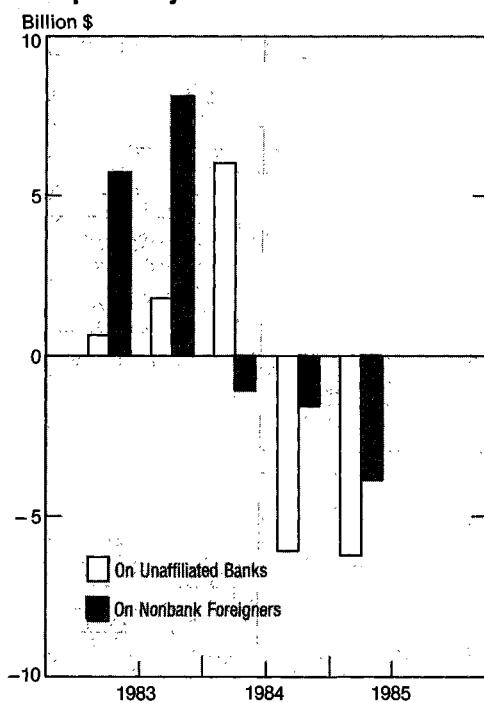

Receipts of income on other private investment decreased \$0.3 billion to \$12.6 billion. A decline in bank-reported receipts, due to lower interest rates, was partly offset by increased receipts from bonds, due to larger holdings. Payments increased \$0.1 billion to \$8.9 billion, due to heavy foreign investment in U.S. corporate bonds. Receipts on U.S. Government assets decreased \$0.2 billion to \$1.1 billion; payments were unchanged at \$5.3 billion, as an increase in foreign holdings of Treasury securities was offset by lower rates.

Net travel payments increased \$0.3 billion to \$1.3 billion. After a surge of visitors from overseas, especially Japan, in the first quarter, receipts fell \$0.3 billion to \$2.9 billion; receipts from Canada and Mexico also fell. Payments were unchanged at \$4.2 billion: overseas travel remained strong, significantly above last year's levels. Payments were up slightly to Canada, but down slightly to Mexico. Passenger fare receipts decreased slightly to \$0.8 billion, and payments increased to \$1.9 billion. Other transportation receipts decreased slightly to \$3.5 billion, and payments increased slightly to \$4.0 billion.

Transfers under U.S. military agency sales contracts decreased \$0.4 billion to \$2.3 billion. Deliveries of aircraft, ships, and vehicles under several major programs have now been completed and a significant increase in deliveries is not expected until late 1986. Direct defense expenditures decreased \$0.1 billion to \$2.8 billion.

CHART 5

Claims on Unaffiliated Foreigners Reported by U.S. Banks

NOTE.—Half-year periods shown.

U.S. Department of Commerce, Bureau of Economic Analysis

85-9-5

Net unilateral transfers increased \$0.2 billion to \$3.4 billion. U.S. Government grants increased, largely due to renewed payments to international organizations' programs, which had been negligible in the first quarter.

U.S. assets abroad

U.S. official reserve assets increased \$0.4 billion in the second quarter. Foreign currency holdings increased \$0.2 billion, reflecting interest earnings on foreign currency assets and acquisition of Argentine currency. The latter was part of the U.S. portion of a bridge loan to Argentina pending disbursement of a loan from the International Monetary Fund. Part of the loan was used by Argentina to pay interest arrears to U.S. banks. Holdings of special drawing rights also increased \$0.2 billion.

U.S. claims on foreigners reported by U.S. banks decreased \$4.4 billion, compared with virtually no change in the first quarter. Claims on unaffiliated foreign banks and on other foreigners have decreased in recent quarters, as only moderate economic expansion abroad has limited the demand for U.S. bank credit and as U.S. banks have reduced their foreign loan exposure and increased their

capital-asset ratios. Also, the concentration of credit demands in bond markets and the recent development of Euronote securities, which closely substitute for syndicated bank lending (see below), have reduced bank claims (chart 5). These claims—on unaffiliated foreign banks and on other foreigners, respectively—decreased \$3.9 billion and \$1.9 billion, in the second quarter. With the exception of increased claims on banks in the Caribbean and in Israel, reductions were widespread and included large reductions on Canada, the United Kingdom, Italy, Japan, and Mexico. In contrast, claims on banks' own foreign offices increased for the third consecutive quarter; they were up \$6.3 billion, compared with \$1.7 billion in the first quarter. The virtual disappearance of the differential between domestic and Eurodollar overnight rates in the second quarter encouraged U.S. banks to fund their own foreign offices, partly to meet those offices' midyear seasonal demands; concurrently, a lag in the decline in the U.S. prime rate contributed to a sharp increase in lending by foreign offices to nonbank U.S. borrowers. U.S. banks' domestic customers' claims decreased \$4.4 billion, mostly due to a sharp drop in money market mutual funds' holdings of Eurodollar deposits.

Net U.S. purchases of foreign securities decreased \$0.6 billion to \$1.9 billion; a sharp drop in net stock purchases was only partly offset by increased net bond purchases. Net stock purchases were virtually zero, following a record \$1.9 billion in the first quarter. A moderate U.S. stock market rally and sharply rising U.S. bond prices, fueled by large decreases in interest rates, shifted U.S. investors' interest to domestic markets. U.S. investors may also have taken profits following recent substantial appreciation in the value of foreign stocks and foreign currencies. Net purchases of Canadian, British, and Dutch stocks decreased, and there was a shift to net sales of Japanese stocks.

Placements of new bond issues shifted to the U.S. market from the Eurobond market: new foreign issues in the United States increased \$0.3 billion to \$1.6 billion, as U.S. interest rates decreased more than Eurobond rates and as Eurobond dealers reduced their inventory of issues after

record placements in the first quarter. Canadian issues increased \$0.5 billion to \$0.8 billion, despite a drop in total international bond financing by Canadian entities. European issues were up \$0.3 billion to \$0.5 billion. Trading in outstanding issues shifted \$0.9 billion to net purchases of \$0.7 billion. Purchases of British gilt-edge bonds increased \$0.8 billion to \$1.7 billion; purchases were heavy early in the quarter, when the pound strengthened and British interest rates rose slightly in contrast to rapidly falling U.S. rates. Large purchases from Belgium were more than offset by sales to the Netherlands Antilles, Japan, and several smaller financial centers. Redemptions were \$0.5 billion.

U.S. direct investment abroad shifted to outflows of \$4.1 billion from inflows of \$1.9 billion in the first quarter. Reinvested earnings increased strongly to \$6.5 billion from \$0.2 billion, reflecting both a shift to capital gains because of dollar depreciation and a drop in distributed earnings. Equity capital shifted to outflows of \$0.4 billion, reflecting increased petroleum investment in one Latin American country and the absence of the first-quarter's inflows from Canada. Intercompany debt inflows increased \$0.9 billion to \$2.8 billion; transactions with Netherland Antilles finance affiliates shifted \$0.6 billion to outflows of \$0.3 billion, probably reflecting payments to retire those affiliates' Eurobonds.

Foreign assets in the United States

Foreign official assets in the United States increased \$8.2 billion in the second quarter, in contrast to an \$11.2 billion decrease in the first quarter (table B). Following first-quarter drawdowns related to heavy intervention sales of dollars, developed coun-

tries rebuilt dollar holdings while exchange markets were less volatile and the stronger European currencies experienced capital inflows. Dollar holdings of OPEC members decreased \$1.9 billion, slightly less than in the first quarter. Dollar holdings of other countries increased \$3.4 billion, compared with a decrease of \$2.8 billion.

Purchases of U.S. Treasury securities by private foreigners and international financial institutions were \$5.3 billion, compared with \$2.6 billion in the first quarter (chart 6). A third Foreign Targeted Treasury Note was issued, amounting to \$1.0 billion; two previous issues, totaling \$2.0 billion, had been sold in the fourth quarter of 1984. Japanese purchases of bonds accounted for more than one-half of the second-quarter increase. In the first half of 1985, Japanese purchases of bonds were \$6.0 billion, \$1.5 billion more than in all of 1984.

Liabilities to private foreigners and international financial institutions reported by U.S. banks, excluding U.S. Treasury securities, increased \$0.3 billion, compared with a \$13.3 billion increase. A large differential between domestic and Eurodollar overnight rates, which had favored bank borrowing from abroad late in the first quarter, fell during the second. Consequently, inflows from banks' own foreign offices dropped to \$0.9 billion from \$4.1 billion; shifts to outflows to Japan and Latin America were partly offset by a shift to inflows from the United Kingdom. Liabilities to unaffiliated foreign banks shifted to a \$3.8 billion decrease from a \$5.7 billion increase; British and Caribbean banks accounted for most of the shift. A larger decline in U.S. interest rates than in foreign rates probably was a contributing factor. Liabilities to other foreigners increased \$1.7 billion, almost all due to a single large international institution.

CHART 6

Net Purchases and Sales of U.S. Securities by Private Foreigners

U.S. Department of Commerce, Bureau of Economic Analysis

85-9-6

Second-quarter data on U.S. liabilities to unaffiliated foreigners reported by nonbanking concerns are unavailable. However, newly reported first-quarter data indicate that these liabilities decreased \$2.7 billion. Most of the decrease reflected continued repayment of borrowing to finance large mergers and acquisitions during 1984.

The data on U.S. liabilities to unaffiliated foreigners now include U.S. corporations' drawings in the Euro-note market through Euronote facilities (ENF's), which are short- and medium-term note issuance arrangements operated primarily by banks. ENF's are standby agreements to raise funds in the Euronote market, with amounts, maturities, and interest rate spreads all prearranged. Once established with a group of investment bankers, a corporation draws on its ENF as needed by selling its notes in the Euronote market, which is similar to the U.S. commercial paper market. However, ENF's frequently include guarantees by bank consortia to lend to the corporation if the notes cannot be sold. ENF's originated in late 1984 largely as a technique for banks to arrange financing for their customers "off the balance sheet" so

that banks' capital-asset ratios would not be affected. ENF's were not utilized by U.S. companies until 1985, when a \$1.0 billion facility was established in the first quarter and \$5.0 billion in facilities were established in the second. Although actual drawings cannot be separately identified, it is believed that the facility established in the first quarter was fully drawn, but that little or none of the facilities established during the second quarter was drawn.

Net foreign purchases of U.S. securities decreased to \$7.1 billion from a record \$9.5 billion. A shift to net purchases of U.S. stocks was more than offset by a drop in purchases of Eurobonds issued by U.S. corporations. A four-quarter selloff of U.S. stocks ended in the second quarter with a \$1.5 billion shift to \$0.4 billion in net purchases, possibly because of the moderate stock market rally. Net sales by Western Europeans fell by two-thirds to \$0.4 billion, the slowest pace in five quarters. Net sales by Switzerland, the Netherlands, Germany, and France decreased, but sales by the United Kingdom increased because of continued strength in British

stocks and appreciation of the pound. Net Japanese transactions shifted \$0.4 billion to \$0.2 billion in purchases. Purchases from the Caribbean, primarily the Netherlands Antilles and Bermuda, were up \$0.2 billion to \$0.5 billion; steady purchases from the Caribbean over the past six quarters contrast sharply with the selloff from other regions.

New bond issues sold abroad by U.S. corporations were substantial—\$5.3 billion, although down from a record \$9.6 billion. Total bond financing by U.S. corporations was at a record in the second quarter, but a narrowing of the differential between U.S. and Eurobond interest rates led many U.S. borrowers to shift some financing to the domestic market. In addition, record Eurobond placements in the first quarter left dealers with large unsold inventories. Much of the second-quarter activity was corporate refinancing to lock in lower long-term rates and roll over short-term debt, but some substituted for the marked slowdown in international lending by U.S. and foreign banks. U.S. banks themselves were major borrowers during the quarter, issuing \$1.8 bil-

lion in floating-rate notes. Purchases of other outstanding U.S. corporate bonds increased \$0.4 billion to \$0.8 billion; purchases by Japanese institutional investors, who also accounted for nearly all of the \$0.6 billion in purchases of U.S. agency bonds, were heavy. Recent partial easing of restrictions on capital exports by Japan has led to large net purchases of U.S. domestic bonds and Eurobonds by Japanese corporations and pension funds seeking to diversify their assets and obtain high returns on dollar-denominated bonds. Most of the balance of purchases was accounted for by the Netherlands, Belgium, and Hong Kong.

Inflows for foreign direct investment in the United States were \$4.9 billion, compared with \$2.1 billion. Intercompany debt transactions shifted from small outflows to inflows of \$2.4 billion: payables increased sharply due to large loans by two European companies to their U.S. affiliates to complete financial arrangements for earlier purchases of U.S. companies. Equity capital inflows fell to \$1.7 billion from \$2.1 billion. Reinvested earnings increased \$0.2 billion to \$0.8 billion.

Footnotes to U.S. International Transactions Tables 1-10

General notes for all tables:

^a Revised.^b Preliminary.^c Less than \$500,000 (\pm).

n.a. Not available.

Table 1-2:

1. Credits, +: exports of goods and services; unilateral transfers to United States; capital inflows (increase in foreign assets (U.S. liabilities) or decrease in U.S. assets); decrease in U.S. official reserve assets; increase in foreign official assets in the United States.
- Debits, -: imports of goods and services, unilateral transfers to foreigners; capital outflows (decrease in foreign assets (U.S. liabilities) or increase in U.S. assets); increase in U.S. official reserve assets; decrease in foreign official assets in the United States.
- Excludes transfers of goods and services under U.S. military grant programs (see line 14).
- Excludes exports of goods under U.S. military agency sales contracts identified in Census export documents, excludes imports of goods under direct defense expenditures identified in Census import documents, and reflects various other adjustments (for valuation, coverage, and timing) of Census statistics to balance of payments basis; see table 3.
- For all areas, amounts outstanding June 30, 1985, were as follows in millions of dollars: line 34, 36,088; line 35, 11,090; line 36, 6,196; line 37, 11,394; line 38, 7,408.
- Includes sales of foreign obligations to foreigners.
- Consists of bills, certificates, marketable bonds and notes, and nonmarketable convertible and nonconvertible bonds and notes.
- Consists of U.S. Treasury and Export-Import Bank obligations, not included elsewhere, and debt securities of U.S. Government corporations and agencies.
- Includes, primarily, U.S. Government liabilities associated with military agency sales contracts and other transactions arranged with or through foreign official agencies; see table 4.
- Consists of investments in U.S. corporate stocks and in debt securities of private corporations and State and local governments.
- Conceptually, the sum of lines 67 and 62 is equal to "net foreign investment" in the national income and product accounts (NIPA's). However, the foreign transactions account in the NIPA's includes adjustments to the international transactions accounts for the treatment of gold, (b) excludes capital gains and losses of foreign affiliates of U.S. parent companies from the NIPA measure of income receipts from direct investment abroad, and from the corresponding income payments, and (c) beginning with 1973-IV, excludes shipments and financing of military orders placed by Israel under Public Law 93-199 and subsequent similar legislation. Line 65 differs from "net exports of goods and services" in the NIPA's for the same reasons with the exception of the military financing, which is excluded, and the additional exclusion of U.S. Government interest payments to foreigners. The latter payments, for NIPA purposes, are excluded from "net exports of goods and services" but included with transfers in "net foreign investment." A partial reconciliation table of the international accounts and the NIPA foreign transactions account appears in the "Reconciliation and other Special Tables" section in this issue of the SURVEY OF CURRENT BUSINESS.

Table 3:

- Exports, Census basis, represent transaction values, f.o.b., U.S. port of exportation; imports, Census basis, represent Customs values (see Technical Notes, June 1982 SURVEY). The unadjusted figures for exports and imports shown in lines A1, A10, D1, and D60, are as published by the Census Bureau, as are the seasonally adjusted figures in lines A1 and A10. The seasonally adjusted figures in lines D1 and D60 are prepared by BEA and are the summation of seasonally adjusted 4-digit end-use categories (see Technical Notes in the June 1980 SURVEY).
- Adjustments in lines A5 and A14, B12, B46, and B80 reflect the Census Bureau's reconciliation of discrepancies between the merchandise trade statistics published by the United States and the counterpart statistics published in Canada. These adjustments also have been distributed to the affected end-use categories in section C.
- Exports of military equipment under U.S. military agency sales contracts with foreign governments (line A6), and direct imports by the Department of Defense and the Coast Guard (line A15), to the extent such trade is identifiable from Customs declarations. These exports are included in tables 1, 2, and 10, line 3 (transfers under U.S. military agency sales contracts); and the imports are included in tables 1, 2, and 10, line 17 (direct defense expenditures).
- Addition of electrical energy; deduction of exposed motion picture film for rental rather than sale; net change in stock of U.S.-owned grains in storage in Canada; net timing adjustments for goods recorded in Census data in one period but found to have been shipped in another; and coverage adjustments for special situations in which shipments were omitted from Census data.
- Correction for discrepancy between sum of four quarters, seasonally adjusted, and unadjusted annual totals, plus the difference between Census published seasonally adjusted totals and the summation of seasonally adjusted 4-digit end-use categories prepared by BEA.
- Deduction of foreign charges for repair of U.S. vessels abroad, which are included in tables 1, 2, and 10, line 20 (other transportation); net timing adjustments for goods recorded in Census data in one period but found to have been shipped in another; and coverage adjustments for special situations in which shipments were omitted from Census data.
- Annual and unadjusted quarterly data shown in this table correspond to country and area data in table 10, lines 2 and 16. Trade with international organizations includes purchases of non-monetary gold from the IMF, transfers of tin to the International Tin Council (ITC), and sales of satellites to Intelsat. The memoranda are defined as follows: *Industrial countries*: Western Europe, Canada, Japan, and Australia, New Zealand, and South Africa; *Members of OPEC*: Venezuela, Ecuador, Iraq, Iran, Kuwait, Saudi Arabia, Qatar, United Arab Emirates, Indonesia, Algeria, Libya, Nigeria, Gabon; *Other countries*: Eastern Europe, Latin American Republics, other Western Hemisphere, and other countries in Asia and Africa, less OPEC. For all years, "Asia" and "Africa" exclude certain Pacific Islands and unidentified countries included in "Other countries in Asia and Africa."
- Includes nuclear fuel materials and fuels.

Table 4:

- Expenditures to release foreign governments from their contractual liabilities to pay for defense articles and services purchased through military sales contracts—first authorized (for Israel) under Public Law 93-199, section 4, and subsequently authorized for many recipients under similar legislation—are included in line A3. Deliveries against these military sales contracts are included in line C10; see footnote 2. Of the line A3 items, part of these military expenditures is applied in lines A40 and A43 to reduce short-term assets previously recorded in lines A38 and C8; this application of funds is excluded from lines C3 and C4. A second part of line A3 expenditures finances future deliveries under military sales contracts for the recipient countries and is applied directly to lines A39 and C9. A third part of line A3, disbursed directly to finance purchases by recipient countries from commercial suppliers in the United States, is included in line A34. A fourth part of line A3, representing dollars paid to the recipient countries to finance purchases from countries other than the United States, is included in line A45.
- Transactions under military sales contracts are those in which the Department of Defense sells and transfers military goods and services to a foreign purchaser, on a cash or credit basis. Purchases by foreigners directly from commercial suppliers are not included as transactions under military sales contracts. The entries for the several categories of transactions related to military sales contracts in this and other tables are partly estimated from incomplete data.
- The identification of transactions involving direct dollar outflows from the United States is made in reports by each operating agency. Data for the most recent quarters are extrapolated estimates by BEA because of incomplete reports from two operating agencies.

4. Line A35 includes foreign currency collected as interest and line A40 includes foreign currency collected as principal, as recorded in lines A13 and A14, respectively.

5. Includes (a) advance payments to the Department of Defense (on military sales contracts financed by loans extended to foreigners by U.S. Government agencies and (b) the contraentry for the part of lines C10 which was delivered without prepayment by the foreign purchaser. Also includes expenditures of appropriations available to release foreign purchasers from liability to make repayment.

6. Includes purchases of loans from U.S. banks and exporters and payments by the U.S. Government under commercial export credit and investment guarantee programs.

7. Excludes liabilities associated with military sales contracts financed by U.S. Government grants and credits and included in line C2.

Table 5:

- Also included in line 4.
- Acquisition of equity holdings in existing and newly established companies, capital contributions, capitalization of intercompany accounts, and other equity contributions.
- Sales, liquidations, and other dispositions of equity holdings, total and partial.
- Petroleum includes the exploration, development and production of crude oil and gas and the transportation, refining and marketing of petroleum products exclusive of petrochemicals. Manufacturing excludes petroleum refining. "Other" industries includes mining, trade; banking; finance (except banking); insurance, and real estate; agriculture, forestry, and fishing; construction, transportation, communications, and public utilities; and services.
- Also included in line 40.

Table 6:

- Primarily provincial, regional, and municipal.
- Largely transactions by International Bank for Reconstruction and Development (IBRD), International Development Association (IDA), International Finance Corporation (IFC), Asian Development Bank (ADB), and Inter-American Development Bank (IDB).
- Estimate for scheduled redemptions and identifiable early retirements. Includes estimates based on Canadian statistics for redemptions of Canadian issues held in the United States. Unidentified and nonscheduled retirements appear in line 29.
- Issues through finance affiliates established primarily to borrow capital from abroad. Issues are almost always guaranteed by the establishing U.S. parent and are often convertible into the parents' securities. To the extent proceeds are transferred from offshore affiliates to U.S. parents—the common practice—they are recorded as direct investment transactions in table 5, line 8.

Table 7:

- Primarily mortgages, loans, and bills and notes drawn on foreigners.
- Consists of Western Europe, Canada, Japan, Australia, New Zealand, and South Africa.
- Bahamas, British West Indies (Cayman Islands), Netherlands Antilles, and Panama.
- Based on data for Ecuador, Venezuela, Indonesia, and other Asian and African oil-exporting countries.

Table 8:

- Includes central governments and their agencies and corporations; state, provincial, and local governments and their agencies and corporations; and international and regional organizations.
- U.S.-owned banks are mainly U.S.-chartered banks and Edge Act subsidiaries. U.S. brokers' and dealers' accounts may be commingled in some categories. Foreign-owned banks include U.S. branches and agencies of foreign banks and majority-owned bank subsidiaries in the United States.
- Western Europe, Canada, Japan, Australia, New Zealand, and South Africa.
- Bahamas, British West Indies (Cayman Islands), Netherlands Antilles, and Panama.
- Based on data for Ecuador, Venezuela, Indonesia, and other Asian and African oil-exporting countries.
- Includes Eastern Europe and international and regional organizations.

Table 9:

- Negotiable certificates of deposit issued by banks in the United States are included in banks' custody liabilities and are separately identified in memorandum line 8. Nonnegotiable certificates of deposit are included in time deposits.
- Includes borrowing under Federal funds or repurchase arrangements, deferred credits, and liabilities other than deposits.
- Mainly negotiable and readily transferable instruments, excluding U.S. Treasury securities.
- U.S. Treasury notes denominated in foreign currencies and subject to restricted transferability that were sold through foreign central banks to domestic residents in country of placement. None of these notes were outstanding after July 1983.
- Mainly International Bank for Reconstruction and Development (IBRD), International Development Association (IDA), International Finance Corporation (IFC), Asian Development Bank (ADB), Inter-American Development Bank (IDB), and the Trust Fund of the International Monetary Fund.
- U.S.-owned banks are mainly U.S.-chartered banks and Edge Act subsidiaries. U.S. brokers' and dealers' liabilities may be commingled in some categories. Foreign-owned banks are U.S. branches and agencies of foreign banks and majority-owned bank subsidiaries in the United States.
- Western Europe, Canada, Japan, Australia, New Zealand, and South Africa.
- Bahamas, British West Indies (Cayman Islands), Netherlands Antilles, and Panama.
- Based on data for Ecuador, Venezuela, Indonesia, and other Asian and African oil-exporting countries.
- Includes Eastern Europe and international and regional organizations.

Table 10:

- For footnotes 1-10, see table 1.
- The "European Communities (10)" includes the "European Communities (6)," United Kingdom, Denmark, Ireland, and Greece.
- The "European Communities (6)" includes Belgium, France, Germany, Italy, Luxembourg, Netherlands, European Atomic Energy Community, European Coal and Steel Community, and European Investment Bank.
- Includes, as part of international and unallocated, the estimated direct investment in foreign affiliates engaged in international shipping, in operating oil and gas drilling equipment that is moved from country to country during the year, and in petroleum trading.
- Details not shown separately; see totals in lines 49 and 56.
- Details not shown separately are included in line 61.

Constant-Dollar Inventories, Sales, and Inventory-Sales Ratios for Manufacturing and Trade

Tables 1, 2, and 3 present constant-dollar inventories, sales, and inventory-sales ratios, respectively, quarterly and monthly. Table 4 presents quarterly constant-dollar fixed-weighted inventory-sales ratios, i.e., ratios obtained by weighting detailed industry ratios by 1972 sales. Table 5 pre-

sents monthly inventories for manufacturing by stage of fabrication. Quarterly estimates for 1981:I to 1984:II, and monthly estimates for 1984 were published in the September 1984 SURVEY OF CURRENT BUSINESS.

BEA Publications

Available From GPO

Survey of Current Business. Contains estimates and analyses of U.S. economic activity. Features include a review of current economic developments; articles pertaining to BEA's work on the national, regional, and international economic accounts and related topics; quarterly national income and product accounts tables; and 36 pages of tables that present over 1,900 major economic series obtained from other public and private sources. Monthly. \$4.75 single copy; \$30.00 per year.

Business Statistics: 1982. (1983) Provides monthly or quarterly data for 1979-82 and annual data for 1961-82 for series that appear in the SURVEY OF CURRENT BUSINESS: national income and product accounts; U.S. international transactions; plant and equipment expenditures; business sales, inventories, and orders; prices; employment and unemployment; construction; banking and finance; transportation; and many other industries and commodities. Also contains definitions of terms, sources of data, and methods of compilation. 284 pages. \$8.00 (GPO Stock No. 003-010-00124-1). (A revised and updated edition will be published this fall.)

Business Conditions Digest. Contains tables and charts for 300 series, including business cycle indicators and other series that help evaluate business conditions. Features the composite indexes of leading, coincident, and lagging indicators. Also included are cyclical comparison charts and data sources. Monthly. \$4.00 single copy; \$44.00 per year.

Handbook of Cyclical Indicators. (1984) Contains series descriptions and data for 1947-82 for all series that appear in *Business Conditions Digest*. Features the composite indexes of cyclical indicators. 195 pages. \$5.50 (GPO Stock No. 003-010-00127-5).

BEA Methodology Paper No. 1: Introduction to National Economic Accounting. (1985) Introduces the concepts of the national income and product accounts by placing these accounts within the framework of national economic accounting. Shows how the national income and product accounts, capital finance accounts, and input-output accounts—the major branches of national economic accounting in the United States—are derived from the conventional accounting statements. 19 pages. \$1.00 (GPO Stock No. 003-010-00158-5).

BEA Methodology Paper No. 2: Corporate Profits: Profits Before Tax, Profits Tax Liability, and Dividends. (1985) Describes the concepts, sources, and methods of the corporate profits components of the national income and product accounts. 61 pages. \$2.50 (GPO Stock No. 003-010-00143-7).

The Input-Output Structure of the U.S. Economy, 1977. (1984) Reprint from the SURVEY OF CURRENT BUSINESS explains concepts, conventions, definitions, and uses of the 1977 input-output tables. Includes the input-output tables at the 85-industry level. 44 pages. \$2.25 (GPO Stock No. 003-010-00128-3).

Selected Data on Foreign Direct Investment in the United States, 1950-79. (1985) Contains comprehensive historical estimates, including country-by-industry detail, for the following series: foreign direct investment position; capital inflows; equity and intercompany account inflows; reinvested earnings of incorporated affiliates; interest, dividends, and earnings of unincorporated affiliates; income; earnings; and fees and royalties. 50 pages. \$2.25 (GPO Stock No. 003-010-00141-1).

1985 OBERS BEA Regional Projections: Vol. 1, State Projections to 2035. (1985) Contains estimates for 1969, 1973, 1978, and 1983, and projections for 1990, 1995, 2000, 2005, 2015, and 2035 for total personal income, population, per capita personal income, and employment and earnings by industry for the United States and States. 131 pages. \$4.75 (GPO Stock No. 003-010-00157-7).

State Personal Income: Estimates for 1929-82 and a Statement of Sources and Methods. (1984) For each State, the eight BEA regions, and the United States, contains estimates of annual total and per capita personal income for 1929-82, annual total and per capita disposable personal income for 1948-82, annual personal income by major type of payment and by industry for 1929-82, and quarterly total personal income for 1948-82. Also contains a comprehensive statement of sources and methods for estimating State personal income. 330 pages. \$9.50 (GPO Stock No. 003-010-00125-9).

BEA Staff Paper No. 42: Experimental BEA Estimates of Gross State Product by Industry. (1985) Describes estimates of gross State product—the State equivalent of gross national product—by industry and presents estimates for 1963, 1967, 1972, and 1977. 108 pages. \$3.75 (GPO Stock No. 003-010-00144-5).

Local Area Personal Income, 1978-83. (1985) Nine volumes. Contains personal income by type of payment and earnings by major industry, population, and total and per capita personal income for 1978-83.

Vol. 1. Summary. Contains estimates for the United States, regions, States, and metropolitan areas. Also contains county definitions of metropolitan areas, a detailed description of sources and methods, and samples of tables available. 162 pages. \$6.00 (GPO Stock No. 003-00145-3). Each of the eight regional volumes contains a summary methodology and detailed estimates for the States, counties, and metropolitan areas in that region.

Vol. 2. New England Region. 71 pages. \$2.75 (GPO Stock No. 003-010-00146-1).

Vol. 3. Mideast Region. 110 pages. \$4.00 (GPO Stock No. 003-010-00147-0).

Vol. 4. Great Lakes Region. 174 pages. \$6.50 (GPO Stock No. 003-010-00148-8).

Vol. 5. Plains Region. 216 pages. \$8.00 (GPO Stock No. 003-010-00149-6).

Vol. 6. Southeast Region. 360 pages. \$18.00 (GPO Stock No. 003-010-00150-0).

Vol. 7. Southwest Region. 148 pages. \$5.00 (GPO Stock No. 003-010-00151-8).

Vol. 8. Rocky Mountain Region. 104 pages. \$3.75 (GPO Stock No. 003-010-00152-6).

Vol. 9. Far West Region. 106 pages. \$3.75 (GPO Stock No. 003-010-00153-4).

TO ORDER PUBLICATIONS AVAILABLE FROM THE U.S. GOVERNMENT PRINTING OFFICE (GPO): Publications must be ordered from Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Payment may be by check (made payable to Superintendent of Documents) or charged to a GPO deposit account number, VISA, or MasterCard. To order by phone: (202) 783-3238.

Available From NTIS

BEA Working Paper No. 3: Sources of Change in Federal Net Interest Paid. (1985) Discusses some of the important sources of change in Federal net interest paid. Describes an analytical framework used in estimating the automatic effects of the business cycle and inflation on net interest paid. 26 pages. \$8.50 (NTIS Accession No. PB 85-213-171).

TO ORDER PUBLICATIONS AVAILABLE FROM THE NATIONAL TECHNICAL INFORMATION SERVICE (NTIS): Publications must be ordered from National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161. Payment may be by check (made payable to National Technical Information Service) or charged to an NTIS deposit account number, VISA, MasterCard, or American Express. To order by phone: (703) 487-4650.

Available From BEA

BEA Reports. Provides subscribers with BEA's estimates on a prompt basis. Gross National Product, monthly, \$18.00 per year. Personal Income and Outlays, monthly, \$18.00 per year. Composite Indexes of Leading, Co-incident, and Lagging Indicators, monthly, \$18.00 per year. Plant and Equipment Expenditures, \$9.00 per year. Regional Economic Reports, \$12.00 per year. International Economic Reports, \$22.50 per year. All sets, \$97.50 per year.

TO ORDER: BEA Reports must be ordered from Jane Wright, Current Business Analysis Division, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230. Orders must include a check, payable to U.S. Department of Commerce/Working Capital Fund. For information about BEA Reports, call (202) 523-0777.

Bureau of Economic Analysis Catalog of Publications & Computer Tapes. For a free copy, send a self-addressed stamped envelope (8½ by 11 inches, with 75 cents postage) to Jane Wright, Current Business Analysis Division, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

CURRENT BUSINESS STATISTICS

The statistics here update series published in **BUSINESS STATISTICS: 1982**, a statistical supplement to the **SURVEY OF CURRENT BUSINESS**. That volume (available from the Superintendent of Documents for \$8.00, stock no. 003-010-00124-1) provides a description of each series, references to sources of earlier figures, and historical data as follows: For all series, monthly or quarterly, 1979 through 1982; annually, 1961-82; for selected series, monthly or quarterly, 1961-82 (where available).

The sources of the series are given in **BUSINESS STATISTICS: 1982**; they appear in the main methodological note for each series, and are also listed alphabetically on pages 135-136. Series originating in Government agencies are not copyrighted and may be reprinted freely. Series from private sources are provided through the courtesy of the compilers, and are subject to their copyrights.

Unless otherwise stated in footnotes below, data through 1982 and methodological notes are as shown in BUSINESS STATISTICS: 1982	Units	Annual		1984						1985

- c Corrected.

Page S-1

- † Revised series. See Tables 2.6-2.9 in the July 1984 SURVEY for revised estimates for 1981-84.
 ‡ Includes inventory valuation and capital consumption adjustments.
 § Monthly estimates equal the centered three-month average of personal saving as a percentage of the centered three-month moving average of disposable personal income.
 ◇ See note "◇" for p. S-2.

Includes data for items not shown separately.

* New series. This index (first shown in the Feb. 1984 SURVEY) reflects costs associated with homeowners' consumption of shelter service. This new index combines the subindexes of owners' equivalent rent and household insurance. Indexes prior to Dec. 1982 are not available. For additional information, see p. S-36 of the Feb. 1983 SURVEY.

‡ Effective with the Feb. 1984 SURVEY, data have been revised back to 1979. Effective with the Mar. 1985 SURVEY, data have been revised back to 1980. These revisions are available upon request.

† Effective with the Feb. 1984 SURVEY, data back to 1979 have been revised. Effective with the Feb. 1985 SURVEY, data back to 1980 have been revised. These revisions are available upon request.

◇ See note "◇" for p. S-5.

Page S-2

1. Based on data not seasonally adjusted.
- ◇ The figures presented here reflect revisions of the industrial production index introduced by the Federal Reserve Board in July 1985. The revision moves the reference year of the index from 1967 to 1977=100, and increases the number of basic index series from 235 to 252. New value-added weights were assigned to each series for 1977. A detailed description of the revision and its results are in the July 1985 issue of the *Federal Reserve Bulletin* (pp. 487-501).
- *New series. See note "◇" for this page.
 # Includes data not shown separately.
 † See note "†" for p. S-8.
 ‡ See note "‡" for p. S-8.
 §§ See note "††" for p. S-3.
 @ Revised series. For manufacturing see note "††" for p. S-3. For retail see note "‡" for p. S-8. For wholesale see note "†" for p. S-8.
 § Revised series. Data have revised back to 1981, effective with the August 1984 SURVEY. Revisions are available upon request.

Page S-7

1. Computed from cumulative valuation total.

2. Index as of Sept. 1, 1985: building, 361.2; construction, 390.4.

3. Data are for 16,000 permit-issuing places.

◇ Effective July 1985 SURVEY, data have been revised back to Jan. 1982. In addition to the normal revisions, new housing units, residential buildings, private construction, and total new construction have been revised back to Jan. 1976, based on revised estimates for 1-unit residential buildings. These revisions, resulting in a break in the series, reflect a procedural change in the estimation of the value of units started and a coverage change to include land development done by the builder. Revised data are available upon request.

Includes data for items not shown separately.

§ Data for Aug. and Nov. 1984, and Jan. and May 1985 are for five weeks; other months four weeks.

† Effective Feb. 1984 SURVEY, data for seasonally adjusted housing starts have been revised back to 1981. Effective Feb. 1985 SURVEY, data have been revised from 1982-84. These revisions are available upon request.

‡ Effective Feb. 1985 SURVEY, data for building permit authorizations are based on 17,000 permit-issuing places beginning with Jan. 1984. These revisions are available upon request.

@ Effective Feb. 1984 SURVEY, data for seasonally adjusted manufacturer's shipments of mobile homes have been revised back to 1981. Effective Feb. 1985 SURVEY, unadjusted data for Jan. 1982 through June 1984, and seasonally adjusted data from Jan. 1982 through Nov. 1984 have been revised. These revisions are available upon request.

Page S-3

- # Includes data for items not shown separately.
 † See note "†" for p. S-8.
 ‡ See note "‡" for p. S-8.
- †† Effective June 1985 SURVEY, data have been revised for Jan. 1978-Dec. 1984. A detailed description of this revision and data appear in the report "Manufacturers' Shipments, Inventories, and Orders" M3-1.14 (1978-1984). Copies of this report can be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. A computer tape of the report, including data back to 1958 can be purchased from the Data User Services Division, Customer Services Branch, Bureau of the Census, Washington, DC 20233.
- (@ See note "@" for p. S-2.
 § See note "§" for p. S-2.

Page S-4

1. Based on data not seasonally adjusted.
- # Includes data for items not shown separately.
 † Includes textile mill products, leather and products, paper and allied products, and printing and publishing industries; unfilled orders for other nondurable goods industries are zero.
 ‡ See note "††" for p. S-3.
 ◇ For these industries (food and kindred products, tobacco, apparel and other textile products, petroleum and coal, chemicals and allied products, and rubber and plastics products) sales are considered equal to new orders.

Page S-5

1. Based on unadjusted data.
 2. The annual liabilities figure for 1983 is \$16,072,860,000.
 3. See note "◇" for this page.
- @ Compiled by Dun & Bradstreet, Inc. Monthly data are now available through 1983, and are available upon request.
 # Includes data for items not shown separately.
 § Ratio of prices received to prices paid (parity index).
 ‡ See note "‡" for p. S-4.
- † Effective with the Feb. 1984 SURVEY, data (back to 1981 for some commodities) have been revised. Effective with the July 1985 SURVEY, data (back to 1982, for some commodities) have been revised. These revisions are available upon request.
 ◇ Beginning with data for Jan. 1983 (Jan. 1985, for CPI-W), the index is affected by a change in methodology used to compute the homeownership component. For additional information regarding this change, see p. S-36 of the Feb. 1983 SURVEY.
 * New series.
 †† See note "††" for p. S-3.

Page S-6

- § For actual producer prices or price indexes of individual commodities, see respective commodities in the Industry section beginning p. S-19. All indexes subject to revision four months after original publication.

Page S-8

1. Advance estimate.
2. Direct endorsement cases are included beginning with June data.
3. January and February 1983 revised monthly figures are not available from source, but they are included in the 1983 revised annual total.
4. New series effective Sept. 1985 SURVEY. All activity reported on a gross basis (i.e., the entire amount of loan) including refinancings and combination construction—purchase loans. Revised data are now available back to Jan. 1984. Earlier data will be available later.
 ◇ Home mortgage rates (conventional first mortgages) are under money and interest rates on p. S-14.
 § Data include guaranteed direct loans sold.
 # Includes data for items not shown separately.
 † Effective April 1985 SURVEY, wholesale trade data have been revised for Jan. 1977-Dec. 1984. A detailed description and the revised series appear in the report "Revised Monthly Wholesale Trade" BW-13-85, available from the Bureau of the Census, Washington, DC 20233; \$2.50 per copy.
 ‡ Effective April 1985 SURVEY, retail trade data have been revised for Jan. 1977-Dec. 1984. Revised data and a summary of changes appear in the report "Revised Monthly Retail Sales and Inventories" BR-13-85, available from the Bureau of the Census, Washington, DC 20233; \$2.75 per copy.
 * New series. Annual data for earlier periods are available upon request. Monthly data for earlier periods will be available later.

Page S-9

1. Advance estimate.
2. Includes data for items not shown separately.
- ◇ Effective with the January 1985 SURVEY, the seasonally adjusted labor force series have been revised back to January 1980. Effective with the January 1984 SURVEY, the seasonally adjusted labor force series have been revised back to January 1979. Revised monthly data back to 1980 appear in the January 1985 issue of *Employment and Earnings*. Revised monthly data for 1979 appear in the February 1984 issue of *Employment and Earnings*.
 † The participation rate is the percent of the civilian noninstitutional population in the civilian labor force. The employment-population ratio is civilian employment as a percent of the civilian noninstitutional population, 16 years and over.
 § See note "‡" for p. S-8.
 * New series.
 @ Data include resident armed forces.

Page S-10

◊ See note "◊" for p. S-9.

* New series.

† Effective June 1985 SURVEY, data have been revised back to April 1983 (not seasonally adjusted) and January 1980 (seasonally adjusted) based on the March 1984 benchmark, an improved method for estimating the employment effect of new firms entering the economy, and revised seasonal factors. The June 1985 issue of "Employment and Earnings" contains a detailed discussion of the effects of the revisions.

Page S-11

‡ This series is not seasonally adjusted because the seasonal component is small relative to the trend-cycle and/or irregular components and consequently cannot be separated with sufficient precision.

◊ Production and nonsupervisory workers.

* New series.

† See note "†" for p. S-10.

Page S-12

1. This series is not seasonally adjusted because the seasonal component is small relative to the trend-cycle and/or irregular components and consequently cannot be separated with sufficient precision. Use the corresponding unadjusted series.

◊ Production and nonsupervisory workers.

‡ Earnings in 1977 dollars reflect changes in purchasing power since 1977 by dividing by Consumer Price Index.

§ Wages as of Sept. 1, 1985: Common, \$15.95; Skilled, \$21.00.

* New series.

@ New series. The Employment Cost Index (ECI) is a quarterly measure of the average change in the cost of employing labor. See p. S-36 of the August through October 1984 issues of the SURVEY for a brief description of the ECI.

† Excludes farm, household, and Federal workers.

†† See note "†" for p. S-10.

Page S-13

1. Average for Dec.

2. Reported annual; monthly revisions are not available.

3. Effective December 1, 1982, there was a break in the commercial paper series because of changes in reporting panels, modifications to reporting instructions and corrections to misreported bank data.

‡ Effective January 1984, series revised due to changes in the reporting panel and in the item contents. The new panel includes 168 banks that had domestic office assets exceeding \$1.4 billion as of December 31, 1982. Beginning Jan. 1985, data are as of the last Wednesday of the month. Earlier data are as of the Wednesday nearest the end of the month or year (meaning some data are as of the first Wednesday of the next month).

Includes data for items not shown separately.

Reflects offsetting changes in classification of deposits of thrift institutions. Deposits of thrifts were formerly grouped with deposits of individuals, partnerships, and corporations, instead of with deposits of commercial banks in the United States.

* "Transaction balances other than demand deposits" consists of ATS, NOW, super NOW, and telephone transfer accounts, which formerly were classified with savings deposits. "Nontransaction balances" reflects the combination of deposits formerly reported separately as time deposits and the savings deposits remaining after deduction of the items now reported separately under "transaction balances."

§ Excludes loans and federal funds transactions with domestic commercial banks and includes valuation reserves (individual loan items are shown gross; i.e., before deduction of valuation reserves).

◊ Securities of Federal agencies and corporations have been shifted out of "other securities" and are now combined with U.S. Treasury securities. Also, loan obligations of States and political subdivisions have been shifted out of "other securities" and are now shown separately among the loan items.

@ Insured unemployment (all programs) data include claims filed under extended duration provisions of regular State laws; amounts paid under these programs are excluded from state benefits paid data.

@@ Insured unemployment as a percent of average covered employment in a 12-month period.

Page S-14

1. Data are for fiscal years ending Sept. 30 and include revisions not distributed to the months.

2. Weighted by number of loans.

3. Does not include a prior period adjustment of \$326 million.

† Effective March 1985 SURVEY, the consumer installment credit series have been revised back to July 1980 to reflect more complete benchmark data for some of the components.

Includes data for items not shown separately.

◊ Adjusted to exclude domestic commercial interbank loans and federal funds sold to domestic commercial banks.

‡ Rates on the commercial paper placed for firms whose bond rating is Aa or the equivalent.

Courtesy of *Metals Week*.

@@ Average effective rate

* New series. For an explanation of the prime rate and historical data, see p. S-36 of the June or July 1984 SURVEY.

Page S-15

1. Beginning 1983, the reporting frequency has been changed from a monthly to a quarterly basis.

2. This series has been discontinued.

† Effective Feb. 1985 SURVEY, the money stock measures and components have been revised and are available from the Banking Section of the Division of Research and Statistics at the Federal Reserve Board, Washington, D.C. 20551

‡ Composition of the money stock measures is as follows:

M1.—This measure is currency plus demand deposits at commercial banks and interest-earning checkable deposits at all depository institutions—namely NOW accounts, automatic transfer from savings (ATS) accounts, and credit union share draft balances—as well as a small amount of demand deposits at thrift institutions that cannot, using present data sources, be separated from interest-earning checkable deposits.

M2.—This measure adds to *M1* overnight repurchase agreements (RP's) issued by commercial banks and certain overnight Eurodollars (those issued by Caribbean branches of member banks) held by U.S. nonbank residents, money market mutual fund shares, and savings and small-denomination time deposits (those issued in denominations of less than \$100,000) at all depository institutions. Depository institutions are commercial banks (including U.S. agencies and branches of foreign banks, Edge Act corporations, and foreign investment companies), mutual savings banks, savings and loan associations, and credit unions.

M3.—This measure equals *M2* plus large-denomination time deposits (those issued in denominations of \$100,000 or more) at all depository institutions (including negotiable CD's) plus term RP's issued by commercial banks and savings and loan associations.

L.—This broad measure of liquid assets equals *M3* plus other liquid assets consisting of other Eurodollar holdings of U.S. nonbank residents, bankers acceptances, commercial paper, savings bonds, and marketable liquid Treasury obligations.

Includes ATS and NOW balances at all depository institutions, credit union share draft balances, and demand deposits at thrift institutions.

◊ Overnight (and continuing contract) RP's are those issued by commercial banks to the nonbank public, and overnight Eurodollars are those issued by Caribbean branches of member banks to U.S. nonbank customers.

* New series. For "Other checkable deposits," see also note "##" for this page.

@ Small time deposits are those issued in amounts of less than \$100,000. Large time deposits are those issued in amounts of \$100,000 or more and are net of the holdings of domestic banks, thrift institutions, the U.S. Government, money market mutual funds, and foreign banks and official institutions.

Includes data for items not shown separately.

§ Number of issues represents number currently used; the change in number does not affect the continuity of the series.

@@ Series has been revised back to 1971. Private placement data, which was published through 1982, has been eliminated from the historical data. Public exempt offerings are not included in data prior to Jan. 1985.

Page S-16

1. The Aaa public utility average was suspended Jan. 17, 1984, because of a lack of appropriate issues. The average corporate and the Aaa corporate do not include Aaa utilities from Jan. 17 to Oct. 12. The Aaa utility average was reinstated on Oct. 12; the Oct. monthly average includes only the last 14 days of the month.

§ Number of issues represents number currently used; the change in number does not affect the continuity of the series.

‡ For bonds due or callable in 10 years or more.

Includes data for items not shown separately.

@ Data may not equal the sum of the geographic regions, or commodity groups and principal commodities, because of revisions to the totals not reflected in the component items.

◊ As of Jan. 25, 1984, the base period was changed to 1982=100.

Page S-17

1. Beginning with Jan. 1982 data, the Customs value is being substituted for the f.a.s. value.

Includes data not shown separately.

§ Data may not equal the sum of geographic regions, or commodity groups and principal commodities, because of revisions to the totals not reflected in the components.

Page S-18

1. See note 1 for p. S-17.

2. Annual total; quarterly or monthly revisions are not available.

3. Restaurant sales index data represent hotels and motor hotels only.

4. For month shown.

5. Domestic trunk operations only (averaging about 90 percent of domestic total).

Includes data for items not shown separately.

§ Total revenues, expenses, and income for all groups of carriers also reflect nonscheduled service.

‡ Beginning Jan. 1977, Class I railroads are defined as those having operating revenues of \$50 million or more.

◊ Average daily rent per room occupied, not scheduled rates.

Data represent entries to a national park for recreational use of the park, its services, conveniences, and/or facilities.

* New series.

@ Beginning 1984, data are on a depreciation accounting system; prior data were on a retirement-replacement-betterment accounting system.

† Before extraordinary and prior period items.

Page S-19

1. Reported annual total; monthly revisions are not available.
 2. Data for 1984 are not comparable to 1983 because of court ordered divestiture.
 3. Less than 500 short tons.
 4. Data are unavailable after 1983.
 5. Effective with 1985, data are reported on a quarterly basis.
 6. Data are no longer available.
- # Includes data for items not shown separately.
 § Data are reported on the basis of 100 percent content of the specified material unless otherwise indicated.
 † Monthly data back to 1981 have been revised and are available upon request.
 * New series, first shown in the Mar. 1984 SURVEY. Annual and monthly data back to 1980 are available upon request.

@ Because of deregulation, carriers are free to enter both domestic and international markets. Previously, carriers were limited either to domestic or overseas markets. Separate data for domestic or overseas are no longer available.

Page S-20

1. Reported annual total; monthly or quarterly revisions are not available.
 2. See note “#” for this page.
 3. See note 5 for p. S-19.
- § Data are not wholly comparable from year to year because of changes from one classification to another.

‡ Revised quarterly data for 1981-83 are available upon request.
 ◇ Effective 1983, data are based on a new sample of approximately 150 establishments, which was selected using the 1981 annual survey “Paints and Allied Products” panel as a universe frame. Comparable data for 1979-82 and revisions for 1983 are available upon request.

† Effective with the July 1984 SURVEY, data for 1980-82 (and 1975 for revenue from sales to customers) have been revised. Effective with the Feb. 1985 SURVEY, data for 1982-83 have been revised. These revisions are available upon request.

Effective with the Sept. 1985 SURVEY, monthly data have been restated back to Jan. 1984 to include consumption for Hawaii. Prior to 1984, consumption for Hawaii is reflected in annual totals only.

Page S-21

1. Previous year's crop; new crop not reported until Oct. (beginning of new crop year).
 2. Crop estimate for the year.
 3. Stocks as of June 1.
 4. Stocks as of June 1 and represents previous year's crop; new crop not reported until June (beginning of new crop year).
 5. Figure represents June 1, 1983 stocks (based on previous year's crop); whereas, 1982 and earlier annuals are for stocks ending Dec. 31 of the respective calendar year. Comparable estimates are no longer available.
 6. See note “@” for this page.
 7. Less than 50,000 bushels.
 8. Data are no longer available.
 9. Sept. 1 estimate of 1985 crop.
- § Excludes pearl barley.
 # Bags of 100 lbs.

@ Data are quarterly except for June (covering Apr. and May) and Sept. (covering June-Sept.).

* New series, first shown in the Mar. 1984 SURVEY. Annual and monthly data for earlier periods are available upon request.

** New series, first shown in the Sept. 1984 SURVEY. Annual and monthly indexes for earlier periods are available upon request.

1. Annual data; monthly revisions not available.
 2. Less than 500 tons.
 3. Beginning January 1985, data have been revised because of a new estimation procedure and may not be comparable to earlier periods.
- † New series.

Page S-25

1. Annual data; monthly revisions are not available.
2. For month shown.
 † Beginning January 1982, data represent metallic (mostly aluminum) content. Data for 1981 and prior years represent aluminum content only.
 * New series. Estimated U.S. free market price, prompt delivery to the Midwest.
 ◇ The source for these series is now the Bureau of Mines.
 § New series. Source: Metals Week.

Page S-26

1. Annual data; monthly revisions are not available.
2. Less than 50 tons.
3. Quarterly data were discontinued for 1983 and reinstated beginning first quarter 1984.
4. Beginning 1st quarter 1984, data have been revised because of a new sample and may not be comparable to earlier periods.
 ◇ Includes secondary smelters' lead stocks in refinery shapes and in copper-base scrap.
 @ All data (except annual production figures) reflect GSA remelted zinc and zinc purchased for direct shipment.
 † Source for monthly data: American Bureau of Metal Statistics. Source for annual data: Bureau of Mines.
 # Includes data not shown separately.
 § Beginning with the Aug. 1985 SURVEY, unadjusted fluid power shipments indexes are shown. Seasonally adjusted indexes are no longer available.

Page S-27

1. Data withheld to avoid disclosing information for individual companies.
2. Data are for five weeks; other months 4 weeks.
3. Comparable data are no longer available.
- # Includes data for items not shown separately.
 § Includes nonmarketable catalyst coke. See also note “†” for this page.
 ◇ Includes small amounts of “other hydrocarbons and alcohol new supply (field production),” not shown separately.
 † Effective with the Nov. 1983 SURVEY, data for 1982 have been revised. Effective with the June 1984 SURVEY, data for 1983 have been revised. Effective with the December 1984 SURVEY, coal production data for 1983 have been revised. Effective with the May 1985 SURVEY, coal consumption and stocks for 1984 have been revised. These revisions are available upon request.
 * New series. Includes U.S. produced and imported microwave ovens and combination microwave oven/ranges.
 † Effective with the July 1984 SURVEY, data for 1983 have been revised. Effective with the July 1985 SURVEY, data for 1984 have been revised. These revisions are available upon request.

Page S-28

1. Reported annual totals; revisions not allocated to the months.
2. Effective with Jan. 1983, data include road oil. Total road oil data for 1982 were (thous. bbl.): 591, domestic demand; 610, production; 47, stocks.
3. Effective with the Jan. 1985 price, gasoline that contains alcohol as an additive is included.
4. Effective with June 1985, indexes reflect price movements through the middle of the month for which they are shown. Indexes prior to June 1985 were based on prices for the previous month; reflecting a one-month lag in pricing.
 † New series. First shown in March 1984 SURVEY. Earlier data are available upon request.
 * New series, first shown in the Feb. 1984 SURVEY. Prices back to 1974 are available upon request.
 # Includes data for items not shown separately.
 † Except for price data, see note “‡” for p. S-27.

Page S-29

1. See note 1 for p. S-28.
2. Average for 11 months; no price available for Dec. 1983.
 ◇ Source: American Paper Institute. Total U.S. estimated consumption by all newspaper users.
 † See note “†” for p. S-28.
 # Compiled by the American Newspaper Publishers Association.

Page S-30

1. Reported annual total; revisions not allocated to the months.
2. Crop for the year.
3. Data cover five weeks; other months, four weeks.
4. Data are no longer available.
5. Beginning Jan. 1985, figure includes sales of water/moisture resistant board, not shown separately.
 6. Beginning 1st quarter 1985, value of shipments for rolled and wire glass is excluded. Comparable 4th quarter 1984 figure, which excludes such shipments, is \$243,820,000.

- # Includes data for items not shown separately.
 ◇ Cumulative ginnings to the end of month indicated.
 § Bales of 480 lbs.
 † Monthly revisions for 1982 and 1983 are available upon request.
 ‡ Monthly revisions for 1981-84 are available upon request.
 @ Effective with the Mar. 1984 SURVEY, sales of regular basecoat and all other building plasters (including Keene's cement) have been combined to represent sales of total building plasters. For comparability, earlier published figures for these two series should be combined.

Page S-31

1. Less than 500 bales.
 2. Annual total includes revisions not distributed to the months.
 3. Average for crop year; Aug. 1-Jul. 31.
 4. For five weeks; other months four weeks.
 5. Average for 10 months; no data for Jan.-Feb.
- ◇ Based on 480-lb. bales, preliminary price reflects sales as of the 15th; revised price reflects total quantity purchased and dollars paid for the entire month (revised price includes discounts and premiums).
- # Includes data not shown separately.
- * New series.
- § Bales of 480 lbs..
- @ Monthly data discontinued for the year 1982; reinstated beginning Jan. 1983.

Page S-32

1. Annual total includes revisions not distributed to the months.
2. Production of new vehicles (thous. of units) for Aug. 1985: *passenger cars*, 548; *trucks and buses*, 292.
3. Effective with the Feb. 1984 SURVEY, data have been revised back to 1981. Effective with the Mar. 1985 SURVEY, data have been revised back to 1982. These revisions, which were made to reflect updated seasonal factors, are available upon request.
4. See note "##" for this page.

5. Series has been discontinued.

Total includes backlog for nonrelated products and services and basic research.

§ Domestics comprise all cars assembled in the U.S. and cars assembled in Canada and imported to the U.S. under the provisions of the Automotive Products Trade Act of 1965. Imports comprise all other cars.

◇ Courtesy of R.L. Polk & Co.; republication prohibited. Because data for some states are not available, month-to-month comparisons are not strictly valid.

† Excludes railroad-owned private refrigerator cars and private line cars.

‡ Monthly revisions for aircraft shipments and airframe weight for 1982 and 1983 are available upon request. Monthly revisions for truck trailers, etc. for 1981-83 are available upon request.

@ Includes passenger vans.

* New series, first shown in the Mar. 1984 SURVEY. Annual and monthly data back to 1967 are available upon request.

†† Includes Volkswagens produced in the U.S.

‡‡ Sizes (gross vehicle weight) are classified as follows: Light-duty, up to 14,000 lbs.; medium-duty, 14,001 - 26,000 lbs.; and heavy-duty, 26,001 lbs. and over.

Annual and monthly data back to 1981 have been replaced with total imports of passenger cars published by the International Trade Commission, which exclude estimated quantities of passenger cars assembled in foreign trade zones. These new data, which are comparable with data previously published for 1980 and earlier periods, are available upon request.

@@ Monthly data discontinued for the year 1982; reinstated beginning Jan. 1983.
