the BUSINESS SITUATION

THE pace of U.S. production picked up in the third quarter of 1987. Real GNP increased at an annual rate of 4 percent, following an increase of 2½ percent in the second quarter (chart 1).¹

1. Quarterly estimates in the national income and product accounts are expressed at seasonally adjusted annual rates, and quarterly changes in them are differences between these rates. Quarter-to-quarter percent changes are annualized. Real, or constant-dollar, estimates are expressed in 1982 dollars.

The preliminary GNP estimates for the third quarter are based on the following major source data: For *personal consumption expenditures* (PCE), retail sales through September, and unit auto and truck sales through September; for *nonresidential fixed investment*, the same information for autos and trucks as for PCE, construction put in place for July and August, and manufacturers' shipments of machinery and equipment for July and August; for *residential investment*, construction put in place for July and August, and housing starts through September; for *change in business inventories*, manufacturing and trade inventories for July and August, and unit auto inventories through September; for *net exports of goods and services*, merchandise exports and merchandise imports for July and August, and fragmentary information on investment income for the quarter; for *government purchases of goods and services*, Federal unified budget outlays for July and August, and State and local construction put in place for July and August; and for *GNP prices*, the Consumer Price Index for July and August, the Producer Price Index through September, the unit-value index for petroleum imports for July and August, and unit-value indexes for merchandise exports and nonpetroleum merchandise imports for July. Some of the source data are subject to revision.

U.S. demand also picked up, increasing more than U.S. production for the first time since the third quarter of last year. Real gross domestic purchases increased 4½ percent, following a 2-percent increase in the second quarter.

Inflation, whether measured by the prices of goods and services produced or by the prices of goods and services purchased, slowed in the third quarter. The GNP price index (fixed weights) increased 2½ percent after a 4-percent increase; the price index for gross domestic purchases (fixed weights) increased 3 percent after a 4½-percent increase.

Foreign transactions continued to register substantial changes. To analyze the impact of these changes on U.S. production and demand, exports and imports must be examined separately. Exports—goods and services provided by U.S. residents to foreigners—are added in the calculation of GNP but not in the calculation of gross domestic purchases. Imports—goods and services provided by foreigners to U.S. residents—are subtracted in the calculation of GNP but not in that of gross domestic purchases. Thus, as shown in table 1, GNP minus exports plus imports is equal to gross domestic purchases.

Looking Ahead . . .

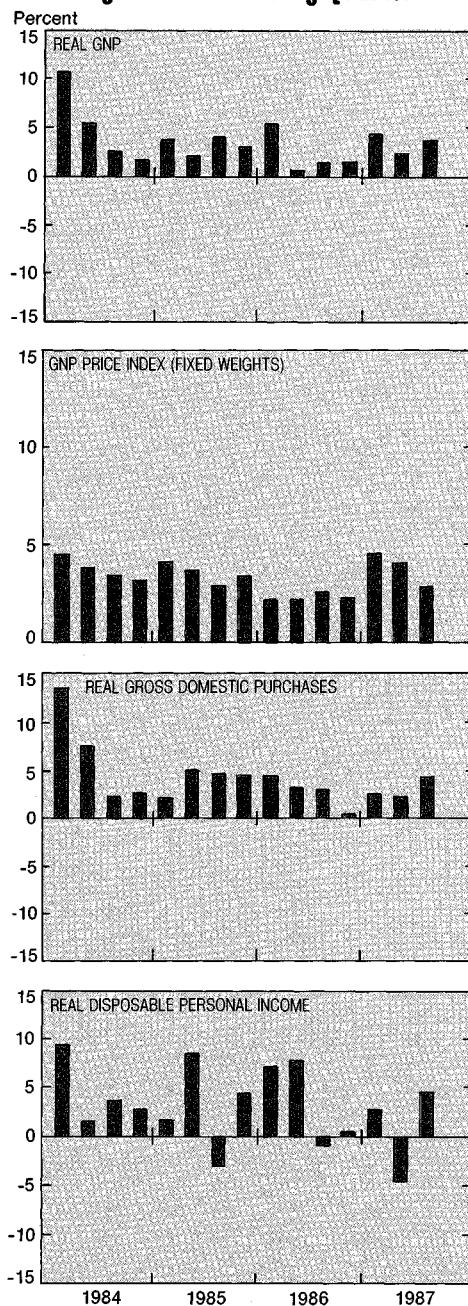

• **Motor Vehicles.** A review of developments in the 1987 model year will appear in the November issue of the SURVEY. The article, based on units data, covers domestic and imported autos and trucks.

• **Composite Indexes.** A summary presentation of BEA's composite indexes of leading, coincident, and lagging indicators will appear in the SURVEY beginning in the November issue.

• **GNP Methodology.** The paper *GNP: An Overview of Source Data and Estimating Methods* is available as the fourth in BEA's methodology paper series. See page 42 for information about this and other recent BEA publications.

CHART 1

Selected Measures: Change From Preceding Quarter

1. Purchases in the United States of goods and services wherever produced.

NOTE.—Percent changes in major aggregates are found in the National Income and Product Accounts Tables, table 8.1. Dollar levels are found in table 1.6.

Real exports increased strongly in both the second and third quarters—\$16½ billion in the second and \$16 billion in the third—and continued to be a major contributor to GNP growth. Over the two quarters combined, exports, which make up one-ninth of GNP, accounted for more than one-half of the \$59 billion increase in GNP.

Real imports also increased strongly in both quarters—\$14 billion in the second and \$21½ billion in the third—and continued to meet a sizable portion of the increase in U.S. demand. Almost all of the third-quarter increase was due to a surge in petroleum imports. Over the two quarters combined, imports, which make up one-seventh of gross domestic purchases, accounted for more than one-half of the \$61½ billion increase in gross domestic purchases.

Although imports are subtracted in the calculation of GNP, one cannot simply add them back to determine what U.S. production would have been in the absence of imports. Assessing the effect of imports on U.S. production is more complex, involving questions such as the extent to which the imported goods and services could and would have been produced domestically instead and the extent to which U.S. exports would have been affected.

Components of Real GNP

Changes in most of the major components of real GNP were in the same direction in the third quarter as they had been in the second. Personal consumption expenditures and nonresidential fixed investment increased in both quarters, but each was up con-

siderably more in the third. Residential investment was weak in both quarters. The change in business inventories declined in both quarters, but was down considerably more in the third. Net exports declined after a small increase: Exports were up strongly in both quarters; imports were up more strongly in the third quarter than in the second. Government purchases increased by about the same amount in both quarters.

Personal consumption expenditures

Real personal consumption expenditures (PCE) increased 5 percent in the third quarter after increasing 2 percent in the second. Durable goods and services each increased more than in the second quarter, and nondurable goods decreased less than in the second quarter (table 2).

Over the three quarters of 1987, increases in PCE have averaged 2 percent, considerably less than in 1986. The smaller increases were consistent with the mixed economic picture for consumers. In 1987, income gains have not kept pace with expenditures: Real PCE has increased twice as much as real disposable personal income. Consumers have stretched spending with the help of stock market gains and added debt. Consumer confidence, as measured by the Index of Consumer Sentiment prepared by the University of Michigan's Survey Research Center, has remained high, reflecting steady job growth, personal tax cuts, and moderate inflation. Although consumers still viewed their financial situations and the economy in a generally positive light, they may have become more cautious about borrowing. Quarterly percent increases in consumer installment credit outstanding in 1987 were well below the double-digit increases in 1986. (Conventional measures of borrowing and debt burden, however, do not capture the increasing use of home equity lines of credit in the past several quarters.)

Chart 2 compares quarterly percent changes over the past 3 years in total PCE with those in PCE excluding motor vehicles and parts. Although motor vehicles and parts make up less than one-tenth of PCE, they have dominated the quarterly pattern of the total. In particular, manufacturers' sales-incentive programs in the third quarters of 1985, 1986, and 1987

1. Gasoline and oil, and fuel oil and coal.

2. Electricity and gas.

NOTE.—Percent changes in major aggregates are found in the National Income and Product Accounts Tables, table 8.1. Dollar levels are found in table 2.3.

boosted sales substantially. (A discussion of motor vehicles, in terms of units, appears at the end of the "Business Situation.")

Expenditures for durable goods increased 20 percent in the third quarter, following an increase of 10½ percent in the second. The acceleration was largely attributable to motor vehicles and parts. Expenditures for furniture and household equipment and for other durables accelerated slightly.

Expenditures for nondurable goods decreased slightly in the third quarter, following a 2-percent decrease in the second. In recent quarters, changes in the components of nondurables have been erratic; the large swings have tended to offset one another in the total. Food declined in the third quarter, but less than in the second. Clothing and shoes swung from a sharp decrease to an even sharper increase. Energy decreased sharply after an increase of similar magnitude. Other durables decreased after an increase.

Expenditures for services increased 4 percent in the third quarter, following a 2-percent increase in the second. Household operation services accelerated, largely due to a pickup in expenditures for electricity and gas. Reflecting brokerage services, other services increased moderately after a

Table 3.—Real Gross Private Domestic Fixed Investment

Note.—Percent changes are found in the National Income and Product Accounts Tables, table 8.1. Dollar levels are found in table 1.2.

decline in the second quarter. Housing and medical care registered increases similar to those in the second quarter, and transportation decreased slightly after an increase.

Nonresidential fixed investment

Real nonresidential fixed investment increased 23½ percent in the third quarter, following an 11½-percent increase in the second (table 3). Structures, which had been weak in the first half of the year, increased 16 percent in the third quarter. Producers' durable equipment, which had bounced back in the second quarter after a first-quarter decline, increased 26½ percent.

In structures, petroleum exploration and drilling, which makes up one-fifth of nonresidential structures, accounted for two-thirds of the increase. This component has been buffeted in recent years by sharp changes in crude petroleum prices. Increased exploration and drilling in the past four quarters reflect the better-than-50-percent increase in the Producer Price Index for crude petroleum over the period. Public utilities, which also make up one-fifth of nonresidential structures, more than accounted for the rest of the increase. Office buildings increased slightly, following eight consecutive quarterly declines, but persistently high vacancy rates (in the neighborhood of 20 percent, nationally) cast doubt on the sustainability of the upswing.

In producers' durable equipment, increases were widespread but were especially large in information processing and related equipment. This category, which makes up two-fifths of the total, accounted for two-thirds of the increase. This category's largest component—office, computing, and accounting machinery—increased

very sharply, following several quarters of sluggish sales.

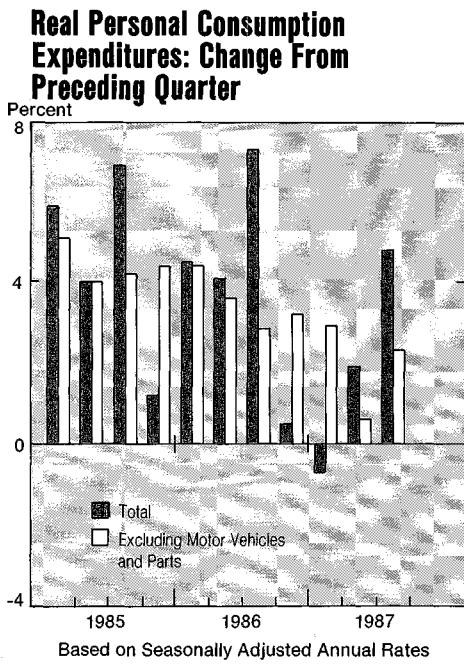

Factors usually cited in assessments of investment conditions gave mixed signals for the third quarter. On the one hand, capacity utilization continued to increase, unfilled orders for nondefense capital goods were very high, export demand was strong, corporate cash flow had been quite high relative to investment expenditures in the first half of the year, and capital appropriations had increased sharply in the first half. On the other hand, capacity utilization—although increasing—was still substantially below the peak levels reached in previous expansions, interest rates had increased since the spring, and consumer demand had been sluggish in the first half of the year.

Residential investment

Real residential investment was unchanged in the third quarter, following a 3-percent decline in the second. In the third quarter, an increase in single-family construction was offset by a decline in multifamily construction. In single-family construction, the increase was relatively modest, 6½ percent, but larger than the increases of 3½-4 percent earlier in the year; in multifamily construction, the decline was large, 23 percent, but smaller than the 33-percent drops earlier in the year. The other component of residential investment—which includes major replacements, additions and alterations, mobile home sales, and brokers' commissions on house sales—changed little.

The third-quarter increase in single-family construction largely reflected two offsetting developments in the second quarter. (Almost one-half of the value of construction put in place in a given quarter depends on

CHART 2

U.S. Department of Commerce, Bureau of Economic Analysis 87-10-2

the value of units started in the immediately preceding quarter.) First, the number of single-family units started dropped 9 percent in the second quarter (chart 3). (Percentages in this paragraph are not at annual rates.) Second, the average value of starts increased sharply in the second quarter. One indication of the increase in average value is shown by the differing behavior of two price measures. The price index for new one-family houses sold—a measure that attempts to remove the effect of changes in size and amenities—increased 1 percent, while the average sales price of new one-family houses actually sold—a measure that reflects changes in size and amenities—increased 5 percent. In the third quarter, the number of starts was flat, while the average value appears to have increased again.

The commitment rate on fixed-rate first mortgages increased 1.18 percentage points in the second quarter and another 0.18 point in the third (chart 4). The effect of these increases on house sales (which determine brokers' commissions and influence future construction plans) was only partly blunted by the availability of adjustable-rate mortgages carrying initial rates 1 to 2 percentage points lower than fixed-rate mortgages. Sales of both new and existing residences in July-August were about 6

Table 4.—Change in Real Business Inventories
[Billions of 1982 dollars; seasonally adjusted at annual rates]

Other	6.0	6.4	6.8	6.0	6.9	.4	.4	-.8	.9	
Addendum: Nonfarm less auto dealers.....	17.9	-1.9	22.6	19.7	18.4	-19.8	24.5	-2.9	-1.3	

NOTE.—Dollar levels for most inventories are found in the National Income and Product Accounts Tables, table 5.11.

percent below first-quarter levels, with the drop in sales of new units occurring in the second quarter and the drop in sales of existing units occurring in July-August. The difference in the timing of the declines in new and existing sales is probably, in part, a statistical mirage; sales of existing units are based on a mixture of sales contracts and closings, and, thus, would tend to trail sales of new units, which are based on sales contracts alone.

The third-quarter decline in multifamily construction reflected—as did declines earlier in the year—changes in tax laws and high vacancy rates resulting from previous overbuilding. At 7½ percent, the national rental va-

cancy rate was about 2 percentage points above its longrun average, implying, according to one estimate, an excess of approximately 600,000 units.

Inventory investment

Real inventory investment declined \$21 billion, as inventory accumulation slowed to \$18 billion in the third quarter from \$39 billion in the second (table 4). Inventory investment had declined \$8½ billion in the second quarter. Both farm and nonfarm inventory investment declined in the third quarter—\$7½ billion and \$13½ billion, respectively.

Farm inventories accumulated in both the second and third quarters—\$16½ billion and \$9 billion, respectively. Not only were open market sales of crops below current production in the two quarters but, also, substantial amounts of crops were redeemed from the Commodity Credit Corporation, especially in the second quarter.

Among nonfarm inventories, inventories of retail auto dealers declined \$9 billion after an increase of \$3 billion. The decline, which was concentrated in inventories of domestic cars, reflected enhanced sales-incentive programs and cuts in production.

Nonfarm inventories excluding those held by retail auto dealers—shown as an addendum in table 4—increased \$18½ billion, following increases of \$19½ billion and \$22½ billion in the second and first quarters, respectively. The steady accumulations in this total masked sharp movements in manufacturing and trade inventories. Manufacturing inventories increased \$8½ billion after a decline of \$4½ billion; the increase

Note.—Percent changes in major aggregates are found in the National Income and Product Accounts Tables, table 8.1. Dollar levels are found in tables 4.2 and 4.4.

was concentrated in transportation equipment other than motor vehicles, petroleum, and nonelectrical machinery. Wholesale trade inventories declined \$4 billion after an increase of \$5½ billion; the third-quarter decumulation was mostly in durables, especially in metals and minerals and in electrical goods. Among nondurables, strong buildups in petroleum and products and in groceries were largely offset by runoffs in farm products and in apparel and dry goods. Retail trade inventories (excluding autos) increased \$7 billion after an increase of \$12½ billion. Among durables, the increase was concentrated in furniture and appliances; among nondurables, food and beverages increased moderately, and nondurables other than food increased sharply.

Reflecting the third-quarter increase in inventories and the even stronger increase in final sales, the constant-dollar ratio of total inventories to total final sales declined. At 3.18, down from 3.21 in the first and second quarters, the ratio was near the lower end of the range within which it has moved in recent years.

Net exports

Real net exports declined \$5 billion in the third quarter, following increases in the preceding three quarters (table 5). Exports and imports both increased substantially in the third quarter; the larger increase in imports was due to a surge in petroleum imports.

Imports increased \$21½ billion, following a somewhat smaller increase in the second quarter. In the third quarter, as in two of the three preceding quarters, the change in merchan-

dise imports was dominated by petroleum. Petroleum imports were up \$19½ billion in the third quarter, the largest increase on record. The third-quarter surge followed an increase of \$2½ billion in the second quarter and substantial declines in each of the two preceding quarters. The unusually large increase, in the face of rising crude oil prices, may have reflected some precautionary building of stocks due to increased uncertainty about oil supplies from the Middle East. Fur-

ther, domestic crude oil production continued to decline and growth in U.S. economic activity continued to boost oil demand.

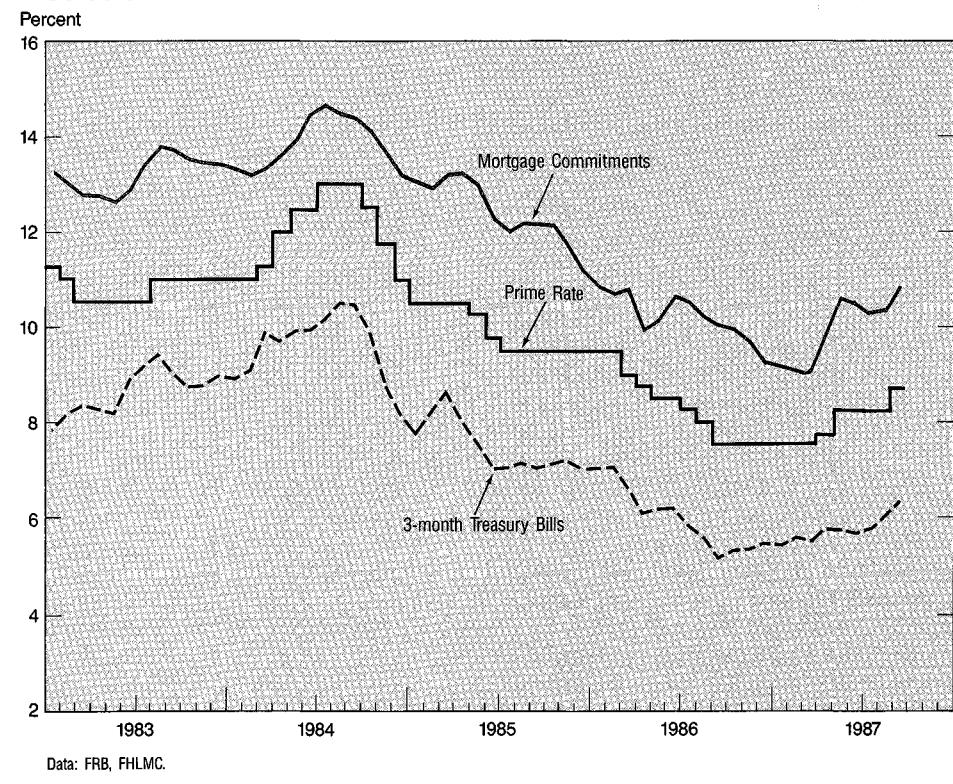

Nonpetroleum merchandise imports increased \$1½ billion, following a \$5 billion increase. The increases were more than accounted for by sharp gains in imports of capital goods, except autos. The other major end-use categories remained weak—below or no higher than year-ago levels. The weakness reflected, to some extent, substantial increases in prices (see the section on prices later in the "Business Situation"), which were largely due to depreciation of the dollar.

Imports of services increased \$½ billion, following a \$6½ billion increase. The slowdown was in factor income and mirrored movements in interest rates on portfolio investment.

Exports increased \$16 billion, following a similar increase in the second quarter. Merchandise exports, both agricultural and nonagricultural, increased strongly in both quarters. The third-quarter increase in agricultural exports, mainly in soybean exports, reflected the growing competitiveness of U.S. agricultural products

CHART 4

Selected Interest Rates

U.S. Department of Commerce, Bureau of Economic Analysis

87-10-4

in the world market due to lower prices and reduced competitor supplies.

Increases in nonagricultural exports in the second and third quarters averaged \$10½ billion, twice the average increase in the preceding four quarters. The second- and third-quarter increases were spread across most of the major end-use categories, but were especially sharp in exports of capital goods, except autos. The strength in nonagricultural exports reflected, to some extent, the cumulative effects of dollar depreciation.

Exports of services declined \$1½ billion, following a \$5 billion increase in the second quarter. Factor income increased less than in the second quarter, mirroring movements in interest rates on portfolio investment; other services declined after an increase.

Government purchases

Real government purchases increased \$9 billion, or 4½ percent, in the third quarter, following an increase of \$7 billion, or 4 percent, in the second (table 6). Federal Government purchases increased by about the same amount in the third quarter as in the second; State and local government purchases increased more than in the second quarter.

Within Federal Government purchases, national defense purchases increased much less than in the second quarter; the slowdown was concentrated in services other than employee compensation and in military hardware. Nondefense purchases increased after a small decline; the swing reflected the pattern of changes in inventories held by the Commodity Credit Corporation (CCC). The level of CCC inventories declined in each of the past three quarters, but the decline was considerably larger in the second quarter than in the first or third quarters. Withdrawals from CCC inventories, particularly in the second quarter, included not only redemptions by farmers of crops they had previously placed under loan but also redemptions using certificates initially issued to farmers by the CCC in lieu of cash subsidy payments. Other nondefense purchases resumed a slight downtrend that had been interrupted in the second quarter by a bulge in services other than employee compensation.

NOTE.—Percent changes in major aggregates are found in the National Income and Product Accounts Tables, table 8.1. Dollar levels are found in table 3.8B.

Within State and local government purchases, structures changed little after a decline in the second quarter. The pattern largely reflected changes in two components: Buildings changed little after a \$1 billion decline, and highways increased \$½ billion after a \$½ billion decline.

Prices

GNP prices and gross domestic purchases prices both decelerated 1½ percentage points in the third quarter—to increases of 2½ percent and 3 percent, respectively (table 7). The continued higher increases in the purchases price measure largely reflected substantial increases in the prices of merchandise imports. As shown in

the addenda to the table, prices of merchandise imports have increased at double-digit rates in recent quarters. The sharp, although decelerating, increases in petroleum prices during the period are most notable, but prices of other imported goods have registered strong increases as well. Over the past three quarters, increases in prices of industrial supplies and materials, excluding petroleum, averaged 11½ percent; increases in prices of capital goods, except autos, averaged 6½ percent; and increases in prices of consumer goods averaged 9 percent.

The third-quarter slowdown in inflation was widespread. Prices of PCE, fixed investment, and government purchases all increased less than in the second quarter.

PCE prices increased 3½ percent, following a 5-percent increase in the second quarter. Food prices were up moderately after a strong second-quarter increase, when prices of meat and of fruits and vegetables had been up sharply. Increases in meat prices slowed in the third quarter; in particular, retail prices of beef leveled off, after a 5-year high in June. Prices of fruits and vegetables fell in the third quarter. Energy prices, largely reflecting gasoline prices, increased a little less in the third quarter than in the second. Other PCE prices were up less than in the second quarter. The slowdown was largely accounted for by prices of clothing and shoes; these prices, which often fluctuate sharply from quarter to quarter, declined in the third quarter after a double-digit increase in the second.

Among the investment components, increases in the prices of structures—both nonresidential and residential—

decelerated sharply in the third quarter. PDE prices have changed little in the past three quarters.

Prices paid by government increased 4 percent, slightly less than in the second quarter. Prices of Federal defense purchases—primarily reflecting missiles, aircraft, and employee compensation—increased considerably less than in the second quarter. Prices of nondefense purchases were up somewhat less than in the second quarter, and prices of State and local government purchases were up somewhat more.

Personal Income

Personal income increased \$51 billion in the third quarter, following a \$46½ billion increase in the second (table 8). The acceleration was largely accounted for by stronger increases in wage and salary disbursements and in personal interest income. Disposable personal income jumped in the third

quarter, as personal tax and nontax payments fell after a sharp increase in the second.

Wage and salary disbursements increased \$35½ billion in the third quarter, following a \$28 billion increase in the second. The step-up was concentrated in wages and salaries in the manufacturing and services industries, although the other major private industries also contributed. Employment, average weekly hours, and average hourly earnings in the private industries all increased more than in the second quarter. Government wages and salaries increased by about the same amount as in the second quarter. (Treatment in the national income and product accounts of a shift in pay days for military personnel is described in the accompanying explanatory note.)

Farm proprietors' income decreased \$8 billion in the third quarter, following a decrease of \$4 billion in the second. Federal agricultural subsidy

payments to farmers declined in both quarters—\$5 billion in the third and \$9½ billion in the second; farm income excluding subsidies declined \$3 billion in the third quarter after a \$5½ billion increase in the second. The swing in farm income excluding subsidies was largely attributable to changes in prices received by farmers; crop prices were down in the third quarter after a strong increase in the second, and livestock prices increased much less in the third than in the second. Nonfarm proprietors' income was up somewhat more in the third quarter than in the second; the pickup reflected increases in the services and real estate industries after declines in the second quarter.

Personal interest income was up \$11½ billion in the third quarter, following a \$6½ billion increase in the second. The step-up reflected continued increases in interest rates.

Transfer payments were up less in the third quarter than in the second. In the second quarter, retroactive social security payments amounting to \$2 billion were made to recent retirees. These retroactive payments are one-time payments; thus, the change in transfer payments was raised \$2 billion in the second quarter and reduced \$2 billion in the third.

Third-quarter changes in the remaining components of personal income were small and were similar to those in the second quarter. Other labor income and personal dividend income increased, and rental income declined. Personal contributions for

1. Estimates of the impact of the Tax Reform Act of 1986 on Federal Government personal tax payments and indirect effects on State and local personal tax payments.

NOTE.—Most dollar levels are found in the National Income and Product Accounts Tables, table 2.1.

Shift in Military Pay Days

Recently enacted legislation has resulted in some shifting of the end-of-the-month pay days for military personnel. Previously, these pay days were the last nonholiday weekday of each month. Beginning with September 1987, these pay days are shifted to the first day of the next month if the first falls on a nonholiday weekday. Thus, it is possible for some months to have one pay day more than normal and some months to have one less. Because these shifts would result in large month-to-month changes in personal income that have little economic significance, wages paid to military personnel on the first of a month will be recorded in the national income and product accounts in the prior month. Shifts in pay days for other employees are treated in a similar manner.

social insurance, which are subtracted in deriving the personal income total, registered a small increase.

Personal tax and nontax payments decreased \$12 billion in the third quarter, following a \$42 billion surge in the second. The swing reflected the direct and indirect effects of the Tax Reform Act of 1986 on Federal and on State and local tax payments. These effects subtracted \$25½ billion from the change in tax payments in the third quarter after adding \$25½ billion to the second-quarter change. Most of the third-quarter swing in Federal tax payments resulted from a sharp dropoff in declarations (estimated tax payments) and net settlements (final tax payments less refunds on the preceding year's taxes). These payments had been large in the first half of the year, reflecting the acceleration of capital gains realizations into 1986. The third-quarter swing in State and local tax payments reflected the indirect effects of the tax act, which had raised second-quarter payments to the extent that taxpayers shifted realizations of capital gains into 1986. (For more information, see the discussion in the July 1987 "Business Situation.")

Largely reflecting the sharp swing in personal tax and nontax payments, disposable personal income (DPI) jumped \$63 billion in the third quarter, following a \$4½ billion increase in the second. Real DPI increased 4½ percent in the third quarter, following a 4½-percent decline in the second; the swing reflected both the sharp acceleration in DPI and the deceleration in PCE prices.

Personal outlays—largely PCE—were up about the same as DPI in the third quarter; they had been up much more than DPI in the second. As a result, personal saving swung sharply from a \$45 billion decrease to a \$1½ billion increase. The personal saving rate, after dropping 1.4 percentage points to 3.0 percent in the second quarter, was unchanged in the third.

Motor Vehicles

Sales of new cars, boosted by manufacturers' sales-incentive programs, jumped 1.5 million units to 11.5 million (seasonally adjusted annual rate) in the third quarter (chart 5). The third-quarter increase was the largest since the 1.9-million jump in the third

quarter of 1986, which had also been spurred by incentive programs.

Two-thirds of the third-quarter increase was in sales of domestic cars, which were up to 8.0 million from 7.0 million in the second quarter. The sharp increase reflected the introduction of sales-incentive programs offering interest rates as low as 1.9 percent. However, third-quarter sales were well below the record of 9.5 million in the third quarter of 1986; the lower level of sales in the third quarter of this year reflected the weakness in domestic car sales in 1987 and the fact that the recent sales-incentive programs were less attractive than those offered in the third quarter of 1986.

Domestic car sales averaged 6.9 million in the first half of 1987, compared with 7.8 million in the first half of 1986. The weakness in 1987 sales was due to several factors, including a saturation in the new car market, a slight decline in consumer confidence, and a substitution by consumers of purchases of light trucks (pickups, recreational vehicles, and vans) for cars. Further, incentive programs in the third quarter of 1987 may have had a different effect on quarterly sales patterns than programs in the third quarters of 1985 and 1986. Programs in 1985 and 1986, which were not expected by consumers, shifted sales only from future quarters. In the first and second quarters of 1987, consumers, anticipating enhanced incentive programs at the end of the model year, may have postponed purchases.

The third-quarter 1987 incentive programs were similar to, but less attractive than, programs offered in the third quarter of last year. The recent programs were not as dramatically different from programs in preceding quarters, and, because the interest rates offered were not as far below prevailing market rates, the incentives amounted to a smaller portion of a consumer's total outlay for a new car.

In addition to offering enhanced incentive programs in the third quarter of 1987, domestic automakers cut production to reduce inventories. Domestic car production declined to 6.3 million units from 7.1 million in the second quarter. Domestic car inventories declined sharply to 1.36 million units from 1.80 million in the second quarter. Reflecting higher sales and

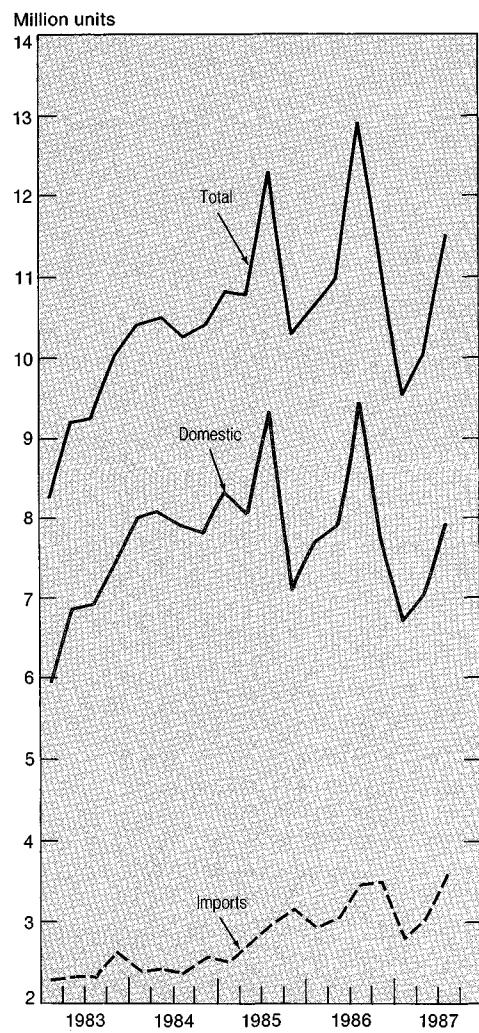

reduced inventories, the inventory-sales ratio fell sharply to 2.1 in the third quarter, the lowest level since 1.7 in the third quarter of 1986. The ratio had been 3.1 in the second quarter.

Sales of imported cars increased to a record 3.6 million in the third quarter from 3.0 million in the second. The increase reflected, in part, incentive programs offered by foreign automakers in an attempt to compete with the domestic programs.

Unit sales of new trucks increased to 5.3 million in the third quarter from 5.0 million in the second. Sales of domestic trucks increased to 4.4 million from 4.1 million; sales of imported trucks were 0.9 million in each quarter.

National Income and Product Accounts Tables

New estimates in this issue: Third quarter 1987, preliminary (p).

Estimates for 1929-82 are in *The National Income and Product Accounts, 1929-82: Statistical Tables* (GPO Stock No. 003-010-00174-7, price \$23.00). Estimates for 1983 are in the July 1986 SURVEY. Estimates for 1984-86 are in the July 1987 SURVEY. These publications are available from the Superintendent of Documents and Commerce Department District Offices; see addresses inside front cover.

The full set of national income and product accounts estimates shown regularly in this part of the SURVEY are now available on diskette for \$240 per year (12 updates). For more information, write to the Bureau of Economic Analysis (BE-54), U.S. Department of Commerce, Washington, DC 20230.

1. The inventory valuation adjustment (IVA) shown in this table differs from the IVA that adjusts business incomes. The IVA in this table reflects the mix of methods (first-in, first-out; last-in, first-out; etc.) underlying book value inventories derived primarily from Census Bureau statistics. This mix differs from that underlying business income derived primarily from Internal Revenue Service statistics. Prior to 1973, the two IVA's are the same because information required for separate estimates is not available.

1. Inventories are as of the end of the quarter. The quarter-to-quarter change in inventories calculated from current-dollar inventories in this table is not the current-dollar change in business inventories (CBI) component of GNP. The former is the difference between two inventory stocks, each valued at their respective end-of-quarter prices. The latter is the change in the physical volume of inventories valued at average prices of the quarter. In addition, changes calculated from this table are at quarterly rates, whereas CBI is stated at annual rates.

2. Quarterly totals at monthly rates. Business final sales equals final sales less gross product of households and institutions, government, and rest of the world, and includes a small amount of final sales by farms.

NOTE.—The fixed-weighted price index and the chain price index, both of which are weighted averages of the detailed prices used in the deflation of GNP, are measures of price change. In calculating changes in these indexes, the composition of GNP is held constant. Consequently these changes reflect only changes in prices. The fixed-weighted price index measures price change over any period, using as weights the composition of GNP in 1982. The chain price index measures price change between two consecutive periods, using as weights the composition of GNP in the first period. The implicit price deflator is a byproduct of the deflation of GNP. It is derived as the ratio of current- to constant-dollar GNP (multiplied by 100). If it is the average of the detailed prices used in the deflation of GNP, but the prices are weighted by the composition of GNP in each period. Consequently, the implicit price deflator reflects not only changes in prices but also changes in the composition of GNP, and its use as a measure of price change should be avoided.

Errata: U.S. Direct Investment Abroad

In the August 1987 SURVEY OF CURRENT BUSINESS, table 24 of the article "U.S. Direct Investment Abroad: Detail for Position and Balance of Payments Flows, 1986" omitted the negative signs (-) denoting inflows. The table below shows the correct estimates for inter-company debt outflows for U.S. direct investment abroad in 1985.

Plant and Equipment Expenditures by Business for Pollution Abatement, 1986 and 1987

U.S. NONFARM business spent \$8.5 billion in 1986 for new plant and equipment to abate air and water pollution and to dispose of solid waste, a decrease of 1.9 percent from the 1985 level (table 1).¹ Business plans to

1. Pollution abatement is the purposeful reduction or elimination of emissions of pollutants. Pollutants are substances and other emissions that are potentially harmful and degrade the quality of air or water shared by all. Solid waste disposal refers to means acceptable to Federal, State, and local authorities.

The survey results are universe estimates for U.S. nonfarm business for PA plant and equipment. The estimates are based on sample data from companies, each of which is assigned to a single industry corresponding to the industry classification of the company's principal product. For further information about the survey methodology and for industry detail for spending prior to 1985, see "Plant and Equipment Ex-

penditure \$7.7 billion in 1987, an 8.5-percent decrease from 1986. These estimates are based on a BEA survey conducted early in 1987. Spending for pollution abatement (PA) plant and equipment had increased in 1984 and 1985, after decreasing in the preceding 2 years (chart 6).

The survey provided information about air PA, water PA, and solid waste disposal for 24 industries. Highlights are:

penditures by Business for Pollution Abatement: Revised Estimates for 1973-83 and Estimates for 1984," SURVEY OF CURRENT BUSINESS 66 (February 1986) and "Plant and Equipment Expenditures by Business for Pollution Abatement, 1985 and 1986," SURVEY 66 (December 1986).

- Spending for each media—air, water, and solid waste—decreased slightly in 1986 (chart 7). The decrease for solid waste disposal occurred despite the recent emphasis on hazardous waste control.

- Planned spending for solid waste disposal for 1987 indicated a sharp increase. Thus, the total spending decrease planned for 1987 reflected decreases for air and water PA.

- Industries that made sizable cuts, \$0.1 billion or more, in PA plant and equipment spending in 1986 were electric utilities and primary steel (shown as blast furnaces-steel works in tables and charts). The chemicals

¹ Preliminary.

² Less than \$5 million.

1. Consists of annual estimates for "all industries" as published in "Plant and Equipment Expenditures, First and Second Quarters and Second Half of 1987," SURVEY OF CURRENT BUSINESS (April 1987) plus annual estimates for the part of nonmanufacturing that is surveyed annually as published in "Plant and Equipment Expenditures, the Four Quarters of 1987," SURVEY (June 1987). The estimates incorporate new seasonal-adjustment factors introduced in "Plant and Equipment Expenditures, the Four Quarters of 1987," SURVEY (September 1987).

2. Includes industries not shown separately.

3. Consists of lumber, furniture, instruments, and miscellaneous.

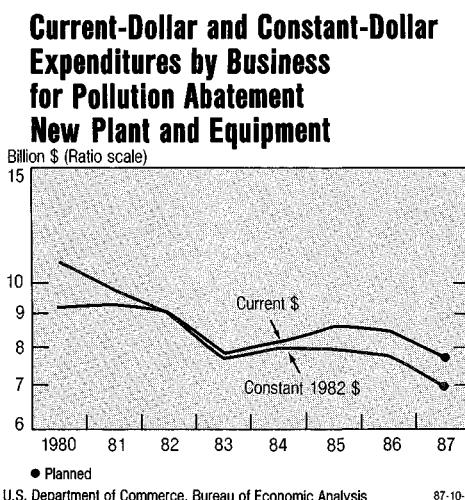

4. Consists of apparel, tobacco, leather, and printing-publishing.

5. Consists of wholesale and retail trade; finance and insurance; personal and business services (excluding construction); and real estate.

6. Consists of communication; construction; social services and membership organizations; and forestry, fisheries, and agricultural services.

Note.—Estimates of planned spending for new plant and equipment, total and for pollution abatement, are based on business plans as surveyed in January-March.

industry showed a sizable increase in spending.

The same industries making sizable cuts in spending in 1986 also planned cuts for 1987. Electric utilities doubled its cut relative to 1986. The paper industry planned a sizable increase for 1987.

In recent years, PA plant and equipment spending accounted for about one-half of total business PA capital spending and about one-eighth of total spending for pollution abatement and control. Total PA business capital includes, in addition to spending for plant and equipment, spending for emission abatement devices on cars and trucks as well as spending for agricultural and residential systems (e.g., septic systems). Total spending for pollution abatement and control also includes spending to operate business PA capital and all pollution abatement and control spending by consumers and government.²

Real spending for PA plant and equipment—spending adjusted for price change—decreased 2.4 percent

NOTE.—Frederick J. Dreiling planned and coordinated the survey and the estimation process. Frederick G. Kappler assisted with the editing of company reports, evaluation of the sample statistics, and derivation of universe estimates from them. Nikolaos A. Stergioulas converted the estimates from current dollars to constant (1982) dollars. Colin B. Brown, Christopher W. Cavaney, and Maurice A. Schlak provided computer programming and services. Shirley D. Tisdale provided statistical assistance. Sonia R. Bundy provided secretarial services.

2. For further details, see "Pollution Abatement and Control Expenditures, 1982-85," SURVEY 67 (May 1987).

in 1986 and, if plans are realized, will decrease 10.4 percent in 1987 (table 2). Real spending had increased in 1984 and had been essentially unchanged in 1985. Prices for PA plant and equipment increased only 0.6 percent in 1986, compared with 2.2 percent in 1985. Price increases have generally decelerated since 1981, when prices increased 11.0 percent. Preliminary estimates indicate that prices will increase 2.1 percent in 1987.

The share of total new plant and equipment expenditures accounted for by PA was 2.0 percent in 1986, the same as in 1985. If plans are realized, the share will decrease to 1.7 percent in 1987. The ratio has generally decreased throughout the 1980's. However, recent reauthorizations of several Federal environmental laws—the Resource Conservation and Recovery Act (in 1984), the Safe Drinking Water Act (in 1986), the Superfund Act (in 1986), and the Clean Water Act (in 1987)—have tended to make PA requirements stricter. If this tendency continues, the decline in the share of total new plant and equipment expenditures accounted for by PA may soon be arrested.

Media detail

Of the \$8.5 billion spent for PA plant and equipment in 1986, about \$4.1 billion was allocated for air PA, \$3.2 billion for water PA, and \$1.2 billion for solid waste disposal. Small decreases from 1985 occurred for each media: Air PA, down 1.2 percent; water PA, down 2.4 percent; and solid waste disposal, down 2.5 percent.

The air PA decrease in 1986 was slightly smaller than the 1.7-percent

decrease that had been planned, as reported in the PA survey a year earlier. Increases that had been planned for water PA (1.5 percent) and solid waste disposal (9.2 percent) did not materialize. The actual decrease in solid waste disposal in 1986, although small, is surprising in light of the emphasis on control of hazardous wastes in recent years and follows increases of 36.8 percent and 14.4 percent in 1984 and 1985, respectively.

Estimates of planned spending for 1987 show substantial decreases for air and water PA plant and equipment, but a large increase for solid waste disposal—25.9 percent. The large increase for solid waste disposal is consistent with moving ahead on programs after postponing investment first planned for 1986.

In 1986, real spending for air PA plant and equipment decreased slightly, 1.3 percent. Real spending for water PA plant and equipment and for solid waste disposal decreased moderately, 4.7 percent and 5.6 percent, respectively. In 1987, plans indicate larger decreases in real spending for air and water PA, partly offset by increased spending for solid waste disposal. Given that real spending for total PA plant and equipment has tended to decrease, recent Federal environmental legislative activity so far appears to have affected primarily the composition of real PA plant and equipment spending, shifting spending from air and water PA to solid waste disposal. If 1987 plans are realized, real spending for solid waste disposal will reach its highest level since 1973 and its share of total PA plant equipment spending will increase to 18.3 percent, up from 13.1 percent the previous year.

Spending for air and water PA plant and equipment has accounted for over four-fifths of PA plant and equipment spending in recent years. Such air and water PA is accomplished either by end-of-line methods or changes-in-production-process methods. End-of-line methods treat pollutants after they are generated, e.g., use of a settling pond for waste particles suspended in water. Changes-in-production-process methods are preventive in that they reduce the generation of pollutants during production, e.g., use of a water recirculation system for process cooling, instead of a once-through system. Business reported spending \$6.4 bil-

SURVEY OF CURRENT BUSINESS

lion for end-of-line methods in 1986 and planned \$5.6 billion for 1987—87.7 percent and 88.5 percent, respectively, of total air and water PA plant and equipment spending (table 3). Prior to 1986, the largest share of air and water PA plant and equipment spending allocated to end-of-line methods was 83.4 percent in 1984.

Industry detail

Manufacturing industries spent \$5.3 billion for PA plant and equipment in 1986, a 3.9-percent increase and the third consecutive yearly increase. Nondurable goods industries raised spending, and durable goods industries lowered spending. Plans for 1987 by manufacturing indicate a smaller increase, 2.1 percent, again reflecting an increase by nondurables.

Durable goods industries lowered spending for PA plant and equipment 2.8 percent in 1986. Decreases by primary steel, machinery (except electrical), and stone-clay-glass more than offset increases in other industries—

notably electrical machinery and motor vehicles. The largest decrease was by steel, over \$0.1 billion (down 23.0 percent); this industry had increased spending for PA plant and equipment strongly in 1985. For 1987, steel reported plans for another sizable cut and motor vehicles planned a cut almost as large. Partly offsetting these cuts were planned increases by "other durables" and stone-clay-glass.

Nondurable goods industries raised spending for PA plant and equipment 8.6 percent in 1986. Increases by chemicals and petroleum more than offset a decrease by paper. The largest increase was by chemicals, over \$0.2 billion (up 32.4 percent). The increase by petroleum was small and followed four consecutive decreases; plans for 1987 indicate another decrease in petroleum spending. For 1987, paper reported the largest planned increase; chemicals also reported plans for a notable increase. Both the 1986 and 1987 increases by the chemicals industry are consistent with favorable economic conditions in

¹ Preliminary.

² Less than \$5 million.

1. End-of-line methods involve the separation, treatment, or reuse of pollutants after they are generated but before they are emitted from a company's property. Changes-in-production-process methods involve the modification of existing production processes or the substitution of new process to reduce or eliminate the pollutants generated. Changes-in-process estimates for air and water pollution abatement can be derived by subtracting estimates in this table from those in table 1.

2. Includes industries not shown separately.

3. Consists of lumber, furniture, instruments, and miscellaneous.

4. Consists of apparel, tobacco, leather, and printing-publishing.

5. Consists of wholesale and retail trade; finance and insurance; personal and business services (excluding construction); and real estate.

6. Consists of communication; construction; social services and membership organizations; and forestry, fisheries, and agricultural services.

that industry (e.g., strong sales and rising profits) and may also indicate stimulus from recent reauthorizations of environmental legislation.

Nonmanufacturing industries spent \$3.1 billion for PA plant and equipment in 1986, a 10.3-percent decrease—about the same rate as in 1985. A much larger decrease is planned for 1987, 26.6 percent. Both the actual and planned decreases by nonmanufacturing reflect large cuts by electric utilities, \$0.4 billion in 1986 (down 12.5 percent) and \$0.7 billion in 1987 (down 29.5 percent). Electric utilities have added little capacity in recent years due to slow growth in demand. Notable cuts were made by mining in 1986 and planned for 1987. A notable increase was made by trade and services in 1986, but a cut was planned for 1987.

1980's in perspective.—Six industries have largely shaped the path of PA plant and equipment spending in the 1980's: Electric utilities, petroleum, chemicals, paper, motor vehicles, and primary steel (chart 8). The total has been trending down in the 1980's, at a 1.4-percent annual rate. Electric utilities and petroleum, the largest spenders, peaked early and contributed substantially to the downturn.

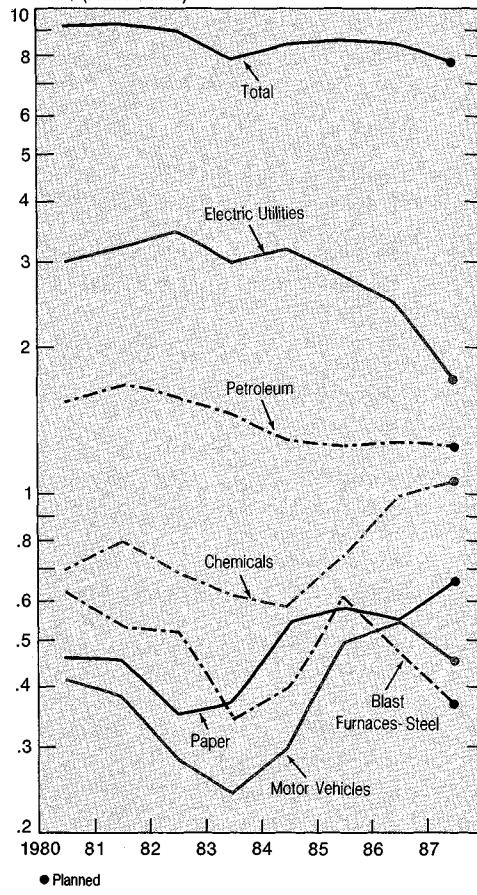

Spending by chemicals fell between 1981 and 1984 before its recent resurgence, which will put it at a record high in 1987 if plans are realized. Spending by the other three industries—primary steel, motor vehicles, and paper—declined sharply early in the 1980's. These three industries had relatively low PA plant and equipment spending in 1983 and contributed to the dip in total PA plant and equipment spending in that year. Recent increases by paper and, to a lesser extent, motor vehicles have tended to moderate the downturn in total PA plant and equipment spending.

Spending for PA plant and equipment in 1986 and that planned for 1987 may be largely for replacing and rebuilding existing equipment. Most industries appear to have made substantial progress toward fulfilling existing regulatory requirements, except those from changes accompanying recent reauthorizations of Federal environmental laws noted earlier. Spending for PA plant and equipment by electric utilities (except hydroelectric), chemicals, and primary steel in the next few years may be influenced by the outcome of pending legislation to reduce emissions of 50 hazardous air pollutants and to control acid rain.

Regional Nonfarm Personal Income in the Current Economic Expansion

REGIONAL patterns in nonfarm personal income growth in the current expansion have differed from regional patterns in previous post-World War II expansions. In the current expansion, nonfarm personal income in the New England and Mideast regions has increased more rapidly than the national average; in the Great Lakes, Plains, Southwest, and Rocky Mountain regions, it has increased less rapidly than the national average. In contrast, in most previous expansions, nonfarm personal income in the Great Lakes, Plains, Southwest, and Rocky Mountain regions increased at rates near or above the national average; in the New England and Mideast regions, it increased at rates below the national average. For these comparisons, the current expansion is measured from the third quarter of 1982—the trough quarter for real GNP in the 1981–82 recession—to the second quarter of 1987—the most recent quarter for which estimates of regional personal income are available.

Industry growth patterns in nonfarm payrolls thus far in the 1981–87 national business cycle differed from those in preceding business cycles, and these differences help explain the contrasting patterns in regional nonfarm personal income growth.

• Payrolls in durables manufacturing were weak in the 1981–82 recession, as is typical in recessions. Uncharacteristically, these payrolls did not recover strongly in the current expansion and so adversely affected growth in the Great Lakes and Plains regions, where these payrolls account for a large share of nonfarm personal income.

• Payrolls in private service-type industries, in contrast, were unusually strong in the current expansion. They stimulated nonfarm personal income growth in the New England and Mideast regions, which long have been centers for these industries.

• Payrolls in the mining and related construction industries were unusually resistant to the 1981–82 recession due to rising oil prices but were unusually weak in the current expansion due to declining oil prices. Relative changes in these payrolls were reflected in the relative weakness in nonfarm personal income in the “oil-patch” Rocky Mountain and Southwest regions.

In the Far West and Southeast regions, nonfarm personal income increased more rapidly than the national average in both the current and previous expansions.

Fast-growing regions

In the current expansion, the fast-growing regions, as measured by the percentage increase in nonfarm personal income, were: New England, 46.5 percent; Far West, 43.9 percent; Southeast, 42.2 percent; and Mideast, 39.6 percent. Nonfarm personal income for the Nation increased 38.0 percent. In the New England region, payrolls in industries that provide data processing, computer, and research and development services to the region's high-technology industries contributed to fast growth. In the Mideast region, payrolls in industries that provide banking, brokerage, advertising, consulting, and management services to national and international markets contributed to fast growth. In both regions, large increases in construction payrolls, in part reflecting continuing development of urban commercial centers, also stimulated growth. The Far West and Southeast regions, like the New England and Mideast regions, benefited from strength in private service-type payrolls. The Far West and Southeast regions, in addition, benefited from large increases in durables manufacturing payrolls as a result of the national defense buildup early in the expansion.

Slow-growing regions

The regions that had the smallest percentage increases in nonfarm personal income were: Rocky Mountain, 27.6 percent; Southwest, 28.9 percent; Plains, 30.8 percent; and Great Lakes, 33.2 percent. In the Rocky Mountain and Southwest regions, large declines in mining payrolls contributed to slow growth, as a decline in oil prices during most of the expansion discouraged oil exploration and production. In the Southwest region, in addition, weakness in oil mining dampened the growth of payrolls in durables manufacturing industries that produce oil field equipment and oil refining and pipeline equipment. Construction payrolls declined in part due to an oversupply of commercial and industrial structures, many of which had been built before the decline in oil prices. In the Plains region, weakness in payrolls in construction, trade, and finance contributed to slow growth. In the Great Lakes region, weakness in payrolls in durables manufacturing industries—including primary metals, fabricated metals, and machinery—was a major growth-retarding factor.

Detailed tabulations of quarterly estimates of total and nonfarm personal income, including nonfarm payrolls (wages and salaries) by industry, for States and regions, for the years 1969–87 are available from the Regional Economic Information System, BE-55, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230. Table 1 (following this article) presents estimates of total personal income, for States and regions, for the timespan from the first quarter of 1981 to the second quarter of 1987; table 2 presents estimates of total and nonfarm personal income, as well as detailed estimates of the sources of personal income by major type of payment and earnings (wages and salaries, proprietors' income, and other labor income) by industry, for the timespan from the first quarter of 1986 to the second quarter of 1987.

BEA Publications

Available From GPO

Survey of Current Business. Contains estimates and analyses of U.S. economic activity. Features include a review of current economic developments; articles pertaining to BEA's work on the national, regional, and international economic accounts and related topics; quarterly national income and product accounts tables; and 36 pages of tables that present over 1,900 major economic series obtained from other public and private sources. Monthly. \$5.00 single copy; \$25.00 per year.

Business Statistics: 1984. (1985) Provides monthly or quarterly data for 1981-84 and annual data for 1961-84 for series that appear in the SURVEY OF CURRENT BUSINESS. Also contains definitions of terms, sources of data, and methods of compilation. 308 pages. \$13.00 (GPO Stock No. 003-010-00160-7).

Business Conditions Digest. Contains tables and charts for 300 series, including business cycle indicators and other series that help evaluate business conditions. Features the composite indexes of leading, coincident, and lagging indicators. Also included are cyclical comparison charts and data sources. Monthly. \$4.00 single copy; \$44.00 per year.

Handbook of Cyclical Indicators. (1984) Contains series descriptions and data for 1947-82 for all series that appear in *Business Conditions Digest*. Features the composite indexes of cyclical indicators. 195 pages. \$5.50 (GPO Stock No. 003-010-00127-5).

The National Income and Product Accounts of the United States, 1929-82: Statistical Tables. (1986) Contains detailed estimates of the national income and product accounts for 1929-82 from the comprehensive revision released in 1985. Also includes definitions of the major components of the accounts and of the major sectors of the economy. 442 pages. \$23.00 (GPO Stock No. 003-010-00174-7).

BEA Methodology Paper No. 1: Introduction to National Economic Accounting. (1985) Introduces the concepts of the national income and product accounts by placing these accounts within the framework of national economic accounting. Shows how the national income and product accounts, capital finance accounts, and input-output accounts—the major branches of national economic accounting in the United States—are derived from the conventional accounting statements. 19 pages. \$1.00 (GPO Stock No. 003-010-00158-5).

BEA Methodology Paper No. 2: Corporate Profits: Profits Before Tax, Profits Tax Liability, and Dividends. (1985) Describes the concepts, sources, and methods of the corporate profits components of the national income and product accounts. 61 pages. \$2.50 (GPO Stock No. 003-010-00143-7).

BEA Methodology Paper No. 3: Foreign Transactions. (1987) Describes the preparation of estimates in the national income and product accounts (NIPA's) of net exports (both current- and constant-dollar), transfer payments to foreigners, capital grants received by the United States, interest paid by Government to foreigners, and net foreign investment. Also describes the relationship between foreign transactions estimates in the NIPA's and those in the balance of payments accounts. 52 pages. \$2.75 (GPO Stock No. 003-010-00178-0).

BEA Methodology Paper No. 4: GNP: An Overview of Source Data and Estimating Methods. (1987) Provides basic information about GNP, including the conceptual basis for the account that presents GNP, definitions of each of the components on the income and product side of that account, and a summary, presented in tabular form, of the source data and methods used in preparing estimates of current- and constant-dollar GNP. Also provides an annotated bibliography, with a directory, of the more than 50 items over the last decade that provided methodological information about GNP. 36 pages. \$2.00 (GPO Stock No. 003-010-00179-8).

Index of Items Appearing in the National Income and Product Accounts Tables. (1987) Indexes general subject areas as well as detailed line items in the national income and product accounts tables. Gives extensive cross-references, abbreviations, and definitions. 18 pages. \$1.25 (GPO Stock No. 003-010-00180-1).

Fixed Reproducible Tangible Wealth in the United States, 1925-85. (1987) Contains annual estimates of the stock of privately owned and government-owned durable equipment and structures and of durable goods

owned by consumers in the United States for 1925-85. Estimates are for fixed nonresidential private capital by major industry group (farm, manufacturing, and nonfarm nonmanufacturing), for residential capital by tenure group (owner-occupied and tenant-occupied), for government-owned fixed capital by type of government (Federal and State and local), and for 11 types of durable goods owned by consumers. 400 pages. \$18.00 (GPO Stock No. 003-010-00177-1).

U.S. Direct Investment Abroad: Balance of Payments and Direct Investment Position Estimates, 1977-81. (1987) Contains revised estimates of U.S. direct investment abroad and balance of payments transactions between U.S. parent companies and their foreign affiliates for 1977-81. Includes estimates by country and industry of foreign affiliate. 51 pages. \$2.75 (GPO Stock No. 003-010-00175-5).

U.S. Direct Investment Abroad: 1982 Benchmark Survey Data. (1985) Contains estimates by country and industry of foreign affiliate and by industry of U.S. parent on the financing and operations of foreign affiliates and U.S. parent companies, on the U.S. direct investment position abroad, and on balance of payments transactions between U.S. parents and their foreign affiliates. 462 pages. \$18.00 (GPO Stock No. 003-010-00161-5).

1985 OBERS BEA Regional Projections. (1985) Two volumes. Contains estimates for 1969, 1973, 1978, and 1983, and projections for 1990, 1995, 2000, 2005, 2015, and 2035 for total personal income, population, per capita personal income, and employment and earnings by industry for the United States and States.

Vol. 1. State Projections to 2035. 131 pages. \$4.75 (GPO Stock No. 003-010-00157-7).

Vol. 2. Metropolitan Statistical Area Projections to 2035. 356 pages. \$12.00 (GPO Stock No. 003-010-159-3).

Regional Multipliers: A User Handbook for the Regional Input-Output Modeling System (RIMS II). (1986) Contains an explanation of how to use regional input-output multipliers, by industry, for output, earnings, and employment. Includes information on how to perform systematic analyses of regional economic impacts of projects and programs. Also contains multipliers from the RIMS II, sample tables of input-output multipliers, and hypothetical case studies. 131 pages. \$6.50 (GPO Stock No. 003-010-00163-1).

Local Area Personal Income, 1979-84. (1986) Nine volumes. Contains personal income by type of payment and earnings by major industry, population, and total and per capita personal income for 1979-84.

Vol. 1. Summary. Contains estimates for the United States, regions, States, and metropolitan areas. Also contains county definitions of metropolitan areas, a description of sources and methods, and samples of tables available. 168 pages. \$8.00 (GPO Stock No. 003-010-00165-8). Each regional volume contains a methodology and detailed estimates for the States, counties, and metropolitan areas in that region.

Vol. 2. New England Region. \$3.50 (GPO Stock No. 003-010-00166-6).

Vol. 3. Mideast Region. \$5.00 (GPO Stock No. 003-010-00167-4).

Vol. 4. Great Lakes Region. \$8.50 (GPO Stock No. 003-010-00168-2).

Vol. 5. Plains Region. \$10.00 (GPO Stock No. 003-010-00169-1).

Vol. 6. Southeast Region. \$17.00 (GPO Stock No. 003-010-00170-4).

Vol. 7. Southwest Region. \$7.00 (GPO Stock No. 003-010-00171-2).

Vol. 8. Rocky Mountain Region. \$4.75 (GPO Stock No. 003-010-00172-1).

Vol. 9. Far West Region. \$4.75 (GPO Stock No. 003-010-00173-9).

BEA Staff Paper No. 42: Experimental Estimates of Gross State Product by Industry. (1985) Describes estimates of gross State product—the State equivalent of gross national product—by industry and presents estimates for 1963, 1967, 1972, and 1977. 108 pages. \$3.75 (GPO Stock No. 003-010-00144-5).

BEA Staff Paper No. 43: The Use of National Income and Product Accounts for Public Policy: Our Successes and Failures. (1985) Uses two indirect approaches to evaluate the national income and product accounts' successes and failures as tools for public policy. 26 pages. \$1.25 (GPO Stock No. 003-010-00162-3).

BEA Staff Paper No. 44: The BEA Quarterly Econometric Model of the U.S. Economy: 1985 Version. (1986) Contains a detailed description of the component sectors and individual equations contained in the BEA quarterly econometric model as of fall of 1985. 87 pages. \$4.50 (GPO Stock No. 003-010-00164-0).

BEA Staff Paper No. 45: Cyclical Adjustment of the Federal Budget and Federal Debt: Updated Detailed Methodology and Estimates. (1986) Describes the models that BEA uses to estimate the cyclically adjusted Federal budget and inflation-induced changes in the cyclically adjusted budget. The quarterly data for the variables in the models and the re-

gression equations underlying the coefficients in the models are presented. Cyclical adjustment of Federal debt is also discussed. 171 pages. \$8.50 (GPO Stock No. 003-010-00176-3).

TO ORDER PUBLICATIONS AVAILABLE FROM THE U.S. GOVERNMENT PRINTING OFFICE (GPO): Publications listed above must be ordered from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Payment may be by check (made payable to Superintendent of Documents) or charged to a GPO deposit account number, VISA, or MasterCard. To order by phone: (202) 783-3238.

Available From BEA

BEA Reports. Provides subscribers with BEA's estimates on a prompt basis. Gross National Product, monthly, \$18.00 per year (Accession No. BEA-15-S). Personal Income and Outlays, monthly, \$18.00 per year (Accession No. BEA-14-S). Composite Indexes of Leading, Coincident, and Lagging Indicators, monthly, \$18.00 per year (Accession No. BEA-16-S). Plant and Equipment Expenditures, \$7.50 per year (Accession No. BEA-13-S). Regional Economic Reports, \$9.00 per year (Accession No. BEA-17-S). International Economic Reports, \$19.50 per year (Accession No. BEA-18-S). All six sets, \$90.00 per year (Accession No. BEA-19-S).

BEA Working Paper No. 5: Dollar Measures of Energy Production and Consumption in the United States, 1972-82. (1987) Presents a new set of accounts for measuring energy production and consumption and describes the methodology of the new accounts. Pulls together energy data from a wide variety of sources and organizes the data in the frame-

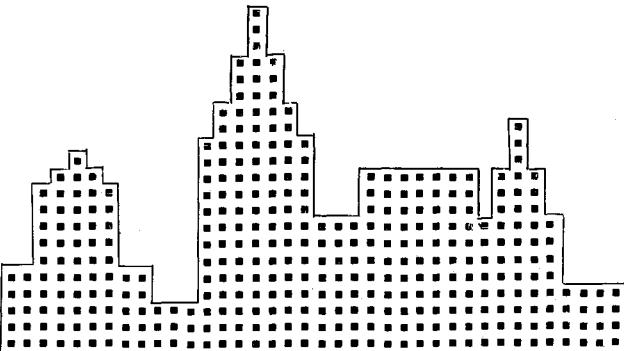

work of the national income and product accounts. 222 pages. \$10.00 (Accession No. CBA-87-101).

TO ORDER: Reports must be ordered from: Economic and Statistical Analysis/BEA, U.S. Department of Commerce, Citizens and Southern National Bank, 222 Mitchell St., P.O. Box 100606, Atlanta, GA 30384. Orders must include a check, payable to Economic and Statistical Analysis/BEA. For information, call (202) 523-0777.

BEA's economic information is available in publications, on computer tapes, on diskettes, and through a variety of other products and services. Most of these sources are described in *A User's Guide to BEA Information*. For a free copy, send a self-addressed stamped envelope (8½ by 11 inches, with 75 cents postage) to Public Information Office, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

This report presents estimates of the stock of privately owned and government-owned durable equipment and structures and of durable goods owned by consumers. These estimates are consistent, definitionally and statistically, with the presently published national income and product accounts.

FIXED REPRODUCIBLE TANGIBLE WEALTH IN THE UNITED STATES, 1925-85

This report provides estimates of gross and net stocks, depreciation, discards, and average ages of gross and net stocks in historical-cost, constant-cost, and current-cost valuations, as follows:

- Fixed nonresidential private capital, by type of equipment and structures, by legal form of organization, and by industry;
- Residential capital, by type of equipment and structures, by legal form of organization, by industry, and by tenure group;
- Durable goods owned by consumers, by type of good;
- Government-owned fixed capital, by type of equipment and structures, separately for the Federal Government and for State and local governments.

The report also provides the investment series and service lives used to derive the wealth estimates and a detailed statement of methodology.

The estimates in this report are available on computer tape. To order the tape, write to Economic and Statistical Analysis/BEA, U.S. Department of Commerce, Citizens and Southern National Bank, 222 Mitchell Street, P.O. Box 100606, Atlanta, Georgia 30384, specifying BEA Wealth Data Tape and include a check or money order for \$200.00, payable to "Economic and Statistical Analysis/BEA."

To order *Fixed Reproducible Tangible Wealth in the United States, 1925-85*, use the form below. Payment by check or money order to "Superintendent of Documents" must accompany all orders unless charged to a deposit account or to VISA or MasterCard. Charge orders may be placed by telephone; call (202) 783-3238. The average processing time for new orders is 2 to 6 weeks. Correspondence about delivery should be sent directly to GPO. For information on foreign and airmail sales, write to GPO at the address below, or call (202) 275-3097.

CURRENT BUSINESS STATISTICS

The statistics here update series published in **BUSINESS STATISTICS: 1984**, a statistical supplement to the **SURVEY OF CURRENT BUSINESS**. That volume (available from the Superintendent of Documents for \$13.00, stock no. 003-010-00160-7) provides a description of each series, references to sources of earlier figures, and historical data as follows: For all series, monthly or quarterly, 1981 through 1984, annually, 1961-84; for selected series, monthly or quarterly, 1961-84 (where available).

The sources of the series are given in **BUSINESS STATISTICS: 1984**; they appear in the main methodological note for each series, and are also listed alphabetically on pages 143-144. Series originating in Government agencies are not copyrighted and may be reprinted freely. Series from private sources are provided through the courtesy of the compilers, and are subject to their copyrights.

Unless otherwise stated in footnotes below, data through 1984 and methodological notes are as shown in BUSINESS STATISTICS: 1984	Units	Annual		1986					1987

General Notes for all Pages:

- r Revised.
- p Preliminary.
- e Estimated.
- c Corrected.

Page S-1

[†] Revised series. The estimates of personal income have been revised as a part of the annual revisions of the national income and product accounts (NIPA's) released in July 1986 and July 1987 and as part of the comprehensive revision of the NIPA's released in 1985. Articles describing those revisions appear in the July 1987, July 1986, and December 1985 issues of the SURVEY. See tables 2.6-2.9 in the July 1987 SURVEY for revised estimates for 1984-86. For 1983 estimates, see the July 1986 SURVEY. Pre-1983 estimates appear in *The National Income and Product Accounts of the United States, 1929-82: Statistical Tables*. For order information see the box at the beginning of the National Income and Product Accounts Tables in this issue of the SURVEY.

[‡] Includes inventory valuation and capital consumption adjustments.

[§] Monthly estimates equal the centered three-month average of personal saving as a percentage of the centered three-month moving average of disposable personal income.

[◊] See note "◊" for p. S-2.

Page S-2

1. Based on data not seasonally adjusted.

[◊] Effective with Sept. 1986 SURVEY, the industrial production index has been revised back to Jan. 1984. These revisions are available upon request.

[#] Includes data not shown separately.

[‡] Effective April 1987 SURVEY, data have been revised, in some cases, back to January 1982. Revised data appear in the report "Manufacturing and Trade Inventories and Sales" CB-87-69 available from the Bureau of the Census.

[§] Revised series. Data for inventories are available from 1959; sales and ratios 1967 forward. Revisions are available upon request.

Page S-3

[#] Includes data for items not shown separately.

[‡] See note "‡" for p. S-2.

[§] See note "§" for p. S-2.

[†] Revised series. Data have been revised back to 1982. A detailed description of the changes appear in the report "Manufacturers' Shipments, Inventories, and Orders: 1982-86" M3-1(86), available from the Bureau of the Census, Washington, DC 20233.

Page S-4

1. Based on data not seasonally adjusted.

[#] Includes data for items not shown separately.

[‡] Includes textile mill products, leather and products, paper and allied products, and printing and publishing industries; unfilled orders for other nondurable goods industries are zero.

[◊] For these industries (food and kindred products, tobacco, apparel and other textile products, petroleum and coal, chemicals and allied products, and rubber and plastics products) sales are considered equal to new orders.

[†] See note "†" for p. S-3.

Page S-5

1. Based on unadjusted data.

[‡] Compiled by Dun & Bradstreet, Inc. Monthly data from 1984 to 1985 for failures and liabilities, are available upon request, but are not comparable to the earlier years. The failure annual rate data will be available at a later date.

[#] Includes data for items not shown separately.

[§] Ratio of prices received to prices paid (parity index).

[‡] See note "‡" for p. S-4.

[†] Effective with the July 1986 SURVEY, data (back to 1983, for some commodities) have been revised. Effective with the Feb. 1987 SURVEY, data (back to 1984, for some commodities) have been revised. Effective with the July 1987 SURVEY, data (back to 1980, for some commodities) have been revised. These revisions are available upon request.

[◊] See note "◊" for p. S-6.

^{††} See note "††" for p. S-3.

Page S-6

[§] For producer price indexes of individual commodities, see respective commodities in the Industry section beginning p. S-19. All indexes subject to revision four months after original publication.

[#] Includes data for items not shown separately.

[†] Beginning with January 1987 data, the consumer price indexes are being calculated on a revised basis, using 1982-84 expenditure patterns and updated population weights. Additional information regarding the revised basis is available from the Bureau of Labor Statistics, Washington, DC 20212. Seasonally adjusted data have been revised as follows: back to 1981, effective with the Feb. 1986 SURVEY and back to 1982, effective with the Mar. 1987 SURVEY. These revisions are available upon request.

[‡] Effective with the Feb. 1986 SURVEY, data back to 1981 have been revised. Effective with the Feb. 1987 SURVEY, data back to 1982 have been revised. These revisions are available upon request.

Page S-7

1. Computed from cumulative valuation total.

2. Index as of Oct. 1, 1987: building, 380.2; construction, 413.0.

[#] Includes data for items not shown separately.

^{*} New series effective Aug. 1987 SURVEY. Data are not directly comparable to *Engineering News-Record's discontinued New Plans series*, because of different minimum project values. Data are available back to Jan. 1986. Data for Oct. 1986, and Jan., April and July 1987 are for five weeks; other months four weeks.

[◊] Effective Feb. 1987 SURVEY, data for seasonally adjusted housing starts have been revised back to 1984. Effective Feb. 1986 SURVEY, data for seasonally adjusted housing starts have been revised back to 1983. These revisions are available upon request.

[†] Effective May 1987 SURVEY, data for seasonally adjusted building permits have been revised back to Jan. 1985. Effective May 1986 SURVEY, data for seasonally adjusted building permits have been revised back to Jan. 1984. These revisions are available upon request.

[@] Effective July 1987 SURVEY, data have been revised back to 1974. Effective July 1986 SURVEY, data have been revised back to 1964. In addition to the normal revisions, a number of important changes have been made, which are explained in the Census Bureau's Construction Reports, C30-87-5, and Construction Reports, C30-86-5. Revised data for the most current years appear in these publications, with historical data for earlier years available from the Construction Statistics Division at the Bureau of the Census, Washington, DC 20233.

[‡] Effective July 1986 SURVEY, this index has been revised to a new comparison base of 1982=100. Revisions back to 1964 are available upon request.

Page S-8

1. Advance estimate.

[◊] Home mortgage rates (conventional first mortgages) are under money and interest rates on p. S-14.

[§] Data include guaranteed direct loans sold.

[†] Effective April 1987 SURVEY, wholesale trade data have been revised back to Jan. 1980. Revised data and a summary of changes appear in the report *Revised Monthly Wholesale Trade Sales and Inventories* BW-13-86S, available from the Bureau of the Census, Washington, DC 20233; \$1.25 per copy.

[‡] Effective May 1987 SURVEY, retail trade data have been revised. Estimates of retail sales have been revised back to Jan. 1977 and estimates of retail inventories have been revised back to Jan. 1980. Revised data and a summary of changes appear in the report *Revised Monthly Retail Sales and Inventories* BR-13-86S, available from the Bureau of the Census, Washington, DC 20233; \$4.50 per copy.

[#] Includes data for items not shown separately.

[@] Effective Oct. 1987 SURVEY, data are for mortgage loans closed as FSLIC-insured institutions. Historical data back to 1976 are available upon request. Effective April 1987 SURVEY, data include mutual savings banks.

Page S-9

- 1. Advance estimate.

2. Data beginning Jan. 1986 are not strictly comparable with earlier data because of a change in estimation procedures.

[‡] See note "‡" for p. S-8.

[#] Includes data for items not shown separately.

[◊] Effective with the January 1987 SURVEY, the seasonally adjusted labor force series have been revised back to January 1982. The January 1987 issue of *Employment and Earnings* contains the new seasonal adjustment factors, a description of the current methodology, and revised data for the most recent 13 months or calendar quarters. Revised monthly data for the entire 1982-86 revision period are in the February 1987 issue of *Employment and Earnings*.

[†] The participation rate is the percent of the civilian noninstitutional population in the civilian labor force. The employment-population ratio is civilian employment as a percent of the civilian noninstitutional population, 16 years and over.

[@] Data include resident armed forces.

Page S-10

[◊] See note "◊" for p. S-9.

[§] Effective June 1987 SURVEY, data have been revised back to April 1985 (not seasonally adjusted) and January 1982 (seasonally adjusted) to reflect new benchmarks and seasonal adjustment factors. The June 1987 issue of *Employment and Earnings* will contain a detailed discussion of the effects of the revisions.

Page S-11

[‡] This series is not seasonally adjusted because the seasonal component is small relative to the trend-cycle and/or irregular components and consequently cannot be separated with sufficient precision.

[◊] Production and nonsupervisory workers.

[§] See note "§" for p. S-10.

Page S-12

1. This series is not seasonally adjusted because the seasonal component is small relative to the trend-cycle and/or irregular components and consequently cannot be separated with sufficient precision. Use the corresponding unadjusted series.

§ See note "§" for p. S-10.

◊ Production and nonsupervisory workers.

‡ Earnings in 1977 dollars reflect changes in purchasing power since 1977 by dividing by Consumer Price Index.

§§ Wages as of Oct. 1, 1987; Common, \$17.05; Skilled, \$22.42.

@ New series. The Employment Cost Index (ECI) is a quarterly measure of the average change in the cost of employing labor. See p. S-36 of the August through October 1984 issues of the SURVEY for a brief description of the ECI.

† Excludes farm, household, and Federal workers.

‡‡ See note "‡" for p. S-11.

Page S-13

1. Average for Dec.

2. Reported annual; monthly revisions are not available.

‡ Effective January 1984, series revised due to changes in the reporting panel and in the item contents. The new panel includes 168 banks that had domestic office assets exceeding \$1.4 billion as of December 31, 1982. Beginning Jan. 1985, data are as of the last Wednesday of the month. Earlier data are as of the Wednesday nearest the end of the month or year (meaning some data are as of the first Wednesday of the next month).

Includes data for items not shown separately.

‡‡ Reflects offsetting changes in classification of deposits of thrift institutions. Deposits of thrifts were formerly grouped with deposits of individuals, partnerships, and corporations, instead of with deposits of commercial banks in the United States.

* "Transaction balances other than demand deposits" consists of ATS, NOW, super NOW, and telephone transfer accounts, which formerly were classified with savings deposits. "Nontransaction balances" reflects the combination of deposits formerly reported separately as time deposits and the savings deposits remaining after deduction of the items now reported separately under "transaction balances."

§ Excludes loans and federal funds transactions with domestic commercial banks and includes valuation reserves (individual loan items are shown gross; i.e., before deduction of valuation reserves).

◊ Securities of Federal agencies and corporations have been shifted out of "other securities" and are now combined with U.S. Treasury securities. Also, loan obligations of States and political subdivisions have been shifted out of "other securities" and are now shown separately among the loan items.

@ Insured unemployment (all programs) data include claims filed under extended duration provisions of regular State laws; amounts paid under these programs are excluded from state benefits paid data.

@@ Insured unemployment as a percent of average covered employment in a 12-month period.

† Beginning with October 1984 data, the number of respondents in the bankers acceptance survey was reduced from 340 to 160 institutions, those with \$50 million or more in total acceptances. The new reporting group accounts for over 95 percent of total acceptances activity. Historical data are available upon request.

** Effective Aug. 1987 SURVEY, data are provided by the Farm Credit Corporation of America on a quarterly basis. Quarterly data are available back to first quarter 1985, with annual data available back to 1961.

Page S-14

1. Data are for fiscal years ending Sept. 30 and include revisions not distributed to the months.

2. Weighted by number of loans.

3. Effective Sept. 1987 SURVEY, the outlays for the Federal Deposit Insurance Corporation have been adjusted by \$442 million for 1986 and \$158 million for 1987 to reflect Federal Deposit Insurance Corporation debentures issued in lieu of cash and not reported previously as outlays.

† Effective with Mar. 1987 SURVEY, the consumer installment credit series have been revised for the period 1980 through 1986 to reflect updated seasonal adjustment factors and newly available historical information for depository institutions, finance companies, and retailers. Effective with Apr. 1986 SURVEY, the consumer installment credit series have been revised for the period 1975 through 1985.

* New series. Effective with Apr. 1986 SURVEY, data for savings institutions (includes savings and loan associations, mutual savings banks, and federal savings banks) are shown for the first time.

Includes data for items not shown separately.

◊ Adjusted to exclude domestic commercial interbank loans and federal funds sold to domestic commercial banks.

‡ Rates on the commercial paper placed for firms whose bond rating is Aa or the equivalent.

‡‡ Courtesy of *Metals Week*.

@@ Average effective rate

§ Effective May 1987 SURVEY, data have been revised back to Dec. 1972 and are available from the Banking Section, Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

@ Revised for periods between October 1986 and February 1987. During this interval, outstanding gold certificates were inadvertently in excess of the gold stock.

Page S-15

† Effective Feb. 1987 SURVEY, the money stock measures and components have been revised and are available from the Banking Section of the Division of Research and Statistics at the Federal Reserve Board, Washington, D.C. 20551.

‡ Composition of the money stock measures is as follows:

M1.—This measure is currency plus demand deposits at commercial banks and interest-earning checkable deposits at all depository institutions—namely NOW accounts, automatic transfer from savings (ATS) accounts, and credit union share draft balances—as well as a small amount of demand deposits at thrift institutions that cannot, using present data sources, be separated from interest-earning checkable deposits.

M2.—This measure adds to *M1* overnight repurchase agreements (RP's) issued by commercial banks and certain overnight Eurodollars (those issued by Caribbean branches of member banks) held by U.S. nonbank residents, money market mutual fund shares, and savings and small-denomination time deposits (those issued in denominations of less than \$100,000) at all depository institutions. Depository institutions are commercial banks (including U.S. agencies and branches of foreign banks, Edge Act corporations, and foreign investment companies), mutual savings banks, savings and loan associations, and credit unions.

M3.—This measure equals *M2* plus large-denomination time deposits (those issued in denominations of \$100,000 or more) at all depository institutions (including negotiable CD's) plus term RP's issued by commercial banks and savings and loan associations.

L.—This broad measure of liquid assets equals *M3* plus other liquid assets consisting of other Eurodollar holdings of U.S. nonbank residents, bankers acceptances, commercial paper, savings bonds, and marketable liquid Treasury obligations.

‡‡ Includes ATS and NOW balances at all depository institutions, credit union share draft balances, and demand deposits at thrift institutions.

◊ Overnight (and continuing contract) RP's are those issued by commercial banks to the nonbank public, and overnight Eurodollars are those issued by Caribbean branches of member banks to U.S. nonbank customers.

@ Small time deposits are those issued in amounts of less than \$100,000. Large time deposits are those issued in amounts of \$100,000 or more and are net of the holdings of domestic banks, thrift institutions, the U.S. Government, money market mutual funds, and foreign banks and official institutions.

Includes data for items not shown separately.

§ Number of issues represents number currently used; the change in number does not affect the continuity of the series.

Page S-16

1. Effective with Jan. 1986 data, the practice of adjusting exports and imports for seasonal and working-day variations was discontinued.

2. Effective Aug. 1987 SURVEY, adjustments for undocumented U.S. exports to Canada have been made for the months of Jan. to June 1987 and calendar years 1970 to 1986.

§ Number of issues represents number currently used; the change in number does not affect the continuity of the series.

‡ For bonds due or callable in 10 years or more.

Includes data for items not shown separately.

@ Data may not equal the sum of the geographic regions, or commodity groups and principal commodities, because of revisions to the totals not reflected in the component items.

† Effective April 22, 1987, "New York City banks" are classified as "money center banks," and "outside N.Y.C. banks" are classified as "major regional banks." Two banks formerly in "outside N.Y.C. banks" were transferred to "money center banks." In addition three substitutions were made in "major regional banks."

* New series. See note on p. S-36 of the May SURVEY. Historical data are available upon request.

Page S-17

1. See note 1 for p. S-16.

2. See note 2 for p. S-16.

Includes data not shown separately.

§ Data may not equal the sum of geographic regions, or commodity groups and principal commodities, because of revisions to the totals not reflected in the components.

Page S-18

1. Annual total; quarterly or monthly revisions are not available.

2. Restaurant sales index data represent hotels and motor hotels only.

3. For month shown.

Includes data for items not shown separately.

§ Total revenues, expenses, and income for all groups of carriers also reflect nonscheduled service.

* Data have been revised back to 1981. They now include commuter railroads and small transit systems. Revised data are available upon request.

† The threshold for Class I railroad status is adjusted annually by the Interstate Commerce Commission to compensate for inflation.

◊ Average daily rent per room occupied, not scheduled rates.

Data represent entries to a national park for recreational use of the park, its services, conveniences, and/or facilities.

† Before extraordinary and prior period items.

@ Changes in these unit value indexes may reflect changes in quality or product mix as well as price changes.

Page S-19

1. Reported annual total; monthly revisions are not available.
2. For month shown.
3. Less than 500 short tons.
- # Includes data for items not shown separately.
- § Data are reported on the basis of 100 percent content of the specified material unless otherwise indicated.
- * New series. Access lines are a communication circuit that connects a customer location to a switching center.
- @ Because of deregulation, carriers are free to enter both domestic and international markets. Previously, carriers were limited either to domestic or overseas markets. Separate data for domestic or overseas are no longer available.
- † Data for 1984 (and for some commodities, 1985 and 1983) have been revised and are available upon request.
- ‡ Effective with 1985, data are reported on the basis of 100 percent content of ethyl acetate material.
- ◊ Beginning January, 1986, data are not directly comparable to earlier periods because the data represent only companies that have annual revenues over \$100 million.

Page S-20

1. Reported annual total; monthly or quarterly revisions are not available.
2. Data are no longer available.
- § Data are not wholly comparable from year to year because of changes from one classification to another.
 - ◊ Data for 1982-85 have been revised and are available upon request.
 - † Data for 1983-85 have been revised and are available upon request.
- # Effective with the Sept. 1985 SURVEY, monthly data have been restated back to Jan. 1984 to include consumption for Hawaii. Prior to 1984, consumption for Hawaii is reflected in annual totals only. Effective with the Aug. 1987 SURVEY, data for 1985-86 have been revised and are available upon request.
- ‡ Revised data for 1983-85 (and 1981, for revenue from sales to ultimate customers) are available upon request.
- * New series, first shown in the January 1987 SURVEY. Data (formerly included with the "industrial" class) are reported separately, beginning with 1st Qtr. 1985.
- @ Includes less than 500 electric generation customers not shown separately.

Page S-21

1. Previous year's crop. Through 1985, new crop is not reported until Oct. (crop year: Oct. 1-Sept. 30). Beginning 1986, new crop is reported beginning Sept. (crop year: Sept. 1-Aug. 31).
2. Crop estimate for the year.
3. Stocks as of June 1.
4. Stocks as of June 1 and represents previous year's crop; new crop not reported until June (beginning of new crop year). Beginning with 1986, quarterly stock estimates for barley and oats are no longer available. However, June 1 stocks will continue to be available and published here in the May and Annual columns each year.
5. Less than 50,000 bushels.
6. See note "@" for this page.
7. Stocks as of Dec. 1.
8. Based on a 11-month average.
9. Prices are no longer available.
10. Effective with 1986 reporting, coverage has been reduced to 21 selected States, representing approximately 85 percent of U.S. production. Comparable data for 1985 are available upon request.
11. Oct. 1 estimate of 1987 crop.
12. Reported annual total; monthly revisions are not available.
13. Crop estimate for 1986.
- # Excludes pearl barley.
- # Bags of 100 lbs.
- @ Effective with the Mar. 1987 SURVEY, data have been restated to reflect a change in reporting periods. The quarterly data, available back through 1976, now represent the 3-month periods Dec.-Feb., Mar.-May, June-Aug., and Sept.-Nov. The annual data, also available back through 1976, now represent Dec.-Nov.

Page S-22

1. Figure covers 20 selected States, representing approximately 84 percent of U.S. production.
 - § Cases of 30 dozen.
 - ◊ Bags of 60 kilograms.
- * This series, first shown in the January 1987 SURVEY, is from the Bureau of Labor Statistics International Price Program and provides a measure of price change for coffee purchased from other countries by U.S. residents. Prices are based on the cost, insurance, and freight (c.i.f.) value at the U.S. port of importation; they include the other costs associated with bringing the product to the U.S. border, but do not include duty charges. To the extent possible, the data gathered refer to transactions completed during the first 2 weeks of the third month of each calendar quarter—March, June, September, and December. Annual data back to 1978 and quarterly data back to 2d Qtr. 1977 are available upon request.

Page S-23

1. Crop estimate for the year.
2. Reported annual total; revisions not distributed to the months.
3. Oct. 1 estimate of 1987 crop.
- # Totals include data for items not shown separately.
- ◊ Effective Aug. 1987 SURVEY, the footwear production series have been revised for 1985 and 1986. These revisions, along with earlier revisions for 1983 and 1984 data, are available upon request.

Page S-24

1. Annual data; monthly revisions not available.
2. Less than 500 tons.
3. Beginning January 1985, data have been revised because of a new estimation procedure and may not be comparable to earlier periods.
4. See notes 1 and 3 for this page.
- * New series. Historical data are available upon request.

Page S-25

1. Annual data; monthly revisions are not available.
2. For month shown.
3. Includes foreign ores.
- † Beginning January 1982, data represent metallic (mostly aluminum) content. Data for 1981 and prior years represent aluminum content only.
- ◊ The source for these series is now the Bureau of Mines.
- § Source: *Metals Week*.
- * New series. Refined copper is recovered from leach solution by electrolysis.

Page S-26

1. Annual data; monthly revisions are not available.
2. Less than 50 tons.
3. Beginning 1st quarter 1984, data have been revised because of a new sample and may not be comparable to earlier periods.
4. Total for 8 months; no data for March, April, September, and October.
5. Total for 10 months; no data for November and December.
6. Beginning July 1986, data are not comparable with earlier periods.
7. Total for 5 months; data for May, June, Sept., Nov., and Dec.
8. Total for 10 months; no data for Jan. and Feb.
- ◊ Includes secondary smelters' lead stocks in refinery shapes and in copper-base scrap.
- @ All data (except annual production figures) reflect GSA remelted zinc and zinc purchased for direct shipment.
- ‡ Source for monthly data: American Bureau of Metal Statistics. Source for annual data: Bureau of Mines.
- # Includes data not shown separately.
- § Beginning with the Aug. 1985 SURVEY, unadjusted fluid power shipments indexes are shown. Seasonally adjusted indexes are no longer available.
- * New series. For an explanation of material handling equipment shipments and historical data, see p. S-35 of the Dec. 1985 SURVEY.

Page S-27

1. Data are for five weeks; other months 4 weeks.
2. Beginning January 1986, data have been restated because a new methodology has been adopted.
 - # Includes data for items not shown separately.
 - § Includes nonmarketable catalyst coke. See also note ":@" for this page.
 - ◊ Includes small amounts of "other hydrocarbons and alcohol new supply (field production)," not shown separately.
- † Effective with the Oct. 1985 SURVEY, coal production data for 1984 have been revised. Effective with the July 1986 SURVEY, coal consumption and stocks for 1985 have been revised. Effective with the Oct. 1986 SURVEY, coal production data for 1985 have been revised. Effective with the April 1987 SURVEY, coal consumption and stocks back through 1985 have been revised. Effective with the Oct. 1987 SURVEY, coal production data for 1986 have been revised. These revisions are available upon request.
- @ Includes U.S. produced and imported microwave ovens and combination microwave oven/ranges.
- ‡ "Tractor shovel loaders" includes some front engine mount wheel tractors that had previously been included in "Tractors, wheel, farm, and nonfarm."
- @@ Effective with the July 1986 SURVEY, data for 1985 have been revised. Effective with the July 1987 SURVEY, data for 1986 have been revised. These revisions are available upon request.

Page S-28

1. Reported annual totals; revisions not allocated to the months.
2. Effective with the Jan. 1985 price, gasoline that contains alcohol as an additive is included.
 - # Includes data for items not shown separately.
 - † Except for price data, see note ":@" for p. S-27.
- ‡ Effective with June 1985, indexes reflect price movements through the middle of the month for which they are shown. Indexes prior to June 1985 were based on prices for the previous month; reflecting a one-month lag in pricing.

Page S-29

1. See note 1 for p. S-28.
- ◊ Source: American Paper Institute. Total U.S. estimated consumption by all newspaper users.
 - # Compiled by the American Newspaper Publishers Association.
 - * New series. This index is from the Bureau of Labor Statistics International Price Program and provides a measure of price change for natural rubber purchased from other countries by U.S. residents. The data gathered refer to prices that are "free on board" (f.o.b.) foreign port. The prices refer to transactions completed during the first 2 weeks of the third month of each calendar quarter—March, June, September, and December. Data back to December 1983 are available upon request.

Page S-30

1. Reported annual total; revisions not allocated to the months.
 2. Crop for the year.
 3. Data cover five weeks; other months, four weeks.
 4. Beginning with 1985, value of shipments for rolled and wire glass is excluded. Comparable data for 1984 and earlier periods, which exclude such shipments, are not available.
- # Includes data for items not shown separately.
- ◊ Cumulative ginnings to the end of month indicated.
- § Bales of 480 lbs.
- ‡ Monthly revisions for 1984-86 are available upon request.
- † Monthly revisions for 1985-86 are available upon request.
- * New series, first shown in the Oct. 1986 SURVEY. Monthly indexes are available back to Dec. 1984.
- ** New series, first shown in the January 1987 SURVEY. Monthly data are available back to Jan. 1985.

Page S-31

1. Less than 500 bales.
 2. Annual total includes revisions not distributed to the months.
 3. Average for crop year; Aug. 1-Jul. 31.
 4. For five weeks; other months four weeks.
- ◊ Based on 480-lb. bales, preliminary price reflects sales as of the 15th; revised price reflects total quantity purchased and dollars paid for the entire month (revised price includes discounts and premiums).
- # Includes data not shown separately.
- § Bales of 480 lbs..
- * New series.

Page S-32

1. Annual total includes revisions not distributed to the months.
 2. Production of new vehicles (thous. of units) for Sept. 1987: *passenger cars, 572; trucks and buses, 323.*
 3. Effective with 1984, data are reported on an annual basis only. The annual/end of year figure for 1982 has been revised and is available upon request.
 4. Data are no longer available.
 5. Effective with the July 1986 and 1987 SURVEYS, data have been revised back to 1984 and are available upon request.
 6. Effective with the Feb. 1987 SURVEY, data have been revised back to 1984 and are available upon request.
 7. Effective with 1987, frequency of reporting has been changed from a monthly to a quarterly basis.
 8. Effective with the July 1987 SURVEY, data have been revised back to June 1985 to reflect the inclusion of imports for bodies (including cabs) of automobile trucks except truck tractors, which were previously omitted.
 9. Beginning with January 1987, data include Honda, Nissan, and Toyota passenger cars produced in U.S. plants.
 10. Beginning with January 1987, data include Nissan trucks produced in U.S. plants.
- # Total includes backlog for nonrelated products and services and basic research.
- § Domestics comprise all cars assembled in the U.S. and cars assembled in Canada and imported to the U.S. under the provisions of the Automotive Products Trade Act of 1965. Imports comprise all other cars.
- ◊ Courtesy of R.L. Polk & Co.; republication prohibited. Because data for some states are not available, month-to-month comparisons are not strictly valid.
- ‡ Excludes railroad-owned private refrigerator cars and private line cars.
- † Monthly revisions for 1984-86 are available upon request.
- @ Effective with the Feb. 1986 SURVEY, retail inventories of trucks and buses have been revised back to 1967. These revisions, which were made to reflect updated factors, are shown on p. S-35 of the Feb. 1986 SURVEY.
- * New series. GVW: gross vehicle weight. For an explanation of methodology and historical data for retail sales of trucks and buses, see p. S-36 of the July 1986 SURVEY.
- †† Data for 1983-86 have been revised and are available upon request.
