

Steps for MSDE Users

1. Download the complete DRVS 7.2.1 ZIP file from the ETA website at http://www.doleta.gov/Performance/reporting/tools_datavalidation.cfm
2. Extract the DRVS_7_2_1_Patch.sql file from the zip file to the root directory where MSDE is installed, normally C:\
3. Go to Start--Run
4. In the space provided type (exactly as written below unless MSDE is not installed in the C:\ drive. If it is installed in a different drive, replace the C with that drive letter):
osql -E -i "C:\DRVS_7_2_1_Patch.sql" -o "C:\MyOutput.rpt"
5. Click OK.
6. Wait 3-5 minutes to allow the system to update the database.
7. The system will not indicate when the process is finished, but if the user opens the C:\MyOutput.rpt file, rows of numbers will indicate that the changes were implemented.

NOTE

If Crystal Reports or Crystal Reports viewer is installed on the computer, you will need to right click on the MyOutput.rpt file and select 'Open with' and chose Notepad.
