

**Table C. Species managed under International Agreement.**

Stock (Species in Bold are Major Stocks)	Jurisdiction	Overfishing? (Is Fishing Mortality above Threshold?)	Overfished? (Is Biomass below Threshold?)	Approaching Overfished Condition?
<b>PACIFIC HALIBUT</b>	PFMC and NPFMC <sup>1</sup>	No	Undefined	Unknown

1. The resource is managed by treaty between the United States and Canada through recommendations of the International Pacific Halibut Commission. Pacific halibut is managed under the jurisdiction of the PFMC for WA, OR, and CA and under the jurisdiction of the NPFMC for Alaska.

**Table D. Summary of stock status for species not contained in federal fishery management plans.****NOTE: These stocks are not counted toward the total of overfished stocks.**

Stock (Species in Bold are Major Stocks)	Jurisdiction	Overfishing? (Is Fishing Mortality above Threshold?)	Overfished? (Is Biomass below Threshold?)	Approaching Overfished Condition?
AMERICAN EEL	ASMFC	Unknown	Unknown	Unknown
AMERICAN LOBSTER	ASMFC	Yes	Undefined <sup>1</sup>	Unknown
ATLANTIC CROAKER - Mid-Atlantic	ASMFC	No	No	No
ATLANTIC CROAKER - South Atlantic	ASMFC	Unknown	Unknown	Unknown
ATLANTIC MENHADEN	ASMFC	No	No	Unknown <sup>2</sup>
HORSESHOE CRAB	ASMFC	Unknown	Unknown	Unknown
NORTHERN SHRIMP	ASMFC	No	No	Unknown <sup>2</sup>
SPOT	ASMFC	Unknown	Unknown	Unknown
SPOTTED SEATROUT	ASMFC	Unknown	Unknown	Unknown
STRIPED BASS	ASMFC	No	No	Unknown <sup>2</sup>
TAUTOG	ASMFC	Yes	Undefined	Unknown
WEAKFISH	ASMFC	Unknown	Unknown	Unknown
AMERICAN SHAD	ASMFC	Unknown	Unknown	Unknown
Hickory Shad	ASMFC	Unknown	Unknown	Unknown
RIVER HERRING	ASMFC	Unknown	Unknown	Unknown
Atlantic Sturgeon	ASMFC	No <sup>3</sup>	Yes	N/A

1. Although there is no clear biomass target in the ASMFC FMP, the 2005 ASMFC Assessment for American Lobster found that, based on current reference points, overfishing is occurring in the Gulf of Maine and South of Cape Cod to Long Island Sound. Overfishing is not occurring in the Georges Bank and south stock area.
2. Although the biomass level is known, determining whether the stock is approaching an overfished condition requires an additional level of analysis which has not been done.
3. Fishing for Atlantic Sturgeon is prohibited, therefore, there is no fishing mortality.
