MEMORANDUM FOR: James T. Hayes, Jr., Director
Office of Detention and Removal

FROM: [redacted] *for* [redacted] Reviewer-In-Charge [redacted]

SUBJECT: Port Isabel Service Processing Center
Annual Detention Review

Creative Corrections conducted the Annual Detention Review (ADR) of the Port Isabel Service Processing Center (PISPC) located in Port Isabel, Texas, on February 17-19, 2009. As noted on the attached documents, my team of Subject Matter Experts included: [redacted] for Security; [redacted] for Health Services; [redacted] for Safety; and [redacted] for Food Services.

An introduction meeting was held on February 17, 2009 with [redacted] Acting Deputy Field Office Director, and [redacted] Acting Assistant Field Office Director. [redacted] and [redacted] were unable to attend the final closeout meeting due to an unavoidable, professional, scheduling conflict.

A closeout meeting was held on February 19, 2009 during which all deficiencies, concerns, and recommendations were discussed with [redacted] Supervisory Deportation and Detention Officer(Acting AFOD); [redacted] Commander, Public Health Service; PISPC Compliance Team member, [redacted]; Nakamoto Representative [redacted] ATSI Vice President, [redacted] ATSI Program Manager and key PISPC staff.

2008 Life Safety Finding, Progress Update

ICE National Detention Standards require, "Entrance/exit door locks of housing units, work areas, chapel, gyms, and other areas with room capacity of 50 or more people shall meet the standards specified in the Occupational Safety and Environmental Health (OSHA) Manual (Chapter 3) and in the National Fire Protection Association (NFPA) Life Safety Code (#101). Specifically, "doors shall be equipped with prison-type locking devices modified to function when pressure is applied from inside the room." Locks in Units C and D are not pressure sensitive.

In accordance with Contract Order, GS-07F-0565N dated December 18, 2008 entitled; "Detention Dormitory C and Detention Dormitory D replacement of security door, security door frames, transoms, security door hardware sets, security door/frame glass, electric security door control wiring, and electronic security door Main Control", the contract has been awarded to Southern Folger Detention Equipment Company.

As indicated in the Statement of Work, this project is to include the installation of Detention Grade Locks, in compliance with Life Safety Code 101. This project is currently scheduled for completion by July, 2009.

Type of Review

This review is a scheduled ADR to determine compliance with ICE National Detention Standards for facilities used over 72 hours.

Review Summary

The Port Isabel Service Processing Center is accredited by American Correctional Association, the National Commission on Correctional Health Care, and the Joint Commission on Accreditation of Healthcare Organizations.

Standards Compliance:

The following statistical information provides a direct comparison of the February 2008 ADR and the ADR conducted in February 2009.

<u>February 2008</u>	<u>Review</u>	<u>February 2009</u>	<u>Review</u>
Compliant	37	Compliant	37
Deficient	2	Deficient	1
At Risk	1	At Risk	0
Non-Applicable	0	Non-Applicable	0

Key and Lock Control – Deficient (Repeat)

It is the policy of the ICE Service to maintain an efficient system for the use, accountability and maintenance of all keys and locks.

- Only authorized locks (as specified in the Detention Standard) may be used in detainee accessible areas. Locks in use in Housing Units Charlie and Bravo are not pressure sensitive locking systems.

Recommendation

A total of 28 unauthorized locks in Units C and B should be replaced with authorized locks in accordance with standards specified in OSHA (Chapter 3) and NFPA Life Safety Code Section (101), 21.2.11.2. Specifically, "doors shall be equipped with prison-type locking devices modified to function when pressure is applied from inside the room." As outlined above, relative to Contract Order, GS-07F-0565N, dated December 18, 2008, work to correct this deficiency will be completed no later than July 2009.

Commendation

The PISPC has been uniquely challenged throughout the previous year. The remarkable response to Hurricane Dolly, which required a total facility evacuation, is noteworthy. The facility sustained significant property damage, but staff and detainee safety remained the foremost priority. As a result, no injuries were sustained and the facility was successfully evacuated without incident.

Once detainees were returned, staff continued efforts to restore the physical plant, simultaneous to their efforts to prepare for the ACA review for accreditation. The accreditation process ordinarily would totally consume the efforts of most facilities, under normal circumstances. Some would have simply postponed the process under the weight of the storm recovery process. This facility's leadership elected to accept this daunting task and proudly prevailed in their pursuit of accreditation.

In addition to these accomplishments, the facility's Medical Department sustained their NCCCHC and JCAHO accreditations.

The achievements most certainly demanded the complete cooperation of all concerned. The collective dedication and personal sacrifice of all staff is worthy of special attention.

RIC Observation

A review of the Emergency Power Generators, designed to provide back-up electricity to the inner compound (excluding Administration Building) revealed all 17 are inoperable. This was also verified by the Facilities Maintenance Supervisor.

A proposal to replace existing emergency generators with an earmarked amount of \$2.9 million, under contract number, ICE RWA COW-07DRO-0069, dated January 29, 2008, was provided for the review team's perusal. The Army Corp of Engineers is responsible for advertising and awarding the project. At the time of this review there was no information available as to when the advertisement would be initiated.

There are five emergency light units with generators, and 20 portable generators identified as back-up units for emergency (interim) use. The current interim evacuation/temporary power generation plan provides adequate protection and services, but the emergency generators' replacements should remain a high priority.

Recommended Rating and Justification

It is the Reviewer-in-Charge recommendation that the facility receive a rating of "Good." It is recommended by the RIC that a Plan of Action be required for this facility to identify and implement necessary corrective actions.

RIC Assurance Statement

All findings of this review have been documented on the Detention Review Worksheet attached and are supported by the written documentation contained in the review file.

Purpose

This memorandum is in reference to the National Detention Standards (NDS) Annual Review at the Port Isabel Detention Center (PIDC). This memorandum will serve as a Plan-of-Action and will address in specific detail the one noted deficiency by the Reviewer in Charge (RIC)

 b6,b7c

Background

The Port Isabel Detention Center under went its annual NDS review during February 17-19, 2009 by the government-contractor, Creative Corrections. The RIC has noted a deficiency as a "Life Safety Finding" relating to the types of locks within the dormitories of Charlie and Delta units.

On February 26, 2009 a draft copy of the RIC Memorandum for the Annual Review was issued to the Port Isabel Detention Center. The memorandum requested confirmation that the deficiencies had been corrected or were in the process of being corrected. This information is an essential part of the Annual Review so that the file can be completed and forwarded to the Review Authority for issuance of a final rating.

Discussion

The Reviewer-In-Charge in the Memorandum for the Annual Review described the one noted deficiency as follows:

ICE National Detention Standards requires, "Entrance/exit door locks of housing units, work areas, the chapel, gyms, and other areas with room capacity of 50 or more people shall meet the standards specified in the Occupational Safety and Environmental health Manual (Chapter 3) and in the National Fire Protection Association Life Safety Code

(#101). Specifically, the doors shall be equipped with prison-type locking devices modified to function when pressure is applied from inside the room”.

The RIC stated in the Memorandum for the Annual Review that

CLASSIFICATION SYSTEM

POLICY: ALL FACILITIES WILL DEVELOP AND IMPLEMENT A SYSTEM ACCORDING TO WHICH ICE DETAINEES ARE CLASSIFIED. THE CLASSIFICATION SYSTEM WILL ENSURE THAT EACH DETAINEE IS PLACED IN THE APPROPRIATE CATEGORY, PHYSICALLY SEPARATED FROM DETAINEES IN OTHER CATEGORIES

COMPONENTS	Y	N	NA	REMARKS
The facility has a system for classifying detainees. In CDFs and IGSA's, an Objective Classification System or similar is used.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	In accordance with Policy 4.2.2, Detainee Classification System.
The facility classification system includes: <ul style="list-style-type: none"> • Classifying detainees upon arrival; • Separating from the general population those individuals who cannot be classified upon arrival; and • The first-line supervisor or designated classification specialist reviewing every classification decision. 	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
The intake/processing officer reviews work-folders, A-files, etc., to identify and classify each new arrival.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	PISPC has a 3 phase classification system. Each new arrival is initially classified at the Harlingen Staging Unit prior to his/her arrival to PISPC. Upon arrival at the PISPC, a Classification Specialist conducts an in-person review of the initial classification for accuracy and appropriateness. Finally, a Supervisory IEA evaluates each classification within 24 hours.
Staff uses only information that is factual, and reliable to determine classification assignments. Opinions and unsubstantiated/unconfirmed reports may be filed but are not used to score detainees classifications.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Housing assignments are based on classification-level.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Level 1 detainee's are not housed with Level 3 detainees.
A detainee's classification-level does not affect his/her recreation opportunities. Detainees recreate with persons of similar classification designations.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Detainee work assignments are based upon classification designations.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
The classification process includes reassessment/reclassification. At IGSA's, detainees may request reassessment 60 days after arrival.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	All detainees are reclassified within 45 to 60 days of their initial classification and each 90 days thereafter.
Procedures exist for a detainee to appeal their classification assignment. Only a designated supervisor or classification specialist has the authority to reduce a classification-level on appeal.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Classification appeals are resolved within five business days and detainees are notified of the outcome within 10 business days.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Classification designations may be appealed to a higher authority, such as the Warden or equivalent.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	May be appealed to the OIC.
The Detainee Handbook or equivalent for IGSA's explains the classification levels, with the conditions and restrictions applicable to each.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Hot and cold food items were not always maintained at the prescribed "safe" temperatures while being served. Eighteen hot transport carts have been purchased by the Contractor and placed into operation to assist with temperature management. Currently, the kitchen facility does not have enough electrical power to energize the hot carts. Once this was identified, ICE management staff committed that the required electrical power would be installed not later than March 15, 2009, as evidenced in the memorandum issued by the AFOD, dated 2-19-09. This corrective action will immediately resolve this issue.

Purchase order number 7, dated 01-29-09 approved by the Contractor Vice President, will result in the purchase and installation of an automated hot/cold serving line designed for satellite feeding operations. The proper installation and use of this equipment will also enhance the department's ability to maintain proper food temperatures.

The food service building has undergone extensive remodeling to include flooring and some wall replacement within the last year. A new dishwashing machine has also been scheduled for purchase and installation by the Contractor.

The food service operation is generally meeting the needs of the population, according to ICE standards.

The facility has sufficient space and equipment to afford detainee privacy when receiving health care.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	The triage area was re-configured and now has four cubicles (instead of 6), which allows for greater separation and more privacy.
The medical facility has its own restricted-access area. The restricted access area is located within the confines of the secure perimeter.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

REMARKS:

Review of policies and procedures indicate they are well written and comprehensive. Staff and detainees have a clear understanding of their responsibilities. The hazardous materials program met all the requirements of this standard. The supply lines used to dispense chemicals to washers in the laundry should be secured.

Pursuant to the items addressed in the February 2008, ADR and in accordance with Contract Order, GS-07F-056N dated December 18, 2008 entitled; (Detention Dormitory C and Detention Dormitory D Replacement of Security Door, Security Door Frames, Transoms, Security Door Hardware sets, Security Door/Frame Glass, Electric Security Door Control Wiring, and Electronic Security Main Control) has been awarded to the Southern Folger Detention Equipment Company. As indicated in the statement of work, this project is to include the installation of detention grade locks in compliance with Life Safety Code 101. This project is currently scheduled for completion by July 2009.

The hood suppression system in the kitchen noted in the February 2008, ADR has been replaced. The fire safety program is viable and affords staff and detainees a level of safety that is constantly monitored and reviewed.

Sanitary standards were found to be above average throughout the facility. The interaction with staff during the review indicated that staff take pride in their positions and perform their duties in a professional manner.

A review of the Emergency Power Generators, designed to provide back-up electricity to the inner compound (excluding Administration Building) indicated they are all in-operable. The Facilities Maintenance Supervisor indicates none of the 17 inner-compound, emergency generators are functional at this time.

A proposal to replace existing emergency generators with an earmarked amount of \$2.9 million under contract number; ICE RWA COW-07DRO-0069 dated January 29, 2008 was provided to the Review Team. The Army Corp of Engineers is responsible for advertising and awarding the project. However, at the time of this review there was no information available as to when the advertisement and contract award would occur.

There are five emergency light units with generators, and 20 portable generators identified to provide back-up units for emergency use as an interim solution. The current interim evacuation/temporary power generation plan provides adequate protection and services. However, the emergency generators should remain a high priority for replacement as soon as possible.
