Federal Housing Finance Agency Reports Mortgage Interest Rates

Washington, DC – The Federal Housing Finance Agency today reported that the average interest rate on conventional 30-year, fixed-rate, mortgage loans of \$417,000 or less increased 3 basis points to 5.13 percent in February. The average interest rate on 15-year, fixed-rate loans of \$417,000 increased 11 basis points to 4.65 percent in February. These rates are calculated from the FHFA's Monthly Interest Rate Survey (MIRS) of purchase-money mortgages. These results reflect loans closed during the February 22-26 period. Typically, the interest rate is determined 30 to 45 days before the loan is closed. Thus, the reported rates depict market conditions prevailing in mid- to late-January.

The contract rate on the composite of all mortgage loans (fixed- and adjustable-rate) was 5.03 percent in February, up 4 basis points from 4.99 percent in January. The effective interest rate, which reflects the amortization of initial fees and charges, was 5.12 percent in February, up 5 basis points from 5.07 percent in January.

This report contains no data on adjustable-rate mortgages due to insufficient sample size.

Initial fees and charges were 0.63 percent of the loan balance in February, up 0.09 percent from 0.54 in January. Forty-six percent of the purchase-money mortgage loans originated in February were "no-point" mortgages, down from 51 percent in January. The average term was 27.5 years in February, down 0.3 years from 27.8 years in January. The average loan-to-price ratio in February was 74.8 percent, up 2.1 percent from 72.7 percent in January. The average loan amount was \$208,600 in February, down \$9,400 from \$218,000 in January.

The National Average Contract Mortgage Rate for the Purchase of Previously Occupied Homes by Combined Lenders, used as an index in some ARM contracts, was 5.05 percent based on loans closed in February. This is an increase of 0.04 percent from the previous month. This Contract Rate series can be found at <http://www.fhfa.gov/Default.aspx?Page=251>.

The MIRS was previously released by the Federal Housing Finance Board (FHFB). Recorded information on this index is available by calling (202) 408-2940. For technical questions on this index, please call David Roderer at (202) 408-2540. The March index value will be announced on April 27, 2010.

Technical note: The data are based on a monthly survey of major lenders that are asked to report the terms and conditions on all conventional, single-family, fully amortized, purchase-money loans closed the last five working days of the month. The data thus exclude FHA-insured and VA-guaranteed mortgages, refinancing loans, and balloon loans. This month's data are based on 4,273 reported loans from 48 lenders, representing savings associations, mortgage companies, commercial banks, and mutual savings banks. The effective interest rate includes the amortization of initial fees and charges over a 10-year period, which is the historical assumption of the average life of a mortgage loan. The data are weighted to reflect the shares of mortgage lending by lender size and lender type as reported in the latest release of the Federal Reserve Board's Home Mortgage Disclosure Act data.

###

The Federal Housing Finance Agency regulates Fannie Mae, Freddie Mac and the 12 Federal Home Loan Banks. These government-sponsored enterprises provide more than \$6.3 trillion in funding for the U.S. mortgage markets and financial institutions.
