U.S. Monthly House Price Index Increases 0.4 Percent from July to August

WASHINGTON, DC – U.S. house prices rose **0.4** percent on a seasonally adjusted basis from July to August, according to the Federal Housing Finance Agency's monthly House Price Index. The previously reported 0.5 percent decline in July was revised to a 0.7 percent decline. For the 12 months ending in August, U.S. prices fell **2.4** percent. The U.S. index is **13.6** percent below its April 2007 peak.

The FHFA monthly index is calculated using purchase prices of houses backing mortgages that have been sold to or guaranteed by Fannie Mae or Freddie Mac. For the nine Census Divisions, seasonally adjusted monthly price changes from July to August ranged from -0.6 percent in the Mountain Division to +1.5 percent in the West South Central Division.

Monthly index values and appreciation rate estimates for recent periods are provided in the table and graphs on the following pages. Click [here](#) for complete historical data.

For detailed information concerning the monthly HPI, please see the [HPI Frequently Asked Questions \(FAQ\)](#). The next release will be on Nov. 24, 2010 and will include data for September and index estimates for the third quarter.

###

The Federal Housing Finance Agency regulates Fannie Mae, Freddie Mac and the 12 Federal Home Loan Banks. These government-sponsored enterprises provide more than \$5.9 trillion in funding for the U.S. mortgage markets and financial institutions.
