# Highway Statistics 2007

## Table of Contents

Text.....	Executive Summary
Table PS-1:	Selected measures for identifying peer states
Table HM-12:	Public road length: Miles by type of surface and ownership/functional system
Table HM-16:	Public road length: Miles by ownership and Federal-aid highways
Table HM-18:	Public road length: Miles by functional system and Federal-aid highways
Table HM-36:	Federal-aid length: Miles by traffic lanes and access control
Table HM-39:	Federal-aid length: Miles by lane width, access control, and average daily traffic volume
Table HM-59:	Functional system length: miles by lane width, access control and average traffic volume
Table HM-10:	Public road length: Miles by ownership by state
Table HM-20:	Public road length: Miles by functional system by state
Table HM-50:	Functional system length: Miles by ownership by state
Table HM-60:	Functional system lane length: Miles by state
Table HM-14:	Federal-aid highway length: Miles by ownership by state
Table HM-15:	Federal-aid highway length: Miles by system by state
Table HM-31:	Federal-aid highway length: Miles by type of surface by state
Table HM-33:	Federal-aid highway length: Miles by lane width
Table HM-35:	Federal-aid highway length: Miles by traffic lanes and access control
Table HM-48:	Federal-aid highway system length: Lane-miles by system
Table HM-30:	National Highway System length: Miles open / not open to traffic
Table HM-40:	National Highway System length: Miles by ownership
Table HM-41:	National Highway System length: Miles by functional system
Table HM-43:	National Highway System length: Lane-miles by functional system
Table HM-49:	Strategic highway network (STRAHNET) length: Miles by interstate and non-interstate
Table HM-51:	Functional system length: Miles by type of surface
Table HM-53:	Functional system length: Miles by lane width
Table HM-55:	Functional system length: Miles by traffic lanes and access control
Table HM-71:	Urbanized areas: Miles and daily vehicle miles traveled
Table HM-72:	Urbanized areas: Selected characteristics
Table HM-80:	State highway agency owned public roads: Miles by functional system
Table HM-81:	State highway agency owned public roads: Estimated lane-miles and daily travel
Table VM-1:	Annual vehicle distance traveled in miles and related data: By highway category and vehicle type
Table VM-2:	Functional system travel: Annual vehicle miles
Table VM-3:	Federal-aid highway travel: Annual vehicle-miles
Table HM-44:	National Highway System travel: Annual vehicle-miles by functional system
Table HM-37:	Federal-aid highway length: Miles by average daily traffic volume
Table HM-57:	Functional system length: Miles by average daily traffic volume
Chart:	Licensed drivers, vehicle registrations, and resident population
Table DL-1C:	Licensed drivers by sex and ratio to population

Table DL-20:	Distribution of licensed drivers by sex by age group and relation to population
Table DL-22:	Licensed drivers by Age
Chart:	Vehicle registrations, fuel consumption, and vehicle miles of travel
Table MV-1:	State motor-vehicle registration
Table MV-7:	Publicly owned vehicles by vehicle type by state
Table MV-9:	Truck and truck-tractor registration by state
Table MV-10:	Bus registration by state
Table MV-11:	Trailer and semitrailer registrations by state
Table MV-2:	State motor-vehicle and motor-carrier tax receipts by state
Table MF-27:	Highway use of motor fuel
Chart:	Special fuel as a percent of total highway use of motor fuel
Table MF-2:	Motor-fuel volume taxed
Table MF-21:	Motor fuel use
Table MF-24:	Private and commercial non-highway use of gasoline
Table MF-33GA:	Monthly gasoline/gasohol reported by states
Table MF-33SF:	Monthly special fuel reported by states
Table MF-121T:	Tax rates on motor fuel
Table FE-101A:	Federal tax rates on motor fuels and lubricating oil
Table FE-101B:	Federal tax rates on motor vehicle and related products
Table MF-205:	State motor-fuel tax rates
Table FE-21B:	Federal highway user fees
Table MF-1:	State motor fuel taxes and related receipts
Chart:	Status of the highway account of the highway trust fund
Table FE-210:	Status of the Federal Highway Trust Fund by year by state
Table HF-10:	Funding for highways and disposition of highway-user revenues
Table FE-10:	Status of the Federal highway trust fund (2007)
Table HDF:	Disposition of highway-user revenues, all levels of government
Table FE-9:	Federal Highway Trust receipts attributable to highway users by state
Table FE-221:	Comparison of Federal Highway Trust Fund highway account receipts
Table SDF:	Disposition of state highway-user revenues
Table SF-1:	Revenues used by states for highways
Table SF-3B:	Receipts of state-administered toll road and crossing facilities
Table LGF-3B:	Receipts of local toll facilities
Table LDF:	Disposition of local government receipts from state and local highway-user revenues
Table LGF-21:	Local government funding for highways
Table LGF-1:	Revenues used by local governments for highways
Table MT-2A:	Transit operator receipts and disbursements for capital outlay
Table MT-2B:	Transit operator receipts and disbursements for operations
Table SB-2:	State obligations for highways
Table SB-2T:	Change in indebtedness of state-administered toll road and crossing facilities
Table SB-3:	State obligations for highways: Receipts and disbursements for debt service
Table SB-3T:	Receipts and disbursements for debt service of state-administered toll road and crossing facilities
Table LGB-2:	Local governments obligations for highways: Change in indebtedness during year

Table LGB-2T:	Change in indebtedness during year, local toll facilities
Chart:	Obligation of federal funds for roadway projects
Chart:	Obligation of federal funds for roadway projects by improvement type
Chart:	Obligation of federal funds for bridge projects by improvement type
Table FA-4A:	Apportionment formulas: Federal-aid highway program
Table FA-5:	Receipts and expenditures for highways by federal agencies – summary
Table FA-6:	Obligation of National Highway System and surface transportation program funds by functional class and improvement type
Table FA6A:	Obligation of federal funds administered by FHWA by functional class and improvement type
Table FA-10:	Obligation federal-aid highway funds for highway improvements
Table FA-4:	Apportionment of federal funds administered by the FHWA with the programmatic distribution of the equity bonus and RABA funds
Table FA-4E:	Selected data used in apportionments
Table FA-4D:	Allocation of federal funds administered by the FHWA
Table FA-4C:	Obligation of federal funds by functional class
Table STP-1:	Uses of Surface Transportation Program (STP) funds for projects not on the National Highway System, by improvement category
Table STP1A:	Uses of Surface Transportation Program (STP) funds for projects not on the National Highway System, by functional system
Table SF-2:	State Disbursements for Highways
Table SF-4:	Disbursements for State-administered highways
Table SF-4C:	Disbursements for State-administered highway – classified by function
Table SF-12:	State highway agency capital outlay and maintenance
Table SF-12A:	State highway agency capital outlay for arterial systems
Table SF-12B:	State highway agency capital outlay and maintenance: Federal-aid highways
Table SF-4B:	Disbursements or State-administered toll road and crossing facilities
Table LGF-4B:	Disbursements of local toll facilities
Table LGF-2:	Local government disbursements for highways
Table FI-200:	Motor vehicle traffic facilities
Table HM-63:	Functional system length: Miles by measured pavement roughness/present serviceability
Table HM-64:	Functional system length: Miles by measured pavement roughness
Table HM-66:	Measured pavement roughness: HPMS data reporting details
Table FI-10:	Persons fatally injured in motor vehicle crashes – Federal-aid Highways
Table FI-20:	Persons fatally injured in motor vehicle crashes – functional system
Table TC-3:	Percentage distribution of traffic volumes and loadings: On the Interstate Systems
Table HM-42:	National highway system length: Miles by volume service flow ratio
Table HM-47:	National highway system length: Miles by measured pavement roughness
Table HM-61:	Functional System Length: Miles by Volume service flow ratio
Table HM-62:	Weighted average daily traffic per land on principal arterials

## **User's Guide**

### **1. Introduction**

This publication brings together annual series of selected statistical tabulations relating to highway transportation in four major areas: (1) highway infrastructure and users; (2) motor vehicles and fuel; (3) highway finance--the receipts and expenditures for highways by public agencies; and (4) highway performance--the extent, characteristics, condition, and use of the public highways, roads, and streets in the Nation.

Please note that tables marked with an asterisk in the Table of Contents are only available at our Internet website for viewing/downloading at [www.fhwa.dot.gov/policy/ohpi](http://www.fhwa.dot.gov/policy/ohpi). (See Highway Statistics Series publications)

All highway data are submitted by the States. Each State is analyzed for consistency against its own past years of data and also against other State and Federal data. Major issues are resolved with the help of the data provider.

The cooperation of Federal, State, and local agencies in providing the basic data from which these statistical series are derived is acknowledged and greatly appreciated.

While the Office of Highway Policy Information is responsible for the preparation of this publication, a number of the statistical summaries are prepared by other units with the Federal Highway Administration (FHWA) as indicated by notes on the tables involved.

Responsibility for administering the highway network of the United States, providing funds for its continued improvement and maintenance, and regulating its use is a complex affair involving Federal and State agencies, together with nearly 39,000 county, township, and municipal governments and, to a limited degree, the private sector. These agencies work in concert in many ways in the management of the Nation's highway plant.

#### **1.1. Federal Legislation**

The Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU), Public Law 109-59, is the current Federal legislation currently authorizing Federal highway programs for Fiscal Year 2005-2009. Prior to SAFETEA-LU, the Transportation Equity Act for the 21st Century (TEA-21) was the principal Federal highway legislation.

#### **1.2. Federal Agencies**

The FHWA is the principal highway agency of the Federal Government. Under the Federal-aid highway program, the initiative for selecting routes eligible for improvement with Federal-aid funds rests with the States. These routes remain under the ownership of the State or local governments which are responsible for administering and maintaining them as part of the State or local highway systems.

The FHWA also administers the Federal Lands Highways Program. This program is funded from the Federal Highway Trust Fund and consists of three separate programs: Park Roads and Parkways, Indian Reservation Roads, and Public Lands Highways.

The Department of Defense provides funds for the construction of roads leading to military installations, etc., but these funds are usually transferred to the FHWA to manage the construction program.

Some Federal agencies also provide funds for road and bridge work which is incidental to their major functions. For example, the Corps of Engineers (Department of the Army) and the Bureau of Reclamation (Department of the Interior) expend funds for highway and bridge construction and reconstruction on projects involving water resources and navigable rivers. Other Federal agencies, such as the Forest Service, provide funds through a policy of sharing with States and counties some of the income derived from timber sales on Federal lands, a portion of which is placed in road funds.

Additional Federal funds are provided from the General Treasury to States, counties, and cities through the programs of other Federal agencies such as Urban Development Block Grants for various purposes including highways. The different Federal assistance programs for highway are summarized in the latest version of the FHWA publication, Highway Taxes and Fees, How They Are Collected and Distributed, Table F-106.

The Treasury Department's Internal Revenue Service collects the Federal road-user taxes and deposits the revenues in the Federal Highway Trust Fund. Amounts dedicated by Congress for mass transportation are credited to a separate mass transit account.

### **1.3. State Agencies**

In the Federal Highway Administration's financial analyses, special State commissions and authorities, both toll and non-toll, as well as State highway and transportation departments, are classified as "Other State". Other executive branches of State governments also have been included when, and to the extent, they are responsible for the collection and distribution of road-user taxes or perform highway and related functions. Examples of these executive agencies are treasury and revenue departments, motor-vehicle departments, public-safety departments (highway police and law enforcement activities), and conservation departments when they are responsible for roads within State parks, forests, or reservations. The District of Columbia is treated as a State.

### **1.4. Local Governments**

Local governments include: counties, townships, and municipalities. Included with local governments are subordinate agencies, road districts, commissions, and authorities, both toll and non-toll.

All States have organized county governments except Connecticut and Rhode Island. Counties, however, have limited or no responsibility for roads in the New England States, or in Delaware, North Carolina, Virginia (with some exceptions), and West Virginia. In Alabama and Maryland, the State has assumed responsibility for roads in certain counties. Counties are called parishes in Louisiana, boroughs in Alaska, "municipios" in Puerto Rico, and townships are towns in New England, New York, and Wisconsin.

A municipality is a political subdivision where a municipal corporation has been established to provide general local government for a specific population concentration in a specified area. Some counties have boundaries coextensive with cities. Generally, these counties retain their identities only for certain administrative purposes. Because some counties are entirely urban in nature or have merged with municipalities, they are classified as municipalities. A county

may also be classified as a municipality when its area consists predominantly of incorporated cities, towns, and villages.

Although generally considered to be rural governments, many townships, particularly in the Northeast, serve heavily Populated areas and perform the functions of a municipal government.

### ***1.5. Urban Areas***

The term "urban" is used in these summary tables is consistent with the Federal-aid legislation definition of an area. Such areas include, at a minimum, a census place with an urban population of 5,000 to 49,999 or a designated urbanized area with a population of 50,000 or more (or portions thereof within State boundaries). The Federal-aid boundaries are determined by responsible State and local officials, subject to the approval of the Secretary of Transportation. These Federal-aid urban areas may extend beyond incorporated (with some exceptions) and census boundaries, and thus are not necessarily coextensive with municipal boundaries.

### ***1.6. Individual Unit Statistics***

In general, the statistical series present summary data primarily on a State-by-State basis. However, in the highway finance section, special tabulations are included for individual toll authorities. The roadway extent section includes two tables detailing information for urbanized areas. Inquiries for information on a county-by-county basis should be directed to the respective State highway agencies.

### ***1.7. Duplications***

Users of these data must be careful to avoid "double counting" of the statistical data that could result from the effect of intergovernmental relationships. This is particularly so with reference to tables in the finance and mileage sections, because of the overlapping of Federal-aid activities with the State and local highway activities, and the effects of grant-in-aid programs. Examples are Federal-aid payments, which are in turn reported as State receipts and included in State expenditures; and Federal-aid highway system mileage, which are parts of the State and/or local highway systems, and are also included in those systems. Summary tables that give national statistics have been included at the beginning of the finance and mileage sections, and eliminate "double counting" or duplication. These are then followed by table series that reflect the transactions of each level of government, but which are not necessarily cumulative to national totals.

### ***1.8. Conversion to Metric (Metric tables are available on our website)***

In accordance with Public Law 100-418 requiring Federal agencies to use the metric system, we are also providing some tables in metric format (metric tables contain an "M" at the end of the table name as shown in the Table of Contents). A soft conversion from English to metric has been made using 1 mile = 1.609344 kilometers for the individual values. Because this is a soft conversion totals may not agree with the equivalent English-based tables. All metric tables are available in electronic format only.

## **2. Highway Infrastructure**

This section contains data on the physical extent and ownership of public roads in the United States. Public roads include those that are open to public travel and maintained by a public authority (see Code of Federal Regulations (23 CFR 460). Other roads and trails that are privately owned or not publicly maintained or restricted from use by the general public are excluded.

### **2.1. Public Road Length Data**

All length tables in this section, except table HM-30, reflect the centerline length of public roads. Except for minor amounts of Federal public road length under the U.S. Forest Service, Bureau of Reclamation, Bureau of Indian Affairs, National Park Service, Fish and Wildlife Service, and military, the rest of the public roads in the United States are owned by State, county, town, township, Indian tribe, municipal or other local governments, or instrumentalities thereof. Public roads in Federal forests and reservations may be part of the State and local road systems and are included with the lengths reported for those systems.

### **2.2. Federal-aid Highway Data**

Federal-aid highways are segments of State and local road systems eligible for Federal-aid construction and rehabilitation funds because of their service value and importance. Except for connectors on the National Highway System (NHS), roads that are functionally classified as rural minor collector or rural or urban local are excluded. The designation of a public road as a Federal-aid highway does not alter its ownership as a State or county road or city street.

#### **2.2.1. Interstate System**

The Dwight D. Eisenhower National System of Interstate and Defense Highways was originally established by the Federal-Aid Highway Act of 1944. The Federal-Aid Highway Act of 1956 and the companion Highway Revenue Act of 1956 further defined the purpose and extent of the system and, as subsequently amended, dedicated several Federal excise taxes on motor fuel and automotive products to support Federal-aid highway activities. The Interstate System extends over 46,000 miles (74,000 kilometers) and connects, as directly as practicable, the Nation's principal metropolitan areas, cities, and industrial centers; serves the National defense; and connects at suitable border points with routes of continental importance.

#### **2.2.2. National Highway System**

The Intermodal Surface Transportation Efficiency Act (ISTEA) of 1991 eliminated the historic Federal-aid systems and created the National Highway System and other Federal-aid highway categories. The NHS was selected in consultation with appropriate State and local officials; it consists of the highway routes and connections to transportation facilities depicted on the maps submitted by the Secretary of Transportation to the Congress on May 24, 1996 and approved by the National Highway System Designation Act of 1995. Highways designated as part of the Interstate System are included in the NHS. Non-roadway routes, such as ferry boats, are not included in Highway Statistics.

## **2.3. Functional System Data**

The functional systems used in tables HM-50 through HM-80 result from the grouping of public roads according to the character of service they are intended to provide. Because most travel involves movement through a network of roads, individual public roads do not serve travel independently in any major way. Functional classification defines the role that a particular public road plays in serving the flow of trips through a highway network. The functional systems are: (1) arterial highways, which generally handle the long trips; (2) collector facilities, which collect and disperse traffic between the arterials and the lower level roads; and (3) local roads, streets, and other public ways, which serve a land access function to homes, businesses, individual farms and ranches, and other uses. Road length by functional system is identified by ownership, surface type, lane width, traffic lanes, access control, and traffic volume in Tables HM-50 through HM-59.

### **2.3.1. Lane Length**

The number of through traffic lanes as reported by the States are used to estimate lane length for all roads on the NHS or functionally classified above rural minor collector or urban local. Starting in 1999, number of lanes was required for all functional systems except the rural minor collector and the rural /urban local systems, and for all NHS routes; lane length is computed on a 100-percent basis. For the rural minor collector and the rural/urban local functional systems, the number of through lanes is assumed to be two; lane length is the product of the functional system centerline length times two.

### **2.3.2. Surface Type**

The surface classification identifies the pavement type used on the traveled portion of the roadway. Many highways, either by original design or because of reconstruction, consist of more than one major type of construction material. No data relative to vertical composition are presented, although material and layer thickness criteria are used to define the reporting categories.

### **2.3.3. Pavement Surface Condition**

Pavement condition is characterized by the Present Serviceability Rating (PSR) and International Roughness Index (IRI) values for the rural major collector, and the urban minor arterial and collector functional systems. A mix of measurement methods is used for these systems.

IRI is an objective, instrument-based measure of pavement roughness, reported in the HPMS in inches per mile (meters per kilometer). Users of these data are advised to see the discussion of PSR and IRI in the "Performance Data" section.

## **2.4. Travel Data**

The FHWA uses daily vehicle-miles of travel (DVMT) [daily vehicle-kilometers of travel (DVKT)] as the primary measure of travel activity on the Nation's highway systems. The daily travel times 365 days (366 days for leap years) equals annual travel.

Travel is a calculated product of the annual average daily traffic (AADT) and the centerline length of the section for which the AADT is reported. In the HPMS, travel is accumulated for each universe section to develop appropriate totals for the higher functional systems. AADT

is required for each section of Interstate, NHS, and other principal arterial; as a result, travel is computed for these functional systems on a 100-percent basis. For minor arterial, rural major collector and urban collector systems, travel is calculated from samples using the AADT, centerline length reported for each sample section, and the HPMS sample expansion factor for each section. Travel for the NHS on all functional systems is computed from the universe AADT data.

For the most part, travel for the rural minor collector and rural/urban local functional systems is calculated by the States using their own procedures and is provided in HPMS on a summary basis. Some States use supplemental traffic counts outside of the HPMS procedures; others employ estimating techniques, such as fuel use, to determine travel on these systems. In general, these methods are used in both rural and urban areas, including the donut areas of designated air quality non-attainment areas to meet traffic monitoring requirements of the Clean Air Act.

AADT and travel estimates are edited by the HPMS software and reviewed by FHWA for unusual values and for unusual changes to previously reported values. FHWA works with State data providers to ensure that reported AADT values are reasonable before final use. Although AADT is required to be updated annually in HPMS, counts are required to be taken only on a 3-year cycle. Usually, AADT for uncounted sections are estimated by modeling the latest year's count. States that follow the HPMS sampling instructions in developing traffic counting programs (Appendix F in the HPMS Field Manual) and the practices advocated in the Traffic Monitoring Guide have adequate counting and classification tools to prepare quality AADT and travel estimates for HPMS. These procedures should also provide comparable State-to-State traffic data.

Table VM-1 is a summary of estimated travel by vehicle type and system; total travel values are derived from the highway functional system data contained in table VM-2, while the vehicle type breakdowns are derived from the HPMS summary data. The other rural arterial roads category includes the other principal and minor arterial functional systems; the other rural roads category includes the collector and local functional systems. All urban systems, except the urban Interstate System, are included in the other urban public roads category.

The highway use of motor fuel and the motor vehicle registrations from tables MF-21 and MV-1 are used to estimate average distance traveled per vehicle, average fuel consumed per vehicle, and average distance traveled per gallon of fuel consumed. The estimate of distance traveled per person is based on the most current information from the Nationwide Personal Transportation Survey, the Truck Inventory and Use Survey, and the National Transportation Statistics report. Note that the number of decimal places corresponds to the control totals in the final column, not the level of precision.

Table VM-2 is a summary of the States' estimated highway travel based on traffic counts by functional system; it is a companion to table HM-20. Table VM-3 contains estimated highway travel on Federal aid highways; it is a companion to length table HM-15. Table TC-3 presents a distribution of historic Interstate System traffic volumes and loadings; it shows the interrelationship among vehicle types, volumes, and axle loadings. The data, which are from the Truck Weight Study, are collected by the States from weigh in motion systems. The accompanying graph, "Comparison of Growth in Volumes and Loadings on the Rural Interstate System", shows the growth in loadings relative to volumes. The data points on the graph are 3-year moving averages.

### **2.4.1. Volume-service flow ratio**

The volume-service flow ratio or V/SF data show arterial and collector functional system length by State for various ranges of volume-service flow ratio using HPMS expanded sample traffic volume and peak period service flow data. Some use this metric as a measure of peak period traffic congestion.

## **3. Performance Data**

Information included in the HPMS database is the result of a cooperative effort between the FHWA and State and local governments. All HPMS data are provided to the FHWA through State Departments of Transportation and are usually obtained from existing State or local government databases, including those of Metropolitan Planning Organizations (MPOs). Typically, the existing databases and record keeping systems of State and local governmental units are designed and maintained to meet their specific, individual business needs; most items in their databases are not specifically designed to meet Federal reporting purposes. Some data required for the HPMS are not collected by all the States for their own databases; some State adjustments to State collected data may have been made in order to meet the requirements of the HPMS.

As a result, data quality and consistency of HPMS information are dependent upon the programs, actions and maintenance of sound databases by numerous data collectors, suppliers and analysts at the State, metropolitan, and other local area levels. In general, specific data items that are used by the collecting agency are likely to be of better quality than data items that are collected or estimated solely for the use of the FHWA. Data quality and consistency are also dependent upon the nature of the individual data items and how difficult they are to define, collect, or estimate.

HPMS data are collected in accordance with the Highway Performance Monitoring System Field Manual . This document contains standard collection, coding, and reporting instructions for the various data items to be reported with the objective of creating a uniform and consistent database. The degree to which these instructions are followed by the reporting agencies has a direct impact on the quality and consistency of the data and, therefore, on the utility of these data as an indicator of the condition, performance, and use of the Nation's highway systems. State reported HPMS data are reviewed by FHWA for completeness, consistency, and adherence to reporting guidelines. Data are generally used as reported; any adjustments are accomplished in close working relationship with data providers.

The HPMS database is constructed primarily to facilitate national level analyses of the condition, performance, and use of the Nation's highway system. Users of the HPMS data, as reported in Highway Statistics and in other media, should not necessarily expect to find consistency among all States for all data items, due to State-to-State differences in the way the data are defined, collected, or estimated. Even when data are consistently collected and reported, users need to recognize that HPMS information may not be comparable across all States due to inherent State differences such as size, population density, degree of urbanization, extent of system, administrative responsibility, climate, etc. When making State level comparisons, therefore, it is inappropriate to use these statistics without recognizing and accounting for the differences that may impact comparability.

### ***3.1. Pavement data***

The HPMS contains data from two pavement rating systems. One is a subjective rating system based upon the Pavement Serviceability Rating (PSR) or equivalent data adapted from a State's pavement serviceability index (PSI), sufficiency ratings, or ratings from a pavement rating table contained in the HPMS Field Manual. The second is an objective rating measure, the International Roughness Index (IRI). Both are used as indicators of pavement surface condition. Pavement rating data are not reported for local or rural minor collector functional systems.

### ***3.2. Present serviceability rating***

PSR and other subjective measures use a numerical value ranging from zero to five, reflecting poor pavement condition at the lower end of the scale and very good pavement condition at the higher values. These indices provide a judgment of pavement condition based upon an assessment of ride and visual pavement distress by a panel of road users. PSR and PSI were adapted from the American Association of State Highway (Transportation) Officials Road Tests conducted in the late 1950's and early 1960's. Since they are subjective, ride-based rating schemes, and because of the various methodologies used by the States to collect these data, the ratings may not be consistent or comparable among the States.

In general, PSR, or equivalent subjective pavement rating data, are reported to the HPMS on an annual basis where IRI data are not reported. PSR data are input to the HPMS database as reported by the States; sampled PSR data are expanded using the sample expansion factors in HPMS to represent the functional systems for which they are reported. Although PSR is primarily a measure of current ride quality, PSR data are used by FHWA in national level models to predict pavement deterioration, deficiencies, and investment needs where IRI data are not available.

### ***3.3. Measured pavement roughness***

Measured pavement roughness is an objective equipment-based rating reported in the HPMS as IRI in inches per mile (meters per kilometer). These ratings are collected by various mechanical devices, some of which may require calibration through correlation to "known profiles" established via precise measurements. The IRI is a numerical value that is an accumulation of the inches (meters) of vertical movement of a vehicle over a roadway surface, adjusted to reflect a rate per mile (kilometer). Low values indicate a smooth riding quality, while higher values are indicative of a rough road. Because IRI is a more objective, mechanically measured index, IRI should be more consistent between and among States when similar pavement types and surface textures have been measured using similar devices that have been properly calibrated.

Variability in IRI measurements can arise from differences in the equipment used to measure IRI, and differences in the measurement protocols used. In an effort to improve data consistency, FHWA recommends that States follow AASHTO Provisional Standard PP37-99 when reporting IRI data to the HPMS. Additional guidelines intended to improve consistency are included in the HPMS Field Manual; users are encouraged to consult that document. Improvements to measurement equipment and instrument standardization for the most part rely upon Federal and State research activities such as those carried out by AASHTO and the Road Profiler Users Group. While IRI data may be more suitable for comparative purposes than PSR data, the user needs to consider and account for the variability introduced by these and other factors, such as pavement type, when making comparisons. In

general, IRI data are reported to the HPMS on an annual basis for the arterial functional systems and all NHS routes. IRI data are used as reported by the States without manipulation or adjustment. Although IRI is a measure of ride quality, the IRI data are also used by FHWA in national level models to predict pavement deterioration, deficiencies, and investment needs.

IRI is a measure of pavement roughness; to have a comprehensive measure of pavement condition, data on other pavement distresses such as rutting, cracking, and faulting are needed. Provisional standards for these measures are being developed by AASHTO, and States will be encouraged to include them in their pavement management systems in the future.

### ***3.4. Estimating congestion measures***

The FHWA uses a traffic volume-service flow ratio (V/SF) as a measure of congestion in Highway Statistics. The V/SF is a computed numerical value based upon traffic volume information and roadway capacity calculated for each sampled section of roadway. The calculation of the peak capacity is done in general accordance with estimating procedures contained in the latest Highway Capacity Manual (HCM), which was developed by the Transportation Research Board. The user of these data has a responsibility to assure that the application of V/SF from the HPMS is suitable to the purpose for which the congestion analysis is being conducted. Note that the method used to calculate the data shown in Table HM-62 and System Congestion Trends Chart has changed; a weighted average based on length is now used to calculate average daily vehicles per lane.

## **4. Travelers (or System Users)**

Each State and the District of Columbia administers its own driver licensing system. Since 1954, all States have required drivers to be licensed, and since 1959 all States have required examination prior to licensing. Tests of knowledge of State driving laws and practices, vision, and driving proficiency are now required for new licensees. The summary of State driver licensing requirements has previously been in a separate biennial publication, Driver License Administration Requirements and Fees. The American Association of Motor Vehicle Administrators (AAMVA) has combined this publication with a companion publication by the National Highway Traffic Safety Administration entitled State and Provincial Licensing System Comparative Data (December 1999). The combination of these two reports will eliminate any duplication in effort and give you all information pertinent to obtaining an operator or commercial license in any State or of Canada. To order a copy of this report, call AAMVA at 703-522-1300 or Fax your request to 703-522-1553.

### ***4.1. Driver Demographics***

Since there will always be persons of driving age who will not be licensed, by choice or because of physical or mental infirmities, the ratio of licensed drivers to total population should never reach 1.0 (or 100 percent). However the following conditions can make the relationships higher than expected:

1. Although efforts are made to minimize it, drivers who move from one State to another are sometimes counted in both States until the license from the previous State of residence expires.
2. Some persons obtain their driver licenses in States other than those of legal residence.

3. Some persons fraudulently obtain multiple licenses. Some State authorities doubt whether all persons who drive are licensed. Where this problem exists, those that are unlicensed would partially offset any duplicate licenses issued and inactive licenses. The degree to which this occurs is unknown.
4. The purging of expired licenses or licenses from deceased persons is not done on a continual basis.

## **4.2. Use of Data**

Since 1990, a strict standard has been used to determine the number of unrestricted drivers under the age of 16 on the road: a driver must be able to drive inclusively between the hours of 5:00 A.M. and 12 Midnight without another licensed driver in the vehicle. This standard cut the number of drivers from 1988 to 1996 substantially in the "under 16" category and one must keep this in mind when comparing the data from earlier years.

## **5. Vehicles**

### **5.1. Vehicle Registrations**

The vehicle registration practices vary widely among the States. Although many States continue to register specific vehicle types on a calendar year basis, all States use some form of the "staggered" system to register motor vehicles. The "staggered" system permits a distribution of the renewal workload throughout all months. Most States allow pre-registration or permit "grace periods" to better distribute the annual registration workload.

In order to present vehicle registration data uniformly for all States, the information is shown as nearly as possible on a calendar-year basis. Insofar as possible, the registrations reported exclude transfers and re-registrations and any other factors that could otherwise result in duplication in the vehicle counts.

Registration practices for commercial vehicles differ greatly among the States. Some States register a tractor-semitrailer combination as a single unit; others register the tractor and the semitrailer separately. Regardless of how they were registered, only the power units have been included in the truck count in table MV-1. Some States register buses with trucks or automobiles; many States do not report house and light utility trailers separately from commercial trailers or semitrailers; and some States do not require registration of car-sized or light utility trailers. To account for the variations in State practice, the Federal Highway Administration (FHWA) has supplemented the data provided by the States with information obtained from other sources.

Motor vehicle registrations are reported by major vehicle classes: automobiles, buses, trucks, and motorcycles. The truck category includes light trucks to the extent they can be identified and separated from automobiles. Data on trucks, buses, trailers, and semitrailers are given in tables MV-9, MV-10, and MV-11, respectively. Although the detail of motor-vehicle data has improved in recent years, it is not yet possible to obtain from all States separate data on single-unit trucks and combinations. Some States provide data for light trucks and truck tractors, but for many States, the FHWA estimates this information using other data sources, such as the Truck Inventory and Use Survey conducted by the Bureau of the Census. The table MV-9 light truck category includes pickups, vans (full-size and mini), utility-type vehicles, as well as other vehicles (panel trucks and delivery vans generally of 10,000 pounds or less gross vehicle weight). Registrations of publicly owned motor vehicles are reported in table MV-7.

## **5.2. Registration Taxes and Fees**

Taxes and fees connected with State motor-vehicle registrations and special taxes on motor carriers are given in table MV-2, and the disposition of these taxes is given in table MV-3. The diversity of taxes and fees collected has made it necessary to group them into broad general classes, the most important being registration fees. The amounts shown are those collected solely as highway-user revenues and do not include any amounts, such as personal property levies, that are derived from taxes other than those related to motor-vehicle ownership and operation. (Although portions of these revenues are later used in some States for non-highway purposes, it is the source rather than the expenditure of the revenues that has determined their inclusion here). Motor-vehicle registration fee schedules (table MV-103) and administrative provisions governing the disposition of State motor-vehicle and motor-carrier receipts (table MV-106) appear in a separate FHWA publication entitled Highway Taxes and Fees, How They Are Collected and Distributed style.

## **5.3. Use Of Data**

All State reported data are analyzed by FHWA for completeness, reasonableness, consistency, and compliance with data reporting instructions contained in A Guide to Reporting Highway Statistics . State reported data is adjusted if necessary to eliminate mistakes and to improve data uniformity among the States. The analysis and adjustment process is accomplished in cooperation with the States supplying the data.

In some instances, corrections or revisions have been made in previously published data. Data is updated as needed, and the most recent is reflected on the Highway Statistics Series webpage.

In addition, FHWA and the National Highway Traffic and Safety Administration (NHTSA) use different registration data sources and different vehicle definitions. FHWA requests that it be provided data specifically identifying the various types of passenger carrying highway vehicles. For example, the State reported data should specify if passenger vans have been reported as passenger vehicles or light trucks. While a State may report minivans, station wagons on truck chassis, and utility-type vehicles as passenger cars to FHWA, these vehicles are considered as trucks in both the FHWA and NHTSA data series.

The FHWA data includes all vehicles that have been registered at any time throughout the calendar year. Data includes vehicles that were retired during the year and vehicles that were registered in more than one State. In some States, it is also possible that contrary to the FHWA reporting instructions, vehicles that have been registered twice in the same State may be reported as two vehicles. The NHTSA data includes only those vehicles that are registered as of July 1 of the given year. Therefore, they do not include vehicles registered in the last half of the calendar year or vehicles that may only be registered for a part of a year such as those for farm use.

## **6. Motor Fuel**

The tables in this section show the volume of motor fuel used for highway and non-highway purposes. The following types of fuel are included: gasoline, gasohol, diesel, kerosene, liquefied petroleum gas (propane), liquefied natural gas, compressed natural gas, E85, and M85.. Gasohol, a blend of gasoline and fuel alcohol of 10 percent or less, is included with gasoline in all motor fuel tables in this section. All the other fuel types listed are combined into one category called special fuels.

The records of State agencies that administer the State taxes on motor fuel are the underlying source for most of the data presented in these tables. . When reporting gasoline and gasohol, States are to report all uses of those fuels. When reporting all the special fuels, States are to only report on-highway fuel uses The FHWA estimates highway use of gasoline by subtracting estimated non highway use from the total use reported by the States.

Over the last several years, there have been numerous changes in State fuel tax laws and procedures that have resulted in improved fuel tax compliance, especially for diesel fuel. The improved compliance has resulted in increased fuel volumes being reported by the States to FHWA. The trends shown in the tables reflect both improvements in tax compliance and changes in consumption.

### **6.1. Motor Fuel Use**

Analyses of motor fuel consumption are given in tables MF-21 and MF-24. These tables do not include data on fuel purchased by the Federal Government for military use or fuel exported from the United States. In table MF-21, adjustments have been made to allow for losses from destruction, evaporation, spillage, etc. Additional detail has been added to table MF-21 so that consumption is completely cross-classified by type of highway or non-highway use.

Table MF-33GA shows, by month, gross gasoline volumes, which have been reported in the publication entitled: Monthly Motor Fuel Reported by States style='font-size:10.0pt; font-family:"Arial Narrow";. Since the data in this table are taken from monthly reports issued by State fuel-tax agencies, and few year-end adjustments have been made, the totals will not agree with those shown in table MF-21. Adjustments are made in the annual data to exclude percentage losses in excess of 1 percent and to reflect usage rather than tax collections. Mf-33SF shows the same information for special fuels.

### **6.2. State Motor Fuel Taxation**

The volume of motor fuel exempt from and subject to State taxation is shown in table MF-2. This table is intended for use in revenue analyses and shows fuel volumes without regard to the type of use. The motor fuel tax collections for all States are given in table MF-1, and the disposition of these revenues is given in table MF-3. In most States, the tax on aviation fuel is either refunded or placed in a special fund for aviation purposes. Similarly, some States place in a separate fund all or part of the tax paid on fuel used by marine craft and use these funds for the improvement of marine facilities. When revenue from fuels used for non-highway purposes is dedicated for expenditure for specific non-highway purposes, it is shown in column 6 of table MF-1. Table MF-3 shows the disposition of the highway user revenues shown in column 7 of table MF-1.

Federal tax rates in effect for the latest calendar year for gasoline and other motor fuels are given in table, FE-21B. State tax rates in effect for the latest calendar year for gasoline and other motor fuels are given in table MF-121T.

The words "exemption" and "refund" are not used interchangeably. In this publication, exemption is applied when the State purposely did not collect the tax; refund is applied when the State collected the tax and later returned it, in whole or in part. Exemptions are most frequently granted on motor fuel purchased by the Federal Government; they are also granted as allowances for loss through evaporation, spillage, etc. Refunds are often granted for non-highway uses of motor fuel such as for agriculture, aviation, manufacturing,

construction, and marine purposes. In most States, gasoline used for non-highway purposes is taxed but the tax is refundable, but special fuels used for non-highway purposes are exempt from taxation. Historical data on State and Federal motor fuel gasoline and diesel taxes are included as table MF-205. Historical data on Federal motor fuel and related taxes can be found in tables FE-101A and FE-101B.

A separate publication entitled Highway Taxes and Fees, How They Are Collected and Distributed provides additional information on motor fuel.

Since September 30, 1996, all States (except Alaska and Hawaii) and most Canadian Provinces have been participating members in International Fuel Tax Agreement (IFTA). IFTA replaced individual State motor-fuel tax provisions on Interstate motor carriers with a uniform method of reconciling motor-carrier taxation among member jurisdictions. The uniform method simplified motor-fuel tax reporting by allowing a motor carrier to report and pay motor-fuel taxes owed to the States and Canadian Provinces to a single base jurisdiction, typically their home State or Province. Under IFTA an Interstate motor carrier only needs a single IFTA fuel tax license for each of its qualified motor vehicles

The base State or Province uses a clearinghouse arrangement to forward the portion of motor-fuel taxes owed to other member States and Provinces. Payments for qualified motor vehicle are made quarterly in all jurisdictions.

## **7. Revenue**

The tables in this section show highway receipts, disbursements, debt status, and other financial information of Federal, State, and local governments. Please note that highway finance data for local governments are for the previous year.

### **7.1. Combined Finances**

The first tables in this section give combined summaries of highway finances for all levels of government. The summary tables are followed by specialized tables showing Federal, State, and local government data separately. While intergovernmental transfers have been eliminated from the summary tables, the specialized tables are not additive without appropriate adjustments for intergovernmental payments. For example, Federal payments to States for highways are reported as an expenditure on the Federal tables, while the States' expenditures of those funds are reported as expenditures on the State finance tables.

Table HF-10 combines, for all levels of government, receipts and disbursements for highways (with local government data and some Federal data estimated). Table HF-10 also includes information on gross collections and disposition of highway-user revenue and identifies intergovernmental payments by level of government. Table HF-10A revises table HF-10 as published in the previous Highway Statistics. Table HDF presents total collections of highway-user imposts and distributions of highway-user revenue to highway and other purposes by State. Tables HF-1 and HF-2 eliminate intergovernmental payments and summarize total receipts and disbursements for highways by State for the previous year, the latest year that finance data for all levels of government are available. Table HB-2 summarizes the highway debt status of State and local governments.

## **7.2. Federal Financing**

The Federal-aid highway program is financed from the proceeds of motor-fuel and other highway-related excise taxes deposited in the Federal Highway Trust Fund (HTF). The Federal-aid highway program is a federally assisted, State-administered program which distributes Federal funds to the States for the construction and improvement of urban and rural highway systems. On Federal-aid highway projects, a State develops the plans, lets the contracts, and supervises the construction. The roads remain under the administrative control of the State or local government responsible for their operation and maintenance.

### **7.2.1. Evolution of the Federal-aid Program**

Although Federal aid for highways began in the late 1800's, Federal assistance was not provided uniformly to all States with the purpose of developing an integrated network of highways until 1916. In 1921, Federal aid was restricted to a limited connected system of principal roads which became the Federal-aid Primary Highway System. Provision was made in 1944 for the designation of a Federal-aid Secondary System of principal farm-to-market and feeder roads. Also in 1944, for the first time, specific authorization of Federal-aid funds was made for urban extensions of the Primary System, and in 1954, for urban extensions of the Secondary System. In 1973, funding for a separate Urban System program was established. Part of the authorized funding was specifically earmarked for urbanized areas with a population of 200,000 or more.

Planning began in the late 1930's for what became the Eisenhower System of Interstate Defense Highways. Although a system of highways was identified in 1944, only modest funds were provided prior to 1956. The Federal-aid Highway Act of 1956, as subsequently amended, increased and provided funding on a 90-percent Federal, 10-percent State matching basis, and made the Eisenhower System of Interstate and Defense Highways a dominant feature of the Federal-aid Highway Program. Subsequent legislation has extended the Interstate authorizations.

In recent years, increased attention has been directed to the preservation and reconstruction of the Nation's highways and bridges. Although regular Federal-aid funds may be used by the States for the rehabilitation and replacement of deficient bridges, a special bridge rehabilitation and replacement program with separate authorizations began in 1970.

Beginning in 1976, a special category of Interstate funds was specifically authorized for resurfacing, restoration, and rehabilitation (3R) work. In 1981, the program was amended to include reconstruction (4R) and funding was substantially increased. Under the Inter-modal Surface Transportation Efficiency Act of 1991 (ISTEA), resurfacing, restoration and rehabilitation are funded under the Interstate Maintenance (IM) program. The Federal share of IM projects is generally 90 percent. The ISTEA eliminated the historical Federal-aid system designations of Primary, Secondary, and Urban, and it created the National Highway System (NHS). The NHS includes the Interstate System routes, a large percentage of urban and rural principal arterials, the Strategic Highway Network, and major connectors. The ISTEA also created a new flexible funding program, the Surface Transportation Program (STP), that can be used for roads and streets not functionally classified as local or rural minor collector, for bridges on any public road, and for transit capital projects. The Transportation Equity Act for the 21st Century (TEA-21), PL 105-178, enacted June 9, 1998, extended the ISTEA program structure through Fiscal Year 2003.

The Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU), Public Law 109-59, enacted August 10, 2005, is the principal Federal legislation currently authorizing Federal highway programs for Fiscal Year 2005-2009.

### **7.2.2. The Federal Highway Trust Fund**

The Federal HTF is the funding source for the Federal-aid highway program. The HTF was established by the Highway Revenue Act of 1956. Changes in the Federal excise tax structure have occurred periodically.

Tables FE-101A and FE-101B provide a historical summary of Federal excise tax rates, including rates currently in effect. Table FE-21B provides additional detail on Federal motor-fuel taxes.

Effective April 1983, the Highway Revenue Act of 1982 created the Mass Transit Account within the HTF. The Act provided that the equivalent of one cent per gallon of the motor-fuel taxes would be deposited in the Mass Transit Account for transit system capital expenditures. Tables FE-101A and FE-21B trace the history of the taxes dedicated to the Mass Transit Account.

Federal HTF revenues are derived from various Federal excise taxes on highway users. The attribution of these revenues to highway users in each State is shown in table FE-9. Since these revenues cannot be directly related to payments by highway users in each State, the receipts attributable to highway users in each State are estimated by the FHWA based on highway fuel consumption.

Table FE-221 shows a comparison, by State, of HTF Highway Account receipts attributable to highway users and apportionments and allocations from the Fund. This table reflects a concerted effort to include all funds apportioned or allocated to the States from the Highway Account in the HTF. Table MF-27 shows the previous year's highway motor fuel gallonage used to attribute the current data year HTF receipts to the States in table FE-221.

### **7.2.3. Federal Aid to State and Local Governments**

The Federal-aid highway program is administered by the Federal Highway Administration (FHWA) as a grant-in-aid program. Funds are apportioned to States in accordance with formulas legislated in SAFETEA-LU. Certain programs administered by the FHWA are funded from Federal general funds. Other Federal agencies may transfer funds to the FHWA to administer for highway improvement projects. Details of the Federal-aid funding process can be found in the FHWA publication, Financing Federal-aid Highways.

Annual appropriations of Federal-aid funds for the various programs are apportioned among the States using the formulas and factors shown in table FA-4A. For most programs, these funds are matched by State or local governments on an 80 percent Federal share to a 20-percent State share basis. Amounts apportioned to the States for a fiscal year are not to be confused with payments to the States for work completed. Although Federal-aid funds are apportioned by year, a grace period before obligating is permitted to allow the States time for orderly planning, budgeting, and execution of their highway programs.

The TEA-21 expanded the use of State reported information as factors in the apportionment of Federal-aid funds to the States. Table FA-4E shows selected data used for apportionments to certain Federal-aid highway programs. Table FA-4D shows the factors and the weight of

those factors in the apportionments. Interstate Maintenance (IM) Program funds are based one-third on a State's share of certain Interstate travel, and one-third on a State's share of commercial vehicle contributions of the Highway Account of the HTF.

National Highway System (NHS) Program funds are apportioned: 25 percent States' share of principal arterial lane miles, 35 percent States' share of principal arterial travel, 30 percent States' share of highway use of diesel fuel, and 10 percent States' share of per capital lane miles.

Surface Transportation Program (STP) funds are apportioned: 25 percent States' share of Federal-aid Highway System lanes miles, 40 percent State's share of Federal-aid Highway System travel, and 35 percent States' share of contributions to the Highway account of the HTF.

State and local governments also receive funds for their highway activities from programs administered by other Federal agencies. Some Federal funds are distributed through State governments to local governments. Federal agencies' direct work on highways represents only a small portion of Federal assistance to highways. The different Federal assistance programs for highways are summarized in table F-106 in the FHWA publication Highway Taxes and Fees, How They Are Collected and Distributed.

Payments to contractors for work on Federal-aid projects are initially made from State or local funds. The Federal share is reimbursed to the States as work progresses. The final reimbursement payment is made after completion of the project.

While most payments by FHWA are reimbursements to the States, some funds are expended directly by FHWA. Tables FA-3, FA-5, and FA-21 provide information on the expenditure of Federal funds. The FA-21 consolidates and summarizes all highway receipts and disbursements to the Federal Government. The FA-4 and FA-6 series provide information on the apportionment and obligation of Federal funds. Table FA-10 provides information on Federal-aid highway program accomplishments for Federal-aid projects initiated during the data year of this publication. A revised FA-5 for the previous year is also included.

Obligation of STP funds for projects off the NHS are included in the summary tables STP-1 and STP-1A. These tables are intended to show expected products or accomplishments to be achieved with this category of Federal-aid highway funds.

#### **7.2.4. Innovative Financing**

"Innovative financing" refers to a series of administrative and legislative initiatives undertaken since the enactment of ISTEA to make more flexible the Federal role with respect to transportation finance.

ISTEA laid the groundwork for innovative financing through the introduction of several new concepts designed to increase transportation investment. These included the Section 1012 loan program (later codified under Section 129 of Title 23 of the U.S. Code), which allowed states to use regular Federal-aid apportionments to fund direct loans to projects with dedicated revenue streams; opportunities to levy tolls on Federally supported highways; and permitting certain toll revenue expenditures to serve as a credit against non-Federal matching requirements. The NHS Act established the initial SIB pilot program and also authorized the use of Federal-aid funds for debt instrument financing. The TEA-21 was passed in 1998, enacting the Transportation Infrastructure Finance and Innovation Act (TIFIA) credit program.

Several tables presented in Highway Statistics summarize key data on GARVEE, SIB and TIFIA activity. Table SB-1 (State Obligations for Highways/Obligations Issues or Assumed During Year) summarizes State-reported information on State and quasi-State debt obligations incurred for highway purposes. Contained within this table area GARVEE bonds issued by States, where Federal funds are noted as the source for debt service.

Two supplemental tables present SIB activity (Tables FA-22) and TIFIA activity (Table FA-23). FHWA's Office of Budget and Finance and the TIFIA Joint Program Office collect the data in these two tables.

### **7.2.5. State Financing**

The SF and SB table series show the highway finance activities and debt status of State highway agencies. Table SF-21 consolidates and summarizes all highway receipts and disbursements of the States. The remaining tables in the SF series provide further details and breakdowns of all highway receipts and disbursements of the States, including data on State toll facilities. The SB table series provides details of the highway debt transactions of the States.

The MT table series shows State mass transit activities. Tables MT-1A and MT-1B show State funding for direct State mass transit activities and State grants-in-aid for mass transit.

Federal Transit Administration (FTA) information on mass transit operators is shown in tables MT-2A and MT-2B.

### **7.2.6. State aid to local governments**

States provide assistance to the highway, road, and street programs of local governments primarily through the transfer or sharing of highway-user revenue. However, State aid is not limited to highway-user revenue. Many States also transfer other State revenues or redistribute Federal funds to local governments. Some States also perform a significant amount of work on roads and streets under the jurisdiction of local governments.

For uniformity in FHWA analyses, all State-imposed taxes and fees on highway-users are considered to be collected and distributed by the States. The local governments' shares of State highway-user revenue, if any, are shown as intergovernmental payments from the State.

Many local governments collect State motor-vehicle taxes and retain a portion before forwarding the remaining receipts to the State. The retained amounts are also shown as a State intergovernmental payment to local governments.

In 2001, the statutes of 47 States provided for the sharing of State-collected highway-user tax revenue with local governments for road and street purposes. This assistance is in the form of direct grants-in-aid and shared revenue. Georgia, Rhode Island, and West Virginia did not have such a statute.

Some transactions that involve a transfer of funds from States to local governments are shown as direct State expenditures, rather than as intergovernmental payments. These transactions include: (1) amounts paid to local governments under contractual agreements for construction or maintenance work on the State highway system for the State highway

agency; and (2) payments on local debt obligations assumed by the State as reimbursement for the cost of local roads added to the State highway systems.

Numerous other State transactions or activities benefiting local governments do not involve a transfer of funds and are not treated as intergovernmental payments. These transactions include: (1) advisory, consulting, and supervisory services, engineering assistance, and aid-in-kind (e.g., free provision of road materials or loans of equipment); (2) State assumption of the responsibility for construction and maintenance of former county roads or municipal streets; (3) direct State payments for materials or to contractors for the State's share of the cost of joint State-local projects on local road systems; and (4) direct work by the State on locally controlled roads and streets.

### **7.3. Local Financing**

The highway finance activities of local governments are estimated in the LGF table series. Debt status for local governments is given in table LGB-2. Table LGF-21 consolidates and summarizes all highway receipts and disbursements of local governments. Some States use sampling to develop highway finance data for local governments.

Most local governments are constrained by their State governments to the taxation of real and personal property as their primary source of revenue. Because there are limits to the amount of revenue that can be derived from property taxation, many States share revenues with local governments.

Recently, as States have increasingly permitted local governments to impose their own highway-revenue fees, more highway-user revenue is being reported from local governments. Local highway-user taxation is usually in the form of local option taxes on motor fuel. With a local option tax, the State allows local governments to decide whether to levy a tax to be added to the State tax rate. Typically the local option tax is then collected and administered along with the State tax. Regional gasoline taxes are considered to be local highway-user taxes unless levied uniformly throughout the State. See the discussion under "Classification of Highway Receipts."

#### **7.3.1. Local government transfers to States**

Receipts and disbursements on Federal-aid projects are usually considered transactions of the State. However, local funds may be expended on such projects. When local governments provide the matching share and the State administers the project, the payments to the State are considered to be intergovernmental transfers.

In some States, a portion of the local share of State tax revenues is not paid directly to local governments. The revenues are retained by the State to match Federal funds for locally controlled road and street projects, or to reimburse the State for work performed at the request of the local government. When the State retains such tax revenue, the transactions do not appear as intergovernmental payments in the State or local finance series of tables.

### **7.4. Classification of Highway-User Revenues**

Taxes and fees imposed on the owners and operators of motor vehicles for their use of public highways are classified as highway-user taxes and the revenues generated as highway-user revenues. Most highway-user revenues are used for highways, but some are used for mass

transit or nonhighway purposes. See Tables HDF, SDF, DF, MF-3, MV-3, and LDF for the disposition of highway-user revenues.

The clearest example of a highway-user tax or fee is a toll. Before either entering or exiting a toll facility, the driver of a motor vehicle must pay a toll for the use of the highway.

Most motor fuel taxes are classified as highway-user taxes. In most States, wholesale distributors initially pay the tax, and the costs are ultimately passed down to motor fuel users.

For motor fuel revenues to qualify as highway-user revenue in FHWA tables, a motor-fuel tax must be levied per unit of volume, e.g., per gallon. It must also apply only to motor fuel opposed to all petroleum products, or all hazardous materials or provide a separate rate for motor fuel.

The motor fuel revenue data reported by the States may include small amounts of revenues generated from the nonhighway use of motor fuel. In many States, nonhighway use is tax exempt or subject to refund. In other States, nonhighway use is taxed, but the revenues are separately identifiable, and may be dedicated to special accounts for nonhighway purposes. For example, tax revenues generated from boating use are frequently dedicated for improvement of boating facilities. In cases where nonhighway use is taxed and the revenues are commingled with receipts from highway use, the revenues from nonhighway use will appear in FHWA tables. An example is the gasoline used in lawnmowers, which is not separately identifiable from that used for highways.

Motor-vehicle registration fees, certificate-of-title fees, driver-license fees, and other miscellaneous vehicle fees are all highway-user taxes, since they are imposed on owners and operators as a condition prior to use of a motor vehicle on the highways. Weight-distance taxes, oversize-overweight permits and trip permits are even more directly related to highway use.

Additional special fees imposed on registrations are counted as highway-user revenue although they may not be viewed as such by some States. These additional fees include surcharges for vehicle emission programs or emergency medical services.

Not all taxes paid by highway users are classified as highway-user taxes. Those taxes and fees that target a broader base than highway users are considered to be part of the general tax structure of the State, and are not considered to be highway-user taxes. Most sales and use taxes, gross receipts taxes, and ad valorem property taxes are not targeted specifically at highway users. They are imposed on all sales transactions, business receipts or property.

For example, special environmental taxes imposed equally on all petroleum products, or all hazardous materials, are not considered to be highway-user taxes. Although highway users indirectly pay some of these taxes, they are not being targeted for their use of highways. These taxes are being imposed on a broader group of users of materials that potentially can cause environmental damage. However, environmental fees that are imposed solely on motor fuel or that provide a separate tax rate for motor fuel, are considered to be specifically targeted at highway users and are then classified as highway-user revenue.

State sales taxes imposed on motor vehicle sales are typically not classified as highway-user taxes because they are usually imposed on all sales transactions and are a part of the general tax structure of the State.

When motor vehicle sales are charged a separate tax rate from that imposed on general sales transactions, the motor-vehicle sales tax revenue is considered a highway user revenue. The sales tax is specifically directed at highway-users.

## **7.5. Classification of Highway Receipts**

Highway receipts shown in the HF, SF, and LGF table series include highway-user revenue and all other receipts that are expended for highway purposes, regardless of source. Highway-user revenues that are used for non-highway purposes are excluded.

### **7.5.1. Funds attributable to highway users**

Many States have legislatively dedicated highway-user revenues to specific purposes. For example, a State might dedicate 70 percent of its motor-fuel tax revenues for highway construction, 10 percent for State highway debt service, and 20 percent for schools. Under these circumstances, the SF table series would reflect the construction and debt service dedications, but would not include the amount dedicated for schools.

When highway-user revenues are dedicated to multipurpose funds and mixed with other revenue, it is impossible to precisely identify how revenues from particular sources are used. In this case, the FHWA would estimate motor-fuel and motor-vehicle revenue proportionally to each type of expenditure made by the multipurpose fund.

Some States allocate highway-user revenue to the State general fund and then appropriate general funds to highway purposes. In the FHWA analyses, the amount flowing into and out of the State general fund is offset, so that the highway-user revenues are treated as if they went for highways directly. Tables DF, MF-3 and MV-3 show the amounts that were offset in this fashion.

Tables MF-106 demonstrates the legislative and administrative provisions for allocating State motor-fuel taxes. Table MV-106 provides similar information for motor-vehicle registration fees, driver-license fees, and motor-carrier taxes. These tables are published in the FHWA publication, Highway Taxes and Fees, How They Are Collected and Distributed.

### **7.5.2. Other taxes and fees**

All taxes that are dedicated for highways, but are not classified as highway-user revenues, are shown as other taxes and fees. The most common of these taxes are general sales and use taxes, gross receipts taxes, ad valorem property taxes, and severance taxes. Only the amounts allocated to highway purposes from other taxes and fees appear in the tables. Specific dedications and appropriations for highway purposes from State taxes and fees, are shown in table S-106 in the FHWA publication, Highway Taxes and Fees, How They Are Collected and Distributed.

### **7.5.3. Investment income and miscellaneous receipts**

By investing surplus or unused highway funds, many highway agencies are able to realize interest income or profit on the purchase and sale of securities. Other miscellaneous income includes: private donations (including cash contributions and transfers of real property); sign fees; insurance recoveries; rentals; fines and penalties; and permit fees.

#### **7.5.4. Income from sale of bonds and notes**

Short-term note issues (a maturity of 2 years or less) have been omitted from all revenue and expenditure tables. Although local governments use short-term debt financing frequently, short-term note issues and redemptions are only included in table LGB-2 for the local finance (LGF) table series. Note interest payments for short-term debt are included in the highway finance summary tables.

Tables that give details of State obligations (SB table series) and local obligations (table LGB-2) have been included. Separate tables have been provided for State and local toll obligations and for State obligations for local roads and streets.

Some bond issues combine borrowing for more than one purpose. The highway share of combined debt in the tables may be estimated.

#### **7.5.5. General funds**

Funds from a number of sources are deposited into State and local general funds and effectively lose their identities. Except for highway-user revenues, no effort is made to track the ultimate revenue source of general fund appropriations that are used for highways.

#### **7.6. Classification of Highway Expenditures**

Expenditures for highways have been grouped into the following major classes: capital outlay, maintenance, highway and traffic services, administration, highway law enforcement and safety, debt service, and intergovernmental payments.

Capital outlays are those costs associated with highway improvements, including: land acquisition and other right-of-way costs; preliminary and construction engineering; construction and reconstruction; resurfacing, rehabilitation, and restoration costs of roadway and structure; system preservation activities; and installation of traffic service facilities such as guard rails, fencing, signs, and signals.

Maintenance costs are those required to keep highways in usable condition and do not extend the service life of a highway is not extended beyond the original design.

Highway and traffic service costs are those associated with the operation and management of highways. These costs are classified into three types. The first type involves traffic control operations, which includes expenditures for operating traffic control and surveillance systems for monitoring and controlling traffic flow. The second type includes the cost of snow and ice removal. The third type includes miscellaneous costs for highway beautification, litter control, vegetation management, erosion control, and air quality programs.

Administration costs are the general expenses of administering a State or local highway program, including general overhead, engineering, and research costs that are not assignable to specific road projects. They also include expenses associated with highway planning and research, highway litigation, and highway publications.

Highway law enforcement and safety expenditures are: traffic supervision activities of State highway patrols; highway safety programs including driver education and training, motorcycle safety; vehicle inspection programs; and enforcement of vehicle size and weight limitations.

General police expenses associated with drug interdiction, criminal investigation, and security activities are excluded from the tables.

Debt service costs are the expenses incurred from borrowing funds for highway, road, and street projects. Debt service includes expenditures incidental to the sale of highway bonds, bond administration expenses, interest and redemption payments.

Intergovernmental payments are transfers of funds between different levels of government. A description can be found in the preceding discussions on Federal Aid to State and local governments, State aid to local governments, and local government transfers to State.

## **7.7. Information for Users**

Because highway finance information is statistical in nature, it does not represent an accounting or audited statement of State and local governments. The published highway finance information presents a general overview of the funding of highway programs, highway-user taxation and the disposition of highway-user revenues.

All reports and information provided to FHWA are examined for completeness, reasonable consistency within present and past data reporting, and with data reporting instructions contained in a Guide To Reporting Highway Statistics. The FHWA analysis process includes reclassification of State data to achieve greater consistency in the presentation of the data.

The reporting of information varies from State to State. How consistent States are in reporting data according to instructions contained in A Guide To Reporting Highway Statistics has an impact on the reliability of comparing the data of different States.

### **7.7.1. Reporting period**

Federal government highway finance data are based on the Federal fiscal year. State government highway finance data may be either fiscal or calendar year at the option of each State's highway agency. Local government highway finance information is based on the variety of fiscal and calendar years used by local governments. Therefore, data shown for any particular year actually represent a mix of data for calendar and fiscal years ending during the reporting period.

Because of the difficulty States encounter in gathering and developing local government highway finance data, the reporting of local government information lags one year behind State government highway finance information.

### **7.7.2. Interagency coordination**

The information in Highway Statistics on State government highway finance is based on reports coordinated through State highway agencies from data prepared by State personnel in the State highway agency and in a variety of other State agencies that have highway functions, such as tax and revenue agencies, motor vehicle agencies, public utility commissions, public safety departments, and highway police organizations. The completeness and consistency of State government level data is dependent upon the degree of cooperation among State agencies.

Different agencies have different accounting and information systems, which can lead to timing differences in the recording of revenues and expenditures. Timing differences are most

apparent in the transfer of funds among the State agencies responsible for collecting revenues and the State agencies responsible for expending those revenues.

The information in Highway Statistics on local government highway finance is based on reports coordinated through State highway agencies from data provided by local governments. States have the option of providing local highway finance data on either an annual or biennial basis with the FHWA estimating the years not reported by the States.

Some State highway agencies develop their local highway finance reports, in part or whole, from central State sources that routinely collect local finance data through legislated local government reporting requirements.

Local highway finance information tends to be more consistent for States which provide data each year and which have legislated local government reporting requirements. The reliability of local highway finance data is highly dependent on the degree of cooperation between State and local governments.

### **7.7.3. Sampling**

States have the option of using a sampling methodology as an alternative to a complete survey of all local governments. Some States use surveys and sampling to supplement centrally collected data.

Sampling programs are developed by the State highway agency to fit FHWA reporting needs, the State's needs, available State resources, and local government structure.

### **7.7.4. Jurisdictional responsibilities**

Differences exist among States depending on the governmental level of responsibility for highway functions and the variation in agencies that perform the functions. Some States have jurisdictional authority over almost all highways in the State and perform almost all highway functions. In other States, local governments have jurisdictional authority over a significant portion of the highways. Comparisons are difficult to make among State governments which have vastly different highway responsibilities. Local government data also tend to vary among States depending upon the degree of local government responsibility for highways.

Some States share a significant amount of highway-user revenue with their local governments. Other States assist local governments by transferring other revenue or by performing direct work on local jurisdiction roads. States performing direct work on local roads tend to report higher levels of capital outlay, maintenance and administration for the amount of revenues raised.

### **7.7.5. Financing mechanisms**

Differences exist between States as to the types of revenues used in funding highways. State and local governments do not impose the same taxes and fees. The tax structure and distribution of tax revenues varies from State to State, and from local government to local government. These differences are often found in how States choose to finance their highway systems and in how States classify revenues.

For example, some States extend paying for a project into the future through bond financing. Large bond sales can greatly inflate the amount of revenue for highways in the year the

bonds were sold, especially when total revenues are compared to prior and subsequent years. Similarly, total disbursements can vary greatly with the expenditure of the bond funds.

States which do not use bond financing pay for projects by either accumulating sufficient funds before beginning the project, or paying for the project from current revenues. Those States tend to have a more consistent level of revenues and disbursements than States which use bond financing.

Another example involves toll financing. Not all States have toll facilities, and the size and financial scope of toll facilities varies significantly. A small toll facility may raise and spend a few thousand dollars a year. Some large toll facilities have cash flows of several hundred million dollars to over a billion dollars a year. Toll facilities can represent a significant portion of a State's highway revenues and expenditures. Toll facilities also represent a significant source of revenues for mass transit and other purposes.

#### **7.7.6. Revenue classification**

The classification of revenues varies from State to State. FHWA reclassifies some State revenue data to present tables with more uniform definitions. Revenues generated by taxes and fees that are specifically targeted at highway-users are classified as highway-user revenue. See the discussion on "Highway-User Revenue" for details on the FHWA definition. Taxes that are imposed more broadly, such as State sales taxes, are classified as "Other State Taxes," even if the taxes fall on the highway user.

Full data on the collection and disposition of highway-user revenues are included in Highway Statistics. However, revenues from other taxes and fees are shown only to the extent that their proceeds are used for highways. Therefore, it is not appropriate to draw conclusions about the total amounts of taxation in these other areas, since only a portion of the proceeds is accounted for.

Revenues whose origins are unidentified are also typically classified as general funds. For example, when State highway agencies receive payments from other State agencies for expenditure on highways, it may not be possible to determine the original source of revenue of the transferred funds.

#### **7.7.7. Expenditure classification**

State accounting and information systems assign expenditures based on internal State categories and definitions. To develop their expenditure reports to FHWA, States modify their internal data to correspond to FHWA categories and definitions. The reliability of the reconfigured data is dependent on the detail present in existing State records, and the amount of variation between State and FHWA definitions.

One area in which States have difficulty in recompiling data is in defining types of capital improvements. Project records in some States do not contain a full breakdown of work types. This forces these States to assign projects to categories based on narrative descriptions of each project. Such narratives are of varying levels of detail and are subject to interpretation. This may cause data classification to be less consistent. States use a variety of definitions for capital outlay and physical maintenance. In some States, work performed by maintenance crews may be classified as physical maintenance, even if the project was extensive enough to meet the FHWA definition of capital outlay.

Another problem area is the assignment of indirect costs. FHWA requests that States assign incidental costs related to specific construction and maintenance projects to those categories. For example, salaries and benefits for engineers and construction workers detailed to a construction project should be assigned as construction expenditures. However, many State accounting systems do not assign costs in this manner. For example, salaries may be assigned to capital outlay while employee benefits may be assigned to general administration.

The treatment of pensions for highway agency employees is a significant source of variation. In some States, the pension system is completely independent and separate from the highway program, and pension payments are not shown as highway expenditures. In other States, highway agencies are required to make pension fund payments as their liabilities are incurred. In this case, pension fund payments are shown as highway expenditure, and should be assigned to capital outlay, maintenance, or administration in the same manner that salaries are assigned. In a few States, the State highway program is charged for current benefits to retired employees. Since it is impossible to tie these benefits to specific construction and maintenance areas, these costs are reported as general administrative costs.

The combined effect of variations in indirect cost allocations, and the differences in State highway program structures causes the general administration numbers to vary widely among the States. For these reasons, the administration data are not a suitable measure for comparisons of State administrative efficiency.

## SELECTED MEASURES FOR IDENTIFYING PEER STATES

OCTOBER 2008

# PUBLIC ROAD LENGTH - 2007

## MILES BY TYPE OF SURFACE AND OWNERSHIP/FUNCTIONAL SYSTEM

### NATIONAL SUMMARY

HM-12 Footnotes Page:

- 1/ Includes the 50 States, the District of Columbia and Puerto Rico. Some differences from other tables may be noted because these are estimated from sample and summary data; samples entirely on structures are not included. Indiana excludes 788 miles of Federal agency owned roads. Minnesota excludes 437 miles of local government owned roads.
- 2/ Paved includes the following categories: Low type-- an earth, gravel, or stone roadway which has a bituminous surface course less than 1" thick suitable for occasional heavy loads; Intermediate Type-- a mixed bituminous or bituminous penetration roadway on a flexible base having a combined surface and base thickness of less than 7"; High-Type Flexible-- a mixed bituminous or bituminous penetration roadway on a flexible base having a combined surface and base thickness of 7" or more; also includes brick, block, or combination roadways; High-Type Composite-- a mixed bituminous or bituminous penetration roadway of more than 1" compacted material on a rigid base with a combined surface and base thickness of 7" or more; High-Type Rigid-- a Portland Cement Concrete roadway with or without a bituminous wearing surface of less than 1".
- 3/ Prior to 1999 included other state agency roads.

# **FEDERAL - AID HIGHWAY LENGTH - 2007 MILES BY TRAFFIC LANES AND ACCESS CONTROL NATIONAL SUMMARY**

HM-36 Footnotes Page:

- 1/ Includes the 50 States, the District of Columbia, and Puerto Rico. Indiana excludes up to 788 miles of Federal agency roads. Minnesota excludes 437 miles of local government owned roads.
- 2/ Some differences from other tables may be noted because these are estimated from sample data and do not include samples entirely on structures.
- 3/ Differences may exist from prior years due to the redefinition of divided and undivided roadways in 1999.

# **FEDERAL - AID HIGHWAY LENGTH - 2007**

## **MILES BY LANE WIDTH, ACCESS CONTROL, AND AVERAGE DAILY TRAFFIC VOLUME**

### **NATIONAL SUMMARY**

HM-39 Footnotes Page:

1/ Includes the 50 States, the District of Columbia, and Puerto Rico. Some differences from other tables may be noted because these are estimated from sample data and do not include samples entirely on structures.

Indiana may exclude up to 788 miles of Federal agency owned roads. Minnesota excludes 437 miles of local government owned roads.

2/ Differences may exist from prior years due to a redefinition of divided and undivided roadways in 1999.

**FUNCTIONAL SYSTEM LENGTH - 2007  
MILES BY LANE WIDTH, ACCESS CONTROL AND AVERAGE DAILY  
TRAFFIC VOLUME  
NATIONAL SUMMARY**

HM-59 Footnotes Page:

- 1/ Includes the 50 States, the District of Columbia and Puerto Rico. Some differences from other tables may be noted because these are estimated from sample data; does not include samples entirely on structures. Indiana excludes 788 miles of Federal agency owned roads. Minnesota excludes 437 miles of local government owned roads.
- 2/ Differences may exist from prior years due to the redefinition of divided and undivided roadways in 1999.

## FUNCTIONAL SYSTEM LENGTH - 2007

### MILES BY OWNERSHIP

HM-50 Footnotes Page:

- 1/ Prior to 1999, municipal was included with other jurisdictions.
- 2/ Includes State park, State toll, other State agency, other local agency, and roadways not identified by ownership.
- 3/ Roadways in Federal parks, forest, and reservations that are not a part of the State and local highway systems.
- 4/ Excludes 788 miles of Federal agency owned roads.
- 5/ Excludes 437 miles of local government owned roads.

# **FUNCTIONAL SYSTEM LANE-LENGTH - 2007**

## **LANE-MILES**

HM-60 Footnotes Page:

- 1/ May see differences from prior years; starting in 1999, number of lanes is coded for all systems except rural minor collector and rural/urban local.
- 2/ Rural minor collector and rural/urban local functional system lane miles estimated by FHWA assuming two as the number of lanes.
- 3/ Excludes 788 miles of Federal owned roads.
- 4/ Excludes 437 miles of local government owned roads.

For footnotes, see Footnotes Page.

# FEDERAL - AID HIGHWAY LENGTH - 2007

## MILES BY OWNERSHIP

HM-14 Footnotes Page:

- 1/ Prior to 1999, municipal was included with other jurisdictions.
- 2/ Includes State park, State toll, other State agency, other local agency, and roadways not identified by ownership.
- 3/ Roadways in Federal parks, forests, and reservations that are not part of the State and local highway systems.
- 4/ Excludes 788 miles of Federal agency owned roads.
- 5/ Excludes 437 miles of local government owned roads.

# **FEDERAL - AID HIGHWAY LENGTH - 2007**

## **MILES BY SYSTEM**

HM-15 Footnotes Page:

- 1/ Excludes 788 miles of Federal agency owned roads.
- 2/ Excludes 437 miles of local government owned roads.

# FEDERAL-AID HIGHWAY LENGTH - 2007

## MILES BY TYPE OF SURFACE

HM-31 Footnotes Page:

- 1/ Some differences from other tables may be noted because these are estimated from sample data; samples entirely on structures are not included.
- 2/ Paved includes the following categories: Low Type-- an earth, gravel or stone roadway which has a bituminous surface course less than 1" thick--suitable for occasional heavy loads; Intermediate Type-- a mixed bituminous or bituminous penetration roadway on a flexible base having a combined surface and base thickness less than 7"; High-Type Flexible-- a mixed bituminous or bituminous penetration roadway on a flexible base with a combined surface thickness of 7" or more; also includes brick, block or combination roadways; High-Type Composite-- a mixed bituminous or bituminous penetration roadway of more than 1" compacted material on a rigid base with a combined surface and base thickness 7" or more; High-Type Rigid-- a Portland Cement Concrete roadway with or without a bituminous wearing surface of less than 1." Interstate data shown does not include Low and Intermediate Type
- 3/ Excludes up to 788 miles of Federal agency owned roads.
- 4/ Excludes 437 miles of local government owned roads.

# FEDERAL - AID HIGHWAY LENGTH - 2007

## MILES BY LANE WIDTH

HM-33 Footnotes Page:

- 1/ Some differences from other tables may be noted because these are estimated from sample data and samples entirely on structures are included.
- 2/ Excludes up to 788 miles of Federal agency owned roads.
- 3/ Excludes 437 miles of local government owned roads.

# FEDERAL - AID HIGHWAY LENGTH - 2007

## MILES BY TRAFFIC LANES AND ACCESS CONTROL

HM-35 Footnotes Page:

- 1/ Some differences from other tables may be noted because these are estimated from sample data and samples entirely on structures are not included. Differences may exist from prior years due to the redefinition of divided and undivided roadways in 1999.
- 2/ Includes 3-lane roadways, one-way streets, undivided multi-lane highways, etc. For Interstate, includes some 2-lane roadways
- 3/ Excludes up to 788 miles of Federal agency roads.
- 4/ Excludes 437 miles of local government owned roads.

## **FEDERAL-AID HIGHWAY LANE - LENGTH - 2007**

### **LANE - MILES BY SYSTEM**

HM-48 Footnotes Page:

1/ May see differences from prior years; starting in 1999, number of lanes is coded for all systems except rural minor collector and rural/urban local. Rural minor collector and rural/urban local functional system lane-miles estimated by FHWA assuming two as the number of lanes.

2/ Excludes 788 miles of Federal agency owned roads.

3/ Excludes 437 miles of local government owned roads.

# NATIONAL HIGHWAY SYSTEM LENGTH - 2007

# **NATIONAL HIGHWAY SYSTEM ROAD LENGTH - 2007**

## **MILES BY OWNERSHIP**

HM-40 Footnotes Page:

1/ Prior to 1999, municipal was included with other jurisdictions.

2/ Includes State park, State toll, other State agency, other local agency, and other roadways not identified by ownership.

3/ Roadways in Federal parks, forests, and reservations that are not part of the State and local highway systems.

4/ Excludes 788 miles of Federal agency owned roads.

5/ Excludes 437 miles of local government owned roads.

# STRATEGIC HIGHWAY NETWORK (STRAHNET) LENGTH - 2007

## MILES BY INTERSTATE AND NON-INTERSTATE

HM-49 Footnotes Page:

- 1/ The STRAHNET includes highways which are important to the United States strategic defense. They provide defense access, continuity, and emergency capabilities for the movement of personnel, materials, and equipment.
- 2/ Exclude 788 miles of Federal agency owned roads.
- 3/ Excludes 437 miles of local government owned roads.

## FUNCTIONAL SYSTEM LENGTH - 2007

### MILES BY TYPE OF SURFACE

HM-51 Footnotes Page:

- 1/ Some differences from other tables may be noted because these values are estimated from sample data and do not include samples entirely on structures.
- 2/ Paved includes the following categories: Low Type-- an earth, gravel, or stone roadway which has a bituminous surface course less than 1" thick--suitable for occasional heavy loads; Intermediate Type-- a mixed bituminous or bituminous penetration roadway on a flexible base having a combined surface and base thickness of less than 7"; High-Type Flexible-- a mixed bituminous or bituminous penetration roadway on a flexible base with combined surface thickness of 7" or more; also includes brick, block, or combination roadways; High-Type Composite-- a mixed bituminous or bituminous penetration roadway of more than 1" compacted material on a rigid base with a combined surface and base thickness of 7" or more; High-Type Rigid-- a Portland Cement Concrete roadway with or without a bituminous wearing surface of less than 1". Interstate data shown does not include Low and Intermediate Type.
- 3/ Excludes 788 miles of Federal agency owned roads.
- 4/ Excludes 437 miles of local government owned roads.

# **FUNCTIONAL SYSTEM LENGTH - 2007**

## **MILES BY LANE WIDTH - URBAN**

HM-53 Footnotes Page:

- 1/ Some differences from other tables may be noted because these are estimated from sample data; samples entirely on structures are included
- 2/ Excludes 788 miles of Federal agency owned roads.
- 3/ Excludes 437 miles of local government owned roads.

**FUNCTIONAL SYSTEM LENGTH - 2007**

## **FUNCTIONAL SYSTEM LENGTH - 2007**

### **MILES BY TRAFFIC LANES AND ACCESS CONTROL**

HM-55 Footnotes Page:

- 1/ Some differences from other tables may be noted because these are estimated from sample data; samples entirely on structures are not included.
- 2/ Differences may exist from prior years due to the redefinition of divided and undivided roadways in 1999.
- 3/ Includes 3-lane roadways, one-way streets, multi-lane 4-lane highways, etc.; for Interstate includes 2-lane roadways.
- 4/ Excludes 788 miles of Federal agency owned roads.
- 5/ Excludes 437 miles of local government owned roads.

**URBANIZED AREAS - 2007**

# **URBANIZED AREAS - 2007**

## **MILES AND DAILY VEHICLE - MILES TRAVELED**

HM-71 Footnotes Page:

1/ A "Federal-Aid Urbanized Area" is an area with 50,000 or more persons that at a minimum encompasses the land area delineated as the urbanized area by the Bureau of the Census. Urbanized areas which have been combined with others for reporting purposes are not shown separately. Areas are in sort by population. The Illinois portion of Round Lake Beach-McHenry-Grayslake has been reported with Chicago. Indiana excludes 788 miles of Federal agency owned roads. Minnesota excludes 437 miles of local government owned roads.

# URBANIZED AREAS - 2007

## SELECTED CHARACTERISTICS

HM-72 Footnotes Page:

1/ A "Federal-Aid Urbanized Area" is an area with 50,000 or more persons that at a minimum encompasses the land area delineated as the urbanized area by the Bureau of the Census. Urbanized areas which have been combined with others for reporting purposes are not shown separately. Areas are in sort by population. The Illinois portion of Round Lake Beach-McHenry-Grayslake has been reported with Chicago. Indiana excludes 788 miles of Federal agency owned roads. Minnesota excludes 437 miles of local government owned roads.

2/ "DVTM" stands for "Daily Vehicle-Miles Traveled."

3/ Lane-miles estimated by FHWA.

**STATE HIGHWAY AGENCY-OWNED PUBLIC ROADS - 2007 1,  
MILES BY FUNCTIONAL SYSTEM**

OCTOBER 2008

# **STATE HIGHWAY AGENCY-OWNED PUBLIC ROADS - 2007**

## **MILES BY FUNCTIONAL SYSTEM**

HM-80 Footnotes Page:

- 1/ Includes roadways owned by the State highway agency. Excludes roadways owned by State toll, State park and other State agencies.
- 2/ Excludes 788 miles of Federal agency owned roads.
- 3/ Excludes 437 miles of local government owned roads.

## **STATE HIGHWAY AGENCY-OWNED PUBLIC ROADS - 2007**

### **RURAL AND URBAN MILES; ESTIMATED LANE-MILES AND DAILY TRAVEL**

HM-81 Footnotes Page:

- 1/ Includes roadways owned by the State highway agency. Excludes roadways owned by State toll, State park and other State agencies.
- 2/ Statewide totals for miles, lane-miles, and travel are found in tables HM-20, HM-60 and VM-2 (annual VMT), respectively.
- 3/ May see differences from prior years; starting in 1999, number of lanes is coded for all systems except rural minor collector and rural/urban local, which are assumed to have two lanes.
- 4/ DVMT (Daily Vehicle-Miles of Travel) is in thousands.
- 5/ AADT means Annual Average Daily Traffic. AADT/Lane is a statewide average.
- 6/ Excludes 788 miles of Federal agency owned roads.
- 7/ Excludes 437 miles of local government owned roads.

**ANNUAL VEHICLE DISTANCE TRAVELED IN MILES AND RELATED DATA - 2007 1/  
BY HIGHWAY CATEGORY AND VEHICLE TYPE**

1/ The 50 states and the District of Columbia report travel by highway category, number of motor vehicles registered, and total fuel consumed. The travel and fuel data by vehicle type and stratification of trucks are estimated by the Federal Highway Administration (FHWA). Entries for 2006 have been revised based on the availability of more current data. Estimation procedures include use of State supplied data, the 2002 Census of Transportation Vehicle Inventory and Use Survey (VIUS), and other sources.

2/ Totals by highway category are from table VM-2. Some changes between rural and urban roadways can be attributed to 2002 census boundary changes.

3/ Estimation process accounts for all States, including those that did not report motorcycles (District of Columbia).

4/ Other 2-Axle 4-Tire Vehicles which are not passenger cars. These include vans, pickup trucks, and sport/utility vehicles.

5/ Single-Unit 2-Axle 6-Tire or More Trucks on a single frame with at least two axles and six tires.

6/ Truck registration figures are from tables MV-1 and MV-9 with truck distribution estimated by the FHWA using the 2002 VIUS.

7/ Vehicle occupancy is estimated by the FHWA from the 2001 National Household Travel Survey (NHTS) with nominal values (1 vehicle mile traveled = 1 person mile per VMT) for heavy trucks.

8/ Total fuel consumption figures are from tables MF-21 and MF-27. Distribution by vehicle type is estimated by the FHWA based on miles per gallon for both diesel and gasoline powered vehicles using State-supplied data, the 2002 VIUS, and other sources with nominal inputs for motorcycles and buses.

# FUNCTIONAL SYSTEM TRAVEL - 2007

## ANNUAL VEHICLE - MILES

VM-2 Footnotes Page:

- 1/ Travel for all systems are FHWA estimates based on State provided HPMS data.
- 2/ Excludes 788 miles of Federal agency owned roads.
- 3/ Excludes 437 miles of local government owned roads.

# FEDERAL - AID HIGHWAY TRAVEL - 2007

## ANNUAL VEHICLE - MILES

VM-3 Footnotes Page:

- 1/ Travel for all systems are FHWA estimates based on State provided HPMS data.
- 2/ Excludes 788 miles of Federal agency owned roads.
- 3/ Excludes 437 miles of local government owned roads.

# **FEDERAL - AID HIGHWAY LENGTH - 2007**

## **MILES BY AVERAGE DAILY TRAFFIC VOLUME**

HM-37 Footnotes Page:

- 1/ Some differences from other tables may be noted because these are estimated from sample data and samples entirely on structures are included.
- 2/ Excludes up to 788 miles of Federal agency owned roads.
- 3/ Excludes 437 miles of local government owned roads.

**FUNCTIONAL SYSTEM LENGTH - 2007**  
**MILES BY AVERAGE DAILY TRAFFIC VOLUME - RURAL**

## **FUNCTIONAL SYSTEM LENGTH - 2007**

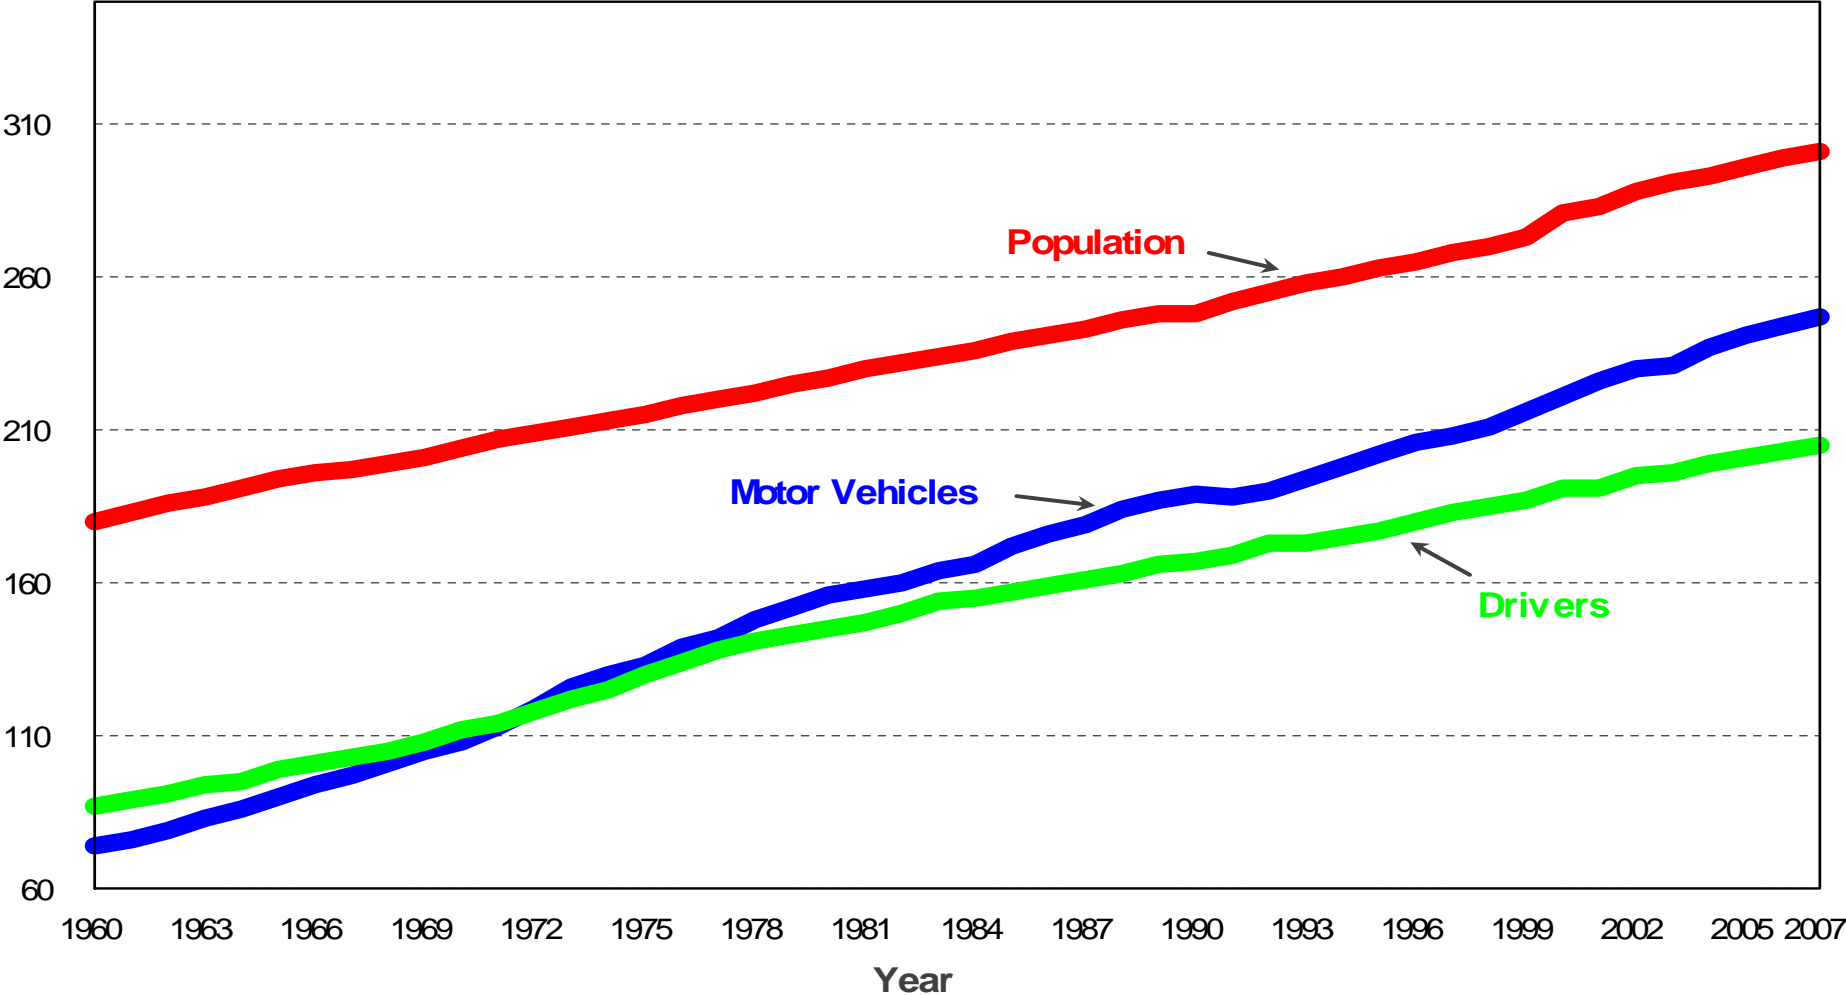

### **MILES BY AVERAGE DAILY TRAFFIC VOLUME**

HM-57 Footnotes Page:

- 1/ Some differences from other tables may be noted because these values are estimated from sample data; samples entirely on structures are included
- 2/ Excludes 788 miles of Federal agency owned roads.
- 3/ Excludes 437 miles of local government owned roads.

# Licensed Drivers, Vehicle Registrations, and Resident Population

1/ For additional details of publicly owned vehicles and of trucks, buses, and trailers registered, see tables MV-7, 9, 10, and 11, respectively. Where the registration year is not more than one month removed from the calendar year, registration-year data are given. Where the registration year is more than one month removed, registrations are given for the calendar year. In some instances, corrections or revisions have been made in previously published data; consequently the figures shown in Highway Statistics Summary to 1995 supersede those in Highway Statistics Summaries, 1945, 1955, 1965, 1975, and 1985, as well as the annual issues of Highway Statistics.

2/ Includes Federal, State, county, and municipal vehicles. Vehicles owned by the military services are not included.  
 3/ The numbers of private and commercial buses given here are estimates by the Federal Highway Administration of the numbers in operation, rather than the registration counts of the States.  
 4/ The following farm trucks, registered at a nominal fee and restricted to use in the vicinity of the owner's farm, are not included in this table: Connecticut, 6,693; New Hampshire, 10,320; New Jersey, 8,823; New York, 32,489; Pennsylvania, 25,321; and Rhode Island, 4,215.  
 5/ State did not provide current data. Table displays 2005 private and commercial and state, county and municipal vehicles.

1/ Vehicles of the civilian branches of the Federal government are given in this table. Vehicles of the military services are not included. Distribution by State is estimated by the Federal Highway Administration.

2/ This information, compiled chiefly from reports of State authorities, is incomplete in many cases.

Some States give State-owned vehicles only; others exclude from registration certain classes, such as

fire apparatus and police vehicles. For the States not reporting State, county, and municipal vehicles separately from private and commercial vehicles and those reporting unsegregated totals only, classification by vehicle type has been approximated on the basis of other available data or estimated.

3/ State did not provide current data. Table displays 2005 data for state, county and municipal vehicles.

1/ The registrations given in this table are as reported by the States in most instances, but have been supplemented in some cases by estimates based on data from other sources. In some instances, corrections or revisions have been made in previously published data; consequently the figures shown in Highway Statistics Summary to 1995 supersede those in Highway Statistics Summaries, 1945, 1955, 1965, 1975, and 1985, as well as the annual issues of Highway Statistics.

2/ In this partial classification a vehicle may be included more than once; for instance, a truck-tractor in farm use could appear in both columns.

3/ The figures in these columns may vary substantially from the numbers shown for prior years. This results from new information, such as the 2002 Census of Transportation Vehicle Inventory and Use Survey, and changes in the estimating procedures, and is not because of substantial vehicle registration changes during 2007. Where data reported by the States were incomplete for these vehicles, estimates were made by the

Federal Highway Administration. Truck-tractors may include some large trucks used regularly in combination with full trailers.

4/ Except for Georgia and Mississippi (Footnote 5), farm registrations are shown for all States that have a special "Farm" classification. The numbers of vehicles shown do not necessarily represent the total number or registered vehicles used on the farm. The following farm trucks, registered at a nominal fee and restricted to use in the vicinity of the owner's farm, are not included in this table: Connecticut, 6,693; New Hampshire, 10,320; New Jersey, 8,823; New York, 32,489; Pennsylvania, 25,321; and Rhode Island, 4,215.

5/ Although Georgia and Mississippi have a special "Farm" classification, their registration reports do not show a complete segregation of farm trucks from private carriers.

6/ State did not provide current data. Table displays State's 2005 data for private and commercial and state, county and municipal trucks.

1/ The numbers of private and commercial buses given here are estimates by the Federal Highway Administration of the numbers in use, rather than the registration counts of the States.

2/ This column consists primarily of publicly owned school buses but includes a few privately owned school, institutional, and industrial buses registered free or at a reduced rate. Municipally owned transit buses are included with commercial buses. This information, compiled chiefly from reports of State authorities is incomplete in many cases.

3/ In some instances church, industrial and other private buses are included here; and in other instances privately-owned school buses could not be segregated from commercial buses, and are included with the latter.

4/ State did not provide current data. Table displays State's 2005 data for private and commercial and state, county and municipal buses.

1/ The completeness of data on trailer registrations varies greatly. Data are reported to the extent available and in some cases are supplemented by estimates of the Federal Highway Administration.

2/ This column includes all commercial type vehicles and semitrailers that are in private or for-hire use.

3/ Several States do not require the registration of light farm or automobile trailers.

4/ Mobile homes and house trailers are shown in this column for States which require them to be registered and are able to segregate them from other trailers. In States where this classification is not available, house trailers are included with light car trailers.

5/ State did not provide current data. Table displays State's 2005 data for private and commercial and state, county and municipal trailers.

## FEDERAL TAX RATES ON MOTOR FUELS AND LUBRICATING OIL 1/

Termination	Sept. 30, 2011	January 1, 2005	Sept. 30, 2011	Sept. 30, 2011	↓

1/ The focus of this table is on the Federal taxes on motor fuels used on highways. The detail provided for other uses is incomplete. Most of the revenue raised by the taxes described is dedicated to the Federal Highway Trust Fund for the financing of highway and transit programs.

2/ Includes the product commonly or commercially known or sold as gasoline and suitable for use as a motor fuel with an octane level of at least 75. The gasoline tax applies to all fuel volume imported or produced. Gasoline used by State and local governments and nonprofit educational institutions is not taxed or tax is refunded if paid.

3/ Until April 1, 1983, the tax applies to all diesel fuel used in a highway vehicle registered for highway use. Diesel fuel used for farming is not taxed, or if the tax has been paid, it is fully refundable. Diesel fuel used by State and local governments and nonprofit educational institutions is not taxed or tax is refunded if paid.

4/ Special fuels include liquefied petroleum gases (propane, butane), benzol, benzene, and naphtha and other liquid (except gasoline, gasohol, and diesel fuel otherwise taxable, kerosene, gas oil or fuel oil) when used in a taxable way. The rates shown are for propane, the most commonly used special fuel. Through March 31, 1983, the tax applies to all special fuels used in a highway vehicle registered for highway use. Effective April 1, 1983, the tax applies to special fuel used in a motor vehicle or motorboat. Special fuels used for farming is not taxed, or if the tax has been paid, it is fully refundable. Special fuel used by State and local governments and nonprofit educational institutions is not taxed or tax is refunded if paid.

5/ The tax originally applied to all lubricating oil regardless of use.

6/ Gasohol was not defined in Federal tax law until January 1, 1979. The products later defined as gasohol were taxable, to the extent they existed, under the provisions of the gasoline tax. Effective January 1, 1979, gasohol was defined to be a blend of gasoline and at least 10 percent (by volume) alcohol, excluding alcohol made from petroleum, natural gas or coal. As so defined, gasohol is exempt from taxation from January 1, 1979 through March 31, 1983.

7/ Cutting oil is exempt from stated taxes. The entire tax on other lubricating oil became refundable for nonhighway use.

8/ Effective December 1, 1978, school buses along with intercity and local buses used to transport the general public for compensation on scheduled routes (or 20 or more passenger buses on nonscheduled routes) are exempt from the stated taxes for motor fuel and lubricating oil. Effective August 1, 1984, the exemption for diesel and special fuel used by these buses is 3 cents per gallon less than the prevailing rate unless used by qualified local buses which are fully exempt.

9/ Effective January 1, 1979 through March 31, 1983, the 2-cent refund or credit for nonhighway gasoline use is permitted only for off-highway business use; special fuel is taxed at the full rate except tax is 2 cents for off-highway business use, and the tax on lubricating oil is refundable only for off-highway use. Effective January 1, 1979 through December 31, 1982 the tax paid on motor fuel used in certain taxicabs is fully refundable.

10/ The diesel fuel tax is imposed on any liquid suitable for use as a fuel in a diesel-powered vehicle or train. Off-highway business use is exempt from stated taxes. Effective January 1, 1983 through September 30, 1988, a 4-cent refund can be claimed for certain taxicab use.

11/ After January 1, 1985 and before August 21, 1996, a one-time diesel differential payment is made to the original purchaser of a diesel automobile of \$102, and of a diesel truck or van, 10,000 pounds gross weight or less, \$198. The payment decreases by one-sixth for each prior model year vehicle and is not made for 1978 or earlier model year vehicles.

12/ Includes 0.1 cent per gallon tax for the Leaking Underground Storage Tank Trust Fund effective January 1, 1987. Collection of the tax was suspended for the period September 1 through December 1, 1990, and expired January 1, 1996. The fund is reinstated on October 1, 1997, and will expire on March 31, 2005.

13/ Includes 2.5 cents per gallon tax for deficit reduction.

14/ Where two rates are shown, the first is for ethanol blends and second is for methanol blends. Effective January 1, 1993, the definition of gasohol is expanded. The original definition is retained and called 10 percent gasohol and continues to be taxed at the rates shown. Blends with at least 7.7 percent alcohol but less than 10 percent are taxed at 9.942 cents and 9.48 cents. Blends with at least 5.7 percent alcohol but less than 7.7 percent are taxed at 11.022 cents and 10.68 cents. Effective October 1, 1993, the rates for 7.7 percent gasohol are 14.242 cents and 13.78 cents respectively for ethanol blends and methanol blends; the rates for 5.7 percent gasohol are 15.322 cents and 14.98 cents. Effective January 1, 1996, the rates for 7.7 percent gasohol are 14.142 and 13.68 cents respectively for ethanol and methanol blends; the rates for 5.7 percent gasohol are 15.222 and 14.88 cents.

15/ Includes 6.8 cents per gallon for deficit reduction. Effective October 1, 1995, 2.5 cents of the 6.8 cents is dedicated to the Federal Highway Trust Fund.

16/ Until October 1, 1993, compressed natural gas was not taxed. Thereafter it is taxed at 48.54 cents per thousand cubic feet for deficit reduction.

17/ Proceeds of the 4.3 cents-per-gallon tax on highway motor fuel formerly deposited in the General Fund for deficit reduction are now deposited in the Highway Trust fund effective October 1, 1997.

18/ Effective October 1, 1997, the rates for 7.7 percent gasohol are 14.242 cents and 13.78 cents respectively for ethanol blends and methanol blends; the rates for 5.7 percent gasohol are 15.322 cents and 14.98 cents.

19/ Effective October 1, 2001, the rates for 7.7 percent gasohol are 14.319 cents and 13.78 cents respectively for ethanol blends and methanol blends; the rates for 5.7 percent gasohol are 15.379 cents and 14.98 cents.

20/ Effective October 1, 2003, the rates for 7.7 percent gasohol are 14.396 cents and 13.78 cents respectively for ethanol blends and methanol blends; the rates for 5.7 percent gasohol are 15.436 cents and 14.98 cents.

21/ Several alternative fuels are taxed at reduced rates effective October 1, 1997. Liquefied petroleum gases are taxed at 13.6 cents-per-gallon, liquefied natural gas is taxed a 11.9 cents-per-gallon, and M85 (85 percent methanol and 15 percent gasoline) is taxed at 9.25 cents-per-gallon.

1/ The focus of this table is on the Federal taxes on motor vehicles and related products used on highways. The detail provided for other uses is incomplete. Most of the revenue raised by the taxes described is dedicated to the Federal Highway Trust Fund for the financing of highway and transit programs.

2/ Percent of manufacturer's sales price through March 31, 1983; percent of retailer's sales price thereafter.

3/ Percent of manufacturer's sales price to February 26, 1926; re-enacted effective June 21, 1932, on a cents-per-pound basis, but applicable to all tires and tubes, not limited to those for automotive vehicles. Tires and tubes for toys exempted effective November 1, 1951. The additional 3 cents per pound, effective July 1, 1956, and 2 cents per pound, effective July 1, 1961, apply to tires for highway vehicles only. Laminated tires are taxed 1 cent per pound effective July 1, 1965. Effective January 1, 1984, tires of 40 pounds or less are exempt.

4/ Applies to tires "of the type used on highway vehicles."

5/ The following are exempt from the stated taxes: effective November 1, 1951, house trailers; effective June 22, 1965, school buses, camper bodies, motor homes, truck and trailer bodies designed for seed, feed, and fertilizer, small three-wheeled vehicles; effective September 23, 1971, trucks, buses, and trailers 10,000 pounds or less gross weight; and, effective December 11, 1971, local transit buses in urban use and trash container bodies for trucks.

6/ The tax applies to the entire gross weight of a vehicle or combination if its gross weight exceeds 26,000 pounds. Buses used in local transit service are exempt.

7/ Although the "basic" tax on automobiles was 7 percent of the manufacturer's wholesale price until January 1, 1966, the 10-percent

rate that became effective on a temporary basis November 1, 1951 remained in effect through periodic extensions.

8/ Automobile parts and accessories are exempt from stated taxes.

9/ Taxes paid on buses purchased after April 19, 1977 are refunded. Effective December 1, 1978, bus parts and accessories are exempt and school buses along with intercity and local buses used to transport the general public for compensation on scheduled routes (or 20 or more passenger buses on nonscheduled routes) are exempt from the stated taxes for tires, tubes, and tread rubber.

10/ Although the "basic" tax is 5 percent of the manufacturer's wholesale price, the 8-percent rate that became effective on a temporary basis November 1, 1951, remained in effect through periodic extensions until the tax was repealed.

11/ The tax on nonhighway tires is 4.875 cents per pound except laminated tires are taxed at 1 cent per pound.

12/ Trucks 33,000 pounds or less gross vehicle weight, trailers 26,000 pounds or less gross vehicle weight and rail/highway trailers are exempt from stated taxes. Effective July 18, 1984, piggyback trailers are taxed at 6 percent through July 17, 1985.

13/ The effective date for the rate change for small owner-operator with 5 or fewer taxable trucks is July 1, 1985. Rate is reduced by 25 percent for logging trucks. Trucks used less than 5,000 miles (farm trucks 7,500 miles) per taxable year on public highways and trucks with gross weights under 55,000 pounds are exempt. Effective July 1, 1987, trucks based for registration purposes in Canada or Mexico shall be taxed at 75 percent of the rate before they can operate in the United States. Previously these vehicles were exempt.

1/ This table shows the tax rates for motor fuel as of December 31 for each year. Tax rates include inspection fees and environmental cleanup fees when these fees are targeted at highway fuel use and include local taxes when these taxes are uniform across all the counties in the State.

2/ Weighted average based on gross gallons taxed.

## FEDERAL HIGHWAY-USER FEES, 2007 1/

JUNE 2009

Liquefied Natural Gas	24.3	10/1/2006	22.44	1.86	-	-
Other Special Fuels 3/	18.4	10/1/2006	15.44	2.86	0.1	-
Compressed natural gas 4/	18.3	10/1/2006	15.43	2.86	-	-
Other Taxes - All Proceeds to Highway Account						
Tires 5/	Tax is imposed on tires sold by manufacturers, producers, or importers at the rate of \$.0945 (\$.04725 in the case of a bias ply or super single tire) for each 10 pounds of the maximum rated load capacity over 3,500 pounds.					
Truck and trailer sales	12 percent of retailer's sales price for tractors and trucks over 33,000 pounds gross vehicle weight (GVW) and trailers over 26,000 pounds GVW. The tax applies to parts and accessories sold in connection with the vehicle sale.					
Heavy vehicle use	Annual tax: Trucks 55,000-75,000 pounds GVW, \$100 plus \$22 for each 1,000 pounds (or fraction thereof) in excess of 55,000 pounds Trucks over 75,000 pounds GVW, \$550					
<p>1/ Source: Office of Highway Policy Information, Federal Highway Administration.</p> <p>2/ Alternative fuels include benzol, benzene, naphtha, casing head and natural gasoline, or other liquid used as a fuel in a motor vehicle except diesel, kerosene, gas oil, fuel oil, or any product taxable under the gasoline tax provisions. Beginning October 1, 2006, LPG and LNG are taxed based on their energy content relative to gasoline.</p> <p>3/ Only small amounts of revenue are collected by Internal Revenue Service for taxes on neat alcohol and some other miscellaneous sources.</p> <p>4/ Effective October 1, 2006, the tax rate for compressed natural gas is set on an energy equivalent basis to the gasoline tax of 18.3 cents per gallon. Per IRS Notice 2006-92, the energy equivalent rate is 18.3 cents per 126.67 cubic feet. This rate would be equivalent to \$1.44 per thousand cubic feet.</p> <p>5/ Section 1401 of the Taxpayer Relief Act of 1997 replaced a mechanism by which the fair market value of tires exceeding 40 pounds was deducted from the fair market value of a truck and replaced it with a credit for the excise tax paid. This provision was effective January 1, 1998.</p>

1/ The highway use of fuel shown in this table was used in the development of 2007 Tables FE-9 and FE-221. The data reflect revisions made since the publication of "Highway Statistics, 2006."

2/ As of January 1, 2005, the United States Treasury does not collect Gasohol revenue as a separate item. Now, Gasohol is included in Gasoline.

3/ Puerto Rico is not included in the percent share distribution.

1/ This table includes data on all motor fuels subject to State motor-fuel taxes except special fuels (fuels other than gasoline and gasohol) used for nonhighway purposes. It is not intended to reflect the amount of fuel used on highways. For some States, data are not comparable to prior years due to changes in data analysis and/or improvements in reporting procedures. All data are subject to further review and revision.

2/ Export sales and other amounts not consumed as motor fuel in the State have been excluded wherever possible.

3/ Includes Federal use, other public use, certain transit use, nonhighway use where initial exemptions rather than refunds were made, and allowances for evaporation and other losses.

4/ Tax rates are as of December 31, 2007.

5/ In some States, fuel used for specific purposes is taxed or refunded at rates other than the prevailing rates shown in Table MF-121T. In the case of aviation fuel, only aviation gasoline is included.

6/ Vehicles consuming special fuels and paying mileage tax to the Public Utility Commissioner are not required to pay the motor-fuel tax. Fuel volume reported here includes only the volume on which the motor-fuel tax has been paid. For total highway use of special fuels, see table MF-21.

# MOTOR-FUEL USE - 2007 1/

July 2009

(THOUSANDS OF GALLONS)

TABLE MF-21

1/ This table is one of a series giving an analysis of motor-fuel consumption, based on reports from State motor-fuel tax agencies. Gasohol is included with gasoline. In order to make the data uniform and complete, public use and nonhighway use were estimated by the Federal Highway Administration. These estimates may not be comparable to data for prior years due to revised estimation procedures. The resulting volumes differ in many cases from the unadjusted data reported in table MF-2. For some States, data are not comparable to prior years due to changes in data analysis and/or improvements in reporting procedures. All data are subject to review and revision.

2/ Losses by destruction, where reported separately, are included in this column. All other losses are considered part of a State's attribution.

**PRIVATE AND COMMERCIAL NONHIGHWAY USE OF GASOLINE - 2007 1/**

1/ This table is one of a series giving an analysis of motor-fuel consumption. A complete and uniform classification of nonhighway use is not possible due to differences among the States as to what classes of nonhighway use are eligible for exemptions or refunds and because some eligible refunds are not applied for. In order to make the data uniform and complete, nonhighway uses of gasoline were estimated by the Federal Highway Administration or data were obtained from other sources. These estimates may not be comparable to data for prior years due to revised estimation procedures. All data are subject to review and revision. Figures in bold type are State-reported data.

2/ Excludes aviation jet fuel.

3/ An amount is shown in this column only when reported by the State and when it could be determined that the State-reported figure did not include fuel represented in other categories.

1/ This table shows gross volume of gasoline reported by wholesale distributors in each State. The data are taken from State taxation reports and may reflect time lags of 6 weeks or more between the wholesale and retail levels. The data include highway use, nonhighway use, and losses. The gross volume shown in this table will not agree with that in table MF-21. Table MF-21 reflects adjustments made to eliminate exports and military use and to limit percentage loss allowances to a maximum of 1 percent. In States where jet fuel was initially included with aviation gasoline, the jet fuel has been deducted.

2/ The total may not equal the sum of the months due to independent rounding.

## TAX RATES ON MOTOR FUEL - 2007<sup>1</sup>

TABLE MF-121T  
SHEET 2 OF 2

OCTOBER 2008

STATE	SALES TAX	
	PERCENT	REMARKS
Alabama	4	Applies to fuel not taxable under volume tax laws.
Arizona	5.6	Applies to fuel not taxed under the motor-fuel or fuel use taxes. Liquefied petroleum gas sold, used or stored in State is exempt.
Arkansas	5.1	Special fuel for municipal buses and gasoline are exempt.
California	6	Applies to sales price including Federal and State motor-fuel taxes.
Colorado	2.9	Applies to fuel not taxable under volume tax laws.
Connecticut	6	A Petroleum Products Gross Earnings tax is applied to many petroleum products, in addition to the per gallon taxes shown on Sheet 1.
Dist. of Col.	5.8	Applies to fuel not taxable under volume tax laws.
Georgia	4	A 3-percent "second motor-fuel tax" and a 1-percent sales tax apply to sales price including Federal motor-fuel tax.
Hawaii	4	Applies to sales price excluding Federal and State motor-fuel taxes. Alcohol fuels are exempt.
Idaho	5	Fuels subject to the motor fuel volume tax are exempt.
Indiana	6	Applies to sales price excluding Federal and State motor-fuel taxes.
Iowa	5	Applies to fuel not taxable under fuel tax laws, including those fuels taxable, then subject to refund.
Kansas	5.3	Applies to fuels not taxable under the volume tax laws.
Kentucky	6	Applies to sales price, exclusive of Federal tax, of fuels not taxable under the volume tax laws.
Louisiana	4	Fuels subject to volume tax are exempt. Gasohol is exempt if alcohol produced in State.
Maine	5	Applies to motor fuel not taxed at the maximum rate for highway use under the volume tax laws.
Maryland	5	Applies to fuels not taxable under Maryland motor fuel tax laws, unless statutorily exempt from the sales and use tax.
Massachusetts	5	Applies to fuels not taxable under the volume tax laws.
Michigan	6	Applies to sales price including Federal volume tax except when used in a passenger vehicle with capacity of 10 or more for hire over regularly scheduled routes in State.
Minnesota	6.5	Applies to fuels not taxable under the volume tax laws.
Nebraska	5.5	Gasoline is exempt. Diesel and alternative fuels subject to the volume tax are exempt.
New Mexico	5	Applies to fuels not taxable under the volume tax laws. Ethanol blends deductible under the gasoline tax laws are exempt.
New York	4	Applies to sales price including Federal motor-fuel tax.
North Dakota	5	Applies to fuels not taxable under the volume tax laws.
Ohio	5	Applies to fuels not taxable under the volume tax laws.
Oklahoma	4.5	Applies to fuels not taxable under the volume tax laws.
Pennsylvania	6	Applies to fuels not taxable under the volume tax laws.
South Carolina	5	Applies to sales price of aviation gasoline only.
South Dakota	4	Applies to fuels not taxable under the volume tax laws.
Tennessee *	7	Gasoline on which the volume tax has been paid and not refunded and motor fuel subject to the use fuel tax are exempt.
Texas	6.3	Applies to fuels not taxed or exempted under other laws.
Utah	4.8	Applies to fuels not taxable under the volume tax laws.
Washington	6.5	Applies to fuels not taxable under the volume tax laws. Certain providers of public transportation of handicapped persons are exempt.
Wisconsin	5	Applies to fuels not taxable under the volume tax laws.
Wyoming	4	Applies to sales price of LPG. Gasoline and diesel subject to volume tax are exempt.

1/ This table shows motor-fuel tax rates in effect as of January 1, and any subsequent changes that have occurred through the date shown in the title. Only taxes that are levied as a dollar amount per volume of motor fuel are included on sheet 1. Taxes that apply to all petroleum products without distinguishing motor fuel are omitted. Local option taxes are included only when they have been adopted uniformly Statewide. For States marked with an asterisk, see the notes below:

Alabama - The gasoline, gasohol, and diesel rates include a 2¢ per gallon inspection fee. Alabama-registered LPG vehicles pay an annual fee based on vehicle type in lieu of the volume tax. Arizona-The fuel tax on diesel remains at 18 cents per gallon for light and exempt vehicles, but is set at 27 cents per gallon if used to propel a truck with more than two axles or with a declared gross vehicle weight over 26,000 pounds.

Arkansas - The gasoline, gasohol, and diesel rates include 0.4 ¢ per gallon Environmental Assurance Fee. Applicants for LPG user permits must pay a fee in lieu of the volume tax.

California - LPG users may pay an annual fee in lieu of the volume tax.

Colorado - Owners of LPG vehicles registered in the State must pay an annual fee in lieu of the volume tax.

Connecticut - The tax is computed at 5% of the gross earnings from the first sale of a petroleum product in the State.

Florida - Tax rates are variable, adjusted annually. For gasoline and gasohol, in addition to the rates shown, there is a State-imposed State Comprehensive Enhanced Transportation System (SCETS) tax that varies by county from 0-5.0¢ per gallon. All counties levy the SCETS tax on gasoline, but a few levy less than the maximum rate. LPG vehicles registered in the State pay an annual fee in lieu of the tax on alternative fuels and the SCETS tax. For the month of August, 2004, the gas tax temporarily drops 8 cents

Idaho - LPG users may pay an annual fee based on vehicle weight in lieu of volume tax.

Illinois - Motor carriers pay an additional 6.3¢ per gallon on gasoline, 6.5¢ on diesel, and 5.9¢ on LPG.

Indiana - Motor carriers pay an additional 11¢ per gallon. LPG vehicles pay an annual fee.

Iowa - effective 7/1/2002, motor fuel tax rates will be adjusted annually based on the amounts of ethanol blended gasoline being sold and distributed annually.

Kansas - LPG users may pay an annual fee based on mileage and gross vehicle weight in lieu of the volume tax.

Kentucky - Tax rates are variable, adjusted quarterly. A 2% surtax is imposed on gasoline and 4.7% on special fuels for any vehicle with 3 or more axles. The gasoline, gasohol, and diesel rates include 1.4¢ per gallon Petroleum Environmental Assurance Fee.

Louisiana - Owners of LPG vehicles of 10,000 pounds or less gross vehicle weight pay an annual fee based on mileage.

Maine - Rates are variable, adjusted every February based on past years Consumer Price Index. Rates are effective on the following July 1.

Michigan - For vehicles defined under the Motor Carrier Fuel Tax Act, diesel fuel is discounted 6 cents per gallon at the pump; and is assessed a 12 cents per gallons surcharge on a quarterly return, with a provision for a 6 cent per gallon refund on fuel purchased in Michigan.

Minnesota - There is a credit to the wholesaler of 15¢ per gallon of alcohol used to make gasohol.

Mississippi - The gasoline, gasohol, and diesel rates include 0.4¢ per gallon dedicated to the Groundwater Protection Trust Fund.

Missouri - LPG vehicles 18,000 pounds or less gross vehicle weight registered in the State pay an annual fee in lieu of the volume tax.

Montana - LPG vehicles registered in the State pay an annual fee based on gross weight in lieu of the volume tax. Out-of-State vehicles purchase trip permits. There is an alcohol distiller credit of 30¢ per gallon of alcohol produced in the State with State agricultural products and used to make gasohol.

Nebraska - Rates are variable, adjusted quarterly. The gasoline and gasohol include 0.6¢ per gallon and diesel rate includes 0.2¢ per gallon Petroleum Release Remedial Action Fee. Effective 1/1/2002, new Nebraska ethanol production facilities may receive an ethanol production credit equal to 18 cents per gallon of ethanol used to fuel motor vehicles.

New Hampshire - The gasoline, gasohol, and diesel rates include 0.7¢ per gallon Oil Discharge and Disposal Cleanup Fee. Alternative fuel vehicles pay twice the usual registration fee in lieu of the volume tax.

New Jersey - In addition to the rates shown, there is a Petroleum Products Gross Receipts Tax. The tax is computed on a cents-per-gallon basis and is applicable to a wide variety of petroleum products.

New Mexico - The gasoline, gasohol, and diesel rates include the Petroleum Products Loading Fee of \$150 per 8,000 gallons (1.875¢ per gallon). Rate was \$80 per 8,000 gallons (1¢ per gallon) prior to 7/1/96. Owners of LPG-powered vehicles up to 54,000 pounds gross vehicle weight may pay an annual fee in lieu of the volume tax.

New York - Rates are variable, adjusted annually. Rates include the Petroleum Business Tax of 14.6¢ per gallon. The gasoline rate includes a 0.5 mill (0.05¢) per gallon Petroleum Testing Fee.

North Carolina - Rates are variable, adjusted semiannually.

North Dakota - A special excise tax of 2% is imposed on all sales of special fuel (diesel or LPG) that are exempted from the volume tax if the fuel is sold for use in the State. There is a producer credit of 40¢ per gallon of agriculturally derived alcohol produced in the State and used to make gasohol.

Ohio - Commercial vehicles formerly subject to the highway use tax pay an additional 3¢ per gallon. Dealers are refunded 10¢ per gallon of each qualified fuel (ethanol or methanol) blended with unleaded gasoline.

Oklahoma - Rates shown include 1¢ per gallon tax dedicated to the Petroleum Underground Tank Release Environmental Cleanup Indemnity Fund. When the Fund reaches specified balance, future tax revenues will be deposited in a highway fund. The gasoline, gasohol, and LPG rates include 0.08¢ for fuel inspection. LPG users may pay an annual fee in lieu of the volume tax.

Oregon - The diesel and LPG rates shown are paid by users for vehicles not under the jurisdiction of Public Utility Commissioner. Vehicles under the jurisdiction of the Public Utilities Commissioner and paying motor-carrier fees are exempt from payment of the motor-fuel tax.

Pennsylvania - The rates include the Oil Franchise Tax for Maintenance and Construction, a variable rate tax adjusted annually. LPG rate is based on the gasoline gallon equivalent.

Rhode Island - Rates include 1¢ per gallon tax for the Underground Storage Tank Financial Responsibility Fund.

South Dakota - There is a credit at the rate of the gasoline tax to distributors blending gasoline with ethanol to produce gasohol. There is also a producer incentive payment of 20¢ per gallon.

Tennessee - LPG users without permits must pay in advance at the beginning of the fiscal year; others pay quarterly. Fee is based on vehicle weight and fuel efficiency. Sales tax rate on aviation fuel is 4.5 percent.

Texas - Owners of LPG vehicles registered in the State must pay an annual fee in lieu of the volume tax.

Utah - LPG is tax exempt if user purchases annual exemption certificate.

Vermont - Diesel vehicles 10,000 pounds and over pay 26¢ per gallon. LPG vehicles are subject to a registration fee 1.75 times the usual fee. The gasoline, gasohol, and diesel rates include 1¢ per gallon for the Petroleum Cleanup Fund.

Virginia - Vehicles weighting 26,000 pounds or more or having 3 or more axles pay an additional 3.5¢ per gallon.

Washington - Owners of LPG vehicles pay an annual fee.

West Virginia - Rates are variable, adjusted annually.

Wisconsin - Rates are variable, adjusted annually.

Wyoming - LPG is subject to sales tax. The gasoline, gasohol, and diesel rates include 1¢ for the Underground Storage Tank Corrective Action Account.

2/ The gasohol rates shown are for gasoline blended with 10 percent ethanol.

1/ This table includes the revenues from State taxes on all motor-vehicle fuels and related receipts in connection with motor-fuel taxation and administration. In many States, however, the tax on special fuels (fuels other than gasoline and gasohol) is applicable only to the amount used on the highways. For the States that apply the tax to all fuel sold, the revenue and refunds covering the nonhighway portion of these special fuels have been excluded. All data are subject to further review and revision.

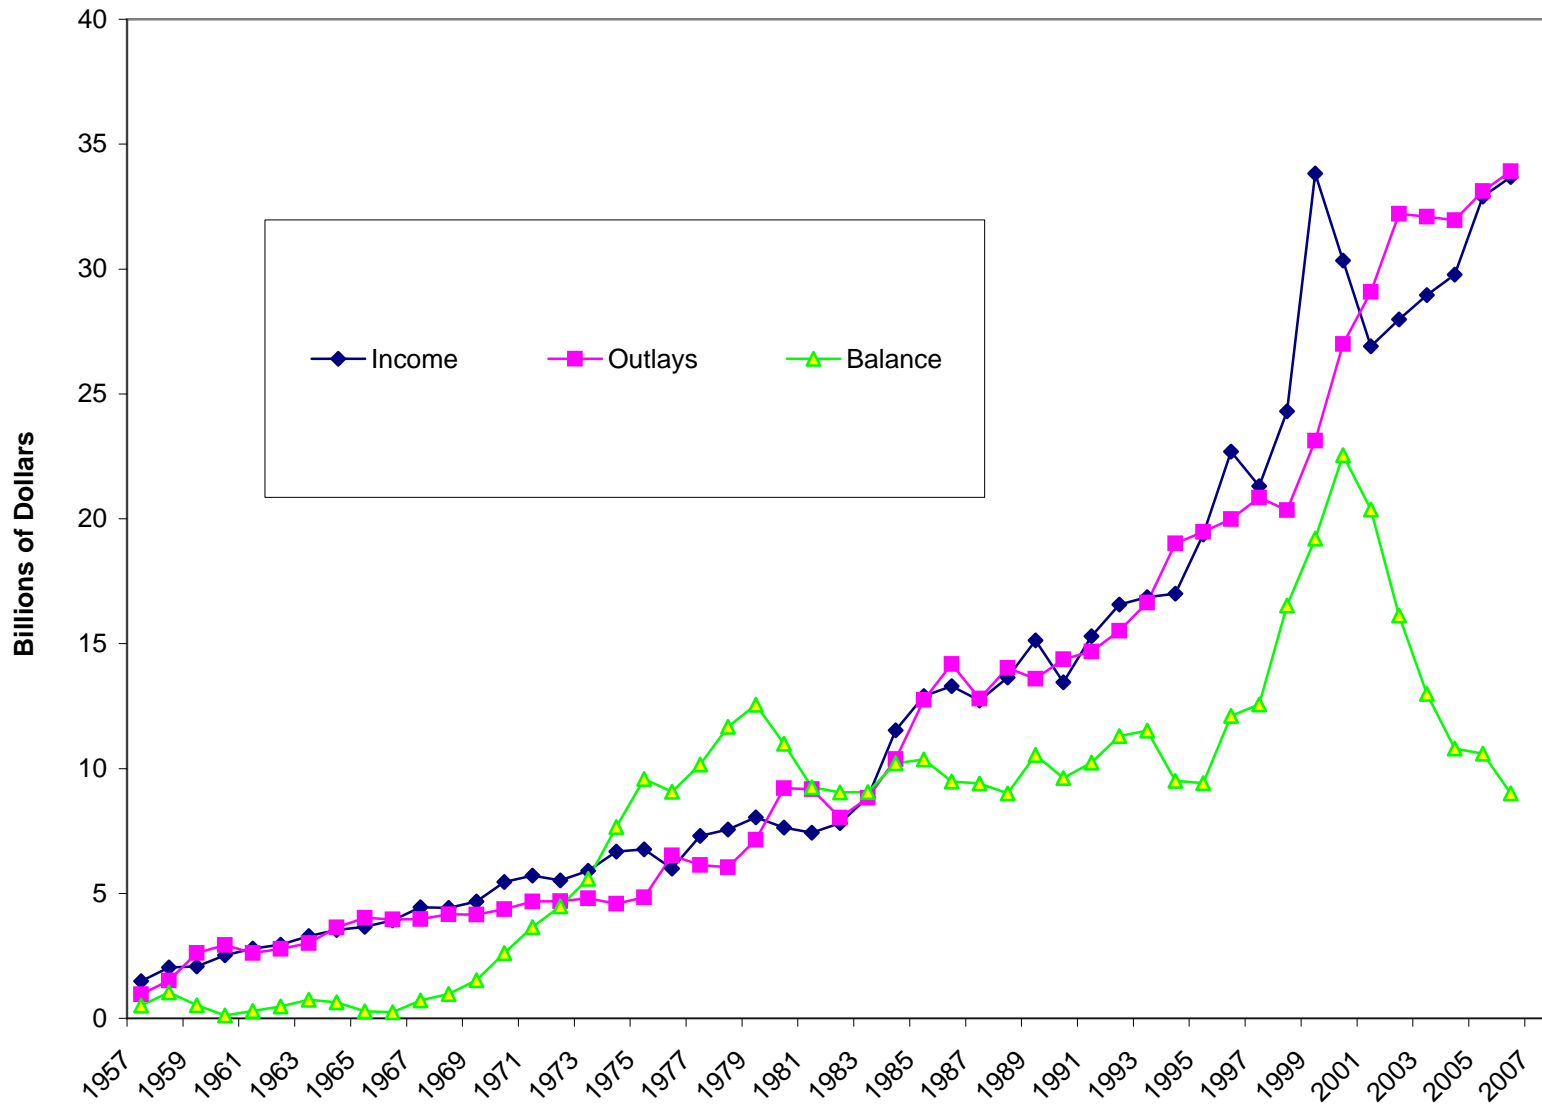

2/ Includes, in some States, receipts in the form of tax credits for refund claims accepted by distributors acting as agents of the State and refund credits to users who are licensed as distributors.

3/ Tax rates are as of December 31, 2007.

4/ These are proceeds from taxes on nonhighway uses of gasoline dedicated for the improvement of facilities other than highways. They are generally revenues from taxes on gasoline for aviation and motorboat use, but in some States, include taxes on gasoline used in off-highway recreational vehicles and snowmobiles. In California, receipts from the tax on gasoline used for agricultural purposes are included.

5/ These are fees for inspection of motor-vehicle fuel. Insofar as possible, fees for inspection of fuels not used on highways have been eliminated.

# STATUS OF THE HIGHWAY ACCOUNT OF THE HIGHWAY TRUST FUND As Of September 30, 2007

1/ All amounts are net after payment of refund and transfers. See Tables FE-101A and FE-101B for explanation of the various taxes deposited in the Trust Fund.

2/ Totals may not equal sum of parts due to independent rounding.

3/ The transition quarter includes the months of July, August, and September 1976.

4/ Includes refunds of repealed taxes on inner tubes, tread rubber, lubricating oil, and truck parts and accessories.

5/ Page one columns on inner tubes, tread rubber, and Lubricating Oil are removed from page 2 (no longer applicable)

6/ Fines and penalties, TIFIA loans, and interest income.

<p>1/ This table summarizes data reported in greater detail in the FA, FE, SF, and LGF table series. Some data are preliminary.</p> <p>2/ Includes the Mass Transit Account of the Highway Trust Fund. Also includes Federal Highway Administration activities funded by general funds and all other agencies and funds that make appropriations for highways or that receive highway-user revenues. See Table FA-5 for additional information.</p> <p>3/ Data for local governments are estimated. Amount reported for General Fund Appropriations in the Local column includes some State funds that could not be identified.</p> <p>4/ Federal column amount represents transfers to the Leaking Underground Storage Tank Trust Fund and the Federal General Fund.</p> <p>5/ Includes only those collection and administrative costs paid from motor-fuel and motor-vehicle tax receipts. Operational costs of toll facilities are reported as traffic services. Federal collection expenses are excluded since they are paid for by the General Fund. Local expenses are excluded, because local motor-fuel and motor-vehicle tax data are reported net of collection expenses.</p> <p>6/ Amounts shown represent Federal payments to territories, and Federal expenditures in territories for highways and mass transit.</p> <p>7/ Proceeds and redemptions of short-term notes and refunding issues are excluded.</p> <p>8/ Negative numbers indicate that funds were placed in reserves.</p> <p>9/ Includes small amounts of engineering and equipment costs not charged to capital outlay and maintenance.</p>							

**STATUS OF THE FEDERAL HIGHWAY TRUST FUND 1/  
FISCAL YEAR ENDED SEPTEMBER 30, 2007**

SEPTEMBER 2008

TABLE FE-10

ITEM	HIGHWAY ACCOUNT	MASS TRANSIT ACCOUNT 2/	TOTAL
<b>I. Opening balance: 3/</b>			
A. Investments - U.S. Treasury special certificates of Indebtedness	5,526,717,000.00	5,470,938,000.00	10,997,655,000.00
B. Uninvested - held by Bureau of Public Debt	1,906,494,164.03	264,713,223.98	2,171,207,388.01
C. Uninvested - held by program agencies	1,580,805,508.58	487,824,086.27	2,068,629,594.85
D. Total balance	9,014,016,672.61	6,223,475,310.25	15,237,491,982.86
<b>II. Receipts:</b>			
A. Gross excise taxes (transferred General Fund receipts)			
1. Gasoline	21,447,824,000.00	3,971,133,000.00	25,418,957,000.00
2. Diesel and special motor fuels	8,938,442,119.00	1,193,361,269.00	10,131,803,388.00
3. Tires	460,957,000.00	0.00	460,957,000.00
4. Trucks and trailers	3,809,479,000.00	0.00	3,809,479,000.00
5. Federal use tax	1,031,884,000.00	0.00	1,031,884,000.00
6. Total excise taxes	35,688,586,119.00	5,164,494,269.00	40,853,080,388.00
B. Deduct - reimbursement to General Fund receipts (refunds and tax credits)			
1. Diesel	591,165,133.00	27,634,535.00	618,799,668.00
2. Gasoline	395,200,000.00	26,136,000.00	421,336,000.00
3. Total	986,365,133.00	53,770,535.00	1,040,135,668.00
C. Transfers to other funds			
1. To Land and Water Conservation Fund	844,000.00	156,000.00	1,000,000.00
2. To Sport Fish Restoration and Boating Trust Fund	410,155,000.00	56,848,000.00	467,003,000.00
3. Total	410,999,000.00	57,004,000.00	468,003,000.00
D. Net excise taxes	34,291,221,986.00	5,053,719,734.00	39,344,941,720.00
E. Other income			
1. Motor carrier safety fines and penalties	16,868,606.83	0.00	16,868,606.83
2. Interest under Cash Management Improvement Act (net)	1,837,063.00	(79.00)	1,836,984.00
3. Total	18,705,669.83	(79.00)	18,705,590.83
F. Total receipts	34,309,927,655.83	5,053,719,655.00	39,363,647,310.83
<b>III. Transfers between Highway Trust Fund accounts</b>			
A. From Highway Account to Mass Transit Account	(247,197,252.00)	247,197,252.00	0.00
B. From Mass Transit Account to Highway Account	12,918,660.00	(12,918,660.00)	0.00
C. Total	(234,278,592.00)	234,278,592.00	0.00
<b>IV. Expenditures:</b>			
A. Federal Highway Administration			
1. Federal aid to highways	33,707,775,479.42	0.00	33,707,775,479.42
2. Right-of-way revolving fund	21,019.17	0.00	21,019.17
3. Appalachian Development Highway System	1,978,186.77		1,978,186.77
3. Miscellaneous Highway Trust Funds	157,996,322.12	0.00	157,996,322.12
4. Total	33,867,771,007.48	0.00	33,867,771,007.48
B. Federal Motor Carrier Safety Administration	455,212,595.72	0.00	455,212,595.72
C. Federal Transit Administration	0.00	4,205,687,783.56	4,205,687,783.56
D. National Highway Traffic Safety Administration			
1. Highway related safety grants	0.00	0.00	0.00
2. Operations and research	235,381,920.37	0.00	235,381,920.37
3. Highway traffic safety grants	416,241,297.06	0.00	416,241,297.06
4. National driver register	4,539,699.82	0.00	4,539,699.82
5. Total	656,162,917.25	0.00	656,162,917.25
E. Federal Railroad Administration	0.00	0.00	0.00
F. Other agencies	87,268.55	0.00	87,268.55
G. Total expenditures	34,979,233,789.00	4,205,687,783.56	39,184,921,572.56
<b>V. Closing Balances in Trust Fund:</b>			
A. Investments			
U. S. Treasury special certificates of indebtedness	5,409,639,000.00	6,794,905,000.00	12,204,544,000.00
B. Undisbursed balances			
1. Uninvested - held by Bureau of Public Debt	2,241,318,609.83	305,465,878.98	2,546,784,488.81
2. Uninvested - held by program agencies			
a. Federal aid to highways	147,064,503.10	0.00	147,064,503.10
b. Right-of-way revolving fund	14,410,157.55	0.00	14,410,157.55
c. Miscellaneous highway trust funds	28,605,901.29	0.00	28,605,901.29
d. Appalachian Development Highway System	8,490,696.02	0.00	8,490,696.02
e. Federal Motor Carrier Safety Administration	92,789,211.49	0.00	92,789,211.49
f. Federal Transit Administration	0.00	205,414,894.71	205,414,894.71
g. National Highway Traffic Safety Administration	165,165,302.16	0.00	165,165,302.16
h. Federal Railroad Administration	312,151.02	0.00	312,151.02
i. Other agencies	2,636,414.98	0.00	2,636,414.98
j. Total	459,474,337.61	205,414,894.71	664,889,232.32
3. Total uninvested balance	2,700,792,947.44	510,880,773.69	3,211,673,721.13
C. Total balance	8,110,431,947.44	7,305,785,773.69	15,416,217,721.13

1/ The Fund was created June 29, 1956, by the enactment of the Highway Revenue Act of 1956.

2/ The Mass Transit Account was established April 1, 1983, by the Surface Transportation Assistance Act of 1982.

3/ The opening balance reflects adjustments made to the FY 2006 closing balance.

## DISPOSITION OF HIGHWAY-USER REVENUES, ALL LEVELS OF GOVERNMENT - 2007 1/

(THOUSANDS OF DOLLARS)

TABLE H/F

STATE	HIGHWAY-USER REVENUES AVAILABLE FOR DISTRIBUTION				DISPOSITION OF HIGHWAY-USER REVENUES										GRAND TOTAL DISTRIBUTED

1/ This table summarizes highway-user revenues and their disposition for all levels of government. See Tables SF and LDF for details on State and local imposts.  
2/ Total Federal receipts based on gross tax liabilities and refunds reported by the U.S. Department of the Treasury. Payments attributable to highway users in each State are estimated by the Federal Highway Administration (FHWA).  
3/ Amounts shown for each State include only those transfer payments and direct Federal work, which are funded by the Highway Trust Fund's highway-user revenues, rather than Trust Fund interest income, or general funds. See Table FA-21 for full details on Federal funding of highways.  
4/ Payments to each State are partially estimated based on each State's percentage of total obligations for transit.  
5/ Amounts shown represent total Federal highway-user revenues collected in each State less amounts received

by the State from the Highway Trust Fund for highways and mass transportation. States with negative numbers receive more from the Highway Trust Fund than the amount of collections attributed to those States.

6/ Gross allocations of highway-user revenues to State general funds were reduced by the amount of appropriations for highways from State general funds. See Table DF for details.

7/ Amounts shown represent direct Federal expenditures that can not be attributed to any single State and the net increase or decrease in the Highway and Mass Transit Accounts of the Highway Trust Fund. See Tables FA-21 and HF-10 for more details.

8/ Data for Territory imposed taxes are excluded. See Table R-1.

1/ Payments into the Fund include only the net highway user tax receipts and fines and penalties deposited in the Highway Account of the Federal Highway Trust Fund. Excluded are motor fuel tax amounts transferred to: the Mass Transit Account of the Highway Trust Fund; and the Leaking Underground Storage Tank Trust Fund. In addition, amounts representing motor-boat use of gasoline are transferred to the Aquatic Resources Trust Fund and the Land and Water Conservation fund.

2/ Total Federal Highway Trust Fund receipts (for apportionment purposes only) are reported by the U.S. Department of the Treasury. Payments into the Highway Trust Fund attributable to highway users in each State are estimated by the Federal Highway Administration.

3/ Includes all funds apportioned or allocated from the Highway Trust Fund except where FHWA does not directly allocate the funds to the States, e.g., portions of Indian Reservation Roads and safety programs.

1/ Tables SF-1 and SF-2 show the receipts and disbursements State for highways. See Table SF-21 for general note on SF series. This table is compiled from reports of State authorities.

2/ Any differences between beginning balances and the closing balances on last year's Table SF-2 are the result of accounting adjustments, inclusion of funds not previously reported, etc.

3/ Amounts shown represent only those highway-user revenues that were expended on State or local roads.

4/ See Table SDF for the full amount of and disposition of highway-user revenues.

5/ Amounts shown represent gross general fund appropriations for highways reduced by the amount of highway-user revenues placed in the State General Fund.

6/ This State did not report 2007 data for Motor-Vehicle & Motor Carrier Taxes; the table displays 2006 data.

7/ This State did not report 2007 data; the table displays 2006 data.

<p>1/ Tables SF-3B and SF-4B are concerned solely with receipts and disbursements for State and quasi-State toll facilities. See Tables LGF-3B and LGF-4B for data on public and quasi-public facilities operated by or for local governments. See Tables SB-2T and SB-3T for information on toll facility bond indebtedness. See Table SF-21 for general note on SF table series. This table is compiled from reports of State authorities.</p> <p>2/ Any differences between beginning balances and previous year's closing balances are the result of accounting adjustments, or inclusion of funds not previously reported.</p> <p>3/ Include the Carquinez, Benicia-Martinez, Antioch, Richmond-San Rafael, San Francisco-Oakland Bay, San Mateo-Hayward, and Dumbarton Bridges.</p> <p>4/ Includes Chesapeake Bay, Francis Scott Key, Potomac River and Susquehanna River Bridges; Baltimore Harbor and Fort McHenry Tunnels.</p> <p>5/ The Massachusetts Turnpike Authority submitted an 18-month audit report. The report covers the period from</p>	<p>January 1, 2007 to June 30, 2008. The Authority changed from calendar year to fiscal year reporting.</p> <p>6/ Includes the Trenton-Morrisville, New Hope-Lambertville, Interstate 78, Easton-Phillipsburg, Portland-Columbia, and Milford-Montague Bridges.</p> <p>7/ Includes the Newburgh-Beacon, Mid-Hudson, Rip Van Winkle, Kingston-Rhinecliff and Bear Mountain Bridges.</p> <p>8/ Includes the George Washington, Bayonne and Goethals Bridges; Holland and Lincoln Tunnels.</p> <p>9/ Includes the Cherry Branch, Hatteras, Ocracoke, Ocracoke-Cedar Island, Orakoke Swan Quarter, and South Port.</p> <p>10/ Includes the Walt Whitman, Ben Franklin, Betsy Ross and Commodore Barry Bridges.</p> <p>11/ Tolls were removed from the Mount Hope Bridge effective May 1, 1998.</p> <p>12/ Full name of the authority is West Virginia Parkways, Economic Development and Tourism Authority.</p>

1/ This table summarizes the receipts for publicly owned toll facilities operated by local governments, local road and bridge districts and specially created authorities. See Table LGF-21 for general note on local highway finance series. This table is compiled from reports of local authorities.

2/ Lee County Bridges consists of the Cape Coral Bridge, the Midpoint Bridge,

and the Sanibel Bridge and Causeway.

3/ Toll data estimated by FHWA.

4/ Harris County Toll Facilities consist of the Harris County Toll Road and the Jesse Jones Memorial Toll Bridge.

1/ This table summarizes local governments' receipts from motor-fuel taxes, motor-vehicle fees, special imposts on motor carriers, and tolls. This table includes receipts from State imposts that are transferred to local governments for distribution. See Tables LGF-21 and LGF-3B for details. Local government reporting is on a biennial basis with even-numbered years optional. This table is compiled from reports of State and local governments.

2/ D. C. is excluded as there are no local jurisdictions within the District of Columbia.

3/ Differences between amounts shown here and in the "Highway Statistics, 2007" Tables DF and SF-5A are caused by State delays in transferring revenues dedicated to local governments, and by local governments' reallocations of State funds.

4/ Estimated by FHWA.

1/ This table is one of a series on Local Highway Finance. Table LGF-21 summarizes the receipts and disbursements of local governments for highways. Local government reporting is on a biennial basis with even-numbered years optional. This table is compiled from the reports of State and local governments.

2/ D. C. is excluded as there are no local jurisdictions within the District.

3/ The amounts shown are identical with the receipts allocated for highways as shown on Table LDF.

See Table LDF for allocations for mass transit, and nonhighway purposes.

4/ Bonds issued for and retired by refunding are excluded. Tables LGF-1 and LGF-2 include original and refunding issues. See Table LGB-2 for further information on the status of local highway debt.

5/ Estimated by FHWA.

1/ Tables LGF-1 and LGF-2 summarize the receipts and disbursements for highways by local governments, including toll facilities. See Table LGF-21 for general note on local series.

Local government reporting is on a biennial basis with even-numbered years optional. This table is compiled from the reports of State and local governments.

2/ D. C. is excluded as there are no local jurisdictions within the District of Columbia.

3/ Excludes proceeds from the sale of short term issues (notes). See Table LGB-2 for additional information on local government debt for roads and streets.

4/ See Table LDF for gross receipts and distributions of highway-user revenues, including local toll receipts.

5/ Estimated by FHWA.

6/ Although most local roads and streets are under State control, local governments may raise and expend money on these roads and streets. State expenditures on these roads and streets are included in State Highway Finance Table series.

1/ Table summarizes State indebtedness from all State bond issues, including the toll facility issues shown in table SB-2T and the State issues for local roads shown in Table SB-2L. This table is compiled from reports of State authorities.

2/ Amounts in this column represent funds available for future principal and interest payments.

3/ This State did not report 2007 data; the table displays 2006 data.

4/ Amounts in this column may have different balances due to adjustments made in prior year data.

**CHANGE IN INDEBTEDNESS OF STATE-ADMINISTERED TOLL ROAD AND CROSSING FACILITIES - 2007 1**

1/ This table summarizes debt status of State and quasi-State toll facilities. Only facilities with outstanding bonds are included.

2/ See Table SF-3B for names of bridges and tunnels included.

3/ Amounts in this column include all funds available for future principal and interest payments.

4/ The Massachusetts Turnpike Authority submitted an 18-month audit report. The report covers the period from January 1, 2007 to June 30, 2008. The Authority changed from calendar year to fiscal year reporting.

1/ Table summarizes State receipts and disbursements for debt service of all State bond issues, including the toll facility issues shown in table SB-3T and the State issues for local roads shown in Table SB-3L. See Table SB-1 for general note on SB table series. This table is compiled from reports of State authorities.

2/ Any differences between beginning balance and last year's closing balance are the result of accounting adjustments, or inclusion of funds not previously reported

3/ May include general funds, other State taxes, Federal funds and local funds

1/ This table summarizes debt status of State and quasi-State toll facilities. Only facilities with outstanding bonds are included.

2/ See Table SF-3B for names of bridges and tunnels included.

3/ Amounts in this column includes all funds available for future principal and interest payments

4/ The Massachusetts Turnpike Authority submitted an 18-month audit report. The report covers the period from January 1, 2007 to June 30, 2008. The Authority changed from calendar year to fiscal year reporting

1/ This table summarizes the change in status of the highway obligations of local government including toll authorities. See Table LGF-21 for general note on local highway finance series. Local government reporting is on a biennial basis with even-numbered years optional. This table is compiled from the reports of State and local governments.

2/ D. C. is excluded as there are no local jurisdictions within the District of Columbia

3/ Any difference between amount outstanding at beginning of the year and the amount

outstanding at the end of the previous year may have resulted from accounting adjustments changes in reporting year, rounding, etc

4/ Estimated by FHWA.

5/ Although most local roads and streets are under State control, local governments may raise and expend money on local roads and streets. State expenditures on these roads and streets are included in State Highway Finance Table series

**CHANGE IN INDEBTEDNESS DURING YEAR, LOCAL TOLL FACILITIES - 2006 1/**

1/ This table summarizes the debt status of publicly owned toll facilities operated by local governments, local road and bridge districts and specially created authorities. Only facilities with outstanding bonds are included.

2/ Lee County Bridges consists of the Cape Coral Bridge, the Midpoint Bridge, and the Sanibel Bridge and Causeway.

3/ Toll data estimated by FHWA.

4/ Facility is also responsible for approximately \$3.0 billion of bonds issued for mass transit purposes.

5/ Harris County Toll Facilities consists of the Harris County Toll Road and the Jesse Jones Memorial Toll Bridge.

# Obligation of Federal Funds for Roadway Projects 1/

(Thousand of Dollars)

Obligation of Federal Funds for Roadway projects averaged \$15.6 billion per year for 2005, 2006, and 2007.

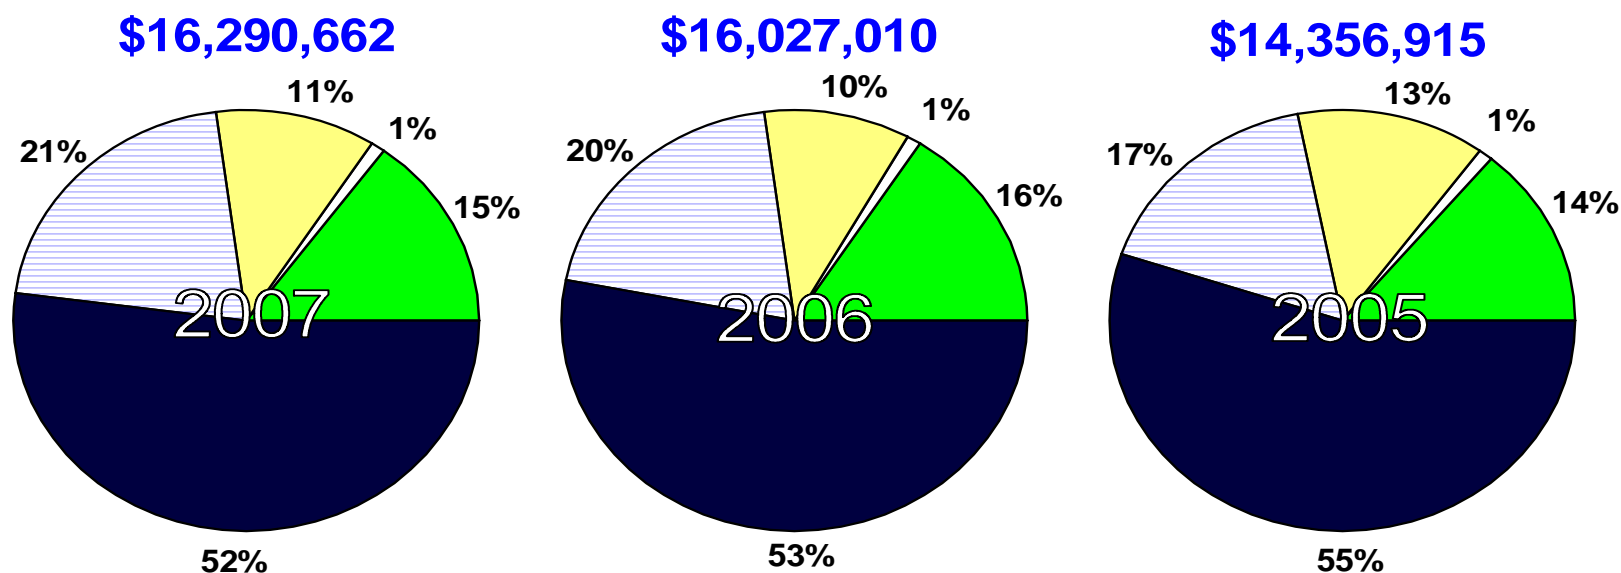

1/ Data source is the Fiscal Management Information (FMIS). Capacity addition improvements include Relocation, some Reconstruction, and Reconstruction-added capacity (now includes Major Widening). System preservation improvements include some Reconstruction, Restoration and Rehabilitation, Resurfacing, and Reconstruction-no added capacity (now includes Minor Widening). Excludes certain improvement types such as Safety / Traffic / Traffic System Management, environmentally-related projects, special bridge programs and other projects.

# Obligation of Federal Funds for Roadway Projects by Improvement Type 1/

(Thousands of Dollars)

Obligations of Federal funds for roadway projects averaged \$15.6 billion per year for 2005, 2006 and 2007.

1/ Data source is the Fiscal Management Information System (FMIS) of the Federal Highway Administration. Major widening is now included in Reconstruction-added capacity. Minor widening is now included in Reconstruction-no added capacity. Reconstruction in these piecharts includes both major widening or minor widening.

## Obligation of Federal Funds for Bridge Projects by Improvement Type 1/

Obligations of Federal funds for bridge projects averaged \$6.6 billion per year for 2005, 2006 and 2007.

(Thousands of Dollars)

1/ Data source is the Fiscal Management Information System (FMIS) of the Federal Highway Administration. Capacity addition improvements include Relocation, some Reconstruction, and Reconstruction-added capacity (now includes Major Widening). System preservation improvements include some Reconstruction, Restoration and Rehabilitation, Resurfacing, and Reconstruction-no added capacity (now includes Minor Widening). Excludes certain improvement types such as Safety / Traffic / Traffic System Management, environmentally-related projects, special bridge programs and other projects.

**2008 APPORTIONMENT FORMULAS - FEDERAL-AID HIGHWAY PROGRAM  
ENACTED IN SAFETEA-LU**

OCTOBER 2008

TABLE FA-4A

FUND	FACTORS	WEIGHT	STATUTE 1/	MINIMUM APPORTIONMENT
Interstate Maintenance (IM)	Interstate System lane miles Vehicle miles traveled on the Interstate System Annual contributions to the Highway Account of the Highway Trust Fund attributable to commercial vehicles	33 1/3% 33 1/3% 33 1/3%	104(b)(4)	1/2 percent of Interstate Maintenance and National Highway System apportionments combined
National Highway System (NHS)	Remainder apportioned as follows: Lane miles on principal arterial routes (excluding the Interstate System) Vehicle miles traveled on principal arterial routes (excluding the Interstate System) Diesel fuel used on highways Total lane miles on principal arterials divided by the State's total population	25% 35% 30% 10%	104(b)(1)	1/2 percent of Interstate Maintenance and National Highway System apportionments combined
Surface Transportation Program (STP)	Total lane miles of Federal-aid highways Total vehicle miles traveled on Federal-aid highways Estimated tax payments attributable to highway users paid into the Highway Account of the Highway Trust Fund	25% 40% 35%	104(b)(3)	1/2 percent
Bridge Replacement and Rehabilitation Program (BRR)	Relative share of total cost to repair or replace deficient bridges	100%	144(e)	1/4 percent (10 percent maximum)
Congestion Mitigation and Air Quality Improvement Program (CMAQ)	Weighted nonattainment and maintenance area population	100%	104(b)(2)	1/2 percent
Recreational Trails Program (RT)	Equal shares to each eligible State Nonhighway recreational fuel use during the preceding year	50% 50%	104(h)	None
Metropolitan Planning (MP)	Urbanized area population 2/	100%	104(f)(2)	1/2 percent
Minimum Guarantee	Specific share specified in law of the aggregate apportionments for Interstate Maintenance, National Highway System, Bridge, Congestion Mitigation, Surface Transportation Program, Metropolitan Planning, Recreational Trails, Appalachian Development Highway System, and Minimum Guarantee and allocations for High Priority Projects adjusted to ensure that each State's share of apportionments for the specified programs is at least 91.5 percent of its percentage contributions to the Highway Account of the Highway Trust Fund. The shares specified in law are increased for States falling below the 91.5 level and the shares of the remaining States are decreased so that the shares continue to total 100 percent.	100%	105	\$1 million
State and Community Highway Safety Grants	Total population Public road mileage	75% 25%	402(c)	1/2 percent, 1/4 percent for American Samoa, Guam, Virgin Islands, and the Commonwealth of the Northern Mariana Islands, 3/4 percent for Secretary of the Interior (Bureau of Indian Affairs)
1/ Denotes appropriate section in title 23 U.S. Code.				
2/ Usually places of 50,000 or more persons. Definition contained in 23 U.S.C. 101(a).

1/ All expenditures are for the Federal fiscal year. Data not available for shaded areas.  
2/ Includes timber sales, lease of Federal lands, and oil and mineral royalties  
3/ Differences between amounts in this column and those shown on Table SF-21 are due to differences in reporting years and funds in transit.  
4/ Includes Federal-aid account expenditures administered jointly with other agencies.  
5/ Does not include work performed within the confines of military reservations.  
6/ Includes all expenditures for highways from the Highway Trust Fund that are not included in FHWA accounting records. Jointly-administered programs are shown as FHWA expenditures.  
7/ Excludes Forest Development Trails Program trails for timber access and forest management that do not provide full public access.  
8/ States are permitted to shift a portion of the funds received from the Highway Account to mass transit purposes. Amount shown includes funds administered by the Federal Highway Administration, Federal Transit Administration and Federal Railroad Administration for mass transit purposes. Excludes Transit Account.

1/ The data reported in this table are from the Fiscal Management Information System. Due to rounding, the data may not agree with the summary of obligations contained in report M79 prepared by the Office of Fiscal Services. Negative numbers indicate adjustments to projects. The FY 2007 tables reflect revisions to the FMIS conversion process from FMIS3 to FMIS4. Since other program funds can be spent on the NHS, these totals only report part of the NHS spending.

2/ Projects not identified as urban or rural.

3/ Prior to 1995, Reconstruction was not split into separate items for added capacity and no added capacity. When Pre-FY 1995 projects are reopened, the improvement type has been recoded, causing negative adjustments to "Pre-FY 1995 Reconstruction" and positive adjustments to the new Reconstruction items.

4/ Includes projects not otherwise included in the remaining improvements types, such as transit.

1/ The data reported in this table are from the Fiscal Management Information System. Due to rounding, the data may not agree with the summary of obligations contained in report M79 prepared by the Office of Fiscal Services. Negative numbers indicate adjustments to projects.

2/ The "Other" category includes obligations for work that cannot be classified as rural or urban. This work includes highway planning and research, metropolitan planning, etc.

3/ Includes National Highway System Funds as shown in Table FA-6, as well as amounts

from other programs that were obligated on the National Highway System.

4/ Prior to 1995, Reconstruction was not split into separate items for added capacity and no added capacity. When Pre-FY 1995 projects are reopened, the improvement type has been recoded, causing negative adjustments to "Pre-FY 1995 Reconstruction" and positive adjustments to the two new Reconstruction items.

5/ These amounts represent adjustments of certain prior year obligations.

**OBLIGATION OF FEDERAL-AID HIGHWAY FUNDS FOR HIGHWAY IMPROVEMENTS  
FISCAL YEAR 2007**

(INTENDED TO SHOW ONLY PROJECTS AUTHORIZED IN FY 2007 1/)

1/ This table contains Federal-aid funds obligated and highway improvement projects initially authorized in Fiscal Year 2007 by type of improvement and functional system. Additional funds obligated for projects initially authorized in prior fiscal years are not included. Therefore, obligations shown in this table will be less than those shown in Table FA-4B. Totals may not add due to rounding. The data reported in this table are from the Fiscal Management Information System. The FY 2007 tables reflect revisions to the FMIS conversion process from FMIS3 to FMIS4.

2/ "Not identified by functional class" category includes Federal-aid funded projects not otherwise included in the remaining functional system categories, such as highway planning and research, metropolitan planning and certain demonstration projects.

3/ "Other" category includes Federal-aid funded programs not otherwise included in the remaining improvement types, such as bridge program special actions, highway planning and research and metropolitan planning.

1/ Apportioned pursuant to the Transportation Efficiency Act of 1998 (TEA-21) as amended by the TEA-21 Restoration Act. Does not include funds from the Mass Transit Account of the Highway Trust Fund.

2/ Does not include funds from the following programs: emergency relief, Federal lands highway programs, Commonwealth of Puerto Rico highway

programs, high priority projects, Woodrow Wilson Bridge, National Byways, construction of ferry boats and ferry terminal facilities, and intelligent vehicle-system, among others. These funds are allocated from the Highway Trust Fund.

3/ Under TEA-21, Puerto Rico received a stand-alone authorization of \$106,943,782 for FY 2008.

### SELECTED DATA USED IN APPORTIONMENTS FOR FISCAL YEAR 2009 1/

OCTOBER 2008

1/ Data used for apportionment of FY 2009 funds in Summer 2008. Lane-miles and travel were derived based on the latest State-reported 2006 Highway Performance Monitoring System. Trust fund payments (both commercial vehicles and total highway account) are based on FY 2007 Trust Fund receipts attributed on updated 2006 motor-fuel data (Tables FE-9 and FE-221). Diesel fuel is based on updated FY 2006 data (Table MF-27).

2/ Interstate Maintenance Program funds are apportioned on each State's share of these factors: total Interstate lane-miles open to traffic (one-third); total Interstate vehicle-miles traveled (one-third); and commercial vehicle contributions to the Highway Account of the Highway Trust Fund (one-third).

3/ National Highway System Program funds are apportioned on each State's share of these factors: total principal arterial lane-miles, excluding Interstate (25 percent); total principal arterial vehicle-miles of travel, excluding Interstate (35 percent); diesel fuel used on highways (30 percent); and total principal arterial lane-miles per capita (10 percent). Current Interstate (25 percent); total principal arterial vehicle-miles traveled, excluding Interstate (35 percent); diesel fuel used on highways (30 percent); and total principal arterial lane-miles per capita (10 percent). Current population is as of July 1, 2007.

4/ Surface Transportation Program funds are apportioned on each State's share of these factors: total lane-miles of Federal-aid highways (25 percent); total vehicle-miles of traveled on Federal-aid highways (40 percent); and payments into the Highway Account of the Highway Trust Fund (35 percent).

5/ Highway Safety Improvement Program funds are apportioned on each State's share of these factors: total lane-miles of Federal-aid highways (33 1/3 percent); total vehicle-miles traveled on Federal-aid highways (33 1/3 percent); and total number of fatalities on the Federal-aid system (33 1/3 percent).

6/ Numbers may not add due to rounding.

**ALLOCATION OF FEDERAL FUNDS ADMINISTERED BY THE FEDERAL HIGHWAY ADMINISTRATION 1/ 2/  
FOR FISCAL YEAR 2007**

OCTOBER 2008

1/ Negative numbers indicate money transferred to other projects or returned to FHWA.

2/ Parkways and Park Roads, and Forest Highways are no longer reported by State under the FMIS4 system. In previous years over \$100 million of allocations were reported in the FA-4D for each program. The

reason is that the National Park Service and the Forest Service respectively, not the Federal Highway Administration, allocate the money to the States.

3/ Includes over fifty other small miscellaneous programs.

1/ The data reported in this table are from the Fiscal Management Information System. Due to rounding and data revisions, the data may not agree with the summary of obligations contained in report M79 prepared by the Office of Fiscal Services. Negative numbers indicate adjustments to projects.

2/ The "Other" category includes obligations for work that cannot be classified as rural or urban. This work includes highway planning and research, metropolitan planning, etc.

3/ Includes FHWA administrative and research costs, and studies.

**USES OF SURFACE TRANSPORTATION PROGRAM FUNDS  
FOR PROJECTS NOT ON THE NATIONAL HIGHWAY SYSTEM, BY IMPROVEMENT CATEGORY 1/  
FISCAL YEAR 2007 OBLIGATIONS OF FEDERAL FUNDS**

1/ Tables SF-1 and SF-2 show the receipts and disbursements State for highways.  
See Table SF-21 for general note on SF series. This table is compiled from reports of State authorities.  
2/ Includes expenditures for local roads and streets under State control. Most local roads

are under State control in Delaware, North Carolina, Virginia, and West Virginia.  
3/ See SB tables for additional information on State debt for highways.  
4/ This State did not report 2007 data; the table displays 2006 data.

1/ Tables SF-3 and SF-4 summarize receipts and disbursements for State-administered roads and bridges. See general note on Table SF-3 for details. See Table SF-21 for general note on SF series. This table is compiled from reports of State authorities.

2/ The classification of administration and miscellaneous expenditures is not uniform for

all States because of indeterminate amounts charged to construction and maintenance projects.

3/ Includes redemption by refunding. See Table SB-2 for details.

4/ This State did not report 2007 data; the table displays 2006 data.

1/ This table provides additional detail of expenditures shown on Table SF-4. Debt service expenditures are excluded from this table. A complete classification of expenditures was not available where entries do not appear. This table is compiled from reports of State authorities.

2/ See Table SF-12 for expenditures by functional systems and Table SF-12A for expenditures by improvement type.

3/ This State did not report 2007 data; the table displays 2006 data.

**STATE HIGHWAY AGENCY CAPITAL OUTLAY AND MAINTENANCE - 2007 1/  
IN RURAL AREAS  
CLASSIFIED BY FUNCTIONAL SYSTEMS**

1/ Table SF-12 shows capital and maintenance expenditures by functional system and area. The data from this table are compiled from the records of State governments.  
2/ Area subtotals do not include expenditures on roads functionally classified as local

3/ Includes Other Freeways and Expressways.  
4/ Maine's FHWA-534 submittal contained both FY 2006 and FY 2007 data.  
5/ New Mexico's data is 2006.

1/ Table SF-12A shows capital outlay for the Interstate, Arterial, and Collector systems by area and improvement type. This table does not include expenditures for roads functionally classified as local.

Urban areas include both small urban and urbanized areas.

2/ Maine's FHWA-534 submittal contained both FY 2006 and FY 2007 data.

3/ New Mexico's data is 2006

1/ The data for this table are compiled from the records of State governments.  
 2/ Some States' data may be based on the Interim NHS. Reference Table SF-12 for a State-by-State comparison.  
 3/ Includes Minor Arterial, Urban Collector, and Rural Major Collector systems.  
 4/ Includes Rural Minor Collector and Local systems.

5/ State did not report maintenance data by functional system. Total maintenance expenditures are shown in the Non-Federal Highways column.  
 6/ Maine's FHWA-534 submittal contained both FY 2006 and FY 2007 data.  
 7/ New Mexico's data is 2006.

1/ Tables SF-3B and SF-4B are concerned solely with receipts and disbursements for State and quasi-State toll facilities. See Tables LGF-3B and LGF-4B for data on public and quasi-public facilities operated by or for local governments. See Tables SB-2T and SB-3T for information on toll facility bond indebtedness. See Table SF-21 for general note on SF table series. This table is compiled from reports of State authorities.

2/ Includes direct expenditures for nonhighway purposes and transfers to other agencies for both highway and nonhighway purposes. The amount used for nonhighway purposes can be determined by taking total tolls from SF-3B and subtracting tolls used for highways on Tables SF-21 and tolls used for mass transportation on table MT-1.

3/ Include the Carquinez, Benicia-Martinez, Antioch, Richmond-San Rafael, San Francisco-Oakland Bay, San Mateo-Hayward, and Dumbarton Bridges.

4/ Includes Chesapeake Bay, Francis Scott Key, Potomac River and Susquehanna River Bridges; Baltimore Harbor and Fort McHenry Tunnels.

5/ The Massachusetts Turnpike Authority submitted an 18-month audit report. The report covers the period from January 1, 2007 to June 30, 2008. The Authority changed from calendar year to fiscal year reporting.

6/ Includes the Trenton-Morrisville, New Hope-Lambertville, Interstate 78, Easton-Phillipsburg, Portland-Columbia, and Milford-Montague Bridges.

7/ Includes the Newburgh-Beacon, Mid-Hudson, Rip Van Winkle, Kingston-Rhinecliff and Bear Mountain Bridges.

8/ Includes the George Washington, Bayonne and Goethals Bridges; Holland and Lincoln Tunnels.

9/ Includes the Cherry Branch, Hatteras, Ocracoke, Ocracoke-Cedar Island, Orakoke Swan Quarter, and South Port.

10/ Includes the Walt Whitman, Ben Franklin, Betsy Ross and Commodore Barry Bridges.

11/ Tolls were removed from the Mount Hope Bridge effective May 1, 1998.

12/ Full name of the authority is West Virginia Parkways, Economic Development and Tourism Authority.

1/ This table summarizes the disbursements for publicly owned toll facilities operated by local governments, local road and bridge districts and specially created authorities. See Table LGF-3B for names of operating authorities. See Table LGF-21 for general note on local highway finance series. This table is compiled from reports of local authorities.

2/ Includes direct expenditures for nonhighway purposes and transfers to other State and local agencies for both highway and nonhighway projects.

3/ Lee County Bridges consists of the Cape Coral Bridge, the Midpoint Bridge,

and the Sanibel Bridge and Causeway.

4/ Toll data estimated by FHWA.

5/ Transfers shown include amounts used for maintenance, operations and debt service of the New York City Transit Authority, the Metropolitan Transportation Authority and the Triborough Transportation Project.

6/ Harris County Toll Facilities consist of the Harris County Toll Road and the Jesse Jones Memorial Toll Bridge.

1/ Tables LGF-1 and LGF-2 summarize the receipts and disbursements for highways by local governments, including toll facilities. See Table LGF-21 for general note on local series.

Local government reporting is on a biennial basis with even-numbered years optional. This table is compiled from the reports of State and local governments.

2/ D. C. is excluded as there are no local jurisdictions within the District of Columbia.

3/ Excludes retirements of short term debt (notes). See Table LGB-2 for additional

information on local government debt for roads and streets.

4/ Engineering costs were estimated for some States.

5/ Estimated by FHWA.

6/ Although most local roads and streets are under State control, local governments may raise and expend money on these roads and streets. State expenditures on these roads and streets are included in State Highway Finance Table series.

**MOTOR VEHICLE TRAFFIC FATALITIES, 1900 - 2007**

# FUNCTIONAL SYSTEM LENGTH - 2007

## MILES BY MEASURED PAVEMENT ROUGHNESS / PRESENT SERVICEABILITY RATING

HM-63 Footnotes Page:

- 1/ Some States elect to report International Roughness Index (IRI) for these systems; some report IRI for some sections and PSR for some sections. Some differences from other tables may be noted because these are estimated from sample data.
- 2/ Data are reported as the IRI in inches per mile. Reference: World Bank Technical Paper Number 46, 1986. Lower IRI represents smoother riding roadways; to obtain a comprehensive assessment of pavement condition, additional measures of pavement distress are needed.
- 3/ The "Present Serviceability Rating" (PSR) is a subjective, primarily ride-based system adapted from the "AASHO ROAD TESTS" conducted in the late 1950's and early 1960's. Reference: Highway Special Report 61E, 1962. The PSR values range from 0.1 to 5.0; higher PSR values represent smoother riding roadways.
- 4/ Excludes 788 miles of Federal agency owned roads.
- 5/ Excludes 437 miles of local government owned roads.

# FUNCTIONAL SYSTEM LENGTH - 2007

## MILES BY MEASURED PAVEMENT ROUGHNESS

HM-64 Footnotes Page:

- 1/ Data are reported as the International Roughness Index (IRI) in inches per mile. Reference: World Bank Technical Paper Number 46, 1986. Lower IRI represents smoother riding roadways; to obtain a comprehensive assessment of pavement condition, additional measures of pavement distress are needed.
- 2/ May include sections entirely on structures and unpaved miles.
- 3/ Estimated from sample data.
- 4/ Excludes 788 miles of Federal agency owned roads.
- 5/ Excludes 437 miles of local government owned roads.

# MEASURED PAVEMENT ROUGHNESS - 2007

## HPMS DATA REPORTING DETAILS 1/

OCTOBER 2008

TABLE HM-66

STATE	STRUCTURES INCLUDED?	MEASUREMENT WHEELPATH	MEASUREMENT LANE(S) 2/	HALF-CAR/ QUARTER-CAR	MEASUREMENT DIRECTION 3/
Alabama	No	Both	Outside	Quarter-car	Ascending
Alaska					
Arizona	No	Both	Outside		Ascending
Arkansas	No	Both	Outside	Quarter-car	Ascending
California	No	Both		Quarter-car	
Colorado		Both	Outside		Both for 4-lane and divided; NB, EB off-system
Connecticut	Yes	Both	Outside	Quarter-car	
Delaware		Both	Outside (mostly)	Quarter-car	
Dist. of Columbia					
Florida	No	Both	Outside (mostly)	Quarter-car	One direction for total system
Georgia	No	Both	Outside	Half-car	
Hawaii	Yes	Both	Outside	Quarter-car	Ascending; Both for divided
Idaho	Yes	Right	Outside	Quarter-car	Varies; Both for divided
Illinois	No	Both	Outside (mostly)	Quarter-car	SB, EB; Both for divided
Indiana					
Iowa	No	Both		Quarter-car	Both for divided; NB, EB other
Kansas	No	Right	Outside	Quarter-car	Varies
Kentucky	No	Both	Outside	Quarter-car	Both
Louisiana	No	Both	Outside		Ascending
Maine	Yes	Both	Outside	Half-car	Varies
Maryland	Yes	Both	Outside		
Massachusetts	No	Both	Outside	Half-car	Both for divided
Michigan					
Minnesota	Yes	Both	Outside	Quarter-car	Both
Mississippi	Yes	Both	Outside	Quarter-car	NB, EB; Both for divided
Missouri					
Montana	Yes	Both	Outside	Quarter-car	Ascending
Nebraska	Yes	Right	Outside	Quarter-car	Both for 4-lane; varies for 2-lane
Nevada					
New Hampshire					
New Jersey	Yes	Both	Outside	Half-car	Both; varies
New Mexico	No	Both	Outside	Quarter-car	Both for divided; Ascending 2-lane/way
New York	No	Both	Outside (mostly)	Quarter-car	Both for Interstate; NB, EB other (mostly)
North Carolina					
North Dakota	Yes	Both	Outside	Quarter-car	Both for 4-lane; varies for 2-lane
Ohio	No	Both	Outside	Quarter-car	Both for divided; varies for other
Oklahoma					
Oregon	No	Both	Outside	Quarter-car	Ascending for Interstate; varies for other
Pennsylvania	No	Both	Outside	Quarter-car	Varies for other; Both for divided
Rhode Island	Yes			Quarter-car	
South Carolina			Outside		
South Dakota	Yes	Both	Outside	Quarter-car	All; outside lanes for divided
Tennessee	No	Both	Outside	Quarter-car	Both for Interstate; Ascending for other
Texas	Yes	Both	Varies	Quarter-car	Varies
Utah	No	Both	Outside	Quarter-car	Both for Interstate and divided; consistent for other
Vermont	No	Right	Outside	Quarter-car	
Virginia					
Washington	No	Both	Outside	Quarter-car	Both for divided; varies for other
West Virginia	No	Both	Outside	Quarter-car	NB, EB
Wisconsin	Yes	Left	Outside	Quarter-car	NB, EB
Wyoming	Yes	Both	Outside	Half-car	Ascending
Puerto Rico		Both		Half-car	

For footnotes, see Footnotes Page.

# MEASURED PAVEMENT ROUGHNESS - 2007

## HPMS DATA REPORTING DETAILS 1/

HM-66 Footnotes Page:

- 1/ Information in this table is intended to represent State data collection and HPMS reporting practices as submitted to FHWA and may not necessarily reflect practices used for other State purposes.
- 2/ The outside lane is typically the rightmost lane on multi-lane facilities in the direction of travel.
- 3/ NB=Northbound, SB=Southbound, EB=Eastbound, WB=Westbound. Ascending=direction of increasing or ascending milepoints.

2007	88	4	4	15	8	81

1/ Based on data from the Truck Weight Study which are collected by the States for varying time periods each year and are not adjusted to typify annual averages. Loadings are based on equivalent axle loads which are the damage to a pavement caused by a vehicle axle relative to an 80 kN (18,000 lb) force which represents a standard single axle.

# NATIONAL HIGHWAY SYSTEM LENGTH - 2007

## MILES BY VOLUME - SERVICE FLOW RATIO

HM-42 Footnotes Page:

- 1/ In 2001, updated capacity (service flow) calculation procedures were instituted in the HPMS data reporting process. The procedures are based on the Highway Capacity Manual 2000, published by the Transportation Research Board. For multilane facilities volume-service flow ratio is determined by dividing the peak traffic in the peak direction by the capacity. For all other facilities the ratio is determined by dividing the peak traffic by the capacity. Peak traffic is estimated as  $AADT * K$ , where K is the design hour volume (30<sup>th</sup> highest hour) as a percent of AADT. Some differences from other tables may be noted because these are estimated from sample data and do not include samples entirely on structures.
- 2/ Excludes 788 miles of Federal agency owned roads.
- 3/ Excludes 437 miles of local government owned roads.

# **NATIONAL HIGHWAY SYSTEM LENGTH - 2007**

## **MILES BY MEASURED PAVEMENT ROUGHNESS**

HM-47 Footnotes Page:

- 1/ Data are reported as the International Roughness Index (IRI) in inches per mile. Reference: World Bank Technical Paper Number 46, 1986. Lower IRI represents smoother roadways. To obtain a comprehensive assessment of pavement condition, additional measures of pavement distress are needed
- 2/ May include sections entirely on structures and unpaved miles
- 3/ Excludes 788 miles of Federal agency owned roads.
- 4/ Excludes 437 miles of local government owned roads.

# FUNCTIONAL SYSTEM LENGTH - 2007

## MILES BY VOLUME - SERVICE FLOW RATIO

HM-61 Footnotes Page:

- 1/ In 2001, updated capacity (service flow) calculation procedures were instituted in the HPMS data reporting process. The procedures are based on the Highway Capacity Manual 2000, published by the Transportation Research Board. For multilane facilities volume-service flow ratio is determined by dividing the peak traffic in the peak direction by the capacity. For all other facilities the ratio is determined by dividing the peak traffic by the capacity. Peak traffic is estimated as  $AADT * K$ , where K is the design hour volume (30th highest hour) as a percent of AADT. Some differences from other tables may be noted because these values are estimated from sample data and do not include samples entirely on structures.
- 2/ Excludes 788 miles of Federal agency owned roads.
- 3/ Excludes 437 miles of local government owned roads.
