

### NEPA REVIEW SCREENING FORM

**I. Project Title:**

Oil Cleanup in 100-NR-2

**II. Project Description and Location (including Time Period over which proposed action will occur and Project Dimensions - e.g., acres displaced/disturbed, excavation length/depth, etc.):**

The proposed action is to remove petroleum hydrocarbons (bunker oil and diesel plus additives) from Well 199-N-18 which are a result of spills in the 1960's and later. The proposed action is to use a passive absorbent method including bilge skimmer assemblies featuring the Smart Sponge technology. The absorbent assemblies would be placed in the well for approximately two months to provide adequate time for removal of petroleum hydrocarbons. The absorbent assemblies would be changed out on a bimonthly basis. All saturated absorbent assemblies would be transported in a plastic bag to the NR-2 well services waste container; waste container contents are disposed of at the Environmental Restoration and Disposal Facility.

Activities would be conducted beginning early in Calendar Year 2011.
