REV 0**NEPA REVIEW SCREENING FORM****I. Project Title:**

LIMITED PRESCRIBED BURNING ON THE HANFORD SITE DURING CALENDAR YEAR 2010

II. Project Description and Location (including Time Period over which proposed action will occur and Project Dimensions - e.g., acres displaced/disturbed, excavation length/depth, etc.):

The U.S. Department of Energy (DOE) proposes to perform limited prescribed burning of selected areas of the Hanford Site during calendar year 2010. Prescribed burning will be conducted by the Hanford Fire Department and only in previously disturbed areas.

The objectives of limited prescribed burning are to maintain safety at Hanford facilities by improving the reliability of pre-identified fire breaks and reducing the accumulation of potentially hazardous ignitable fuels in proximity to buildings, structures, rights-of-way, and infrastructures (such as roads).

Action will be strictly limited to previously disturbed areas such as power poles, railroad rights-of-way, site roadways, facility boundaries/fencelines, and highways that pass through the Hanford Site.

The use of prescribed burning should not adversely impact cultural or biological resources and should only be performed in previously disturbed areas or in areas reviewed and precleared by cultural and biological specialists and concurred by the DOE Native American Cultural representative. Workers will be directed to contact a cultural specialist if encountering any cultural materials (bones, artifacts, etc.). Similarly, a biological resource specialist will be contacted if encountering biological resources (such as nesting birds).

III. Reviews (if applicable):
