

**I. Project Title:**  
 Acquisition, Installation, Operation, and Removal of Communication Systems, Data Processing Equipment, and Similar Electronic Equipment on the Hanford Site, Richland, Washington

**II. Project Description and Location (including Time Period over which proposed action will occur and Project Dimensions - e.g., acres displaced/disturbed, excavation length/depth, etc.):**

In previously disturbed areas, install fiber optic cable between and within existing buildings; install new conduit and/or replace old conduit; perform minor excavations for placement of new conduit (excavation permit required); install baseband and broadband cable in existing buildings; install network drop cables and transceivers for work stations; dispose of old/replaced cable, conduit, materials, and equipment; and drill and/or remove wall/ceiling sections to install cable.

Install, operate, and perform extensions and routine upgrades/maintenance to existing telecommunication networks including Hanford Local Area Network, telephone lines, and other telecommunication services in buildings with existing services; and facilities with no services including telecommunications to leased offices. New services, upgrades, changes, and other modifications to telecommunication systems will use existing utility easements and right-of-ways in previously disturbed areas. Telecommunication system components will be installed consistent with applicable codes and standards, using equipment designed for this purpose.

For proposed actions planned during the active nesting season (i.e., March through July), the ECO must be contacted to initiate an ecological resource review/clearance. Workers must be instructed to watch for active nests. If active nests and/or any nesting birds are encountered, or bird defensive behaviors are observed, workers must stop work in the immediate vicinity of the nest and contact the ECO and ecological staff for guidance. Cultural resource review/clearance is required for actions requiring excavation permits, other ground disturbing activities, actions within culturally sensitive areas, and actions involving historic structures and locations. If cultural resources are discovered, workers must stop work and contact the ECO and cultural staff to determine the significance of the find and appropriate mitigation actions.

This categorical exclusion expires one-year from the date of approval and must be reauthorized by the DOE NEPA Compliance Officer.

**III. Reviews (if applicable):**
