

NEPA REVIEW SCREENING FORM

I. Project Title:

Training Exercises and Simulations on the Hanford Site

II. Project Description and Location (including Time Period over which proposed action will occur and Project Dimensions - e.g., acres displaced/disturbed, excavation length/depth, etc.):

This activity-specific categorical exclusion covers limited scope training exercises and simulations performed at designated training facilities on the Hanford Site to teach or learn a skill or job to allow a person(s) to achieve an agreed standard of proficiency; an organized activity aimed at imparting information and/or instructions to improve the recipient's performance or to help them attain a required level of knowledge or skill. Activities include, but may not be limited to, such actions as establishing command posts and emergency control centers; dispatching field teams; conducting safeguards and security force-on-force exercises; learning emergency vehicle operations and control; testing fire department equipment; simulating fire and spill emergencies; testing alarm systems, metal, and radiation detectors; and qualifying personnel for routine and emergency operations and maintenance activities. Training and simulations will be conducted at designated indoor and outdoor training facilities located at the Hazardous Materials Management and Emergency Response (HAMMER) Training Complex, Patrol Training Academy, and Hanford Fire Departments.

In the interests of safety and in order to protect biological and cultural resources, training exercises will use simulation devices, whenever practical, and be conducted in previously disturbed areas designated for training purposes. For example, toxic spills will be simulated using water; fire smoke will be simulated using a non-toxic vegetable based substance; radiation will be simulated using approved methods per 10 CFR 835 (DOE Occupational Radiation Protection) and MSC-5173 (Radiological Control Manual); and exercises involving firearms will be simulated using light beam weapons, paint ball weapons, or blank rounds rather than real ammunition. Signs, chalk, and ribbon markers will be used to outline emergency exercise perimeters. This does not preclude the use of non-hazardous extinguishing agents and water during Hanford Fire Department training exercises or the use of live ammunition during Hanford Patrol training exercises conducted at the Patrol Training Academy.

This categorical exclusion expires one-year from the date of approval and must be reauthorized by the DOE NEPA Compliance Officer.
