I. Project Title:
 Columbia River Inter-Tribal Fish Commission Use of White Bluffs Boat Launch and Hanford Town Boat Ramp for Tagging Juvenile Fall Chinook Salmon

II. Project Description and Location (including Time Period over which proposed action will occur and Project Dimensions - e.g., acres displaced/disturbed, excavation length/depth, etc.):

Proposed Action: The US Department of Energy (DOE), Richland Operations Office (RL), proposes to grant to the Columbia River Inter-Tribal Fish Commission temporary seasonal access to and use of two parcels of land, one in the old Hanford Townsite adjacent to the Hanford ferry ramp and the other at the White Bluffs boat launch site as staging and processing areas for capture, adipose-clip and coded-wire tag of juvenile fall Chinook salmon from the Hanford Reach (Permit R006-10PR-14952 granted to CRITFC for these activities).

Location of Action: The temporary-use land parcels are located in the Hanford Townsite adjacent to the former ferry ramp and the White Bluffs boat launch. The old Hanford Town site parcel to be used is approximately 1/2 acre. The parcel is located 3000 feet southeast of an existing concrete structure known as the Richland pump house. The White Bluffs parcel is located at the White Bluffs boat launch on the southwest side of the Hanford Reach.

Description of Action: DOE RL's action would be to grant temporary seasonal use of this land to CRITFC for a period of 5 years. The CRITFC would utilize the land seasonally for approximately 4 weeks in the late spring typically from May 20th to June 20th depending on juvenile fall Chinook salmon activity which is nature dependent. During the time that CRITFC utilizes the parcel they will take care not to damage sagebrush or other native vegetation. They will not excavate and will not disturb the ground beyond that needed to level their fish troughs. They will not pick up or displace cultural resources. They will utilize existing road ways and disturbed areas for placement of water tanks, support trailers, electrical generators, portable toilets and parking. No open fires will be permitted. No pets are allowed on the Hanford Site. No individual without a current DOE badge will visit or stay at the site. Any required permits would be obtained. If docking is used the required permits would be obtained. Water contaminated by the anesthetic (MS222 or Finquel) used during the tagging and clipping of the fish will be disposed of properly using currently acceptable methods as specified by the Environmental Protection Agency.

Note: During the 2010 field season, MS222 was stored and removed using a trailer by PNNL for treatment and disposal. At the termination of activities all equipment, materials and support trailers will be removed.

III. Reviews (if applicable):

Biological Review Report #: BRR#2010-600-066, submitted by Michael Sackschewsky (PNNL-Eco Review)

Cultural Review Report #: CRR#2010-600-066, submitted by Jennifer Gutzeit (PNNL-Env Assessment)

NPCE Determination: YES NO

IV. Existing NEPA Documentation (see Steps 3 and 4 of Contractor Screening Process)

Is the proposed action evaluated in a previous EA, EIS, or under CERCLA?	YES	NO
	<input type="checkbox"/>	<input checked="" type="checkbox"/>

If "NO," proceed to Section V. If "YES," List EA, EIS, or CERCLA Document(s) Title and Number:

And then complete Section VII and provide electronic copy of Initiator/ECO signed NRSF to DOE NCO for information (see Step 6 of Contractor Screening Process).

V. Sitewide Categorical Exclusion (see Step 5 of Contractor Screening Process)

Does the proposed action fall within the scope of a Hanford Sitewide Categorical Exclusion?	YES	NO
	<input type="checkbox"/>	<input checked="" type="checkbox"/>

If "NO," proceed to Section VI.

If "YES," list Sitewide Categorical Exclusion to be applied and complete Sitewide Categorical Exclusion Criteria:
