Part IV — U.S. EXPORTS TO AND IMPORTS FROM FOREIGN AFFILIATE — Goods only valued f.a.s. at port of exportation; do not include services — See Instruction Booklet, Part V.

IMPORTANT NOTES

Report U.S. exports of goods to and U.S. imports of goods from the foreign affiliate in FY 2004. Report all goods that physically left or entered the U.S. customs area. Report data on a "shipped" basis, i.e., on the basis of when and to (or by) whom the goods were shipped. This is the same basis as official U.S. trade statistics to which these data will be compared. Do **not** record a U.S. import or export if the goods did not physically enter or leave (i.e., were not physically shipped to or from) the United States, even if they were charged to the foreign affiliate by, or charged by the foreign affiliate to, a U.S. person.

Foreign affiliates normally keep their accounting records on a "charged" basis, i.e., on the basis of when and to (or by) whom the goods were charged. The "charged" basis may be used if there is no material difference between it and the "shipped" basis. If there is a material difference, the "shipped" basis must be used or adjustments made to the data on a "charged" basis to approximate a "shipped" basis. The data should include goods only; they should exclude services.

Capital goods — Include capital goods but exclude the value of ships, planes, railroad rolling stock, and trucks that were temporarily outside the United States transporting people or goods.

Consigned goods — Include consigned goods in the trade figures when shipped or received, even though they are not normally recorded as sales or purchases, or entered into intercompany accounts when initially consigned.

In-transit goods — Exclude from exports and imports the value of goods that are in-transit. In-transit goods are goods that are not processed or consumed by residents in the intermediate

country(ies) through which they transit; the in-transit goods enter that country(ies) only because that country(ies) is along the shipping lines between the exporting and importing countries. In-transit goods are goods en route from one foreign country to another via the United States (such as from Canada to Mexico via the United States), and in-transit exports are goods en route from one part of the United States to another part via a foreign country (such as from Alaska to Washington State via Canada).

Packaged general use computer software — Include exports and imports of packaged general use computer software. Value such exports and imports at the full transaction value, i.e., the market value of the media on which the software is recorded and the value of the information contained on the media. Do not include exports and imports of customized software designed to meet the needs of a specific user. This type of software is considered a service and should not be included as trade in goods. Also do not include negotiated leasing fees for software that is to be used on networks.

Natural gas distribution — Include the value of natural gas that is exported or imported as trade in goods. Do not include as an export or import natural gas that you do not produce or sell at wholesale. The transmission of natural gas for others via a pipeline without producing or wholesaling the natural gas is considered a service and should not be reported as trade in goods.

Electricity and water — Report the value of electricity and water as exports and imports if the product value can be separated out from the service value. Report ONLY the product value (electricity and water). DO NOT report the service value (transmission and distribution).

BENCHMARK SURVEY OF U.S. DIRECT INVESTMENT ABROAD — 2004 FORM BE-10B(SF) ADDITIONAL INSTRUCTIONS BY ITEM

Part I — IDENTIFICATION OF FOREIGN AFFILIATE

- 7. Country of location If the affiliate is engaged in petroleum shipping, other water transportation, or oil and gas drilling, and has operations spanning more than one country, use country of incorporation for country of location. For example, classify in country of incorporation an oil drilling rig that moves from country to country during the year.
- 12. Ownership by U.S. Reporter named in item 1.

Equity interest is the U.S. Reporter's direct ownership in the total equity (voting and nonvoting) of the affiliate. Examples of nonvoting equity include nonvoting stock and a limited partner's interest in a partnership.

Voting interest is the U.S. Reporter's direct ownership in just the voting equity of the affiliate. Examples of voting equity include voting stock and a general partner's interest in a partnership. Thus, a U.S. Reporter could have a 100 percent direct voting interest in an affiliate but own less than 100 percent of the affiliate's total equity.

30.-38.

Sales or gross operating revenues of foreign affiliate, by industry of sales or gross operating revenues. See Additional Instructions for Part II, Section A, item 41 below.

Holding companies (ISI code 5512) must show total income as reported in item 45. To be considered a holding company, income from equity investments (items 42) must be more than 50 percent of total income (item 45). In addition, normally at least 50 percent of total assets must consist of investments in affiliates. ISI code 5512, (holding company), is an invalid classification if more than 50 percent of income generated, or expected to be generated, by an affiliate is from non-holding company activities.

B. Special instructions for insurance companies

- 1. When there is a difference between the financial and operating data reported to the stockholders and the data reported in the annual statement to an insurance department, prepare the BE-10 on the same basis as the annual report to the stockholders. Valuation should be according to normal commercial accounting procedures, not at rates promulgated by national insurance departments, e.g., include assets not acceptable for inclusion in the annual statement to an insurance department, such as: 1. non-trusteed or free account assets and 2. nonadmitted assets, including furniture and equipment, agents' debit balances, and all receivables deemed to be collectible. Include mandatory securities valuation reserves that are appropriations of retained earnings in the owners' equity section of the balance sheet not in the liability section.
- 2. Do not include assets of the U.S. Reporter held in the country of location of the affiliate and that are for the benefit of the U.S. Reporter's policyholders in the data reported for the affiliate.

3. Instructions for reporting specific items

Sales or gross operating revenues, excluding sales taxes (item 41) — Include items such as earned premiums, annuity considerations, gross investment income, and items of a similar nature. Exclude income from equity investments

in unconsolidated business enterprises that is to be reported in item 42 and exclude certain realized and unrealized gains or losses that are to be reported in item 43.

- Certain realized and unrealized gains (losses) (item 43) See Special Instructions, A.1.
- c. Cost of goods sold or services rendered and selling, general, and administrative expenses (item 46) Include costs relating to sales or gross operating revenues, such as policy losses incurred, death benefits, matured endowments, other policy benefits, increases in liabilities for future policy benefits, and other underwriting expenses.
- d. Current assets (item 54) Include current items such as agent's balances, uncollected premiums, amounts recoverable from reinsurers, and other current notes and accounts receivable (net of allowances for doubtful items) arising from the ordinary course of business.
- Current liabilities and long-term debt (item 60) Include current items such as loss liabilities, policy claims, commissions due, and other current liabilities arising from the ordinary course of business, and long-term debt. Include policy reserves in "Other noncurrent liabilities," unless they are clearly current liabilities.
- Expenditures for property, plant, and equipment (item 73) Include expenditures and all related depreciation, depletion, and like charges WHEREVER CLASSIFIED IN THE BALANCE SHEET (e.g., include expenditures that have been classified in "other noncurrent assets").
