Acknowledgments

The staff of the Governments Division's Recurring Programs Area, headed by **Karl K. Kindel**, is responsible for the preparation of this report. **Henry Wulf** and **Meredith L. DeHart** supervised the data collection and editing activities. **Betty S. Curry** reviewed data tabulations and evaluated final publication copy. **Gerard Keffer** and **Thomas Manning** coordinated publication preparation activities.

Victoria Campbell carried out all electronic data processing operations, under the supervision of **Kathleen Chamberlain**, Chief, Information Systems Branch.

Governments Division's Census of Governments Branch staff reviewed and assembled data for the states and largest local governments covered by this report. The staff of the Data Preparation Division, **Judith N. Petty**, Chief, reviewed and assembled data for all other local governments.

The staff of the Administrative and Customer Services Division, **Walter C. Odom**, Chief, performed publication planning, editorial review, design, composition, and printing planning and procurement. **Frances B. Scott** provided publication coordination and editing.

Carma Hogue of the Economic Statistical Methods and Programming Division, **Charles P. Pautler, Jr.**, Chief, supplied advice and assistance in statistical methodologies.

The U.S. Bureau of the Census offers special thanks for the cooperation and assistance of the thousands of state and local government officials in providing information for this report.

For information regarding data in this report, contact the Chief, Governments Division, Bureau of the Census, Washington, DC 20233-6800 or phone toll free 1-800-642-4901

Census of Governments

INTRODUCTION

A census of governments is taken at 5-year intervals as required by law under title 13, United States Code, Section 161. This 1992 census, similar to those taken since 1957, covers four major subject fields—government organization, taxable property values, public employment, and government finances.

Volume 3, *Public Employment*, contains two reports: No. 1, *Employment of Major Local Governments*; and No. 2, *Compendium of Public Employment*.

This report, No. 1, provides measures of employment, gross payroll (salaries and wages), and full-time employee average earnings for selected individual local governments.

ORGANIZATION OF THIS REPORT

This introduction provides descriptions of the various types of local governments, descriptions of the sources and limitations of data presented, and information on the availability of additional data concerning government employment and pay.

The individual local governments for which information is presented include: All county governments (table 1); municipal governments and (in the six New England States, New York, New Jersey, and Pennsylvania) township governments having 25,000 or more estimated population in 1990 (table 2); school systems having 5,000 or more enrollment in October 1991 (table 3); and special district governments having 100 or more full-time employees as of October 1992 (table 4). No data are presented in this report for the Federal or State Governments; data for these governments and aggregated statistics for local governments are presented in Volume 3, No. 2, *Compendium of Public Employment*.¹ Appendix A provides important definitions of terms used in this report.

SCOPE

The Census Bureau classifies local government by five major types as described below. Additional information on

¹Volume 3, No. 2, *Compendium of Public Employment*, provides National and State-by-State summaries of Federal, State, and local government employment and pay data by detailed governmental functions. County, municipal, and township government aggregates are also shown by population-size groups; school system data are shown by enrollment-size groups; and special district data are shown by employment-size groups. Total local government amounts are also presented for all county areas in the United States.

the classification of local governments is presented in Volume 1, *Government Organization*, 1992 Census of Governments.

County Governments

Organized county governments are found throughout the Nation except in Connecticut, Rhode Island, the District of Columbia, and limited portions of other States where certain county areas lack a distinct county government (see appendix B for listing of county-type areas without county government). In Louisiana, the county governments are officially designated as “parish” governments, and the “borough” governments in Alaska resemble county governments in other States. Both are classified as county governments for census statistics on governments.

Not all geographic areas known as counties have county governments. Where municipal and county governments have been consolidated, or substantially merged, the composite units are counted as municipal governments in census statistics on governments. Moreover, the cities of Baltimore and St. Louis are outside the areas of adjacent counties, and a similar situation exists among 41 independent cities in Virginia.

Data for individual county governments are presented in table 1.

Municipal and Township Governments

The 35,935 subcounty general-purpose governments enumerated in 1992 include 19,279 municipal governments and 16,656 town or township governments. A breakdown by State between municipal and township governments appears in table 2. These two types of governments are distinguished primarily by the historical circumstances surrounding their incorporation. In many States, most notably in the Northeast, municipal and township governments have similar powers and perform similar functions. The scope of governmental services provided by these two types of governments varies widely from one State to another, and even within the same State.

As defined for census statistics on governments, the term “municipal governments” refers to political subdivisions within which a municipal corporation has been established to provide general local government for a specific population concentration in a defined area, and includes all active government units officially designated as cities, boroughs (except Alaska), towns (except in the six New

England States, and in Minnesota, New York, and Wisconsin), and villages. This concept corresponds generally to the “incorporated places” that are recognized in Census Bureau reporting of population and housing statistics, subject to an important qualification—the count of municipal governments in this report excludes places that are currently governmentally inactive.

The term “town or township governments” is applied here to 16,656 organized governments located in the following 20 States in the Northeast and the Midwest:

Connecticut	New Hampshire
Illinois	New Jersey
Indiana	New York
Kansas	North Dakota
Maine	Ohio
Massachusetts	Pennsylvania
Michigan	Rhode Island
Minnesota	South Dakota
Missouri	Vermont
Nebraska	Wisconsin

This category includes governmental units officially designated as “towns” in the six New England States, New York, and Wisconsin and some “plantations” in Maine and “locations” in New Hampshire, as well as townships in other areas. In Minnesota, the terms “town” and “township” are used interchangeably with regard to township governments. Although towns in the six New England States and New York, and townships in New Jersey and Pennsylvania are legally termed “municipal corporations,” perform municipal-type functions, and frequently serve densely populated urban areas, they have no necessary relation to concentration of population, and are thus counted for census purposes as town or township governments.

Excluded from this count of town or township governments are unorganized township areas, townships coextensive with cities where the city governments have absorbed the township functions, and townships known to have ceased to perform governmental functions. Also excluded are the townships in Iowa, which are not counted as separate governments, but are classified as subordinate agencies of county governments.

Only one State, Indiana, has township governments covering all its area and population. In six States (Massachusetts, New Hampshire, New Jersey, Pennsylvania, Rhode Island, and Wisconsin) operating towns or townships comprise all territory other than that served by municipalities. The same is true for Maine, except for “unorganized territory” that lacks any local government. Of the remaining 12 town or township States, there are 10 where this type of government occurs only in certain county or county-type geographic areas as of early 1992: Illinois, in 85 of the 102 county-type areas; Kansas, in 97 of 105; Minnesota, in 85 of 87; Missouri, in 23 of 115; Nebraska, in 28 of 93; North Dakota in 48 of 53; Pennsylvania, in 66 of 67; South Dakota, in 52 of 66; and Wisconsin, in 71 of 72. In New York, town governments exist in each county outside New York City.

The area served by municipal and town or township governments may overlap in 11 States. All municipal governments in Indiana, and some but not all municipalities in 10 other town or township States (Connecticut, Illinois, Kansas, Michigan, Minnesota, Missouri, Nebraska, New York, Ohio, and Vermont) operate within territory that is served also by town or township governments. In the remaining 9 of the 20 town or township States (Maine, Massachusetts, New Hampshire, New Jersey, North Dakota, Pennsylvania, Rhode Island, South Dakota, and Wisconsin), there is no geographic overlapping of these two kinds of units.

Data for municipal governments with a 1990 population of 25,000 or more inhabitants are shown in table 2. Similarly, data for town or township governments of 10,000 or more inhabitants in the New England States and in New Jersey, New York, and Pennsylvania are shown in table 2.

Special District Governments

Special district governments are independent, special-purpose government units (other than school district governments) that exist as separate entities with substantial administrative and fiscal independence from general-purpose local governments. As defined for census purposes, the term “special district governments” excludes school district governments.

Special district governments provide specific services that are not being supplied by existing general purpose governments. Most perform a single function, but, in some instances, their enabling legislation allows them to provide several, usually related, types of service. The services provided by these districts range from such basic social needs as hospitals and fire protection to the less conspicuous tasks of mosquito abatement and upkeep of cemeteries.

Data for each special district having 100 or more full-time employees as of October 1992 are shown in table 4.

School District Governments and Public School Systems

Of the 15,834 public school systems in the United States in 1992, only the 14,422 that are independent school districts are included in the count of governments. These districts are administratively and fiscally independent of any other government. The other 1,412 “dependent” public school systems are classified as agencies of other governments—State, county, municipal, or town or township—are not counted as separate governments.

Because of the variety of State legislative provisions for the administration and operation of public schools, marked diversity is found in school organization throughout the United States. The number of States providing for public schools solely through independent school districts numbered 33 in 1992. This independent district arrangement, which prevails in most parts of the country, is practically universal in the West.

A "mixed" situation is found in 12 States, with the public schools that provide elementary and secondary education operated in some areas by independent school districts and elsewhere by a county, municipal, town or township, or State government. In the District of Columbia and in five States (Alaska, Hawaii, Maryland, North Carolina, and Virginia), there are no independent school districts; all public schools in those jurisdictions are administered by systems that are agencies of the county, municipal, or State government.

Alaska, Hawaii, Maine, and New Jersey have State-dependent public school systems. The 21 State-dependent public school systems in Alaska serve sparsely-populated areas not served by borough or city school systems. All public schools in Hawaii are administered directly as part of the State government, but in Maine, this arrangement applies only to four sparsely populated areas. In New Jersey, two public school systems that are undergoing reorganization are State-operated.

Public school systems operating as dependent agencies of county governments appear mostly in North Carolina, Tennessee, and Virginia, which contain nearly two-thirds of all county-dependent systems. However, California has 54 county-dependent systems and New Jersey 47. Other States with public school systems operating as dependent agencies of county governments are Alaska (11), Arizona (12), Maryland (39), Massachusetts (3), Mississippi (4), New York (27), and Wisconsin (6). Systems dependent on town or township governments are found only in Connecticut, Maine, Massachusetts, New Jersey, and Rhode Island. There are public school systems operated by municipal governments in each of 11 States and the District of Columbia but in most of these States, some other pattern predominates, and only in the District of Columbia are all public schools operated by a municipally dependent system.

Table 3 provides data for all public school systems having an enrollment of 5,000 or more pupils as of October 1991; each school system is listed under a heading "Independent Schools" or "Dependent Schools" to indicate the Census Bureau classification.

Data for dependent public school systems that are an agency of a county, municipal, or town or township government shown in tables 1 or 2 are also included with their parent government in those tables.

BASIC CONCEPTS

Employment and employees

Employment, as used in this report, refers to all persons gainfully employed by and performing services for a government. Employees include all persons paid for personal services performed, including persons paid from federally funded programs, paid elected officials, persons in paid leave status, and persons paid on a per meeting, annual, semiannual, or quarterly basis. Unpaid officials, pensioners, persons whose work is performed on a fee basis, and contractors and their employees are excluded from the

count of employees. Full-time employees are defined to include those persons whose hours of work represent full-time employment in their employer government; part-time employees are those persons who work less than the standard number of hours for full-time work in their employer government.

Full-time equivalent employment

The term "full-time equivalent employment" refers to a computed statistic representing the number of full-time employees that could have been employed if the reported number of hours worked by part-time employees had been worked by full-time employees. This statistic is calculated separately for each function of a government by dividing the "part-time hours paid" by the standard number of hours for full-time employees in the particular government and then adding the resulting quotient to the number of full-time employees.

October payroll

Payroll amounts shown in this report represent gross payrolls for the 1-month period of October 1992. The gross payroll includes all salaries, wages, fees or commissions paid to employees during the pay period which included the date of October 12, 1992. Payroll amounts reported for a period other than 1 month were converted to represent an amount for the month of October.

Average October earnings

Average October earnings shown are for full-time employees only and represent the quotient of full-time employee payroll divided by the number of full-time employees.

SOURCES OF DATA

Data in this report are based on information obtained in the 1992 Census of Governments from local government officials, except for certain school system governments as described below. Mail canvass questionnaires, tailored to each type of local government, requested information on:

- The number of full-time and part-time employees paid for the pay interval that included the date of October 12, 1992,
- Full-time employees' and part-time employees' gross pay for the pay interval that included the date of October 12, 1992,
- The number of paid hours of work for part-time employees during the reported pay interval,
- The length of reported pay interval, and
- The number of weekly hours of work for the majority of full-time employees.

Questionnaires for county, municipal, and township governments requested data on employment, pay, and part-time employee hours paid by government function; school

system questionnaires requested data on instructional and noninstructional employment, pay, and part-time employee hours paid for elementary/secondary level education and for college level education; single function special districts (except fire protection districts) reported on a questionnaire that requested only totals of full- and part-time employees, full- and part-time pay, and part-time employee hours paid; questionnaires for fire protection districts and multifunctional special districts requested data on employment, pay, and part-time employee hours paid by function. Each type of questionnaire contained descriptions and instructions for each requested data category.

In Florida, North Carolina, North Dakota, and Washington, data for elementary and secondary school systems were supplied by officials of the State education agency rather than by local school officials on mail canvass questionnaires.

Information supplied by respondents was electronically recorded and edited for consistency and reasonableness. Incomplete replies and responses containing information that failed consistency and/or reasonableness tests were referred to trained Census Bureau personnel for review and possible followup. Additional or corrected information obtained in the review of these "failed edit" cases were then entered into the electronic data records.

LIMITATIONS OF DATA

Some local governments did not provide data requested in the census of governments. For such cases, this census contains data derived from:

1. The Census Bureau's recent annual surveys of government employment (surveys that request similar government employment and pay data for a sample of local governments); or
2. Summary information provided in the 1992 Census of Governments, Directory Survey of Local Governments; or
3. Imputation procedures that use data reported by like types of local governments of similar size in the same state, or use secondary data sources.

Nonresponse

For this publication, we did not publish the imputations for the individual governments. The data are marked NA. The nonresponse rate for the major local governments was 20.9 percent.

Review Procedure

The mail canvass questionnaires used in this phase of the 1992 Census of Governments contained detailed definitions and reporting instructions to assist local government officials in their preparation of replies and to facilitate

uniform interpretation and reporting procedures. Each questionnaire also contained a Census Bureau telephone number that local officials could call to obtain additional clarification and assistance from subject matter specialists. Quality control of reported data was aided also by reference to information collected by the Bureau in its annually conducted sample surveys of government employment and payrolls; these annual surveys request similar employment and payroll data, include the same general definitions and reporting procedures, and include all of the largest local governments. However, human and mechanical errors occur in any mass statistical operation such as the census of governments, including omissions, misinterpretations, errors in reporting, errors in the electronic recording of data, errors in the clerical review and adjustment of electronically identified problem data, and at other stages of data processing. Procedures were applied at each stage of processing this phase of the 1992 Census of Governments to keep human and mechanical errors at an acceptably low level.

Comparison of data between individual units of local government shown in this report must be made with caution and should take into account the variations in governmental structure and functional responsibilities from State to State.

Individual Governments and Geographic Area Data

Data in this report relate only to individual governments and their dependent agencies and do not include amounts for other local governments in the same geographic location. For example, county, municipal or township government expenditure figures for education do not include spending by separate school districts that administer public schools within many areas. Variations in the assignment of governmental responsibility—especially important in the areas of public welfare, health, hospitals, and public housing—also have an important effect upon reported amounts of individual government employment and payroll data.

Interstate comparisons should also take the allocation of governmental responsibilities into account. Refer to the section on "individual State Descriptions," in Volume 1, No. 1, *Government Organization* (1992 Census of Governments) for a State-by-State explanation of the legal structure of local government. Table 18 in the *Compendium of Government Employment* (Volume 3, No. 2, 1992 Census of Governments) will provide an aggregation of local government employment within the geographic boundaries of individual county areas, a data arrangement that reduces the effect of variable assignments of responsibility for local governments.

A number of municipalities differ from the overwhelming majority in that they operate, either specifically by law or in effect, as composite city-county governments. This group includes New York City, Philadelphia, and several other of the most populous cities in the Nation. One of these cities—Washington, DC—is unique in that it has no overlying

State government and thus provides certain services commonly provided by States, as well as various county-type services. Appendix B provides a summary of data for these city-county governments with a population of 100,000 or more. These governments in fiscal 1991-92 accounted for about 32 percent of the total number of employees of all municipalities in the Nation.

AVAILABILITY OF DATA

Copies of this and other reports of the 1992 Census of Governments are available from the Superintendent of Documents, U.S. Government Printing Office, Washington,

DC 20402, and U.S. Department of Commerce District Offices.

In addition to the printed Volume 3, *Public Employment*, reports of the 1992 Census of Governments, data from this phase of the census are also available in electronic format. For details, contact the Chief, Governments Division, Bureau of the Census, Washington, DC 20233-6800, or telephone 1-800-642-4901.

MEANING OF ABBREVIATIONS AND SYMBOLS

Abbreviations and symbols in the statistical tables have the following meanings:

Appendix A.

Definition of Selected Terms

An understanding of the terms used in this report is necessary to interpret the statistical findings properly. These terms are grouped in the following categories: Government Units and Types of Governments and Government Functions.

GOVERNMENT UNITS AND TYPES OF GOVERNMENTS

Government Units. A government is an organized entity whose governmental character is evidenced by popular election of the officials or their appointment by public officials, a high degree of public accountability, and the power to raise revenue to provide authorized services. In addition, a governmental unit must have sufficient discretion in the management of its own affairs to distinguish it from the administrative structure of any other government unit.¹

Federal Government. The term Federal, as used in this report, encompasses all civilian employees and payrolls of the U.S. Government, but excludes the uniformed employees and payrolls of the armed forces. District of Columbia data are excluded from this category and included with data for municipal governments.

State Governments. Refers to the governments of the 50 States which constitute the United States.

Local Governments. The Bureau of the Census recognizes five basic types of local governments. Of these five types, three are general purpose governments—county and subcounty general purpose (municipal and township) governments. The other two types are special purpose governments—school district governments and special district governments. These types of governments are briefly described as follows:

1. County governments. Organized local governments authorized in State constitutions and statutes and established to provide general government; includes those governments designated as boroughs in Alaska, as parishes in Louisiana, and as counties in other States.

2. Subcounty general purpose governments. This category include municipal and township governments. Municipal and township governments are distinguished primarily by the historical circumstances surrounding their incorporation.

- a. Municipal governments. Organized local governments authorized in State constitutions and statutes and established to provide general government for a defined area; includes those governments designated as cities, boroughs (except in Alaska), towns (except in the six New England States, Minnesota, New York, and Wisconsin), and villages. This concept corresponds generally to the "incorporated places" that are recognized in Census Bureau reporting of population and housing statistics, subject to an important qualification—the count of municipal governments in this report excludes places that are currently governmentally inactive.

- b. Township governments. Organized local governments authorized in State constitutions and statutes and established to provide general government for a defined area; includes those governments designated as towns in Connecticut, Maine (including organized plantations), Massachusetts, Minnesota, New Hampshire (including organized locations), New York, Rhode Island, Vermont, and Wisconsin, and townships in other States.

3. School district governments. Organized local entities providing public elementary, secondary, and/or higher education which, under State law, have sufficient administrative and fiscal autonomy to qualify as separate governments. Excludes "dependent public school systems" of county, municipal, township, or State governments.

4. Special district governments. All organized local entities other than the four categories listed above, authorized by State law to provide only one or a limited number of designated functions, and with sufficient administrative and fiscal autonomy to qualify as separate governments; known by a variety of titles, including districts, authorities, boards, commissions, etc., as specified in the enabling State legislation.

Government Functions

Employment and payrolls of governments are classified according to the major function or activity of the agency,

¹ For more detailed information concerning the identification and classification of governments, see Volume 1, No. 1, *Government Organization*, of the 1992 Census of Governments.

office, or other organizational entity in which the individual is employed. Following is a brief description of each functional category used in this report:

Air transportation. Operation and support of publicly operated airport facilities.

All other and unallowable. The use of this classification varies from table to table in this report; in each tabulation, however, this classification represents all activities not individually specified.

Correction. Activities pertaining to the confinement and correction of adults and minors convicted of criminal offenses. Pardon, probation, and parole activities are also included here.

Electric power. Activities associated with the production or acquisition and distribution of electric power.

Elementary and secondary education. All activities associated with the operation of public elementary and secondary schools and locally operated vocational-technical schools. Special education programs operated by elementary and secondary school systems are also included as are all ancillary services associated with the operation of schools, such as pupil transportation and food service. Instructional employees includes not only classroom teachers, but also principals, supervisors of instruction, librarians, teacher aides, library aides, and guidance and psychological personnel. Other employees includes all persons not included as instructional employees (e.g., school superintendents and other administrative personnel, clerical and secretarial staffs, plant operation and maintenance personnel, health and recreation employees, transportation and food service personnel, and any student employees).

Financial administration. Includes activities concerned with tax assessment and collection, custody and disbursement of funds, debt management, administration of trust funds, budgeting, and other government wide financial management activities. This function is not applied to school district or special district governments.

Fire protection. Applies to local government fire protection and prevention activities plus any ambulance, rescue, or other auxiliary services provided by a fire protection agency. Volunteer firefighters, if remunerated for their services on a "per fire" or some other basis, are included as part-time employees. The subcategory of firefighters shown in this report includes personnel trained and/or engaged in fire suppression and prevention.

Gas supply. Local government activities associated with the acquisition of gas supplies and distribution to individual consumers.

Health. Administration of public health programs, community and visiting nurse services, immunization programs, drug abuse rehabilitation programs, health and food inspection activities, operation of outpatient clinics, and environmental pollution control activities are included in this classification.

Higher education. Includes local government degree granting institutions which provide academic training above grade 12. Instructional employees includes persons engaged in teaching and related academic research.

Highways. Activities associated with the maintenance and operation of streets, roads, sidewalks, bridges, tunnels, toll roads, and ferries are included at this function. Snow and ice removal, street lighting, and highway and traffic engineering activities are also included here.

Hospitals. Includes only government operated medical care facilities which provide inpatient care. Employees and payrolls of private corporations which lease and operate government-owned hospital facilities are excluded.

Housing and community development. The operation of housing and redevelopment projects and other activities to promote or aid housing and community development.

Judicial and legal. Includes all court and court related activities (except probation and parole activities which are included at the "Correction" function), court activities of sheriff's offices, prosecuting attorneys' and public defender's offices, legal departments, and attorneys providing governmentwide legal service.

Libraries. Applies only to libraries operated by local governments for use by the general public. School and law libraries are included in the "Elementary and secondary education" or "Higher education," and "judicial and legal" categories respectively.

Natural resources. Activities primarily concerned with the conservation and development of natural resources—forest fire prevention and control, flood control, irrigation, drainage, land and forest reclamation, fish and game preservation and control, soil conservation, forestry, agricultural aids and research, agricultural development and inspection, and mineral resources activities.

Other government administration. Applies to the legislative and governmentwide administrative agencies of governments. Included here are overall planning and zoning activities, and central personnel and administrative activities. This function is not applied to school district or special district governments.

Parks and recreation. Government activities that include the operation and maintenance of parks, playgrounds, swimming pools, public beaches, auditoriums, public golf courses, museums, marinas, botanical gardens, and zoological parks.

Police protection. All activities concerned, with the enforcement of law and order, including coroner's offices, police training academies, investigation bureaus, and local jails, "lockups," or other detention facilities not intended to serve as correctional facilities. The subcategory of police officers includes only persons with the power of arrest.

Public welfare. Included in this category are such activities as the administration of various public assistance programs for the needy, operation of homes for the elderly, indigent care institutions, and programs which provide payments for medical care and other services for the needy. Health care and hospital services provided directly by a government, however, are included in the "Health" and "Hospital" functions rather than here.

Sanitation other than sewerage. Refuse collection and disposal, operation of sanitary landfills, and street cleaning activities.

Sewerage. The provision, maintenance, and operation of sanitary and storm sewer systems and sewage disposal and treatment facilities.

Transit. Activities relating to the operation and maintenance of public mass transit systems (e.g., bus, subway, surface rail, and street railroad systems). Elementary and secondary school transportation systems are included in the "Elementary and secondary education" function.

Water supply. Local government activities associated with the production or acquisition of water and distribution to the public.

Water transport and terminals. Activities which are connected with the operation and support of canals and other waterways, harbors, docks, wharves, and other related marine terminal facilities.

Appendix B.

County-Type Areas Without County Governments

Areas with governments legally designated as city-counties and operating primarily as cities (8):

Alaska	City and borough of Anchorage, city and borough of Juneau, and city and borough of Sitka.
California	City and county of San Francisco.
Colorado	City and county of Denver.
Hawaii	City and county of Honolulu.
Montana	Anaconda-Deer Lodge County and Butte-Silver Bow.

Areas designated as metropolitan governments and operating primarily as cities (2):

Tennessee	Metropolitan government of Nashville and Davidson County, and metropolitan government of Lynchburg and Moore County.
-----------------	--

Areas having certain types of county offices, but as part of another government (city, township, State) (17):

Florida	County of Duval (city of Jacksonville).
Georgia	County of Clarke (city of Athens) and County of Muscogee (city of Columbus).
Hawaii	County of Kalawao (State of Hawaii)
Indiana	County of Marion (city of Indianapolis).
Kentucky	Lexington-Fayette Urban County
Louisiana	Parish of East Baton Rouge (city of Baton Rouge), parish of Orleans (city of New Orleans), and Terrebonne Parish Consolidated Government.
Massachusetts	County of Nantucket (town of Nantucket) and county of Suffolk (city of Boston).
New York	Counties of Bronx, Kings, New York, Queens, and Richmond (all part of the city of New York).
Pennsylvania	County of Philadelphia (city of Philadelphia).

Area classified as a separate county area and as a separate State area in population statistics, but counted as a municipal government in census statistics in governments (1):

District of Columbia	Washington city.
----------------------------	------------------

Cities located outside of any “county” area and administering functions elsewhere commonly performed by counties (44):

Maryland	Baltimore city (distinct from Baltimore County).
Missouri	St. Louis city (distinct from St. Louis County).
Nevada	Carson City.
Virginia (41 cities)	Alexandria, Bedford, Bristol, Buena Vista, Charlottesville, Chesapeake, Clifton Forge, Colonial Heights, Covington, Danville, Emporia, Fairfax, Falls Church, Franklin, Fredericksburg, Galax, Hampton, Harrisonburg, Hopewell, Lexington, Lynchburg, Manassas, Manassas Park, Martinsville, Newport News, Norfolk, Norton, Petersburg, Poquoson, Portsmouth, Radford, Richmond, Roanoke, Salem, South Boston, Staunton, Suffolk, Virginia Beach, Waynesboro, Williamsburg, and Winchester.

Unorganized areas bearing county designations (15):

Connecticut (8) county areas with
no county government Fairfield, Hartford, Litchfield, Middlesex, New Haven, New London, Tolland,
and Windham.

Rhode Island (5) county areas
with no county government Bristol, Kent, Newport, Providence, and Washington.

South Dakota (2) county areas
attached to other counties for
governmental purposes Shannon and Todd.

Other unorganized county-type areas (12):

Alaska 11 census areas.

Montana Area of Yellowstone National Park (areas of the park located in Idaho and
Wyoming are included in county areas in those States).

Publication Program

1992 CENSUS OF GOVERNMENTS

The Bureau of the Census has conducted a Census of Governments every 5 years since 1957 covering four major subject fields relating to State and local governments—organization, taxable property values, employment, and finances. The results of the 1992 Census of Governments are being issued in both printed and electronic formats. The printed material includes two preliminary reports and five volumes, which are described individually below. The electronic dissemination will encompass a variety of media—tapes, diskettes, CD-ROM, and electronic networks—described in a separate section following the report descriptions.

PRELIMINARY REPORTS

No. 1. *Government Units* National and State figures on number of governments by type.

No. 2. *Popularly Elected Officials* National and State counts of popularly elected officials by type of government and type of office.

FINAL REPORTS

Volume 1. Government Organization

No. 1. *Government Organization* Data for the Nation and by States on county, municipal, and township governments by population size; on public school systems by size of enrollment, grades provided, and number of schools; and on special district governments by function and amount of outstanding debt. Also shown is the number of local governments, by type, in each county area in the Nation. A description of local government structure in each State is a major feature of this report.

No. 2. *Popularly Elected Officials* Data for the Nation and by States on the number of officials directly elected by the voters, by type of office and by type of government. Also included is the number of officials that are elected directly by the voters in each county area in the Nation. This report includes also a tabular presentation describing elective offices authorized by State constitutions and general laws, with information for each office on length of term, geographic area, and method of compensation.

Volume 2. Taxable Property Values

No. 1. *Assessed Valuations for Local General Property Taxation* Figures for the Nation, States, counties, and cities having a population of 50,000 or more on assessed values (gross and net) of taxable property.

No. 2. *Taxable Real Property Assessment/Sales Price Ratios* Data on assessment levels—including assessment/sales price ratios and dispersion coefficients—that provide important statistical measures relating to real property taxation. Report provides information for selected State and county areas.

Volume 3. Public Employment

No. 1. *Employment of Major Local Governments* Statistics on October 1992 employment and payrolls for: all county governments; subcounty general purpose governments (municipalities and townships) having 25,000 or more population; school systems having 5,000 or more enrollment; and special district governments having 100 or more full-time employees.

No. 2. *Compendium of Public Employment* Employment and payroll data for the month of October 1992 by government function for the Nation, by States, and by type of government. Report also displays data summarized by county area for local government employment and payrolls.

Volume 4. Government Finances

No. 1. *Public Education Finances* Statistics on revenue, expenditure, debt, and financial assets of school systems, presented for the Nation, for States, and for school systems having 5,000 or more enrollment. Data describe financial activity in fiscal year 1992.

No. 2. *Finances of Special Districts* Fiscal year 1992 statistics on finances of special district governments, by States, and for selected large districts.

No. 3. *Finances of County Governments* Statistics on revenue, expenditure, debt, and financial assets of county governments in fiscal year 1992. Report provides national summaries, population size-group information, State area data, and displays of all individual county governments.

No. 4. *Finances of Municipal and Township Governments* Fiscal year 1992 statistics on revenue, expenditure, debt, and financial assets of municipalities and townships. There are national summaries and aggregations by population size-group and State. Report provides data for all individual municipalities and townships with a population of 25,000 or more.

No. 5. *Compendium of Government Finances* A summary of census findings on fiscal year 1992 government finances for Federal, State, and local governments. In addition to financial amounts, report includes derivative calculations of percentage distributions, per capita amounts, and amounts per \$1,000 of personal income. Data are presented for the Nation, for State areas by type of government, and for local governments in each individual county area.

No. 6. *Employee Retirement Systems of State and Local Governments* Membership, receipts, expenditure, number of beneficiaries, and financial assets of State and local government employee retirement systems. Data are shown for the Nation, for States, and for individual retirement systems having assets of \$50 million or more.

Volume 5. Guide to the 1992 Census of Governments

A compilation of table samples from the 1992 Census of Governments report series.

ELECTRONIC MEDIA

The census data will be available in the following electronic formats—diskettes or computer tapes; CD-ROM disks; and electronic network. The *diskettes or computer tapes* will be data files generally compatible with previous annual survey and census of government versions. In general, these files contain: State area data by type of government; local government county area totals; and individual government detail. The *CD-ROM disks* will provide information found in the diskettes or computer tapes, plus an electronic version of each report. *Electronic networks*, such as INTERNET and possibly others, will carry the data described as being available on diskettes or computer tapes.

HOW TO PURCHASE PRINTED REPORTS

When the printed reports described above become available, they will be sold by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20401.

Telephone or fax orders may be used to reduce processing time if your order is to be charged to VISA, MasterCard, or prepaid Superintendent of Documents Deposit Account. Customers will be able to call the Order Desk in Washington, DC, at 202-783-3238, between 7:30 a.m. and 4:00 p.m., eastern time, Monday through Friday, except holidays.

HOW TO PURCHASE DATA ON ELECTRONIC MEDIA

The Data User Services Division of the Bureau of the Census will market all electronic media described above. The telephone and fax numbers for ordering are: telephone, 301-763-4100; fax, 301-763-5198. To expedite processing, you can charge your order to VISA, MasterCard, or a prepaid Bureau of the Census account. You will also be able to order this service by mail from the Data User Services Division, U.S. Bureau of the Census, Washington, DC 20233-8300.
