| 2010 | - | - | - | - | - | - | - | - | - | - |

Footnotes

(1) Incidence rates represent the number of injuries and illnesses per 100 full-time workers and were calculated as:

$(N/EH) \times 200000$ where

N = number of injuries and illnesses

EH = total hours worked by all employees during the calendar year

200000 = base for 100 equivalent full-time workers (working 40 hours per week 50 weeks per year).

(2) Days-away-from-work cases include those that result in days away from work some of which also include job transfer or restriction.

(3) Excludes farms with fewer than 11 employees.

(4) Rounded to zero

(5) Less than 50 cases

NOTE: Dash indicates data not available.
