DOCKET NO. 9288

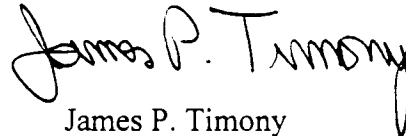

ORDER RE (1) MOTION OF RESPONDENT INTEL CORPORATION TO DETERMINE THE SUFFICIENCY OF COMPLAINT COUNSEL'S ANSWERS AND OBJECTIONS TO RESPONDENT'S SECOND SET OF REQUESTS FOR ADMISSIONS AND (2) MOTION OF RESPONDENT INTEL CORPORATION TO DETERMINE THE SUFFICIENCY OF COMPLAINT COUNSEL'S SUPPLEMENTAL ANSWERS AND OBJECTIONS TO RESPONDENT'S SECOND SET OF REQUESTS FOR ADMISSIONS

Respondent Intel Corporation ("Intel") moves to determine the sufficiency of (1) Complaint Counsel's Answers and Objections to Respondent's Second Set of Requests for Admissions and (2) Complaint Counsel's Supplemental Answers and Objections to Respondent's Second Set of Requests for Admissions. Respondent asks to have deemed admitted over one hundred of its requests for admission on the grounds that complaint counsel's responses are inadequate.

Most of the disputes in this motion appear to involve highly legalistic and overly technical arguments, covering all possibilities, in both the requests and the answers and objections. I am confident, however, that the motions and responses have served to flush out details which will serve as a basis for a good faith negotiated stipulation of facts. If the parties are unable to stipulate to facts and authenticity of documents referenced in Intel's Second Set of Requests for Admissions, Intel has leave to file a motion to determine the sufficiency of complaint counsel's answers and objections to Requests 123-65, 174-83 and 222 of Respondent's Second Set of Requests for Admissions on March 3, 1999. Any response thereto will be due on March 5, 1999.

IT IS HEREBY ORDERED that Intel's motion will be DENIED with respect to Requests 1. 2(b-m), 3. 4(b-p), 5-26, 27(c)-(o), 28, 29(b)-(g), 30, 35-46, 48-55, 58, 82-118, 120-21, 166-73, 184-221, and 223-24.

IT IS FURTHER ORDERED that Intel's motions will be DENIED WITHOUT PREJUDICE with respect to Requests 123-65, 174-83 and 222.

A handwritten signature in black ink that reads "James P. Timony". The signature is written in a cursive style with a large, looped initial "J".
