**COMPUTER TESTING SUPPLEMENT
FOR
AVIATION MECHANIC GENERAL,
POWERPLANT, AND AIRFRAME;
AND PARACHUTE RIGGER**

2005

**U.S. DEPARTMENT OF TRANSPORTATION
FEDERAL AVIATION ADMINISTRATION
Flight Standards Service**

PREFACE

This computer testing supplement is designed by the Flight Standards Service of the Federal Aviation Administration (FAA) for use by computer testing designees (CTDs) in the administration of computer-assisted airman knowledge tests in the following knowledge areas:

Aviation Mechanic General—AMG
Aviation Mechanic Powerplant—AMP
Aviation Mechanic Airframe—AMA
Parachute Rigger—RIG, RMC, RMP

FAA-CT-8080-4E supersedes FAA-CT-8080-4D, Computer Testing Supplement for Aviation Mechanic General, Powerplant, and Airframe; and Parachute Rigger, dated 2001.

Comments regarding this supplement should be sent to:

U.S. Department of Transportation
Federal Aviation Administration
Flight Standards Service
Airman Testing Standards Branch, AFS-630

GENERAL NOTES -100

1. ALL BENDS +/- .5 deg.
2. All holes +/- .003.
3. Apply Alodine 1000.
4. Prime with MIL-P-23377 or equivalent.
5. Trim S-1 C just aft of the clip at STA. 355.750 and forward of the front face of the STA. 370.25 frame and remove from the airplane.
6. Position the -101 doubler as shown. Install wet with NAS1097AD-4-4 and -4-5 rivets and a faying surface seal of PR 1422. Pick up the rivet row that was in S-1 C and the aft rivets in sta. 370.25. Tie doubler into front frame with clips as shown using MS20470AD-4-4 rivets through the clips and the frame.
7. Install 4 NAS1473-3A nutplates with NAS1097-3-4 rivets through the skin and doubler to retain the antenna.
8. Strip paint and primer from under the antenna footprint.
9. Treat skin with Alodine 1000.
10. Install antenna and apply weather seal fillet around antenna base.

Area 3

GENERAL NOTES -200

Note: P. S. = Process Specification
IAW = in accordance with

1. All bends IAW P. S. 1000.
2. All holes IAW P. S. 1015.
3. Heat treat -102 to -T6 IAW P. S. 5602.
4. Alodine IAW P. S. 10000.
5. Prime IAW P. S. 10125.
6. Trim S-1 C just aft of the clip at STA. 355.750 and forward of the front face of the STA. 370.25 frame and remove from airplane.
7. Position the -102 doubler as shown. Install wet with NAS1097AD-4-4 and -4-5 rivets, and a faying surface seal IAW P. S. 41255. Pick up the rivet row that was in S-1 C and the aft rivets in STA. 370.25. Add two edge rows as shown. Tie doubler into front frame with clips as shown using MS20470AD-4-4 rivets through the clips and the frame.
8. Install 4 NAS1473-3A nutplates with NAS1097-3-4 rivets through the skin and doubler to retain the antenna.
9. Strip paint and primer from under the antenna footprint.
10. Treat skin IAW P.S. 10000.
11. Install antenna and apply weather seal fillet around antenna base.

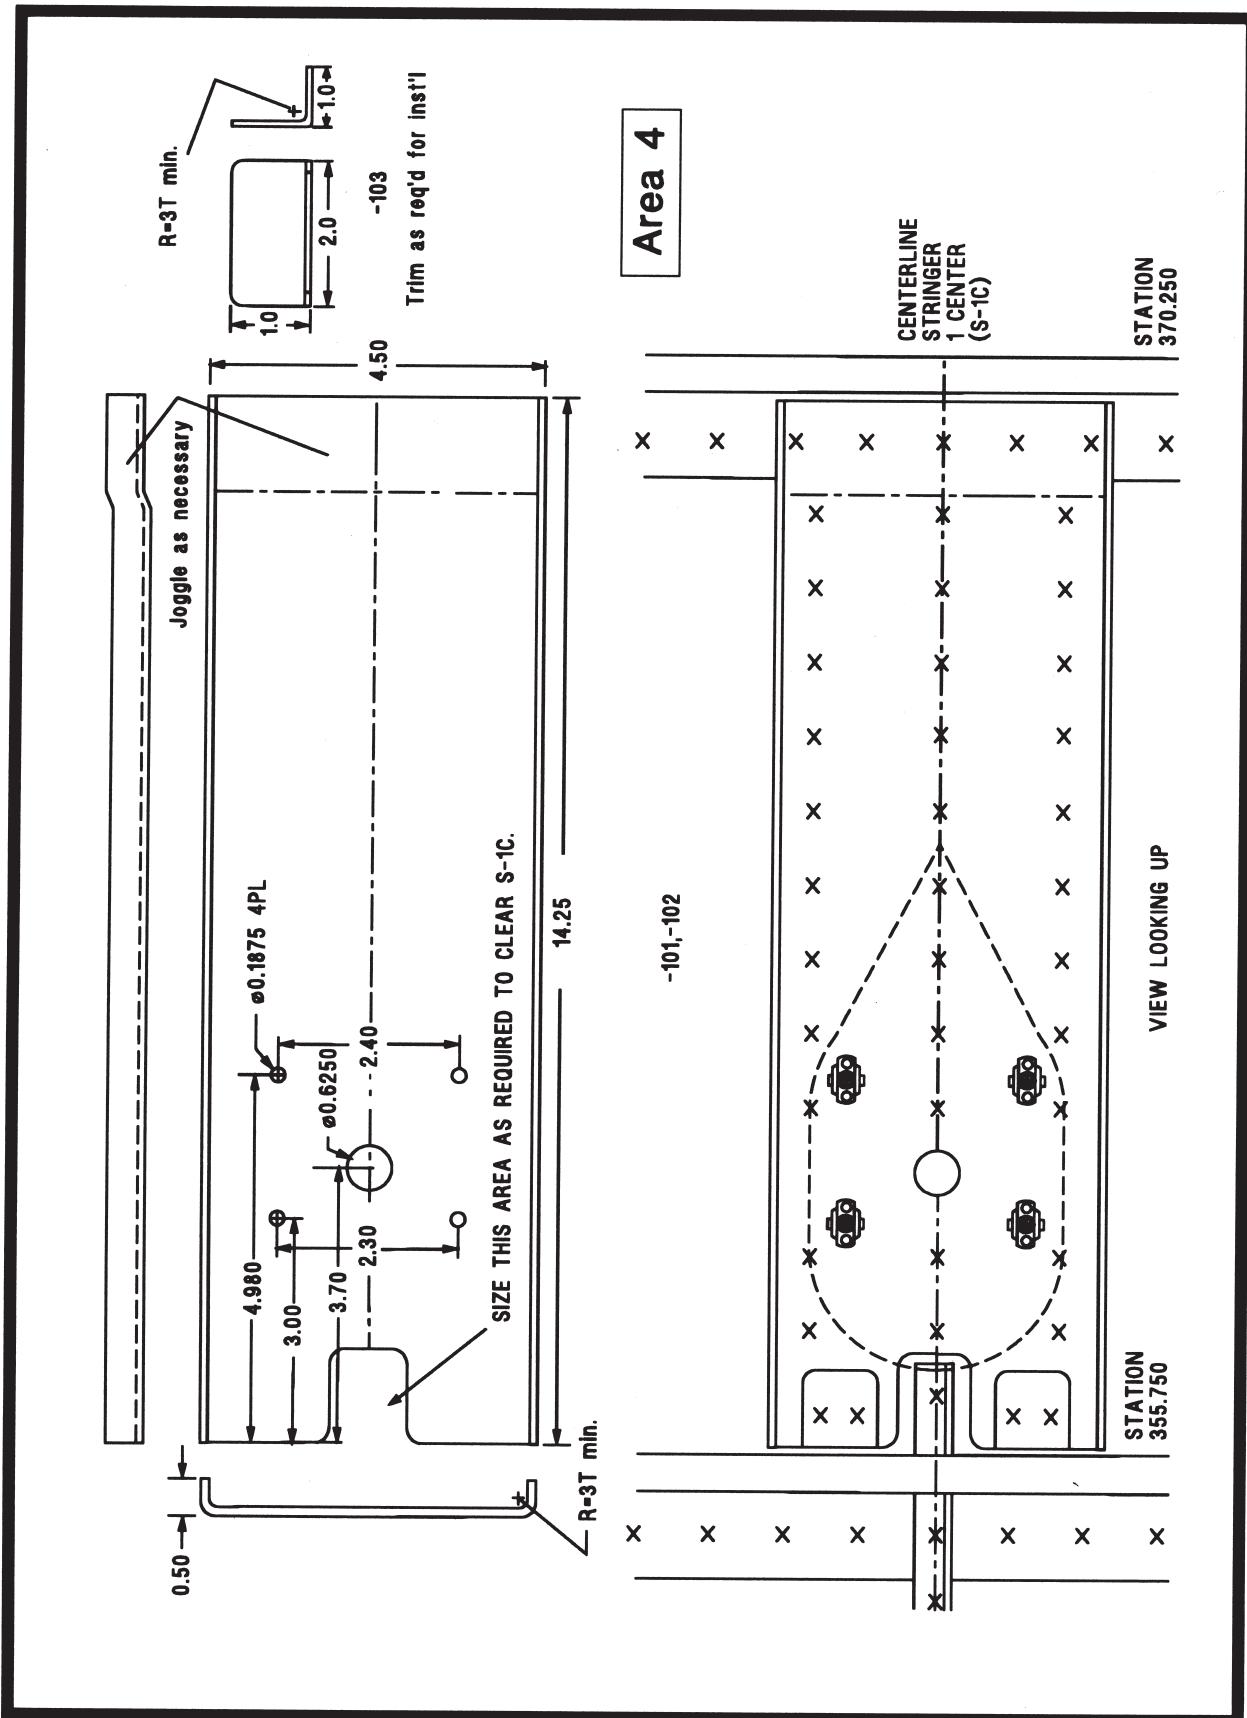

FIGURE 62B.—Part 3 of 3 – Maintenance Data.

Appendix 1

The following is the compliance portion of an Airworthiness Directive. "Compliance required as indicated, unless already accomplished:

- I. Aircraft with less than 500-hours' total time in service: Inspect in accordance with instructions below at 500-hours' total time, or within the next 50-hours' time in service after the effective date of this AD, and repeat after each subsequent 200 hours in service.
- II. Aircraft with 500-hours' through 1,000-hours' total time in service: Inspect in accordance with instructions below within the next 50-hours' time in service after the effective date of this AD, and repeat after each subsequent 200 hours in service.
- III. Aircraft with more than 1,000-hours' time in service: Inspect in accordance with instructions below within the next 25-hours' time in service after the effective date of this AD, and repeat after each subsequent 200 hours in service."

FIGURE 63.—Airworthiness Directive Excerpt.

$$R_t = E^2/P$$

FIGURE 64.— Resistance Total.

$$\begin{array}{l} 1 \quad 3.47 \times 10^4 = 34,700. \\ 2 \quad 2(4^{10}) = 2,097,152. \end{array}$$

FIGURE 65.—Scientific Notation.

FIGURE 66.—Equation.

$$\frac{\sqrt{31} + \sqrt{43}}{(17)^2} =$$

FIGURE 67.—Equation.

1. $(4.631)^5$
2. 4.631×10^5
3. 4.631×10^{-5}

FIGURE 68.—Alternative Answer.

$$(\sqrt{100} + \sqrt{36} - \sqrt{16}) =$$

FIGURE 69.—Equation.

1. $(\sqrt{31}) + (\sqrt{43}) \div 17^2$
2. $(\sqrt{31} + \sqrt{43}) \div 17^2$
3. $(\sqrt{31}) + (\sqrt{43}) - 17^2$

FIGURE 70.—Alternative Answer.

$$V = 1/6\pi D^3$$

FIGURE 71.—Volume of a Sphere.

APPENDIX 2

AVIATION MECHANIC POWERPLANT

This is the compliance portion of an FAA Airworthiness Directive.

Compliance required as indicated:

- (A) For model O-690 series engines, serial Nos. 101-40 through 5264-40 and IO-690 series engines, serial Nos. 101-48 through 423-48, compliance with (C) required within 25 hours' time in service after the effective date of this AD and every 100 hours' time in service thereafter.
- (B) For Model O-690 series engines, serial Nos. 5265-40 through 6129-40 and IO-690 series engines, serial Nos. 424-48 through 551-48, compliances with (C) required as follows:
 - (1) Within 25 hours' time in service after the effective date of this AD and every 100 hours' time in service thereafter for engines with more than 275 hours' time in service on the effective date of this AD.
 - (2) Prior to the accumulation of 300 hours total time in service and every 100 hours' time in service thereafter for engines with 275 hours or less time in service on the effective date of this AD.
- (C) Inspect the oil pump drive shaft (P/N 67512) on applicable engines in accordance with instructions contained in Connin Service Bulletin No. 295. Any shafts which are found to be damaged shall be replaced before further flight. These inspections shall be continued until Connin P/N 67512 (redesigned) or P/N 74641 oil pump drive shaft is installed at which time the inspections may be discontinued.
