Version 5010 refers to the standards that HIPAA-covered entities must use when electronically conducting certain health care administrative transactions, such as claims, remittance, eligibility, and claims status requests and responses.

To be compliant, organizations must use Version 5010 to send and receive claims and all other HIPAA-adopted electronic transactions starting January 1, 2012; however, CMS has implemented an enforcement discretion period, which is in effect until **June 30, 2012**.

Keep Up to Date on Version 5010 and ICD-10.
