

TSA Secure Flight

Your safety is our priority

Airlines are now collecting additional passenger information as the Transportation Security Administration (TSA) implements **Secure Flight**, a program developed to allow for uniform watch list matching by TSA to identify known and suspected terrorists.

How will Secure Flight affect me?

Passengers must provide the following information to the airlines in order to allow TSA to conduct watch list matching:

- Full name*
- Date of birth
- Gender
- Redress Number (if available)**

Providing the data elements allows Secure Flight to more effectively perform watch list matching, resulting in a better travel experience for passengers.

What are the benefits of Secure Flight?

- Unified process enhances security
- Fewer misidentified passengers
- More efficient redress process**

* As it appears on passenger's government-issued ID.

** Those who encounter misidentification are invited to apply for Redress at www.dhs.gov/trip to help prevent watch list matching misidentifications in the future.
