

Personal Income for Metropolitan Areas for 2010

By David G. Lenze

PERSONAL income in the metropolitan portion of the United States rose 2.9 percent in 2010 after falling 1.9 percent in 2009.¹ All but four of the nation's 366 metropolitan statistical areas saw higher personal income in 2010. In 2009, by contrast, personal income declined in most metropolitan areas. It rose in 124 areas and was unchanged in 7 areas (chart 1).²

Personal income growth in 2010 ranged from 10.1 percent in Elizabethtown, KY, to -0.9 percent in Grand Junction, CO. Inflation, as measured by the national price index for personal consumption expenditures, accelerated to 1.8 percent in 2010 from 0.2 percent in 2009.³

In 2010, net earnings grew 2.3 percent, and property income grew 0.6 percent, as the metropolitan portion

of the United States continued to recover from the recession that ended in June 2009. In 2009, net earnings fell 4.0 percent, and property income fell 6.1 percent. The growth of personal current transfer receipts (including unemployment compensation and social security benefits) slowed to 7.8 percent in 2010 from 13.7 percent in 2009.

Earnings by industry

In 2010, earnings grew in the government sector and in 18 out of 21 private industries (table A). In two of these industries—professional services and the

Table A. Growth of Earnings by Industry, Metropolitan Portion of the United States

	Percent change		Dollar change (millions of dollars)

State and local	2.3	0.4	21,451	4,184

1. Personal income is the income received by all persons from all sources. Personal income is the sum of net earnings by place of residence, property income, and personal current transfer receipts. Net earnings is earnings by place of work (the sum of wage and salary disbursements, supplements to wages and salaries, and proprietors' income) less contributions for government social insurance, plus an adjustment to convert earnings by place of work to a place-of-residence basis. Property income is rental income of persons, personal dividend income, and personal interest income. Personal income is measured before the deduction of personal income taxes and other personal taxes and is reported in current dollars (no adjustment is made for price changes).

2. The Bureau of Economic Analysis (BEA) used the county-based definitions of metropolitan statistical areas developed by the Office of Management and Budget (OMB) for federal statistical purposes as updated in December 2009.

3. These inflation rates are calculated using the national price index for personal consumption expenditures. Although BEA does not estimate inflation for metropolitan areas, it does publish regional price parities that allow comparison of price levels across metropolitan areas at a given point in time. See Bettina H. Aten, Eric B. Figueroa, and Troy M. Martin, "Regional Price Parities by Expenditure Class, 2005-2009" SURVEY OF CURRENT BUSINESS 91 (May 2011): 73-87.

Chart 1. Distribution of Personal Income Growth Rates Across 366 Metropolitan Areas

management of companies—the 2010 earnings increase was sufficient for them to recover from the earnings declines in 2008 and 2009.⁴ The health care and educational services industries both continued to expand in 2010; health care grew 3.3 percent, and educational services grew 6.2 percent. In the other 14 private industries that grew in 2010 (including durable-goods manufacturing, nondurable-goods manufacturing, and finance), earnings grew 2.8 percent (on average) in 2010 after falling 6.5 percent in 2009.

In 2010, earnings continued to decline in the construction industry and real estate industry. A 4.5 percent decline brought construction earnings to their lowest level since 2001, and a 2.1 percent decline brought real estate earnings to their lowest level in the 10-year history for the data. Earnings also fell 0.1 percent in the utilities industry after increasing 1.4 percent in 2009.

Earnings by industry

In 2010, private-sector earnings grew in each of the 15 largest metropolitan areas (which account for 48 percent of this sector's earnings in the metropolitan portion of the United States). In two of these areas—San Jose, CA, and Washington, DC—the rebound in 2010 brought their earnings to new highs after falling in 2008 and 2009. In the other 13 large metropolitan areas, earnings grew 2.8 percent (on average) in 2010 after falling 5.9 percent in 2009.

Among the other 351 metropolitan areas, private-sector earnings grew in 301 areas, declined in 46 areas, and remained unchanged in 4 areas. On average, private-sector earnings in these smaller areas grew 2.0 percent in 2010 after falling 4.6 percent in 2009.

Among the 20 metropolitan areas with the fastest earnings growth, the mining industry (including oil and gas extraction) contributed more than any other industry to earnings growth in Midland, TX, Odessa, TX, and Williamsport, PA (in the Marcellus Shale region). The durable-goods industry contributed the most to earnings growth in Elkhart, IN, Columbus, IN, and Oshkosh, WI.

In the four metropolitan areas with the fastest personal income growth in 2010—Elizabethtown, KY, Lawton, OK, Manhattan, KS, and Hinesville, GA—government earnings growth, particularly for the military, was strong. In these four areas, military earnings grew 14 percent or more in 2010.

American Recovery and Reinvestment Act

Net transfer receipts under the American Recovery and Reinvestment Act (ARRA) in the metropolitan portion

of the United States fell to \$58.6 billion in 2010 from \$62.8 billion in 2009. The change was too small to noticeably affect overall personal income growth. ARRA receipts in 2010 consisted primarily of refundable income tax credits, and to a lesser extent, of unemployment compensation, food stamps, Pell Grants, and some miscellaneous receipts. In 2009, ARRA receipts consisted primarily of unemployment compensation and one-time \$250 payments to persons collecting social insurance benefits (table B).

Table B. Net Effect of ARRA Receipts on Personal Current Transfer Receipts by Metropolitan Area¹

	[Billions of dollars]	
	2009	2010
To persons	62.8	58.6
Supplemental Nutrition Assistance Program (food stamps)	5.8	9.1
One-time \$250 payments ²	10.5	0.1
Unemployment programs	37.5	11.5
Refundable tax credits ³	< 0.05	26.4
Other programs	9.0	11.5
Student financial assistance (Pell grants)	7.6	6.8
Other programs ⁴	1.4	4.6

1. Some ARRA funding, such as for Medicaid, replaced state funding and had no net effect on personal current transfer receipts.

2. Payments to recipients of Social Security, Supplemental Security Income, veterans benefits, and railroad retirement benefits.

3. Includes outlays associated with the "Making Work Pay," American Opportunity, and other refundable tax credits as well as an expansion of the earned income and child tax credits.

4. Includes funding for COBRA premium assistance payments and veterans benefits, and payments to cover digital converter box redemptions.

The changing composition of ARRA receipts affected the personal income growth in some metropolitan areas more than in others. ARRA receipts more than doubled from 2009 to 2010 in the McAllen, TX, Laredo, TX, and Brownsville, TX, metropolitan areas, adding more than a percentage point to their personal income growth rates (table C). These three areas on the Mexican border had the lowest per capita incomes

Acknowledgments

The advance estimates of personal income for metropolitan areas were prepared by the Regional Income Division under the direction of Sharon C. Carnevale, Chief. Joel D. Platt, Associate Director for Regional Economics, provided general guidance.

Nonfarm compensation statistics were prepared by Tina C. Highfill, under the supervision of John A. Rusinko, Chief of the Compensation Branch. All other components of personal income were prepared by Andy K. Kim, Brian J. Maisano, and Matthew A. von Kerczek (with assistance from Carrie L. Litkowski and Michelle A. Harder on the farm income components), under the supervision of Mauricio Ortiz, Chief of the Regional Income Branch. Methodological research and analysis of the estimates was provided by David G. Lenze, Assistant to the Chief of the Regional Income Division. The database and tables were prepared by Brooke N. Huotari, Jeffrey L. Newman, Michael J. Paris, Callan S. Swenson, and Jonas D. Wilson, under the supervision of James M. Zavrel, Assistant to the Chief of the Regional Income Division.

4. The names of industries and metropolitan statistical areas in the text are abbreviated; full names can be found in the tables.

in 2009. They benefited from the shift in the composition of ARRA receipts away from unemployment programs targeted to areas with high unemployment to refundable tax credits (such as “Making Work Pay,” American Opportunity, and Earned Income) targeted towards lower income families.

In contrast, ARRA receipts declined 41 percent in Elkhart, IN, subtracting one-half percentage point from 2010 personal income growth. The decline resulted from both an improvement in its unemployment rate, which fell from 18.1 percent in 2009 to 13.6 percent in 2010, and the reduction in the funding of ARRA unemployment programs. ARRA funding of unemployment programs in the metropolitan portion of the United States fell to \$11.5 billion in 2010 from \$37.5 billion in 2009, while the national unemployment rate rose from 9.3 percent to 9.7 percent.

BP oil spill

The BP oil spill in the Gulf of Mexico that began on April 20, 2010, affected regional economic activity in several ways. In addition to the containment and cleanup efforts, the oil spill disrupted fishing and offshore drilling in the gulf and reduced coastal travel and tourism. These economic effects are generally embedded in the source data used to estimate personal income, and BEA does not separately identify them.

In addition, BP began paying claims to individuals, businesses, and governments for property damage, cleanup costs, and lost income. It established a \$20 billion escrow account to expedite payment of these claims. Payments made by BP to persons (whether paid from this escrow account or paid by BP directly) are recorded in personal income on an accrual basis when the obligations are recognized as current transfer receipts of individuals from businesses. Payments from BP to governments and to businesses are outside the scope of personal income.

The oil spill payments that were included in the personal income of the metropolitan portion of the United States amounted to \$443 million in 2010. Although the largest payment (\$125 million) went to New Orleans, LA, it boosted that area’s personal income by only 0.2 percentage point (table D). The smaller amounts received by residents of Crestview, FL, Panama City, FL, and Houma, LA, boosted area personal income by 0.5 percentage point to 0.8 percentage point.⁵

Homeowner assistance programs

The amount distributed under the federal homeowner assistance program to rebuild residences destroyed or

damaged by Hurricane Katrina in August 2005 continued to decline in 2010. This component of the rental income of persons fell to \$822 million in metropolitan Louisiana and Mississippi in 2010 from \$963 million in 2009. Payments declined for all of the metropolitan areas receiving these payments except for Baton Rouge, LA, and Pascagoula, MS, where payments increased slightly (table E).⁶ The effect on personal income was greatest for Gulfport, MS where the assistance declined 0.6 percent of 2009 personal income.

Construction earnings in the seven Gulf Coast metropolitan areas also declined, 7 percent in both 2009 and 2010 (chart 2).⁷ Nevertheless, construction

6. State estimates of homeowner assistance payments were allocated to metropolitan areas on the basis of disbursements by county from the states administering the programs.

7. These seven metropolitan areas include Baton Rouge, LA, but the data for this area are excluded from chart 2 and table F because its construction earnings are not disclosable for 2005 and 2006.

Table D. Current Transfer Receipts of Individuals From the BP Oil Spill, for Select Gulf Coast Metropolitan Areas, 2010

Metropolitan areas	Current transfer receipts	Contribution to the percent change in personal income
	Thousands of dollars	Percentage points

Source data

Wages from the Bureau of Labor Statistics Quarterly Census of Employment and Wages for all four quarters of 2010 were used to estimate annual metropolitan area personal income. On average, wage and salary disbursements represented 53 percent of 2010 personal income in metropolitan areas, but wages and salaries accounted for as little as 21 percent of personal income in Palm Coast, FL, and as much as 87 percent in Hinesville, GA. Other components of compensation—such as employer contributions for social insurance—were extrapolated from 2009 on the basis of wage and salary disbursements.

Some metropolitan area data on crop and livestock production for 2010 and complete metropolitan area data on government payments to farmers for 2010 were available for estimating farm proprietors’ income.

The number of unemployed persons during 2010 was available from the Bureau of Labor Statistics for

Chart 2. Construction Earnings in 6 Gulf Coast MSAs and All Other MSAs, 2005–2010

estimating state unemployment insurance transfer receipts.

Other personal income components—personal current transfer receipts and property income (dividends, interest, and rent)—were extrapolated on the basis of resident population estimates prepared by the Census Bureau.

Additional state and national data for 2010 were used indirectly in the metropolitan area estimates because the national income and product accounts (NIPAs) estimates determine the sum of the state personal income estimates just as the state estimates determine the metropolitan area estimates.⁸

8. The state estimates of personal income are designed to be conceptually and statistically consistent with the national estimates of personal income in the NIPAs. The estimates for all the states and the District of Columbia sum to a national total that is similar to the NIPA estimate except for some minor differences in the timing of the availability of source data, the treatment of U.S. residents working abroad, and the income of foreign residents working in the United States. See Tina C. Highfill, “Personal Income in the NIPAs and State Personal Income,” SURVEY OF CURRENT BUSINESS 90 (October 2010): 104.

Data Availability

This article presents summary advance estimates of metropolitan area personal income for 2010 and revised estimates for 2008–2009. More detailed estimates for 1969–2010 are also available.

Estimates of per capita personal income for 2010 are not available because intercensal county population estimates consistent with the 2000 and 2010 decennial census counts are not currently available.

In April 2012, BEA will release revised estimates of local area personal income for 2008–2009 and per capita estimates of local area personal income for 2001–2009 and new estimates for 2010.

The following estimates for metropolitan areas are available at www.bea.gov/regional/index.htm:

- Metropolitan area income and employment summary (featuring personal income—both farm and nonfarm—and the derivation of personal income for 1969–2010, and per capita personal income and employment totals, which are available only for 1969–2009)
- Compensation of employees by industry by North American Industry Classification System (NAICS) subsectors for 2001–2009, by NAICS sectors for 2010, and by Standard Industrial Classification System (SIC) two-digit industries for 1998–2000
- Personal income by major source and earnings by NAICS subsectors for 2001–2009, by NAICS sectors for 2010, and by SIC two-digit industries for 1969–2000

For more information, call BEA’s Regional Income Division at 202–606–5360, fax 202–606–5322, or e-mail reis@bea.gov.

1. Net earnings is earnings by place of work—the sum of wage and salary disbursements, supplements to wages and salaries, and proprietors' income—less contributions for government social insurance—plus an adjustment to convert earnings by place of work to a place-of-residence basis.

2. The metropolitan area definitions used by BEA for its personal income estimates are the county-based

definitions issued by the Office of Management and Budget as of December 2009, for federal statistical purposes.

Note: Estimates may not add to totals because of rounding.
