

Gulf of Mexico and Caribbean Planning Charts

- Designed to assist VFR pilots in planning their flights through and/or around the Gulf of Mexico and Caribbean area.
- Aeronautical information depicted includes: mileages between airports of entry, a selection of special use airspace and a directory of airports with their available facilities and services.
- This chart is printed on the reverse side of the Puerto Rico-Virgin Islands VFR Terminal Area Chart (TAC).
- Scale: 1:6,192,178
- Updated: Annually
